Daikin UK Price List

Update: Valid from 1st January 2017

Residential, Commercial and Industrial

Smith Brothers Stores Ltd

SBS is one of the oldest and largest independent merchants operating from within the U.K. directly focusing on supplying to the commercial and industrial mechanical services sector.

The core business has specialised in the distribution of pipework, valves and all associated fittings for over 100 years. In recent years we were appointed as a Daikin partner dealer and we have complemented this with an extensive air conditioning ancillary range of products. Currently operating from eleven branches, along with a separate Head Office in Leicester, more are planned for the very near future. SBS should be the number one choice for the mechanical services air conditioning contractor who relies on quality of service combined with competitive pricing.

With 100 years of experience, comes expertise and credibility.

Conditions

Capacity Conditions

Unit cooling and heating capacities shown within this price list are based on the following conditions:

Nominal cooling

Ambient = 35°C
Internal = 27°C db 19°C wb

Nominal heating

Ambient = 7°C db 6°C wb
Internal = 20°C db

UK cooling

Ambient = 30°C
Internal = 22°C db 16°C wb

Heat Source

Unless otherwise indicated, all units within this price list are air-cooled.

This digital price book update reflects the planned +4% price increase, as communicated to customers in our letter dated 1 October 2016. Please note that, in order to keep our pricing simple, we have rounded to the nearest pound, therefore the exact price increase may be fractionally different to +4% on individual items.

Seasonal Efficiency

Split and Sky Air

Systems of up to 12kW must now show Seasonal Efficiency Ratings instead of Nominal Efficiency Ratings. These ratings (SEER for cooling, SCOP for heating) represent how effective a system is throughout the year, and are in accordance with EN14825. For more information on Seasonal Efficiency, visit www.daikin.co.uk/seasonal-efficiency

For Daikin UK, this means all our Split and Sky Air products up to 12kW display SEER and SCOP data along with Energy Label information and Annual Energy Consumption of the system. The AEC is based upon 500 hours use per year.

VRV (ESEER)

ESEER is defined as the European Seasonal Energy Efficiency Ratio and is a measure of the performance of the outdoor unit only.

Nominal Efficiency

This measure of efficiency is calculated by dividing the capacity output of a unit by the power required to deliver it. For cooling, this is expressed as EER, for heating as COP.

Nominal Efficiencies are used for systems above 12kW. It is not possible to compare Nominal and Seasonal Efficiency ratings due to the different calculation methods used.

BLUEEVOLUTION

R-32

Ururu Sarara

Daikin extends R32 range even further to include more Splits and Sky Air cassette

Our range of split and Sky Air systems using the next generation of refrigerants offers:

- > Lower global warming potential
- > Higher efficiencies
- > Lower refrigerant charge

Total range now available:

- > Ururu Sarara
- > Emura
- > FTXM High Inverter
- > Multi units
- > Duct for multi applications (FDXM-F)
- > Sky Air Smart HiCOP Cassette

Page 6 - 11

Daikin unique Under Ceiling Cassette is now available for connection to Classic

Allows even more applications to be served by this truly unique product ideal for solid ceilings

Seasonal Classic

Page 33

NEW

FOR 2016

BRC1E53A controller for duty rotation

Duty rotation standby and back-up for IT applications, works with the new indoor units

- > Wall mounted FAQ-C9
- > Ceiling suspended FHQ-CB

Page 49

For VRV and Sky Air

For Split

WI-FI CONTROL VIA APP

Remote App control for VRV and Sky Air – and an upgrade for the Split App

Ideal for customers who want remote control of their air conditioning system, the VRV and Sky Air Wi-Fi adapter ensures customers can return to the perfect environment.

Page 105

Intelligent Tablet Controller – ideal for single and multi-store retail estates or light commercial applications

This cloud based control solution with remote access possibilities enables access to fault controls, off-site control and energy management:

- > Wi-Fi and cloud based control of SkyAir or VRV equipment
- > Connects directly to Daikin DIII-Net protocol
- > Single or Multi-site web interface
- > Web based energy management system

Page 104

NEW
FOR 2016

Increased piping limitations on VRV IV HR

- > Indoor to indoor unit maximum height difference has been increased to 30m to give even more system design flexibility
- > Please ask your sales person to undertake a selection

Page 68

VRV IV Branch selector boxes with pre-fitted valves

To further increase the flexibility of the BS boxes, we are now able to offer the full range of multi BS boxes with valves pre fitted.

- > The benefit of having valves pre-installed on the boxes saves considerable time and effort on site
- > **NEW** indoor units can be added without having to remove refrigerant from the rest of the system, so you can avoid having to pump down / vac out / recharge the whole system and save hours when altering systems

Page 97

Weather proof enclosures for VAM Total Heat Exchangers

If you need to install a VAM unit outside of a building, they need to be weatherproofed as they are designed for installation internally.

We can offer fully weatherproofed housings for the VAM range which are rated IP46 to make them suitable for outdoor installation. The VAM units are fitted into the enclosure and delivered to site for fuss free installation.

Page 111

Daikin UK offer a customised service where we can repaint units to any specified RAL or BS finish

- > Customers sometimes require visible units to be less obtrusive, whether for aesthetic or planning reasons or to meet a specific colour requirement
- > Available for VRV, Split, Sky Air and all other units as required

Page 41 / 69

Strip down and rebuild service – ask for your unit to be dismantled and reassembled for installation in those difficult to access locations

- > Daikin engineers will strip down and package the unit, organise delivery to the kerb-side
- > Daikin engineers will then attend site to rebuild, pressure test, and vacuum and charge the unit ready for connection to the rest of the system

Page 69

NEW
FOR 2016

LT Integrated Hydrobox & DHW (floor standing)

Increases the quality and consistency of installations whilst decreasing the complexity and installation time thanks to the compact integration of all the indoor components in a single enclosure.

Page 123

NEW
FOR 2016

Netatmo for domestic heating

The smart thermostat, available from January 2016, gives homeowners with Daikin Altherma air-to-water heat pumps the option to control their heating temperature via a smartphone app.

Page 138

Industrial refrigeration condensing unit with screw compressor

- > High efficiency inverter controlled compressor, economiser and high performance condenser
- > Easy to install, ready to connect evaporator
- > Capacity up to 450 kW on MT and 170 kW LT (@+32°C)

Page 170

NEW
FOR 2016

Modular AHU with DX or water packaged solution

- > High efficiency fan motors (IE4) and heat recovery exchangers
- > Full VRV IV or ERQ condenser connection compatibility
- > Complete package with integrated controls
- > Monitoring and control through Daikin ITM

Modular Heat Wheel
1200-1500m³/h
Launched

Modular Plate
1200-1500m³/h
Dec 16

Page 190 - 192

NEW
FOR 2016

Aircooled DC inverter screw series – Gen 2 TZ series

- > Introduction of Microchannel coils as standard
- > Compressors with DC electrical motor & Gen 2 Variable Volume Ratio (VVR)

170-700kW
Launched

720-1100kW
Launched

1130-1800kW
April 17

NEW
FOR 2016

Watercooled inverter screw series

- > AC Inverter driven screw compressors
- > Market leading full and partload efficiency in its class (best ESEER level)

450-1800kW
Launched

NEW
FOR 2016

BLDC high static ducted FCU & controller

- > Completes BLDC range line-up – Low, Medium & High pressure
- > Provides wider operating range per model at reduced noise levels
- > **NEW** FWECSA controller with master/slave networking on RS485

450-1800kW
Launched

Another First From Daikin: R32

Reasons for change

There are a number of options for the next generation refrigerant gas, to meet future legislation and reduce the environmental impact of air conditioning, heat pumps and refrigeration. The choices are generally accepted to be R32, R410A, HFO blends, CO₂, and hydrocarbons, including R290 and R600.

Daikin's work with R32

Because of its superior energy efficiency and low GWP, R32 is Daikin's preferred next generation refrigerant for air conditioners and heat pumps. Its first domestic air conditioners using R32 were introduced to Japan in 2012 and there have been sales in excess of 4 million systems since then.

R32 in brief

R32 is already used in HVAC equipment, as it makes up 50% of R410A. It has a global warming potential (GWP) of 675, which is one third that of R410A (2,088).

It's more energy efficient, resulting in a lower refrigerant charge and offering the potential to manufacture smaller units. As a single component refrigerant, it is also easier to reuse and recycle. Like many low GWP refrigerants, R32 is mildly flammable, requiring some new tools and procedures during installation. It is also easier to handle because it doesn't fractionate when being charged as a vapour.

Using R32 in a split system delivers:

- > Lower GWP
- > Higher efficiencies
- > Smaller refrigerant charge

Refrigerant performance

Refrigerant	GWP
R22	1,910
R410A	2,088
R32	675

Daikin products using R32

The 2016 line-up of R32 products has 4 types of split systems. Three are wall mounts, including a brand new FTXM with SEER efficiencies of up to 8.53. We also include a Roundflow cassette: the FCAHG.

Ururu Sarara (FTXZ)

Wall mount (FTXM)

Emura (FTXJ)

Roundflow Cassette (FCAHG)

Daikin now also offer a multi-system on R32 for up to five indoor units. These are connectable to the Emura, FTXM or new slim Ducted R32 multi-fancoil:

- > **Ururu Sarara** (FTXZ) – see page 7
- > **Emura** (FTXJ) – see page 8
- > **Wall mount** (FTXM) – see page 9
- > **Roundflow Cassette** (FCAHG) – see page 11

Installation and equipment

Installation of R32 systems is very similar to R410A systems, although slightly different equipment is required. These include:

- > Gauge manifold
- > Recovery pump
- > Electronic leak tester

These are available from a number of key manufacturers. Please contact your local stockist.

Tooling	R410A	R32
Manifold	Current tool	Different scale
Scale	Current	Current

Features:

- > Complete climate control with dehumidification, ventilation, air purification and heating & cooling in ONE system
- > Very high efficiency solution, thanks to Ururu technology & R32 refrigerant
- > Self cleaning filters ensure optimum air quality & efficiency of operation
- > Infrared remote controller with backlit display, or optional Online Control via smartphone or tablet
- > 3 area intelligent eye ensures air is directed away from people in the room, and switches unit to energy-efficient mode if no-one is detected

Notes:

- All fan coils supplied with infrared remote control ARC477A1
- The supplied humidifying hose is 8m in length
- Minimum ambient operating temperatures:

Features:

- > Designed in Europe, perfect for UK climates, Daikin Emura creates the optimum comfort zone all year round
- > It represents a perfect marriage of style and substance, of form and function, of intelligent heating and efficient cooling
- > Stylish, low-profile design
- > Wireless remote controller with weekly timer: provides a 7-day schedule timer, enabling daily or weekly programming. Up to 4 actions per day possible
- > Night set mode: prevents sudden changes in room temperature by gently adjusting the temperature before the system stops
- > **NEW** Improved titanium apatite photocatalytic air purifying filter: superior purification and deodorisation of the air inside the room
- > 2-area intelligent eye: air flow is sent to a zone other than where the occupants are located at that moment
- > Presence Sensor switches to energy saving mode if room is unoccupied after 20 mins
- > Powerful operation: activates the maximum air volume for 20 minutes before returning to its original setting
- > Fan speed: 5 fan speeds can be selected, high to super low

Notes:

- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with infrared remote controller ARC466A1
- Wired controller, KLIC-DI and RTD-RA options cannot be combined
- Minimum ambient operating temperatures:

	Cooling	Heating

K.CGS	Condensing Unit Guard size 20-35	£223.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Features:

- > Wireless remote controller with weekly timer: provides a 7-day schedule timer, enabling daily or weekly programming. Up to 4 actions per day possible
- > Night set mode: prevents sudden changes in room temperature by gently adjusting the temperature before the system stops
- > Titanium apatite photocatalytic air purifying filter: superior purification and deodorisation of the air inside the room
- > **NEW** Air purification using Flash Streamer technology to remove odour & bacteria
- > 2-area intelligent eye: (35~50 K class) air flow is sent to a zone other than where the occupants are located at that moment
- > Presence Sensor switches to energy saving mode if room is unoccupied after 20 mins
- > Powerful operation: activates the maximum air volume for 20 minutes before returning to its original setting
- > Fan speed: 5 fan speeds can be selected, high to super low

Notes:

- i) All fan coil units standard with auto restart after power failure
- ii) All fan coils supplied as standard with infrared remote controller
- iii) Wired controller, KLIC-DI and RTD-RA options cannot be combined
- iv) Minimum ambient operating temperatures:

Daikin's new Multi Selection Tool is a fast and simple way to select your combinations for MXS Series outdoor units. The online tool has four simple steps:

- > select number of rooms
- > select capacity per room
- > select capacity of outdoor
- > select type of indoor & input pipe run & level difference

It has in-built checks to ensure capacity, pipe length and level difference cannot exceed maximum for selected outdoor unit and generates a report showing full energy label for specific combination and pictures of all equipment selected. This can be used by installers to select Multi systems, and also to show end-users the configuration of the system.

Go to www.daikineurope.com/multiselection

Accessories:

Accessory Ref	Description	Trade Price
BRC7FA532F	Wireless remote controller	£158.00
BYCQ140DG	Roundflow cassette decoration panel with self cleaning filter	£323.00
BYCQ140DW	Roundflow cassette decoration panel - white with white louvers	£167.00
BRYQ140A	Integral PIR Sensor for Roundflow decoration panel. Enables Energy Saving functions	£103.00
KDBHQ55B140	Sealing member for air discharge outlet	£94.00
KDDQ55B140 1&2	Fresh air intake kit for up to 20% fresh air - 2 part kit	£243.00
KRP4A53/UK.FB2	Unit/Group adaptor PCB for remote on/off, status indication and temperature setting	£96.00
RTD-NET/UK.FB2	Modbus Interface PCB for Sky Air and VRV	£198.00
RTD-10/UK.FB2	Enhanced function PCB for Sky Air and VRV. Duty rotation, Lead Lag control and heating interlock	£245.00
RTD-20/UK.FB2	Energy control PCB for Sky Air and VRV	£262.00
KLIC-DI	KNX Interface for Sky Air and VRV systems	£193.00
KRCS01-4	Remote room mounted temperature sensor	£42.00
K.RSS	Wireless room mounted temperature sensor and receiver	£93.00
RS-SE	Service and Configuration Tool for K.RSS	£97.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.CWB140-2	Condensing unit bracket - sizes 100 to 140, max weight 140kg of ODU	£47.00
K.DT2	Condensate drip tray for use with Sky Air ODU - tray width 1100mm	£61.00
K.CGM	Condensing Unit Guard size 42-71	£308.00
K.CGL	Condensing Unit Guard size 100-140 including RXYSQ	£369.00

Features:

- > The FCAHG model is designed for 2014 ErP regulations and has one of the highest COP values on the market
- > The unique 360° radial air pattern ensures uniform air flow and temperature distribution
- > Air flow flexibility: a wide selection of 23 different air flow patterns accessible via remote controller
- > Optional Presence Sensors detects if room is unoccupied and allows temperature to drift to set-back levels
- > Optional Self Cleaning Filter The BYCQ140DG decoration panel can offer energy savings, reduced maintenance time and cost
- > Optional Fresh Air intake (up to 20%) possible
- > Re-use of existing R22 and R407C piping possible
- > Selectable evaporating & condensing temperature for greater operating efficiency (Seasonal Smart)
- > DIII net compatibility as standard

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7FA532F Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with BYCQ140D Decoration panel
- BYCQ140DW / BYCQ140DG Trade prices will be reduced by £148.00 if ordered in place of standard decoration panel
- Minimum ambient operating temperatures:

	Cooling	Heating
RZAG	-15°C	-20°C

Enhanced Capital Allowance (ECA) Scheme

The Enhanced Capital Allowance (ECA) scheme provides businesses with enhanced tax relief for investment in energy-saving equipment that meets specified Government criteria. It allows 100% of the investment to be written off against taxable profit in the year the investment is made.

Daikin now has a website that allows customers to check whether selected equipment is efficient enough to be eligible to claim Enhanced Capital Allowances. Go to www.daikin.co.uk/eca to check:

- > Split
- > Sky Air
- > VRV

The website also allows you to create a Certificate of Eligibility for your equipment selection that can be used to support a claim for ECA.

The Energy Technology List (ETL) is a definitive list of all the products that qualify for the ECA, typically by meeting or exceeding efficiency standards. For DX, the list includes approximately the top 20% most efficient air conditioning systems and is updated regularly to ensure that it includes the most energy efficient products currently available.

Certain types of equipment are listed on the ECA website. To check eligibility of the following equipment types, please go to www.etl.decc.gov.uk/etl/site.htm

- > Biddle Air Curtains (Split and VRV)
- > Ventilation (VAMs)
- > Control Options (RTD20)
- > Chillers

The ETL website should also be used to check equipment eligibility for Split, Sky Air & VRV equipment purchased before August 2014.

