

PHP Donation Form - Installation Guide

Step1 - Edit Config File

General Config

Open: php\include\config\config.php

```
code source
1. array(
2.     "site_url"=> "http://www.yourdomain.com/donation-form/", // Trailing slash must
3.     "demo_mode"=> true, // email will be disabled
4.     "currency"=> 'USD',
5.     "database" => array(
6.         'host'=>'localhost', // Your DB Host
7.         'user'=>'root', // DB User
8.         'password'=>'root', // DB Password
9.         'db'=>'donation_form' // Database
10.    )
11. );
```

Payment Config

Open: php\include\config\config.php

```
code source
1. array(
2.     'paypal' => array
3.     (
4.         //PayPal Business Email
5.         'merchant_email' => '1327561752_biz@gmail.com',
6.
7.         // PDT Token from PayPal - Check PayPal Website Preference Settings
8.         'pdt_auth_code' => 'XXzsgLIK23zrz_FEDP2sYYXXjd9xi4YiXSTz9IFloD9uGOE2Q3jlhdy
9.     )
10. );
```

Step2 - Database

Create Database

You can use MySQL Manager e.g. PHPMysqlAdmin

Import Database

SQL File: docs\database\donation_form.sql

Step3 - Test - Thats it!

Donation Form

<http://localhost:50/cc/donation-form/>

Admin Details

<http://localhost:50/cc/donation-form/admin.php>

u: admin

p: admin
