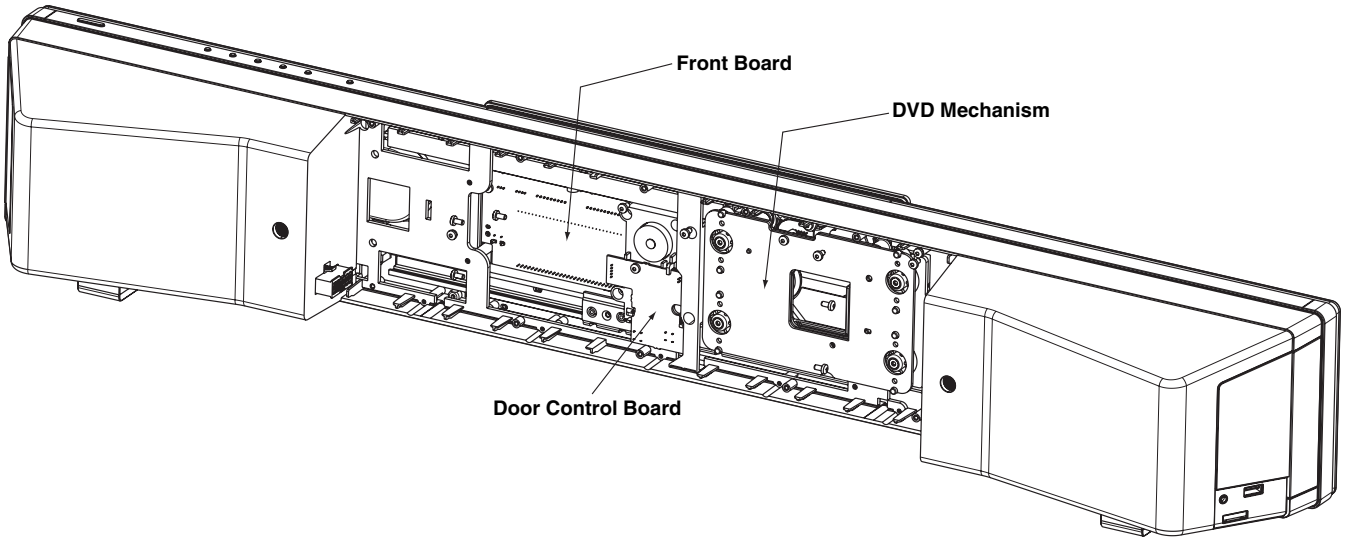
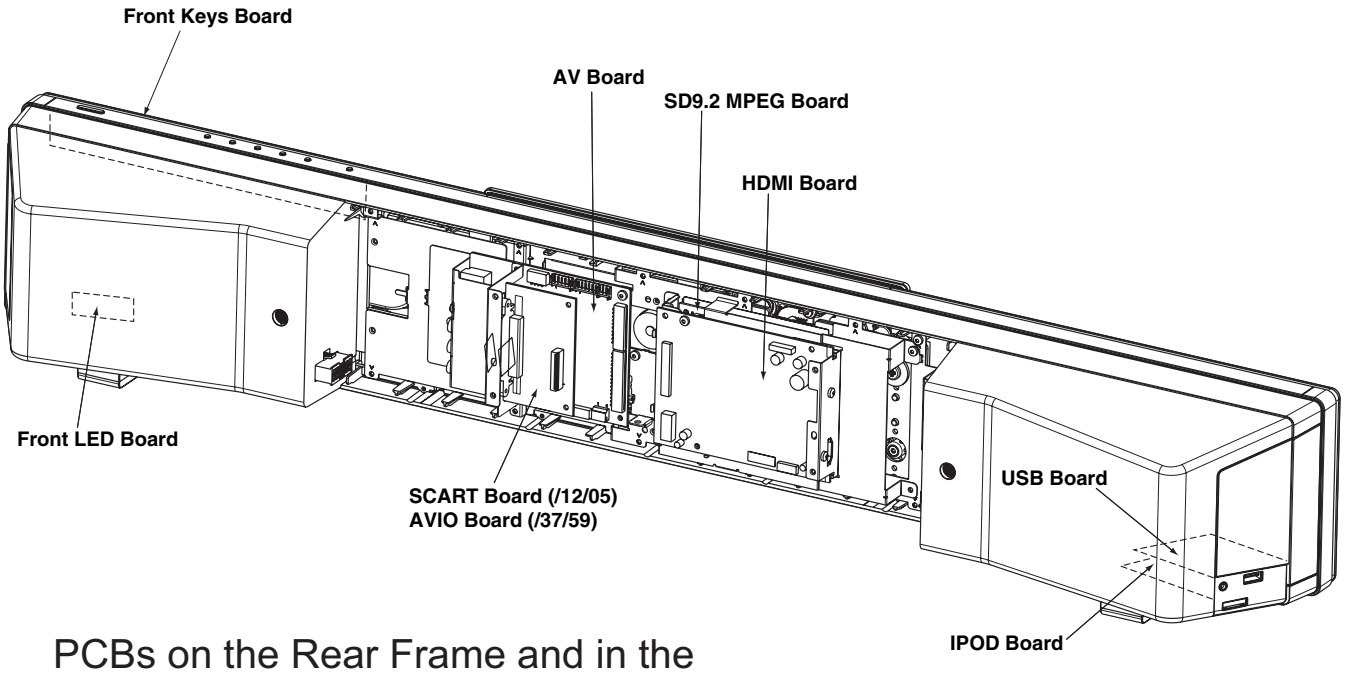
LOCATION OF PC BOARDS

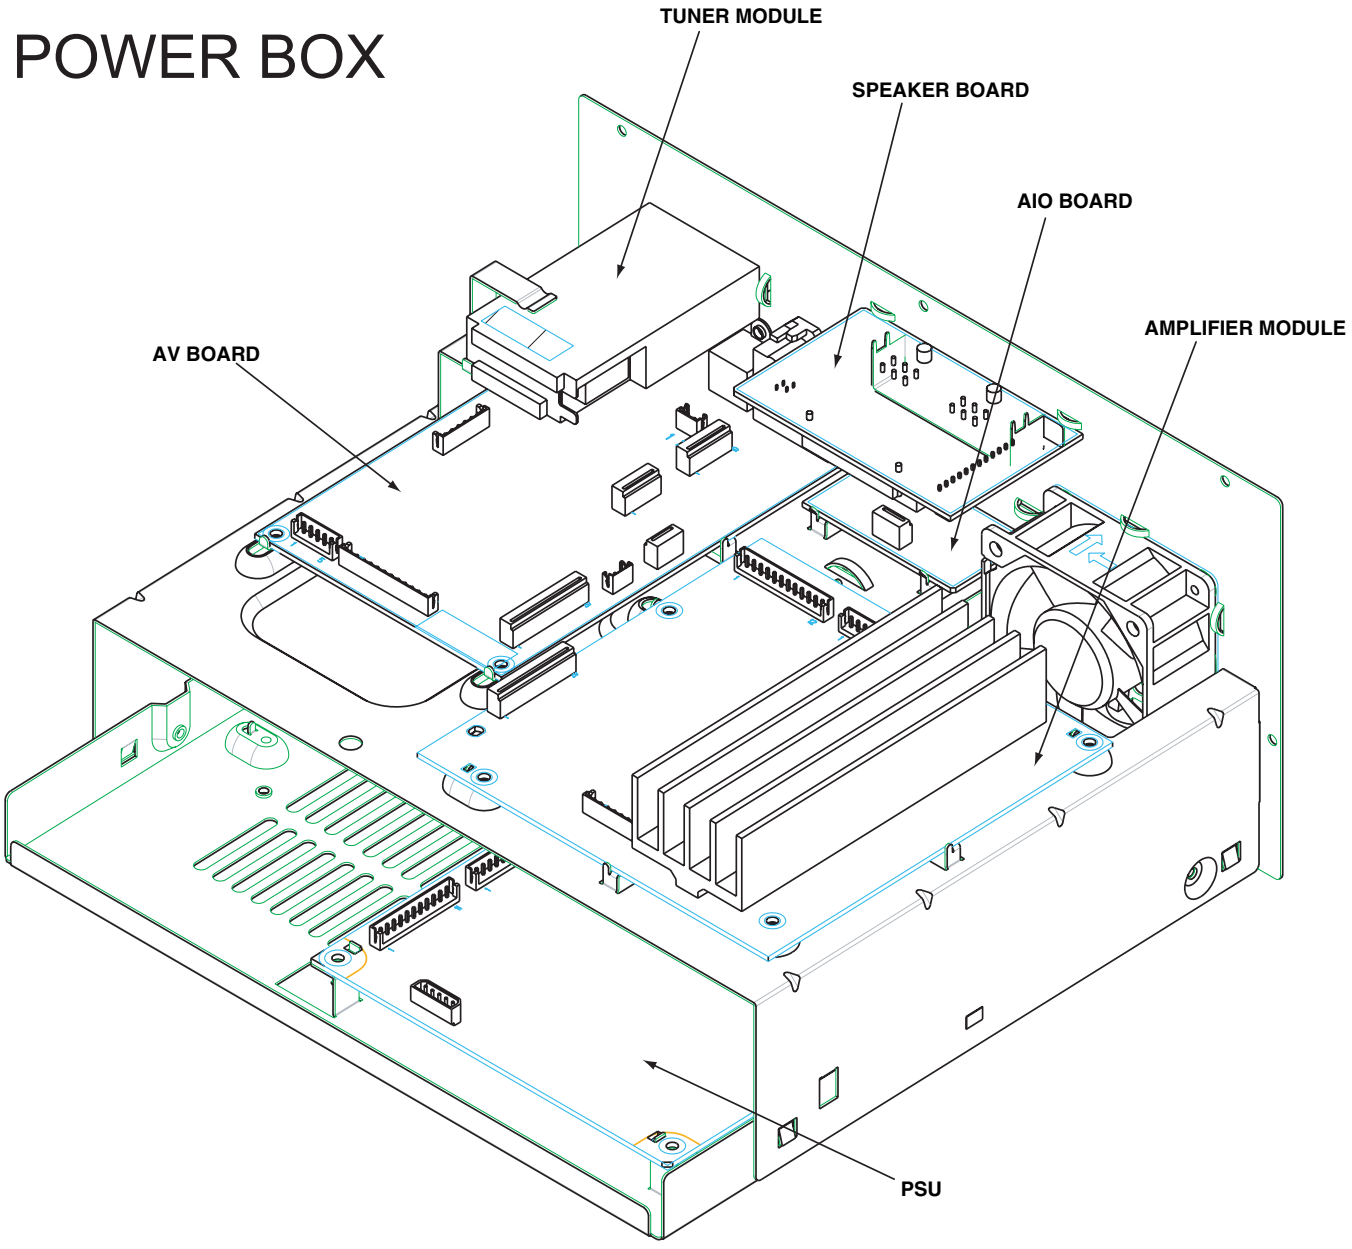


PCBs on the lower level



PCBs on the Rear Frame and in the speaker cabinet

POWER BOX



VERSION VARIATIONS:

	HTS8100/05/12	HTS8100/37	HTS8100/59
Video (Yellow, Cinch)	-	x	x
SCART (CVBS/RGB)	x	-	-
TV AUDIO IN (TV 2)	x	-	-
AUDIO IN (LEFT/RIGHT)	-	x	x
110-127V~220~240V VOLTAGE SELECTOR switch (Power Box)	-	-	x

1. Specifications

1.1 General:

Power Supply Rating	:	220-240V; 50-60 Hz (/05/12)
	:	120V; 60 Hz (/37)
	:	110-127V/220-240V ~50-60Hz switchable (/59)
Power consumption	:	120W
Low Standby Power:	:	< 0.6W
Dimension main unit	:	935 x 146 x 136(mm) (w x h x d)

1.2 Tuner

FM

Tuning range	:	87.5-108MHz
Grid	:	50kHz(/05/12 /59) 100kHz(/37)
IF frequency	:	10.7MHz ± 25kHz
Aerial input	:	75Ω coaxial
Sensitivity at 26dB S/N	:	< 7µV
Selectivity at 59/300kHz bandwidth	:	> 25dB
IF rejection	:	> 60dB
Image rejection	:	> 25dB
Distortion at RF=1mV, dev. 75kHz	:	< 3%
-3dB Limiting point	:	8µV
Crosstalk at RF=1mV, dev. 67.5kHz	:	> 28dB

1.3 AMPLIFIER:

L/R output power	:	1 x 70W min; 75W typical
Centre	:	1 x 95W min; 100W typical
Surround	:	1 x 70W min; 75W typical
Subwoofer	:	1 x 95W min; 100W typical
Frequency response ±3dB	:	150Hz-20kHz
Hum (Volume Minimum)	:	200nW
Residual noise (Volume Minimum)	:	40nW
Input sensitivity		
Aux In	:	1V ± 3dB at 39kΩ
Scart In (TV in):	:	500mV ± 3dB at 39kΩ
MP3 input sensitinity	:	250mV ± 3dB at 39kΩ

1.4 COMPACT DISC/VCD/DVD:

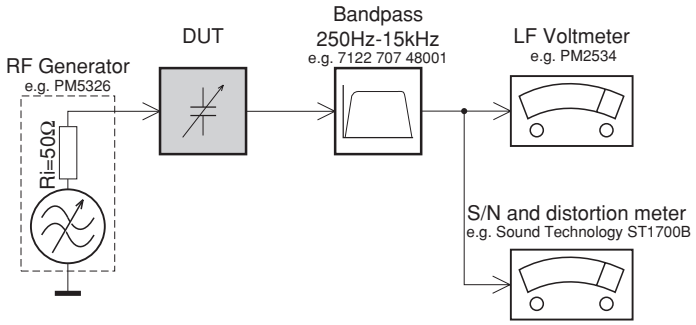
Video Decoding	:	MPEG-1/MPEG-2/ DivX 3/4/5/6, Ultra
Video DAC	:	12 Bits
Signal System	:	PAL / NTSC
Video Format	:	4:3 / 16:9
CVBS(SCART) Out [1)]		
CVBS level	:	1.0 ± 0.1V $_{p-p}$
Luminance S/N	:	>= 55dB
RGB/YUV Out [1)]		
Amplitude	:	0.7 ± 0.1V$_{p-p}$
S/N	:	>= 60dB

[1)] Output terminals to be terminated with 75Ω

2. Measurements Setup, Service Aid & Lead Free Requirements

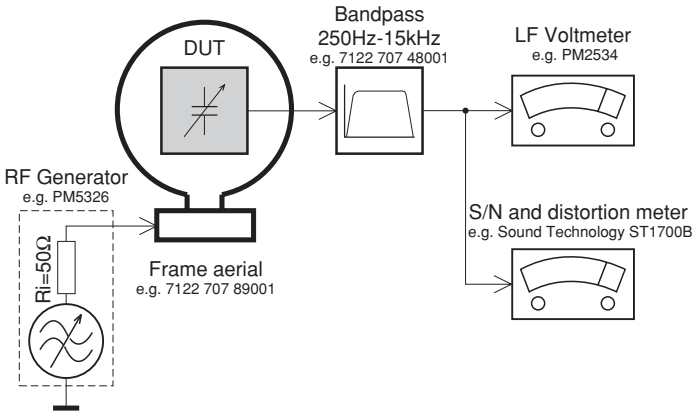
MEASUREMENT SETUP

Tuner FM



Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilottone (19kHz, 38kHz).

