# General sales conditions

## 1) INTRODUCTION

1.1 The present General sales conditions ("General Conditions"), together with the special conditions foreseen in the order confirmation ("Order Confirmation"), shall govern all the sales of goods between MASCHIO GASPARD S.p.A. ("Seller") and any purchaser ("Buyer") and shall prevail over any other possible conflicting provision contained in forms or other documents utilized by the Seller and/or the Buyer (hereinafter also jointly the "Parties").  
1.2 The General Conditions are regarded as accepted by the Buyer failing any written communication to the contrary within ten days from receipt thereof.  
1.3 These General Conditions can be derogated only by the provisions contained in the Order Confirmation.  
1.4 Unless otherwise agreed between the Parties, the sales subject to these General Conditions are governed by the Laws of Italy, with the express exclusion of the 1980 Vienna Convention on Contracts of International Sales of Products (except for articles 8 and 11 thereof, which shall prevail over any conflicting provision of Italian law).  
1.5 Any dispute, which might arise in relation to these General Conditions and to each contract regulated by the same, shall be submitted exclusively to the Court of Padova, Italy.

## 2) PRODUCTS

2.1 The object of the contracts of sale governed by these General Conditions are any agricultural, commercial and consumer equipments inserted in the Seller's price list ("Products") in force at the time of submission of the order by the Buyer, with the specifications indicated therein.

## 3) ORDERS

3.1 Each Buyer's order ("Order") shall be deemed accepted upon receipt by the Buyer of the Order Confirmation issued by the Seller. Offers submitted by agents or other intermediaries are not binding unless confirmed in writing by the Seller.  
3.2 Descriptions, data, capacities, weights, drawings and other data stated in the Seller's catalogues or publications are indicative and, in any case, not binding, unless otherwise stated in the Order Confirmation.  
3.3 Drawings and other technical documents are not included in the delivery. They belong to the Seller and, consequently, the Buyer shall not reproduce, transfer or show them to third parties.  
3.4 The prices of the Products shall be determined having regard to the Seller's price-lists in force at the date of receipt of the Order - unless otherwise agreed in the Order Confirmation.  
3.5 The Seller reserves the right to change its price-lists at any time.

## 4) PAYMENTS

4.1 Unless otherwise provided in the Order Confirmation, the payment is due from the date of the invoice issued by the Seller and in the currency specified therein.  
4.2 Any payment shall be deemed effected at the Seller's place of business upon receipt thereof by the Seller. The issue of bills of exchange shall not be considered as payment nor shall be deemed a novation of the original obligations. In any case all duties and bank costs shall be born by the Buyer.  
4.3 If payment is to be made by Letter of Credit ("L/C"), the same shall be issued pursuant to the ICC Uniform Customs and Practice for Documentary Credits in force at the time of the Order. Furthermore, the L/C shall be irrevocable and confirmed by a first class bank located in Italy and satisfactory to the Seller, transferable in whole or in part, payable on the due date set out in the Order Confirmation and negotiable against the documents mentioned therein. Should Seller not require confirmation of the L/C, payment and negotiation thereof shall be in any event effected at the counters of the advising bank.  
The opening of the L/C shall be notified to the Seller by the confirming or advising bank, as the case may be, within 10 (ten) banking days from receipt of the Order Confirmation by the Buyer. Failure to do so shall automatically cause the cancellation of the order, unless the Seller otherwise communicates.  
The L/C shall be effective and binding until 30 (thirty) days after expiry of the payment term indicated in the Order Confirmation.  
If, for any reason, the original payment terms are extended, the Buyer undertakes to renew the letter of credit. Failing the Buyer to renew the L/C within 5 (five) days from the extended date, the payment shall deemed as immediately due.  
4.4 The Seller shall in any case and under these circumstances have the right to suspend any supply in progress. If said delay exceeds 60 days, the Seller shall be entitled to terminate the contract and retain all sums already cashed, liquidated damages  
4.5 The price for the Products shall be exclusive of any value added tax or tax duty and all costs or charges in relation to packaging, loading, unloading, carriage and insurance all of which amounts the Buyer shall pay in addition and underlie the same terms and conditions of payment of the Products.

## 5) DELIVERY TERMS

5.1 The delivery terms are stated in the Order Confirmation. Unless otherwise agreed in writing by the parties, the delivery terms are to be calculated with reference to the working days under the Italian calendar. The Terms indicated in the Order Confirmation are indicative and in case of delay in delivery the Buyer shall not be entitled to cancel the Order.  
5.2 Deliveries shall take place Ex Works (Incoterms 2010) at Seller's premises, Campodarsego (PD), Italy. Therefore, if for any reason the Buyer fails to accept delivery of any of the Products when they are ready for delivery, or the Company is unable to deliver the Products on time because the Buyer has not provided appropriate instructions, documents, licenses or authorizations:  
(a) risk in the Products shall pass to the Buyer (including for loss or damage caused by the Seller's negligence);  
(b) the Products shall be deemed to have been delivered; and  
(c) the Seller may store the Products until delivery whereupon the Buyer shall be liable for all related costs and expenses (including without limitation storage and insurance).

## 6) RISK AND PROPERTY TRANSFER

6.1 Ownership of the Products remains vested with the Seller and shall not pass to the Buyer until full and complete payment of the Price is effected by the latter and, should the payment be made by means of cheques or bills of exchange, until their clearance, even if such documents are delivered in advance. Nevertheless, the Parties agree that all the risks deriving from loss or damage to the Products due to any cause whatsoever will pass to the Buyer as from the time of delivery Ex Work Incoterms 2010.  
6.2 All possible costs for the registration of the retention of title shall be deemed totally due by the Buyer. Before the total payment of the Price is effected, the Buyer is not entitled to resell, hire or allow third parties to use the Products.  
6.3 The Buyer shall have the obligation to inform the Seller, within 24 hours, of any enforcement proceeding or interim injunction rowsd by third parties on Products under reservation of title. The Buyer shall remain, in any case, liable to the Seller for any expense or damage, which the Seller may suffer in relation with such acts.

## 7) WARRANTY AND CLAIMS

7.1 The Seller warrants that the Products are free from defects in material and workmanship under normal use. Unless specifically indicated in writing by the Seller, this warranty will be valid for a period of 12 months from the delivery ExWorks of the Products and may not, in any case, be suspended or extended as a consequence of the non-use of the Product by the Buyer, even if due to warranty interventions. The Seller grants no other warranty to the buyer, who expressly waives any further legal or conventional warranty, whether implied or expressed.  
7.2 At the time of delivery, the Buyer shall examine carefully each Product in order to verify the conformity of the supply to the agreed quantity and quality, verifying also the existence of patent defects. Should the Buyer discover any defect or non-conformity in the agreed Product, it shall give immediate notice to the Seller by signing the delivery note with an endorsement of "reservation of right to inspect" and notifying its claims to the Seller, on penalty of forfeiture, within the following 8 days. After such term has elapsed, the supply shall be deemed accepted without reservation by the Buyer, with consequent waiver by the same to contest any defect in the Product.  
7.3 Any latent defects, which are not discoverable at the time of delivery, shall be notified on penalty of forfeiture within 8 days from discovery thereof in the same way as patent defects.  
7.4 Notwithstanding the provisions of Paragraphs 7.2 and 7.3 hereof, in no event shall a complaint be accepted by the Seller after twelve (12) months from the date of delivery of such Products to the Buyer.  
7.5 In case of acknowledgement of the defects and of timely report of such defects by the Buyer, the Seller shall at its discretion and in accordance with its technical standards, repair and/or replace free of charge Ex Works (Incoterms 2010) Maschio - Gaspardo S.p.A. product plant the Product or its defective parts, or refund the Buyer the price paid for the defective Product.  
7.6 The warranty mentioned in the present Article 7 shall cover only defects in material or workmanship under normal use of the Product. In no case can the warranty be extended to cover (i) Products on which the identification number or trademark has been altered or defaced; (ii) the defects caused by: (a) improper assembly or installation of the Product by the Buyer or third parties, (b) insufficient maintenance thereof, (c) improper or non-compliant use with respect to the normal functioning methods, (d) normal wear and tear (particularly of blades, bolts, nuts, gaskets, shear pins, pin shafts, oil, hydraulic hoses), (e) repairs, additions, alterations or interventions made by third parties without the written consent of the Seller, (f) the transit from the place of delivery to the final destination, (g) misuse or incorrect storage, (h) use of non-original spare parts, (i) fire, acts of God, or any other unforeseen events not ascribable to the Seller.  
7.7 No other form of intervention under warranty and/or refund shall be claimed by the BUYER: IN PARTICULAR SELLER SHALL NOT BE LIABLE FOR DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES (ALSO ACCORDING TO ARTICLE 1519-QUINQUES OF THE ITALIAN CIVIL CODE) WHICH MAY DERIVE FROM THE DEFECTIVE NATURE AND/OR NON CONFORMITY OF THE PRODUCTS, SUCH CLAIMS FOR DAMAGES BEING, TO THE EXTENT PERMITTED BY LAW, EXPRESSLY EXCLUDED AND WAIVED BY THE BUYER.  
7.8 Any possible claim by the Buyer, as well as any judicial action by the same, shall not, in any case, entitle the Buyer to suspend or delay the payments due under the sales contract.

## 8) NON-ASSIGNABILITY AND SEVERANCE

8.1 The Buyer's rights, credits and obligations may not be transferred to third parties without the Seller's previous written consent.  
8.2 The invalidity of one or more clauses of the General Conditions or Order Confirmation shall not affect the validity of the remaining clauses.  
8.3. Pursuant to and by effect of art. 1341 - 1342 Civil Code, the parties declare to have read and approved all the articles of the present general conditions, and in particular Articles. 1.5); 4.4); 5.2.a); 7.7) and 8.1).

The Company reserves the right to apply modifications to prices, machines equipment or images without advance notification.

## MTR planting unit

The MTR sets a new standard in precision planters: extends applications of the MT unit on prepared soil or in minimum tillage conditions, with or without residues, ensuring maximum precision regarding seeding depth and seed deposition distance. The new multi-set furrow closing device, closes the furrow guaranteeing perfect seed covering even in the most challenging conditions; the opener discs, the biggest in their class, are driven by the new ARM STRONG linkage, designed to guarantee stability even with fast operating speeds.

# Vacuum Precision Planters

## REGINA planting unit

REGINA planting unit is made for seeding on firm ground, with serrated front discs for furrow opening, double disc coulters and a pair of wheels for furrow closing. The central part of the unit consists of a single body with greater resistance to ground impact (+50%) and side stress (+25%). Each unit exercises a pressure of 660 lbs. on the ground.

The REGINA planting unit is suitable for sowing on firm ground even if covered by stubble. It maintains a constant seeding depth and ensures good seed/soil contact.

## PNEUMATIC PRECISION PLANTER STANDARD PLANTING UNIT

PRECISION PLANTERS

1	Double parallelogram	8	Rear compression wheel (farmflex, rubber Ø 11.4-in., "V" shaped 2" rubber type, "V" shaped 1" rubber type)
2	Pressure and/or relief spring	9	Furrow covering unit to make sure the seeding furrow is filled
3	Rapid release of planting unit	10	Aluminium distributor
4	Fast opening for easy seed plate replacement, low-friction gasket	11	Coulter featuring special profile with interchangeable tip
5	Plastic hopper – 9 gal.	12	Adjustable clod breaker
6	Seeding depth adjustment	13	Cardan drive transmission with quick release, acoustic safety device, low maintenance
7	Seed selector	14	Sinterized self-lubricating bushings

## FEATURES AND BENEFITS

Precision planting unit with equalizer  
Suffolk or double disc coulter  
Specific unit with equalizer for sugarbeet planting  
Precision and reliability in seed deposition  
For planting in finely prepared soil, or rough soil with plant residues  
Planting unit suitable for shallow seeding (maximum furrow depth can vary from 1.3 to 2 in.)

## PLANTING UNITS

### MEDIUM DEPTH PLANTING

Depending on the way the rear wheel is set, the maximum depth of the seeding furrow can vary from 2.7 to 4 in.

Seed boot coulter for thoroughly prepared soil.

### SUPERFICIAL PLANTING

Depending on the way the rear wheel is set, the maximum depth of the seeding furrow can vary from 1.3 to 2 in.

Shallow seeding furrow coulter features double rubber wheels and two rubber wheels and one smaller seed press wheel mounted behind the spike

Double-disc furrow coulter. For rough soil with residuals.

Seed expulsion unit for sugarbeet version

## PRESS WHEEL

Farmflex rubber wheel  
Ø 15 in. (with front seed press) For finely prepared and/or sandy soil

2" V shaped rubber press wheel. For medium-textured soils also wet, all-purpose use

1" V shaped rubber press wheel. For hard soil, also wet.