Features:

- > Designed in Europe, perfect for UK climates, Daikin Emura creates the optimum comfort zone all year round
- > It represents a perfect marriage of style and substance, of form and function, of intelligent heating and efficient cooling
- > Stylish, low-profile design
- > Wireless remote controller with weekly timer: provides a 7-day schedule timer, enabling daily or weekly programming. Up to 4 actions per day possible
- > Night set mode: prevents sudden changes in room temperature by gently adjusting the temperature before the system stops
- > Titanium apatite photocatalytic air purifying filter: superior purification and deodorisation of the air inside the room
- > 2-area intelligent eye: air flow is sent to a zone other than where the occupants are located at that moment
- > Presence Sensor switches to energy saving mode if room is unoccupied after 20 mins
- > Powerful operation: activates the maximum air volume for 20 minutes before returning to its original setting
- > Fan speed: 5 fan speeds can be selected, high to super low
- > Suitable for multi model applications
- > Re-use of existing R22 and R407C piping possible

Notes:

- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with infrared remote controller ARC466A1
- Wired controller, KLIC-DI and RTD-RA options cannot be combined
- Control option is either hard-wired remote, or Wi-Fi adaptor
- Minimum ambient operating temperatures:

For Comms Rooms & Duty Rotation see page 48 - 49

Accessories:

Accessory Ref	Description	Trade Price
BRC7EB518	Wireless remote controller	£158.00
KRP4A53/UK.FB2	Unit/Group adaptor PCB for remote on/off, status indication and temperature setting	£96.00
RTD-NET/UK.FB2	Modbus interface PCB for Sky Air and VRV	£198.00
RTD-10/UK.FB2	Enhanced function PCB for Sky Air and VRV. Duty rotation, Lead Lag control and heating interlock	£245.00
RTD-20/UK.FB2	Energy control PCB for Sky Air and VRV	£262.00
KLIC-DI	KNX Interface for Sky Air and VRV systems	£193.00
KRCS01-4	Remote room mounted temperature sensor	£42.00
K.R55	Wireless room mounted temperature sensor and receiver	£93.00
RS-SE	Service and Configuration Tool for K.R55	£97.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.CWB140-2	Condensing unit bracket - sizes 100 to 140, max weight 140kg of ODU	£47.00
K.DT2	Condensate drip tray for use with Sky Air ODU - tray width 1100mm	£61.00
K.CGM	Condensing Unit Guard size 42-71	£308.00
K.CGL	Condensing Unit Guard size 100-140 including RXY5Q	£369.00

Features:

- > Fan speed: 3 fan speeds available on all capacities
- > Automatic airflow volume control sets fan speed based on difference between set and room temperatures
- > Dry programme: Daikin's special dry programme reduces humidity in the rooms without variations in internal temperature
- > Comms, computer and server room cooling possible with EDP setting (Seasonal Smart)
- > Selectable evaporating & condensing temperature for greater operating efficiency and application flexibility (Seasonal Smart)
- > DIII net compatibility as standard
- > Seasonally Efficient Inverter Technology gives up to 25% better efficiency than inverter technology
- > Re-use of existing R22 and R407C piping possible. (See R22 Replacement leaflet)
- > Suitable for Twin, Triple and Double Twin applications

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7EB518 Trade price will be reduced by £79.00 if ordered instead of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- Minimum ambient operating temperatures:

K.CGS	Condensing Unit Guard size 20-35	£223.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Features:

- > Radiant Heat panel provides radiator-like warming at the touch of a button
- > Energy efficient units: full range A class energy labels
- > Wireless remote controller provides a 7-day schedule timer, enabling the user to program the air conditioning daily or weekly, with up to 4 actions per day
- > Titanium apatite photocatalytic air purifying filter: superior purification and deodorisation of the air inside the room
- > Powerful operation: activates the maximum air volume for 20 minutes before returning to its original setting
- > Extremely quiet in operation: down to 19dBA sound pressure level
- > Night set mode: prevents any sudden change in room temperature by gently raising/lowering the temperature before the system stops, so you can sleep more comfortably
- > Vertical auto swing system automatically makes the louvers move up and down, creating an even distribution of air through the room to ensure a harmonized temperature
- > Flexible installation: Can be installed against a wall, recessed or standing on the floor (installation leg required, see accessories list). Ideal for installation beneath a window
- > Suitable for multi model applications
- > Re-use of existing R22 and R407 piping possible

Notes:

- All fan coils supplied as standard with infrared remote controller ARC466AZ
- All fan coil units standard with auto restart after power failure
- Wired controller, KLIC-DI and RTD-RA options cannot be combined
- Control option is either hard-wired remote, or Wi-Fi adaptor
- Minimum ambient operating temperatures:

Trade Fan Coil Price	£392.00	£440.00	£478.00	£526.00
Trade Condensing Unit Price	£496.00	£575.00	£722.00	see multi section
Total System Price	£888.00	£1,015.00	£1,200.00	see multi section

Accessories:

Accessory Ref	Description	Trade Price
KRP413A15	Adaptor PCB for remote on/off control - constant/pulse contact	£78.00
KRP928A2S	Adaptor PCB for interface to Daikin centralised control systems	£137.00
KLIC-DD	KNX interface for Split type systems	£171.00
RTD-RA	Adaptor PCB for Modbus connection and/or extended system functions	£157.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.DT1	Condensate drip tray for use with Split ODU - tray width 800mm	£56.00
K.CGS	Condensing Unit Guard size 20-35	£223.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Notes:

- i) All fan coils supplied as standard with infrared remote controller
- ii) Wired controller, KLIC-DI and RTD-RA options cannot be combined
- iii) All fan coil units standard with auto restart after power failure
- iv) Minimum ambient operating temperatures:

	Cooling	Heating
RXS	-10°C	-15°C

Features:

- > Can be installed EITHER as ceiling mounted OR wall unit
- > Vertical auto swing: flaps automatically swing up and down to ensure efficient air and temperature distribution in both floor level and ceiling suspended installation
- > Home Leave setting maintains pre-set temperature during periods of extended absence
- > Night set mode: prevents any sudden change in room temperature by gently raising/lowering the temperature before the system stops
- > Fan speed: 5 fan speeds can be selected, high to super low
- > Suitable for multi model applications
- > Re-use of existing R22 and R407C piping possible

K.CGS	Condensing Unit Guard size 20-35	£223.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Notes:

- Fan-coils supplied with BRC1E53A hard wired remote
- All fan coil units standard with auto restart after power failure
- Fan-coils supplied as standard with air filter
- FNQ-A supplied with 100mm high legs for optional mounting
- Minimum ambient operating temperature:

	Cooling	Heating
RXS	-10°C	-15°C

Features:

- > Requires very little installation space
- > Low height makes it ideal for installation beneath window
- > Connect to multi for residential solution
- > Connect to Sky Air for twin, triple or double applications
- > External static pressure of up to 49Pa

Notes:

- i) All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- ii) All fan coil units standard with auto restart after power failure
- iii) Minimum ambient operating temperatures:

	Cooling	Heating
RZQG	-15°C	-20°C
RZQSG	-15°C	-15°C

Features:

- > Seasonally Efficient Inverter Technology gives up to 25% better efficiency than Inverter Technology
- > Vertical air flow pattern can be adjusted manually to match requirements in different sized interiors or irregularly shaped rooms
- > A wired BRC1E53A remote controller is mounted on the front of the unit (standard)
- > Controllable horizontal air-blow patterns, via remote control
- > Very efficient for use in rooms with high ceilings
- > Fan speed: 2 fan speeds can be selected, high or low
- > Re-use of existing R22 and R407C piping possible
- > Comms, computer and server room cooling possible with EDP setting (Seasonal Smart)
- > Selectable evaporating & condensing temperature for greater operating efficiency (Seasonal Smart)
- > DIII net compatibility as standard

KAFP501A160	Long Life filter for 100, 125 & 140 Class	£155.00

Features:

- > Suitable for ceiling heights of up to 3.8m without loss of capacity
- > Seasonally Efficient Inverter Technology gives up to 25% better efficiency than inverter technology
- > Forced off: The optional forced off enables the unit to switch off automatically, for example when a window is opened
- > Re-use of existing R22 and R407C piping possible
- > Suitable for Twin, Triple and Double Twin applications
- > Comms, computer and server room cooling possible with EDP setting (Seasonal Smart)
- > Selectable evaporating & condensing temperature for greater operating efficiency (Seasonal Smart)
- > DIII net compatibility as standard

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7GAS3 Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- Minimum ambient operating temperatures:

To simplify the order process, you may want to use the Order Code from table below.

Each code includes all products for a system (eg remote controllers, indoor units) & means you no longer need to order individual materials.

Refrigerant	Indoor	Model	Capacity	Order Code	Product Codes Included	List Price

Accessories:

Accessory Ref	Description	Trade Price
BRC7FA532F	Wireless remote controller	£158.00
BYCQ140DG	Roundflow cassette decoration panel with self cleaning filter	£323.00
BYCQ140DW	Roundflow cassette decoration panel - white with white louvres	£167.00
BRYQ140A	Integral PIR Sensor for Roundflow decoration panel. Enables Energy Saving functions	£103.00
KDBHQ55B140	Sealing member for air discharge outlet	£94.00
KDDP55C160-1 (suction chamber)	Fresh air intake kit for up to 20% fresh air - 2 part kit	£243.00
KDDQ55B140-2 (connecting chamber)		
KRP4A53/UK.FB2	Unit/Group adaptor PCB for remote on/off, status indication and temperature setting	£96.00
RTD-NET/UK.FB2	Modbus Interface PCB for Sky Air and VRV	£198.00
RTD-10/UK.FB2	Enhanced function PCB for Sky Air and VRV	£245.00
RTD-20/UK.FB2	Energy control PCB for Sky Air and VRV	£262.00
KLIC-DI	KNX Interface for Sky Air and VRV systems	£193.00
KRCS01-4	Remote room mounted temperature sensor	£42.00
K.RSS	Wireless room mounted temperature sensor and receiver	£93.00
RS-SE	Service and Configuration Tool for K.RSS	£97.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.CWB140-2	Condensing unit bracket - sizes 100 to 140, max weight 140kg of ODU	£47.00
K.DT2	Condensate drip tray for use with Sky Air ODU - tray width 1100mm	£61.00
K.CGM	Condensing Unit Guard size 42-71	£308.00
K.CGL	Condensing Unit Guard size 100-140 including RXYSQ	£369.00

Features:

- > The FCQHG model is designed for 2014 ErP regulations and has one of the highest COP values on the market
- > The unique 360° radial air pattern ensures uniform air flow and temperature distribution
- > Optional Presence Sensors detects if room is unoccupied and allows temperature to drift to set-back levels
- > Optional Self Cleaning Filter The BYCQ140DG decoration panel can offer energy savings, reduced maintenance time and cost
- > Optional Fresh Air intake (up to 20%) possible
- > Suitable for Twin, Triple and Double Twin applications (Smart & Classic)
- > Re-use of existing R22 and R407C piping possible
- > Selectable evaporating & condensing temperature for greater operating efficiency (Seasonal Smart)
- > Dlll net compatibility as standard

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7FA532F Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with BYCQ140D Decoration panel
- BYCQ140DW / BYCQ140DG Trade prices will be reduced by £148.00 if ordered in place of standard decoration panel
- Minimum ambient operating temperatures:

Accessory Ref	Description	Trade Price
BRC7FA532F	Wireless remote controller	£158.00
BYCQ140DG	Roundflow cassette decoration panel with self cleaning filter	£323.00
BYCQ140DW	Roundflow cassette decoration panel - white with white louvres	£167.00
BRYQ140A	Integral PIR Sensor for Roundflow decoration panel. Enables Energy Saving functions	£103.00
KDBHQ55B140	Sealing member for air discharge outlet	£94.00
KDDP55C160-1 (suction chamber)	Fresh air intake kit for up to 20% fresh air - 2 part kit	£243.00
KDDQ55B140-2 (connecting chamber)		
KRP4A53/UK.FB2	Unit/Group adaptor PCB for remote on/off, status indication and temperature setting	£96.00
RTD-NET/UK.FB2	Modbus Interface PCB for Sky Air and VRV	£198.00
RTD-10/UK.FB2	Enhanced function PCB for Sky Air and VRV. Duty rotation, Lead Lag control and heating interlock	£245.00
RTD-20/UK.FB2	Energy control PCB for Sky Air and VRV	£262.00
KLIC-DI	KNX Interface for Sky Air and VRV systems	£193.00
KRCS01-4	Remote room mounted temperature sensor	£42.00
K.RSS	Wireless room mounted temperature sensor and receiver	£93.00
RS-SE	Service and Configuration Tool for K.RSS	£97.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.DT1	Condensate drip tray for use with Split ODU - tray width 800mm	£56.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7FA532F Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with BYCQ140D Decoration panel
- BYCQ140DW / BYCQ140DG Trade prices will be reduced by £148.00 if ordered in place of standard decoration panel
- Minimum ambient operating temperatures:

	Cooling	Heating
RXS	-10°C	-15°C

Features:

- > FCQG is a compact cassette designed to suit installation in narrower ceiling voids
- > The unique 360° radial air pattern ensures uniform air flow and temperature distribution
- > Air flow flexibility: a wide selection of 23 different air flow patterns accessible via remote controller
- > Optional Presence Sensors detects if room is unoccupied and allows temperature to drift to set-back levels
- > Optional Self Cleaning Filter: The BYCQ140DG decoration panel can offer energy savings, reduced maintenance time and cost
- > Suitable for Twin, Triple and Double Twin applications
- > Re-use of existing R22 and R407C piping possible
- > DIII net compatibility as standard

K.CGL	Condensing Unit Guard size 100-140 including RXY5Q	£369.00

Features:

- > The 4-way blow under ceiling cassettes are the ideal solution for rooms, shops or offices without false ceilings
- > Seasonally Efficient Inverter Technology gives up to 25% better efficiency than inverter technology
- > Air flow flexibility: air can be discharged in any of 4 directions. Possibility to shut off 1 or 2 flaps enabling the unit to be installed in a corner or small room
- > 3 step fan-speed
- > Suitable for Twin, Triple and Double Twin applications
- > Re-use of existing R22 and R407C piping possible
- > Comms, computer and server room cooling possible with EDP setting
- > Selectable evaporating & condensing temperature for greater operating efficiency

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC7C58 Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- Minimum ambient operating temperatures:

Features:

- > Installed into suspended ceiling grids without cutting surrounding tiles
- > Home Leave setting maintains pre-set temperature during periods of extended absence
- > Dry programme: Daikin's special dry programme reduces humidity in the rooms without variations in internal temperature
- > Vertical auto-swing function: flaps automatically swing up and down to ensure efficient air and temperature distribution which also prevents ceiling soiling
- > 3 fan speeds can be selected: high, medium and low
- > Suitable for Twin, Triple and Double Twin applications. Also suitable for multi model applications
- > Re-use of existing R22 and R407C piping possible

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- Infrared remote Trade price will be reduced by £79.00 if ordered instead of BRC1E53A
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with BYFQ60CW White fully flat decoration panel
- Minimum ambient operating temperatures:

UK.SAF5	Supply air plenum for FDXS25/35F (2 x 150mm spigots)	£70.00
UK.SAF7	Supply air plenum for FDXS60F & FDXS50F (4 x 150mm spigots)	£88.00
UK.RC2	Return air plenum for FBQ35D / FBQ50D (2 x 200mm spigots)	£82.00
UK.RC3	Return air plenum for FBQ60D (2 x 200mm spigots)	£89.00
UK.RC3A	Return air plenum for FBQ60D (3 x 200mm spigots)	£97.00
UK.RAC5	Return air plenum for FDXS25/35F (2 x 150mm spigots)	£79.00
UK.RAC7	Return air plenum for FDXS60F & FDXS50F (4 x 150mm spigots)	£101.00
K.CWB90-2	Condensing unit bracket - up to size 71, max weight 90kg of ODU	£37.00
K.DT1	Condensate drip tray for use with Split ODU - tray width 800mm	£56.00
K.CGS	Condensing Unit Guard size 20-35	£223.00
K.CGM	Condensing Unit Guard size 42-71	£308.00

Notes:

- i) FBQ & FDXS fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
 - ii) BRC4C65 Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
 - iii) All fan coil units standard with auto restart after power failure
 - iv) All fan coils supplied as standard with air filter
 - v) Minimum ambient operating temperatures:
- | | Cooling | Heating |
|-----|---------|---------|
| RXS | -10°C | -15°C |

- vi) The FBQ35D fan coil requires a separate 1ph power supply. Refer to install manual for details

Features:

- > Fan speed: 5 fan speeds can be selected, high to super low
- > Connection to multi outdoor possible
- > Re-use of existing R22 and R407C piping possible

Built in DC Ducted – Seasonal Smart

K.CGM	Condensing Unit Guard size 42-71	£308.00
K.CGL	Condensing Unit Guard size 100-140 including RXY5Q	£369.00

Features:

- > New chassis with height of 245mm makes the FBQ-D one of the slimmest medium static ducted units on the market
- > Increased external static pressure up to 150 Pa
- > Flexibility to set the required fan curve manually or to automatically select the correct fan curve, assuring comfort at all times
- > Top efficiency, highest Energy label ranking in the market

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC4C65 Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with air filter
- Minimum ambient operating temperatures:

K.CGL	Condensing Unit Guard size 100-140 including RXYSQ	£369.00

Features:

- > High static units for longer ducted runs
- > Up to 250Pa External Static Pressure
- > Auto balancing air flow / ESP on commissioning
- > Comms, computer and server room cooling possible (Seasonal Smart only)
- > Super inverter technology: reduces power consumption by up to 70% compared to non inverter units
- > Selectable evaporating & condensing temperature for greater operating efficiency (Seasonal Smart only)

Notes:

- All fan coils supplied as standard with BRC1E53A wired remote controller with 7-day time clock
- BRC4C65 Trade price will be reduced by £79.00 if ordered in place of the BRC1E53A
- Replacement technology not applicable to RZQ200 and RZQ250**
- All fan coil units standard with auto restart after power failure
- All fan coils supplied as standard with air filter
- Minimum ambient operating temperatures:

	Cooling	Heating
RZQG	-15°C	-20°C
RZQSG	-15°C	-15°C
RZQ	-5°C	-15°C

- FDQ Fan Coil unit requires a separate 15 amp power supply

To simplify the order process, you may want to use the Order Code from table below.