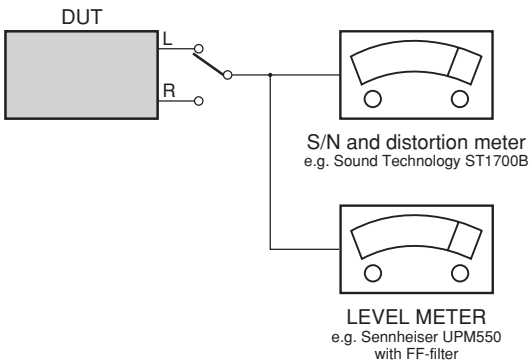
Tuner AM (MW,LW)



To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday´s cage.
Use a bandpass filter (or at least a high pass filter with 250Hz) to eliminate hum (50Hz, 100Hz).

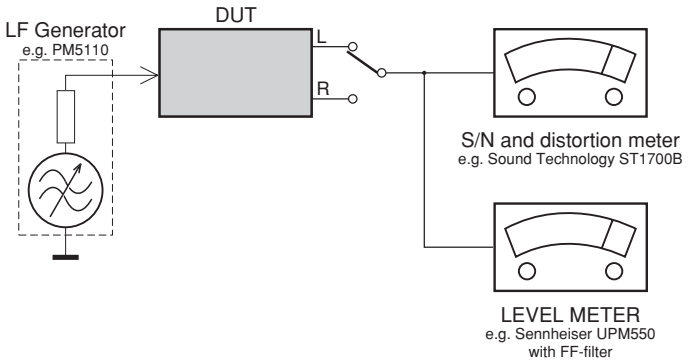
CD

Use Audio Signal Disc SBC429 4822 397 30184
(replaces test disc 3)



Recorder

Use Universal Test Cassette **CrO2** SBC419 4822 397 30069
or Universal Test Cassette **Fe** SBC420 4822 397 30071



SERVICE AIDS

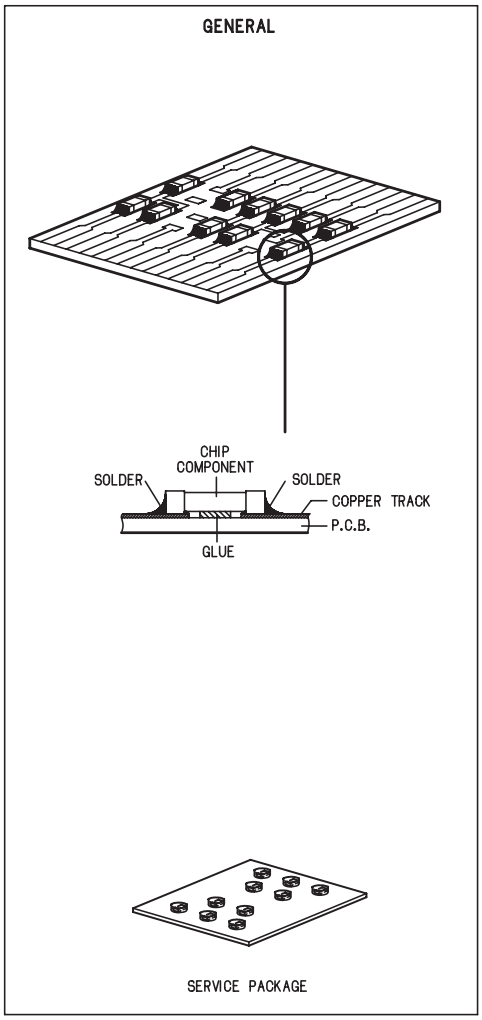
Service Tools:

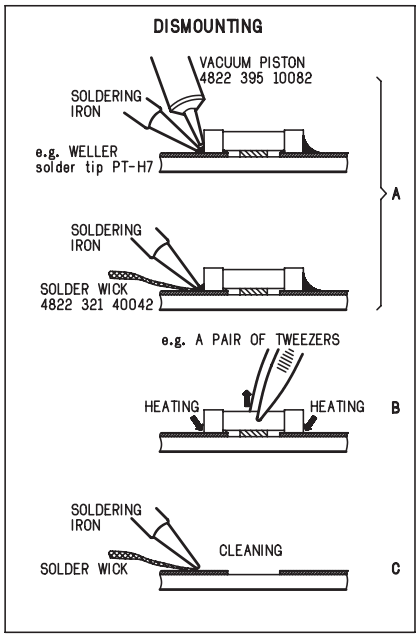
Universal Torx driver holder 4822 395 91019
Torx bit T10 150mm 4822 395 50456
Torx driver set T6 - T20 ..... 4822 395 50145
Torx driver T10 extended 4822 395 50423

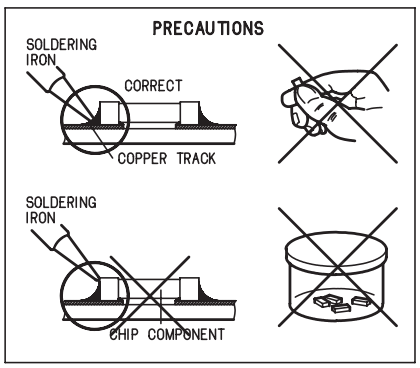
Compact Disc:

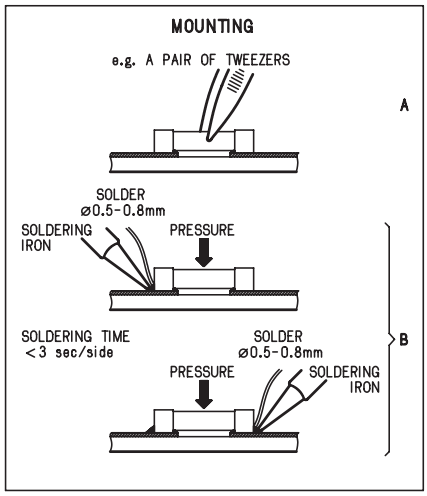
SBC426/426A Test disc 5 + 5A 4822 397 30096
SBC442 Audio Burn-in Test disc 1kHz 4822 397 30155
SBC429 Audio Signals disc 4822 397 30184
Dolby Pro-logic Test Disc 4822 395 10216

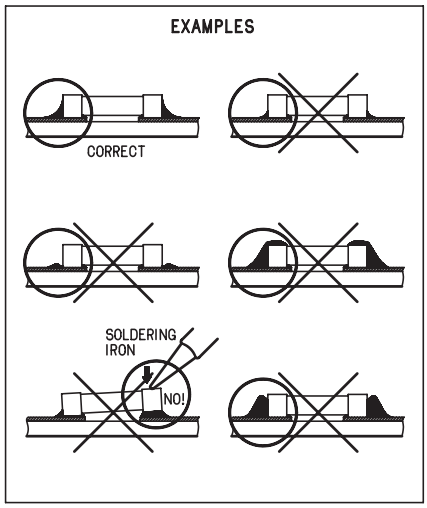
HANDLING CHIP COMPONENTS











ESD

(GB) WARNING

All ICs and many other semi-conductors are susceptible to electrostatic discharges (ESD). Careless handling during repair can reduce life drastically.
When repairing, make sure that you are connected with the same potential as the mass of the set via a wrist wrap with resistance. Keep components and tools also at this potential.

(NL) WAARSCHUWING

Alle IC's en vele andere halfgeleiders zijn gevoelig voor electrostatische ontladingen (ESD). Onzorgvuldig behandelen tijdens reparatie kan de levensduur drastisch doen verminderen. Zorg ervoor dat u tijdens reparatie via een polsband met weerstand verbonden bent met hetzelfde potentiaal als de massa van het apparaat.
Houd componenten en hulpmiddelen ook op ditzelfde potentiaal.

(F) ATTENTION

Tous les IC et beaucoup d'autres semi-conducteurs sont sensibles aux décharges statiques (ESD).
Leur longévité pourrait être considérablement écourtée par le fait qu'aucune précaution n'est prise à leur manipulation.
Lors de réparations, s'assurer de bien être relié au même potentiel que la masse de l'appareil et enfiler le bracelet serti d'une résistance de sécurité.
Veiller à ce que les composants ainsi que les outils que l'on utilise soient également à ce potentiel.

(D) WARNUNG

Alle ICs und viele andere Halbleiter sind empfindlich gegenüber elektrostatischen Entladungen (ESD).
Unsorgfältige Behandlung im Reparaturfall kan die Lebensdauer drastisch reduzieren.
Veranlassen Sie, dass Sie im Reparaturfall über ein Pulsarmband mit Widerstand verbunden sind mit dem gleichen Potential wie die Masse des Gerätes.
Bauteile und Hilfsmittel auch auf dieses gleiche Potential halten.

(I) AVVERTIMENTO

Tutti IC e parecchi semi-conduttori sono sensibili alle scariche statiche (ESD).
La loro longevità potrebbe essere fortemente ridatta in caso di non osservazione della più grande cauzione alla loro manipolazione.
Durante le riparazioni occorre quindi essere collegato allo stesso potenziale che quello della massa dell'apparecchio tramite un braccialetto a resistenza.
Assicurarsi che i componenti e anche gli utensili con quali si lavora siano anche a questo potenziale.

(GB) ESD PROTECTION EQUIPMENT:

Complete Kit ESD3 (small tablemat, wristband, connection box, extention cable and earth cable) 4822 310 10671
Wristband tester 4822 344 13999

(GB)

Safety regulations require that the set be restored to its original condition and that parts which are identical with those specified, be used

Safety components are marked by the symbol ⚠ .

(NL)

Veiligheidsbepalingen vereisen, dat het apparaat bij reparatie in zijn oorspronkelijke toestand wordt teruggebracht en dat onderdelen, identiek aan de gespecificeerde, worden toegepast.

De Veiligheidsonderdelen zijn aangeduid met het symbool ⚠

(F)

Les normes de sécurité exigent que l'appareil soit remis à l'état d'origine et que soient utiliséés les piéces de rechange identiques à celles spécifiées.

Less composants de sécurité sont marqués ⚠

(D)

Bei jeder Reparatur sind die geltenden Sicherheitsvorschriften zu beachten. Der Original zustand des Geräts darf nicht verändert werden; für Reparaturen sind Original-Ersatzteile zu verwenden.

Sicherheitsbauteile sind durch das Symbol ⚠ markiert.

(I)

Le norme di sicurezza esigono che l'apparecchio venga rimesso nelle condizioni originali e che siano utilizzati i pezzi di ricambio identici a quelli specificati.

Componenty di sicurezza sono marcati con ⚠

(GB)

After servicing and before returning set to customer perform a leakage current measurement test from all exposed metal parts to earth ground to assure no shock hazard exist. The leakage current must not exceed 0.5mA.

CLASS 1
LASER PRODUCT

(GB) Warning !

Invisible laser radiation when open.
Avoid direct exposure to beam.

(S) Varning !

Osynlig laserstrålning när apparaten är öppnad och spärren är urkopplad. Betrakta ej strålen.

(SF) Varoitus !

Avatussa laitteessa ja suojalukituksen ohitettaessa olet alttiina näkymättömälle laserisäteilylle. Älä katso säteeseen!

(DK) Advarse !

Usynlig laserstråling ved åbning når sikkerhedsafbrydere er ude af funktion. Undgå udsaettelse for stråling.

(F)

"Pour votre sécurité, ces documents doivent être utilisés par des spécialistes agréés, seuls habilités à réparer votre appareil en panne".

2.1 Lead Free Requirements

Pb(Lead) Free Solder

When soldering , be sure to use the pb free solder.

INDENTIFICATION:

Regardless of special logo (not always indicated)

one must treat all sets from **1 Jan 2005** onwards, according next rules:

Important note: In fact also products of year 2004 must be treated in this way as long as you avoid mixing solder-alloys (leaded/ lead-free). So best to always use SAC305 and the higher temperatures belong to this.

Due to lead-free technology some rules have to be respected by the workshop during a repair:

- Use only lead-free solder alloy Philips SAC305 with order code 0622 149 00106. If lead-free solder-paste is required, please contact the manufacturer of your solder-equipment. In general use of solder-paste within workshops should be avoided because paste is not easy to store and to handle.
- Use only adequate solder tools applicable for lead-free solder alloy. The solder tool must be able
  - To reach at least a solder-temperature of 400°C,
  - To stabilize the adjusted temperature at the solder-tip
  - To exchange solder-tips for different applications.
- Adjust your solder tool so that a temperature around 360°C – 380°C is reached and stabilized at the solder joint. Heating-time of the solder-joint should not exceed ~ 4 sec. Avoid temperatures above 400°C otherwise wear-out of tips will rise drastically and flux-fluid will be destroyed. To avoid wear-out of tips switch off un-used equipment, or reduce heat.
- Mix of lead-free solder alloy / parts with leaded solder alloy / parts is possible but PHILIPS recommends strongly to avoid mixed solder alloy types (leaded and lead-free).
  If one cannot avoid or does not know whether product is lead-free, clean carefully the solder-joint from old solder alloy and re-solder with new solder alloy (SAC305).
- Use only original spare-parts listed in the Service-Manuals. Not listed standard-material (commodities) has to be purchased at external companies.
- Special information for BGA-ICs:
  - always use the 12nc-recognizable soldering temperature profile of the specific BGA (for de-soldering always use the lead-free temperature profile, in case of doubt)
  - lead free BGA-ICs will be delivered in so-called 'dry-packaging' (sealed pack including a silica gel pack) to protect the IC against moisture. After opening, dependent of MSL-level seen on indicator-label in the bag, the BGA-IC possibly still has to be baked dry. (MSL=Moisture Sensitivity Level). This will be communicated via AYS-website.
  Do not re-use BGAs at all.
- For sets produced before 1.1.2005 (except products of 2004), containing leaded solder-alloy and components, all needed spare-parts will be available till the end of the service-period. For repair of such sets nothing changes.
- On our website **www.atyourservice.ce.Philips.com** you find more information to:
  - BGA-de-/soldering (+ baking instructions)
  - Heating-profiles of BGAs and other ICs used in Philips-sets

  You will find this and more technical information within the "magazine", chapter "workshop news".

For additional questions please contact your local repair-helpdesk.

2.2 Service Hints

2.2.1 Service Hints for Replacing Defective Loader

CAUTION

CHARGED CAPACITORS ON THE SERVO BOARD MAY DAMAGE THE DRIVE ELECTRONICS WHEN CONNECTING A NEW DRIVE.THAT'S WHY, BESIDES THE SAFETY MEASURES LIKE

- **SWITCH OFF POWER SUPPLY**
- **ESD PROTECTION**

ADDITIONAL ACTIONS MUST BE TAKEN BY THE REPAIR TECHNICIAN.