# SP SPRINT

## PNEUMATIC PRECISION PLANTER (corn-sunflower-soybean)

## Notes

## SP SPRINT-ST-SARA ACCESSORIES

- [3] Seed press wheel and double disc coulter planting unit not compatible
- [4] Not compatible with front wheels R20, R22, R26
- [5] Use only if the tractor is equipped with a priority output hydraulic system (constant flow rate in case other applications are used)
- [6] Not compatible on planter with odd row number
- [7] Application possible only with micro tank of same size
- [8] Specify model and number of rows
- [50] Already present in 6 rows versions with same rows distance or more than 28-in. with spreader BBP

# MTR Planting unit

## PRECISION PLANTERS

1	ARM STRONG reinforced parallelogram, guarantees constant seeding depth also on uneven terrains and stability at high working speeds. (For the MONICA-MAGICA-MAGA models the parallelogram is a short type parallelogram)	7	Easy and quick seed plates replacement	15	No wear coulter, for an optimal furrow creation and inner disc cleaning
2	Adjustable spring	8	Standard slide for an easy seed unload	16	Seeding depth controlled directly on the seed dropping point by two independent gauge wheels
3	Sintered self-lubricating bushings. Under load conditions, releases a small oil particles to lubricate the hinge.	9	Robust distributor body entirely in aluminum	17	Wheel hub with waterproof removable bearings
4	Seeding precision is guaranteed by the vacuum pneumatic system	10	Handle for continuous seeding depth adjustment from 0.4 to 5 in.	18	Opening discs diameter 16.5 in., 0.2 in. thickness. The biggest of its category for a perfect furrow creation in different soil conditions
5	Standard hopper 1 bu. (Optional 1.7 bu.)	11	Tungsten coated scraper for NO-STOP operation on moist soil	19	Easy to replace front disc protection
6	Easy seed plate inspection through the rear window	12	Rear closing wheels adjustment with multi position lever. Wheels can be staggered and spaced.	20	Homokinetic PTO shaft drive with quick release, matches high reliability and low maintenance. (Electric row shut off available as optional)
		13	Steel gauge wheel support arm with integrated scraper		
		14	OPT: Excludable INOX seed press wheel Ø 12 in., with tungsten coated scraper		

# MTR Planting unit

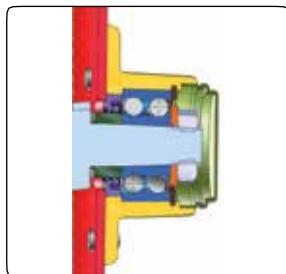

The MTR sets a new standard in precision planters: extends applications of the MT unit on prepared soil or in minimum tillage conditions, with or without residues, ensuring maximum precision regarding seeding depth and seed deposition distance. The new multi-set furrow closing device, closes the furrow guaranteeing perfect seed covering even in the most challenging conditions; the opener discs, the biggest in their class, are driven by the new ARM STRONG linkage, designed to guarantee stability even with fast operating speeds.

MULTI SET REAR WHEEL WITH STAGGERING AND SPACING ADJUSTMENT

## PLANTING UNITS

The SUPER SEAL guarantees sealing in the most challenging applications, even without lubrication

Double rim ball bearings and triple sealing SUPER SEAL

Double seed selector

Front opening disc (optional)

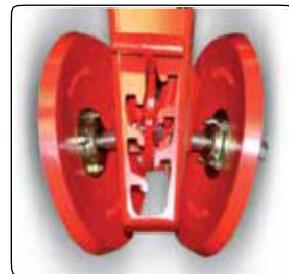

Adjustable spring

Gauge wheels profile guarantees supporting, soil firming and disc cleaning action

Rubber 1" wheels

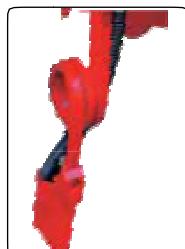

Cast iron wheels

Rubber 2" wheels

**PNEUMATIC PRECISION PLANTER WITH FIXED FRAME (corn-sunflower-sugarbeet-soybean)**

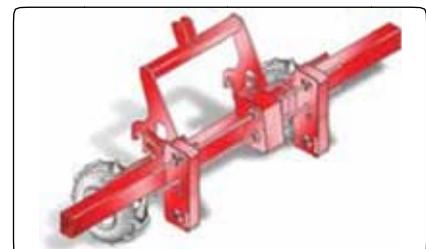

Special disc bearing seal protection  
Scraper with tungsten carbide profile

Suffolk coulter

Double-disc coulter

Installation of 20 x 8.00 - 10 front transmission wheels (optional)

**STANDARD EQUIPMENT****MTR Planting Unit**

- "V" shaped rubber press wheels (specify type)
- 1 standard seed plate each row (specify seed type)
- Three point hitch with floating 1st and 2nd points, cat. II
- Pair of transmission gears
- Dual drive (6 row 18-in. version single drive)
- 1" 3/8 Z6-Z6 PTO shaft (length 28-in.)
- Hydraulic row marker
- Centralized SPEEDY SET adjustment for MINIMAX fertilizer dosers
- 18 in. version with seed knocker (disassembled)
- 6 row 18-in. version with 4.00 x 65 narrow side depth gauge wheels
- Vacuum gauge
- Lighting kit (disassembled)
- Warning boards (disassembled)
- Tractor hydraulic distributors required: at least 1

**Drive wheels:**

- 4 rows 30: n°2 rear 5.00-15
- 4 rows 30 BB steel: n°2 rear 6.50-15
- 5 rows 30: n°2 rear 6.50-15
- 6 rows 18 n°2 rear 5.00-15
- 6 rows 30: n°2 rear 6.50-15
- 7 rows 24 n°2 rear 6.50-15
- 8 rows 30: n°4 rear 6.50-15
- 12 rows 18: n°4 front 6.50-15

Frames longer than 13-ft. have a 6x6 in. section

Versions with BB or R20 front wheels always use a frame with a 6x6 in. section

[9] Steel fertilizer

[17] Specify in the order if the 8-ft. frame is desired - The 8-ft. road width can be obtained with the 28 or 30-in. inter-row by installing narrow external depth wheels (400 x 65) and 1" "V" compression wheels

# MTE Telescopic MTR

PNEUMATIC PRECISION PLANTER WITH TELESCOPIC FRAME (corn-sunflower)

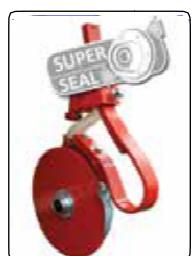

PRECISION PLANTERS

Special disc bearing seal protection  
Scraper with tungsten carbide profile

Suffolk coulter

Double-disc coulter

## STANDARD EQUIPMENT

MTR Planting Unit

1 bu. seed hopper

"V" shaped rubber press wheels (specify type)

1 standard seed plate each row (specify seed type)

Three point hitch with floating 1st and 2nd points, cat. II

Drive wheels 6.50 - 15

Double drive transmission

Pair of transmission gears

1" 3/8 Z6-Z6 PTO shaft (length 28-in.)

Hydraulic row marker track on wheel (optional track in center)

Centralized SPEEDY SET adjustment for MINIMAX fertilizer dosers

Vacuum gauge

Lighting kit (disassembled)

Warning boards (disassembled)

Tractor hydraulic distributors required: Min 2

Only for Big Bag version:

Pneumatic fertilizer kit for external rows

High capacity iron fertilizer hopper: 28.3bu.

Hopper window for fertilizer level control

## STANDARD EQUIPMENT

### MTR Planting Unit

- "V" shaped rubber press wheels (specify type)
- 1 standard seed plate each row (specify seed type)
- Seed hopper 36 l
- 18-in. version with seed knocker (disassembled)
- Vacuum gauge
- 1000 rpm PTO
- 1 3/4 Z20, 1 3/8 Z21, 1" 3/8 Z6, Z8 - Z6 fan PTO shaft with yoke (length 38-in., with free wheel)
- Hydraulic row marker track in center and retracting
- Double drive transmission
- Pair of transmission gears
- 6.50 - 15 drive wheels (n.4)
- Tractor hydraulic distributors required: - Min 1
- Monitor SERIO

### DURING WORK

- Three point hitch with fixed 1st and 2nd points, cat. III

### IN TRANSPORT (towed version)

- Two-point hitch with fixed points, cat. III
- Integrated trailer wheels 10.0/75-15.3 - (towed version)
- Lighting kit (disassembled)
- Warning boards (disassembled)

Tractor power HP (kW), integrated trailer version:

180-200(130-150) micro base versions

# SCATENATO

TRAILED PNEUMATIC HOPPER  
TRANSPORT WIDTH 10-ft.  
COUPLED WITH MANTA PRECISION SEED DRILL

## PRECISION PLANTERS

### STANDARD EQUIPMENT

Trailed pneumatic hopper for fertilizer storage  
Fan driven by mechanical 1000 PTO with driveline  
R4 1" 3/8 Z6-Z6 constant PTO shaft speed, free wheel (length 62 in.)  
Hopper capacity: 85 bu.  
Electric dosing - GENIUS system  
Tractor hydraulic distributors required: Min 3 [24]  
Tractor power required only for the trailer: 100 HP [24]  
Calibration and emptying tray  
Electronic balance  
Inspection footboard with ladder  
Wide transport wheels 700/50-22.5  
Demountable axle  
Braking system (please specify if hydraulic or air)  
Parking brake  
Protection tarpaulin  
Net weight 5700 lbs.  
Towing eye Ø 2 in.  
Parking stand 6600bu.

Dosing rollers: G1000 mounted, F25-125 as spare, G1002 mounted for fertilizer  
Rearview camera  
Working lights  
Lighting kit (disassembled)  
Warning boards (disassembled)  
Toolbox  
Rear quick hitch on 1st-2nd point cat. III^3N  
Slingshot for distributor exclusion  
Load cell ready  
Rape double sensor ready (pre-alarm)  
Inner tank deflector for fertilizer support  
Attention! For connection to planter trolley not designed for this use, contact the Commercial Organization at Maschio Gaspardo S.p.A.

	8 rows microgranulator (4x0.9 bu.)	G99589452	5,600

Machine for wide surfaces, it adapts to uneven ground for the whole width, with a seeding front up to 40-ft. Several devices allow easy transport operations.

III cat. seeding quick hitch

## FOLDING TOOL-CARRIER FRAME IN 2 SECTIONS

Extremely strong

Highly maneuverable

All-purpose use

The folding toolbars allow for road transportation at 20ft. The toolbars are designed to allow mounting of utensils for planting or soil preparation for a total overall length of 40ft..

The high ground clearance of the implements in the transport position ensures safe transport and excellent maneuverability at work.

(METRO AIR) double effect cylinders on seeding hitches

## METRO AIR version

AIR seeding hitch with double effect cylinders and Nitrogen accumulators.  
Combination between this system and AIR SPRING system allows a better and homogenous soil penetration.

(METRO AIR) Nitrogen accumulators.

AIR SPRING - Central adjustment of the load for the seeding units by air springs (METRO AIR)

# METRO MTR

FOLDING TOOL-CARRIER FRAME COMBINED WITH 2 PRECISION PLANTERS (corn-sunflower-sugarbeet-soybean)

PRECISION PLANTERS

Disc coulter Ø 355 mm

Special disc bearing seal protection  
Scraper with tungsten carbide profile

Monitor SERIO

Long Life Core

## STANDARD EQUIPMENT

MTR Planting Unit

Disc coulter Ø 14 in.

Seed hopper capacity: 1bu.

Front transmission wheels 6.50 x 15

Monitor SERIO

FRAME:

Pair of wheels 560/60 22.5

3+3 frame wheel track eradicator

2 seed drill hitches for Metro 16-18-24

Hydraulic system

Centralized fan for precision planters  
with Homokinetic PTO shaft

PTO shaft with 1 3/4 Z20, 1 3/8 Z21, 1 3/8 Z6, Z8-Z6 tractor side joker,

length 54-in., with free wheel

Hydraulic row marker track in center

Transport width 20-ft.

AIR version:

MTR Planting Unit 1

bu. seed hopper

Disc coulter Ø 14-in.

1" x 14" shaped rubber press wheel

AIR SPRING - Central adjustment of the load for the seeding units by  
air springs

Frame with double effect cylinders and nitrogen accumulators  
seeding hitches.