Each code includes all products for a system (eg remote controllers, indoor units) & means you no longer need to order individual materials.

Indoor	Model	Capacity	Order Code	Product Codes Included	List Price

Multi Series

Multi Series Inverters offer the ability to connect up to five fan coils to one outdoor unit. With the MXS range it is possible to install indoor units throughout a house or small commercial premises and only use one outdoor unit. Each indoor unit will have its own controller and will be able to operate in heating or cooling.

Daikin's new Multi Selection Tool is a fast and simple way to select your combinations for MXS Series outdoor units.

The online tool has four simple steps:

- > select number of rooms
- > select capacity per room
- > select capacity of outdoor
- > select type of indoor & input pipe run & level difference

It has in-built checks to ensure capacity, pipe length and level difference cannot exceed maximum for selected outdoor unit and generates a report showing full energy label for specific combination and pictures of all equipment selected. This can be used by installers to select Multi systems, and also to show end-users the configuration of the system.

Notes:

- Accessories for fan coils - refer to pair system pages
- All fan coil units standard with auto restart after power failure
- All fan coil units supplied as standard with remote controller
- FDXS fan coil units supplied as standard with air filter
- 2MXS40-50H can only be used with FTXG, FTXS, FTX, FDXS, FVXG, FVXS, FLXS, FNQ, FFQ-C fan coil units
- One wifi adaptor per fan coil for online control

Painted Units

Customers sometimes require visible units to be less obtrusive, whether for aesthetic or planning reasons.

Daikin UK offer a customised service where we can repaint our units to any specified RAL or BS finish. Our repainting service is done in house in our purpose built facility and includes removing base paint to give a uniform, long lasting and professional finish. We have repainted fan coils, decoration panels, BS boxes and all types of condensers for a number of clients.

PRICE ON APPLICATION

Lead time: 2-3 weeks

Applicable units: All

When asking for a quotation or ordering, please state the unit you require along with the finish requirements e.g. colour, pattern etc.

Please note:

The stated lead times are a guide, this can be influenced by the design and complexity of the requirement.

VRV IV S-Series RXYSQC-T

VRV IV Condensing Unit – Low Height Compact Mini VRV

Outdoor Units			RXYSQC4TV1	RXYSQC5TV1
Capacity	Nominal Cooling	kW	12.1	14.0
	Nominal Heating	kW	12.1	14.0
Power Input 50Hz	Cooling	kW	3.43	4.26
	Heating	kW	3.18	3.91
EER			3.53	3.29
COP			3.81	3.58
Dimensions	Height x Width x Depth	mm	823 x 940 x 460	
Weight		kg	94	94
Refrigerant Circuit	Refrigerant Type		R410A	
Sound Pressure (Nom)	Cooling	dBA	51	52
Sound Power (Nom)	Cooling	dBA	68	69
Maximum No of Connectable Units			8	10
Electrical Details	Power Supply	Phase / Hz / V	1 / 50 / 230	
	Running Current	amps	19.0	
	Starting Current	amps	4	
	Fuse Rating	amps	32	
Piping Limits	Total Piping length	m	300	
	Maximum Length	m	70 (90 equivalent)	
	Maximum Vertical Rise	m	30	
Piping Connections	Liquid	inch (mm)	3/8 (9.5)	3/8 (9.5)
	Gas	inch (mm)	5/8 (15.9)	5/8 (15.9)
Capacity Index Limit			50~130	62.5~162.5
Trade Condensing Unit Price			£2,561.00	£2,878.00

Features:

- > New low height Mini VRV, making complying with planning restrictions in towns and cities easier
- > Compact – Only 823mm high
- > Lightweight – for simple installation
- > Variable Refrigerant temperature – Enhanced efficiency
- > In addition to VRV fan coils, low height Mini VRV is connectable to: Stylish indoor units – Emura and Nexura – as well as Air Handling Units and Biddle Air curtains
- > Single phase

BPMK

Mini VRV for Residential Applications

- > Multi Series Inverters can connect up to five indoor units from across the split range
- > Up to nine indoor units can be connected to a single Mini-VRV outdoor unit. To allow connection of the split indoor units, the system will need two or three port BPMK boxes
- > BPMK boxes open up the full range of split indoor unit style – from the stylish Emura to the radiant heat of the Nexura
- > For full details of the expanded range of capacities in the Mini-VRV range, including the new low height S series, refer to page 70

Daikin's range of split indoor units			BPMKS967A2	BPMKS967A3

RZQ-C	Three Phase	-	-	-	-	20amp	20amp

Note:

Max fuse size based on current price list series indoor units. Refer to data-book for more details.

R-410A

Infrastructure Cooling

Server rooms & IT applications have some key differences to comfort cooling applications.

Daikin has developed specific infrastructure cooling equipment to ensure efficient, reliable 24 hour cooling – now with ErP compliant Energy Labels.

Comfort cooling

- Humidity is present
- Balanced sensible and latent capacity

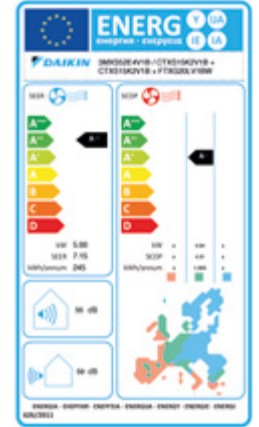

- > 60-70% temperature control
- > 30-40% humidity control

Infrastructure cooling

- No or limited humidity
- Pure sensible capacity

- > 80-90% temperature control
- > 10-20% humidity control

How do comfort systems perform in infrastructure cooling applications?

TRADITIONAL SOLUTION

Symmetric indoor-outdoor system combination

- Relative Humidity: ■ reduces over time
- Capacity: ■ reduced
- Evaporating temp: ■ drops to compensate reduced capacity
- too low Te can lead to freeze-up prevention, causing system downtime

DEDICATED SOLUTION

Boosted capacity indoor system combination

improved solution

- 👍 Boosted capacity indoors increase the heat transfer capacity at low relative humidity
- 👍 Allows the system to operate with higher Te, guaranteeing continuous operation and reducing unwanted dehumidification

Between 20-40% sensible capacity increase

Infrastructure cooling systems, with larger capacity indoor units can deliver higher sensible capacities

	Comfort Cooling	Infrastructure Cooling	Comfort Cooling	Infrastructure Cooling	Comfort Cooling	Infrastructure Cooling
Nominal Capacity	6.8kW	6.8kW	9.5kW	9.5kW	13.5kW	12.0kW
Comfort Cooling Pairing	71 / 71	71 / 100	100 / 100	100 / 140	125 / 125	125 / 140
Indoor	FAQ71C9	FAQ100C9	FHQ100CB	FHQ140CB	FHQ125CB	FHQ140CB
Outdoor	RZQG71L9V1	RZQG71L9V1	RZQG100L9V1	RZQG100L9V1	RZQG125L9V1	RZQG125L9V1
22°C set point / 11°C WB (35% RH) <25°C ambient Total Capacity / Sensible Capacity	n/a	6.02 / 6.02	n/a	7.48 / 7.48	n/a	9.34 / 9.34
Sensible Ratio	n/a	100%	n/a	100%	n/a	100%
22°C Set point / 16 WB (54% RH) 30°C ambient Total Capacity / Sensible Capacity	7.76 / 5.32	7.8 / 5.71	10.8 / 7.44	9.70 / 7.54	13.6 / 9.3	12.12 / 9.00
Sensible Ratio	69%	73%	69%	78%	68%	74%

Daikin's infrastructure cooling solution can deliver pure sensible capacity in low relative humidity applications.

The solution uses indoor units of larger capacity than outdoor units, all with ErP Energy Labels.

To make selection simple, tables are available showing total & sensible capacity at:

- > Ambient range in cooling from -15°C to +40°C
- > Dry bulb temperature range from 16°C to 27°C
- > Wet bulb temperature range from 11°C to 16°C

For selection advice & capacity tables, please talk to your local Daikin office.

Sky Air – Duty Rotation

In a infrastructure cooling application, it is normal to have a standby air conditioning unit(s). The standby unit will automatically operate in the event of a fault with one of the duty units. It is also normal to rotate the operation of the duty and standby units to ensure equal use of all units.

NEW BRC1E53A Remote Controller

Daikins' latest generation of hard wired remote controller now supports automatic duty rotation and standby operation on fault.

- > One controller for up to 16 systems
- > Programmable duty rotation changeover period
- > Automatic operation of standby unit on fault

Model	Description	Related Fan Coil	Trade Price
BRC1E53A	Premium wired remote controller with duty rotation function	FBQ-D, FAQ-C9, FHQ-CB	£79.00

RTD-10 Interface

A single interface per group to carry out automatic duty rotation and standby operation on fault or high temperature.

- > Programmable duty rotation changeover period
- > Automatic operation of standby unit on fault and fixed high temperature
- > Dual level alarm volt free contact output

Model	Description	Related Fan Coil	Trade Price
RTD-10	Control interface with duty rotation function	All units with P1/P2 interface*	£219.00

Automatic Changeover

A single control panel to carry out automatic duty rotation and standby operation on fault or high temperature.

- > 24hr duty rotation changeover period
- > Automatic operation of standby unit on fault and adjustable high temperature
- > Visual indication of unit status
- > Fire alarm & condense pump interlocks
- > Volt free contact alarm output
- > Built-in remote controllers and interface PCBs

Model	Description	Related Fan Coil	Trade Price
UK.PANEL 2SKYAIR	Changeover panel for 2 SkyAir systems	All units with P1/P2 interface*	£1,801.00
UK.PANEL 3SKYAIR	Changeover panel for 3 SkyAir systems	All units with P1/P2 interface*	£2,084.00
UK.PANEL 4SKYAIR	Changeover panel for 4 SkyAir systems	All units with P1/P2 interface*	£3,354.00

* All SkyAir units, all VRV units and some Split units. For Split units check exact unit specification for compatibility

R-410A

CYQS/M/L - DK - F/C/R

Air curtains are the ideal solution to combat the issue of climate separation across retail outlets or office doorways.

In conjunction with Biddle, Daikin ERQ heat pump air curtain solution combines the benefits of the Biddle air curtain technology with the benefits of Daikin ERQ heat pump inverter technology.

Using a combination of rectifier technology, air velocity and temperature control, Daikin ERQ heat pump air curtains deliver greater comfort to staff and customers alike, all year round, in all weathers.

BIDDLE AIR CURTAINS & ERQ PAIRS ARE LISTED ON ECA –
For product listing refer to: <https://etl.decc.gov.uk/etl/site/etl.html>

Features and benefits:

- > Energy savings up to 72% compared with electric air curtains
- > Short payback times – less than 1.5 years
- > Wide capacity range for maximum application potential plus flexible control options
- > R-410A refrigerant, single and 3 phase
- > Wide operation range: -20~15.5°C in heating
- > Air curtain rectifier technology – deep penetrating airstream
- > Constant air velocity technology – all year round efficiency
- > European patent
- > 1.0, 1.5, 2.0 and 2.5 metre door widths
- > Door heights of up to 3.7 metres
- > Choice of colour RAL9010:White or RAL9006:Grey

Biddle Comfort air curtain range

Selection

- 1) Use the Door Height graph to determine the Air Curtain size relevant to your application
- 2) When you know the size (S/M/L), refer to specific tables to select the model for your required door width
- 3) Select outdoor unit to pair door curtain, based on efficiency and power source

R-410A

Central Ducted Solutions

For central ducted distribution systems Daikin has the solution for providing cooling and heating of the air, enabling optimal comfort and efficiency.

Even without the benefit of individual room control, the system can provide a flexible energy saving answer over traditional methods through the incorporation of inverter control and heat pump technology.

The following pages include Packaged Heat Pump Rooftop systems, with optional economisers, to heat pump condensing units and connection kits for use with other manufacturers heating and cooling coils.

R-410A

Air Cooled Heat Pump Inverter Condensing Unit Kit for DX Coil

A range of R410A inverter condensing units for application with air handling units:

- > Inverter controlled heat pump units
- > Large capacity range (from 6.3 to 61.6 kW)
- > Ventilation and air conditioning in 1 solution
- > EKEXV-kit & control boxes are designed for outdoor installation and can be wall mounted
- > Per EKEXV-kit/control box, only 1 air handling unit coil can be connected
- > Outdoor unit operation range: -5°CDB ~ 43°CDB in cooling
- > For connectivity to VRV IV systems, please consult with your local Daikin representative

Flexible control possibilities:

Control w:

Full external control from 3rd party temperature controller with volt free remote enable contact and linear variable capacity control output (3rd party DDC Controller required).

Control y:

External control from 3rd party temperature controller with volt free remote enable contact. Fixed evaporating temperature selection, range: +3°C to +10°C.

Control z (BRC1D52 required):

Control via Daikin BRC1D52 remote controller and return air or remote sensor (KRCS01-1 optional). A volt free remote enable contact is required to confirm fan operation status. For re-circ applications only.

Features:

ERAD-E are a range of cooling only R134a condensing units for pair application with air handling units

- > Large capacity range 100 kW to 410 kW
- > Superior control logic using the new MicroTech III controller

- > Single circuit units
- > Screw compressor with capacity control down to 25%
- > Available in both standard and low noise configurations

Please contact your sales office for further information on these products

ii) Supplied with removable feet

Hot Water Generation – VRV Heat Pump Systems

Producing hot water from a heat pump system provides extremely low cost heating and cooling of water. Temperatures between 5°C to 45°C can be achieved allowing water temperature control for multiple applications without the need for a separate system.

HXY-A8

Features and benefits:

- > Highly efficient space heating/cooling
- > Air to water connection to VRV for applications such as underfloor, AHU, low temperature radiators
- > Leaving water temperature range from 5°C to 45°C without electric heater
- > Super wide operating range for cold/hot water production from -20°C to +43°C ambient outdoor temperature
- > Saves time on system design as all water-side components are fully integrated with direct control over leaving water temperature
- > Saves space with contemporary wall hung design
- > Requires no gas connection or oil tank

- Liquid pipe
- Gas pipe
- Hot/cold water

Indoor unit				HXY080A8	HXY125A8

Trade Unit Price				£1,520.00	£2,132.00

Hot Water Generation – VRV Heat Recovery Systems

Producing hot water from a heat recovery VRV system is one of the most energy efficient means of providing hot water within a building. We can provide high and low temperature hot water for bathrooms, wash basins, underfloor heating, radiators and even provide heated water for air handling unit applications.

HXHD-A8 (High temperature)

HXY-A8 (Low temperature)

Using waste heat to provide hot water means you can provide an additional service to your building from the heat recovery VRV system at very low cost.

