About Medcomp

Medcomp® develops, manufactures, markets and supports cutting-edge vascular access devices and accessories to meet the clinical needs of the medical industry, particularly in the fields of interventional medicine and dialysis. Our company's engineering and applications expertise provides superior products whose progressive designs accommodate advances in medicine and whose quality anticipates the requirements of our professional clients and the patients they serve. Currently one of the world's largest manufacturers of dialysis and centrally terminating venous catheters, Medcomp is, and always has been, on the cutting edge of new vascular access device technologies.

Message to the Customers

In everything we do, from research and development to manufacture, packaging, delivery and support, our first consideration is you, the patient. It is vitally important to us that he or she – young or old, indigent or wealthy, chronically ill or seeking a diagnosis or one-time treatment – receives the best that Medcomp can provide. We dedicate ourselves to supplying the highest quality, innovation and customer service with every device we sell.

Our History

Medcomp was founded in 1978 to manufacture and market vascular access catheters for acute hemodialysis. At that time catheter designs were simple, consisting of a single lumen catheter for single-needle dialysis or double lumen catheters for continuous-flow dialysis. As the need for new products grew with the advent of increasingly complex procedures, Medcomp emerged as a premier developer of innovative devices using our in-house staff of engineers working in conjunction with some of the preeminent

physicians in the field of nephrology and vascular access.

Building on our pioneering Tesio®, Split Cath® and Duo-Flow® products, Medcomp continues to dominate the market in both new and proven dialysis, interventional and accessory devices. Today our contributions to the medical devices field total more than 70 product lines and thousands of distinct products, most notably and recently including the Pro-PICC® catheter and Dignity™ ports, which are both CT injectable.

In order to better support our professional clients, we began a successful transition in 2006 from a distributor-based sales system to a direct-sales force populated by highly skilled, clinically trained sales professionals. Medcomp is and will continue to be a stable, financially sound, privately held company wholly dedicated to the satisfaction of patients, its customers and its employees at every level.

Development & Production

Medcomp's reputation and growth can be attributed to our diversely disciplined group of engineers specializing in biomedical, mechanical and electrical engineering, collaboration with esteemed professionals, and readiness to listen to suggestions and comments from members of the medical community. By continually improving on existing technology, Medcomp is able to provide a catheter to suit every medical requirement while also considering the patient's comfort. Patients, physicians and nurses can rely on a Medcomp device to do its job. 

All Medcomp products are developed in accordance with all FDA Quality Systems Regulations, European Medical Device Directives (CE), Japanese GMPI and numerous other international regulations and standards to ensure safety and performance. Medcomp is ISO 13485 certified by KEMA Registered Quality, maintains certification to Annex II as defined in Medical Device Directive 93/42 EEC, and is certified by DNV, Det Norske Veritas, Norway. We are audited regularly.

DUO-FLOW®

FEATURES & BENEFITS

- Thermosensitive polyurethane material softens after insertion for increased patient safety.
- Raulerson IJ Catheter has a unique pre-formed curve that overcomes patient discomfort and significantly decreases the risk for infections, compared with straight catheters.
- Coaxial catheter design allows for improved flow rates and outcomes, when compared with standard double “D” dual lumen catheters.

SOFT-LINE®

FEATURES & BENEFITS

- Soft polyurethane material provides increased flow for improved outcomes.
- 360 degree venous and arterial distal ports decrease vessel turbulence and occlusion while increasing blood flows.
- Soft radiopaque tip reduces incidence of vessel damage and aids in confirming catheter tip placement.

ORDERING INFORMATION & POLICIES

All orders should be directed to Medcomp's Customer service department. Minimum orders should be for full box quantities, accompanied with purchase order number.

Products are shipped via United Parcel Service and are F.O.B. Harleysville in the Continental United States. Express service is also available at the expense of the customer.

Export shipments are shipped air freight to maintain traceability. Should a customer wish air parcel post shipments, Medcomp® will not assume responsibility for lost shipments. All shipments outside of the Continental United States are F.O.B. Harleysville, PA.

Terms

All orders will be billed at prevailing prices at the time of shipment.

Terms are net 30 days for domestic accounts. Outside the U.S., terms are prepayment by wired funds or letter of credit at sight.

Wire funds to: Harleysville National Bank
483 Main Street
Harleysville, PA 19438
215-256-8851
Account # 01-015501

Prices are in U.S. dollars, and are subject to tax, if any. All prices are subject to change without notice.

Return Goods Policy

Return goods must be authorized by Medcomp® prior to return. Medcomp® will accept return of any standard product within 30 days, providing it is undamaged and in original sealed package, and returned prepaid. Custom products are nonreturnable.

Warranty

- Medcomp® warrants its products to be free from defects in workmanship and materials for the period up to and including the expiration date.
- Medcomp® shall not be liable for any incidental, special or consequential loss, damage or expense directly or indirectly arising from the use of its products.
- Liability is limited to replacing, at Medcomp's option, any products which shall under normal use and service appear to the company to have been defective in materials or workmanship.
- Damage to the products through misuse, neglect, or accident voids this warranty.
- No agent, employee or representative of Medcomp® has the authority to bind Medcomp® to any other warranty.
- This warranty is expressly in lieu of any other implied warranties, including any merchantability of fitness and of any other obligation on the part of the seller.
- NOTE: Because of continuing product improvement, prices, specifications, and model availability are subject to change without notice.