## Notes

## MTR PRODUCT RANGE ACCESSORIES

- [4] Not compatible with front wheels R20, R22, R26
- [5] Use only if the tractor is equipped with a priority output hydraulic system (constant flow rate in case other applications are used)
- [7] Application possible only with micro tank of same size
- [8] Specify model and number of rows
- [12] Not compatible on planter with odd row number and MAGICA model
- [13] Not compatible with MTE300 row spacing 32-in.
- [14] Not compatible with MONICA-MAGICA
- [34] Not compatible with MAGA-MIRKA-RENATA-REGINA-ROMINA
- [50] Already present in 6 rows versions with same rows distance or more than 28-in. with spreader BBP
- [82] Not compatible with MTR 6 rows 18-in. 8-ft frame with front R20 wheels version
- [83] Not compatible with MTR 6 rows 18-in. 8-ft. frame with fertilizer disc coulters

# MTR PRODUCT RANGE ACCESSORIES

---

# REGINA Planting unit

1	Parallelogram linkage with double adjustable spring
2	Plastic seed hopper, 1.7 bu. capacity
3	Handle for seeding depth adjustment up to 5-in.
4	Soil scrapers keeps the discs constantly and completely clean
5	Cast iron made rear closing wheels can be staggered and slanted to the vertical plane. Adjustment through a 6 position lever.
6	Rubber gauge wheels aligned with opening discs, guarantees constancy of seeding depth thanks to the independent vertical movement
7	Large diameter (16.5 in. diameter - 4mm thickness) double disc furrow openers, sharp edge, oversized bearings and special super seal protection
8	Front rippled disc: shreds the stubble to an excellent degree, allows a better furrow creation by the disc openers, increases fine soil presence
9	Rotary trash-wheels row cleaner, suitable to manage high residues volume (optional)
10	Weight of REGINA planting unit: 375 lbs. (with opener disc and closing wheels). Up to 660 lbs. down pressure

# REGINA Planting unit

REGINA planting unit is for seeding on firm ground, with serrated front disc for furrow opening, double disc coulter and a pair of wheels for furrow closing

The central part of the unit is formed by a single piece to provide greater strength when it strikes the ground (+50%) and to be able to withstand side stress (+25%)

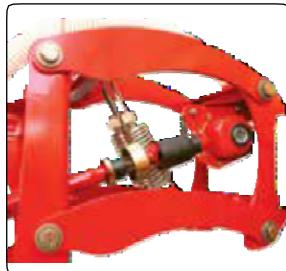

Up to 660 lbs pressure exercised on the ground

The REGINA planting unit is able to handle stubble along the planting line. It maintains a constant seeding depth and a good seed to soil contact

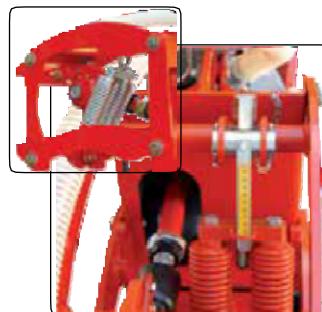

## PLANTING UNITS

16.5 in. diameter opening discs 4 mm thickness with bearing with a double row of balls and super seal protection

Heavy Duty parallelogram with self-lubricating sintered bushes

Double-spring planting unit pressing system with graduated scale and safety locking device. Pressure adjustable from 397 to 660 lbs

6-position press wheel pressure adjustment with handle and wheel staggering option

Trash wheels to use when there is a large amount of stubble. Pair of star wheels with independent structure, able to move on the vertical plane so as to clear the stubble away from the planting line (applicable on request)

Seeding depth regulation in the continuous mode down to 5 in. (theoretic value in ideal planting conditions)

Plastic seed hopper 1.7 bu. capacity

Furrow opener disc, striated profile, smooth edge

Planting unit drive with quick-release driveline-requires servicing less frequently

# REGINA

## PRECISION PLANTER FOR DIRECT PLANTING (corn-sunflower-sugarbeet-soybean)

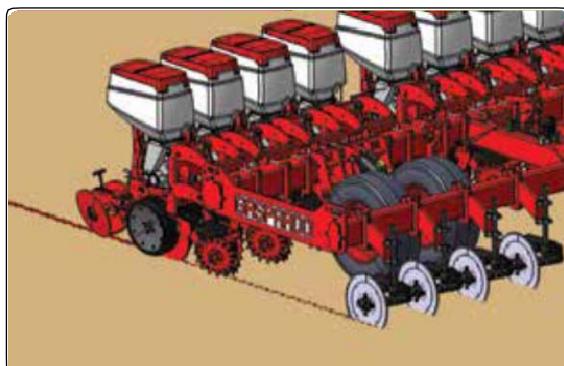

Disc coulter for fertilizer

### STANDARD EQUIPMENT

- Towed version with towing eye  
Hydraulically lifted transport trolley with 13.0/55-16 wheels (10.0/75-15.3 twin wheels for 8 rows 30 in. version)  
Double-bar frame with transport wheels at front  
Transmission wheel 3x6.50 - 6 in protected position  
Row spacing with quick configuration from 18 in. onwards  
Oil-bath gearbox with hand lever and drive transmissions with drivelines  
Hydraulic row marker with 18 in. diameter disc and ballast  
Plastic fertilizer hopper 2x46 bu. liters with inspection windows (15 ft. frame versions)  
Plastic fertilizer hopper 28 bu. (up to 11.5 ft. frame versions)  
Centralized SPEEDY SET adjustment for MINIMAX fertilizer dosers (version with fertilizer)  
 $\varnothing$  17 in. disc coulter for fertilizer (version with fertilizer)  
1 bu. capacity microgranulator hopper (version with microgranulator)  
1" 3/8 Z6-Z6 constant speed PTO shaft (length 1565) with free wheel  
Hydraulic row marker  
Inspection footboard with folding steps (version with fertilizer or microgranulator)  
Lighting kit (disassembled)  
Warning Boards  
Vacuum gauge
- $\varnothing$  16 in. disc coulter planting units  
Internal scrapers

[35] Also available in painted steel fertilizer

[36] Auxiliary coulter disc Ø 17 in. (optional)

DESCRIPTION	Code	Price \$
<b>ACCESSORIES</b>	REGINA seeding unit 1.7 bu. hopper	4,122
	Pair of V 1"-14" cast iron wheels	282
	Pair of V 1"-14" rubber wheels	282
	Trash wheels	947
	Steel seed press wheel Ø 11.6 in.	365
	Pair of auxiliary coulters disc diam. 17in (1r.+1l.) - included [36]	2,048
	Pair of auxiliary coulters disc diam. 17in (1r.+1l.) - supplied separately [36]	1,856
	REGINA ballast kit 10ft frame (included)	1,843
	REGINA ballast kit 11ft frame (included)	2,150
	REGINA ballast kit 15ft frame (included)	2,765
	REGINA ballast kit 19ft frame (included)	3,686
	Price surcharge for 13.0/55-16 wheels, only for versions with twin wheels (supplied with the machine)	845
	Twin wheels conversion from 10.0 to 13.0/55-16	2,758
	Complete right fertilization row kit	1,088
	Complete left fertilization row kit	1,088

[36] To be used on very hard ground. Not compatible with odd rows. Ballast frame kit is required

## NO TILL PRECISION PLANTER (corn-sunflower-soybean) TRANSPORT WIDTH 10-ft.

### STANDARD EQUIPMENT

Semi-mounted version with two point hitch, cat. II  
Open/close frame safety devices, hydraulically controlled, with cabin controls  
Hydraulically lifted transport trolley with 10.5/80-18 14PR wheels  
Transmission wheel 3x6.50 - 6 in protected position  
Centralized transmission seed/fertilizer/micro  
Gear lever, 16 ratios  
Mechanical fan drive  
R2 1"3/8 Z6-Z6 L35 in free wheel PTO shaft  
B1 1"3/8 Z6-Z6 L28 in wheel PTO shaft (versions without fertilizer) Hydraulic row marker with 450 mm diameter disc (track on tractor center)  
Plastic fertilizer with 46 bu. capacity (version with fertilizer)  
Centralized SPEEDY SET adjustment for MINIMAX fertilizer dosers (version with fertilizer)  
Inspection footboard with folding steps (version with fertilizer)  
Bee safeguarding deflector hoses  
Double disc fertilizer coulter (version with fertilizer)  
Pneumatic fertilizer kit for external rows with supplementary fan (version with fertilizer)  
1 bu. capacity microgranulator hopper (version with microgranulator)

REGINA Planting units with 16 in. diameter disc coulter  
Internal scrapers  
"V" 1"x14" press wheels  
1 standard seed plate per unit (specify type)  
Lighting kit (disassembled)  
Warning boards (disassembled)

SERIO-SO monitor  
• Preset for row shut-off device  
• Seed control by row with alarm  
• Partial and total worked area (ha)  
• Seeding distance (cm) average for all rows or single row  
• Planting density  
SD memory card for saving work data

Tractor hydraulic distributors required: Min 2  
Min. tractor power HP(kW) required: 70 (52) [29]

[29] Please check the trailer mass on the registration certificate of the tractor

## Notes

## ORIETTA - OLIMPIA ACCESSORIES

[39] Not compatible with seed press wheels

[40] Not compatible with short planting unit version

[89] 7.9 in. minimum row spacing for ORIETTA (N) and 12 in. for ORIETTA (W) and OLIMPIA

# NINA 250 - NINA 300

MECHANICAL SEED DRILL, TRANSPORT WIDTH 8/10-ft. (cereals-rapeseed)

Suffolk coulter

Single disc with adjustable depth limiter (supplied disassembled)

COREX DISC

## STANDARD EQUIPMENT

Conventional mechanical seed drill

Three point hitch, cat. II

Dosing roller for small and large seeds

Infinite gearshift with 3 oil-cooled cams

Wheels 6.50-15 with mud scrapers

Fast suffolk replacement

Hopper capacity:

NINA 250 12 bu.

NINA 300 14 bu.

Tractor hydraulic distributors required: at least 1

Calibration and emptying tray

Anti-suffolk clogging protection

Mechanical centralized coulter pressure adjustment

Seed box level indicator

Single transmission

Seed hopper agitator exclusion

Half machine shut-off

Lighting kit (disassembled)

Warning boards (disassembled)

Seed covering harrow with spring adjustment and platform (disassembled)

Row marker (not included)

 Hopper capacity: 23 bu.  
 Electric seed level indicator  
 Slingshot for distributor exclusion  
 Folding inspection footboard  
 Calibration control  
 Calibration and emptying tray  
 Hydraulic row marker (on wheel tractor track)  
 Seed covering harrow  
 Lighting kit (disassembled)  
 Warning boards (disassembled)  
 G1000 and F25-125 seed metering rollers

## MOUNTED VERSION

Transmission wheels 205/70 - 15  
 1" 3/8 Z6-Z6 PTO shaft free wheel (l. 36-in.)  
 Tractor wheel track eradicator (4 pieces)

## TRAILED VERSION [84]

Drive wheels 26x12.00-12  
 R4 1" 3/8 Z6-Z6 constant PTO shaft speed, free wheel (l. 62-in.)  
 1" 3/8 Z6-Z6 PTO shaft (l. 28-in.)  
 Tractor wheel track eradicator (4 pieces) and seeding wheel positioned behind the seed drill's wheel (2 pieces)

## Tractor hydraulic distributors required:

Carried version: minimum 2

[77] Not suitable for small seeds

[84] For crawlers with PTO close to towing hook, verify the space needed for the Homokinetic PTO shaft connection. In case of insufficient space it is necessary to use the independent hydraulic system for the fan drive.

[88] To use for the closure of a maximum of half of the total rows

Electric seeding cut-off switch (optional)

**HYDRAULIC FOLDING PNEUMATIC SEED DRILL FOR CEREALS (cereals-rapeseed)**  
**TRANSPORT WIDTH 8-ft.**

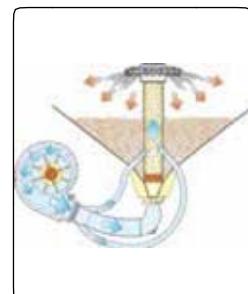

Suffolk coulter

Single disc with adjustable depth limiter

Single disc with adjustable depth limiter wheel

Patented centralized pneumatic distribution (with seed/air BY-PASS).

#### STANDARD EQUIPMENT

Pneumatic seed drill with centralized distributor and continuous gearbox, pneumatic seed delivery

Three point hitch, cat. II

540 rpm PTO fan drive (specify in order if the 1000 rpm PTO is required)

Single coulter pressure adjustment

Drive wheels 26x12.00-12

Hopper with window for seed level check

Hopper capacity: 28 bu.

Electric seed level indicator

Slingshot for distributor exclusion

Folding inspection footboard

Calibration control

Calibration and emptying tray

Hydraulic row marker (on wheel tractor track)

Seed covering harrow

Lighting kit (disassembled)

Warning boards (disassembled)

G1000, F25-125 and N500 dosing rollers for seed

#### MOUNTED VERSION

1" 3/8 Z6-Z6 PTO shaft free wheel (l. 36-in.)

