

## Instructions: Testing with TestCafe

### 1. Requirements and installation:

#### a. Node Installation:

Install Node.js on your computer. Go to <https://nodejs.org/en/>, download the latest version and install it.

#### b. TestCafe Installation:

Now, your machine is ready to install TestCafe. You can do it from the Node.js package manager (npm) with a single command. Open console, type the following text and press Enter:

```
npm install -g testcafe
```

### 2. Download the test scripts:

- a. Go to [https://github.com/captain-nimo/Testing\\_with\\_TestCafe](https://github.com/captain-nimo/Testing_with_TestCafe) and clone or download the git repository to your machine.

### 3. Run the test Scripts:

- a. In your console, go to the location where the scripts are saved.
- b. Now run following command to open browsers and start the test:

```
testcafe browser_name file_name
```

i.e. `testcafe chrome search_and_sorting_en.js`

- c. If you want to run all the scripts sequentially by a single command, execute the `'run_all_scripts.sh'` file from the local repository. To execute the file, run following command in the console:

```
./run_all_scripts.sh
```
