

# MF Grounds Care

A Range of Residential  
& Commercial Grounds Care Equipment

VISION INNOVATION LEADERSHIP QUALITY RELIABILITY SUPPORT PRIDE COMMITMENT

MASSEY FERGUSON

# Think pride...

Built on experience, growing through innovation.

Massey Ferguson grounds care equipment has come a long way, all in the name of quality and constantly strives; for more efficient products, the ethos being based around performance, reliability and a long heritage. And so, Massey Ferguson is proud to present a range of high-quality grounds care equipment, extending an already comprehensive stable of grounds care machines.

For more than 40 years, Massey-Ferguson has led the way in the design and manufacture of grounds care machinery and has a history in land management, which traces back over 160 years. We've earned a coveted reputation for rugged build quality, efficiency, reliability and excellent value for money.

Our experience in machine manufacture is reflected in the awards we have won. To complement all of this, a wide choice of optional features and accessories provides the opportunity to tailor each machine to perform precisely the range of tasks required.

You can rest-assured that all Massey Ferguson grounds care equipment comes with the reassurance of the best after-sales service and support package in the world from the Massey Ferguson network.

# Self-propelled lawn mowers

Built to last: you can depend on your Massey Ferguson petrol mower to be with you throughout the year in the day-to-day life of your garden. The modern technology and the best workmanship see to that. Powerful engines, the easy-to-empty grass bag, the ergonomically formed handle and the easy-to-handle cutting height adjustment guarantee excellent mowing results.

## MF 19 SB Rotary Mower

- Briggs & Stratton engine, 750 Series DOV
- Fuel capacity 1,1 l
- Bag full indicator
- Grass bag volume 75 l
- 19" / 48 cm cutting deck
- 4 in 1 cutting system
- Mulch, collect, side or rear discharge
- Variable speed
- Rear wheel drive
- Ergonomic handle
- Deluxe handle panel and foam grip
- Ball bearings
- 18 / 20 cm wheel size (front / rear)

### Mulching, bagging, discharge

There are different ways to dispose the clippings: mulching, bagging or discharge. When mulching, the grass clippings are cut several times to fine particles and can directly be used as a natural green fertilizer.

Our models MF 19 SB, MF 19 SHWB, MF 21 SB and MF 21 SHWB offer you all three options simultaneously.

### MF 19 SHWB Rotary Mower

- Briggs & Stratton engine, 750 Series DOV
- Fuel capacity 1,1 l
- Bag full indicator
- Grass bag volume 75 l
- 19" / 48 cm cutting deck
- 4 in 1 cutting system
- Mulch, collect, side or rear discharge
- Variable speed
- Rear wheel drive
- Ergonomic handle
- Deluxe handle panel and foam grip
- Ball bearings
- 18 / 30 cm wheel size (front / rear)

### MF 21 SB Rotary Mower

- Briggs & Stratton engine, 750 Series DOV
- Fuel capacity 1,1 l
- Bag full indicator
- Grass bag volume 80 l
- 21" / 53 cm cutting deck
- 4 in 1 cutting system
- Mulch, collect, side or rear discharge
- Variable speed
- Rear wheel drive
- Ergonomic handle
- Deluxe handle panel and foam grip
- Ball bearings
- 20 / 20 cm wheel size (front / rear)

### MF 21 SHWB Rotary Mower

- Briggs & Stratton engine, 750 Series DOV
- Fuel capacity 1,1 l
- Bag full indicator
- Grass bag volume 80 l
- 21" / 53 cm cutting deck
- 4 in 1 cutting system
- Mulch, collect, side or rear discharge
- Variable speed
- Rear wheel drive
- Ergonomic handle
- Deluxe handle panel and foam grip
- Ball bearings
- 20 / 30 cm wheel size (front / rear)

# Side discharge lawn tractors

Tractors with side discharge are extraordinarily versatile. These machines with working widths of 96 cm, 107 cm or 127 cm are characterised by optimal manoeuvrability on all models. Cutting the grass over larger areas is made quick and easy. Thanks to an easy-to-operate cutting height adjustment and a suspended mowing deck, you will have optimum cutting results even on difficult ground. Furthermore, you can easily attach accessories, such as snow blades, lawn rollers or dump carts.

