

# Guide to Simple Todo App

First we have main page like this:

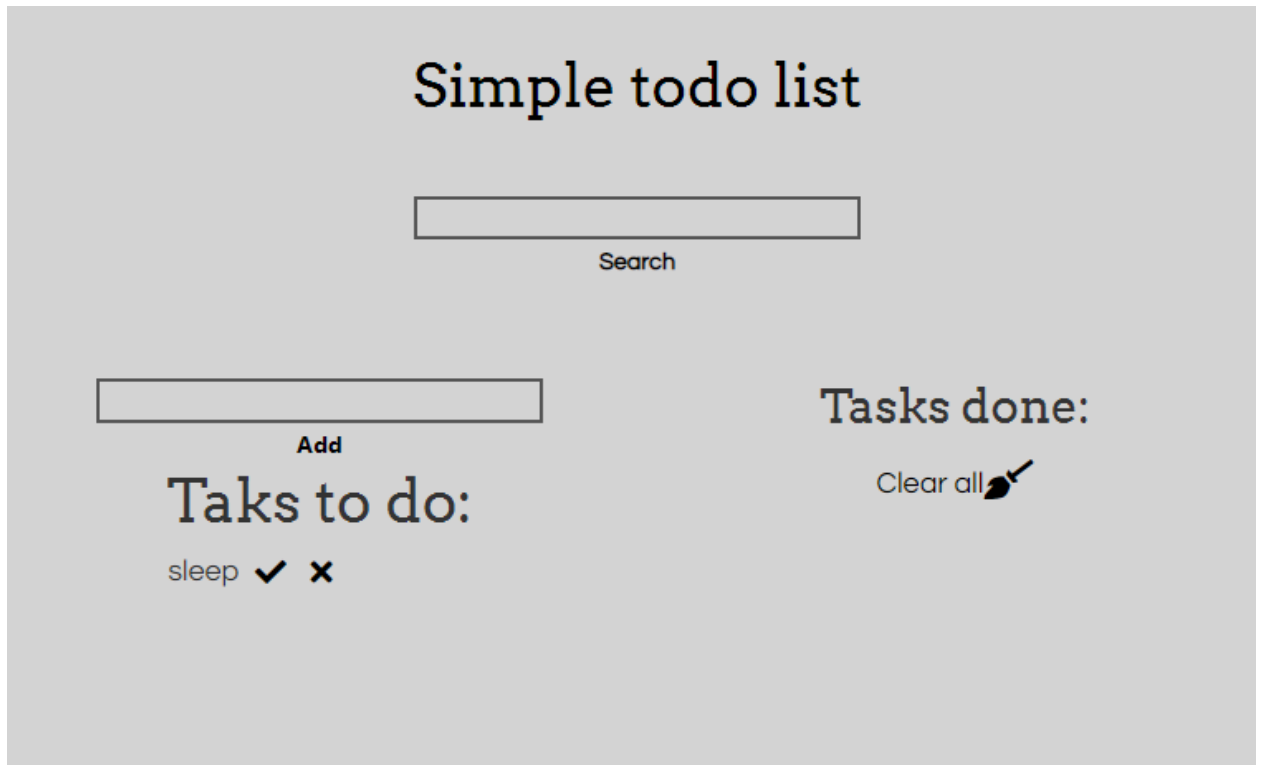

There is hover and focus animations on almost all buttons and inputs.

To add a new task we have type it in add section:

