- Custom branded delivery documents—cut days and cost out of your deliveries by utilizing Jenne's logistic capabilities to drop ship your customer's order directly to them. We will include shipping documents with your branding and your customer's purchase order number to ensure ease of receipt.

Web-based Resources Available 24/7 at www.jenne.com

Jenne's web site is the place to access product information for Jabra's top products and solutions. Jenne offers:

- A searchable online product catalog and secure online ordering capability 24/7. You can check pricing and stock status, build order templates for repeat orders, create online tracking information, access your account information, review past orders and much more.
- We offer timely email announcements on product revisions, new product introductions, price changes and other important information.

About Jabra

With over 140 years of experience, Jabra is a global producer of innovative headset and speakerphone solutions. Jabra has a long history of “firsts” including the first wireless office headset in 1996, the first Bluetooth® headset in 2000 and the world’s first fully digital wireless headset in 2000. In addition, Jabra leverages the technologies developed by sister companies GN Resound and Otometrics, global leaders in the development and manufacturing of hearing aids and audiological testing equipment. No other headset manufacturer has this depth of resources, technology and skill. The brand, Jabra, is about empowering its customers. Jabra recognizes the tremendous potential inherent in technology. It can set users free and empower them to accomplish amazing things, on their own terms. Jabra’s products harness this technology and enable their users to work, live and play on their own terms. Always connected, always on and always ahead of the game.

Jabra Headsets for Unified Communications

If your customers are investing in UC, and they want high-quality audio devices that complement the quality of the UC solution, Jabra helps improve their return on investment by delivering products with high-quality materials and excellent sound—to seamlessly and intuitively bridge the gap between deskphone, mobile phone and computer. Jabra also helps them reach a break even point faster by supporting their company throughout all phases of the UC process. Those involved in the UC planning and implementation process are supported with advice on choosing the right hands-free audio solutions for different kinds of users. They’re also provided with tools, piloting equipment and technical help—all to ensure the process runs smoother and faster.

Jabra Evolve: Improve A Workspace with a Click of a Button.

The MS model is Lync optimized for VoIP softphone, mobile phone and tablet the UC model is Unified Communications optimized for a PC, smartphone and tablet.

EVOLVE 40

Jabra EVOLVE 65

The Jabra Evolve 65 is a professional headset designed mainly to improve conversations. The premium noise cancelling microphone eliminates background noise so a voice can be heard more clearly. Wireless Bluetooth technology gives up to 30 meters /100 feet of hands-free connectivity to a PC, smartphone and tablet. It is available in a mono or a duo wearing style. The microphone boom arm can be integrated into the headband when not on a call and features a microphone mute. The MS model is optimized for Microsoft Lync and the UC model is optimized for Unified Communications.

EVOLVE 65

Jabra EVOLVE 80

The Jabra Evolve 80 is a professional headset designed to improve concentration and conversations. Premium active noise cancellation technology gives the user peace to work in a noisy, open office, effectively creating a concentration zone so they can stay focused. Active noise cancellation technology and large around-the-ear cups are designed to reduce unwanted noise for premium sound experience.

EVOLVE 80

Jabra Motion UC

- Designed for maximum efficiency and comfort, the Motion UC is the only headset users will ever need. It features intuitive call control, Near Field Communication connectivity and a height-adjustable, rotating speaker house with sized ear buds to ensure a universal fit. The Jabra Motion UC also offers 10 times the range of similar headsets, up to 300 feet from the user's device.

Jabra Motion UC Travel Kit

- Perfect to use in the office or when traveling. Users can connect their charging kit to their PC and dock their Jabra Motion UC headset to charge. The kit will hold the headset, USB adaptor, USB charger and three ear gels.

Jabra PRO™ 9450

- Flexible for blended telephony environments, users can connect the PRO™ 9450 to both desk and softphones. This headset features a quick and easy set-up that is customizable to meet the user's needs. Calls can be handled from the headset, computer or the touch buttons on the charging base.

Jabra PRO™ 9470

- Designed for executives, managers and other professionals looking to connect with their mobile, desk and softphone simultaneously. The dual microphone set-up features the Jabra Noise Blackout technology for a clearer and more professional conversation experience.

The Jabra logo is displayed in a bold, black, sans-serif font on a bright yellow rectangular background. Above the logo, a man and a woman are shown in profile, wearing Jabra headsets and working in an office environment.

Jabra PRO™ 930

- As part of the Jabra PRO™ 900 Series, the PRO™ 930 can be used with all UC systems. This is Jabra's professional entry-level headset at an attractive price point. Its plug and play functionality cuts down on set-up, deployment and training of the device. The 930 features a simple design and improves user productivity.

Jabra MOTION™ Office

- Features multiple phone connectivity to stay connected to all phones using the same headset. Transfer calls from the desk phone or VoIP softphone to mobile phone and continue calls while heading out the door. Talk range up to 300 ft. with enhanced audio protection that ensures safe listening levels.

Jabra Stealth UC

- Jabra Stealth UC takes Bluetooth® headsets to the next level by being the first to incorporate the breakthrough microPOWER battery technology which allows for a significantly smaller design, longer talk time and a better comfort experience. The headset features the latest and most advanced sound enhancement technologies. Noise Blackout™ reduces background noise together with HD voice, ensuring crystal clear conversations.

Jabra Speak™ 510

- This 2013 Red Dot Design Award winner allows end-users to make conference calls from virtually anywhere. The Speak™ 510 is a personal Bluetooth® and USB speakerphone that is compatible with PCs, smartphones and tablets with Jabra's plug and play technology. It features 360-degree coverage so that everyone in the room can be a part of the conference call without worrying about the placement of the device.

JABRA XPRESS

Jabra Xpress is a web based solution that lets you deploy software, firmware and settings for an infinite number of USB Jabra headsets 100% remotely. There are two key benefits of using Jabra Xpress: for new device installation and mass deployment; and for updating and managing existing headsets and audio devices.

EASY AND TIME-SAVING: Jabra Xpress includes tools for easy customization of Jabra device MSI packages, with software and headset configurations for remote deployment—all via standard deployment systems.

ASSET MANAGEMENT: The new software adds an extension (Jabra device WMI provider) to the company's existing asset management tools, providing a complete portfolio overview of Jabra USB devices installed in the IT network.

FAST UPDATES: The new generation of future-proof Jabra headsets are 100% software-based. Whenever headset firmware updates are available, IT management can schedule deployment of new features and enhancements to all users in less than an hour—a task that would normally take days.

CHANGE OF SETTINGS: New settings can be deployed remotely to specific groups of users, ensuring that all headsets are updated and aligned with corporate policies.

COMPATIBLE WITH STANDARD DEPLOYMENT SOFTWARE: Jabra Xpress is based on standard Microsoft technology (MSI / WMI) so it's compatible with leading deployment systems such as Microsoft System Center Configuration Manager, IBM Tivoli and Symantec Altiris.