Tractor wheel track eradicator (4 pieces)

#### TRAILED VERSION [84]

R4 1" 3/8 Z6-Z6 constant PTO shaft speed, free wheel (l. 62-in.)

1" 3/8 Z6-Z6 PTO shaft (l. 28-in.)

Tractor wheel track eradicator (4 pieces) and seeding wheel positioned behind the seed drill's wheel (2 pieces)

Tractor hydraulic distributors required:

Carried version: minimum 2

Trailed version: minimum 3

Trailed pneumatic seed drill with n 2 centralized distributor and pneumatic delivery  
Electric dosing  
ISOBUS connection ISO 11783  
Three point hitch, cat. II  
540 rpm PTO fan drive (specify in order if the 1000 rpm PTO is required)  
Single coulter pressure adjustment  
31x15.5-15 wheels  
Hopper capacity: 43 bu. (29 bu. seed, 14 bu. fertilizer)  
Slingshot for distributor exclusion  
Folding inspection footboard  
Calibration and emptying tray  
Electronic balance  
Hydraulic row marker track in center and on wheel  
Seed covering harrow  
Lighting kit (disassembled)  
Warning boards (disassembled)

F25-125, G1000 and N500 seed rollers, G626 for retilizer

### MOUNTED VERSION

Wheel speed sensor  
1" 3/8 Z6-Z6 PTO shaft free wheel (l. 36-in.)  
Tractor wheel track eradicator (4 pieces)

### TRAILED VERSION

GPS Speed detection device  
R4 1" 3/8 Z6-Z6 constant PTO shaft speed, free wheel (l. 62-in.)  
1" 3/8 Z6-Z6 PTO shaft (l. 28-in.)  
Tractor wheel track eradicator and seeding wheel positioned behind the seed drill's wheel (4 pieces)

Tractor hydraulic distributors required:

## Notes

## PINTA ACCESSORIES

- [39] Not compatible with seed press wheels
- [41] Supplied only factory fitted, with electric seeding shut-off (Premium version)
- [42] Supplied only factory fitted (Premium version)
- [43] 12,5 cm rows distance only
- [77] Not suitable for small seeds
- [78] For ISOBUS monitor and application see ISOBUS MONITOR KIT
- [84] For crawlers with PTO close to towing hook, verify the space needed for the homokinetic PTO shaft connection. In case of insufficient space it is necessary to use the independent hydraulic system for the fan drive.
- [85] For versions with GENIUS LITE it is necessary to also add the GPS speed sensor code G99550289
- [88] To use for the closure of a maximum of half of the total rows

Electric seeding cut-off switch (optional)

Electric seeding cut-off of lateral wings (optional)

# PRIMAVERA

**HYDRAULIC FOLDING PNEUMATIC SEED DRILL FOR CEREALS (cereals-rapeseed)**  
TRANSPORT WIDTH 10-ft.

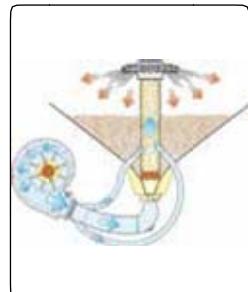

Straight-tipped coulter

Disc coulter

Electrical drive of doser GENIUS LITE

Patented centralized pneumatic distribution (with seed/air BY-PASS).

## STANDARD EQUIPMENT

Three point hitch, cat. 3N  
Tractor dependent hydraulic fan drive  
Gearbox oil cooler system with radiator  
Sowing bar on 4 ranks  
Single and centralized coulter pressure adjustment  
The frame joints have a device which permits oscillating operations during work (with air chamber support wheels)  
Floating frame nitrogen accumulator  
Hopper capacity 43 bu.  
Calibration control  
Calibration and emptying tray  
Inspection footboard with ladder  
Lighting kit (disassembled)  
Warning boards (disassembled)  
Row marker track in center with Ø 18 in. disc and safety pin and inside overall work width  
Row marker lock valves  
Drive wheels 13.00/55 - 16 with double wheel track eradicators

Central dosing system with adjustment and dosing calibration "easy access" system  
G1000 and F25-125 seed metering rollers  
Manual seed flow switch with lever for easy seeding calibration (automatic with GENIUS LITE)  
Slingshot for distributor exclusion  
Electric seed level indicator

Tractor hydraulic distributors required: Min 2  
Tractor power required:  
Min 180 HP

Seed covering device not included

TRAILED PNEUMATIC HOPPER  
TRANSPORT WIDTH 10-ft.  
COUPLED WITH CEREAL SEEDING BAR

## STANDARD EQUIPMENT

Trailed pneumatic hopper for seed storage  
Fan driven by mechanical 1000 PTO with driveline  
R4 1" 3/8 Z6-Z6 constant PTO shaft speed, free wheel (length 62-in.)  
Hopper capacity: 85 bu.  
Electric dosing - GENIUS system  
Tractor hydraulic distributors required: Min 3 [24]  
Tractor power required only for the trailer: 100 HP [24]  
Calibration and emptying tray  
Electronic balance  
Inspection footboard with ladder  
Wide transport wheels 700/50-22.5  
Demountable axle  
Braking system (please specify if hydraulic or air)  
Parking brake  
Protection tarpaulin  
Net weight 2600 kg  
Towing eye Ø 1.9-in.  
Park stand 5700lbs.  
G1000 e F25-125 seed metering rollers, G1002 fertilizer roller  
2 Rear cameras with monitor

Working lights  
Lighting kit (disassembled)  
Warning boards (disassembled)  
Toolbox  
Rear quick hitch on 1st-2nd point cat. III^3N  
Slingshot for distributor exclusion  
Load cell ready  
Rape double sensor ready (pre-alarm)  
Inner tank deflector for fertilizer support  
Attention! For connection to planter trolley not designed for this use, contact the Commercial Organization at Maschio Gaspardo S.p.A.

## STANDARD EQUIPMENT

Hopper with capacity of 31 bu. and level check window  
Three point hitch, cat. II  
Gearbox oil cooler system with radiator  
Volumetric metering unit  
16-ft. of rigid tube  
33-ft. of spiraled tube  
Parking stands  
Inspection footboard  
Inside hopper light  
Hopper internal tile for seed support  
Slingshot for distributor exclusion  
Inside hopper grid  
Electronic balance  
Lighting kit (disassembled)  
Warning boards (disassembled)  
4 wheels 26x12.00-12 (only on PACKER version)

**SEEDING BAR:**  
Hydraulic foldable seeding bar  
8-ft. road width (10-ft. Perfecta version)  
Distribution head  
Seed covering harrow  
Hydraulic row marker (Perfecta version excluded)

## NECESSARY:

1 single-acting distributor (flow regulator)  
1 draining device in the absence of pressure  
2 double effect distributors

F25-125, G1000 and N500 dosing rollers for seed, G1002 for fertilizer

PNEUMATIC SEED DRILL FOR CEREALS  
WORKING WIDTH 40-ft.  
AIR CART WITH 370 bu. CAPACITY

Shank with safety spring system

Twin rows

Quick hoes release

## STANDARD EQUIPMENT

Pneumatic seed drill with centralized distributor and pneumatic delivery  
Tow eye for pin Ø 50 1.97-in.

Transport trolley with hydraulic lifting system, wheels size 10.0/75-15.3

18 PR

Shank with safety spring system

Lighting kit (disassembled)

Seed covering harrow

Clogging control monitor

One clogging sensor every distribution head

### REAR ROLLER (optional)

Spiral roller with 9 floating sections

Hydraulic folding frame

4 transport wheels type 10.0/75-15.3 18 PR and 2 dept wheels type

10.0/75-15.3 18 PR for floating wings

Drawbar extension

### AIR CART

4 transport wheels type 500 45-22.5 front - type 710 45-26.5 rear

Fan drive with tractor-oil dependent system

MECHANICAL DRIVE TRANSMISSION

Hopper capacity - 2/3 seed - 1/3 fertilizer

Total capacity – 370 bu.

Dosing rollers: G1000 couple and F25-125 couple for seeding, G626 for fertilizer, 4 N500 rollers for turning from fertilizer to seed

Calibration and emptying tray

Electronic balance

Hopper inspection ladder

Inspection light

Hydraulic stainless steel loading auger Ø 8-in.

Stop deflectors

# ZERO AND MIN. TILLAGE SEED DRILLS

## PLANTING UNITS WITH DISC SEEDING AND DEPTH CONTROL

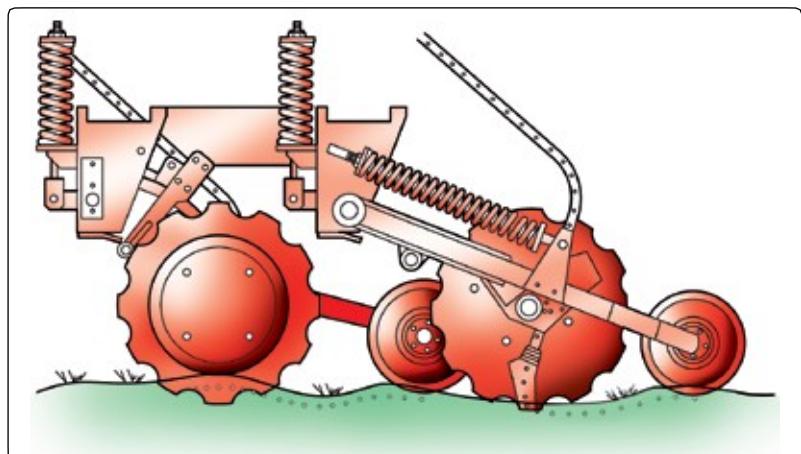

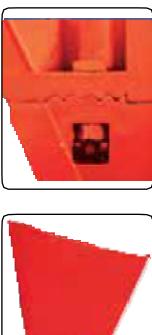

Each planting unit has a large-diameter toothed disc (19-in.) for soil cutting operations, even in the presence of crop residues. A robust seed coulter in the form of a spout with interchangeable wear tips is firmly fastened to this disc.

This system efficaciously works the soil along the seeding line and covers the furrow by dropping loose soil over the seed. The current coulter is the result of continuous tests and research aimed at optimizing sowing on plastic soils with crop residues present. An improved "grip" allows the disc to rotate continuously so that it can cut the crop residue better and leave the furrow clear with fine, moist soil.

Interchangeable coulter

### Gaspardo ECO (Every Condition Opener) coulter for direct seeding in every soil condition.

Planting Unit with suffolk coulter equipped with a large toothed disc.

(A) diameter = 19-in., thickness = 0.25-in. :  
to achieve clean soil cutting, even in the presence of crop residues;  
keeps a constant contact to the ground, also in very damp conditions.

The suffolk coulter is provided with a depth gauge wheel (B) of different diameter and width, in order to be suitable in every soil condition.

The depth gauge wheel has a conic profile and a quick fit system

New coulter with exclusive profile to guarantee excellent soil penetration and higher wear resistance

#### Suffolk coulter

The suffolk coulter has a reduced thickness and is frontally shaped (C) to increase the penetration angle into the earth, to achieve the following advantages:

- Thinner furrow seeding
- Easy covering of the furrow
- Minor tractive force while marking the seeding line on which a cast-iron press wheel acts to close the furrow (D), available on request, acts to avoid clogging especially on damp soils or in the presence of abundant crop residues.

# ZERO AND MIN. TILLAGE SEED DRILLS

## Depth limiter options

Standard, cast-iron ( $\varnothing = 14$  in.; width = 3 in.)  
Conditions: direct seeding, general use  
Seeding depth: 2 in. Standard assembly

Cast-iron ( $\varnothing = 14$  in.) with seeding limiter  
( $\varnothing = 16$  in.; width = 3 in.)  
Conditions: direct seeding, shallow seeding  
Seeding depth: 1 in.

Cast-iron ( $\varnothing = 13$  in.; width = 3 in.)  
Conditions: direct seeding, lots of stubble  
Seeding depth: 3 in.

Cast-iron ( $\varnothing = 13$  in.) with seeding limiter  
( $\varnothing = 16$  in.; width = 3 in.)  
Conditions: direct seeding, shallow seeding  
Seeding depth: 1 in.

Light, sheet ( $\varnothing = 14$  in.; width = 13 in.)  
Conditions: minimum tillage, loose soil  
Seeding depth: 2 in.

Light, sheet ( $\varnothing = 16$  in.; width = 13 in.)  
Conditions: minimum tillage, shallow seeding  
Seeding depth: 1 in.

