

Cables and cable systems for photovoltaic installations

Welcome to HELUKABEL®

Logistics Centre, Hemmingen / Germany

Production facility with a modern photovoltaic system, Windsbach / Germany

HELUKABEL® is a leading international manufacturer and supplier of wire & cable, custom cable, cable accessories, data, network, bus and media technology, as well as robotic assemblies. Our headquarters in Germany and warehouses in over 40 countries serve costumers all over the world.

With more then 30 years of experience in the field of wire and cable we have the adequate solutions for photovoltaic applications. In the early 90s we developed the first PV-cables that are marketed today under our leading SOLARFLEX® trademark with global approvals of TÜV and VDE. Together with our state of the art PV-connectors we offer our customers in the photovoltaic industry assembled PV-cables and strings for a quick plug-and-play on site installation. All our products are RoHS-compliant and we are certified according to DIN ISO 9001 and 14001.

HELUKABEL® is your one-stop solution provider for wiring photovoltaic systems.

HELUKABEL® – global network	71

We have combined our product groups for renewable energies under the term HELUKABEL® GREEN LINE. From cables and wires for photovoltaic and wind turbine systems to biofuels and composting systems, HELUKABEL® has a comprehensive product range - developed, produced and tested in our own plant in Windsbach, Germany.

In the area of renewable energies our cables have been developed with particular characteristics that can perform within the harsh conditions of solar and wind environments. These are especially the changing weather conditions and the partially extreme mechanical loads.

Due to the worldwide leading role of German companies in the area of renewable energies, it must also be taken into consideration that the climatic conditions in Southern Europe, Africa or Arctic regions are much more demanding than those in temperate central Europe. These environmental conditions and several system-specific parameters impose greater stress and therefore require technical advanced cable.

With more than 30 years of experience in cable development and production, using the most modern materials and based on the latest research results, HELUKABEL® has developed cables which are optimised for these application areas.

Photovoltaic cables

RoHS

Technical Data

- **Temperature range**
-40 °C to +90 °C
Max. temp. at conductor +120 °C
- **Nominal voltage**
According to VDE U₀/U 600/1000 V AC
1800 V DC conductor/conductor
- **AC test voltage**
10000 V
- **Minimum bending radius**
fixed installation approx. 4 x outer diameters
flexing 10 x cable diameter

Cable structure

- Bare copper, tinned, finely stranded according to DIN VDE 0295 class 5 and IEC 60228 cl. 5
- Double-insulated
- Insulation cross-linked Polyolefin
- Outer sheath cross-linked Polyolefin
- Sheath colour black, red or blue

Approvals

- According to PV1-F requirement profile for PV cables DKE/VDE AK 411.2.3
- VDE (Reg. 8266)
- TÜV (2 PfG 1169/08.2007, R60025298)
- RoHS and CE compliant

Properties

- Ozone resistant acc. to EN 50396
- Weather and UV resistant acc. to HD 605/A1
- Halogen-free acc. to EN 50267-2-1, EN 60684-2
- Resistant to acid and bases acc. to EN 60811-2-1
- Flame-resistant acc. to VDE 0482-332-1-2, DIN EN 60332-1-2, IEC 60332-1
- Very robust and abrasion-resistant sheath acc. to DIN EN 53516
- Resistant to short-circuits up to 200°C thanks to their double insulation; short-circuits temperature 200°C/ 5 sec.
- Anticipated service life - 25 years
- Hydrolysis and ammoniac resistant

Application

The SOLARFLEX®-X PV1-F is used for cabling solar modules.

Notes

- Version with rodent protection available
- UL version on request
- All types with metre marking

SOLARFLEX®-X PV1-F TWIN

Technical Data

- **Temperature range**
-40 °C to +90 °C
Max. temp. at conductor +120 °C
- **Nominal voltage**
According to VDE U₀/U 600/1000 V AC
1800 V DC conductor/conductor
- **AC test voltage**
6500 V, 50 Hz
- **Minimum bending radius**
Single 1.5 cable diameters
Multiple 10 cable diameters

Cable structure

- Bare copper, Class 5, tinned, finely stranded according to DIN VDE 0295 class 5 and IEC 60228 cl. 5
- Double-insulated
- Insulation cross-linked special Polyolefin
- Outer sheath cross-linked special Polyolefin
- Sheath colour: black

Properties

- Approval: TÜV 2Pfg1169/08.2007
- UV, ozone-resistant, weather-resistant,
- Halogen-free
- Abrasion and cut resistant
- Relatively flexible
- Easy to strip
- Flame-resistant according to VDE 0482 Part 332-1-2, IEC 60332-1-2
- Resistant to short circuits up to 200 °C thanks to double insulation, short circuit temperature 200 °C/5 sec.
- Anticipated service life 25 years

Application

The SOLARFLEX®-X PV1-F TWIN is used for cabling solar modules.

Pre-assembled solutions

We offer individual cable solutions for professional and safe cabling. Pre-assembled solutions ensure consistently high levels of quality and speed up assembly. Costs are reduced thanks to standardization.

Chains

SOLARFLEX® cables are assembled, connected and sealed (Macromelt melting process). This significantly reduces the number of parts involved and, in turn, the failure rate. (Page 11 onwards)

PV wiring fuse/diode, pre-assembled potential equalization cable (Page 14)

Adapters

For connecting MC male and female connectors to male and female coupling connectors of different connecting systems. (Page 16)

PV cables

For establishing a connection with panel boxes or inverters, for connecting modules; available in any length and with pre-assembled male and female connectors. (Page 16)

HELUSOL 101 Y-split

Technical data:

- Cross section 4 and 6 mm²
- Rated voltage 1100 V
- Contact resistance <0.1 mΩ
- Test voltage 12 kV
- Application temperature -40°C up to +85°C
- Application class A acc. to IEC 61730-1
- IP class IP 68
- Protection class II
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- Test specifications acc. to DIN EN 50521

HELUSOL 102 T-split

Technical data:

- Cross section 2.5 to 16 mm²
- Rated voltage 1000 V
- Contact resistance <2 mΩ
- Application temperature -40°C up to +140°C
- IP class Corresponds to IP67
- Protection class II (reinforced insulation)
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- UV and weather resistant
- Test specifications EN 60664-1

HELUSOL 103 E-split

Technical data:

- Cross section 2.5 to 16 mm²
- Rated voltage 1000 V
- Contact resistance <2 mΩ
- Application temperature -40°C up to +140°C
- IP class Corresponds to IP67
- Protection class II (reinforced insulation)
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- UV and weather resistant
- Test specifications EN 60664-1

HELUSOL 106 TWIN-split

Technical data:

- Cross section 2.5 to 16 mm²
- Rated voltage 1000 V
- Contact resistance <2 mΩ
- Application temperature -40°C up to +140°C
- IP class Corresponds to IP67
- Protection class II (reinforced insulation)
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- UV and weather resistant
- Test specifications EN 60664-1

HELUSOL 103 Duo-split

Technical data:

- Cross section 2.5 to 16 mm²
- Rated voltage 1000 V
- Contact resistance <2 mΩ
- Application temperature -40°C up to +140°C
- IP class Corresponds to IP67
- Protection class II (reinforced insulation)
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- UV and weather resistant
- Test specifications EN 60664-1

HELUSOL 106 U-split

Technical data:

- Cross section 2.5 to 16 mm²
- Rated voltage 1000 V
- Contact resistance <2 mΩ
- Application temperature -40°C up to +140°C
- IP class Corresponds to IP67
- Protection class II (reinforced insulation)
- Extrusion Hot-melt, low-pressure method
- Material Macromelt OM 648 (black)
- UV and weather resistant
- Test specifications EN 60664-1

PV wiring fuse/diode

PV wiring fuse

Technical Data

- Operating current: up to 20 A
- Voltage: 900 V (controlled by fuse)
- Temperature range: -40°C up to +120°C
- Protection classification: equates to IP 67
- Protection type: II
- UV and weather resistant

Note

- Customer-specific design

PV wiring diode

Technical Data

- Operating current: 5 A
- Max. average forward current (R-Load, TA = 50 °C IFAV): 5 A
- Reverse voltage: 50 to 1000 V
- Temperature range: -40°C up to +120°C
- Protection classification: equates to IP 67
- Protection type: II
- UV and weather resistant

Note

- Customer-specific design

Components

Components for on-site electrical connection and assembly work.