Features and benefits:

For both low temperature and high temperature

- > Uses heat pump technology to produce hot water efficiently, providing up to 17% savings compared to a gas boiler
- > Saves time on system design as all water-side components are fully integrated with direct control over leaving water temperature
- > Requires no gas connection or oil tank

For low temperature

- > Highly efficient space heating/cooling
- > Leaving water temperature range from 5°C to 45°C without electric heater
- > Super wide operating range for cold/hot water production from -20°C to +43°C ambient outdoor temperature
- > Saves space with contemporary wall hung design

For high temperature

- > Possibility to connect thermal solar collectors to the domestic hot water tank
- > Leaving water temperature range from 25°C to 80°C without electric heater
- > Various control possibilities with weather dependant set point or thermostat control

*PB for pressurised solar, B with drainback solar.

EKFMAHTB	Option for stand alone tank (ie not mounted on top of hydrobox)	£289.00

Notes:

- i) Hydroboxes are connectable to the following outdoor series only: Air Cooled Heat Recovery REYQ-T (see page 80-83)
- ii) Hydroboxes are inclusive of integral expansion vessel and pump

Air curtains are the ideal solution to combat the issue of climate separation across retail outlets or office doorways.

In conjunction with Biddle, Daikin VRV IV heat recovery air curtain solutions combines the benefits of the Biddle air curtain technology with the benefits of Daikin VRV IV heat recovery.

Using a combination of rectifier technology, air velocity and temperature control they deliver greater comfort to staff and customers alike, all year round, in all weathers.

Easy and fast installation of these systems not only reduces costs but makes expensive water systems, boilers and gas connections redundant. Integrating a Biddle air curtain with Daikin VRV also eliminates the need to install multiple outdoor units thereby reducing installation time and costs further. This combination enables Daikin to offer its customers the ultimate environmentally conscious TOTAL SOLUTION PACKAGE comprising cooling, heating, outdoor-indoor climate separation and fresh air ventilation.

Some air curtains may be ECA compliant please see ECA website for details www.daikin.co.uk/ECA

Features and benefits:

- > Provides virtually free air curtain heating via recovered heat from indoor units in cooling mode
- > Connection to the high COP heat recovery system enables COP's of up to 4.36
- > Short payback times – less than 3 years
- > Air curtain rectifier technology – deeply penetrating airstream
- > Constant air velocity technology – all year round efficiency
- > European patent
- > 1.0, 1.5, 2.0 and 2.5 metre door widths
- > Door heights of up to 3.7 metres
- > Choice of colour RAL9010:White or RAL9006:Grey

F = Free hanging model

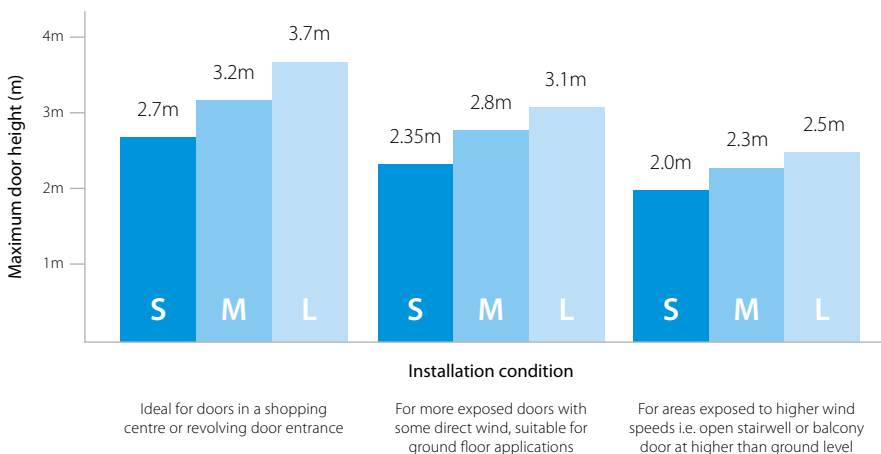

C = Cassette model

R = Recessed model

Biddle Comfort air curtain range

Selection

- 1) Use the Door Height graph to determine the Air Curtain size relevant to your application
- 2) When you know the size (S/M/L), refer to specific tables to select the model for your required door width

KRCS01-1	Remote room mounted temperature sensor	£48.00
RTD-20/UK.FB2	Energy control PCB for Sky Air and VRV	£262.00

*2: Mounting Height at base of door curtain air outlet F = Free Hanging / C = Cassette / R = Recessed

Notes:

- Biddle Remote Controller and connection cable included for Fan Speed Control
- If RTD-20 Connected in Air Curtain mode the Biddle Remote Controller is NOT connected as Fan speed is managed by RTD-20
- Code "BC" is for white finish. Aluminium finish "SC" available on request

The VRV Total Solution

Many buildings today typically operate quite separate systems for heating, cooling, refrigeration and hot water. As a result, a huge amount of energy is wasted. To provide a much more efficient alternative, VRV technology has been developed into a total solution for heating, cooling, refrigeration and ventilation.

The VRV total solution

Air conditioning, refrigeration and cooling IT servers can generate waste heat that can be reused to heat and ventilate other areas of the building or to provide hot water for wash rooms, at a much reduced cost.

By understanding the whole building's heating and cooling needs at the outset, an integrated climate control solution can be delivered that offers much higher energy efficiency levels, thus reducing the carbon impact of a building. This means that all internal and external conditions must be taken into account in the design of the climate control system.

NEW

Extended piping range

- > Increased efficiency and versatility.
- > VRV IV Heat Recovery systems have received an upgraded piping capability which allows fan coils to be spread over 10 floors on the same system.
- > Now it is possible to have up to 30m height separation between indoor units, allowing even more versatility than ever before and allowing heat recovery between more floors.

Piping Rules	Heat Recovery	Heat Pump	Mini Compact	Mini Standard	Mini Extended	VRVQ	VRV-W
	8-54 hp	8-54 hp	4, 5 hp	4, 5, 6 hp	8, 10, 12 hp	8-48 hp	8-30 hp
Maximum pipe length from Condenser to furthest indoor unit	165m	165m	70m	120m	100m	120m	120m
Maximum distance from 1st Refnet joint to furthest fan coil	90m	90m	40m	40m	40m	40m	90m*
Maximum total pipework length (VRV Fan coils)	1000m	1000m	300m	300m	300m	300m	300m
Maximum difference from indoor unit to its own refnet	40m	40m	40m	40m	40m	40m	40m
Maximum Height difference between Outdoor and Indoor	90m	90m	30m	40-50m*	40-50m*	40-50m*	40-50m*
Maximum Height difference between indoor units	30m	30m	15m	15m	15m	15m	15m

Note:
 * 40m if condenser is below indoors - 50m if condenser above indoors
 Not all limitations are shown for every combination of indoor units
 Some limitations cannot be used together on the same system
 Some limitations require approval
 Please contact Daikin UK for more details on pipework design

VRV Services

Strip Down and Rebuild

Our Strip and Rebuild Service offers you the benefit of time and cost savings, as it means that you can have VRV outdoor units delivered to site in portable components, so they can be transported to the roof without the need for cranes or applying for road closure permissions.

PRICE ON APPLICATION

Lead time: 3 weeks

Applicable condensers: VRV, CVP, Zeas

When asking for a quotation or ordering, please state the unit you require and also that you require the strip and rebuild service.

How it works:

- > Our engineers will strip down and package the components securely in a purpose built container at our workshop
- > We then organise delivery to the kerb-side on site where the contractor can unload, lift and manoeuvre the units into place
- > Our engineers will then attend site to rebuild, pressure test, and vacuum and charge the unit with refrigerant ready for connection to the rest of the system
- > If the unit is to be kept on site for any period of time, please ensure the container is kept dry and is not opened.

Painted Units

Customers sometimes require visible units to be less obtrusive, whether for aesthetic or planning reasons.

Daikin UK offer a customised service where we can repaint our units to any specified RAL or BS finish. Our repainting service is done in house in our purpose built facility and includes removing base paint to give a uniform, long lasting and professional finish. We have repainted fan coils, decoration panels, BS boxes and all types of condensers for a number of clients.

PRICE ON APPLICATION

Lead time: 2-3 weeks

Applicable units: All

When asking for a quotation or ordering, please state the unit you require along with the finish requirements e.g. colour, pattern etc.

Please note:

The stated lead times are a guide, this can be influenced by the design and complexity of the requirement.

Features:

- > New low height Mini VRV, making complying with planning restrictions in towns and cities easier
- > Compact – only 823mm high
- > Lightweight – for simple installation
- > Variable Refrigerant temperature – enhanced efficiency
- > In addition to VRV fan coils, low height Mini VRV is connectable to: Stylish indoor units – Emura and Nexura – as well as Air Handling Units and Biddle Air Curtains
- > Single phase

Planning issues for small commercial or residential projects in towns and cities can now be easy to overcome with a Low height version of the mini VRV range, available in 4 & 5hp with Variable Refrigerant Temperature. Connectable to products such as Air Curtains, Air Handling Units and the Emura and Nexura fan coils, the Low height Mini VRV range brings a whole new level of versatility to the VRV range.

Daikin VRV IV S-series units can be installed discreetly on a balcony thanks to their compact dimensions, offering you air conditioning while being almost unnoticeable.

Technologies

VRV IV S-series

Features

Super aero grille

The spiral shaped ribs are aligned with the direction of discharge flow in order to minimise turbulence and reduce noise.

Improved fan blades

Refrigerant-cooled PCB

- > Reliable cooling because it is not influenced by ambient air temperature
- > Smaller switchbox for smoother air flow through the heat exchanger increasing heat exchange efficiency with 5%

Compressor

- Swing type > **no oil separator**
- Vane & rotor are unified resulting in:
- > Reduced noise level
 - > Longer compressor life
 - > Higher efficiency

E-Pass heat exchanger

Optimising the heat exchanger's path layout prevents heat being transferred from the overheated gas section to the sub-cooled liquid section which is a more efficient way to use the heat exchanger.

I-demand function

Limit maximum power consumption. The newly introduced current sensor minimizes the difference between the actual power consumption and the predefined power consumption.

Features:

- > High capacity up to 33.5kW nominal cooling
- > Horizontal blow casing
- > Variable Refrigerant Temperature
- > Connection to stylish split fan coils
- > Compact installation – reduction in floor space
- > Available in 8, 10 & 12 hp

Planning requirements in built up areas require increasingly more innovative products to overcome restrictions, especially on visibility of plant.

By having a smaller footprint and weight than its big brother, the extended high capacity Mini VRV range is easier to hide and can help to maximise the lettable floor area on a design.

Mini VRV systems deliver VRV performance in a small, convenient package by offering a compact, horizontal blow, air conditioning solution for projects with lower capacity requirements or where discretion is required due to the planning or aesthetic requirements of the application.

Daikin are pleased to announce that Mini VRV systems have received a complete redesign, and with this extension to the range which includes new features to increase performance, convenience and flexibility, Mini VRV from Daikin will become an even more popular choice for residential and smaller capacity Air conditioning applications.

8 hp

VRV IV Condensing Unit – For Indoor Installation

The VRV IV i-series is a truly unique solution for installations where you want a completely invisible solution. The system is installed entirely indoors and only the grilles are visible. So it's ideal for urban environments, where space and planning restrictions are especially challenging.

A cost effective solution

Even when it is possible to install an outdoor unit, there are reasons that an indoor installation offers a better solution, such as in areas where there is a mixture of commercial and residential use.

With the VRV IV i-series, the units are effectively invisible because they are installed indoors. Thanks to their low operating sound, they are highly suited to densely populated areas such as city centres – and dedicated modes reduce sound further to comply with inner-city noise regulations, so there is no need for costly sound insulation.

Nor is there any need to use a crane for installation on the roof or back of the property as the unit comes in two parts, making the VRV IV i-series easier and more cost effective to install.

The VRV IV i-series offers:

- > A unique VRV indoor solution: the 'outdoor' air conditioning unit can now be fitted indoors
- > Connection with up to 10 indoor units
- > Seamless integration into surrounding architecture
- > Total flexibility for any shop location and building type
- > Easy compliance with planning regulations, the best solution for urban locations
- > A total solution when combined with ventilation units and Biddle air curtains

CM: Compressor Module

VRV IV Condensing Unit – for indoor installation

Unique split unit for indoor installation

Compact and easy to hide, the compressor can be installed at floor level, in a back office, storage room, technical area or in a kitchen, while the heat exchanger can be installed in a false ceiling space. This means that the air conditioning system is completely invisible and does not take up expensive commercial floor space.

Installation flexibility

- > Unrivalled flexibility because the unit is split into two elements: the heat exchanger and the compressor
- > Lightweight units reduce installation time and effort, making it easy for just two people to transport and install
- > Shorter pipe runs between the indoor units reduces installation costs
- > Easy serviceability, all components can be easily reached

Superior efficiencies

- > Variable Refrigerant Temperature for best seasonal efficiency & comfort
- > Patented V-shape heat exchanger for the most compact unit (400 mm high)
- > Super-efficient centrifugal fans (85% more efficient than equivalent sirocco fan)
- > Inverter fan can be easily adjusted to the length of ductwork
- > Optimised shape for higher air flow and static pressure, resulting in much higher efficiencies when compared to standard outdoor units installed indoors

Compact compressor unit

- > Small footprint maximizing usable floor space (600 x 554 mm)
- > Can easily be mounted in a storage room or back office
- > Rotating switchbox for easy maintenance

Heat Pump VRV IV

3 revolutionary features:

Variable Refrigerant Temperature

Customise your VRV for best Seasonal Efficiency and comfort:

- > Revolutionary variable refrigerant temperature control automatically adapts the system to individual building and climate requirements for greater efficiency and comfort
- > Continuously adjusts refrigerant temperature to the actual temperature and capacity required
- > Default mode optimised by Daikin for UK conditions with maximum efficiency and comfort
- > Delivers annual cost savings of up to 28%

Continuous heating during defrost

The new standard in heating comfort:

- > Unique continuous heating technology makes VRV IV Heat Pump the best alternative to traditional heating systems
- > Delivers uninterrupted heat, even during the defrost cycle
- > Maintains comfortable indoor climate at all times

VRV configurator

Advanced software for simplified commissioning, servicing, configuration and customisation:

- > Simplified commissioning: graphical interface to configure, commission and upload system settings
- > Simplified servicing: additional 7-segment indicator for easy and quick access to basic functions and error read out
- > Manage systems over multiple sites

Replacement VRV-Q

Optimise your business

Tackle more projects in less time:

Due to faster installation, VRV-Q is more cost-effective than replacing the full system with new piping.

Lower installation costs:

Offer customers the overall lowest cost solution and improve your competitive edge.

Easy as one-two-three:

A simple solution: Daikin VRV-Q enables you to handle more projects for more customers in less time and offer them the best price! Everybody wins.

Compare installation steps

Conventional solution	VRV-Q
1 Recover refrigerant	1 Recover refrigerant
2 Remove units	2 Remove units
3 Remove refrigerant pipes	Re-use existing piping and wiring
4 Install new piping/wiring	
5 Install new units	3 Install new units
6 Leak test	4 Leak test
7 Vacuum drying	5 Vacuum drying
8 Refrigerant charging	6 Automatic refrigerant charging, cleaning and testing
9 Collect contamination	
10 Test operation	

↓

Up to 45% shorter installation time

New

Now it's possible to connect VRV IV BS boxes, including the small, light Multi BS boxes designed to offer the largest & most flexible range of design & installation options available.

The Daikin low-cost upgrade solution

- Reuse drain pipes**
Durable PVC pipes can be easily reused. Only flow tests are required.
- Reuse refrigerant pipes**
Pipes used for R-22 will also work with VRV-Q, thanks to lower operating pressures of the system.
- Reuse refrigerant branch pipes**
There are no restrictions when upgrading from a Daikin VRV system. Other VRF systems require branch pipes to withstand pressure up to 3.3 MPa.
- Replace indoor units and BS boxes**
Contact your local dealer to check compatibility in case you need to keep the indoor units.
- Reuse remote control wiring**
Reuse wiring when upgrading from a Daikin VRV system. In other cases, this will depend on the cable type.
- Reuse indoor-outdoor wiring**
Restrictions: see remote control wiring.
- Replace outdoor units**

Customer benefits

Always operational

Avoid loss of business

Replacing now prevents unplanned, lengthy disruption of air conditioning systems. It also avoids loss of business for shops, complaints from guests in hotels, lower working efficiency and loss of tenants in offices.

Quick and easy installation

No interruption of daily business while replacing the system thanks to phased-in, fast installation.

Lower long-term costs

Repairing systems with R-22 has been prohibited since 31 December 2014. Installing a technically advanced Replacement VRV-Q system reduces energy consumption and maintenance costs from day one.

Reduced energy consumption

Up to 40% energy saving

Key Guidelines for a Quality Replacement with VRV-Q

R22 is a hydrochlorofluorocarbon (HCFC) which was commonly used in air conditioning systems. However, both new and recycled sources of R22 are now banned.