# Innovation!

The range of commercial-quality, multi-purpose tractors are designed for residential and estate users requiring a power unit capable of operating a wide range of front and rear attachments, delivering optimum versatility and cost effective operation throughout the year. All models can be equipped additionally with rear discharge cutter decks with optional grass collection systems.

The MF 21-25 RD and the MF 21-25 RD 4WD are powered by 24hp twin-cylinder petrol engines. The first MF 21-25 RD model is specified with either two-wheel or the MF 21-25 RD 4WD offers all-wheel hydrostatic drive.

The MF 31-25 RD 4 WD is intelligent, powerful, reliable and rugged. Whether you need it for lawn care, tall meadows in rough terrain, courtyards, access roads or company sites - the technique of the MF 31-25 RD 4 WD with its 24 hp makes this tractor a full professional in nearly every terrain.

## **MF 21-25 RD / MF 21-25 RD 4WD**

Standard features designed to give these garden tractors a work capacity far greater than conventional lawn and garden tractors of similar size are their heavy-duty welded tubular steel frames, pivoting front axles and pedal-engaged differential locks. Other model specific features

include selectable high and low speed ranges, Servocom steering, electrically-engaged power take-off and dual hydraulic outlets at the front and rear of the machine.

Available is an extensive list of optional equipment and accessories for these garden tractors, including the choice of turf or agricultural tyres, high-back seats with and without armrests and rear tipping grass collectors of various capacities with electric opening and high-tip emptying.

Among the attachments also available will be trailed and mounted fertiliser/salt spreaders, a towed truck, front sweepers with collection system, a snow blade, 540rpm/1,000rpm front power take-off, a triangular front implement attachment frame, a road legal lighting kit and a weather cab.

Two conventional rear-discharge cutter decks in 1.05 m and 1.22 m widths will be offered, complemented by a four-in-one 1.02 m deck capable of cutting at a wide range of heights prior to mulching, collecting or discharging the clippings directly onto the ground.

Efficient delivery of cut grass to an optional rear grass collector is achieved by the fitting of a large diameter discharge chute to all cutter decks, which are equipped with spring-assisted deck lift mechanisms.

All grass collection systems incorporate an acoustic "box full" sensor alarm.

## **MF 31-25 RD 4WD**

This 4 WD tractor is equipped with 2 hydraulic engines pivoted assembled on the steering stub axle. This allows a direct and short transmission to each front wheel and attains an excellent thrust performance

In addition, the MF 31-25 RD 4 WD has a "second speed" available. The power of the front hydraulic engines is bypassed to the rear hydraulic engines. Thereby a maximum speed of approximately 15 km/h will be achieved

### MF 21-25 RD

# Intelligent zero-turn rider

The new MF 50-24 IZ ride-on mid mower has independently-driven rear wheels and a unique steerable front axle operated by a conventional steering wheel. Drive to the two rear wheels is controlled by advanced Synchro technology (patents pending) that synchronises front wheel steering movements with speed and direction of rotation of the rear wheels. The result is zero-turn radius agility from a conventionally-steered mower, enabling 360 degree turns to be made within the length of the machine.

Tight turns are enhanced by exceptional ground-following capabilities thanks to the use of a pivoting front axle, wide track and low centre of gravity that keeps all wheels firmly on the ground to give a smoother, safer cut on level or sloping terrain.

Powered by a Kawasaki twin cylinder petrol engine (3100 min<sup>-1</sup>/12,5 KW), the MF 50-24 IZ is equipped with a 1.27 m heavy-duty triple bladed mowing deck with anti-scalp rollers and mulching kit. An optional collector is available for use with the quick-attach, side-discharge deck.

Other standard equipment includes an adjustable high-back seat, comfortable soft-touch steering wheel and patented Smart Jet high-pressure deck washing system.

# Zero-turn front cut rotary rider

The front cut rotary riders MF 48-22 FMZ and MF 50-22 FMZ are using an advanced Synchro synchronised steering technology. These riders have front drive wheels whose speed and direction of rotation are controlled by movements of the rear steered axle, actuated through a conventional steering wheel. The result is a high-output mower with a maximum working speed of 6 mph that is able to turn within its own length, delivering superb manoeuvrability, particularly useful for cutting in awkward or confined areas.