Panel boxes

For electrical connection and reliable operation of solar modules. (Page 19)

PV couplings and branches

For connecting to solar cables and linking the various assemblies. (Page 20 onwards)

Photovoltaic panel box PV-JB

Suitable for connecting SOLARFLEX®-X PV1-F cables to the core cross-sections 2.5 mm², 4 mm² and 6 mm². With two bypass diodes. Preventing condensation using a bronze air filter. A set of adhesive elements are included for tight and lasting mounting on any solar module.

We offer pre-assembled solutions in your desired cable lengths and cross-sections.
If you need special capacity types please do not hesitate to contact us!

Material

- Casing: PC (polycarbonate),
- UV-resistant

Technical Data

- Temperature range: -40° C up to +125° C
- Operating power: 9-20 A
- Working voltage: 600 V
- Breakdown Voltage: 1000 V
- Contact resistance: <2 mΩ
- Isulation resistance: >500 mΩ
- Protection classification: IP 67

Photovoltaic panel boxes according to your requirements

Do you need a photovoltaic panel box customised to your special requirements?

Just contact us. Various sizes and design variants are possible.

We are happy to provide a customised solution for you. Use the contact details on the last page of the brochure.

PV MC4 male coupling connector

PV Sunclix male coupling connector

NEW

Technical Data

- Protection classification: IP 68
- Temperature range: -40°C up to +90°C (IEC)
- Rated voltage: 1000 A (IEC)
- Rated current: 40 A

Part No.	Designation	Core cross section mm ²	Cable Ø mm	Unit Pcs.
909165	PV-CM-S	2.5 - 6	3.2 - 4.8	100

PV Sunclix female coupling connector

NEW

Technical Data

- Protection classification: IP 68
- Temperature range: -40°C up to +90°C (IEC)
- Rated voltage: 1000 A (IEC)
- Rated current: 40 A

Part No.	Designation	Core cross section mm ²	Cable Ø mm	Unit Pcs.
906166	PV-CF-S	2.5 - 6	3.2 - 4.8	100

PV MC4 female branch connector

MC4 female branch connector

For secure and easy connection of PV modules in parallel
MFF = Male connector/Female connector/Female connector

Technical data

- Protection classification: IP 67
- Temperature range: -40°C up to +90°C
- Contact material: CuSn
- Casing: PC/PA
- UV-resistant

Properties

- Easy to assemble
- High degree of strain relief

Note

- Can be combined with MC4 male/female coupling connector

RoHS

Part No.	Designation	Unit Pcs.
905228	PV MC4 MFF branch	50

PV MC4 male branch connector

MC4 male branch connector

For secure and easy connection of PV modules in parallel
FMM = Female connector/Male connector/Male connector

Technical data

- Protection classification: IP 67
- Temperature range: -40°C up to +90°C
- Contact material: CuSn
- Casing: PC/PA
- UV-resistant

Properties

- Easy to assemble
- High degree of strain relief

Note

- Can be combined with MC4 male/female coupling connector

RoHS

Part No.	Designation	Unit Pcs.
905229	PV MC4 FMM branch	50

PV MC3 female branch connector

MC3 female branch connector

For secure and easy connection of PV modules in parallel
MFF = Male connector/Female connector/Female connector

Technical data

- Protection classification: IP 67
- Temperature range: -40°C up to +90°C
- Contact material: CuSn
- Casing: TPEPA
- UV resistant

Properties

- High-quality contact

Note

- Can be combined with MC3 male/female coupling connector

Part No.	Designation	Unit Pcs.
905226	PV MC3 MFF branch	50

PV MC3 male branch connector

MC3 male branch connector

For secure and easy connection of PV modules in parallel
FMM = Female connector/Male connector/Male connector

Technical data

- Protection classification: IP 67
- Temperature range: -40°C up to +90°C
- Contact material: CuSn
- Casing: TPEPA
- UV resistant

Properties

- High-quality contact

Note

- Can be combined with MC3 male/female coupling connector

Part No.	Designation	Unit Pcs.
905227	PV MC3 FMM branch	50

Cable accessories

HELUSOL HS cable gland

RoHS

Part No. Black	Size Metr.	Cable Ø from - to	Thread length mm	Width mm	Unit Pcs.
905241	M 12 x 1.5	3.0 - 6.5	6.0	15	100
905242	M 16 x 1.5	4.5 - 10.0	10.0	18	50

The plastic cable gland with vibration protection. Long-term UV resistance thanks to high-quality material.

Material

- Halogen-free
- Cadmium-free
- Phosphorous-free
- Shell: PVDF
- Moulded seal: Silicone

Properties

- Weather and UV resistant
- Optimum strain relief by means of clamping plates
- Easy to assemble
- Large clamping areas

Technical data

- Protection classification: IP 68 - 5 bar
- Temperature range: -35°C up to +150°C
- Testing standard: EN 50262

HELUTOP® HT cable gland

RoHS

Part No. Black	Size Metr.	Cable Ø from - to	Thread length mm	Width mm	Unit Pcs.

93944	M 63 x 1.5	34.0 - 44.0	18.0	65	10

The plastic cable gland with vibration protection.

Material

- Halogen-free
- Cadmium-free
- Phosphorous-free
- Silicone-free
- Shell: PA
- Black: UV resistant
- Moulded seal: neoprene

Properties

- Optimum strain relief by means of clamping plates
- Easy to assemble
- Large clamping areas

Technical data

- Protection classification: IP 68 - 5 bar
- Temperature range: -30°C up to +80°C
- Testing standard: EN 50262

KMK-PA-MB lock nut

The lock nut made of polyamide. This lock nut featuring a collar has a large contact surface, which makes it easier to create an additional seal with an O-ring.

Material

- Halogen-free
- Cadmium-free
- Phosphorous-free
- Silicone-free
- PA
- Black: UV resistant

Properties

- Weather and UV-resistant

Technical data

- Temperature range: -30°C up to +80°C

RoHS

HELUcond CO-PA protective tube

The dividable and re-closable cable protective tube for retrofitting cables with a form of mechanical protection.

- Trouble-free retrofitting
- High mechanical strength
- Simple installation of pre-fabricated cables
- Repair of existing systems

Material

- Halogen-free
- Cadmium-free
- Phosphorous-free
- Polyamide 6
- Black: UV-resistant

Technical data

- Protection classification: IP 43
- Temperature range: -40°C up to +120°C
- Temperature range for short time: up to +160°C

RoHS

Part No. Black	Nominal size mm	Internal Ø mm	External Ø mm	Unit Pcs.
90061	10.0	8.8	13.5	50
90062	14.0	13.2	18.7	50

TY-MX cable tie with steel tab - a Thomas & Betts product

TY-RAP® (UV-stabilised)

TY-RAP® cable tie with steel lug lock made of corrosion-resistant, non-magnetic steel.

Thanks to this technology the cable tie offers excellent binding properties even under the most rigorous conditions such as heat, cold, humidity etc. and is impervious to vibrations and external influences.