Standard with adjustable rubber depth gauge wheel ( $\varnothing = 16$  in.; width = 13 in.)  
Conditions: minimum tillage, not too damp  
Seeding depth: adjustable from 0 to 3 in.  
Standard assembly

# ZERO AND MIN. TILLAGE SEED DRILLS

## CAST IRON CONICAL SEED-COVERING WHEEL

Behind the planting unit, a conical angled cast iron wheel has the function of moving (1) and not compacting the ground prepared by the planting unit.

The pressure on soils of a different consistency can vary by means of an adjuster spring.

The support arm of the planting unit and that of the seed-covering wheel are independent of each other so that the sowing depth is kept constant even when one of them meets an obstacle that causes it to rise.

Both the coulter-disc unit and the seed-covering wheel have soil scraper devices (2).

## HARROW

The finishing work is completed by a flexible-toothed harrow, consisting of a carrying bar on which four oscillating sections are hinged and where the teeth are fixed.

In this way, the harrow can follow the undulations of the ground, putting back the crop residues previously moved by the planting unit.

## DRAWBAR

The basic parts of the DIRETTA-GIGANTE models are made of a directional unit in the form of a connected drawbar:

- (A) front pivot used for hitching the seed drill to the tractor's first and second point, which makes operating the machine highly maneuverable.
- (B) behind a carrying frame coupled to a mounted trolley with large wheels, useful for headland maneuvers and road transport.

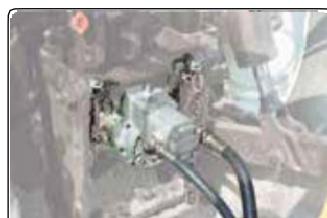

The wheels can be raised to avoid unnecessary flattening of the ground during and after sowing.

## TRANSPORT WHEELS

The trolley wheels in the trailed version are lifted while working, thus avoiding compacting of the sown ground and guaranteeing the maximum adaptation to non-leveled ground.

## PNEUMATIC DISTRIBUTION SYSTEM

Tractor dependent oil system included

Optional: Independent hydraulic system with pump connected to the tractor's power take-off, 14 gal. oil tank and proportional valve that allows the turbine to function at a constant rate even when the engine rate varies.

# GIGANTE 900

PNEUMATIC SEED DRILL FOR DIRECT SEEDING OF CEREALS(cereals-rape)  
HYDRAULIC CLOSING FRAME  
TRANSPORT WIDTH 13-ft.  
WORKING WIDTH 30-ft.

New coulter with exclusive profile to guarantee excellent soil penetration and higher wear resistance

Planting unit with cast iron depth gauge wheels

## STANDARD EQUIPMENT

Electrical drive transmission - GENIUS system  
GPS Speed detection device  
Trailed pneumatic seed drill with n 4 centralized distributor and pneumatic delivery  
Trailed version: 2 point hitch, cat. III  
Hydraulically lifted transport trolley with 400/60 - 15.5 wheels  
Fan drive with tractor-oil dependent system  
Dampened, independent planting unit  
3-in. depth limiters tungsten soil scraper  
Independent seed press wheels  
Hopper with window for seed level check  
Ø 0.5-in. seed covering harrow with hydraulic lifting  
Hydraulic solenoid valve control unit (3 controls)  
Calibration and emptying tray  
Electronic balance  
Inspection light  
Lighting kit (disassembled)  
Warning boards (disassembled)

Dosing rollers: G1000 couple and F25-125 couple for seeding, G626 for fertilizer, 4 N500 rollers for turning from fertilizer to seed

Hopper capacity 152 bu.  
Variable usage of the hopper by acting on the bulkheads:  
seed only - 2/3 seed and 1/3 fertilizer - 1/2 seed and 1/2 fertilizer

Tractor hydraulic distributors required: from 3 to 4  
Minimum power required: 250 HP

Row marker (not included)

The measurement refers to the roller external Ø, and the value after the slash / is the wheelbase. All measurements are in mm.

## CAGE ROLLER

(external Ø: 12/14.5/18 in.)

It is used on medium mix soils and in not overly humid conditions. It guarantees excellent seed bed preparation in normal condition soils. The height adjustment can be a pivot system, central jack or two side jacks, mechanical or hydraulic. Not recommended when additional equipment such as combined seeders need to be installed on the roller. It can be equipped with an optional additional tubes kit to improve seed bed leveling.

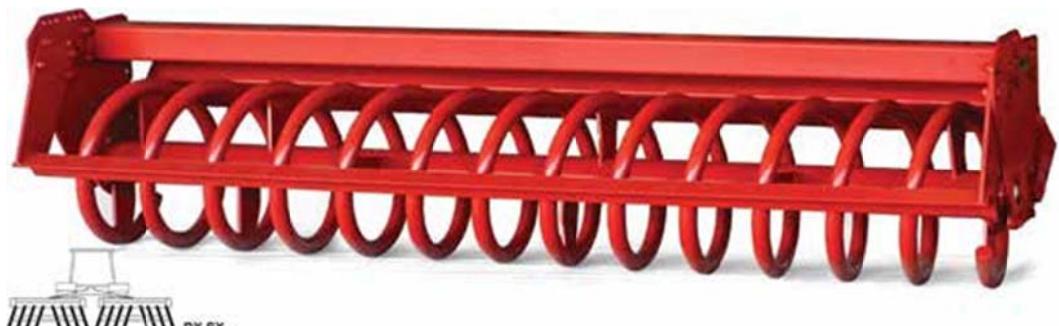

## SPIKE ROLLER

(External Ø: 20/24 in.)

It is used mainly in situations where soil preparation work is required on deeply ploughed ground. It consists of a cylinder fitted with a set of long teeth in "S" shaped bars, in sets of 4 for each work section, with a pitch of approx. 10-in. The height adjustment can be a pivot system, central jack or two side jacks, mechanical or hydraulic.

Not recommended when additional equipment such as combined seeders need to be installed on the roller.

## SPIRAL ROLLER

(External Ø: 20 in.)

This type of roller consists of a bar wound in a spiral around a central axis, 9-in. pitch. It is also available the double spiral version DX-SX, pitch 6-in.. It is particularly suitable for light sandy soils. The height adjustment can be a pivot system, central jack or two side jacks, mechanical or hydraulic.

Not recommended when additional equipment such as combined seeders need to be installed on the roller.

RICE FIELD ROLLER  
(External Ø: 20-in.)

This is similar to the spike roller but it has a different cylinder diameter (Ø 9-in.) and shorter spikes. It is suitable for all types of ground, particularly where deep tilling is not required. It has a supporting effect (superior than the spike roller) thanks to the larger diameter of the cylinder.

Not recommended when additional equipment such as combined seeders need to be installed on the roller.

PACKER ROLLER  
(External Ø: 18, 20 and 24 in.)

Is used particularly for autumnal tilling on damp soils, to further break up the soil, for surface clods and to ensure optimum surface compaction for sowing. It has a supporting effect when the seed drill is used in combination with a harrow or hoeing-machine. Rotation is granted by a set of triangular teeth fixed to the cylinder. A roller scraper device with metal or Teflon scrapers (gratpack) cleans the roller. The height adjustment can be a pivot system, central jack or two side jacks, mechanical or hydraulic.

FLEXIBLE RUBBER ROLLER  
(External Ø: 20/24 in.)

Suitable for combined use, guarantees seeding depth in every soil condition. Width 6.5-8-10-13 feet, 5-in. pitch. Mechanical or hydraulic height adjustment with pins or mechanical jacks.

# ROLLERS

---

FLANGE ROLLER  
(External Ø: 20-in.)

Is used particularly for autumnal tilling on damp soils, to further break up the soil, for surface clods and to ensure optimum surface compaction for sowing. It has a supporting effect when the seed drill is used in combination with a harrow or hoeing-machine. Rotation is granted by a set of triangular teeth fixed to the cylinder. A roller scraper device with metal or Teflon scrapers (gratpack) cleans the roller. The height adjustment can be a pivot system, central jack or two side jacks, mechanical or hydraulic.

SMOOTH ROLLER  
(External Ø: 14/18-in.)

This roller is used to prepare soil for vegetables crops, producing a flat and compact surface that makes it easier to work with other seed planting machines or laying nylon ground covering.

GREEN ROLLER  
(External Ø: 12/16-in.)

This roller can be used to level soil for planting vegetables, but its main purpose is the preparation of lawns and gardens for grass seeding, surface after roller passage remains slightly ruffled in surface, but compact in depth. Profile left on surface by roller keeps seed firm on soil even in the chance of rain.

COMBIPACKER ROLLER  
(External Ø: 20-in.)

CombiPacker roller is used with combined seed drills, the great diameter allows to better roll on great quantities of residue and on marked soil profile hollows. This roller has great soil contact, thanks to specifically designed rings: seeding depth can be thus easily kept constant for an optimal, uniform plant emergence. Roller must be matched with seeding row number (5 or 6-in. spacing).

RING ROLLER

(External Ø: 24-in.)

This roller is particularly suggested for not wet sandy-loamy soils. It's used to refine medium-small clods (diameter of clod up to 6-in.) in combination to pull-type tillers with disc or shank operating element. Its action brings surface soil to good enough clod size for seeding operations (clod size 2-in.). A soft surface layer of fine soil and a lower compacted layer, allow plants to produce a well developed root system. Sub-compacting action is focused on the till line of the ring; zones among rings are kept as they were to promote soil-atmosphere fluxes.

With CPK 20, RUBBER 20 and GUETTLER rollers, it's mandatory support kit G9953A257, already included in the versions shown in the price list

Swinging side protections

Speed lift linkage

Version for combination

# DAMA GENIUS DM RAPIDO COMBI

**88-147 kW (120-200 HP)**  
**COMBINATION POWER HARROW - MECHANICAL SEED DRILL FOR**  
**CEREALS (cereals-rape)**

Suffolk coulter

Corex disc with depth wheel kit (optional)

Single disc with  
adjustable depth  
limiter (depth wheel  
optional)

## HARROW

### MACHINE BODY

540/1000 rpm PTO gearbox - default 1000 rpm  
 Pair of standard gears: 17-23  
 Rotor revolution PTO 540 rpm (2s): 353-193  
 Rotor revolution PTO 1000 rpm (1s): 357  
 PTO shaft with slip clutch (1" 3/8 Z6 tractor side yoke)  
 Round blade-holders  
 Heavy duty gear-tray with double reinforcement  
 Bolt-on steel deflectors (PLUS)  
 Swinging side protections  
 Quick blade release  
 Universal three point hitch, cat. II<sup>A</sup>  
 Speed lift linkage  
 Rear PTO  
 2 blades per rotor  
 «CE» safety guards

**ROLLER**

Roller pin adjustment applied on top of the transmission case  
 Rear levelling bar mounted on roller, with mechanical central adjuster

## SEED DRILL

Quick hitch for MASCHIO power harrow  
 Dosing roller for small and large seeds  
 Electric distribution drive - GENIUS LITE system  
 Seed hopper agitator exclusion  
 Half machine shut-off  
 Centralized and single coulter pressure adjustment  
 Hopper with indicator for seed level check  
 Calibration and emptying tray  
 Suffolk coulters arranged in 3 ranks  
 Folding inspection footboard  
 Parking stands  
 Lighting kit (disassembled)  
 Warning boards (disassembled)  
 Seed covering harrow multi control  
 Hopper load capacity: 14 - 16 - 18 bu.  
 Tractor hydraulic distributors required: Min 0 Max 3

Row marker (not included)

Speed sensor not included (mandatory optional feature)

Version for combination

# ALITALIA DOMINATOR DM RAPIDO COMBI

118-147kW (160-200 HP)  
COMBINATION POWER HARROW - PNEUMATIC SEED DRILL FOR  
CEREALS (cereals-rape)

## COMBINED SEED DRILLS

Suffolk coulter  
Corex disc with depth wheel kit (optional)

## TECHNICAL DATA

ALITALIA DOMINATOR DM RAPIDO COMBI			Working Width	Total Width		ft.	ft.	ft.		PLANTING UNITS	ROWS DISTANCE	HOPPER CAPACITY
3000	118-147	160-200	10	10.2	5			5	10	24	24	5
4000	134-147	180-200	13	13.5	6.5			6.5	10	32	32	5

## HARROW

MACHINE BODY  
540/1000 rpm PTO gearbox - default 1000 rpm  
Pair of standard gears: 17-23  
Rotor revolution PTO 1000 rpm (1s): 357  
PTO shaft with slip clutch (1" 3/8 Z6 tractor side yoke)  
Round blade-holders  
Heavy duty gear-tray with double reinforcement  
Bolt-on steel deflectors (PLUS)  
Swinging side protections  
Quick blade release  
Universal three point hitch, cat. II<sup>A</sup>  
Speed lift linkage  
Rear PTO  
2 blades per rotor  
«CE» safety guards  
ROLLER  
Roller pin adjustment applied on top of the transmission case  
Rear levelling bar with mechanical central adjuster installed on the roller