The following steps have to be done when replacing the defective loader :

1. Dismantling of the loader to access the ESD protection point if necessary.
2. **Solder the ESD protection point*.**
3. Disconnect flexfoil cable from the defective loader.
4. Put a paper clip on the flexfoil to short-circuit the contacts (fig.1)
5. Replace the defective loader with a new loader.
6. Remove paperclip from the flexfoil and connect it to the new loader.
7. Remove solder joint on the ESD protection point.

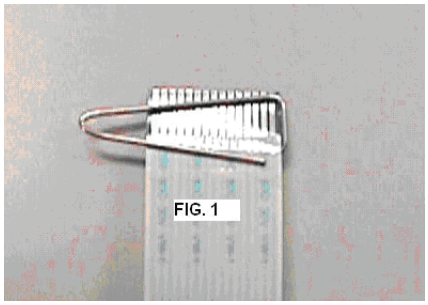


FIG. 1

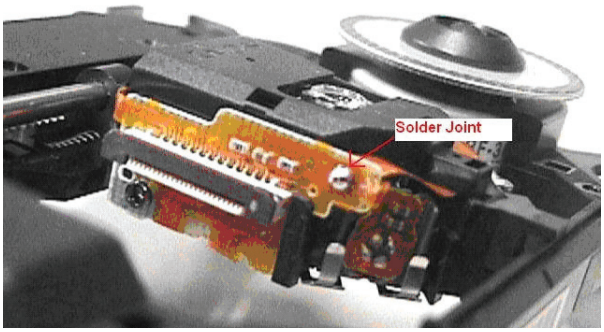
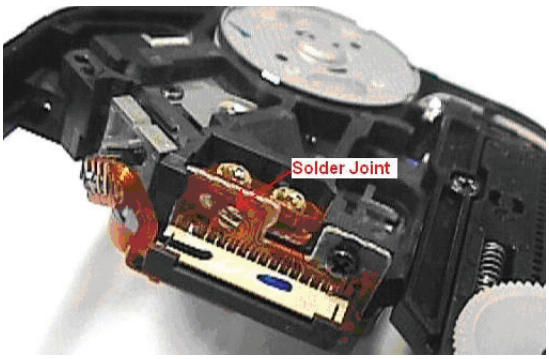
ATTENTION: The laser diode of this loader is protected against ESD by a solder joint which shortcircuits the laserdiode to ground. For proper functionality of the loader this solder joint must be remove **after** connection loader to the set.

Type 1



(ESD protection point is accessible from top of loader)

Type 2



(ESD protection point is accessible from bottom of the loader)

Only applicable for defective loader needed to be sent back to supplier for failure analysis and to support backcharging evidence.
This is also applicable for all partnership workshops.

2.2.2 Service Hints for Power Box Cable Dressing

The following procedures should be followed for Power Box Module assembly after being repaired.

1) For the 5 and 12 poles cables to Audio BD, paste a tape over them, ensuring it is firmly secured to the metal chassis.

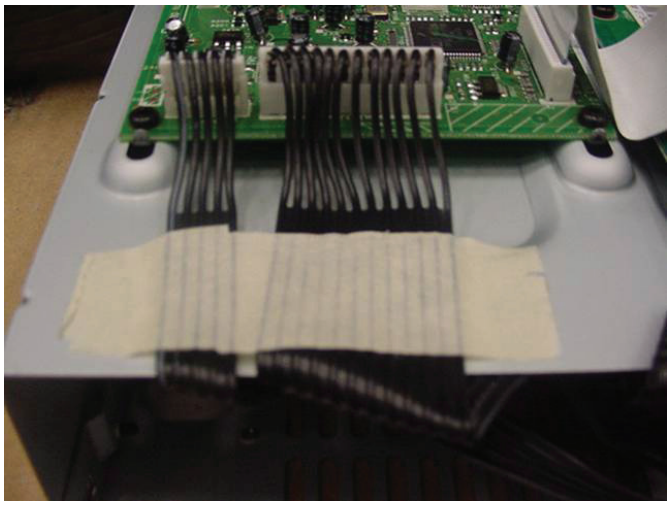


Figure 2-1

2) For the 8 pole cable between the PSU and TI amplifier, fold the cable as indicated, making it as close possible to metal chassis.

Figure 2-2

3) Fold as indicated underneath the metal chassis for both point 1) and 2). Note that the cables underneath should be laid as close possible to the metal chassis also.

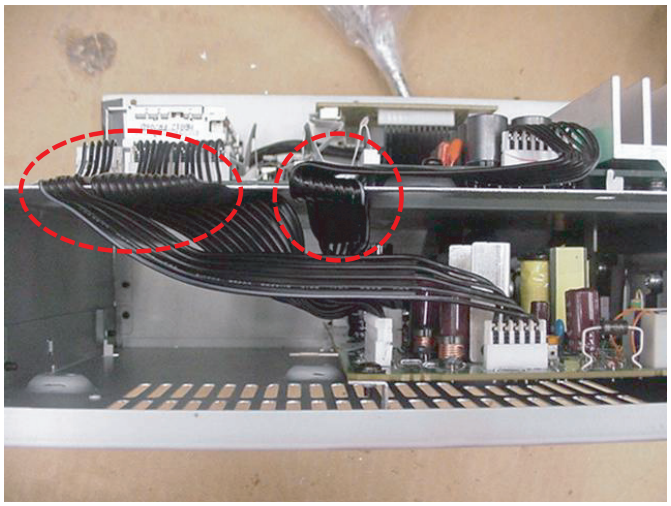

Figure 2-3

4) For the FFC cable between Audio BD and TI amplifier, fold as indicated, making it sure that the cable should be outside of both boards.

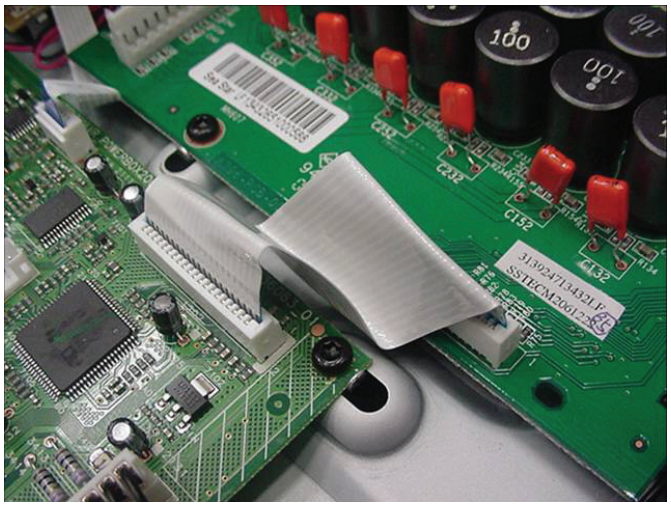

Figure 2-4

5) For the FFC cables from the Audio BD to Tuner/Speaker/ AIO BD, fold as indicated, hence, preventing them from touching the Audio BD itself.

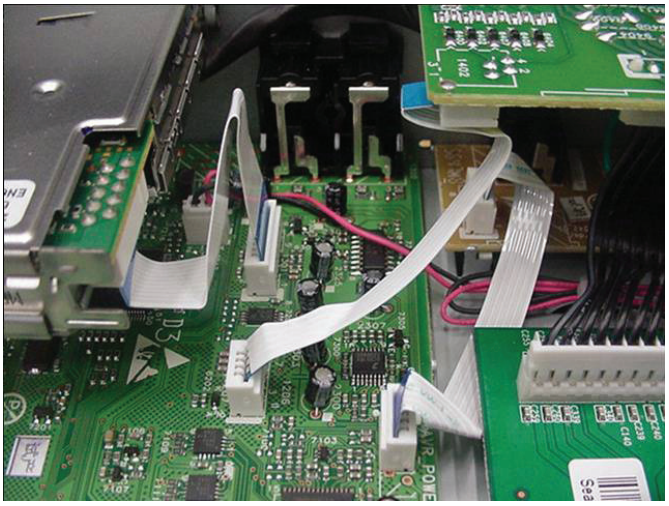

Figure 2-5

6) For the 9 pole cable linking from the Main Unit to the Power Box, tuck it underneath the tuner and above the 4 pole cinch connector and also making it as close as possible to the back metal plate.

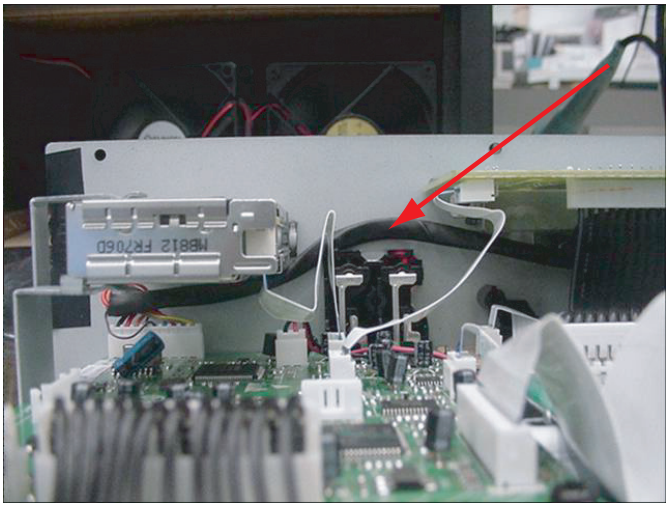

Figure 2-6

7) For reference to point 6).

Figure 2-7

8) The cables should be tied as indicated.

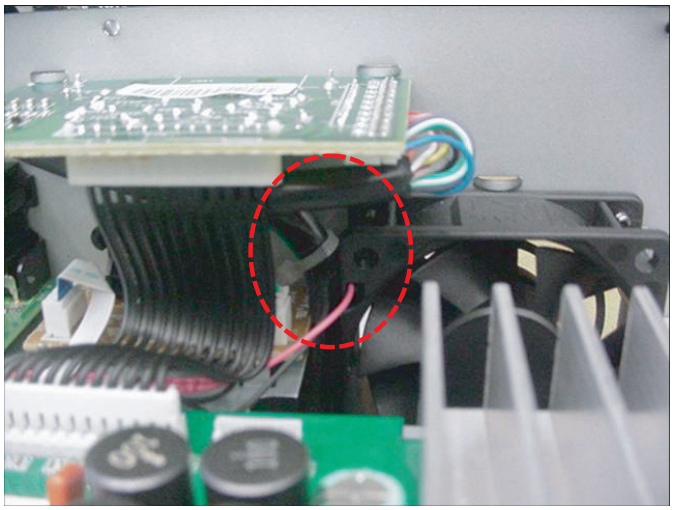

Figure 2-8

9) With reference to point 8), all cables should refrain from touching or even getting near to the PSU.

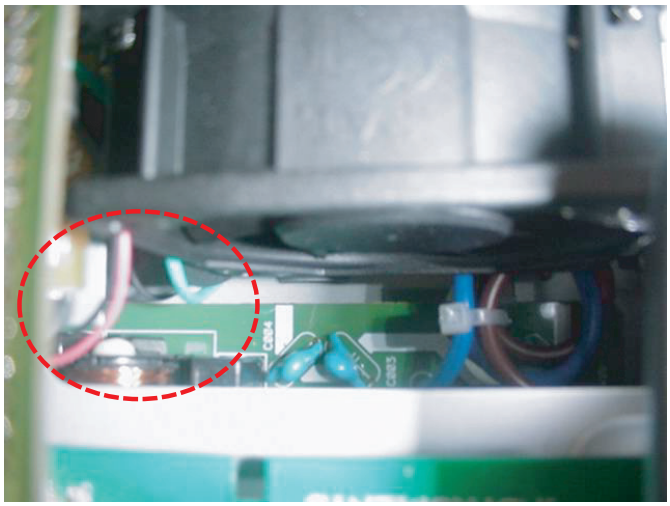

Figure 2-9

10) Overview

Figure 2-10

11) Paste a tape over the subwoofer cable on the Tuner as indicated. Secondly, the cable should be outside of the Audio BD, along the edge of the metal chassis.

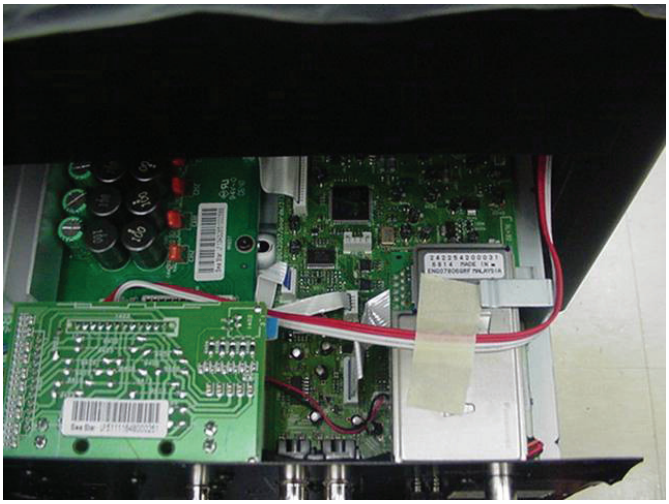

Figure 2-11

12) With reference to point 11).

Figure 2-12

13) With reference to point 11). Note that the cable should not be bent to the left across the Audio BD due to the excess cable when the unit is being push back inside the wooden Power Box.

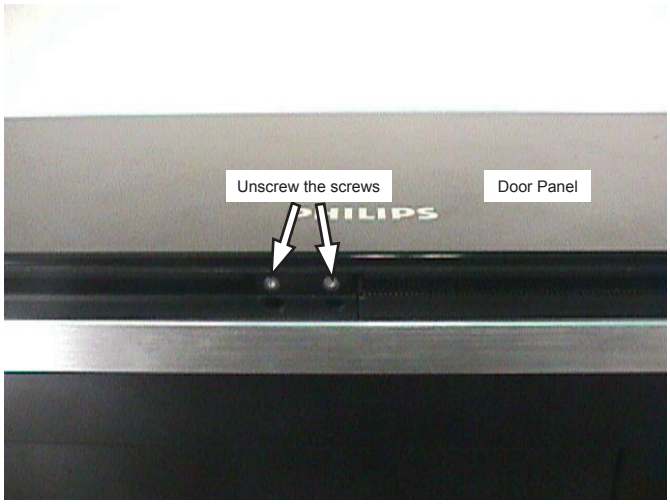
Figure 2-13

14) With reference to point 11).

Figure 2-14

2.2.3 Service Hints for Dismantling of Main Unit

Before dismantling the main unit, unscrew the screws and detach the door panel assembly (120+121) as shown in the figure. Make sure to keep the face of the set (the door panel 121) away from scratches while dismantling or servicing the set.