Material

- Halogen-free
- Polyamide 6.6
- Colour: black

Properties

- UV and ozon resistant

Technical data

Tools

Cutting and stripping

For cutting and stripping solar cables. Can also be used with high-grade sheath material. (Page 34)

Crimping and assembling

The contacts are neatly crimped for the purpose of connecting the solar cables to the connectors. If required, we can also offer specialist assembly accessories. (Page 35 onwards)

HELUTOOL D20 cable shears

Part No.	Designation	Unit Pcs.
904933	HELUTOOL D20 cable shears	1

Material

- Special tool steel, forged

Properties

- For cutting copper and aluminium cables, single-core/multicore
- Minimum effort thanks to efficient transmission ratios and innovative cutting geometry
- Cuts smoothly and cleanly without pinching
- Carves and trims (1st and 2nd blade); capable of cutting through cables up to 25 mm Ø
- Easy cutting with single-handed operation
- Adjustable screwed joint, self-locking

Stripping pliers for SOLARFLEX®

Part No.	Designation	Unit Pcs.
903572	Stripping pliers for SOLARFLEX®, complete, 1.5 - 6 mm ²	1
903573	Cutting insert, 1.5 - 6 mm ²	1
905343	Stripping pliers for SOLARFLEX®, complete, 4 - 10 mm ²	1
905344	Cutting insert, 4 - 10 mm ²	1

Material

- Chromium-plated

Properties

- For core cross sections of 1.5 - 6 mm² or 4 - 10 mm²
- With longitudinal stop
- Precise and damage-free stripping
- Exchangeable cutting insert
- Ergonomically shaped two-component handles
- Length 200 mm
- Weight 425 g

HELUTOOL PEW 12.194 crimping tool

Suitable for crimping turned contacts MC3 and H4

Properties

- For solderless electrical connections
- Near-parallel crimping action
- Consistently high crimping quality thanks to precision profiles and positive lock (can be released)
- Crimping pressure is set (calibrated) precisely at the factory
- Leverage intensifies force to prevent fatigue when working
- Ergonomically shaped grips
- Various aids for precise positioning
- All stressed parts made from special steel, which is oil-hardened and tempered
- Burnished head, grips fitted with plastic sleeves
- For turned contacts, e.g. MC3
- Length 200 mm
- Weight 570 g

Part No.	Designation	Core cross section mm ²	Unit Pcs.
906151	HELUTOOL PEW 12.194 for MC3		1
906150	HELUTOOL PEW 12.1194 for H4		1

PV Tool Box HELUTOOL

Suitable for mounting MC3, MC4, H4 and other connecting systems (2.5 to 6 mm²)

Content

- Crimping tool PEW with locator (upper and lower part)
- Cable shear, up to 50 mm²
- Stripping plier

Other combinations are available on request

Part No.	Designation	Unit Pcs.
906168	PV Tool Box HELUTOOL I for MC3, HC3, H4	1
906169	PV Tool Box HELUTOOL II for MC3, HC3, Tyco, MC4	1

HELUTOOL PEW 12.570 crimping tool

Suitable for crimping punched contacts MC4

Properties

- For solderless electrical connections
- Near-parallel crimping action
- Consistently high crimping quality thanks to precision profiles and positive lock (can be released)
- Crimping pressure is set (calibrated) precisely at the factory
- Leverage intensifies force to prevent fatigue when working
- Ergonomically shaped grips
- Various aids for precise positioning
- All stressed parts made from special steel, which is oil-hardened and tempered
- Burnished head, grips fitted with plastic sleeves
- For punched contacts, 2.5 – 6.0 mm² (AWG 13 – 10) MC4
- Length 200 mm
- Weight 570 g

Part No.	Designation	Unit Pcs
904971	HELUTOOL PEW 12.570 crimping tool, with locator, 2.5 mm ² - 6 mm ²	1
905866	Crimping tool for MC4, with locator, 2.5 mm ² - 10 mm ²	1

HELUTOOL Solar RWZ3 assembly device

For easy assembly of MC3 and HC3 PV couplings

Properties

- Incl. 2 cones for a cable cross section of 4 and 6 mm²
- Length: approx. 34 cm
- Weight: 860 g

Part No.	Designation	Unit Pcs
904968	HELUTOOL Solar RWZ3 assembly device	1
904969	HELUTOOL Solar RWZ3KO I+II replacement cone	1
904970	HELUTOOL Solar RWZ3KO III replacement cone	1

HELUTOOL Solar MC4 assembly spanner

For easy assembly of PV MC4 couplings

Properties

- For tightening and releasing the cable gland; for releasing the lock.
- Assembly spanner set

Part No.	Designation	Unit Pcs
904972	HELUTOOL Solar MC4 assembly set, 2.5 - 6 mm ²	1
9005865	HELUTOOL Solar MC4 assembly set, 10 mm ²	1

HELUTOOL Solar H4 assembly spanner

NEW

For easy assembly of PV H4 couplings

Properties

- For tightening and releasing the cable gland; for releasing the lock.
- Assembly spanner set

Part No.	Designation	Unit Pcs
905598	Opener	1
905599	Spanner	1

Medium Voltage Cables page 58 onwards

Technical Data

- Special PVC control cables Adapted to DIN VDE 0262/12.95 and DIN VDE 0281 part 13, with insulation thickness for 1 kV type
- **Temperature range**
Flexing -15°C ¹⁾ up to +80°C
Fixed installation -40°C up to +80°C
- **Nominal voltage** U₀/U 0,6/1 kV
- **Test voltage** 4000 V
- **Breakdown voltage** min. 8000 V
- **Insulation resistance**
Min. 20 MΩm x km
- **Power ratings**
Per DIN VDE 0298
- **Minimum bending radius**
Flexing 7,5x cable Ø
Fixed installation 4x cable Ø
- **Radiation resistance**
Up to 80x10⁶ cJ/kg (up to 80 Mrad)
¹⁾ cold bending test, impact resistance test at low temperatures, elongation test at low temperatures. Tested acc. to VDE 0473 Teil 811-1-4, EN 60811-1-4

Cable structure

- Bare copper, fine wire conductors, as per DIN VDE 0295 cl. 5, BS 6360 cl. 5 and IEC 60228 cl. 5
- Special PVC core insulation TI2, to DIN VDE 0281 part 1
- Black cores with white figure imprints to DIN VDE 0293
- Green-yellow earth core in the outer layer (3 cores and above)
- Cores stranded in layers with optimal lay-length
- Special PVC outer sheath TM2, to DIN VDE 0281 part 1
- Colour black (RAL 9005)
- With meter marking, change-over in 2011

Properties

- Extensively oil resistant
- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- Resistant to ultra violet ray

Note

- G = with green-yellow earth core;
x = without green-yellow earth core (OZ).
- Different dimensions are also available with red resp. blue cores.
- AWG sizes are approximate equivalent values. The actual cross-section is in mm².
- Screened analogue type:
JZ-600-Y-CY

Application

Wiring cable for measuring and controlling purposes in tool machinery, conveyor belts and production lines, for plant installations, air conditioning and in steel production plants and rolling mills. Suitable for installation for flexible use for medium mechanical stresses with free movement without tensile stress or forced movements in dry, moist and wet rooms as well as outside (fixed installation). Is not suitable to be used as direct burial- or as underwater cable. The cores have been numbered in such a way that the numbers are easily identifiable, even if the cable has only been stripped back a few cm. The core numbers have been underlined to avoid confusion. The earth core is located in the outer layer. The black, special PVC outer sheath is resistant to the ultra violet radiation. Mainly used in South-European, Eastern and Arabian countries.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Dimensions and specifications may be changed without prior notice. (RA01)

Technical Data

- Special control cables with thermoplastic PVC insulation On the basis of DIN VDE 0262/12.95 and DIN VDE 0281 part 13
- **Temperature range**
Flexing -15°C ¹⁾ up to +80°C
Fixed installation -40°C up to +90°C
- **Nominal voltage** U₀/U 0,6/1 kV
- **Test voltage** 4000 V
- **Breakdown voltage** min. 8000 V
- **Insulation resistance**
Min. 20 MΩ x km
- **Power rating**
According to DIN VDE 0298
- **Minimum bending radius**
Flexing 10x cable Ø
Fixed installation 5x cable Ø
- **Radiation resistance**
Up to 80x10⁶ cJ/kg (up to 80 Mrad)
- **Coupling resistance**
Max. 250 Ω/km
- ¹⁾ cold bending test, impact resistance test at low temperatures, elongation test at low temperatures. Tested acc. to VDE 0473 Teil 811-1-4, EN 60811-1-4