## SEED DRILL

Pneumatic seed drill with centralized distributor and pneumatic delivery  
Electric distributor drive - GENIUS LITE system  
GPS Speed detection device  
Hydraulic fan drive tractor dependent  
Centralized hydraulic tensioning of the sowing bar  
Hopper with window for seed level check  
Quick hitch for MASCHIO power harrow  
Calibration and emptying tray  
Electronic balance  
Inspection footboard with ladder  
Parking stands  
Seed covering harrow multi control  
Hopper capacity: 43 bu.  
Hydraulic distributors required from tractor: from 2 to 3 [87]  
G1000, F25-125 and N500 dosing rollers for seed  
Lighting kit (disassembled)  
Warning boards (disassembled)  
Row marker (not included)

[87] It is essential that at least one distributor is equipped with flow regulator to run the fan motor

#### SEED DRILL

MTR Planting Unit  
 Seed hopper 1 bu. on 16 rows  
 Seed hopper 1.7 bu on 8 and 12 rows  
 Hydraulic frame with side wing compensation system  
 Low-pressure hydraulic system for dual stage folding frame  
 Three point hitch with 1st and 2nd swinging points, cat. III  
 "V" shaped rubber press wheels (specify type)  
 1 standard seed plate each row (specify seed type)  
 6.50 - 15 drive wheels (n.4)  
 12-16 rows version with 22x11.00 - 10 transmission wheels  
 Double drive transmission for the central part  
 Pair of transmission gears  
 Hydraulic fan drive with pump  
 1" 3/8 Z6-Z6 PTO shaft (l. 36-in. with free wheel)  
 Pneumatic fertilizer delivery system  
 Double-disc fertilizer coulters  
 Hydraulic row marker inside overall working width, track in center  
 18-in. version with seed knocker (disassembled)  
 Vacuum gauge  
 Lighting kit (disassembled)  
 Warning boards (disassembled)

Hydraulic distributor connected to the tractor hitch cylinders is required

# CONTESSA

COMBINATION WITH POWER HARROW  
COUPLED WITH CEREAL SEEDING BAR  
TRANSPORT WIDTH 10-ft.

COMBINED SEED DRILLS

ISOBUS connection ISO 11783

DDS PERFECTA DOUBLE DISC

## STANDARD EQUIPMENT

Trailed pneumatic hopper for seed storage  
Rear quick hitch on I-II point cat. II<sup>A</sup>-III<sup>A</sup>  
Tractor power required: 220-250 HP  
Fan drive with tractor-oil dependent system  
Hopper capacity: 72 bu.  
Electric hopper opening system (EASY TOP)  
Electric dosing - system ISOBUS  
Calibration and emptying tray  
Electronic balance  
Access ladder to the hopper  
Wide transport wheels 700/50-22.5  
Demountable axle  
Braking system (please specify if hydraulic or air)  
Parking brake  
Towing eye Ø 1.9-in.

F25-125, G1000 and N500 dosing rollers for seed, G1002 for fertilizer  
3 Rear cameras (with monitor)  
Working lights  
Lighting kit (disassembled)  
Warning boards (disassembled)  
Toolbox  
Slingshot for distributor exclusion  
Load cells  
Double product level indicator  
Inner tank deflector for fertilizer support  
Tractor hydraulic distributors required: - Min 4 (5 with row marker) [87]

Warning! For the connection to a seed drill cart not originally intended for this purpose, contact Maschio Gaspardo SpA Sales Organization

[48] Optional gauge wheel Ø 13 x 2.5 in. (no price surcharge), chosen when bought

[87] It is essential that at least one distributor is equipped with flow regulator to run the fan motor

Gauge wheel W50 for solid soils (standard)

Gauge wheel W65 for loose soils (optional feature) [48]

**HARROW**

Central speed gearbox 1000 rpm PTO  
 1000 rpm PTO side gearbox  
 Pair of standard gears: 17-23  
 Rotor revolution PTO 1000 rpm (2s): 290-357  
 Central direct PTO shaft  
 Cam side PTO shafts  
 Heavy duty gear-tray with double reinforcement  
 Bolt-on steel deflectors (PLUS)  
 Quick blade release  
 4 hydraulic roller side adjusters  
 Universal three point hitch, cat. III<sup>A</sup>  
 Rear levelling bar on the roller with hydraulically side  
 adjusters Hydraulic floating system  
 Hydraulic folding system  
 Safety hydraulic locks for transport  
 Folded power harrow width: 8-ft.  
 «CE» safety guards (supplied assembled)

**SEED DRILL**

Double disc seeding bar with parallelogram suspension  
 Rank's track: 23 in.  
 Pneumatic seed delivery system  
 Staggered double disc seed units (right - left)  
 Seed plates Ø 13 in.  
 Disks sowing internal scrapers  
 Independent adjustment of coulter pressure and seeding depth  
 Centralized seeding depth adjustment  
 Centralized coulter pressure adjustment  
 Three positions single coulter pressure adjustment  
 Adjustable seed covering depth gauge wheels polyurethane Ø 13x2 in. [48]  
 Seed covering harrow  
 Row marker (not included)

**COMBINATION WITH POWER HARROW  
PNEUMATIC PRECISION PLANTER WITH HYDRAULIC FOLDING FRAME (corn-sunflower-sugarbeet-soybean)  
TRANSPORT WIDTH 10-ft.**

ISOBUS connection ISO 11783

## Notes

## COMBINED SEED DRILLS ACCESSORIES

- [23] This kit is mandatory with disc coulters or residue split sowers
- [26] For MANTA seed drills not preset for SCATENATO/CORSARO/CONTE
- [47] Possible only with symmetrical tramline and hydraulic rows marker
- [49] Uphill seeding hopper dividers included
- [59] Already on 3 point hydraulic lifting kit G9953A254
- [77] Not suitable for small seeds
- [78] For ISOBUS monitor and application see ISOBUS MONITOR KIT
- [79] PACKER version can be ordered only at the origin, it's not possible to transform the PA1 in a PA1 PACKER
- [88] To use for the closure of a maximum of half of the total rows

# DOSING ROLLERS

Metering unit GASPARDO with interchangeable rollers

PINA  
PINTA  
ALIANTE

Dosing roller G1000 R26.5 specific for big seeds

G99550293	237
-----------	-----

Dosing roller G1000 for steep slopes

G99544305	256
-----------	-----

Dosing roller G1000 standard for large quantities (up to 357 lb/ac)

G99544316	237
-----------	-----

Dosing roller N500 for medium quantities (max 178 lb/ac)

G99531291	237
-----------	-----

Dosing roller N250 recommended for medium-low quantities (up to 71-89 lb/ac) particularly on drills used in combination (whose operation speed is fairly slow).

G99531290	237
-----------	-----

Dosing roller F25-125 for small quantities, specific for small seeds. Sections of the roller can be disengaged and excluded if necessary in order to furtherly decrease distribution rate.

G99544318	237
-----------	-----

Dosing roller for fertilizer G1002

G99550707	186
-----------	-----

Doser wheels for low dosing

1 - Blind wheel	G99548320	51
-----------------	-----------	----

2 - Reduced F25 wheel	G99548319	64
-----------------------	-----------	----

Doser wheels for low dosing allow to assemble different doser rollers (even with the shaft type), to use with machines equipped with GENIUS system. For example, minimum investment (equivalent to 3 lb/ac with advancement speed lower than 2.5 mph and work width up to 10-ft.), is obtainable using one central reduced F25 wheel (1xG99548319) and 4 lateral blind wheels (4xG99548320)

# ROW-CROP CULTIVATORS

## HL-HP-HS-HR

True to the Gaspardo tradition, row-crop cultivators HL-HP-HS-HR are lightweight, easily handled, strong and extremely functional, thanks to the avant-garde constructional technique and quality of the materials used.

The models are light, easy to handle, sturdy and versatile - qualities that enable narrow rows of crops to be handled with ease, and difficult terrain to be tackled with great effectiveness.

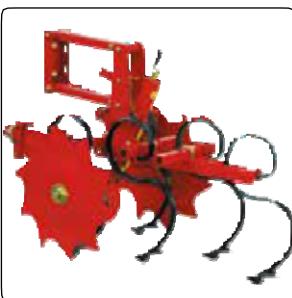

HEAVY DUTY CULTIVATOR UNIT - Frame with high ground clearance - Plate protection and excludable toothed side discs - Unit can be regulated with load spring (optional)

## TILLAGE IMPLEMENTS

5MP (30 in.) = 5 springs and 2 plate protections

5MDD (30-in.) = 5 springs and 2 toothed disc protections

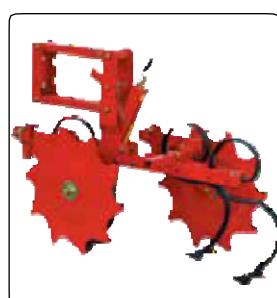

3ZD (30-in.) = 3 hoes and 2 discs

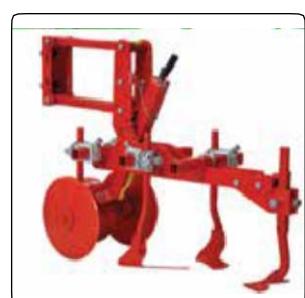

3MD (30-in.) = 3 springs and 2 discs

3MP (18-in.) = 3 springs and 2 protections

3MDD (18-in.) = 3 springs and 2 toothed disc protections

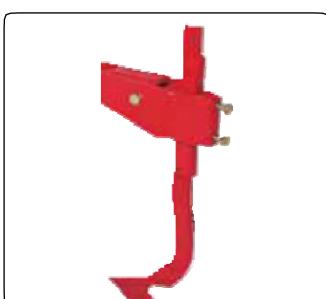

3ZD (18-in.) = 3 hoes 2 discs

Adjustable wing ridging body

Rear hoe 8.5 in.

Rear Hoe – 5.5-in.

# ROW-CROP CULTIVATORS

## FRAME

HL-HP-HS-HR feature 4 different types of frame:

Fixed frame for HL

Double fixed frame for HL DT

Hydraulic folding frame for HP (mechanical-hydraulic)

Hydraulic folding frame for HS

Fixed frame for HR-L (with or without trolley)

Fixed frame for HR (with or without trolley)

## FIXED FRAME ROW-CROP CULTIVATOR (corn-sunflower-sugarbeet-soybean)

## STANDARD EQUIPMENT

Three point hitch with fixed 1st and 2nd points, cat. II  
 Iron wheels to regulate the working depth of the element  
 Lighting kit (disassembled)  
 Warning boards (disassembled)

For HL DT Version: Double transmission unit with wheels mounted on ball bearings (only for fertilizer version) and 2 machine support wheels

3MP = 3 tines and 2 protection plates  
 3MDD = 3 tines and 2 toothed discs  
 3ZD sugarbeet = 3 tines e 2 discs

5MP = 5 tines and 2 protection plates  
 5MDD = 5 tines and 2 toothed disc protections  
 3MD = 3 tines and 2 discs  
 3ZD corn = 3 hoes and 2 discs

Wheels n = Rows n + 1

Machines are supplied partially disassembled

## HYDRAULIC FOLDING FRAME ROW-CROP CULTIVATOR (corn-sunflower-sugarbeet-soybean) TRANSPORT WIDTH 8-ft.

#### STANDARD EQUIPMENT

Three point hitch with fixed 1st and 2nd points, cat. II

Steel fertilizer

Pneumatic fertilizer kit for external rows

Number of outlets available: 8 equally distributed

Speedy-set supplied as standard

2 inspection windows

Road transport protections

2 machine support wheels

Iron wheels to regulate the working depth of the planting unit with ball bearings

Double drive transmission wheel with loading spring mounted on ball bearings

Standard outer tine releases for HS 6 rows and 8 rows

1" 3/8 Z6-Z6 PTO shaft (length 35-in.) for versions with pneumatic fertilizer

Lighting kit (disassembled)

Warning boards (disassembled)

5MP = 5 tines and 2 protection plates

5MDD = 5 tines and 2 toothed disc protections

3ZD corn = 3 hoes and 2 discs

3MD = 3 tines and 2 discs

[51] Version without pneumatic fertilizer

# HS INOX fertilizer

**HYDRAULIC FOLDING FRAME ROW-CROP CULTIVATOR (corn-sunflower-sugarbeet-soybean)  
TRANSPORT WIDTH 8-ft.**

## STANDARD EQUIPMENT

Three point hitch with fixed 1st and 2nd points, cat. II  
Stainless steel fertilizer box  
Pneumatic fertilizer kit for external rows  
Number of outlets available: 8 equally distributed  
Speedy-set supplied as standard  
2 inspection windows  
Road transport protections  
2 machine support wheels  
Iron wheels to regulate the working depth of the planting unit with ball bearings  
Double drive transmission wheel with loading spring mounted on ball bearings  
Standard outer tine releases for HS 6 rows and 8 rows  
1" 3/8 Z6-Z6 PTO shaft (length 35-in.) for versions with pneumatic fertilizer  
Lighting kit (disassembled)  
Warning boards (disassembled)

5MP = 5 tines and 2 protection plates  
5MDD = 5 tines and 2 toothed disc protections

[51] Version without pneumatic fertilizer

## FIXED FRAME ROW-CROP CULTIVATOR (corn-sunflower-sugarbeet-soybean) TRANSPORT WIDTH 10-ft.

LIGHT VERSION

INTEGRATED TRAILER VERSION

### STANDARD EQUIPMENT

#### DURING WORK

Three point hitch with fixed 1st and 2nd points, cat. III and IV  
Iron wheels to regulate the working depth of the planting unit with ball bearings

Power requirement: 160 HP basic version, 180 HP with fertilizer

#### IN TRANSPORT (towed version)

Two-point hitch with fixed points, cat. III

Steering wheel tyres 750/16-16

Tractor hydraulic distributors: minimum 2

Lighting kit (disassembled)

Warning boards (disassembled)

12 rows: tractor's track 4.5 – 5-ft.