Detach Door Panel Assembly

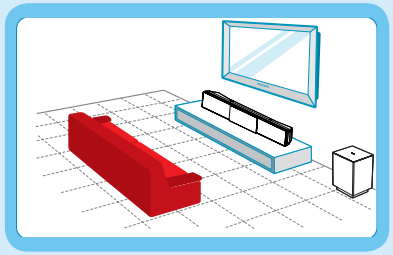
PHILIPS

1 Connect

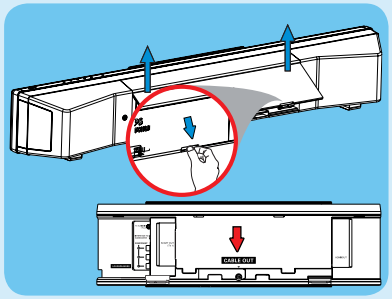
A Placement

Proper speakers system placement is important to ensure optimum sound performance.



1. Place the Sound Bar system at the normal listening ear-level, or at least above the knee-level. Face it straight ahead towards the listening area.
2. Place the subwoofer on the floor, at least one metre away from the TV.

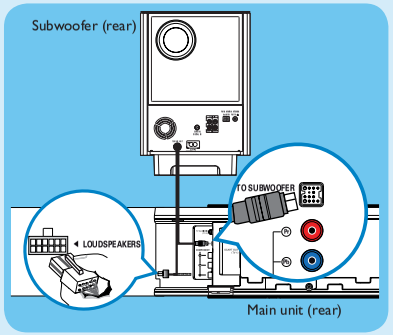
B Preparing for rear connections



1. Push up the catches to lift up the rear cover.
2. Connect the required cables and direct all the cables to the CABLE OUT point (see the following sections for details).

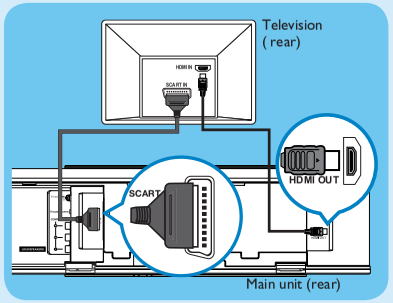
Note All the cables must be placed properly inside the rear panel in order for the rear cover to close.

C Connect the Sound Bar system and subwoofer



- Connect the TO MAIN UNIT cable from the subwoofer to the rear of the main unit. One end connect to TO SUBWOOFER socket and another end connect to LOUDSPEAKERS socket.

D Connect the main unit to TV



- Connect a scart cable (supplied) from the SCART OUT (TV1) socket on the main unit to the SCART IN socket on your TV.

  OR

- If your TV supports HDMI, connect the HDMI cable (not supplied) from the HDMI OUT to the HDMI IN socket on your TV.

Note It is important to connect the main unit directly to your TV.

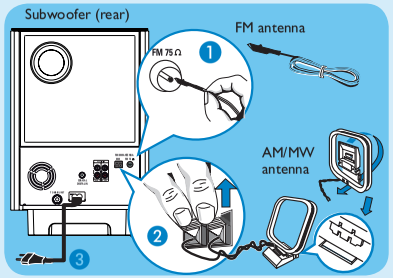
3.1. Directions For Use /05/12

The following except of the Quick Use Guide serves as an introduction to the set.
The Complete Direction for the Use can be downloaded in different languages from the internet site of Philips Customer care Center:
www.p4c.philips.com

2 Set up

E Connect the radio antennas

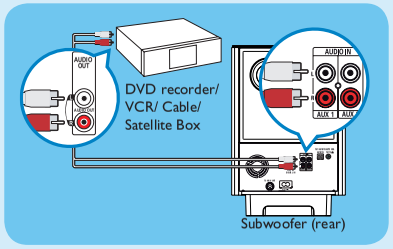
Keep the antennas away from the electronic devices to prevent unwanted interference.



1. Connect the FM antenna to the inner pin of the FM 75 Ω socket. For optimum reception, extend the wire and fix its end to the wall.
2. Unfold the AM/MW loop antenna and fix the claw into the slot. Push the tabs and insert the wires into the AM/MW sockets
3. Connect the power cable from subwoofer to the AC power outlet.

F Connect audio output from other device (optional)

Use a red and white audio cables (not supplied) to connect the AUDIO IN-AUX1 or AUX2 sockets on the subwoofer to the AUDIO OUT sockets on the connected device (for example, DVD recorder, VCR, Cable/Satellite Box).



Note Press **AUX** on the remote control to select 'AUX1' or 'AUX2' as the source you want to listen to.

A Finding the viewing channel

1. Press ⏻ (STANDBY ON) on the main unit to turn it on.
2. Turn on the TV. Use the TVs remote control to select the correct viewing channel.

Note To search for the correct viewing channel, press the Channel Down button on the TVs remote control repeatedly (or AV, SELECT, ⇥ button) until you see the Video In channel.

B Setting up the speakers

When you turn on this unit for the first time, the speaker setup message appears on the TV. Follow the on-screen instructions to complete the setup.

1. Press cursor right key on the remote control to access Sound Bar system setup.
2. When the { Orientation } screen appears, press cursor right key to continue.
3. Select a most suitable predefined setting according to your room environment and setup, press cursor right key to confirm and go to the next screen.

{ Room Acoustics }
Select the type of walls that surround your room. The default setting is 'Hard (concrete, wood)'.

{ Room Placement }
Select the Sound Bar system's placement position in your room. The default setting is 'Middle'.

{ Height }
Select the height at which the Sound Bar system is placed. The default setting is between 0.8~1.2 metres.

{ Distance }
Select the distance between the listening position and the Sound Bar system. The default setting is between 2~3 metres.

4. When the { Complete } screen appears, press cursor right key to exit.

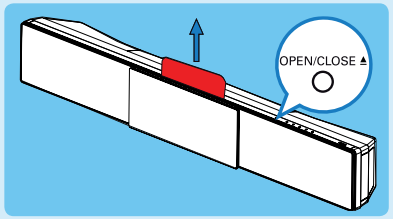
Note Refer to the accompanying user manual for other setup options.

3 Enjoy

Start disc playback

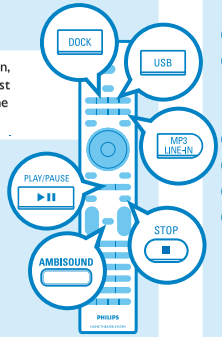
Before you start ...
Remove the door-lock tag on top of the disc compartment door.

1. Press ⏏ to open the disc compartment.



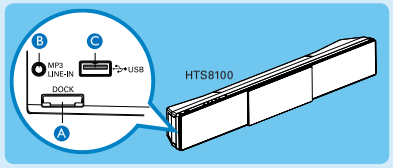
2. Place a disc with the disc label facing towards you.
3. Press ⏏ to close the disc compartment.
4. Playback starts automatically.
5. If the disc menu appears on the TV, use cursor keys to select an option in the menu and press **OK** to start playback.
- To enjoy the powerful surround sound from the speakers, press **AMBISOUND** on the remote control to turn on the multi-channel surround mode.
6. Press ■ to stop playback.

Note When you press ▶II button, playback resumes from where it last stopped. To start playback from the beginning, you have to press I◀◀.



Playback other supported devices

The connections to other devices are located at the left side of the main unit.



Philips GoGear/Apple iPod

1. Connect the Philips HTD7001 docking station (sold separately) to A.
2. Turn on your GoGear or iPod before dock it in the correct cradle.
3. Press **DOCK** to switch to 'DOCK' mode.
4. Press PLAY on your GoGear or iPod.

Other portable audio player

1. Use the supplied MP3 LINE-IN cable to connect the headphone output socket on your portable audio player to B.
2. Press PLAY on your portable audio player.
3. Press **MP3 LINE-IN** to listen to the playback.

USB device

1. Insert your USB device to C.
2. Press **USB** to switch to 'USB' mode.
3. Press ▶II to start playback.
4. To stop playback, press **DISC** to switch to 'DISC' mode. You can unplug your USB device now.

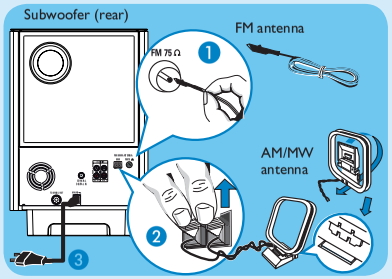
2 Set up

E Connect the radio antennas

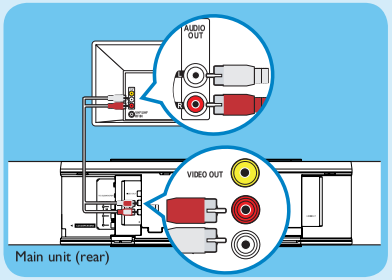
Keep the antennas away from the electronic devices to prevent unwanted interference.



1. Connect the FM antenna to the inner pin of the FM 75 Ω jack. For optimum reception, extend the wire and fix its end to the wall.
2. Unfold the AM/MW loop antenna and fix the claw into the slot. Push the tabs and insert the wires into the AM/MW jacks
3. Connect the power cable from subwoofer to the AC power outlet.

F Connect audio output from TV (optional)

To hear the TV audio through this home theater system, use the red and white audio cables (not supplied) to connect the AUDIO IN jacks on the main unit to the AUDIO OUT jacks on your TV.



Note Press **TV** on the remote control to get the sound output from the speakers system when watching the TV program.

A Finding the viewing channel

1. Press ⏻ (STANDBY ON) on the main unit to turn it on.
2. Turn on the TV. Use the TVs remote control to select the correct viewing channel.

Note To search for the correct viewing channel, press the Channel Down button on the TVs remote control repeatedly (or AV, SELECT, ⇥ button) until you see the Video In channel. If you are using a RF modulator, set the TV to channel 3 or 4.

B Setting up the speakers

When you turn on this unit for the first time, the speaker setup message appears on the TV. Follow the on-screen instructions to complete the setup.

1. Press cursor right key on the remote control to access Sound Bar system setup.
2. When the { Orientation } screen appears, press cursor right key to continue.
3. Select a most suitable predefined setting according to your room environment and setup, press cursor right key to confirm and go to the next screen.

4. Mechanical Instructions

Notes: The position numbers used in the instructions refer to the exploded view drawings in Chapter 8.
Follow the Service Hints in Chapter 2 for dismantling the Main Unit, replacing the defective DVD mechanism and the Power Box Cable Dressing.

4.1 Dismantling of the Main Unit

4.1.1 Dismantling of HDMI and AVIO (SCART) boards

1) Remove Door Cover 200-49 (Speaker Box Assembly Exploded View) and remove 10 screws to detach the Rear Cover 200-47 (Speaker Box Assembly Exploded View) as shown in Figure 1.

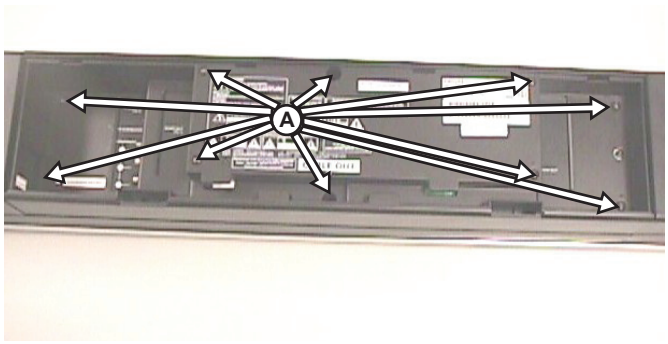

Figure 4-1

2) Remove 4 screws to detach HDMI board 1060 from the HDMI Bracket 134 as shown in figure 2.

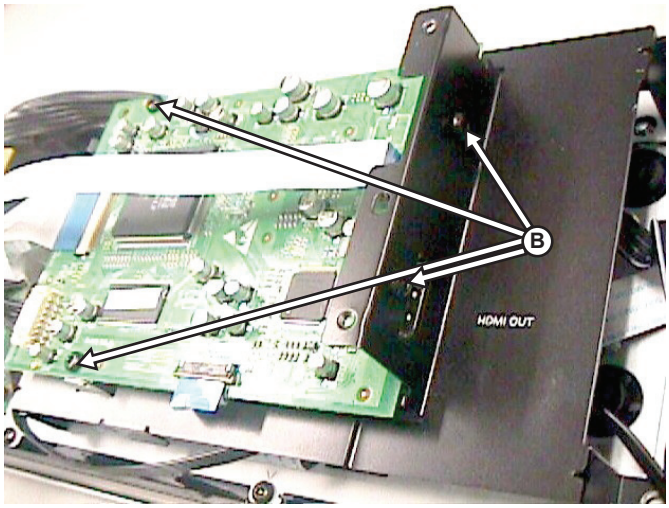

Figure 4-2

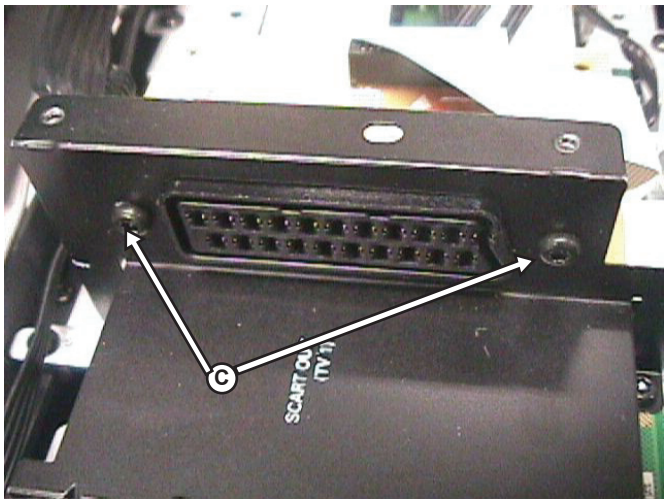
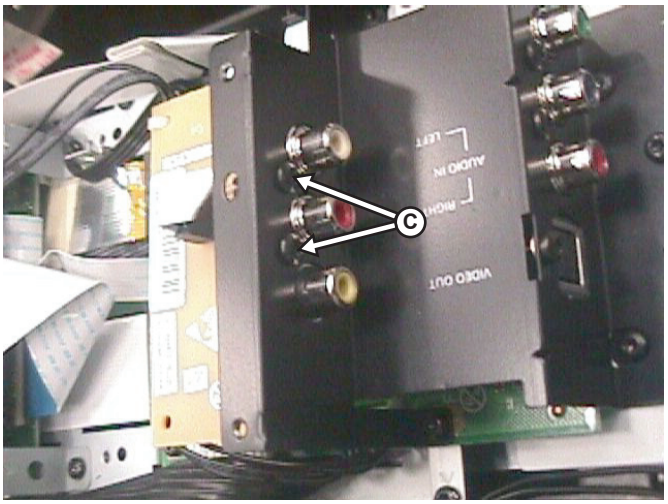
3) Remove 2 screws to detach the AVIO (SCART) board (1040 for /05/12 and 1030 for /37/59) from the AVIO (SCART) Bracket 135 as shown in figure 3.