Cable structure

- Bare copper, fine wire conductors, according to DIN VDE 0295 cl. 5, BS 6360 cl. 5 and IEC 60228 cl. 5
- Special PVC core insulation TI2, to DIN VDE 0281 part 1
- Black cores with sequential numbering imprinted in white, according to DIN VDE 0293
- Green-yellow earth core in the outer layer (3 cores and above)
- Cores stranded in layers with optimal lay-length
- PVC-insulated inner sheath
- Braided screen of tinned Cu wires, coverage approx. 85%
- Special PVC outer sheath TM2, to DIN VDE 0281 part 1
- Colour black (RAL 9005)
- With meter marking, change-over in 2011

Properties

- Extensively oil resistant
- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- Resistant to ultra violet rays

Note

- G = with green-yellow earth core;
x = without green-yellow earth core (OZ).
- Further sizes are available upon request.
- AWG sizes are approximate equivalent values. The actual cross-section is in mm².
- Unscreened analogue type:
JZ-600

Application

Wiring cable for measuring and controlling purposes in tool machinery, conveyor belts and production lines, for plant installations, air conditioning and in steel production plants and rolling mills. Suitable for installation for flexible use for medium mechanical stresses with free movement without tensile stress or forced movements in dry, moist and wet rooms as well as outside (fixed installation). Is not suitable to be used as direct burial- or as underwater cable. The cores have been numbered in such a way that the numbers are easily identifiable, even if the cable has only been stripped back a few cm. The core numbers have been underlined to avoid confusion. The earth core is located in the outer layer. The black, special PVC outer sheath is resistant to the ultra violet radiation. Mainly used in South-European, Eastern and Arabian countries. Interference-free transmission of signals and pulses is assured by the high degree of screening.

EMC = Electromagnetic compatibility

To optimise the EMC features we recommend a large round contact of the copper braiding on both ends.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Technical Data

- Rubber sheathed cable H07 RN-F to DIN VDE 0282 part 4, HD 22.4 S4, BS7919 = IEC 60245-4
- **Temperature range**
-30°C up to +60°C
- Permissible **operating temperature** at conductor +60°C
- **Nominal voltage** U_0/U 450/750 V in case of protected and fixed installation U_0/U 600/1000 V
- Max. permissible **operating voltage** in three phase and one phase a.c. system U_0/U 476/825 V
- Direct current-system U_0/U 619/1238 V
- **Test voltage** 2500 V
- **Permanent tensile load**
max. 15 N/mm²
- **Minimum bending radius**
For fixed installation 4x cable \emptyset
For guiding over roller 7,5x cable \emptyset
During winding on drums 5-7x cable \emptyset

Cable structure

- Copper conductor fine wire stranded, bare to DIN VDE 0295 cl. 5, BS 6360 cl. 5, IEC 60228 cl. 5 and HD 383
- Rubber core insulation EI4 to DIN VDE 0282 part 1
- Insulation thickness to DIN VDE 0282 part 4
- Core identification to DIN VDE 0293-308
- Core colours
- Up to 5 cores one-coloured
- 6 and more cores, black with numbering
- 3 and above, with green-yellow earth core
- 2 cores without green-yellow earth core
- Cores stranded in layers with optimal lay-length
- Outer jacket of rubber black, rubber compound to DIN VDE 0282 part 1
- Sheath thickness to DIN VDE 0282 part 4

Properties

- Resistant to Weather
- **Test**
Test according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- Oil resistant
Test according to EN 60811-2-1

Note

- G = with green-yellow earth core
x = without green-yellow earth core
- AWG sizes are approximate equivalent values, the actual cross-section is in mm².
- Further dimensions and cross-sections available on request
- H07 RN-F = harmonized rubber-sheathed cable, working voltage 750 V, fine stranded.
- The core identification of a single core jacketed, of an insulated wire is black
- For application as a protective core, the ends are to be identified with green-yellow and the middle conductor with light blue

Application

Heavy duty rubber-sheathed flexible cables are suited for use for medium mechanical stress in dry, damp and wet areas as well as in open air and in agriculture plants.

They are used for equipment in industry works such as boilers, heating plates, hand lamps, electric tools such as drills, circular saws and homework tools as well as for transportable motors or machines at site.

These cables are also suitable for fixed installation on plaster, in temporary buildings and residential barracks. They are suitable for direct laying on components and mechanical parts of machines, for example lifts and cranes.

They can be used in case of protected and fixed installation in tubes or in equipment as well as rotor connecting cable of motors with a working voltage up to 1000 V alternating voltage or a direct voltage up to 750 V against ground. The operating direct voltage is permitted up to 900 V against ground when they are used in rail-coaches. Installation in hazardous areas according to DIN VDE 0165 is allowed.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Note

For method installation

Single core cables are bunched (unit-form) / 2 cores cables laid parallel with contact / 3 cores cables are in triangled form

RoHS

Technical Data

- Power and control cable to DIN VDE 0276 part 603 S1, HD 603.1 and IEC 60502, 7 core and above to DIN VDE 0276 part 627, HD 627 S1 and IEC 60502
- **Temperature range**
flexing -5°C up to +50°C
fixed installation -40°C up to +70°C
- Permissible **operating temperature** at conductor +70°C
- Permissible **short circuit temperature** +160°C (short circuit duration 5 sec.)
- **Nominal voltage** U_0/U 0.6/1 kV
- **Test voltage** 4 kV
- Max. permissible **tensile stress** with cable grip for Cu-conductor = 50 N/mm²
- **Minimum bending radius**
for single core approx. 15x cable Ø
for multi core approx. 12x cable Ø

Cable structure

- Plain copper conductor, to DIN VDE 0295 cl. 1 or cl. 2 solid or stranded type, BS 6360 cl. 1 or cl. 2, IEC 60228 and HD 383
- PVC core insulation, DIV4 to HD 603.1
- Cores stranded concentrically
- Colour coded to DIN VDE 0293-308, 0276 part 603 or HD 186
- Core colour for 3+½ conductor
- J-type: gnye (½), bn, bk, gy
- O-type: bu (½), bn, bk, gy
- PVC outer jacket, DMV5 to HD 603.1
- Sheath colour black

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers

Highest permissible voltage

- Direct current systems 1.8 kV
- Alternating current systems, single-phase systems 1.4 kV
Both conductors insulated, single-phase systems 0.7 kV
One conductor earthed, three-phase systems 1.2 kV
With concentric conductor and a cross-section of 240 mm² and above 3.6 kV

Note

- re = round conductor, single-wire;
rm = round conductor, multiple-wire;
sm = stranded, sectional core.
- Also available in NYFGBY, NYBY versions etc.
- 2 cores = adapted to DIN VDE.
- **In respect to 3+½ conductors**
Whereby only one conductor is allowed to contain a smaller cross-section (as per DIN VDE 0276 part 603 table 5) and permitted to place as insulated core (green-yellow and blue as ½-conductor), stranded in layer.

Application

Power cables for energy supply are installed in open air, in underground, in water, indoors, in cable ducts, power stations, for industry and distribution boards as well as in subscriber networks, where mechanical damages are not to be expected.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Dimensions and specifications may be changed without prior notice. (RQ01)

Technical Data

- Power and control cable to DIN VDE 0276 part 603, HD 603 S1 and IEC 60502
- **Temperature range**
Flexing -5°C up to +50°C
Fixed installation -40°C up to +70°C
- Permissible **operating temperature** at conductor +70°C
- Permissible **short circuit temperature** +160°C (short circuit duration 5 sec.)
- **Nominal voltage** U₀/U 0.6/1 kV
- **Test voltage** 4 kV
- Max. permissible tensile stress with cable grip for Alu-conductor = 30 N/mm²
- **Minimum bending radius**
For multi core approx. 12x cable Ø
For single core approx. 15x cable Ø

Cable structure

- Solid aluminium conductor, as per VDE 0295 cl. 1 or cl. 2 (round and sector shaped), BS 6360 cl. 1 or cl. 2, IEC 60228 and HD 383
- PVC core insulation, DIV4 to HD 603.1
- Conductor colours: green-yellow, brown, black, grey
- Cores stranded in layers
- Inner covering
- PVC outer jacket black, DMV5 to HD 603.1
- Sheath colour black

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Highest permissible voltage**
- Direct current systems 1.8 kV
- Alternating current systems, single-phase systems 1.4 kV; both conductors insulated, single-phase systems 0.7 kV; One conductor earthed, three-phase systems 1.2 kV; with concentric conductor and a cross-section of 240 mm² and above 3.6 kV

Application

Power cables for energy supply are installed in open air, in underground, in water, indoors, in cable ducts, power stations, for industry and distribution boards as well as in subscriber networks, where mechanical damages are not be expected.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Note

- re = round solid core; se = sectional core;
- rm = stranded core; sm = sectional core;
- AWG sizes are approximate equivalent values. The actual cross-section is in mm².