18 rows: tractor track 6 – 6.5-ft.

## STANDARD EQUIPMENT

16 liters plastic tank row-crop unit  
Tank cover waterproof  
2 micro descents each row  
3 motoreducers electric start  
GPS Speed detection device  
Control unit in the cabin

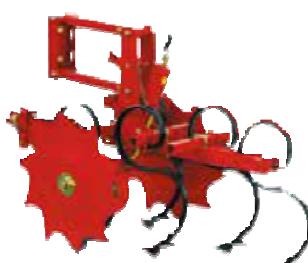

## Control unit features:

Distribution with automatic regulation progressive with the march  
Monitor: seed per He, seed per minute, Km/h  
Measuring: surface, distributed seed, working time, 9 partial and 1 total  
Seed dosing variation during work  
10 different working programs recording

Attention: It is suggested to supply this accessory already mounted on the machine  
Not applicable on versions with external rows shut-off EFE or EFM

# HAYMAKING

---

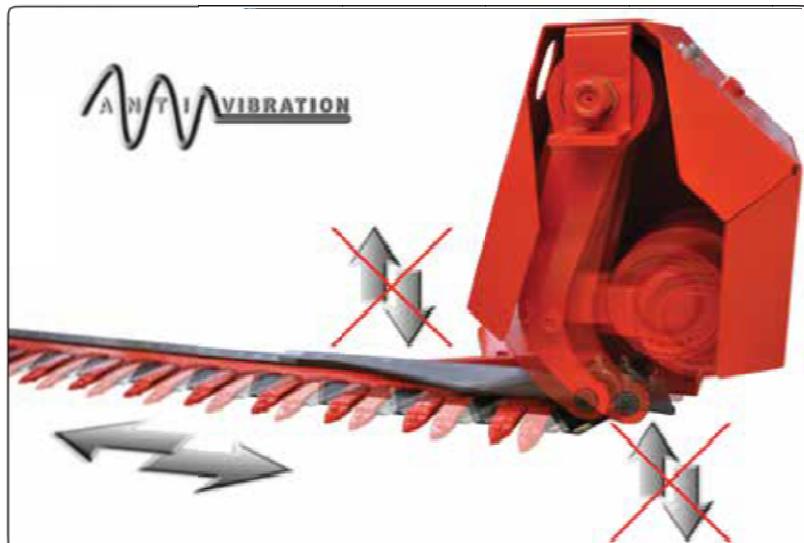

## STANDARD ON FIORE AND FRANCA MODELS

Transmission equipped with new sturdy and special antivibration bushings rods which allow to:

- Eliminate radial, axial and torsional loads
- Eliminate small angular displacements

This system does not require to grease the bushings which significantly reduces maintenance

Kinematics with antivibrating rods, which absorb all vibrations and irregular movements, extend the life of the rods and blades granting the high performances at low costs.

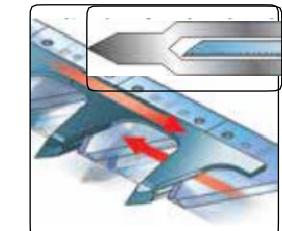

## DOUBLE MOVEMENT FINGER - BLADE MOWER

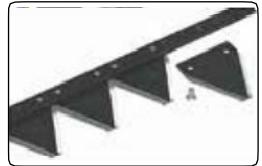

MECHANICAL LIFTING

HYDRAULIC LIFTING

PATENTED FINGER-BLADE SLIDING SYSTEM

NORMAL SECTION

SELF-SHARPENING DOUBLE SECTION

REMOVABLE TOOTH WITH SCREW

NORMAL TOOTH WITH RIVET

Cutting bar with reinforcing rod (only 205-235 versions)

## STANDARD EQUIPMENT

Three points hitch with fixed 1st and 2nd point, cat. I and II  
 Side adjustable frame for tractors with different track width  
 Anti-vibration system  
 Mechanical or hydraulic bar lift with cabin control  
 Safety device  
 Cutting bar with reinforcing rod (only 205-235 versions)  
 Internal shoe release spring  
 Bar safety protection  
 Grass swath guide  
 Additional blade  
 PTO shaft 47 in. length Z6-Z6

# PA1 Front hopper for FERTILIZER

FRONT HOPPER FOR DISTRIBUTION OF FERTILIZER FOR "SP" - MT" PLANTERS  
FIXED, TELESCOPIC AND FOLDING FRAMES

SPECIAL APPLICATIONS

## STANDARD EQUIPMENT

Volumetric metering unit

Metering unit drive

Mechanical with toothed wheel hydraulically liftable and with free wheel

Electrical with GENIUS system

Fan drive:

DEPENDENT by hydraulic tractor distributor

INDIPENDENT front pdp 1000 rpm with hydraulic control unit

See hydraulic circuit diagram on page

Hopper with capacity of 31 bu. and level check window

Electronic balance

Three point hitch, cat. II

16ft.of rigid tube for conveying fertilizer

33ft. of spiraled tube

Distribution head

Parking stands

Inspection footboard

Inside hopper light

Inner tank deflector for fertilizer support

Slingshot for distributor exclusion

Inside hopper grid

Lighting kit

F25-125, G1000 and N500 dosing rollers for seed, G1002 for fertilizer

The following are necessary:

1 single-acting distributor (flow regulator)

1 draining device in the absence of pressure

1 double acting distributor

## CENTRIFUGAL SINGLE-DISC FERTILIZER WITH 12 METER SPREADING BASE

### STANDARD EQUIPMENT

Three points hitch I cat.  
Maximum spreading width: 40-ft.  
Double lever command, independent opening and closing right/left  
Agitator  
4 fans

NOTE: Insert PTO shaft apart

### STANDARD EQUIPMENT FURBO SALT

Stainless steel discs and fans  
Pressed heavy grille (mandatory for Italy and EU countries)  
Articulated agitator  
Hood deflector  
Group with 1/3 ratio

SPREADING BASE  
WITH 40-ft. SPREADING BASE  
COMPACT VERSION FOR LOCALIZED SPREADING IN ROWS AND  
OPEN FIELDS**

**STANDARD EQUIPMENT**

Three point hitch, cat. I and II  
4 ft. width  
Width with extension (optional) 5-ft. PTO  
540 rpm  
From 5 to 14 ft. localized distribution along rows  
Maximum spreading width 40-ft. – 60-ft. for open field version  
Automatic correction of the fertilizer spreading angle on the disc  
"Vibrofeed" feeding mechanism  
Tractor hydraulic distributors required: Min. 1 DE  
Driveline with limiter  
Elastic protection for the transmission  
Stainless steel feeding and spreading components  
Lower grille in stainless steel  
RH/LH hydraulically controlled independent opening  
Possibility to increase capacity to 23-28 bu.

MCE 6000/12000

- 6000 up to 6 rows 12000 up to 12 rows
- Seed control by row with alarm
- Planting density (number of seeds per sqm)
- Partial and total worked area (ac)
- Seeding distance (in.) average for all rows or single row
- Preset for row shut-off device
- Speed sensor

SERIO

- up to 48 rows
- Seed control by row with alarm
- Partial and total worked area (ac)
- Working speed (mph)
- Seeding distance (in.) average for all rows or single row
- Planting density
- Wiring simplified by the serial connection of the sensors
- SD memory card for saving work data
- Backlight graphic display 5.7"
- Selectable multi-language menu

SIMPLE TSH

- Post-emergency treatments row marker (tramlines)
- Pre-emergency treatments row marker
- Partial and total worked area (ha)
- Working speed

MULTICONTROL

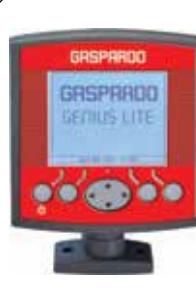

- Post-emergency treatments row marker (tramlines)
- Pre-emergency treatments row marker
- Doser rotation control
- Low seed level warning
- Blower rotation control
- Partial and total worked area (ha)
- Working speed

MULTICHECK

- Doser rotation control
- Low seed level warning
- Blower rotation control
- Partial and total worked area (ha)
- Working speed

GENIUS LITE

- Doser rotation control
- Low seed level warning
- Blower rotation control
- Partial and total worked area (ha)
- Working speed
- Easy and fast calibration
- Pre-Start and Pre-Stop function
- Seed delivery adjustable from cab
- Tramlines control

Ease and speed of adjustment. Low setup time. Direct verification of weight and investment precision guarantee.

## GENIUS

It seeds with no delays and waste. Pre-start and Pre-stop functions eliminate wastes due to delays of pneumatic systems during manoeuvring

Easy dosing change from the tractor cab. The programmed dosage can be adjusted also while working through pre-set steps

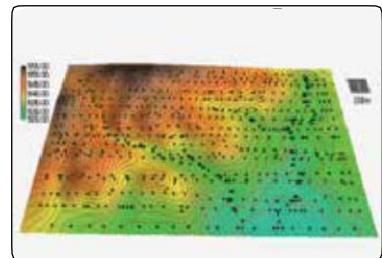

Tramlines function. Improves treatments and substantially reduces waste and overlapping.

Machine function control. Numerous parameters controlled and alarms that ensure quality results and maximum operator comfort.

2 product management. The flexibility of the system permits to control 2 distribution channels such as seed and fertilizer.

It interfaces with GPS to seed in variable dosing. It erogates the product according to pre-set mapping. It optimises investment of fertilizer increasing productivity

# Hydraulic fan transmission

## Safety suggestions:

The hydraulic fan is suitable only for these machines: ALIANTE, PA1, GIGANTE and PRIMAVERA.

All different uses from the indicated ones will be considered not compliant to the foreseen destination. MASCHIO GASPARDO S.p.A. declines all responsibilities and all risks of the enduser.

MASCHIO GASPARDO S.p.A. declines all liability for damage caused by improper use.

The manufacturer shall not be liable for damage to the tractor caused by incorrect connection.

Model	Minimum working pressure (bar)	Oil flow rate l/min	Maximum back pressure (bar)	Fan drive rpm *
ALIANTE 300	100 - 130	32	vacuum relief	4200
ALIANTE 400	100 - 130	32	vacuum relief	4200
GIGANTE - PA1	100 - 130	32	vacuum relief	4200
PRIMAVERA	80 - 130	32	vacuum relief	4200

\* Fan drive +/- 50 rpm, once the oil has reached a constant temperature

## HYDRAULIC SYSTEM TRACTOR DEPENDENT

1) On seed drills having more hydraulic driven functions (i.e. hydraulic pressure adjustement of coulters, hydraulic seed bar lifting) the parallel work of the oil distributors is necessary.

2) If oil overheats because the flow rate of the tractor's pump is very high or there's not enough oil reserve, the dealer must install an oil cooling device on the tractor.

If the installation is not possible, an additional oil reserve is necessary. The ration between transported oil and reserve oil must be 1:2.

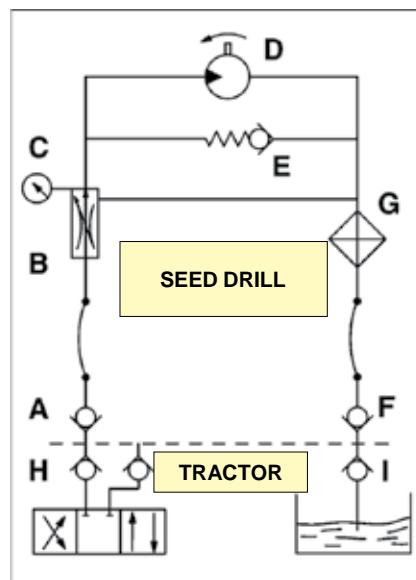

3) There must be a sufficient number of hydraulic spool valves for all hydraulic functions selected. Hydraulic power for the fan has priority.