Then obviously click add button and the task will be added like this

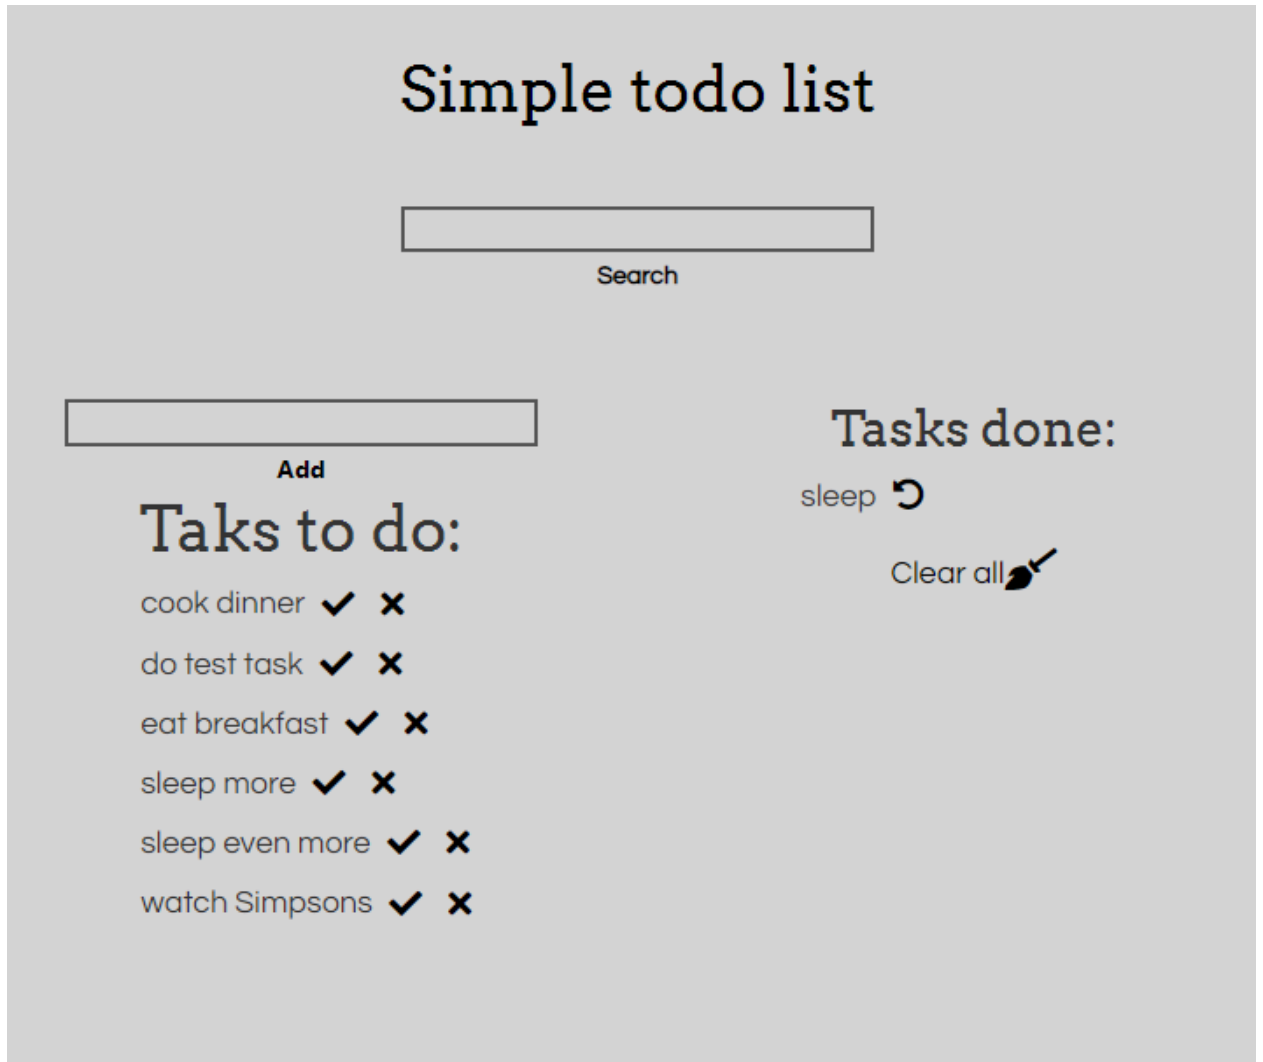

We can also mark it as done by clicking on the **check** or deleting it by clicking on **x**

We can also undo changes by clicking on **circle arrow**

For example we have to look for task, I don't know why, but anyway, imagine that you have a lot of tasks and you have to find tasks that are similar like that one you wanted

You can find it with typing into search section and you remember only 'do'

So..

# Simple todo list

  
Search  
Add

## Taks to do:

- cook dinner ✓ ✕
- eat breakfast ✓ ✕
- sleep more ✓ ✕
- sleep even more ✓ ✕
- watch Simpsons ✓ ✕
- do pull requests ✓ ✕
- do more tasks ✓ ✕

## Tasks done:

- sleep ↻
- do test task ↻
- Clear all 🗑️

And after click we have...