Dimensions and specifications may be changed without prior notice. (RQ01)

Technical Data

- Power and control cable to DIN VDE 0276 part 603, HD 603 S1 and IEC 60502
7 cores and above to DIN VDE 0276 part 627, HD 627 S1 and IEC 60502
- **Temperature range**
Flexing -5°C up to +50°C
Fixed installation -40°C up to +70°C
- Permissible **operating temperature** at conductor +70°C
- Permissible **short circuit temperature** +160°C (short circuit duration 5 sec.)
- **Nominal voltage** U₀/U 0.6/1 kV
- **Test voltage** 4 kV
- Max. permissible **tensile stress** with cable grip for Cu-conductor = 50 N/mm²
- **Minimum bending radius**
For single core approx. 15x cable Ø
For multi core approx. 12x cable Ø

Cable structure

- Plain copper solid conductor as per VDE 0295 cl. 1, BS 6360 cl. 1, IEC 60228 and HD 383
- PVC core insulation, DIV4 to HD 603.1
- Colour coded to VDE 0293-308 and HD 186
- Cores stranded concentrically
- Filling compound
- Concentric conductor in inner layer of round copper wires, outer layer with copper tape
- PVC outer sheath, DMV5 to HD 603.1
- Sheath colour black

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Highest permissible voltage**
- Direct current systems 1.8 kV
- Alternating current systems, single-phase systems 1.4 kV
Both conductors insulated, single-phase systems 0.7 kV
One conductor earthed, three-phase systems 1.2 kV
With concentric conductor and a cross-section of 240 mm² and above 3.6 kV

Note

- re = round solid core.
- Available with outer sheath in alternative colours on request.

Application

Power cables for energy supply are used for industry and distribution boards, power stations, house connecting boxes and street lighting as well as control cable for the transmission of control impulses and test datas.

Overall, where increased electrical and also mechanical protection are required.

Those cables are installed in open air, in underground, in water, indoors and in cable ducts.

The concentric conductor (C) is allowed to use as PE-, PEN-conductor or as screen

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Direct burial cables and medium voltage cables directly from the Berlin warehouse

- Large warehouse (50,000 m²) with many different types, many cross sections, large quantities
- Delivery at short notice from the Berlin warehouse, also for cutting to length, follow-up deliveries
- Guaranteed VDE-certified, DIN VDE 0276
- On-time delivery on the construction site, on disposable drums if required

Technical Data

- Power and control cable to DIN VDE 0276 part 603, HD 603 S1 and IEC 60502
- **Temperature range**
Flexing -5°C up to +50°C
Fixed installation -40°C up to +70°C
- **Permissible operating temperature**
At conductor +70°C
- **Permissible short circuit temperature**
+160°C (short circuit duration 5 sec.)
- **Nominal voltage** U_0/U 0.6/1 kV
- **Test voltage** 4 kV
- Max. permissible tensile stress with cable grip for Cu-conductor = 50 N/mm²
- **Minimum bending radius**
For single core approx. 15x cable Ø
For multi core approx. 12x cable Ø

Cable structure

- Plain copper conductors, as per VDE 0295 cl. 1 od. cl. 2, IEC 60228, BS 6360 cl. 1 and HD 383, solid or stranded versions, conductor types
10-16 mm² round, solid cores (re) alt.
10-25 mm², stranded conductor (rm),
35-240 mm², sector shaped conductor, stranded (sm)
- PVC core insulation, DIV4 to HD 603.1
- Colour coded to DIN VDE 0293-308 and HD 186
- Cores stranded concentrically
- Filling compound
Concentric conductor (Ceander), inner layer of corrugated copper wires, outer layer with copper tape
- PVC outer sheath, DMV5 to HD 603.1
- Sheath colour black

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Highest permissible voltage**
- Direct current systems 1.8 kV
- Alternating current systems, single-phase systems 1.4 kV
Both conductors insulated, single-phase systems 0.7 kV
- One conductor earthed, three-phase systems 1.2 kV
With concentric conductor and a cross-section of 240 mm² and above 3.6 kV

Note

- At 25 mm² = round cables are more compact thus smaller core Ø.
- Available with outer sheath in alternative colours on request.
- re = round solid core;
rm = stranded core;
sm = sectional core.

Application

Power cables for energy supply, preferably used for underground laying, especially in subscriber networks, power stations as well as control cables for the transmission of control impulses and test datas. Overall, where increased electrical and also mechanical protection are required. Those cables are installed in open air, in underground, in water, indoors and in cable ducts. The concentric conductor (C) is allowed to use as PE-, PEN-conductor or as screen. Due to the typical construction of corrugated concentric conductors (Ceander), are possible to obtain many more cable joints, without cutting any conductor. In that way the operating reliability is guaranteed.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

CABLES AND WIRES

The extensive standard range of cables and wires for many applications and nearly every purpose – available directly ex warehouse.

HELUKABEL® supplies cables and wires for all industry sectors, applications and every purpose. Our comprehensive stock assortment with over 33,000 products lets us cover your needs with short delivery times.

Our large standard range includes the following products:

flexible control cables · data and computer cables · cables for drag chains
 cables according to international standards · servo-, feedback- and motor cables
 heat resistant wires · allweather and rubber cables · trailing cables · robot cables
 water resistant cables · flat and ribbon cables · single conductors · spiral cables
 compensating cables · installation cables · telephone and fire wiring cables
 coaxial cables · power cables, security cables and medium voltage cables
 special cables · shipwiring and marine cables and much more.

Ask for more information, available in our current Cables & Wires catalogue via Internet or Fax (for Fax enquiry see page 71).

Technical Data

- Power and control cable according to DIN VDE 0276 Part 603 or HD 603 S1 and IEC 60502
- **Temperature range**
Flexing -5°C up to +50°C
Fixed installation -40°C up to +70°C
- **Permissible operating temperature**
At conductor +70°C
- **Permissible short circuit temperature**
+160°C (short circuit duration 5 sec.)
- **Nominal voltage** U_0/U 0.6/1 kV
- **Test voltage** 4 kV
- Max. permissible tensile load with cable grip = 30 N/mm²
- **Minimum bending radius**
Approx. 12x cable Ø

Cable structure

- Aluminium conductor according to DIN VDE 0295 cl. 1, IEC 60228, BS 6360 cl. 1 or HD 383
16 to 25 mm², round conductor
Single-wire (re) or 35-240 mm², sector-shaped conductor, multi-wire (sm)
- PVC core insulation, DIV4 in accordance with HD 603.1 Core colour according to DIN VDE 0293-308 or HD 186
- Core colour according to DIN VDE 0293-308 and HD 186
- Cores stranded in concentric layers
- Filling compound
- Concentric conductor, inner layer Corrugated (Ceander), round, Bare copper wires, outer layer Copper tape as counter helix
- PVC outer sheath, DMV5 to HD 603.1
- Sheath colour black

Properties

- PVC self-extinguishing and flame retardant in accordance with VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (conforms to DIN VDE 0472 Part 804 Test method B)
- The materials used in manufacture are free of silicone, cadmium and substances that impair paint wetting
- **Highest permissible voltage**
- Direct current systems 1.8 kV
- Three-phase systems
Single-phase systems:
Both outer conductors insulated 1.4 kV
Single-phase systems:
One outer conductor earthed 0.7 kV
- Three-phase system 1.2 kV with concentric conductor and a cross-section from 240 mm² 3.6 kV

Note

- re = round conductor, single-wire;
sm = sector-shaped conductor, multi-wire.