# Zero-turn front cut rotary rider

The machine is powered by a Kawasaki petrol engine 3150 min<sup>-1</sup>/ 13,8 KW) and has a quick-attach 1.27 m heavy-duty floating cutter deck fitted with three blades. Blade engagement is by electrically-operated clutch and height of cut is adjustable from 25 mm to 114 mm on the two

swivelling front support wheels. The side-discharge deck has anti-scalping rollers and incorporates the patented Smart Jet high-pressure deck washing system. A mulching kit is supplied as standard. Maximum operator comfort and convenience are assured by an

easily-accessed driver's platform with fingertip controls, well-positioned instrumentation and a multi-position high back seat with arm rests.

# Dual-lever zero turn rider

Designed to cut grass and trim time. Powerful Kawasaki OHV engine. Quiet, reliable performance from an engine designed for longer life. HydroGear™ EZT transmission - no hoses between the pump and motor gives more power to operate the deck. Pivoting front axle provides a smoother ride and a more professional cut while allowing a more enjoyable riding experience. Electric PTO for smoother deck engagement. 127 cm triple blade deck with 4 anti-scalping wheels, adjustable seat and steering levers. Deck wash hose attachment. High-pressure water blast cleans out grass and debris after each mowing. Optional baggers and mulch kits.

Dual transmission utilizes the full potential of both the engine and the transmission. No hoses between pump and motor allows more power for deck.

The dual-lever steering arms let you control each wheel independently with precise movements and less effort. Zip around the bushes. Turn a full 360°.

# The Bull

Introducing the MF Bull, whether you need a worker out on the farm or a way to get out into the woods (or perhaps a little of both), the 4x4 Bull gets it done. With 4-wheel, fully independent double A-arm suspension and a wide stance, it offers increased stability on rough terrain. The 4x4's tight curb-to-curb turning circle and rear anti-roll bar provide superb cornering at faster speeds. Wherever you go, you'll have the ultimate in 4-wheel performance.

The new Bull 4x2 sets new standards by delivering 4x4 performance in a 4x2 UV. The 4x2 is built on the same rugged frame as the Bull 4x4 with fully independent suspension, for a steady and comfortable ride even in rough territory. The 4x2 is as strong and as quiet as it is smooth. Quite simply, it outworks and outplays the competition every time.

The Bull – 2-wheel-drive

**MF 20 MD 4x2**

- Utility vehicle

# MF Grounds Care highlights

Here's a quick reminder of some of the many features of the latest MF Grounds Care family of products which strengthens their place in the residential and commercial sectors.

- 01** The ultimate choice of side discharge and rear discharge lawn tractors. Models, ranging from 15 hp to 25 hp and cutting widths from 76 cm to 127 cm.
- 02** Simply the best in the business, these racy Massey Ferguson Bull Utility Vehicles offer side by side 2-seater safety, a payload of 400 Kg, the choice of 2 and 4 wheel drive and a cab option to make your Bull experience complete.
- 03** The advanced Synchro™ technology (patents pending) offers an unprecedented Zero Turn experience. Featured in both of the new Zero Turn ride-on mowers; the 127 mm MF 50-24 IZ provides intelligent drive to the rear wheels that synchronises front wheel steering movements with speed and direction of rotation of the rear wheels; and the Front Cut MF 48-22 FMZ which offers maximum manoeuvrability, particularly useful for cutting in awkward or confined spaces.
- 04** Massey Ferguson self propelled walk behind lawn mowers make mowing easier. The new high wheelers provide maximum grip in every location, and whatever the weather. And a choice of cutting widths up to 84 mm's mean large areas can be cut – in very short times.
- 05** Mulch it, bag it, or discharge it, the choice of grass disposal is yours. Most machines offer 3in1 flexibility, but with the added facility on many machines of side and rear discharge, the choices have never been greater.
- 06** Designed with the user in mind the new Massey Ferguson Grounds Care product range offers a comprehensive choice of power matched cutting widths, the latest ergonomics features to make cutting the grass a joy, and every machine is backed by the best dealer network in the industry.
