- Blade Exchanger
- Diamond and Wood/Metal File Blade
- Saw Blade
- Large Bit Driver
- Small Bit Driver
- Phillips #1-2 and Screwdriver 3/16" Bit
- Phillips and Flat Tip Eyeglasses
- Screwdriver Bit
- 5/16" Screwdriver
- Awl w/Thread Loop
- Ruler (9 inches/22 cm)
- Bottle/Can Opener
- Wire Stripper
- Lanyard Ring

Superior
We developed a new awl design. One that's sharp and easily punches through leather and rugged materials like heavy canvas. We even added a thread loop for emergency repairs.

Exacting
Surge's 5/16" screwdriver is hollow-ground for a better fit. And, it comes in a standard size professionals use.

Detailed
Our engineers think of everything. They inserted bronze bushings between the handles and all 4 outside-opening blades. Why? Just to make them smoother to open and close.

Ultra-Sharp
Leatherman is known for ultra-sharp knives. Now they're even larger. Surge's straight knife has the longest cutting edge we make. And, you can open its straight and serrated knives with just one hand.

Versatile
Three different wire cutters on one tool? Use the regular wire cutters for TV and telephone wires. Hard-wire cutters for nails and fish hooks. And stranded-wire cutters for electrical wire and bike cables.

Efficient
Carry 4 screwdrivers in the space of two. Versatile bit drivers come with double-ended bits that you can quickly change to fit the day's work.

Convenient
The first Leatherman that lets you change blades. Our blade exchanger comes with an open-tooth saw and two-sided file. It also fits standard T-shank blades, so you can choose exactly the tool you need.

Strong
Surge's pliers are 10% bigger than the pliers on our 4" multi-tools. With them, you're able to cut larger, heavier wires with less effort.

Tough
Our new scissors have even sturdier blades than before. And, they open easily from the outside of the handle. In seconds they're ready to cut tough materials like plastic, carpet and metal flashing.

Surge® Bits & Blades

Two double-ended bits for the bit drivers and two blades for the blade exchanger are sold with Surge. Leatherman's bits are made from S2 tool steel, which is 35% stronger than stainless. Both blades have a T-shank design that fits securely in the tool. Our two-sided file has a coarse side for everyday jobs, and a diamond-coated side for fine honing. And, the open-tooth saw blade gets off to a fast start and is easy to use.

Phillips #1-2 and 3/16" Screwdriver

Phillips and Flat Tip Eyeglasses Screwdriver

Diamond and Wood/Metal File

Saw

All-Locking Blades

Locks are easy to use and over 50% stronger than our original tool locks. Each blade quickly releases with the push of a button.

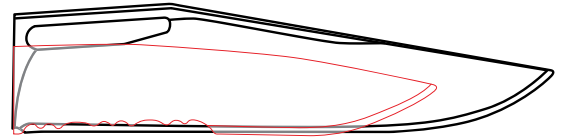

Comfortable Handles

Our multi-tools handle tough jobs every day. That doesn't mean they need to be tough to handle. Rounded edges give you a firm, comfortable grip.

Bigger Than the Competition

We don't like to brag much, but with our multi-tools, a little showing off is in order. So here we go.

■ Competitor blade ■ Surge

Compared to other multi-tools in the same category, Surge simply features the largest knife blade.

There. It's been said. We'll come down from our high horse now.

Bit Kit

(Sold separately)

Expand your bit collection with 21 double-ended bits. Sold with its own sheath, the Bit Kit gives you 42 unique tips in one compact sleeve. Each bit is made from S2 tool steel and coated with zinc for extra corrosion resistance. Hex, Torx, Phillips, Robertson, Pozi and slotted screwdriver bits are included.

Removable Pocket Clip

Quick-Release Lanyard Ring

Surge Accessories

(Sold separately)

Clip Surge to your pocket, jacket, backpack or car's visor with the removable pocket clip. Or choose the quick-release lanyard ring. Your tool stays where you put it, but releases quickly with the push of a button.

The Leatherman Difference

The Leatherman name is synonymous with expertly engineered multi-tools. Ever since he came up with the idea in 1975, Tim Leatherman has been focused on one thing—creating the world's best multi-tool. With Tim's invention, cranky cars are no longer a problem. Leaks can be fixed on the spot. And bottle caps are opened—even in the middle of the desert.

The multi-tool has changed our activities, sports and work. Making lives easier, and even saving a few from time to time. Own a genuine Leatherman tool, and you'll understand.

Leatherman. Now you're ready®.

Warranty

Leatherman Tool Group proudly stands behind our products with a 25-year limited warranty and fast warranty service. For complete warranty details visit www.leatherman.com.