Application

Power distribution cables, preferably used for underground installation, primarily in local networks, for industrial applications and switching systems, power stations. Wherever increased electrical and mechanical protection are required. Installation in water, outdoors, in concrete, indoors and in cable ducts. The concentric conductor (C) can be used as a PE or PEN conductor or as a screen. The corrugated design (Ceander) of the concentric conductor permits any number of cable junctions during assembly, without any conductors having to be cut. This guarantees optimised reliability.

☞☞ = The product conforms to the EG Low-Voltage Directive 2006/95/EG.

Part No.	Number of cores x nominal cross section mm ²	Outer Ø mm	Cop. Weight kg/km	Alu weight approx. kg/km	Weight approx. kg/km

Dimensions and specifications may be changed without prior notice.

Technical Data

- Power and control cable according to DIN VDE 0276 part 604, HD 604 S1 part 1 and part 5G
- **Conductor resistance** (at 20°C) according to VDE 0295 cl. 1 or 2 and IEC 60228 cl. 1 or 2 and HD 383 cl. 1 and cl. 2
- **Temperature range** during installation -5°C up to +50°C fixed installation -30°C up to +90°C
- **Permissible operating temperature** at conductor 90°C
- **Nominal voltage** U_0/U 0,6/1 kV
- **Test voltage** 4 kV
- **Minimum bending radius** single-core approx. 15x cable Ø multi-core approx. 12x cable Ø
- **Radiation resistance** up to 100×10^5 cJ/kg (up to 100Mrad)

Cable structure

- Plain Cu wire conductor, single or multiple-wire, according to DIN VDE 0295 cl. 1 or 2, BS 6360 cl. 1 or 2 and IEC 60228 cl. 1 or 2, HD 383
- Halogen-free core insulation, cross-linked polyethylene compound 2X11, to HD 604 S1
- Colour coding of cores according to DIN VDE 0293-308 and HD 186
- Green-yellow earth-core, 3 cores and above
- Cores stranded in layers (for multi-core cables)
- Overall filled inner sheath, covered by filling compound or wrapped tape
- Outer sheath of thermoplastic polyolefine compound HM4, to HD 604 S1
- Sheath colour black
- LSOH = Low Smoke Zero Halogen-free

Properties

- Halogen-free, no separation of corrosive or toxic gases
- Limited propagation of fire
- Low smoke development
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers

Tests

- Flame test to VDE 0482-332-3, BS 4066 part 3/ DIN EN 60332-3/ IEC 60332-3 (equivalent DIN VDE 0472 part 804 test method C)
- Corrosiveness of combustion gases according to VDE 0482 part 267/ DIN EN 50267-2-2/ IEC 60754-2 (equivalent DIN VDE 0472 part 813)
- Halogen-free according to DIN VDE 0482 part 267/ DIN EN 50267-2-1/ IEC 60754-1 (equivalent DIN VDE 0472 part 815)
- Halogen-free according to DIN VDE 0482 part 267/ DIN EN 50267-2-1/ IEC 60754-1 (equivalent DIN VDE 0472 part 815)

Note

- rm = round conductor, multiple-wire;
re = round conductor, single-wire

Application

Halogen-free power cables with enhanced characteristics in case of fire are used for applications where harm to human life and damage to property must be prevented in the event of fire, e.g. in industrial installations, communal establishments, hotels, airports, underground stations, railway stations, hospitals department stores, banks, schools theaters, multi-storey buildings, process control centres etc.

Suitable for fixed installation in dry, damp or wet environments, in, above, on and beneath plaster as well as in masonry walls and in concrete. These cables are suitable for outdoor applications and in underground by using in conduits or tubes.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Dimensions and specifications may be changed without prior notice.

Technical Data

- Power and control cable according to DIN VDE 0276 part 604, HD 604 S1 part 1 and part 5G
- **Conductor resistance** (at 20°C) according to VDE 0295 cl. 1 or 2 and IEC 60228 cl. 1 or 2 and HD 383 cl. 1 and cl. 2
- **Temperature range** during installation -5°C up to +50°C fixed installation -30°C up to +90°C
- Permissible **operating temperature** at conductor +90°C
- **Nominal voltage** U_0/U 0,6/1 kV
- **Test voltage** 4 kV
- **Minimum bending radius** approx. 12x cable Ø
- **Radiation resistance** up to 100×10^6 cJ/kg (up to 100Mrad)

Cable structure

- Plain Cu wire conductor, single or multiple-wire, according to DIN VDE 0295 cl. 1 or 2, BS 6360 cl. 1 or 2 and IEC 60228 cl. 1 or 2, HD 383
- Halogen-free core insulation, cross-linked polyethylene compound 2X11, to HD 604 S1
- Colour coding of cores according to DIN VDE 0293-308 and HD 186
- Cores stranded in layers (for multi-core cables)
- Overall filled inner sheath, covered by filling compound or wrapped tape
- Concentric conductor of plain Cu wires
- Outer sheath of thermoplastic polyolefine compound HM4, to HD 604 S1
- Sheath colour black
- **LSOH** = Low Smoke Zero Halogen-free
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers

Properties

- Halogen-free, no separation of corrosive or toxic gases
- Limited propagation of fire
- Low smoke development

Tests

- Smoke density according to VDE 0482 part 1034-1+2 / IEC 61034-1+2 / DIN EN 61034-1+2 / BS 7622 part 1+2 (equivalent DIN VDE 0472 part 816)
- Flame test to VDE 0482-332-3, BS 4066 part 3/ DIN EN 60332-3/ IEC 60332-3 (equivalent DIN VDE 0472 part 804 test method C)
- Corrosiveness of combustion gases according to VDE 0482 part 267/ DIN EN 50267-2-2/ IEC 60754-2 (equivalent DIN VDE 0472 part 813)
- Halogen-free according to VDE 0482 part 267/ DIN EN 50267-2-1/ IEC 60754-1 (equivalent DIN VDE 0472 part 815)

Note

- rm = round conductor, multiple-wire; re = round conductor, single-wire

Application

The concentric conductor can be used as PE- PEN conductor or as screen. Suitable for fixed installation in dry, damp or wet environments, in, above, on and beneath plaster as well as in masonry walls and in concrete. These cables are suitable for outdoor applications and in underground by using in conduits or tubes.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

Dimensions and specifications may be changed without prior notice. (R001)

RoHS

Technical Data

- PVC-sheathed cable to DIN VDE 0250 part 204
- **Temperature range**
Flexing +5°C up to +70°C
Fixed installation -40°C up to +70°C
- **Nominal voltage**
U₀/U 300/500 V
- **Test voltage** 2000 V
- **Minimum bending radius**
Fixed installation 4x cable Ø
- **Radiation resistance**
Up to 80x10⁶ cJ/kg (up to 80 Mrad)

Cable structure

- Solid or stranded, plain copper conductor to DIN VDE 0295 cl. 1 or cl. 2, BS 6360 cl. 1 or cl. 2 and IEC 60228 cl. 1 or cl. 2
- PVC core insulation, T11 to DIN VDE 0281 part 1
- Colour coded to DIN VDE 0293-308
- Cores stranded in layer
- Special PVC outer sheath TM1, to DIN VDE 0281 part 1
- Jacket colour grey (RAL 7035)

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)

Note

- re = round conductor, single-wire;
rm = round conductor, multiple-wire.
- G = with green-yellow earth core;
x = without green-yellow earth core (OZ).
- AWG sizes are approximate equivalent values.
The actual cross-section is in mm².

Application

For industrial- and wiring purposes.

Usable in the open, in dry, damp and wet environments in the open and concealed, as well as in masonry and in beton, not suitable for imbedding in solidified- or compressed-concrete. Outdoor usage is only possible, as long as the cable is protected against direct sunlight.

CE = The product is conformed with the EC Low-Voltage Directive 2006/95/EG.