AVIO (SCART) for /05/12
Figure 4-3-a



AVIO for /37/59
Figure 4-3-b

4.1.2 Dismantling of SD9.2 MPEG board and AV board

1) In order to dismantle the SD9.2 Mono Board1070, it is necessary to remove the Rear Cabinet and the HDMI assembly (1060 +134). The mounting screws for HDMI assembly (1060 + 134) are shown in figure 4. Remove 4 screws to detach the HDMI assembly (1060 + 134) from the rear frame 132.

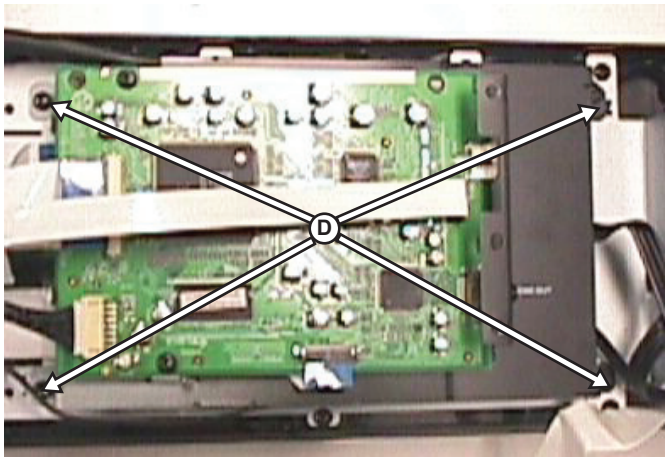


Figure 4-4

2) After removing the HDMI assembly (1060 + 134), remove 4 mounting screws to dismantle the SD9.2 Mono Board 1070 as shown in figure 5.

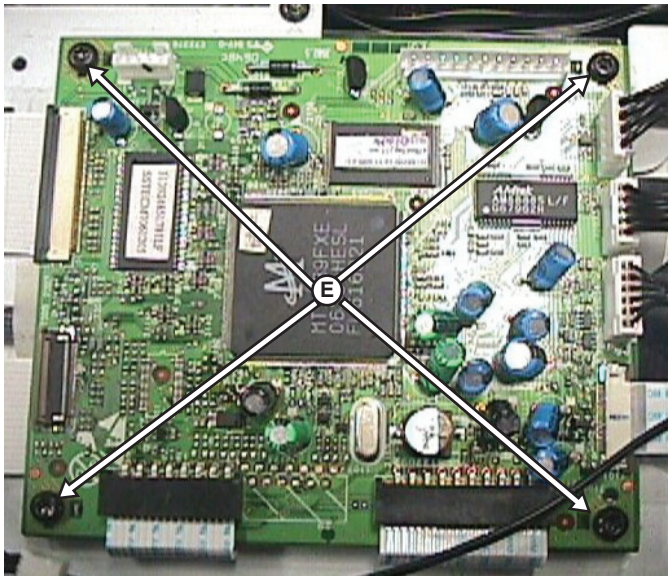

Figure 4-5

3) Remove 5 screws to detach the AVIO (SCART) and AV assembly (1040+135+1020 for /05/12, and 1030+135+1020 for /37/59) from the rear frame 132 as shown in figure 6.

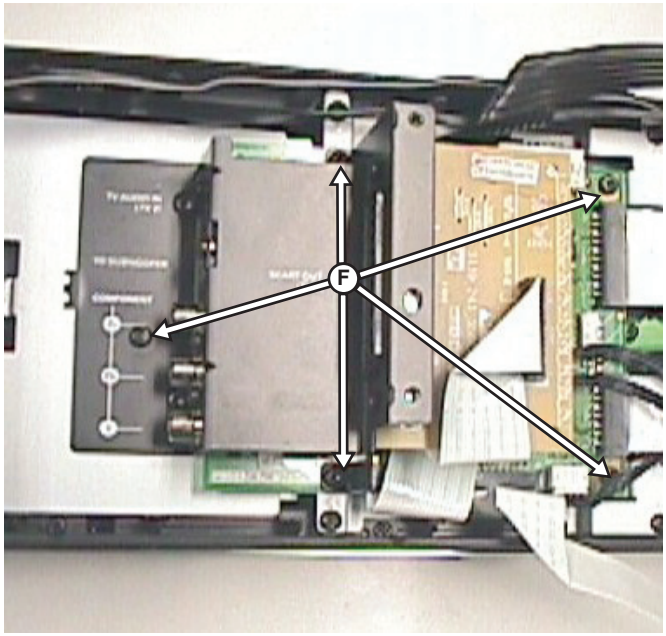

Figure 4-6

4) Then remove 3 more screws to detach the AV Board 1020 from the AVIO (SCART) and AV assembly (1040+135+1020 for /05/12 and 1030+135+1020 for /37/59) as shown in figure 7.

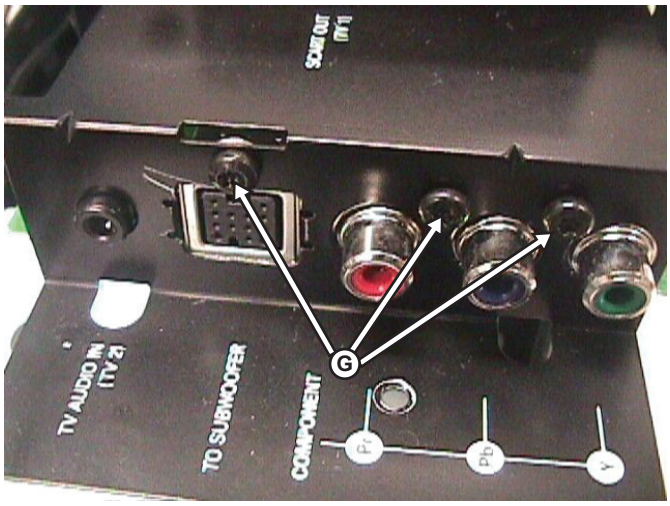

Figure 4-7

4.1.3 Dismantling of Door Board, Motor Assembly, DVD Mechanism, and Front Board

1) Remove the Rear Cover first (figure 1), remove the HDMI assembly (1060 + 134, figure 4), remove the SD9.2 Mono Board 1070 (figure 5), if it is necessary, and then remove the Rear Frame assembly (132+1040+135+1020 for /05/12, and 132+1030+135+1020 for /37/59) by removing 13 screws as shown in figure 8.

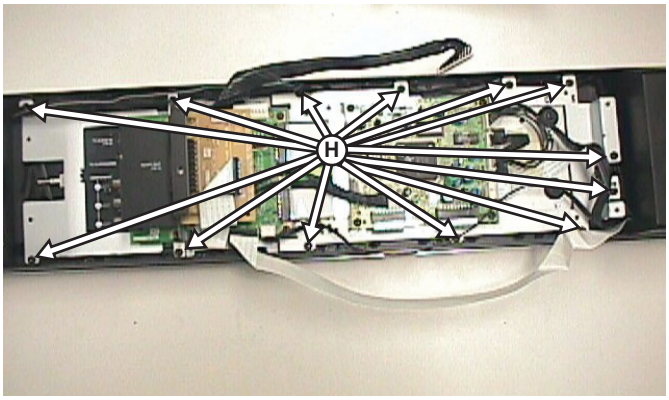

Figure 4-8

1) Remove 4 screws to dismantle the Door Board, Motor and Gear Box Assembly (115+116+117+118+119+1090 +1014). Remove1 screw to detach the Door Board 1014 from the Motor and Gear Box Assembly (115+116+117+1 18+119+1090). The mounting screws are shown in figure 9.

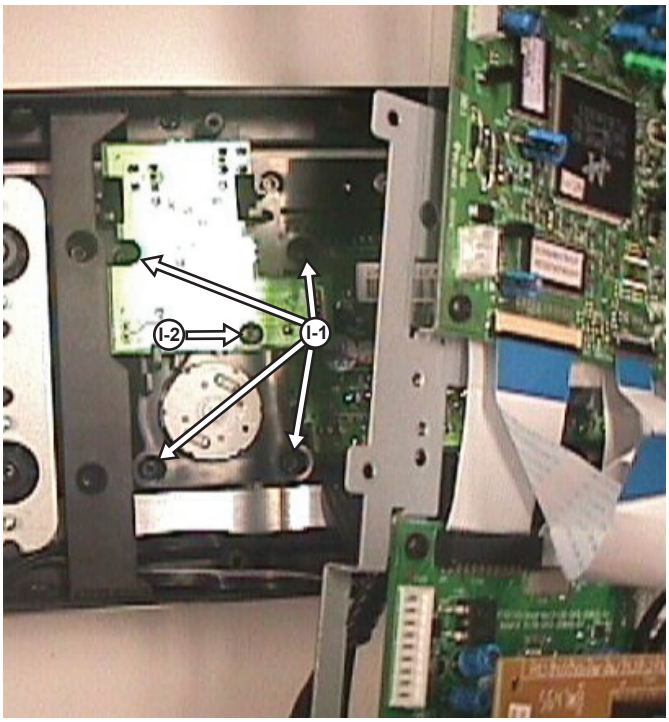

Figure 4-9

3) Remove 4 screws to dismount the DVD assembly (127+ 129 +1080) as shown in figure 10. Flip over the assembly to see the 4 screws that attach the DVD Mechanism 1080 to the Traverse Bracket 127 as shown in figure 11. Remove the screws and detach the DVD Mechanism from the Assembly (Refer to “Service Hints” in chapter 2 for replacing the DVD mechanism.)

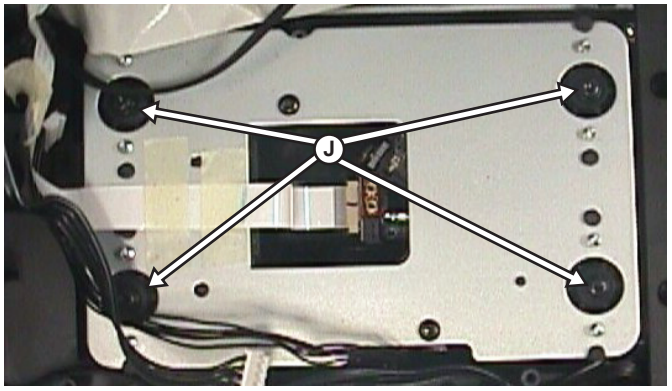

Figure 4-10

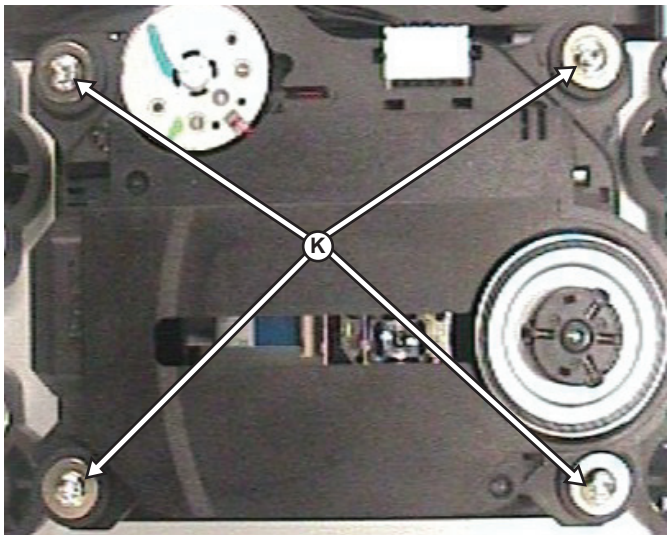

Figure 4-11

4) Remove 3 screws to dismount the Front Board as shown in figure 12.

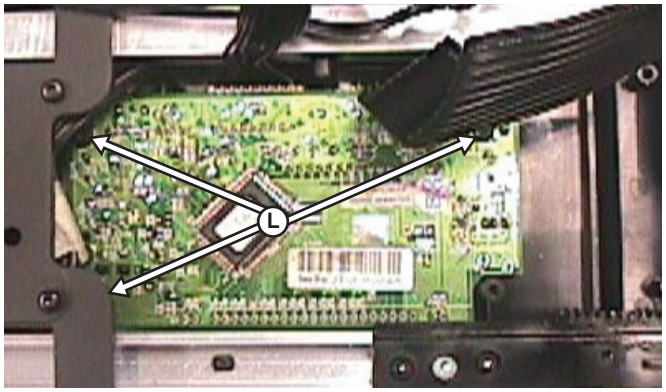

Figure 4-12

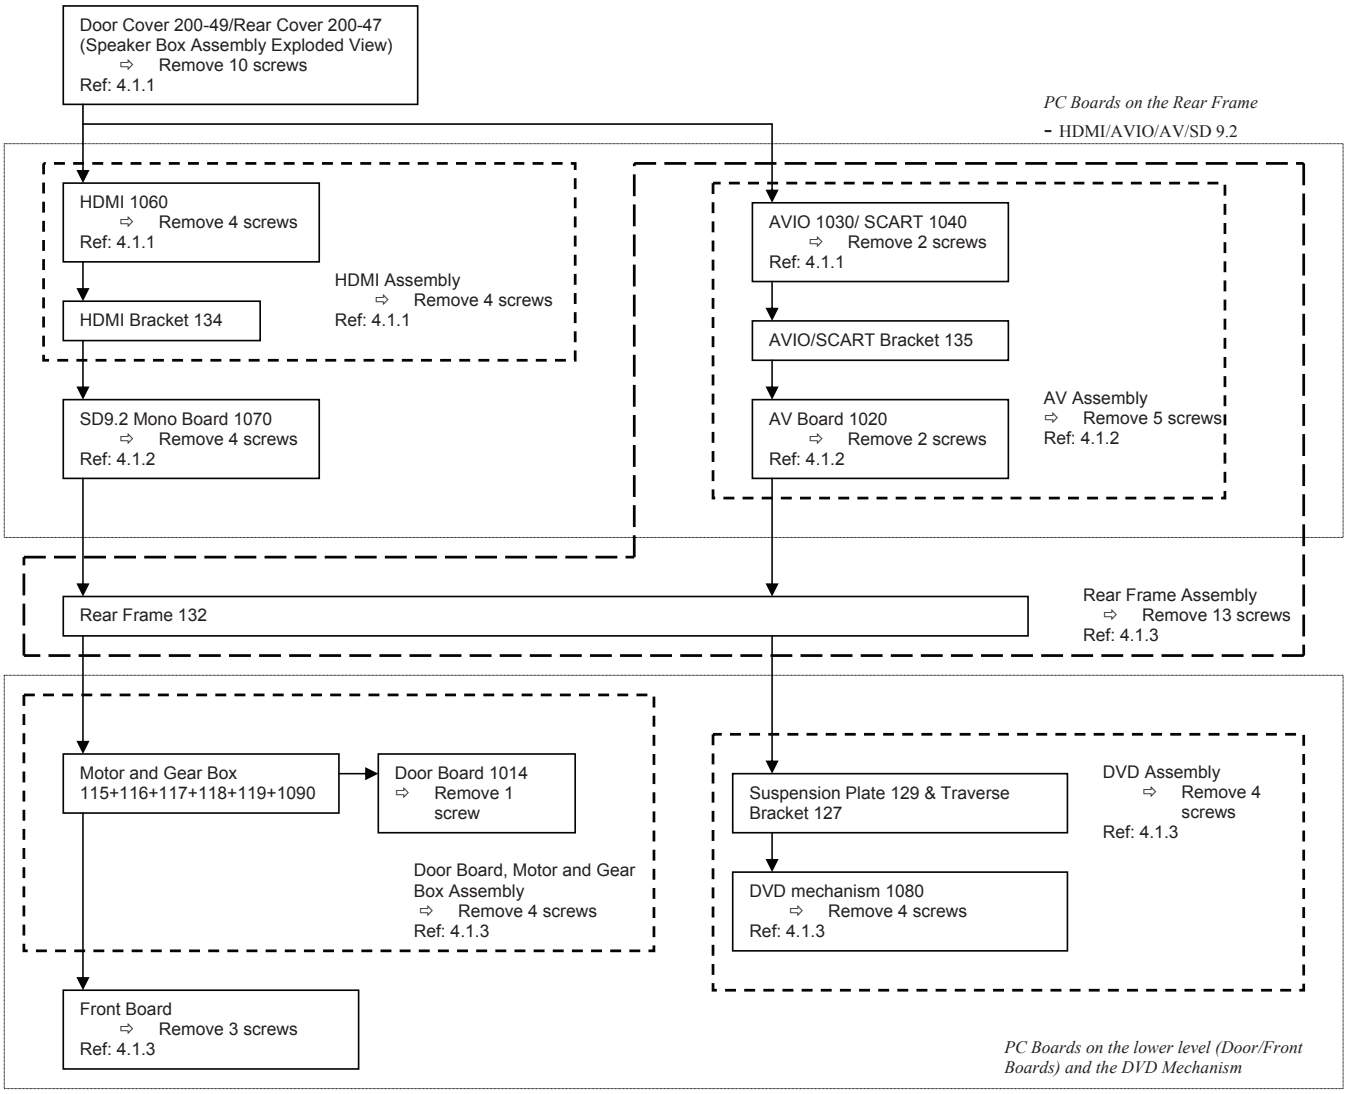
Summary of Dismantling Instructions (4.1.1 to 4.1.3)