Many systems today are still running on R22. But as R22 is no longer available, now's the time to replace R22 systems. The good news is that Daikin's VRV-Q solution delivers significantly higher energy efficiencies, with the potential of saving up to 50%, compared with installing a completely new system.

The Daikin low-cost upgrade solution

- ✔ **Reuse drain pipes**
 Durable PVC pipes can be easily reused. Only flow tests are required.
- ✔ **Reuse refrigerant pipes**
 Pipes used for R-22 will also work with VRV-Q, thanks to lower operating pressures of the system.
- ✔ **Reuse refrigerant branch pipes**
 There are no restrictions when upgrading from a Daikin VRV system. Other VRF systems require branch pipes to withstand pressure up to 3.3 MPa.
- ! **Replace indoor units and BS boxes**
 Contact your local dealer to check compatibility in case you need to keep the indoor units.
- ✔ **Reuse remote control wiring**
 Reuse wiring when upgrading from a Daikin VRV system. In other cases, this will depend on the cable type.
- ✔ **Reuse indoor-outdoor wiring**
 Restrictions: see remote control wiring.
- ! **Replace outdoor units**

Refrigerant branch pipes

Refrigerant branch pipes, including those from other manufacturers, Y-refnets, T-refnets and headers, can be reused under the following conditions:

- ✔ Pipes are corrosion-free
- ✔ Pipes are insulated
- ✔ Pipes can withstand a pressure up to 3.3 MPa
- ✔ There are no special components that implement decompression (e.g. oil trap)
- ✔ Installed copper pipework is in suitable condition (piping thickness will generally meet specifications, since the unique Daikin VRV solution operates at lower pressure levels)

Refrigerant oil

Refrigerant piping can be reused if one of the following oils was used: Barrel Freeze, Ethereal, Ester, Ferreol, HAB, MS, Suniso.

Maximum piping lengths and level distances

VRV-Q can be installed for piping systems with a total length up to 300m. See data book for further guidelines.

Please see note on page 91 regarding VRV-Q warranty, and contact your local sales office for more information on VRV-Q installation.

Daikin Network Service System (DNSS)

Remote Monitoring and Lifecycle Management

DNSS is a remote monitoring system, which will allow you to continuously optimise the running of your Daikin equipment; control your energy consumption (so reduce your Carbon Footprint), extend the life span of your equipment and reduce operational costs.

Prevent product malfunctions

The DNSS will analyse the data from your equipment every minute of the day and will alert us before the equipment actually breaks down. In this way, failures can be prevented and possible down time reduced to an absolute minimum.

Remote diagnostics

The DNSS continuously checks the cleanliness of the system filters and heat exchanger. Furthermore, the DNSS manages a wide range of data (pressures, temperatures, running hours, etc.) in order to let your equipment run as efficiently and trouble free as possible. This will also prevent your equipment from using too much energy.

Extend product lifetime

The DNSS is designed to make sure that your equipment is maintained and running as efficiently as possible. This optimisation will extend the lifespan of your equipment.

Malfunction messages

In the unlikely event of a problem occurring, your regional Daikin UK office will contact you directly. Our engineers, who are dedicated to your installation, will inform you regarding the nature of the problem and will help you towards the next step of solving the problem.

Your installation under continuous monitoring

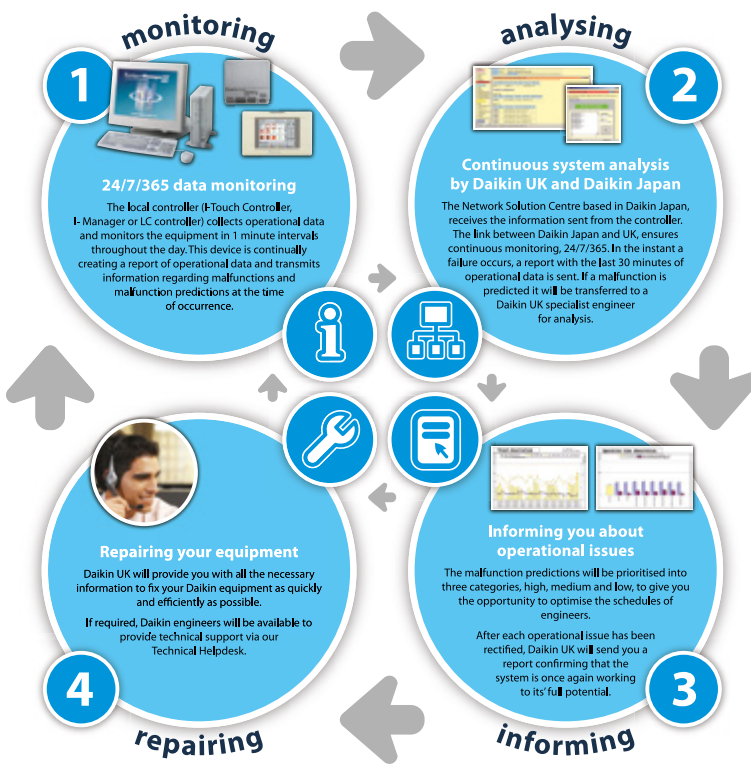

- > 24/7, 365 days a year remote monitoring
- > Predictive maintenance
- > Improved reliability
- > Improved comfort levels
- > Helps increase efficiency
- > Helps reduce maintenance costs
- > Extends product lifetime

Extra value at low cost

- > A strategy of preventing breakdowns and limiting unnecessary maintenance visits
- > Efficiently organising site interventions by diagnosing the nature and the extent of the problem before going to site
- > Innovative technology that helps to optimise your equipment's potential
- > Ensures the most comfortable environment in your premises

Installation requirements:

- > DNSS requires an Intelligent Touch Controller or Intelligent Touch Manager to be installed on site, to act as the data relay point
- > The controller cost is not included in the Commissioning price, but must be purchased separately
- > A Lan connection must be provided local to the installed controller with the ability to make an outgoing connection to the internet
- > Alternatively a 3G connection can be supplied by Daikin at an additional cost

Commissioning

Model	Description	Trade Price
DNSS is sold at nett price. No discounts will apply		
UK.FS-DNSS1-3VRV	DNSS commissioning of 1 to 3 VRV systems	£450.00
UK.FS-DNSS4-6VRV	DNSS commissioning of 4 to 6 VRV systems	£500.00
UK.FS-DNSS7-9VRV	DNSS commissioning of 7 to 9 VRV systems	£600.00
UK.FS-DNSS10-12VRV	DNSS commissioning of 10 to 12 VRV systems	£700.00
UK.FS-DNSS13-15VRV	DNSS commissioning of 13 to 15 VRV systems	£800.00
UK.FS-DNSS16-18VRV	DNSS commissioning of 16 to 18 VRV systems	£1,000.00
UK.FS-DNSS19-21VRV	DNSS commissioning of 19 to 21 VRV systems	£1,200.00

Annual monitoring

Model	Description	Trade Price
DNSS is sold at nett price. No discounts will apply		
UK.FS-DNSS/VRV/IND	Annual DNSS monitoring of a single module VRV system	£150.00
UK.FS-DNSS/VRV/2ND	Annual DNSS monitoring of a twin module VRV system	£200.00
UK.FS-DNSS/VRV/3ND	Annual DNSS monitoring of a triple module VRV system	£250.00

VRV-Q Warranty

Warranty and site services

The warranty for VRV-Q systems operates under different conditions from our standard warranty. To ensure complete suitability of the existing site, a choice of optional warranty and special site services packages are available from Daikin Airconditioning UK Ltd. These choices will ensure the VRV-Q system is designed and commissioned to provide the client with complete 'peace of mind' operation.

The choices include:

- a) Pre-order checks on the existing pipework and fan coils installed on the clients' site to ensure suitability for VRV-Q installation
- b) Commissioning of the new VRV-Q installation to ensure correct and efficient operation

Warranty options for 3 or 5 years are available depending on the qualification criteria and the type of system being installed.

Commissioning Log Books should be available for inspection by Daikin Airconditioning UK Ltd if required.

The tables below provide an overview of the choices. For full details please contact your local sales office.

VRV-Q Warranty Choices

1. VRV-Q combined with new fan coil units

Warranty Package Level	For Site with New Fan Coils	
	non D1/D1+	D1/D1+
Condensing Unit Warranty Period	3 Years	5 Years
Fan Coil Unit Warranty Period	3 Years	5 Years
Site Pre-Order Inspection	By trained approved engineer ⁽¹⁾ OR by Daikin Airconditioning UK Ltd (additional cost)	
Commissioning	By approved engineer ⁽¹⁾ (subsequent projects) OR by Daikin Airconditioning UK Ltd (additional cost)	

2. VRV-Q combined with existing fan coil units

Warranty Package Level	For Site with Existing Fan Coils	
	non D1/D1+	D1/D1+
Condensing Unit Warranty Period	3 Years	5 Years
Existing Fan Coil Unit Warranty Period	0 Years	0 Years
Site Pre-Order Inspection	By trained approved engineer ⁽¹⁾⁽²⁾ OR by Daikin Airconditioning UK Ltd (additional cost)	
Commissioning	By approved engineer ⁽¹⁾ (subsequent projects) OR by Daikin Airconditioning UK Ltd (additional cost)	

Notes:

- ⁽¹⁾ Approved engineer to sign commissioning report and be able to identify DAUK official training programme attended, SE19 VRV-Q required
- ⁽²⁾ Trained approved engineer to collect 2 hours of data per system from the service checker for assessment

Daikin Support Options	Cost	Code
Site pre-order inspection per system*	£175.00	UK.SFV/N/INSP
Site pre-inspection (existing fan coils) including 2 hour service checker analysis per system*	£285.00	UK.SFV/E/INSP
Daikin commissioning per system*	£400.00	UK.SFV/SYCOMM
Daikin full day commissioning assistance	£585.00	UK.SFV/FULLCOMM

*System is defined as a maximum of 3 connected condensers. All prices shown are Net. No further discount can be applied.

VRV-Q Warranty Detail

Approved engineer

An approved engineer is an engineer who:

1. Is suitably registered in accordance with F-gas regulations
2. Has successfully completed a Daikin Airconditioning UK Ltd VRV Air Cooled installation and commissioning course within the last 3 years
3. Has completed SE19 VRV-Q course in the past 3 years

Net price

Net price, exclusive of VAT and subject to our standard terms and conditions. No other discounts are applicable.

Prices shown for site pre-order inspection and commissioning are for work undertaken during normal working hours between 09:00 and 17:30. Any request for attendance to site out of these hours is subject to additional charges.

Warranty

To activate the warranty, the Daikin Airconditioning UK Ltd VRV Commissioning Log Book will need to be fully completed and submitted to Daikin Airconditioning UK Ltd FQS department for checking. Upon receipt and validation that all required details are provided and satisfactory, Daikin Airconditioning UK Ltd will issue a confirmation letter that the warranty is activated. Where Daikin Airconditioning UK Ltd will complete the commissioning, we will provide a copy of the Commissioning Log Book to the installation contractor. Except where mentioned above, our standard warranty conditions will apply. If none of the packaged options are chosen, then the warranty will be limited to a standard 12 month parts only cover.

Site pre-order inspection

Where required, Daikin Airconditioning UK Ltd will attend the site to check the suitability of the existing equipment and pipework for connection to VRV-Q. Where it is not possible to check operation or equipment condition, this will also be highlighted in the final report, and appropriate recommendations made.

If an approved engineer carries out the site inspection, then a Daikin Airconditioning UK Ltd supplied form shall be completed and submitted to our FQS department for checking and approval prior to any order being accepted.

The pre-order site inspection will include the following items:

- **Existing system(s) capacity** – necessary to estimate required system load for the new system
 - Record all the model numbers and the serial numbers for the indoor and the outdoor units and indicate actual installed system combinations

- **Check status of the existing indoor units** – necessary if the existing units are to be reused
 - Check filter condition
 - Check coil condition
 - Check fan motor operation – select fan only and check for air movement and for unusual noise and vibration
- **Installed pipework details** – necessary to check compliance with the manufacturer's specification and assess install quality. This would highlight any required rectification prior to the installation of the new system
 - Provide as installed pipework diagrams. If not available, provide as installed pipe work schematics from information gathered on site
 - Check the distance from the outdoor to the farthest indoor along the pipe work route
 - Check the distance from the first Refnet fitting to the farthest indoor unit
 - Check the height difference between the outdoor and the lowest indoor when the outdoor is situated above the indoor units or height difference between the outdoor and the highest indoor if the outdoor is situated below the indoor units
 - Check the height difference between the highest and the lowest indoor connected to the same system
 - Provide the lengths of all installed pipe sizes
 - Check the installation position and angle of the Refnet Joints
 - Check the condition of the pipe insulation
 - Check the adequacy of the existing pipe supports
- **Installed communication and control wiring** – necessary to check compliance with the manufacturer's specification, suitability for the new system and suitability for new controls specification
 - Check sizes and type of the interconnecting communication cables between indoor units, outdoor units and any central control systems
 - Check the separation between the power wiring and the installed controls wiring
- **Power wiring to the outdoor units** – necessary to check suitability for the new outdoor units
 - Check supply voltage
 - Check number of outlets available adjacent to the outdoor units compound
 - Check fuse/MCB sizes and types
 - Check status of the isolators

VRV-Q Warranty Detail

- **System health checks** – it is important to know if the existing systems are operating to their optimum. If there are issues which may affect the new installation they need to be identified and rectified before installation of the new system. A comprehensive list of the operating data can be collected by connecting a VRV Checker to each system and recording a minimum of one hour operation data for analysis. This data should be sent back to Daikin Airconditioning UK Ltd FQS department for analysis
 - Operate the whole system in cooling for ½ hour and in heating for ½ hour to collect representative data
 - Send data to Daikin Airconditioning UK Ltd FQS department for analysis
- **System history check** – although the new VRV-Q system is designed to re-use existing pipework and in some cases existing indoor units it is still necessary to know the existing systems operational history to judge its integrity for the new application
 - Check for presence of leak protection dye and acid level – use total test kit
 - Ensure that no Acid Away chemical has ever been added to the system refrigerant charge
- **Existing system controls** – investigate currently installed local controls, centralised controls and connection to the third party systems. This is particularly necessary if any existing controls are planned to be re-used

Commissioning

Dependant on the requirement, either an approved engineer or Daikin Airconditioning UK Ltd will provide system commissioning on the completed installation. As mentioned in the warranty section above, a completed log book will need to be submitted to activate the warranty

Commissioning where not provided by Daikin Airconditioning UK Ltd, can only be completed by an approved engineer.

Where Daikin Airconditioning UK Ltd provides commissioning as part of the package this shall include:

- Check installation of new units – ensure new piping is installed correct to Daikin specification
- Check power supplies – local isolators, MCB rating
- Fill in model number data, serial numbers etc. to commissioning log book
- Initialise VRV System and ensure all units communicate
- Set up additional control systems – ITC, Bacnet and provide demonstration
- Charge additional refrigerant
- Perform "Test" operation – including "Automatic" charging function
- Connect service checker and monitor operation – Cool>Heat>Heat Recovery
- Complete Commissioning Log Book
- Provide additional comments and recommendations if necessary
- Leave operation set as required by client

Prior to our site attendance the following shall be completed:

- All communication wiring is complete and terminated correctly
- All electrical work is complete and correct (supply wiring type and size – Breaker size correct)
- All systems piping has been pressure tested to 33 Bar
- All systems piping has been evacuated to < 5 Torr
- All systems piping has been measured and is available for our information
- Sufficient additional refrigerant is available on the day

Any other works other than those detailed above are excluded.

DNSS (Daikin Network Service System)

Where Daikin Airconditioning UK Ltd provide DNSS this shall include the following items:

- Commissioning of DNSS system (on-site service)
- GPRS router and SIM (this will be property of Daikin Airconditioning UK Ltd)
- Remote energy saving service
- 24/7 monitoring of VRV operating data
- Instant notification of system malfunction (email) 7 days a week
- Malfunction prediction service (during office hours 09.00 - 17.30)
- Bi-annual energy saving report indicating electricity cost saving and reduction in CO₂ emissions
- Recommendations to improve operating settings
- Issue of a DNSS user pack

All of the above will be provided for the warranty period of the VRV (either 3 or 5 years) depending on the package selected.