4) Oil must return without pressure in order to safeguard the hydraulic motor. Consider that excessively high pressure can cause the shaft's retention ring to slip out.

The returning oil shall pass through a filter. Returning oil should not pass through distributors (i.e. additional distributors), as the returning pressure is too high on this line.

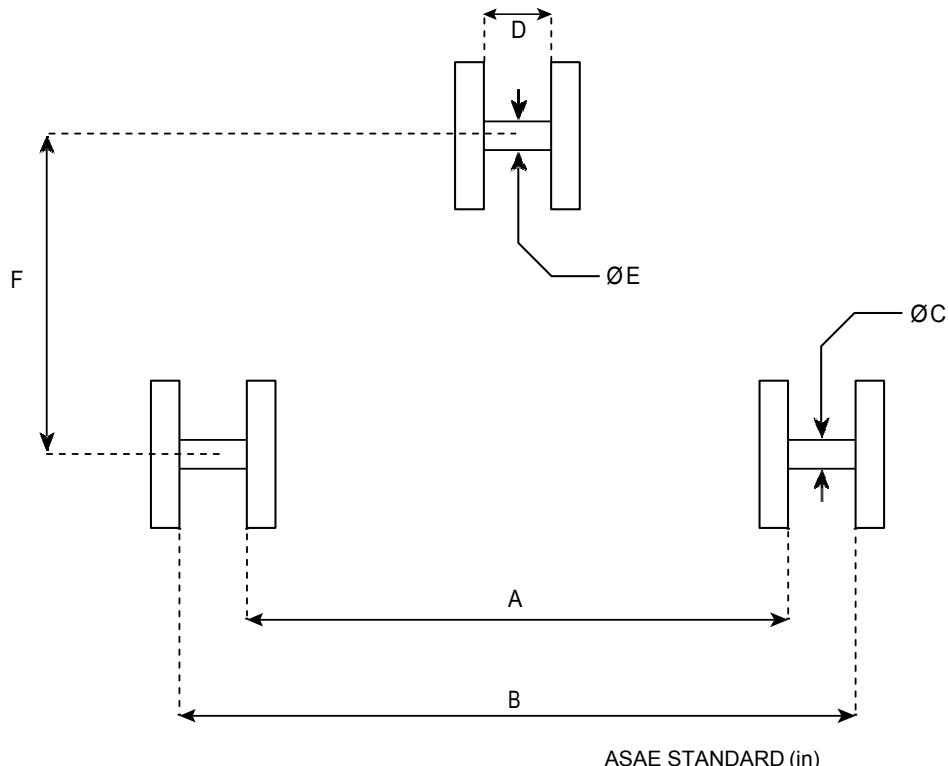

ATTENTION: Consult the tractor's operation and maintenance manual to identify the exhaust fitting

- A - hydraulic distributor simple effect
- B - 3-way regulator (3-way valve)
- C - Pressure gauge
- D - Hydraulic motor (fan)
- E - Non returning valve
- F - Separate free discharge (without pressure)
- G - Cooling system (accessory)
- H - Additional distributor (double or simple effect are possible)
- I - Oil tank

All changes done on the tractor in order to allow a correct installation of the hydraulic fan are in any case not to be charged to MASCHIO GASPARDO S.p.A.

# Dealers warranty claim procedure

---

In order to comply with the Maschio Gaspardo Machinery Warranty Policy the dealer/retailer shall conform to the following claim submitting procedure:

a)Check the retail date, it shall be within a year from the invoice date to the end user

b)Define the type of damage and what its cause might be:

1)Defect in material and workmanship (covered by warranty policy).

2)Misuse, accident, lack of proper maintenance or care, improper repair, use of non genuine parts for replacement, alteration or modifications not approved in writing by Maschio Gaspardo S.p.A., wear and deterioration related to normal use of the product.

If the cause of damage is the defect in material and workmanship the warranty claim procedure that the claimer has to comply with is the following:

1)The Warranty Claim shall be submitted through the proper form (SGQ48) within and not later than 15 days from the date of damage detection. The form shall be duly filled in by the claimer in all its sections, otherwise the claim is void.

2)Photographs shall be attached to the claim to prove the type and entity of the damage.

3)NO orders for spare parts shall be sent by the claimer to MASCHIO GASPARDO parts dept. The claim form shall be enough to activate the urgent shipment of required parts.

4)If the end user urgently needs parts for the repair and the dealer has them in stock, the dealer may supply him immediately the genuine parts; Maschio Gaspardo will then supply the dealer the same parts, free of charge (if warranty claim is accepted). If the MG Service office retains that the warranty claim is unjustified thus not valid (partially or totally), the dealer will have to invoice the client re-stocking his warehouse with original MG parts at own expense.

On the other hand Maschio Gaspardo S.p.A. (MG) will proceed as follows in order to give the proper feedback to the claimer:

a)Once the warranty claim is received, MG will check its validity based on the information provided by the claimer in the duly filled in form and attachments (photographs, reports) and will confirm in writing if the claim has been fully accepted, or partially accepted.

b)Parts to supply might be handled by MG in two different ways:

1)Parts are supplied and invoiced before the defective parts are returned by the claimer for inspection:

MG uses this method when major time is needed to better evaluate the doubtful claims. The claimer shall send back the defective parts within and not later than 60 calendar days from supplier's replacement parts invoice date. After the inspection of defective parts, MG will confirm in writing whether the claim has been fully accepted, or partially accepted, or rejected. If accepted or partially accepted, MG will issue a credit note in favor of the claimer within and not later than 30 days from the date the defective parts have been received.

2)Parts are supplied free of charge:

MG uses this method when claims are clear and no defective parts are needed for inspection, yet it may be that MG requests the claimer to keep them in stock for a certain period to allow an inspection on occasion of a visit by MG's staff

Remarks:

- Labour costs and any other expense related to repair will not be refunded by MG
- Parts supply by MG shall be on ex-works basis (Incoterms 2010)

# NOTES - Summary

---

- [1] Needs connection to tractor GPS antenna
- [2] Antenna not supplied
- [3] Seed press wheel and double disc coulter planting unit not compatible
- [4] Not compatible with front wheels R20, R22, R26
- [5] Use only if the tractor is equipped with a priority output hydraulic system (constant flow rate in case other applications are used)
- [6] Not compatible on planter with odd row number
- [7] Application possible only with micro tank of same size
- [8] Specify model and number of rows
- [9] Steel fertilizer
- [10] Not compatible with MAGICA
- [11] Not compatible with MONICA-MARTA 250
- [12] Not compatible on planter with odd row number and MAGICA model
- [13] Not compatible with MTE300 row spacing 32-in.
- [14] Not compatible with MONICA-MAGICA
- [15] Specify in order if the 9-ft. frame is desired
- [16] Version BB (Big-Bag) with big steel hopper for fertilizer, capacity 28-bu.
- [17] Specify in the order if the 8-ft. frame is desired - The 8-ft. road width can be obtained with the 28 or 30-in. inter-row by installing narrow external depth wheels (400 x 65) and 1" "V" compression wheels
- [18] Road transport width 11-ft.
- [19] These versions can also be used as 6 row 28-30-in.
- [20] Road transport width 11-ft.
- [21] Also available with compact frame
- [22] G99507038 Kit included
- [23] This kit is mandatory with disc coulters or residue split sowers [24] Changes according to the coupled seeder
- [25] Not compatible with MANTA hydraulic fan drive version
- [26] For MANTA seed drills not preset for SCATENATO/CORSARO/CONTE
- [27] For machines with 18 and 28 inter-row spacing, G99567164 code is required
- [28] Not required for machines with 20 and 30 inter-row spacing
- [29] Please check the trailer mass on the registration certificate of the tractor
- [30] The hydraulic transmission system requires additional distributors: one for continuous pressure P (PRESSURE) 150 l/min 200 bar and one LS (LOAD SENSING)
- [31] Not compatible with MONICA-MAGICA-MAGA and MANTA-MANTA XL-MARISA-MAXIMETRO with fertilizer disc
- [32] For the planting unit attachment the G99527019 kit is mandatory
- [33] With fertilizer discs, distance between seeding line and fertilizer discs can't be less than 4-in.
- [34] Not compatible with MAGA-MIRKA-RENATA-REGINA-ROMINA
- [35] Also available in painted steel fertilizer
- [36] To be used on very hard ground. Not compatible with odd rows. Ballast frame kit is required
- [37] Prices are set on a configuration of a farmflex wheel and planting disc with 90 holes Ø 0.03-in.
- [38] Machine with double gearbox
- [39] Not compatible with seed press wheels
- [40] Not compatible with short planting unit version
- [41] Supplied only factory fitted, with electric seeding shut-off (Premium version)
- [42] Supplied only factory fitted (Premium version)
- [43] 12,5 cm rows distance only
- [44] With pre-emergency markers also use extensions G99525107 kit
- [45] Levelling bar and cultivator not compatible with each other
- [46] With seedpress wheel bar also use extensions G99525107 kit
- [47] Possible only with symmetrical tramline and hydr. rows marker
- [48] Optional gauge wheel Ø 13 x 2.5 (no price surcharge), chosen when bought
- [49] Uphill seeding hopper dividers included
- [50] Already present in 6 rows versions with same rows distance or more than 28-in. with spreader BBP

- [51] Version without pneumatic fertilizer
- [52] We recommend the use of a pair of supporting wheels
- [53] Available for HS 6 rows from 24 to 32-in., HS 8 rows from 18 to 30-in., 12 rows from 18 to 20-in.
- [54] Mechanical lifting kit available for narrow track/quick hitch (optional in place of kit G99556016) which also includes I - II Cat. 1N pins
- [55] If necessary, please use 1st -2nd point kit, cat. 1N (optional)
- [56] Standard on 280 version
- [57] Order two groups for 205 and 235 versions and 3 groups for 280 version
- [58] Obligatory accessory for tractors with 4 isodiametric wheels
- [59] Already on 3 point hydraulic lifting kit G9953A254
- [60] For machines without microgranulator
- [61] Include two groups for 8 rows 30 and 12 rows 18 without microgranulator
- [62] For machines without microgranulator (from 4200 frames foresee 2 groups)
- [63] For machines without fertilizer
- [64] Include two groups for 8 rows 30 and 12 rows 18 without fertilizer
- [65] For machines without fertilizer (transport width 3.00 m)
- [66] Include two groups for 8 rows or more without fertilizer
- [67] We recommend the substitution of the seed distributor cover with the small seed cover
- [68] Machine price on price list, when not differently written, has been calculated from std. discs series of lowest price range
- [69] Disc without pegs for coated seed
- [70] Driving seat is not mountable if the tiller fits the fertilizer box
- [71] Steel fertilizer box suitable for frame 5 – 8-ft.
- [72] Plastic fertilizer box suitable for frames 9 - 10 - 11 – 13-ft.
- [73] Versions set for matching with PA1 include fertilizer conveyor and fertilizer discs. PTO shaft is B1 1"3/8 Z6-Z6, 13in. long.
- [74] Standard feature on AIR versions
- [75] Bonnet fertilizer for cm 6-8-9 frames [76]
- Bonnet fertilizer for cm 10-11-13 frames [77]
- Not suitable for small seeds
- [78] For ISOBUS monitor and application see ISOBUS MONITOR KIT
- [79] PACKER version can be ordered only at the origin, it's not possible to transform the PA1 in a PA1 PACKER
- [80] HS versions with external rows electric exclusion (EFE) or manual unblocking (EFM)
- [81] Version thought only with MT type seeding elements
- [82] Not compatible with MTR 6 rows 18-in. 2500 frame with front R20 wheels version
- [83] Not compatible with MTR 6 rows 18-in. 2500 frame with fertilizer disc coulters
- [84] For crawlers with PTO close to towing hook, verify the space needed for the homokinetic PTO shaft connection. In case of insufficient space it is necessary to use the independent hydraulic system for the fan drive.
- [85] For versions with GENIUS LITE it is necessary to also add the GPS speed sensor code G99550289
- [86] Not compatible with MONICA with fertilizer coulters - Not compatible with MAGICA
- [87] It is essential that at least one distributor is equipped with flow regulator to run the fan motor
- [88] To use for the closure of a maximum of half of the total rows
- [89] 20 cm minimum row spacing for ORIETTA (N) and 12 in. for ORIETTA (W) and OLIMPIA
- [90] Electric row shut-off not included