N2XS_Y 6/10kV, 12/20kV, 18/30kV

Medium voltage cable, XLPE-insulated, Cu-conductor, single core, screened, PVC-jacket

RoHS

Technical Data

- XLPE-insulated power cables to DIN VDE 0276 part 620, HD 620 S1 and IEC 60502
- **Temperature range**
During installation up to -5°C
- **Operating temperature**
Max. 90°C
- **Short circuit temperature**
250°C (short circuit duration up to 5 sec.)
- **Nominal voltages**
U₀/U 6/10 kV, 12/20 kV, 18/30 kV
- **Operating voltages for**
6/10 kV = max. 12 kV
12/20 kV = max. 24 kV
18/30 kV = max. 36 kV
- **Test voltages for**
6/10 kV = 15 kV
12/20 kV = 30 kV
18/30 kV = 45 kV
- **Minimum bending radius**
During installation max. 15x cable Ø

Cable structure

- Circular bare Cu-conductor of stranded wires to HD 383
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the insulation
- Wrapping of conductive material
- Screen: Braiding of copper wires with one or two tape(s) applied helically
- Wrapping
- PVC outer jacket, compound DMV6 to HD 620.1
- Jacket colour red

Properties

- PVC self-extinguishing and flame retardant according to VDE 0482-332-1-2, DIN EN 60332-1-2/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation.

Note

- Further dimensions available on request

Application

Suitable for installation mostly for power supply stations, in indoors and in cable ducts, outdoors, underground and in water as well as for installation on cable trays for industries, switch-boards and power stations. Due to the good laying characteristic, this can also be laid easily in difficult line guideways. The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

CABLE ACCESSORIES

The logical complement to our cable assortment.

As a meaningful addition to our comprehensive program of cables and wires, HELUKABEL®, has created a convincing cable accessory program that complies with the latest directives and standards.

Some of the topics covered are:

- Cable glands
- Protective tubes
- Drag and guidance chains
- Insulation, shrunk, braided and high temperature tubes
- Termination and connection sleeves
- Bundling, binding and fixing
- Identification and marking
- Terminals and cable lugs
- Tools
- Signal and power connectors

Ask for more information, available in our current Cable Accessories catalogue via Internet or Fax (for Fax enquiry see page 71).

N2XS2Y 6/10kV, 12/20kV, 18/30kV

Medium voltage cable, XLPE-insulated, Cu-conductor, single core, screened, PE-jacket

RoHS

Technical Data

- XLPE-insulated power cables to IEC 60502, DIN VDE 0276 part 620, HD 620 S1
- **Temperature range**
During installation up to -20°C
- **Operating temperature**
Max. 90°C
- **Short circuit temperature**
250°C (short circuit duration up to 5 sec.)
- **Nominal voltages**
U₀/U 6/10 kV, 12/20 kV, 18/30 kV
- **Operating voltages for**
6/10 kV = max. 12 kV
12/20 kV = max. 24 kV
18/30 kV = max. 36 kV
- **Test voltages for**
6/10 kV = 15 kV
12/20 kV = 30 kV
18/30 kV = 45 kV
- **Minimum bending radius**
During installation max. 15x cable Ø

Cable structure

- Circular bare cu-conductor of stranded wires to HD 383
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the insulation
- Wrapping of conductive material
- Screen: Braiding of copper wires with one or two tapes applied helically
- Wrapping
- PE-outer jacket black, compound DMP2 to HD 620.1
- Jacket colour black

Properties

- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation.

Note

- Further dimensions available on request.

Application

Suitable for indoor installation and in cable ducts, outdoors, underground and in water as well as for installation on cable trays for industries, switchboards and power stations. The PE-outer jacket is resistant to high mechanical stress for laying the cables. This PE-jacket is not flame-resistant (does not conform the test method B, as per VDE 0472 part 804).

The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

DATA, NETWORK & BUS TECHNOLOGY

The program for wiring the corporate-wide network infrastructure.

HELUKABEL offers a comprehensive service for networking heterogeneous systems in glass fibre and copper engineering. No matter if system-conform bus systems or innovative industrial Ethernet components. We have the solution. Independently developed products in the passive area and active components from renowned manufacturers form the backbone of our portfolio.

Our activities in this segment are distinguished with the brands

Request our Data, Network & Bus Technology catalogue through the Internet or via Fax (for Fax enquiry see page 71).

250°C (short circuit duration up to 5 sec.)
- **Nominal voltages**
U₀/U 6/10 kV, 12/20 kV, 18/30 kV
- **Operating voltages for**
6/10 kV = max. 12 kV
12/20 kV = max. 24 kV
18/30 kV = max. 36 kV
- **Test voltages for**
6/10 kV = 15 kV
12/20 kV = 30 kV
18/30 kV = 45 kV
- **Minimum bending radius**
During installation max. 15x cable Ø

Cable structure

- Circular bare alu-conductor of stranded wires to HD 383
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the insulation
- Wrapping of conductive material
- Screen: Braiding of copper wires with one or two tapes applied helically
- Wrapping
- PE-outer jacket black, compound DMP2 to HD 620.1
- Jacket colour black

Properties

- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation.

Note

- Further dimensions available on request.

Application

Suitable for indoor installation and in cable ducts, outdoors, underground and in water as well as for installation on cable trays for industries, switchboards and power stations. The PE-outer jacket is resistant to high mechanical stress for laying the cables. This PE-jacket is not flame-resistant (does not conform the test method B, as per VDE 0472 part 804).

The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

MEDIA TECHNOLOGY

The assortment of cables and wires for media technology.

Our assortment for media technology includes wires for both indoor and outdoor use and guarantees high transmission quality in both fixed installations as well as in mobile use.

Our comprehensive range includes amongst others

- Audio cables according to AES/EBU
- DMX cables
- Loudspeaker cables
- Video cables
- Microphone cables
- Instrument cables
- Special purpose cables according to your requirements

Our activities in this segment are distinguished with the brands

HELULIGHT[®]

HELUSOUND[®]

Ph. +49 7150 9209-773 or
medientechnik@helukabel.de

Just give us a call. We would be glad to advise you

Request our special Media Technology catalogue through the Internet or via Fax (for Fax enquiry see page 71).

RoHS

Technical Data

- XLPE-insulated power cables to DIN VDE 0276 part 620, HD 620 S1 and IEC 60502
- **Temperature range**
During installation up to -20°C
- **Operating temperature**
Max. 90°C
- **Short circuit temperature**
250°C (short circuit duration up to 5 sec.)
- **Nominal voltages**
U_n/U 6/10 kV, 12/20 kV, 18/30 kV
- **Operating voltages for**
6/10 kV = max. 12 kV
12/20 kV = max. 24 kV
18/30 kV = max. 36 kV
- **Test voltages for**
6/10 kV = 15 kV
12/20 kV = 30 kV
18/30 kV = 45 kV
- **Minimum bending radius**
During installation max. 15x cable Ø

Cable structure

- Circular bare Cu-conductor of stranded wires to DIN VDE 0295 cl. 2 bzw. IEC 60228 cl. 2
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the XLPE-insulation
- Longitudinally water-tight, conductive wrapping
- Screen: Braiding of copper wires with one or two tapes applied helically
- Longitudinally water-tight wrapping
- PE-outer jacket, compound DMP2 to HD 620.1
- Jacket colour black

Properties

- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation

Note

- AWG sizes are approximate equivalent values. The actual cross-section is in mm².
- For longitudinally and crosswise water-tight cable type N2XS(F)2Y with PE-copolymere coated aluminium.
- Further types and dimensions on request.

Application

Suitable for indoor installation and in cable ducts, outdoors, underground and in water as well as for installation on cable trays for industries, switchboards and power stations. The PE-outer jacket is resistant to high mechanical stress for laying the cables. This PE-jacket is not flame-resistant (does not conform the test method B, as per VDE 0472 part 804).

The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

RESEARCH AND DEVELOPMENT

Our design engineers develop and test new cable and wire types up to series maturity.

New products are tested for their applicability and their readiness for production in the state-of-the-art equipped test centre at our factory in Windsbach. In-process measurements and random samples secure our high quality standard.

Products for mobile use with a very high depth of manufacturing build up a main core of the range. Extreme chemical, electrical and mechanical loads paired with small bending radii, a high number of alternating bending cycles and exceptional service lives are requirements made by our customers that we gladly meet.