Prior to our site attendance the following shall be completed:

- A device compatible with DNSS is installed on site – Daikin Intelligent Manager, Daikin Intelligent Touch Controller or Daikin LC controller. (Not included in the price of the monitoring package)
- All electrical work is complete and correct (supply wiring type and size – breaker size correct) also F1/F2 communications are installed
- A full set of as installed drawings are available – indicating system configurations, installation locations and room references
- A power source is installed for the GPRS modem near the control device – this can be powered from a standard socket
- A connection to the internet is available – for areas where there is poor GPRS coverage a LAN or analogue phone connection must be installed near the control device. (Installation and rental costs are not included in the price of the monitoring package)
- Full access must be made available to the VRV equipment and if any access equipment is required Daikin UK must be informed prior to the site visit
- A list of contacts must be issued to Daikin Airconditioning UK Ltd (these are the contacts that should be e-mailed or telephoned in the event of a malfunction or error with the air conditioning system). If these change in the future, information will be given in the user pack for how to notify Daikin Airconditioning UK Ltd of the changes

This is an extract from the Daikin publication "Warranty and Site Services Package for VRV-Q". Please contact your local sales office to receive a copy and obtain further information.

Water Cooled VRV

Water cooled VRV uses water as its source of heat. This enables not just heat recovery on each system, but also heat recovery between different systems, maximising efficiency. Additionally there is no defrost required on these units meaning heating comfort is maintained even during cold spells.

Ideal for large buildings

VRV-W systems are capable of coping with water pressures of 2MPa and provide pipework lengths of up to 120m length from condenser to fan coils.

The new VRV IV features are available on water cooled VRV systems including:

- > **Variable Refrigerant Temperature** – delivering far higher efficiency than any other comparable system and ensuring comfort by raising off coil temperatures, Variable Refrigerant Temperature control delivers a leap forwards in VRV technology.
- > **Configurator** – Simplified commissioning: graphical interface to configure, commission and upload system settings. Manage systems over multiple sites, saves time and reduces errors during set-up and commissioning.

- > The standard model is now capable of accepting geothermal water temperatures (Down to -10 Deg C with glycol)
- > Inverter water pump controller (available on request)
- > Connect to AHU applications and Heat Reclaim Ventilation devices
- > Now it's even possible to connect VRV IV BS boxes, including the small, light Multi BS boxes designed to offer the largest & most flexible range of design & installation options available.

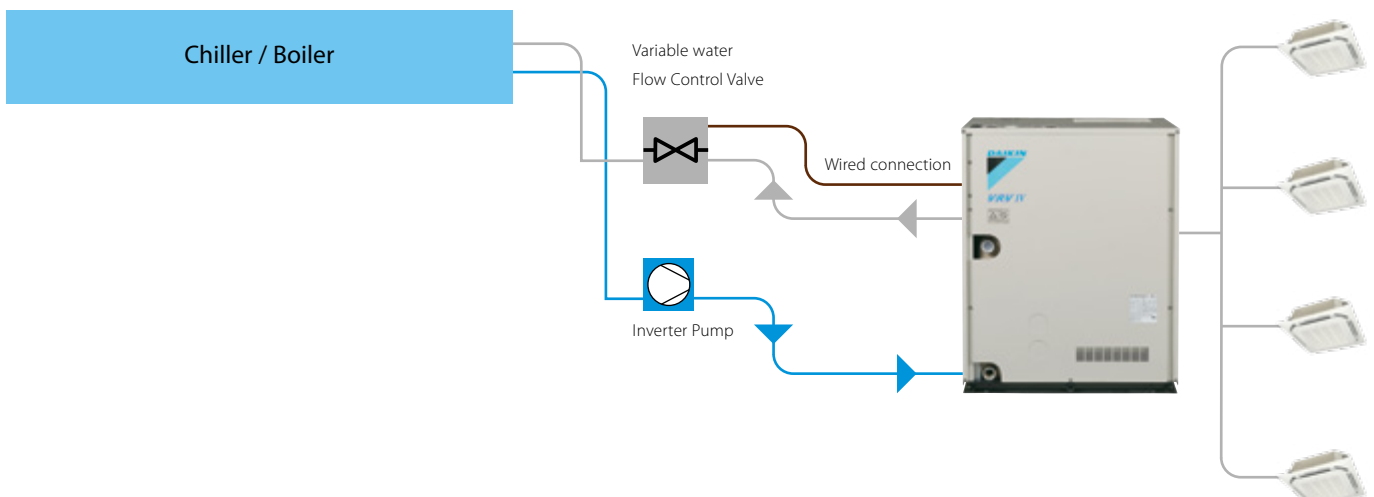

Water flow control

Significantly reduce inverter pump power input by reducing the flow through the VRV-W condenser when at part load.

By linking the degree of valve opening to the compressor frequency, the flow rate varies to match the load.

Consequently as the flow rate reduces, the inverter pump will slow down and save energy.

- > Up to 13 steps of flow control available
- > Available as an option (factory fitted)
- > 50l/m minimum flow rate

Notes:

Daikin have introduced the new VRV IV Water Cooled condensing unit to complement the rest of the VRV range.

The water cooled system has a number of advantages over an air cooled system:

- suitable for tall multi-storied buildings due to no limitations of water piping length
- wide operation range with inlet water temperatures of -10°C to +45°C
- suitable for use with open and closed loop ground source systems on request
- the system offers greater efficiency in heating mode as there is no defrost cycle required for the water loop
- greater efficiencies than air cooled systems

Notes:

The VRV IV Water Cooled system is supplied as a common unit and can be used in either heat pump and heat recovery modes, from size 10 to size 30 all using a three phase power supply.

The 30 hp system can connect to up to 36 indoor units. The system is fully compatible with the full range of existing VRV fan coils and controls packages. It should be installed in a plant room.

VRV Accessories VRV IV Branch Selector Boxes – Heat Recovery

The new VRV IV Heat Recovery series has a new range of BS boxes, which are designed to offer unrivalled flexibility – enabling you to install and adapt the systems in as little time, effort and cost as possible.

Main features:

- > Unlimited unused ports
- > Smaller, lighter and quieter than comparable products
- > Fan coils up to 140 class can be attached to a single port

All VRV IV Heat Recovery, VRV III-Q replacement and Water Cooled VRV (RWEYQ-T8) now use VRV IV Multi Boxes.

VRV Accessories VRV IV Branch Selector Boxes with Pre-fitted Valves

One of the main benefits of the Daikin VRV multi BS boxes is the flexibility they offer when changing the layout of the system to cater for the changing tenant needs on a building.

To further increase the flexibility of the BS boxes, we now offer the full range of multi BS boxes with **pre-fitted valves**. Having valves pre-installed on the boxes can save considerable time and effort on site.

Pre-installed valves allow:

- > Indoor units to be added without altering system pipework
- > New units can be added without having to remove refrigerant from the rest of the system
 - So you can avoid having to pump down / vac out / recharge the whole system
 - Saves many man hours when altering systems

Note: Providing index is not increased above the next pipework threshold or the BS box index limit

VRV Accessories Mini Building Management System

User friendly

- > Intuitive user interface
- > Visual layout view and direct access to indoor unit main functions
- > All functions direct accessible via touch screen or via web interface

Smart energy management

- > Monitoring if energy use is according to plan
- > Helps to detect origins of energy waste
- > Powerful schedules guarantee correct operation throughout the year
- > Save energy by interlocking A/C operation with other equipment such as heating

Flexibility

- > Cross-pillar integration (heating, air conditioning, applied systems, refrigeration, air handling units)
- > BACnet protocol for 3rd party products integration
- > I/O for integration of equipment such as lights, pumps etc. on WAGO modules
- > Modular concept for small to large applications
- > Control up to 512 indoor unit groups via one ITM and combine multiple ITM via the web interface

Easy servicing and commissioning

- > Remote refrigerant containment check preventing on site visit
- > Simplified troubleshooting
- > Save time on commissioning thanks to the pre-commissioning tool
- > Auto registration of indoor units

Functions overview

Management

- > Web access
- > Power Proportional Distribution (option)
- > Operational history (malfunctions, operation hours, ...)
- > Smart energy management
 - monitor if energy use is according to plan
 - detect origins of energy waste
- > Setback function
- > Sliding temperature

Control

- > Individual control
- > Schedule setting (weekly schedule, yearly calendar, seasonal schedule)
- > Interlock control
- > Setpoint limitation
- > Temperature limit

Connectable to

- > DX Split, Sky Air, VRV
- > Chillers (via POL638.70 controller)
- > Daikin AHU
- > Fan coils
- > Daikin Altherma Flex type
- > LT and HT hydroboxes
- > Air curtains
- > WAGO I/O, AO and PI
- > BACnet protocol
- > WAGO Interface

VRV Accessories RTD-20 Control Panels

Control Panels have been developed to allow easy installation of the RTD-20 into end-user premises. A typical application would require 1 RTD-20 per zone within a building. The control panels are pre-configured for up-to 8 different zones, making installation and wiring much simpler for the installer.

Model	Description	Trade Price
		RTD-20 Control Panels are sold at listed price. No discounts will apply.

VRV Accessories Centralised Control Solutions

Control of air conditioning within a retail environment produces its own set of challenges. The controls are often 'hidden' to prevent unauthorised access. This can result in equipment being left continuously operating, heating and cooling clashing and extremes of set point.

This can lead to user comfort complaints and excessive energy consumption.

Frequently there is only one user who knows how to access the controls, and the maintenance company has no off site access to make adjustments.

The solution to these issues is the Daikin Intelligent Tablet Controller.

Features and benefits:

- > Control of up to 32 indoor units (groups)
- > Control of VRV, SkyAir, Splits, Air curtains & VAM units
- > Intuitive local control via App based interface
- > Control of all unit functions plus scheduling and set point restrictions integral to system
- > Optional web based cloud control for off-site access
- > Optional web based energy management software to automatically reduce wasted energy
- > Optional multi-site control to facility benchmarking and permit control to be 'pushed through' to multiple sites in one operation
- > Modular system – sites can be added to the controls package as they become available.

Intelligent Tablet Controller

Hardware

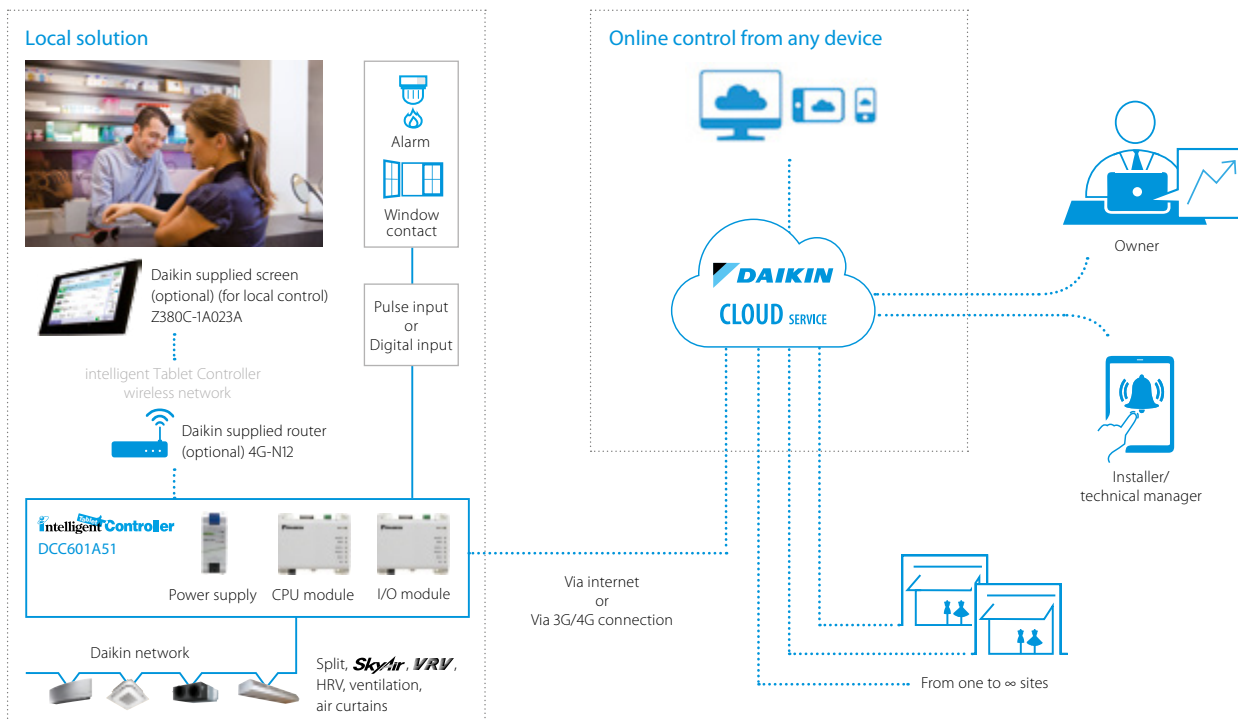

Model	Description	Trade Price
DCC601A51	Intelligent Tab Controller, with I/O module and power supply unit	£614.00
Z380C	Tablet for optional Wi-Fi based local control	£255.00

NEW

VRV Accessories VRV & SkyAir Wi-Fi adapter

VRV

Wi-Fi adapter

Provide your customers with enhanced control of their air conditioning systems, with the Daikin Wi-Fi adapter and free downloadable App for smart phone or tablet.

Benefits:

Manually and automatically control the environment using your smart phone.

From switching between heat and cooling, setting the required temperature and fan speed, setting minimum comfort levels and time clocking your air conditioning, the climate will be maintained to meet your requirements.

- > **Multiple users** – Each user can be given their own account and allocated unit(s). Users can even share access to the same unit(s).
- > **Phone not available** – Control is also available via a dedicated web site using a web browser on your tablet or PC.

*Broadband internet connection, Wi-Fi connection or Mobile data connection required.

Features:

Basic Operations

- > On/Off
- > Operation mode
- > Set point & room temperature
- > Fan speed
- > Air flow direction
- > Time clocking

A delay off timer to automatically stop the air conditioning after a fixed number of hours run can be set. In addition multiple time clock schedules can be set. Both of these features can reduce energy wastage.

Occupied (Setback) and unoccupied (Home Leave) can be separately enabled to ensure minimum comfort levels are maintained when the property is empty.

In the event of an operational issue, the error & associated code will be displayed, to aid in the reinstatement of your system.

Individual control of each room as well as control of the property as a whole is available via the group control function.

An unlimited number of rooms and multiple properties can be controlled by a single account.

Indication of the ambient temperature and a weather forecast for the locale surrounding the property allow the user to adjust the system settings to meet their requirements.

Model	Description	Trade Price
DKNWSERVER	 Wi-Fi adapter to connect to on-line server* One adapter required per fan coil unless group control of connected fan coils required, then one adapter per group	£197.00

VRV Accessories VRV Refrigerant Leak Detection System

Refrigerant leak detection systems can be required by the Safety of Building Occupants, BS-EN378. Daikin has a solution that can help meet requirements for leak detection within enclosed spaces.

Refrigerant Leak Detection Alarm

1) The standard BS-EN378 requires that systems containing R410A refrigerant gas such as VRV, meet the requirements regarding maximum system refrigerant volumes that could leak within Hotel Bedroom or other similar Category Class A spaces. If these limitations are exceeded there must be an alarm system installed within each room where this limit is not met. The alarm system must alert the occupier through both audible and visual indication, and must also alert building staff such as supervisors, night porters etc. There is no specific requirement for the alarm system to be linked to the refrigerant system to pump down or stop the operation, although this can be configured if required by the client.

It is recommended that guidance on the selection and installation of these systems is obtained from your local Daikin UK sales office.

Model	Description	Related Unit	Trade Price
	UK.RDEM-Wht White single gang room based refrigerant gas detector. C/W power supply unit and terminals for connection to alarm network or VRV fan coil to force system shut down	All	£288.00
	UK.RDEM-Wht/Curve Curved white single gang room based refrigerant gas detector. C/W power supply unit and terminals for connection to alarm network or VRV fan coil to force system shut down	All	£308.00
	UK.RDEM-St/St Stainless steel single gang room based refrigerant gas detector. C/W power supply unit and terminals for connection to alarm network or VRV fan coil to force system shut down	All	£308.00
	UK.IMEC-RAD-32 Network alarm hub for connection of up to 32 room alarms c/w web page configuration screen. Hub can be connected in a pyramid formation for connection to a central alarm indicator panel (UK.IAMC)	All	£1,846.00
	UK.IMEC-RAD-64 Network alarm hub for connection of up to 64 room alarms c/w web page configuration screen. Hub can be connected in a pyramid formation for connection to a central alarm indicator panel (UK.IAMC)	All	£2,548.00

Cross connection between the two different ranges of refrigerant leak detectors is not permissible.

Model	Description	Related Unit	Trade Price
	UK.IAM1 Room based refrigerant gas detector with remote room mounted stainless steel fascia plate. Provides local audible and visual alarm notification. Terminals for connection to alarm network and optional connection to VRV Fan coil to force system shut down	All	£291.00
	UK.IAM2 Network alarm hub for connection of up to 16 room alarms. Hub can be connected in a pyramid formation of 16 groups back to a single unit for connection to a central alarm indicator panel (UK.IAMC)	All	£572.00
	UK.IAMC Alarm buzzer and lamp panel for mounting in a central building supervisor location	All	£404.00

VRV Accessories VRV Cloud

Energy Assessment and Reporting

VRV Cloud is Daikin's unique energy usage assessment, optimisation, control and reporting tool.

