Server Setup -
Notes: Set up of the server application requires a dedicated computer with a static ip or domain name associated with it. Server is optimized for multiple cores but will run on a single core.
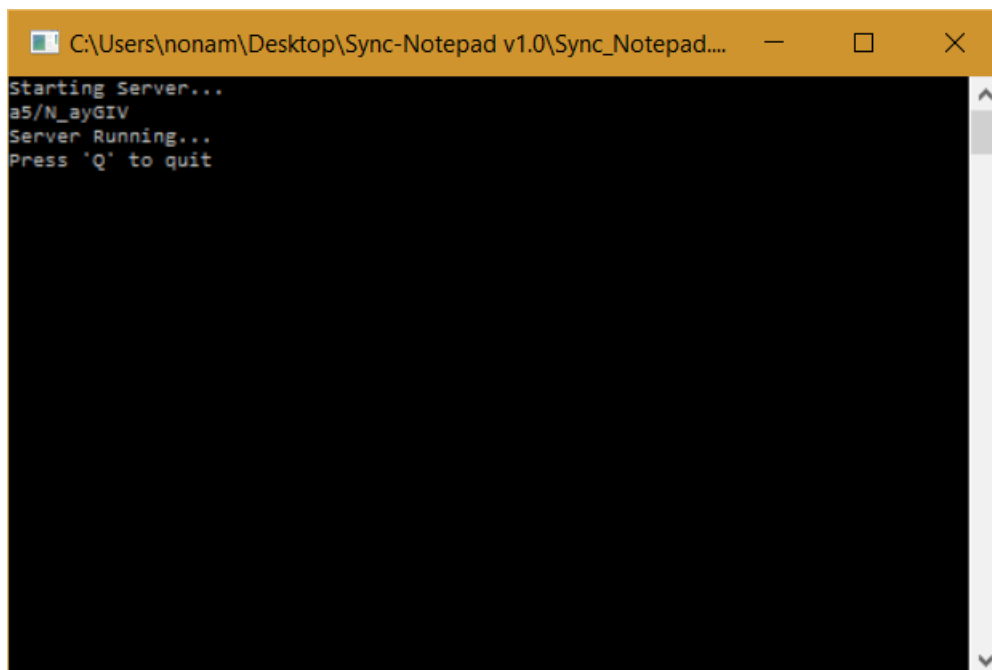

Setup:
1: Unzip the contents of the downloaded zip file.

×

← 📁 Extract Compressed (Zipped) Folders

Select a Destination and Extract Files

Files will be extracted to this folder:

C:\Sync-Notepad v1.0   Browse...

☑ Show extracted files when complete

Extract   Cancel

2. Open Sync_Notepad.exe. The following window should appear. If a window appears asking for network access, click allow.

Admin Setup:

Notes: An admin is needed on the server to confirm users. Once an admin is added they can confirm users as they see fit.

1. Follow the above steps and have the server running.
2. Open the ClientGui.exe
3. Enter the address of the server and login information you want to use.
4. Click the login button and when prompted hit yes. If a window pops up saying "Failed to Connect", check your server address and the machine it is running on.
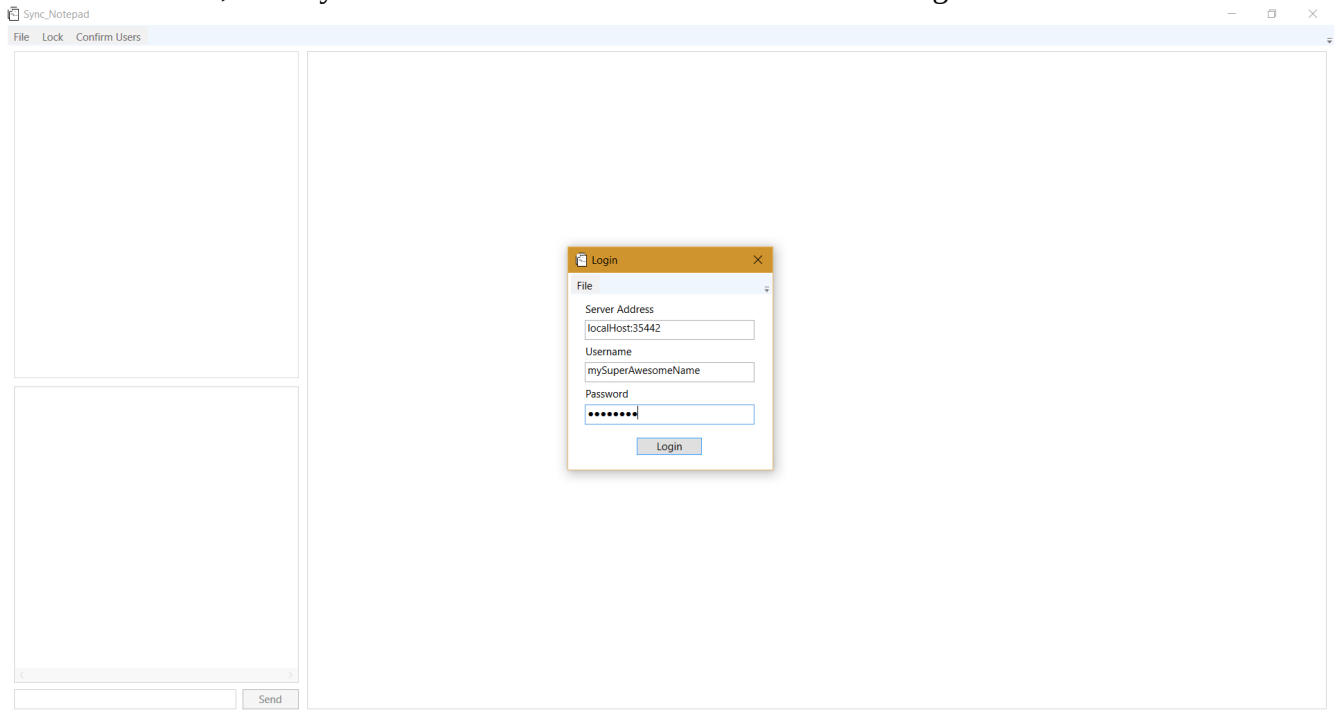

5. Click file and select "Direct login".
6. Enter the password displayed in the server window.
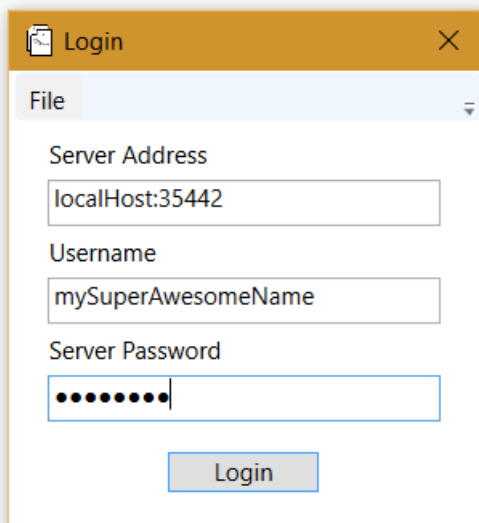

7. Login Normally.

Client Connection
1. Login with the information you want to use.
2. Request an account.
3. Wait for an admin to approve you.
4. Login normally.
