QA Test
1

Your task is to write scenarios in an excel spreadsheet to test the profile photo uploading process on the WalletHub account provided below. Sign in and go to the settings page https://wallethub.com/home/settings/ in order to do so. Create all the possible scenarios that would thoroughly test that the profile photo function is working correctly for a wide diversity of photos.

Be specific with the instructions you provide for your scenarios and provide as much detail as possible so that another tester would be able to follow your instructions without any questions. As you go through the uploading process, you must confirm each time that the image becomes
visible on the profile page, https://wallethub.com/profile/3020219i/

Next to each testing scenario please record if it worked ok and if not what issue you observed.