System operational data can also be reported for a complete picture of system performance.

Energy assessment

Individual VRV system or whole site energy consumption can be accessed and viewed in a graphical form. The data can be viewed as an hourly, daily, monthly or annual graph. The energy consumption can be plotted against the outdoor air temperature or against a target consumption (which can be manually entered or automatically generated).

Energy optimisation

A target annual energy consumption limit can be set and the system will reduce operational output to meet the target. The target can either be manual set or automatically set via a simple slide bar – calibrated by user comfort level vs energy saving level.

Control

Access to the on-site touch screen controller is possible remotely. This gives the ability to change operational settings without having to attend site.

Reporting

Indoor and outdoor unit operational data can be viewed in tabular form. All data, energy usage and operational, can be extracted as a CSV file for incorporation within your own reports.

Features and benefits:

- > Unique Daikin automatic energy optimisation tool
- > Graphical reporting of energy usage
- > Remote access to site operational settings
- > Reduction to energy consumption can be weighed vs user comfort
- > All data available for incorporation into your own reports.

For more information, please contact your Daikin sales engineer.

Daikin UK Price List Update

Ventilation

VAM-FC	110
VKM-GB(M)	112

For larger ventilation capacities from 2,000m³/hr to 15,000m³/hr see the new Daikin modular AHU on pages 190-192 of the Applied section.

Ventilation

Achieving high indoor air quality for building occupants is an essential factor in HVAC design, especially in light of building regulations and the high levels of air tightness within modern buildings.

Daikin offers a range of options that enables control of fresh air into commercial and residential spaces. For flow rates of up to 0.556m³/s, our VAM / VKM range of heat recovery ventilation products can efficiently deliver controlled fresh air to meet your design priorities. For larger fresh air requirements, please see our Applied section for our range of packaged air handling units (See page 190-192 for our Modular AHU range).

VAM-FC Total Heat Exchanger

Our popular range of Total Heat Exchangers (VAM) have been updated and are fully compliant with the new lot 6 Ecodesign requirements and rated under the EN 308* testing standard. VAM units recover waste energy from the exhaust airstream to minimise running costs and reduce the carbon footprint of the building.

Eliminates up to 73% of the additional heating & cooling loads caused by introducing fresh air.

CO₂ sensors for VAM-FC range minimise running costs, delivering only the ventilation amounts required to maintain your indoor air quality

Notes:

- Please contact your local sales office for required options when combined operation with an air conditioning system is required
- Optional silencers and high efficiency filters are available. Prices and details on request
- VKM models must be connected as the slave indoor unit of a standard VRV indoor unit and share the same BRC1D52 remote controller and BS-Q box (if connected to Heat Recovery)
- UK.VH-CK VAM EHBX24 conversion kit cable included

Weather Proof Enclosures for VAM Total Heat Exchangers

If you need to install a VAM unit outside of a building then they need to be weatherproofed as they are designed for installation internally.

We can offer fully weatherproofed housings for the VAM range which are rated IP46 to make them suitable for outdoor installation. The VAM units are fitted into the enclosure and delivered to site for fuss free installation.

Please note:

- > The prices quoted are for the enclosure, fitting of the VAM into the enclosure and standard delivery. The VAM unit cost is not included.
- > Pre heaters cannot be used with the VAM weatherproof enclosures.

Lead time: 6 weeks

Applicable units: All VAM units (not VKM)

Total Heat Exchanger with DX Cooling & Heating (and Optional Humidifier)

The Total Heat Exchanger removes additional fresh air loads by heating and cooling the air to suit the room setpoint. VKM units work with Daikin VRV indoor units to give a complete air conditioning solution by heating, cooling, cleansing, humidifying and distributing air within a space.

Eliminates **up to 100%** of the additional heating & cooling loads caused by introducing fresh air

The Daikin Altherma Flex Heat Pump Series

The Daikin Altherma Flex heat pump is ideal for apartment buildings and community heating, providing efficient air-to-water heat pump technology for large residential and commercial buildings.

The product can be configured either as a de-centralised or a centralised system:

De-centralised system

The hydroboxes can be located in individual dwellings, such as apartments or collective housing, to create a de-centralised system. Each indoor unit can be operated independently, providing each property with individual control of heating, hot water (cooling optional on 50 & 80 class units).

The indoor hydrobox units are fully equipped with all the required hydraulic components, so they can be connected easily to the heat distribution system. Individual dwellings can also be equipped with separate domestic hot water tanks, which are designed to stack on top of the indoor units.

Centralised system

Alternatively, the indoor units can be located together in one central plant area to create a centralised system suitable for a wide range of commercial and large domestic applications.

The centralised indoor units offer modular system scalability and capacity to meet the heating demand of the overall building.

R-410A R-134a

Altherma Flex Communal Heat Pump De-Centralised

Daikin Altherma Flex type is the first heating system for apartments and collective housing that fully incorporates the use of renewable energy sources, making large residential buildings more environmentally sustainable by increasing energy efficiency – thus delivering lower running costs and CO₂ emissions.

Hot Water Cylinders EKHTSU

Domestic hot water cylinder		UK.EKHTSU200AC	UK.EKHTSU260AC
Type		Unvented System (Includes EKHUWHT)	
Max Water Temperature	°C	75	
Height	mm	1335	1610
Width	mm	600	
Depth	mm	695	
Empty Weight	kg	70	78
Colour		Metallic grey	
Material Inside Tank		Stainless Steel	
Material Outside Casing		Precoated sheet metal	
Piping Connections	All inch	3/4"	
Insulation	mm	80	
Heat loss / 24 hour Δt 45°C		1.2	1.5
Energy Efficiency Class		B	B
Standing Heat Loss	W	50	63
Storage Volume	L	200	260
Trade Unit Price		£1,158.00	£1,312.00

Notes:

- i) Refnet joint prices can be found on page 97
- ii) Commissioning assistance should be included for each hydrobox
- iii) DHW cylinder required for hot water function
- iv) Supplied with 3 way valve and G3 safety kit (EKUHWHTB)

Accessories:

Accessories for hydrobox	Description	Trade price
RTRNETA3AA ⁽¹⁾	Netatmo thermostat for smartphone	£188.00
EKRP1AHT	Optional PCB for demand control	£108.00
EKRP1HBA	Optional PCB for remote alarm monitoring	£108.00
RTD-W	MODBUS interface for HT hydrobox	£214.00
UK.FB2	Fixing box for RTD-W	£26.00
EKCC-W	Sequence controller	£666.00
EKCLWS	Additional thermistor for sequence controller	£78.00
EKRUAHTB ⁽²⁾	Remote user interface	£164.00
EKBUHA6V3 ⁽³⁾	In line back up heater 6kW, 1-phase, 230V	£480.00
EKBUHA6W1 ⁽³⁾	In line back up heater 6kW, 3-phase, 400V	£480.00
EKFMAHTB	Kit for cylinder standalone installation	£289.00
K.FERNOXTF1	Fernox magnetic filter 1"	£97.00
K.FERNOXTF1FL	Fernox magnetic filter 1" and F1 inhibitor fluid (500ml)	£113.00
UK.FSHEAT/COMMS ⁽⁴⁾	Commissioning assistance per hydrobox 1 to 10 hydroboxes	£240.00
	Commissioning assistance per hydrobox 11 to 20 hydroboxes	£216.00
	Commissioning assistance per hydrobox >20 hydroboxes	£192.00
	Daikin full commissioning	POA

- i) RTRNETA3AA must be ordered alongside EKRP1AHT⁽¹⁾
- ii) EKRUAHTB: 1 included with each hydrobox⁽²⁾
- iii) EKBUHA6V3(W1): Also requires EKRP1AHT⁽³⁾
- iv) UK.FSHEAT/COMMS: Commissioning assistance should be included for each hydrobox⁽⁴⁾

Altherma Flex Communal Heat Pump Centralised

Daikin Altherma Flex type is the first centralised heating system for schools, public buildings, hotels, gyms & apartments that fully incorporates the use of renewable energy sources, making large buildings more environmentally sustainable by increasing energy efficiency – thus delivering lower running costs and CO₂ emissions.

Daikin Heating Systems

As a leading heating supplier, Daikin's product portfolio comprises a wide range of highly energy efficient renewable energy systems, providing the right heating solution for any application and requirement.

HEATING

Daikin Altherma air-to-water heat pump is a renewable energy heating and hot water solution, ideally suited for the UK housing market. Using renewable air as a heat source and heat pump technology with Daikin's advanced inverter compressor technology, Daikin Altherma delivers high seasonal efficiencies, low running costs and reduced carbon emissions compared with traditional systems. Launched in 2006 with over 250,000 installed across Europe, Daikin Altherma is the leading air-to-water heat pump.

Daikin Altherma offers the most comprehensive and flexible range of air-to-water heat pumps in the market today, suitable for houses, flats and both new build and refurbishment projects. The range is available in Low Temperature (Split and Monobloc) and High Temperature. Daikin Altherma High Temperature is an industry first system that can deliver water temperatures of up to 80°C, providing an ideal solution for boiler replacement in harder to treat properties.

Daikin solar thermal systems can be combined with Daikin Altherma to provide a fully integrated renewable energy solution. Daikin Altherma and Daikin solar thermal systems are recognised renewable energy solutions that can reduce hot water energy costs by up to 60% compared with traditional fossil fuel systems.

The majority of Daikin Altherma air-to-water heat pumps* are certified by the Microgeneration Certification Scheme (MCS) and the Daikin solar thermal collectors have Solar Keymark approval and therefore are eligible for the domestic RHI. Please check the MCS website for the latest list of accredited Daikin Altherma air-to-water heat pumps.

Daikin is at the forefront of the drive for energy efficient heat pump technology, recognising that heat pumps and the use of renewable energy from the surrounding air is the answer to meet the future challenges of energy efficiency and carbon reduction targets.

Daikin renewable energy solutions provide a real alternative to current and future problems associated with conventional heating systems such as increasing primary energy costs and unacceptably high environmental impact.

Air-to-Water Heat Pump

Daikin Altherma air-to-water heat pump is available in the following models:

Daikin Altherma Low Temperature Split 4-16kW

- > Latest inverter technology, high seasonal efficiencies and low running costs
- > Guaranteed operation down to -25°C
- > Easy to use back lit controller
- > Compact wall hung or floor standing integrated indoor unit with front access for easy maintenance
- > Flexible siting with indoor unit and small outdoor unit which can be sited up to 50m away

Daikin Altherma Low Temperature Monobloc 5-16kW

- > All key hydraulics built-in, e.g. expansion vessel and circulation pump
- > Sealed refrigerant circuit with no F-gas needed for installation

Daikin Altherma High Temperature 11-16kW

- > Providing flow temperatures up to 80°C

Daikin Altherma Flex Type 22.4-44.8kW

- > For commercial heating applications

* When combined with matching indoor unit

Nominal capacity and nominal input tested according to EN 14511 at the following conditions:

Heating a: Ambient air temperature 7°C and leaving water temperature 35°C (A7 W35) Heating b: Ambient air temperature -7°C and leaving water temperature 45°C (A-7 W45)

Cooling: Ambient air temperature 35°C and leaving water temperature 7°C (A35 W7)

Sound pressure level measured at 1m from the unit

Features:

- > This split system consists of an outdoor unit and an indoor hydrobox that can be connected to all standard low temperature radiators and underfloor heating systems
- > All models have extra features to withstand severe winter conditions

Notes:

- i) Some units are available on special request with Blygold treatment to offer additional protection in coastal environments. Please contact your local sales office for further information

Features:

- > Available in heating only or heating/cooling versions
- > A choice of back-up heaters 3, 6 or 9kW
- > Heating / cooling hydroboxes must be ordered with drain pan kit

Notes:

- User interface (EKRUCBL2) must be ordered with every EHBH/X
- * Back-up heater can be re-wired as 3kW/1ph, 6kW/1ph, 6kW/3ph or 9kW/3ph
- ** 9W models only
- iv) Only one optional remote sensor can be installed. Sensor connects to indoor hydrobox

R-410A**NEW**

LT Integrated Hydrobox & DHW (floor standing)

Daikin Altherma low temperature integrated hydrobox increases the quality and consistency of installations whilst decreasing the complexity and installation time thanks to the compact integration of all the indoor components in a single enclosure. Ideal for properties requiring domestic hot water the product is available with 180L or 260L capacities and compatible with the 4-16kW outdoor units.

180L Cylinder

Description			Back up heater kit (3kW)		Back up heater kit (3/6kW)	
Trade Unit Price			£454.00		£505.00	
Nominal rating		kW	3		3-6	
Dimensions	Depth	mm	210			
	Width	mm	250			
	Height	mm	560			
Power supply			1-phase / 230V / 50Hz		1-phase / 230V / 50Hz	
Recommended fuses	3 kW 1ph 230V	Amps	16		32	
	6 kW 1ph 230V	Amps	-		-	
Water connections	Diameter	inch	1" (male)			

Accessories:

Accessory Ref	Description	Trade Price
EKRUCBL2	User interface	£88.00
EKRUCBS	Optional simplified room thermostat	£83.00
RTRNETA3AA	Netatmo thermostat for smartphone	£188.00
EKPCCAB3	PC cable - to upload field settings from PC to unit or spare controller	£188.00
EKRSC1	Optional remote outdoor temperature sensor (see note)	£63.00
KRCS01-1	Optional remote indoor temperature sensor (see note)	£48.00
EK2C807CV3	Optional Wiring centre - for remote alarm monitoring, run and fault indication and bivalent operation	£221.00
K.FF600ASN	Pair of flexi feet to mount the outdoor unit	£49.00
K.CWBXL	Wall mounting brackets for outdoor units (250kg, 660mm long)	£71.00
K.DT2	Condensate drip tray for use with K.CWBXL	£61.00
K.HOSE750	Pair of flexible hoses (Length 750mm, 19mm tough PVC coat insulation, 1" FBSP, 28mm compression)	£70.00
K.HOSE750EL	Pair of flexible hoses with elbow (Length 750mm, 19mm tough PVC coat insulation, 1" FBSP, 28mm compression)	£101.00
K.CG750S	Outdoor unit guard	£286.00
K.FERNOXTF1	Fernox magnetic filter 1"	£97.00
K.FERNOXTF1FL	Fernox magnetic filter 1" and F1 inhibitor fluid (500ml)	£113.00

Notes:

- i) Only one optional remote sensor can be installed

Features:

- > The small Daikin Altherma Monobloc is ideal for smaller properties
- > In this system, water pipes, rather than refrigerant lines, run from the outdoor unit to indoors which means that no special refrigerant handling is necessary
- > The optional back-up heater is installed indoors

Nominal capacity and nominal input tested according to EN 14511 at the following conditions:

Heating a: Ambient air temperature 7°C and leaving water temperature 35°C (A7 W35) Heating b: Ambient air temperature -7°C and leaving water temperature 45°C (A-7 W45)

Cooling: Ambient air temperature 35°C and leaving water temperature 7°C (A35 W7)

Sound pressure level measured at 1m from the unit

Accessories:

Accessory Ref	Description	Trade Price
EKBPTH16A	Bottom plate heater for outdoor units sizes 014-016 (see note)	£137.00
EKRPIHBA	Optional PCB kit for remote alarm monitoring, run and fault indication, solar interlock for heat pump and bivalent operation	£108.00
RTRNETA3AA	Netatmo thermostat for smartphone	£188.00
EKRRTWA	Optional wired room thermostatic controller	£103.00
EKRTR	Optional wireless room thermostatic controller	£202.00
EKRTEFS	Floor temperature sensor for use with wireless room thermostat EKRTR	£14.00
K.FERNOXTF1	Fernox magnetic filter 1"	£97.00
K.FERNOXTF1FL	Fernox magnetic filter 1" and F1 inhibitor fluid (500ml)	£113.00

Notes:

- i) It is strongly recommended to install the bottom plate heater in units that will be installed in a region that will experience prolonged periods below 0°C with very high humidity
- ii) Every unit is supplied with a controller

Features:

- > The Daikin Altherma Monobloc contains all components and the back-up heater in the outdoor unit
- > In this system, water pipes, rather than refrigerant lines, run from the outdoor unit to indoors which means that no special refrigerant handling is necessary for installation

	6kW BUH	A	32		20	
Pump	No. of speeds		2		2	
Expansion vessel volume		litres	10		10	
Water connections (diameter)		inches	1 ¼ (female)		1 ¼ (female)	
Max piping length OU to cylinder		m	10		10	

