Introduction

You know the old saying, “close only counts in horseshoes?” Well, it actually counts in warranty processing as well. You see getting close to the right operation is a lot better than pouring through an entire Labor Time Guide (LTG). That is the purpose of this guide – *Labor Operation Quick Finder*.

Most LTGs have about 2,000 individual labor operations. If you are looking for a particular one then it’s like the old needle in a haystack. What this guide serves to do is narrow that field down a bit – quite a bit. Here’s how it works.

Labor operations are matched to failed parts not by individual part numbers but by their group. GM figured out a long time ago that part numbers change everyday, but groups stay consistent. So instead of matching up individual part numbers to labor operations, they designed their system to match the part’s group.

Part groups are what they sound like, a grouping of parts relative to their operation or design. It is also how the GMSPO categorizes their parts catalog. There are major sections for engine, transmission, brakes, etc. that joins related parts together.

Instructions

Whenever you are faced with a difficult to find labor operation where a part has been replaced, you can locate suggested labor operations. To do this you’ll need to know the part group for the failed part. Many of you have an in-house invoicing system that will do this for you and print the group right on the invoice (see example). If not, then your part pricing system should also list the appropriate group. If you don’t have access to this information you just need to have someone in the parts department look up the group number for you.

Once you have the group number you can look it up in this guide and you’ll find a listing of suggested operations. Look through the operations and make your choice based what operation appears most applicable in the given vehicle’s LTG. Our current research shows by using these charts you’ll find the best operation 90% of the time. By using this guide, returns for part incompatibility to the labor operation (Code PB) are a thing of the past.

This book can’t direct you to the one and only labor operation that will work for a failed part. Remember, GM’s system isn’t designed to work that way. In most cases, you will be narrowing your search down from the entire LTG to just a few operations.

Also, keep in mind that this guide is designed to work for all vehicles and all divisions. There will be labor operations listed that do not apply to your application - just ignore them. (For example, some seat trim groups might apply to third row seats. Something not many vehicles have.)

The history of this guide

For those who are new to GM warranty it might be tough to believe that once all divisions were run by autonomous organization and each had their own particular rules concerning warranty administration. This was before 1994 when GM WINS combined the processing system into a single entity and unified the divisional Labor Time Guides into the Platform based LTG we have today.

In the late eighties, we found that Pontiac and GMC published part group references for several labor operations in the LTG. While overly vague, we thought these references should be available for the other divisions as well. Since the remaining divisions apparently didn't want to include this information, we decided to do it for them. So after hours of pouring through the Pontiac and GMC LTGs *Warranty Dollars & Sense* compiled the first ever seen "Part Group to Labor Operation Cross Reference Chart."

But soon we realized that this could be developed even further. We found that for any given labor operation several part groups may apply. For example, in old LTGs you might look at a labor operation like B7866/B7876 [Molding, Front Door] and you'd see a note of PART GROUP: 12.112. What we found from research was that groups 08.309, 10.051, 12.114, 12.116 and several others applied to that labor operation as well. Today's LTGs have removed all references to part groups from their pages. As we developed more and more research the charts grew in size. Quickly, it became an indispensable tool to thousands of dealerships across the country. Of course, imitators followed – but that is to be expected for a guide that is so useful. It is a testament to our original idea that this is critical research for the timely payment of claims.

Our current research methodology

Warranty Dollars & Sense puts utmost importance on paid claims when conducting primary research. We do this by compiling literally thousands of claims from which we can collect our raw data. This manual is based on our past charts combined with a new batch of research of recently paid claims, which by now numbers in the tens of thousands. For this 2004 Edition, we only surveyed model years 2004 – 2002, across all of GM's platforms. We wanted to focus in on what is working on claims today – with all the new vehicle systems and changes to the LTG. Because there are occasion for you to submit a warranty claims (like a GMPP or part warranty) on past model years, we have left all our legacy data in the guide as well.

Since GM obviously has a similar chart built in their system some may ask why we don't use their chart. There are two reasons. One, quite frankly, GM isn't inclined to provide it to us. Second, GM's cross-reference tables are so large that it would make the guide nearly unusable. We are aiming for speed and efficiency, but that comes at a cost of not having 100% of potential situations covered. To add the extra few percentage points to assure complete coverage would potentially explode this guide so big that it would become unusable. Our aim is to save you as much time and effort as possible.

Looking ahead we will continue to search and monitor potential new additions to this chart. If you have a particular coding situation that this chart does not answer, I invite you to call me and chances are we can include it in future revisions.

Of course, if you ever have any questions regarding these charts and how to use them in coding your GM warranty claims, we are only a phone call away at (800) 321-5312. We're ready to help whenever possible. We would be very happy to hear from you.

I sincerely hope that this guide makes your job a bit easier!

Warmest regards,

Rob Campbell, Editor