We would also be glad to develop your cable made to measure.
Give us a call at Ph. +49 7150 9209-731 or -135

A development example:

The cargo ship MS Beluga is being pulled by the SkySail using wind power. The traction cable including the control wire being used for this, which was designed, developed and produced by HELUKABEL®.

NA2XS(F)2Y 6/10kV, 12/20kV, 18/30kV Medium voltage cable, XLPE-insulated, alu-conductor, singel core, screened, longitudinally water-tight, PE-jacket

RoHS

Technical Data

- XLPE-insulated power cables to DIN VDE 0276 part 620, HD 620 S1 and IEC 60502
- **Temperature range**
During installation up to -20°C
- **Operating temperature**
Max. 90°C
- **Short circuit temperature**
250°C (short circuit duration up to 5 sec.)
- **Nominal voltages**
U₀/U 6/10 kV, 12/20 kV, 18/30 kV
- **Operating voltages for**
6/10 kV = max. 12 kV
12/20 kV = max. 24 kV
18/30 kV = max. 36 kV
- **Test voltages for**
6/10 kV = 15 kV
12/20 kV = 30 kV
18/30 kV = 45 kV
- **Minimum bending radius**
During installation max. 15x cable Ø

Cable structure

- Circular bare alu-conductor of stranded wires to DIN VDE 0295 cl. 2 and IEC 60228 cl. 2
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the XLPE-insulation
- Longitudinally water-tight, conductive wrapping
- Screen: Braiding of copper wires with one or two tapes applied helically
- Longitudinally water-tight wrapping
- PE-outer jacket, compound DMP2 to HD 620.1
- Jacket colour black
- Jacket thickness voltage 2,5 mm

Properties

- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation.

Note

- AWG sizes are approximate equivalent values. The actual cross-section is in mm².
- For longitudinally and crosswise water-tight cable type NA2XS(FL)2Y with PE-copolymere coated aluminium.
- Further types and dimensions on request.

Application

Suitable for indoor installation and in cable ducts, outdoors, underground and in water as well as for installation on cable trays for industries, switchboards and power stations. The PE-outer jacket is resistant to high mechanical stress for laying the cables. This PE-jacket is not flame-resistant (does not conform the test method B, as per VDE 0472 part 804).

The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

The logistics centre – our service excellence

The majority of the product range that includes over 33,000 products is kept ready on a storage area of 160,000 m² in our central warehouse Hemmingen/Germany. The main linchpin for that is the logistics centre at the headquarters in Hemmingen.

With its commissioning in 2001 HELUKABEL reacted to the increased market requirements. The goal was and is accelerated and paperless processing and delivery of customer orders while maintaining a high level of efficiency within the supply chain. State-of-the-art warehousing and conveyor equipment along with continuous information technology make the plant unique in the sector.

Extensively automated, several hundred orders are compiled daily “just in time” from over 16,000 pallet storage spaces, and over 1600 length cuts are made every day. Dispatching on a worldwide scale in over 60 countries, packing seaworthy and labelling in 14 languages is our daily business today – perhaps tomorrow for you too?

Logistic Centre Hemmingen/Germany

N2XSEY 3x ... 6/10kV

medium voltage cable, XLPE-insulated, Cu-conductor, PVC-jacket

Technical Data

- Three core XLPE-insulated power cables to VDE 0276 and IEC 60502
- **Temperature range**
during installation up to -5°C
- **Operating temperature**
max. 90°C
- **Short circuit temperature**
core 250°C
screen 350°C (duration)
(short circuit duration up to 5 sec.)
- **Nominal voltages** U_0/U 6/10 kV
- **Operating voltages**
max. 12 kV
- **Test voltages** 15 kV
- **Test voltages d.c.** 48 kV
- **Power rating**
to DIN VDE 0298 part 2
- **Minimum bending radius**
during installation 15x cable \varnothing
- **Tests**
according to DIN VDE 0276 und IEC 60502

Cable structure

- Circular bare Cu-conductor of stranded wires to DIN VDE 0295 cl. 2 and IEC 60228 cl. 2
- Inner semi-conducting coating
- Core insulation of cross-linked Polyethylene (XLPE), PE-compound DIX8 to HD 620.1
- Outer extrusion of semi-conducting coating spliced with the XLPE-insulation
- Conductive wrapping
- Screen: Braiding of copper wires with one or two tapes applied helically
- 3 cores stranded
- Extruded sheath over three cores
- PVC outer jacket, compound DMV6 to HD 405.1 and HD 620/1
- Jacket colour red

Properties

- self-extinguishing and flame retardant according to DIN VDE 0482 part 265-2-1/ EN 50265-2-1/ IEC 60332-1 (equivalent DIN VDE 0472 part 804 test method B)
- The materials used in manufacture are cadmium-free and contain no silicone and free from substances harmful to the wetting properties of lacquers
- **Installation notes**
To guarantee an optimum on operating reliability the extruded semi-conductive layer is spliced with the insulation for long duration. For this reason we recommend a peeling tool for installation.

Note

- AWG sizes are approximate equivalent values. The actual cross-section is in mm².
- For laying in earth: For ground thermal resistivity of 1 K·m/W, laying depth 0,7 m, ground temperature 20°C, EVU load grade 0,7.
- For laying in air: Air temperature 30°C, EVU load grade 1,0.
- Conversion factors for laying in earth especially for laying in bundle form and other requirements are noted in DIN VDE 0298 part 2 and 0276 part 1000.
- Conversion factors for laying in air
Air temperature/Conversion factor
15°C/1,12; 20°C/1,08; 25°C/1,04; 30°C/1,0;
35°C/0,96; 35°C/0,96; 40°C/0,91; 45°C/0,87;
50°C/0,82;

3 x 300 rm/25	590	648	0.0601	0.495	0.0803	0.274

Application

Suitable for installation in indoors and in cable ducts, outdoors as well as for laying on racks for industrial and switching systems and power plants. Limited use when buried in the earth if the PVC outer jacket could be damaged by high mechanical stress. The inner conducting layer between the conductor and the XLPE insulation and the firmly bonded outer conducting layer on the XLPE insulation assures a construction free of partial discharges with high operational reliability.

Notes

Changes to specifications

© HELUKABEL® GmbH Hemmingen, Germany

Specifications subject to change without notice. All illustrations, symbols, markings, numbering, etc. on the outer jacket are therefore to be considered as provisional. Differences in colour between photos and delivered goods cannot be prevented. All rights for reprinting or reproduction of text and illustrations, in whole or in part, reserved. The transfer of copyright principally requires the written permission of HELUKABEL® GmbH.

Length markings

The length marking, which cannot be officially verified, is intended merely as an aid (e.g. as a measuring guide or for the purpose of determining how much material is left on the drum). The actual cable length may deviate from that indicated by the length marking by up to 1%. No legal liability can be assumed for incomplete or patchy length markings, or if the actual cable length deviates from that indicated by the length marking. The only means of determining the actual cable length is to use calibrated measuring equipment.

Safety note

The products described here are produced in accordance with national or international standards as well as company standards; application safety is observed in accordance with the relevant safety directives, standards and legal requirements. This notwithstanding, the products are subject to the specifications of the relevant DIN VDE requirements. However, assembly and handling may only be undertaken by electrical specialists.

Our general terms and conditions of delivery and payment apply; available at www.helukabel.de.

Between panel and inverter - connecting method from a single source. Whether you need products for solar cabling on open land...

Achieving success through quality and innovation

ISO 9000ff is used as the basis for quality management processes carried out at HELUKABEL®. Product certificates issued by accredited institutions also make supplier evaluation easier from your perspective.

Our continuous quality improvement process enables us not only to maintain a consistently high standard of quality, but also ensures ongoing product development and innovations.

Our commitment to protecting the environment can be seen in our first-rate environmental management systems

We have expanded our SOLARFLEX®-X PV1-F product portfolio up to 240 mm². New TÜV- and VDE certificates for SOLARFLEX®-X PV1-F 2,5 mm² to 240 mm² are in progress and will be issued shortly.