4.1.4. Dismantling of USB Board and IPOD Board

1) In order to dismantle the USB Board 1013 and IPOD Board 1050, it is required to remove the iPOD Cover (Speaker Box Assembly Exploded View) by unscrewing the 8 screws as shown in figure 13.

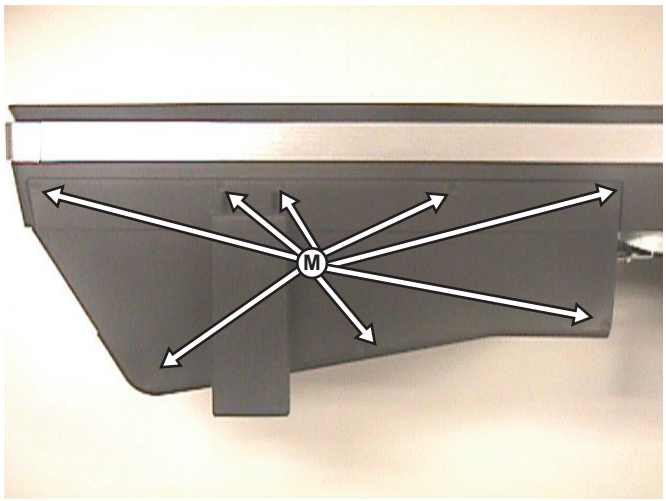


Figure 4-13

2) Remove 3 screws to dismantle the IPOD Board 1050 from the Bracket 140 as shown in figure 14.

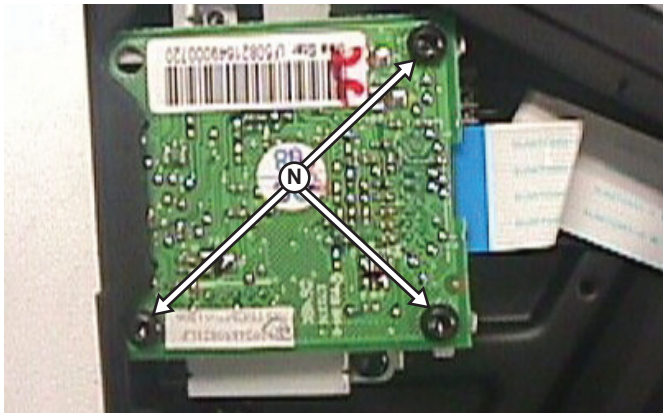

Figure 4-14

3) Remove 3 screws to detach the Bracket 140 together with USB Board 1013 as shown in figure 15.

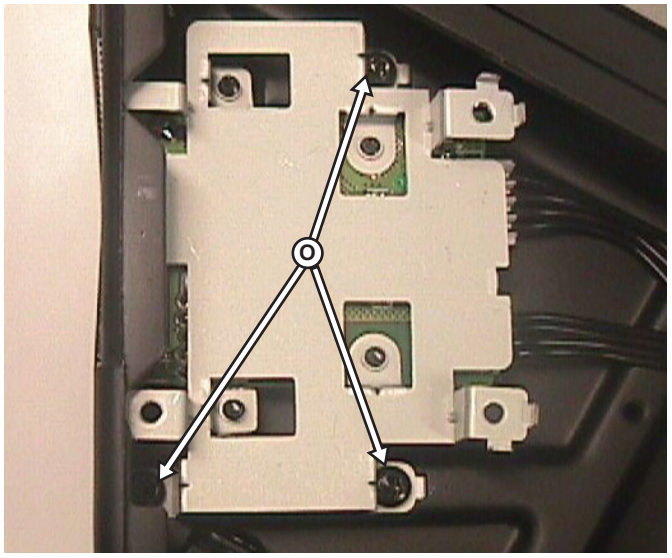

Figure 4-15

4) Flip over the assembly (140+1013) and remove 4 screws to detach the USB Board 1013 from the Bracket 140 as shown in figure 16.

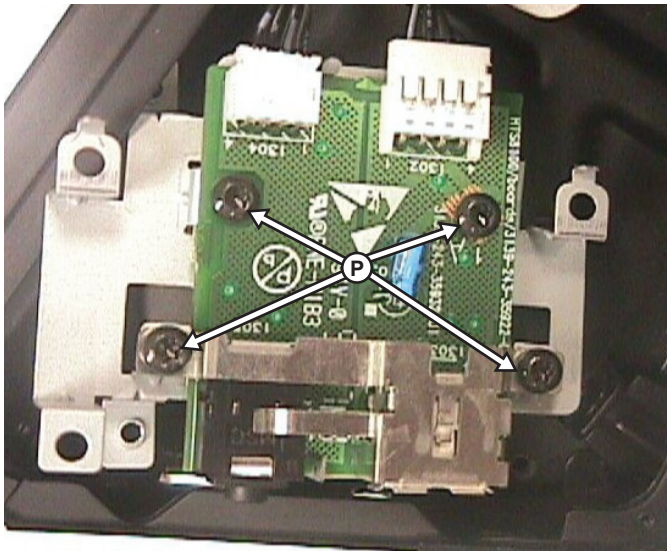

Figure 4-16

4.2 Dismantling of the Speaker Box Assembly

1) It is necessary to remove the Rear Cover and all the main unit components (PC Boards together with the Brackets) to dismantle the Speaker Box Assembly without interference. Remove the Rear Cover first. Then remove the HDMI assembly. After that, remove the Rear Frame assembly together with the Motor Board and the Front Board. Finally, remove the DVD assembly. (Follow the procedures in article 4.1)
2) Remove 2 screws and detach the Door Panel Frame (Refer to “2.2.3 Service hints for dismantling of the main unit” in Chapter 2).
3) Remove 12 screws (6 screws on the front as shown in figure 17 and 6 screws on the Rear Cabinet as shown in figure 18) and detach the frame door and disc compartment assembly (122 +124 + 123 + 101 + 143 + 101 +112 in Main Unit Exploded View) from the Speaker Box Assembly.

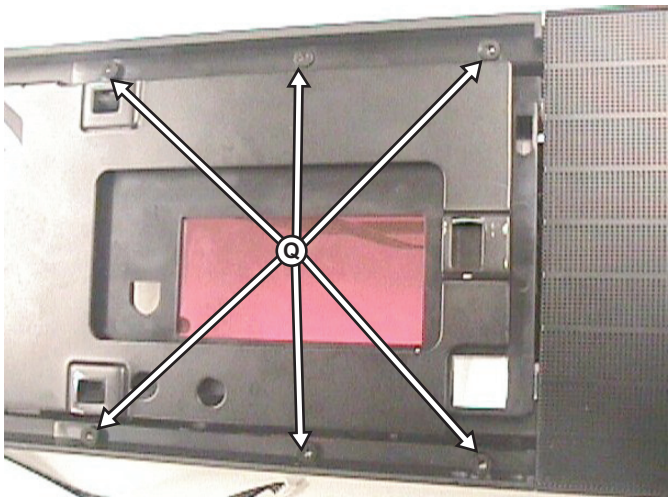

Figure 4-17

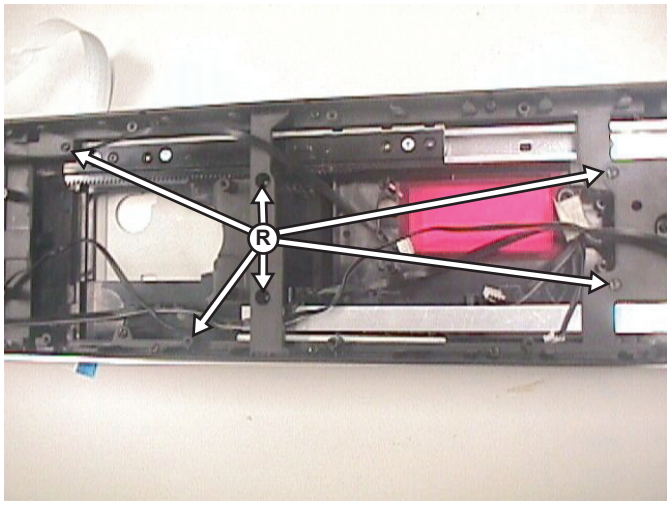

Figure 4-18

4) Remove 9 more screws from the Rear Cabinet (5 screws on the right and 4 screws on the left as shown in figure 19-a and 19-b) to detach 2 Speaker Grilles together with their Holders and the Grommets.

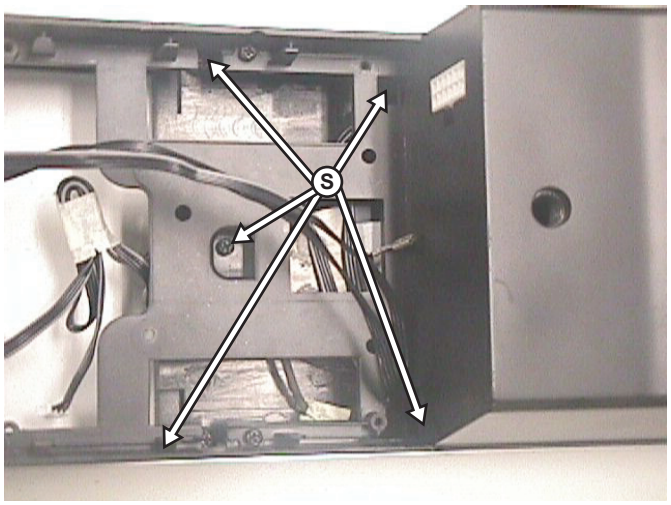

Figure 4-19-a

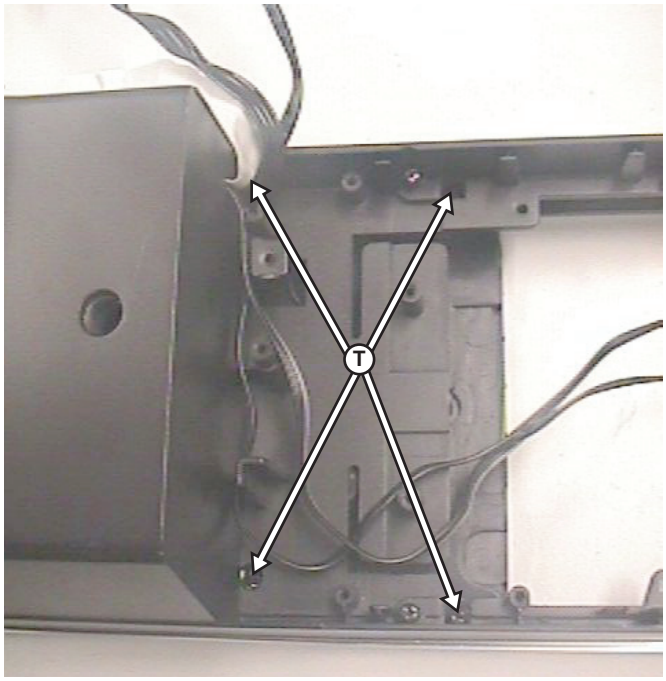

Figure 4-19-b

5) Remove 4 screws at the front (Make sure that all 4 Grommets are removed together with the Grilles; 2 screws on the right and 2 screws on the left as shown in figure 20.) and 10 more screws on the Rear Cabinet (figure 21). Detach the Cabinet Front Assembly from the Rear Cabinet. (Insert a screwdriver between the Cabinet Front Assembly and The Rear Cabinet and force them apart as shown in figure 22).

Figure 4-20-a

Figure 4-20-b

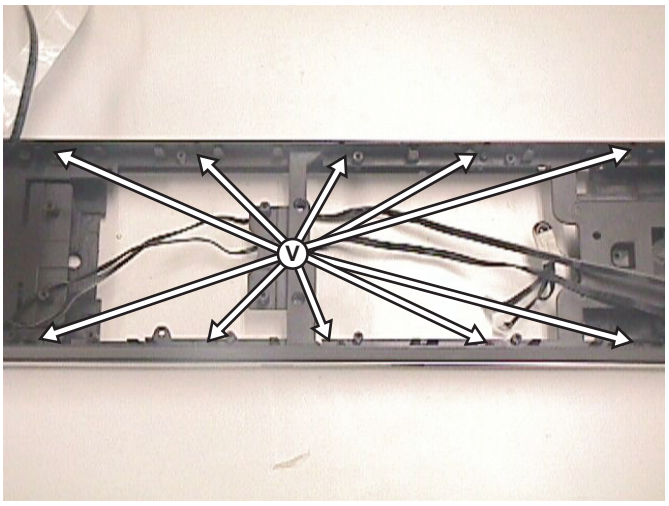

Figure 4-21

Figure 4-22

4.2.1. Dismantling of the right Speaker Module and the interface board

In order to dismantle the Right Speaker Module (Right Speaker Rear Cabinet + Right Speaker Front Panel + Right Speaker Units), it is necessary to unscrew the screws hidden inside the Speaker Cabinet. It is also necessary to detach the Right Metal Partition so that the Right Speaker Module would be readily detached without interference.

1) Remove 4 screws. Take out the centre speaker and remove 2 more screws inside the speaker cabinet as shown in figure 23-a.

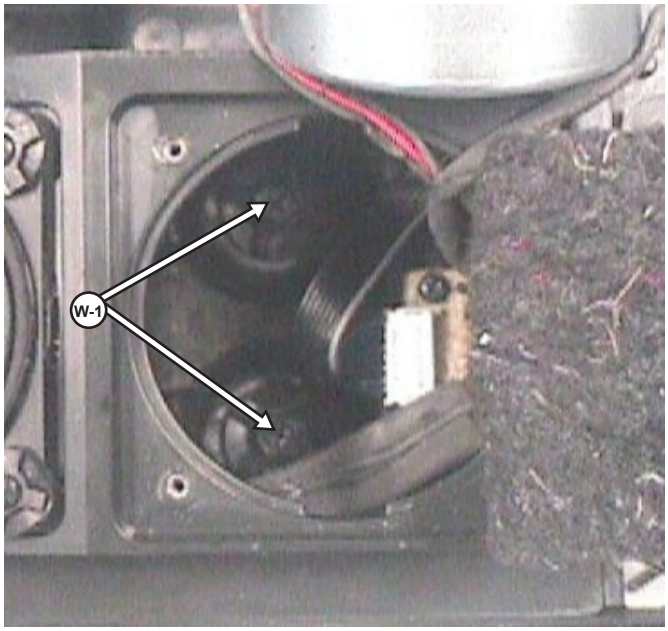

Figure 4-23-a

2) Remove 4 screws. Take out the surround speaker and remove 2 more screws inside the speaker cabinet as shown in figure 23-b.

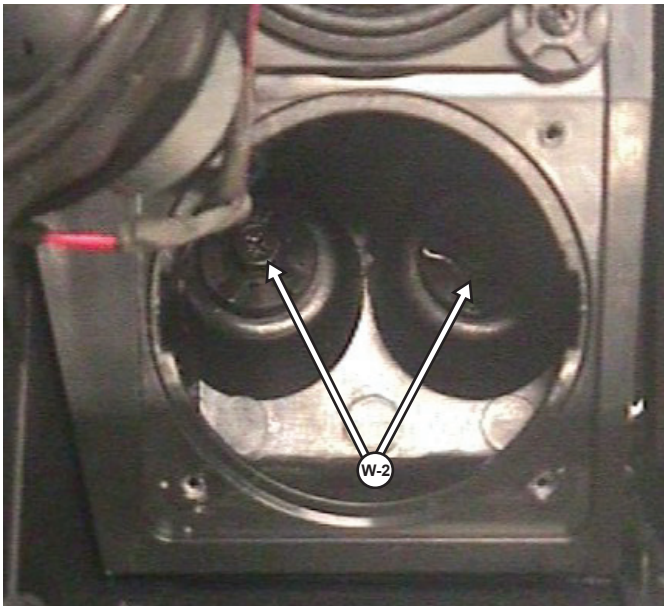

Figure 4-23-b

3) After taking out the speakers and removing the screws, the Right Metal Partition should be detached by removing 4 screws as shown in figure 24.

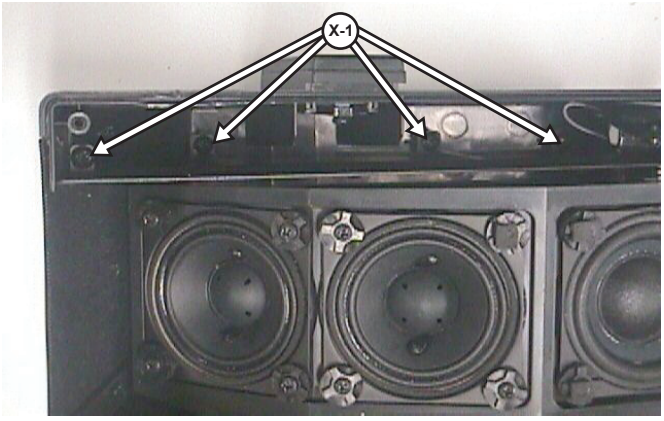

Figure 4-24

4) Dismantle the Right Speaker Module from the Rear Cabinet. To detach the interface board from the Right Metal Partition, unscrew 2 screws as shown in figure 25.

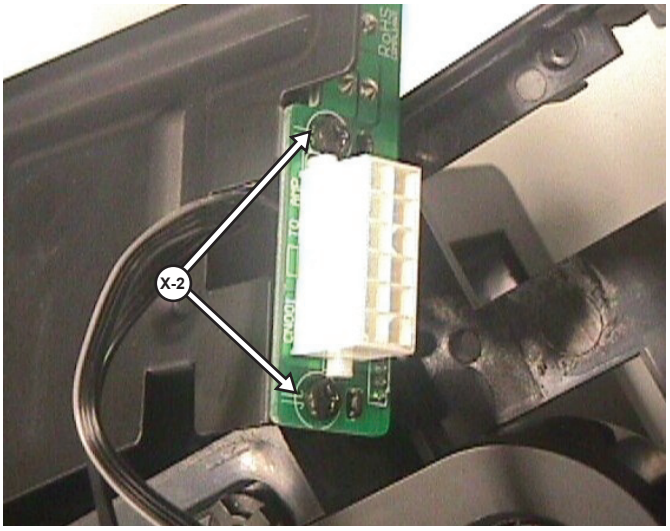

Figure 4-25

4.2.2. Dismantling of the left Speaker Module

1) In order to dismantle the Left Speaker Module (Left Speaker Rear Cabinet + Left Speaker Front Panel + Left Speaker Units), remove 8 screws first, take out the Surround and Center Speakers and remove 4 more screws inside the Speaker Cabinet.
2) Before detaching the Left Metal Partition, it is necessary to remove the IPOD cover and remove the IPOD and USB boards to see the screws that attached the left Metal Partition to the Rear Cabinet (Follow the procedures in article 4.1.4).
3) Then remove 5 screws and detach the left Metal Partition as shown in figure 26.
4) Dismantle the Left Speaker Module from the Rear Cabinet

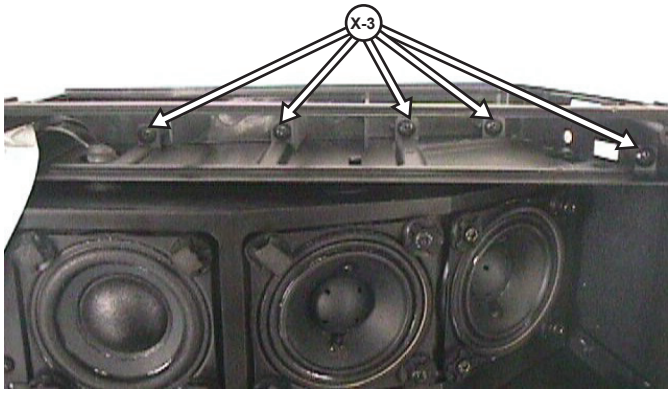

Figure 4-26

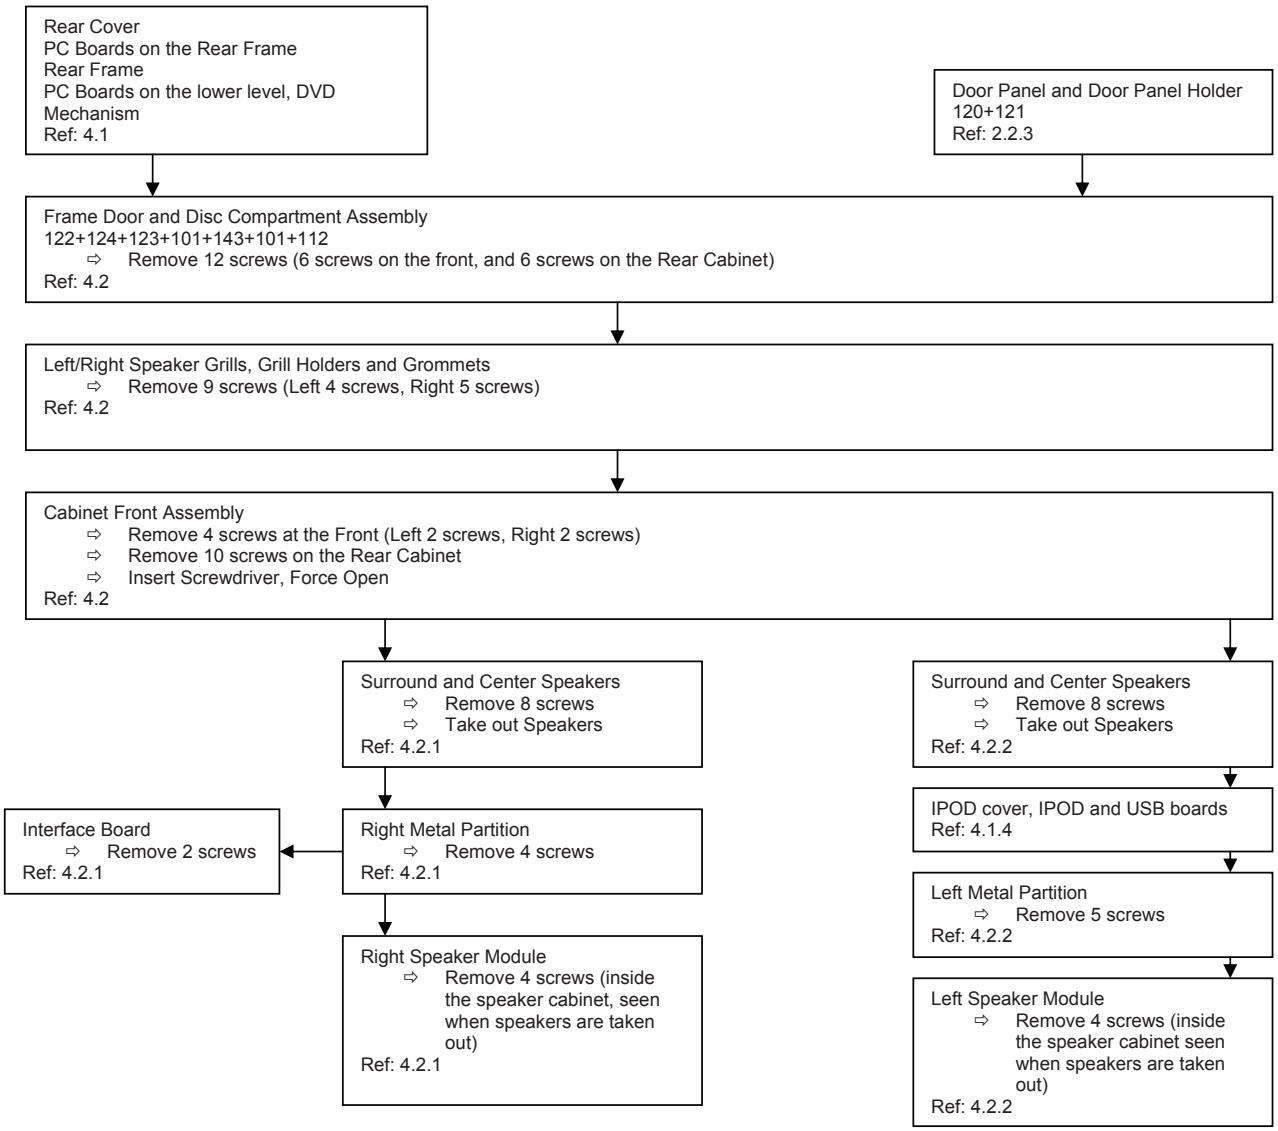
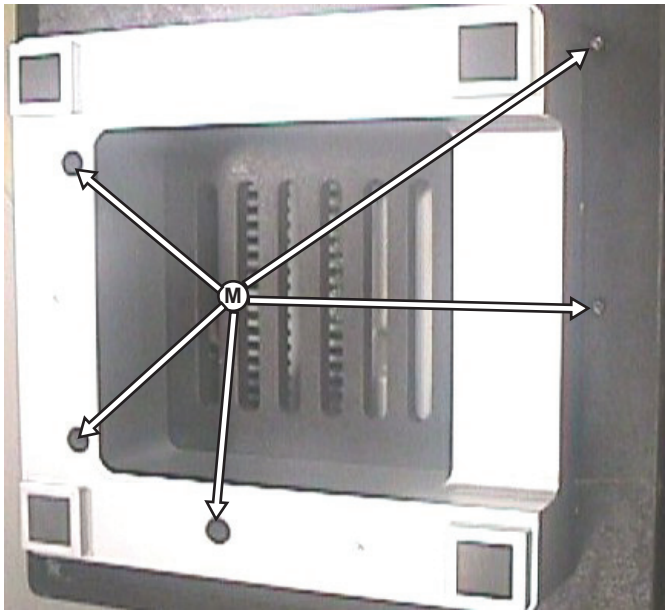
Summary of Dismantling Instructions (4.2, 4.2.1, 4.2.2)

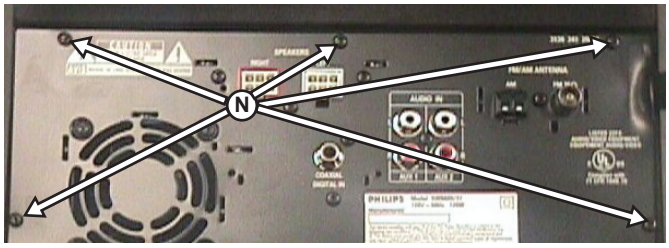


4.3 Dismantling of the Subwoofer Power Box

1) Loosen 5 screws at the base of the Subwoofer (as shown in figure 14) and remove 5 screws at the back (as shown in figure 15). Then pull out the Power Box Assembly.

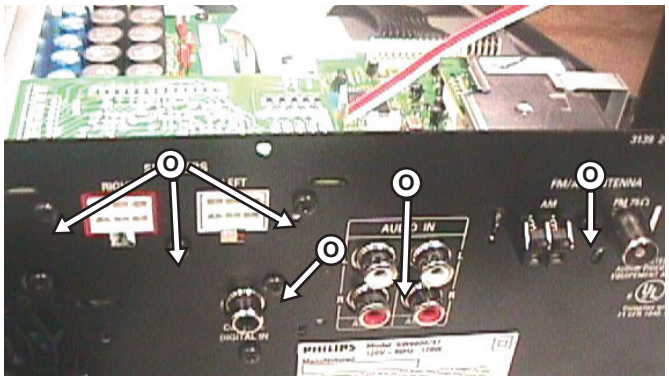


Subwoofer Figure 4-14

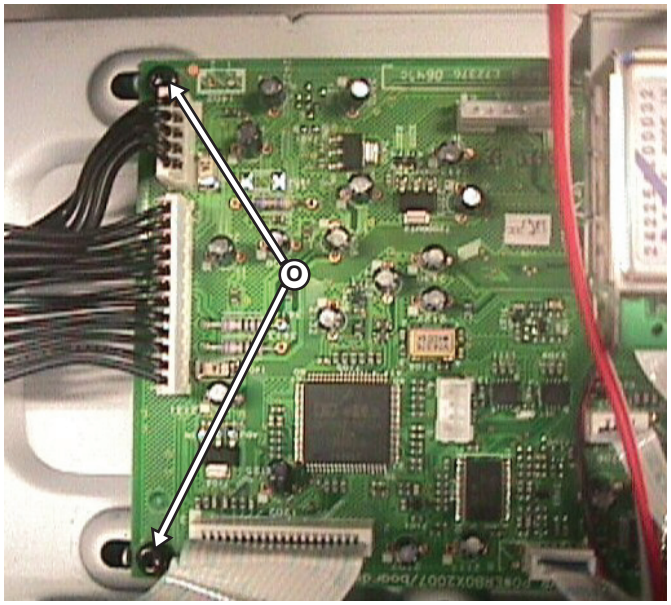


Subwoofer Figure 4-15

2) Remove1 screw for Tuner 1020, 3 screws for Speaker Board 1060, and 1 screw for AIO board 1050 to detach them from the Rear Plate 230. Remove 1 screw attached to the Rear Plate 230 and 2 screws attached to the bracket 236 for dismantling of the Audio Board 1040. Mounting Screws are shown in figure 16 and figure17.

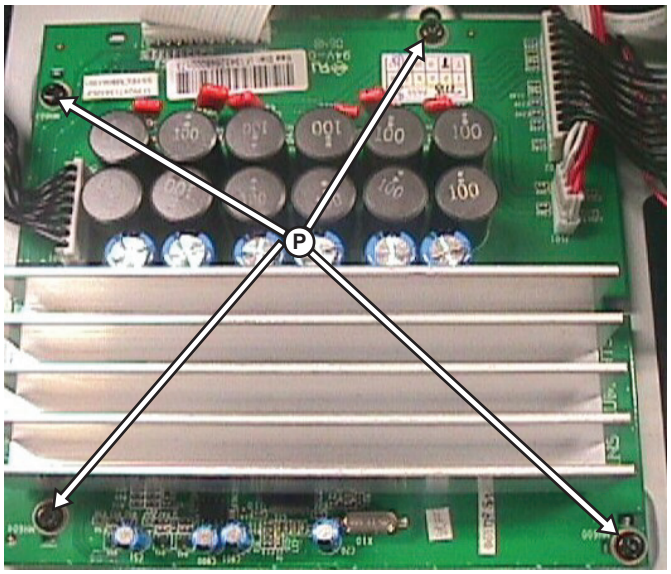


Subwoofer Figure 4-16



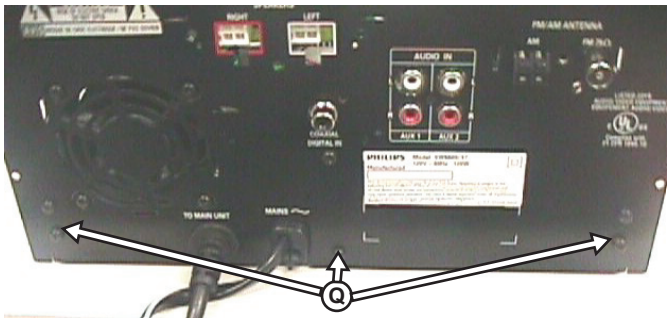
Subwoofer Figure 4-17

3) Remove 4 screws for dismantling of the Amplifier Module 1010 as shown in figure 18.

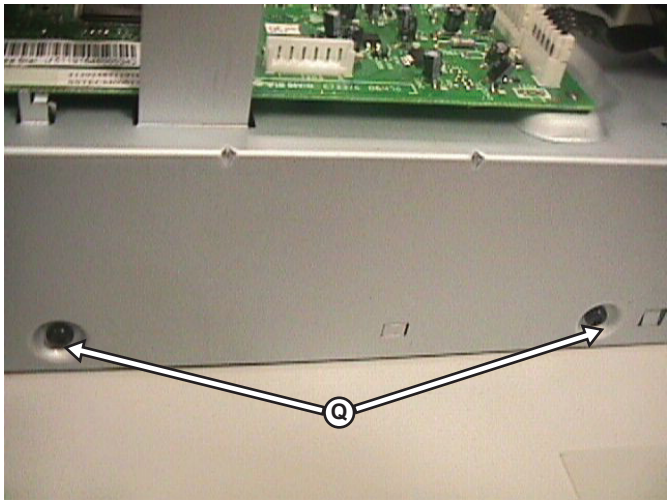


Subwoofer Figure 4-18

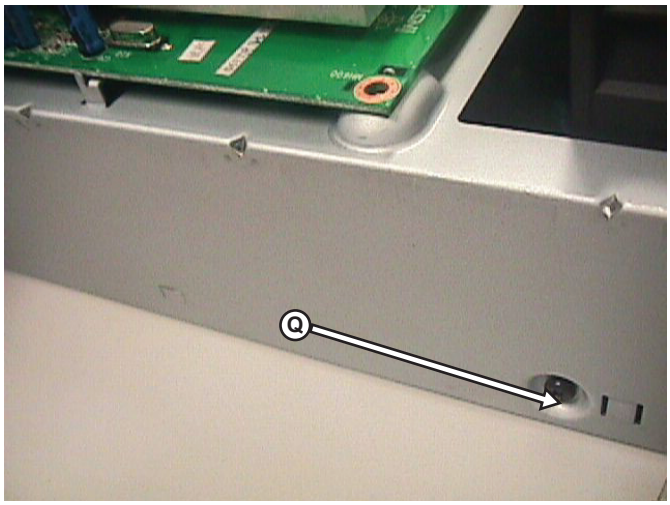
4) To dismantle the PSU 1030, it is necessary to dismantle the Bottom Plate Assembly (1030 +161) from the Rear Plate 230 (remove 3 screws as shown in figure 19) and the bracket 236 (remove 3 screws from both sides of the bracket 236 as shown in figure 20 and figure 21). Then detach the Bottom Plate Assembly (1030 +161) from the Rear Plate 230 and remove 4 screws detach the PSU 1030 from the Bottom Plate 161 as shown in figure 22.



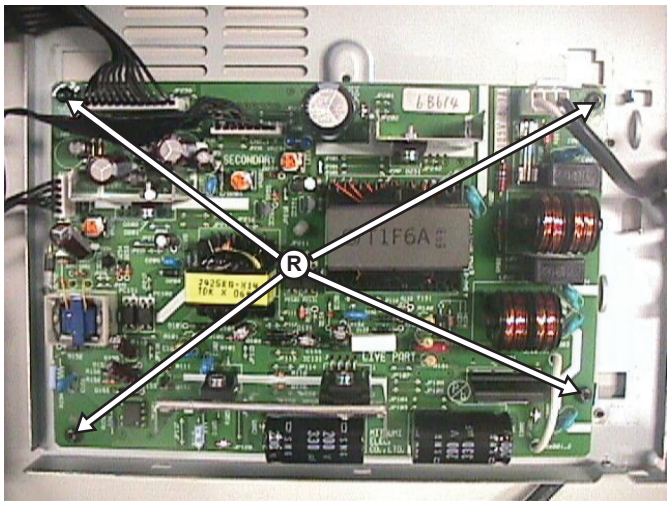
Subwoofer Figure 4-19



Subwoofer Figure 4-20



Subwoofer Figure 4-21



Subwoofer Figure 4-22

4.4 Service Positions

Notes: The AVIO (SCART) bracket 135, the HDMI bracket 134 and the rear frame 132 should be removed for main unit service positions. Refer to the set-wiring diagram for the correct cable connection between boards.

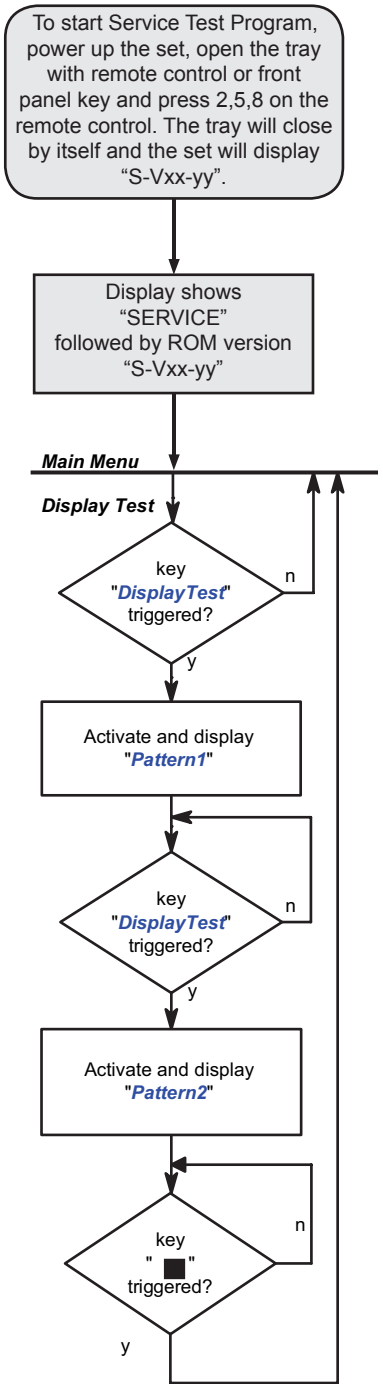
5. Service Test Program



S refers to Service Mode
V refers to Version
xx refers to Software version number of BEA (counting up from 01 to 99)
yy refers to Software version number of Front uP (counting up from 01 to 99)

5.1 Display Test

Purpose:
This test is used to check the driving circuits, the display and whether there are any short-circuits, open-circuits or any other defects.

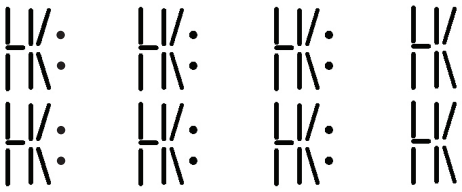
Display test key = ▶||

Player:

Following display patterns are used to test the display and its connections to µP.

Pattern 1: *Default: All display control pins are ON. All LEDs are ON*
- to check the open-circuits

Pattern 2: *Alternate display control pins are on (Test Pattern: 0x55)*
- to check the short-circuits on Data port



5.1.1 Reprogramming of DVD version Matrix

After repair, the customer setting and region code may be lost. Reprogramming will put the set back in the state in which it has left the factory, ie. with the default setting and the allowed region code.

Model	Region	Region Code	TV Type
HTS8100/05/12	EU	2	PAL
HTS8100/37	NAFATA	1	NTSC
HTS8100/59	LATAM	4	NTSC
	APMEA	3	MULTI

To reprogram do as follows:
1) Power up the set and select DISC source.
2) Open the tray with remote control or front panel key.
3) Press the following buttons on the Remote Control:
   <9> <9> <9> <9> <AUDIO> <1> .....for HTS8100/05/12
   <9> <9> <9> <9> <AUDIO> <2> .....for HTS8100/37
   <9> <9> <9> <9> <AUDIO> <3> .....for HTS8100/59 LATAM
   <9> <9> <9> <9> <AUDIO> <4> .....for HTS8100/59 APMEA
4) The display shows **'YYYY-ZZ'** and the tray will close.
   YYYY = model number (eg. 8300, 8500, etc.)
   ZZ = slash stroke version (eg. 01, 69, etc.)

5.1.2 Procedure to check software version

1) Power up the set and select DISC source.
2) Open the tray with remote control or front panel key.
3) Press "DISPLAY" button on the Remote control.
4) The TV screen will show:

SD9.2-Vxx 8100-zz dd
Servo:aaaaaaaa Reg:DD
Fyy Pbb lGcc

xx	=	BEA Software Version
zz	=	Stroke Version
dd	=	Default stroke version region
aaaaaaaa	=	Servo Software Version
DD	=	User set region
yy	=	Front Software Version
bb	=	Powerbox Module Software Version
cc	=	iGIS module Software Version

5.1.3 Burning of firmware

1. Unzip the zip-archive attached with this service information.
2. Start the CD burning software and create a new CD Project (Data disc) with the following settings:
   a. File System: ISO9660
   b. Format: MODE 2/XA
   c. Recording format: Single Session (Track at once), Finalized CD
3. Place the content of the zip-archive into the root directory of the new CD project.
4. Burn the data onto a blank CDR or CDRW.

Note: ISO9660 is mandatory, UDF discs are not supported! The final CDROM must not contain any other data except the file from the zip-archive.

5.1.4 Procedure to upgrade the firmware

1. Power up the set and open tray.
2. Insert the prepared Upgrade CDROM and close the tray.
3. The OSD will Display:

   "Upgrade file detected
   Important: Do not unplug or switch off this device during the upgrade
   File Copying->Upgrading"

4. The tray will then open to allow the upgrade disc to be taken out.
5. Take out the upgrade disc. It may take one or two minutes to complete the ERASE and WRITE processes.
6. When the upgrade process is successfully completed, the tray is pulled in and the set will go to normal mode automatically.

5.1.5 Procedure to check the firmware version to confirm upgrading

1. Power up the set and open tray.
2. Press the <DISPLAY> button on the Remote Control.
3. The firmware version will be displayed on the top left hand corner of the OSD.

5.1.6 Trade Mode

Trade mode is a feature that will block all set keys when enabled. It is for dealers to prevent customers fromremoving disc, changing source etc using the set keys.Rotary and Remote Control (RC) keys are still allowed inTrade mode.

To activate Trade Mode:

1) Power up the set and select DISC source.
2) Open tray by press "OPEN/CLOSE" button on the set or press and hold "STOP" button on the RC.
3) Then press buttons <2> <5> <9> on the RC.
4) The display shows **'TRA ON'** and the tray will close.
Trade Mode is now enabled.

To deactivate Trade Mode:

1) Power up the set and select DISC source.
2) Open tray by press and hold "STOP"button on the RC.
3) Then press buttons <2> <5> <9> on the RC.
4) The display shows **'TRA OFF'** and the tray will close.
Trade Mode is now disabled.

5.1.7 Procedure to change Tuner Grid (/59 only)

(not available for all versions). In some countries, the frequency step between adjacent channels in the (AM/ MW)/ FM band is 9 kHz/ 50 kHz (10 kHz/100 kHz in some areas).
Note: Changing the tuning grid erases all previously stored preset radio stations.

1) Press SOURCE repeatedly until 'RADIO FM' or 'RADIO AM/MW' appears.
2) Press "STANDBY-ON" to switch the main unit to standby mode.
3) Press "STANDBY-ON" again to power up.
4) Press ▶|| until 'GRID 9' or 'GRID 10' appears.