Nominal capacity and nominal input tested according to EN 14511 at the following conditions:

Heating a: Ambient air temperature 7°C and leaving water temperature 35°C (A7 W35) Heating b: Ambient air temperature -7°C and leaving water temperature 45°C (A-7 W45)

Cooling: Ambient air temperature 35°C and leaving water temperature 7°C (A35 W7)

Sound pressure level measured at 1m from the unit

EKHWSU

Hot Water Cylinder for Low Temperature Split and Monobloc

Domestic hot water cylinder			UK.EKHWSU150B3V3	UK.EKHWSU200B3V3	UK.EKHWSU300B3V3
Description			150L unvented cylinder (Including EKHUWBB)	200L unvented cylinder (Including EKHUWBB)	300L unvented cylinder (Including EKHUWBB)
Trade Unit Price			£1,107.00	£1,125.00	£1,236.00
Suitable for			Unvented systems (EKUHWBB kit included)		
Energy efficiency class			C	C	C
Standing heat loss (ErP)	W		65	74	91
Storage volume	L		150	200	285
Standing heat loss	kWh/24h		1.55	1.77	2.19
Max water temperature	°C		85		
Booster heater capacity	kW		3		
Power supply			1-phase / 230V / 50Hz		
Recommended fuses	A		16		
Height	mm		1015	1265	1715
Diameter	mm		580		
Empty weight	kg		38	46	60
Material inside cylinder			Stainless steel		
Piping connections (diameter)	Water inlet H/E	inch	3/4 (female)		
	Water outlet H/E	inch	3/4 (female)		
	Cold water in	inch	3/4 (female)		
	Hot water out	inch	3/4 (female)		

Features:

- > This stainless steel unvented cylinder is the ideal partner for Daikin Altherma Low Temperature Split and Monobloc heat pumps
- > Fitted with 3kW immersion heater as standard
- > Supplied with 3-way valve and G3 safety kit (EKUHWBB)
- > For vented hot water cylinders, please contact your local sales office

EKHTSU

Hot Water Cylinder for High Temperature Split

Domestic hot water cylinder			UK.EKHTSU200AC	UK.EKHTSU260AC
Description			200L unvented cylinder	260L unvented cylinder
Trade Unit Price			£1,158.00	£1,312.00
Suitable for			Unvented systems (including EKHWHHTB)	
Energy efficiency class			B	B
Standing heat loss (ErP)			50	63
Storage volume			200	260
Max water temperature			75	
Standing heat loss			1.2	1.5
Dimensions (cylinder only)			1335 x 600 x 695	1610 x 600 x 695
Dimensions (cylinder integrated on hydrobox)			2010 x 600 x 695	2285 x 600 x 695
Empty weight			70	78
Material inside cylinder			Stainless steel	
Piping connections (diameter)			25 (female quick coupling, supplied, integrated solution)	
Water inlet H/E			25 (female quick coupling, supplied, integrated solution)	
Water outlet H/E			25 (female quick coupling, supplied, integrated solution)	
Cold water in			3/4 (female)	
Hot water out			3/4 (female)	

Accessories:

Accessory Ref	Description	Trade Price
EKFMAHTB	Kit for standalone installation with floor standing hydrobox	£289.00

Features:

- > This integrated cylinder is designed for use with Daikin Altherma HT only
- > The cylinder features fast heat-up and recovery times, and low heat losses
- > The indoor unit and hot water cylinder are designed to be stacked to save space, or can alternatively be installed next to each other if limited height is available for installation (please order EKFMAHTB)
- > Supplied with 3-way valve and G3 safety kit (EKUHWHTB)

Air-to-Water Heat Pump Combination Table

Hybrid Heat Pump

The Daikin Altherma Hybrid Heat Pump is unique technology. It combines a high efficiency gas combi boiler with a renewable energy air-to-water heat pump, all in one efficient, compact heating system.

Daikin Altherma Hybrid heat pump

The smart hybrid logic automatically selects the most energy efficient and cost-effective operation based on the user's energy tariff, at any given temperature to make it the most efficient solution on the market.

- > Suitable for heating systems requiring flow temperatures up to 80°C
- > Eligible for RHI when fitted with required heat and electric meters
- > Single compact indoor unit to minimise space
- > No DHW tank needed – hot water delivered by combi boiler
- > Suitable for LPG applications for even higher running cost savings
- > Simple easy to use backlit control using energy tariffs for automatic control
- > All key components built in: A-label pump, expansion vessel, pressure relief
- > Heat pump capacity: 5 and 8kW
- > Boiler output CH 27kW (80/60) and DHW 33kW (13 l/min at ΔT 35K)
- > Boiler SEDBUK (2009) rated 89.1% (natural gas) and 90.1% (LPG)
- > Dedicated training courses available

Take control of your home's temperature with the Thermostat for smartphones, tablets, and laptops, designed by Starck.

Netatmo by Starck

Netatmo gives homeowners the option to control their heating temperature via an easy to use smartphone app.

- > With all the functionality of a programmable room thermostat, Netatmo may be fixed to a wall or used wirelessly. It is installed together with a user interface on smartphone, tablet or computer.
- > Once installed, Netatmo gives the user precise remote control of heat output, a weekly schedule reflecting the family's habits and monthly energy savings reports. This can help you reduce your energy consumption by up to 25% by only heating when you need it.

Energy savings

Comfort at the right time with Auto-Adapt function

Remote control

Unique design by Starck

Solar Thermal

Daikin solar systems maximise the use of renewable free energy from the sun through high efficiency flat plate collectors. The Daikin solar thermal system is available in drainback and pressurised options and is designed to work in conjunction with Daikin Altherma air-to-water heat pumps for maximum efficiency. Solar panels are Solar Keymark approved and eligible for the Domestic RHI.

Drainback solar system

- > The drainback solar system is a low maintenance system which does not need antifreeze agents
- > It consists of an unpressurised thermal store which can be combined with Daikin Altherma heat pumps or another auxiliary heat source
- > Water in the store is pumped to the solar panels, heated and returns to stratify in the Daikin thermal store
- > When solar energy is not available, the solar collectors empty and water drains back to the store

Pressurised solar system

- > The pressurised solar system transfers heat to the unvented cylinder via a specially designed heat exchanger kit. This allows the entire cylinder to be heated by solar energy
- > During solar heating, the heat pump is disabled to ensure maximum efficiency

Standalone solar system

- > The standalone solar system combines a pressurised solar system and a twin-coil unvented cylinder and is designed to be combined with an auxiliary gas boiler
- > Ideal for on-gas retrofit applications

Solar Panels, Fixings and Installation Kits (common components)

	Description	Part number	Trade Price
	Solar panel (vertical) – standard (2000 x 1300 x 85mm), aperture area 2.35m ² , weight 42kg, water content 1.7 L. Max. 6 bar Note: Max 5 panels	EKSV26P	£421.00
	Solar panel (vertical) – small (2000 x 1006 x 85mm), aperture area 1.79m ² , weight 35kg, water content 1.3 L. Max. 6 bar Note: Max 5 panels	EKSV21P	£352.00
	Solar panel (horizontal) – standard (1300 x 2000 x 85mm), aperture area 2.35m ² , weight 42kg, water content 2.1 L. Max. 6 bar Note: For pressurised systems only	EKSH26P	£432.00
	Kit to couple 2 solar panels Mounting profile connector, expansion joints and double clamping blocks	162016-RTX	£36.00
	Mounting rail for vertical panels Consisting of mounting profile rails and solar panel securing ties Note: Different for standard and small panels	162066 For EKSV21P (Was 162013)	£25.00
		162067 For EKSV26P (Was EKSFIXMP130)	£31.00
		162068 For EKSH26P (Was EKSFIXMP200)	£42.00
	4x Support hooks for high profile tiles 4 double height-adjustable roof ties including fixing material for one solar panel Note: Was EKSFIXADP	162036-RTX	£72.00
	4x Support hooks for flat tiles (slate) 4 roof ties for flat roofing, e.g. slate, for one solar panel Note: Was EKSFIXADS	164723	£40.00
	4x Support hooks for curved roofings Including fixing material for one solar panel Note: Was EKSFIXWD	164703-RTX	£52.00

Solar Panels, Fixings and Installation Kits (common components)

	Description	Part number	Trade Price
	<p>4x Support hooks for sheet metal roofs Including fixing material for one solar panel</p> <p>Note: Was EKSFIXBD</p>	164704-RTX	£49.00
	<p>In-roof installation kit for 2x vertical panels For two solar panels, covering sheets complete with mounting material. Minimum roof angle 15°</p> <p>Note: Different for standard and small panels</p>	162019 For EKSV26P	£267.00
		162017 For EKSV21P	£444.00
	<p>In-roof extension kit for 1 additional vertical panel For one further solar panel, covering sheets complete with mounting material. Minimum roof angle 15°</p> <p>Note: Different for standard and small panels</p>	162020 For EKSV26P	£207.00
		162018 For EKSV21P	£198.00
	<p>Flat roof kit for 2x vertical panels Preassembled system for quick and easy assembly, with incremental adjustment of solar panel inclination between 30-60 degrees</p> <p>Note: For EKSV26P only</p>	162058	£398.00
	<p>Flat roof extension kit for 1 additional vertical panel Preassembled system for quick and easy assembly, with incremental adjustment of solar panel inclination between 30-60 degrees</p> <p>Note: For EKSV26P only</p>	162059	£158.00
	<p>Flat roof kit for 1 horizontal panel Preassembled system for quick and easy assembly, with incremental adjustment of solar panel inclination between 30-60 degrees</p> <p>Note: For EKSH26P only</p>	162060	£189.00
	<p>Flat roof extension kit for 1 additional horizontal panel Preassembled system for quick and easy assembly, with incremental adjustment of solar panel inclination between 30-60 degrees</p> <p>Note: For EKSH26P only</p>	162061	£130.00
	<p>Connection cable to disable heat pump The connection cable is required to connect the solar priority PCB kit to heat pump</p> <p>Note: Need to order EKRPHBA with this part Was EK5164110</p>	164110-RTX	£11.00
	<p>Solar priority PCB kit This enables an interlock between the Daikin solar controller and Altherma heat pumps</p> <p>Note: Need to order 164110-RTX with this part</p>	EKRPHBA	£108.00

Solar Pressurised Accessories

	Description	Part number	Trade Price
	<p>Solar controller Solar differential temperature regulation for the Daikin solar pressurised system. Regulator with graphic display for representation of hydraulic schematics and yield balances. Including return flow and storage tank temperature sensor and housing for wall mounting</p>	162084	£199.00
	<p>Pump station Consisting of: Pipe connection (diameter 22mm) including pipe compression fittings and support sleeves (5x), flow regulator with 2 x KFE valves, integrated air separator, ball valves with integrated backflow preventor, Grundfos UPM3 Solar 25-75 pump, safety group with pressure gauge, including insulation and mounting accessories</p>	EKS RDS2A	£296.00
	<p>Hydraulic connection kit (pressurised) Connection kit for pressurised only, includes connection to solar panel, 2m UV resistant heat insulation for the external area, solar panel temperature sensor and end caps</p>	EKS RCP	£117.00
	<p>Connection pipe for solar panel rows Connection kit for connecting two rows of collectors one above the other. Consisting of solar panel mounting material, equipotential bonding clamps, end caps, connecting brackets and 1m thermally insulated piping Note: Was EKSCONLCP</p>	162045	£78.00
	<p>Antifreeze fluid (glycol, 20L) 20L of pre-mixed solar fluid in a canister, SOL 5F. Functional range up to -28°C Note: Was EKSGFL</p>	162052-RTX	£73.00
	<p>Thermostatic Mixing Valve Thermal safety device for DHW outlet with a setting range from 35-60°C</p>	UK.SPMIXVALVE	£93.00
	<p>15m solar pressurised pipe Pre-insulated stainless steel flexible flow to panel (16mm) and return from panel (20mm) pipe with sensor cable, order with fittings as shown Note: Order connection pack separately 162073 + 162075 was 162021-RTX 162074 + 162076 was 162026-RTX</p>	UK.SP3PIPEP Up to 3 panels (DN16) UK.SP5PIPEP 4-5 panels (DN20)	£285.00 £416.00
	<p>Solar pipe connectors Connectors to fit 2 pipes together for extension of solar pipe Note: 162071 was 162027-RTX 162072 was 162028-RTX</p>	162071 Up to 25m (DN16) 162072 Up to 25m (DN20)	£25.00 £20.00
	<p>Solar expansion vessel Bracket and flexi hose included for installation</p>	162050 25 litre 162051-RTX 35 litre	£58.00 £150.00

3	30m														
4	17m														
5	15m														
	Solar flow pipe extension (15mm) UV resistant thermally insulated, length L = 8m, including cable connection fitting for the solar panel sensor line Note: Was EKSCONXV80	164264	£77.00												
	Copper pipe connection kit Connection kit when connecting onto copper pipe (if Daikin drainback pipe is not used). Consisting of 2m flow and return pipes, push-fit coupling onto 15mm and 18mm copper pipe	164232	£56.00												
	Solar panel row connection kit Connection kit for connecting two rows of collectors one above the other. Consisting of solar panel mounting material, equipotential bonding clamps, end caps, connecting brackets and 1m thermally insulated piping Note: Was EKSCONRVP	162035-RTX	£65.00												
	Hydraulic connection kit (on-roof) Connection kit for drainback (on-roof), includes connection to solar panel, pitched roof flashing, 2m UV resistant insulation, solar panel temperature sensor and endcaps Available in Anthracite or Brick red	EKSRCRP Brick red	£160.00												
		EKSRCAP Anthracite	£160.00												
	Hydraulic connection kit (in-roof) Connection kit for drainback (in-roof), includes connection to solar panel, solar panel temperature sensor and endcaps	162037-RTX	£104.00												

Solar Drainback Accessories (Continued)

	Description	Part number	Trade Price
	Hydraulic connection kit (flat roof) Connection kit for drainback (flat roof), includes connection to solar panel, flat roof penetration, 8.5m UV resistant insulation and solar panel temperature sensor	162038-RTX	£202.00
	Gravity break set Avoids thermal heat loss from thermal store due to thermo-siphon effect. Advised when piping from heat exchanger is not making a down ward bend at the tank	165070	£8.00
	Solar flow setter Flow regulating valve with flow indicator (2-16 l/min). For balancing solar flow in cascade thermal store installations Note: For use only with EKHWP* only	164102-RTX	£55.00
	Secondary circulation kit Connection kit for secondary hot water connections Note: For use with EKHWP* only	165113	£82.00

Thermal Store for Daikin Altherma High and Low Temperature

This is a hot water thermal storage tank and provides instantaneous hot water.

The tank serves as a heat storage medium. It can be heated by both Daikin Altherma heat pumps and solar energy, available for both drainback and pressurised applications.

	Description	Part number	Trade Price
	Drainback Solar Thermal store (EKHWP***B) Combination with Daikin Altherma HT		
	EKHWP300B with connection kit for ERSQ011-016	UK.THERMAL300DBHT	£1,206.00
	EKHWP500B with connection kit for ERSQ011-016	UK.THERMAL500DBHT	£1,467.00
	Drainback Solar Thermal store (EKHWP***B) Combination with Daikin Altherma LT & MB		
	EKHWP300B with connection kit for ERLQ004-008 & EDLQ05-07 and 3kW immersion heater	UK.THERMAL300DBLT	£1,369.00
	EKHWP500B with connection kit for ERLQ011-016 & E(D/B)HQ014-D16 and 3kW immersion heater	UK.THERMAL500DBLT	£1,660.00
	Pressurised Solar Thermal store (EKHWP***PB) Combination with Daikin Altherma HT		
	EKHWP300PB with connection kit for ERSQ011-016	UK.THERMAL300PHT	£1,297.00
	EKHWP500PB with connection kit for ERSQ011-016	UK.THERMAL500PHT	£1,652.00
	Pressurised Solar Thermal store (EKHWP***PB) Combination with Daikin Altherma LT & MB		
EKHWP300PB with connection kit for ERLQ004-008 & EDLQ05-07 and 3kW immersion heater	UK.THERMAL300PLT	£1,460.00	
EKHWP500PB with connection kit for ERLQ011-016 & E(D/B)HQ014-016 and 3kW immersion heater	UK.THERMAL500PLT	£1,845.00	
	Connection elbow enables easy filling and draining of the storage tank Note: It is recommended that 165210 and 165215 are ordered with every thermal store	165210	£21.00
	Fill and drain connection Note: It is recommended that 165210 and 165215 are ordered with every thermal store	165215	£24.00

Solar Standalone Accessories

The standalone pressurised solar system is designed for use with auxiliary gas boiler and twin coil cylinder. Available in predefined on-roof and in-roof packs (see page 152)

	Description	Part number	Trade Price
	Solar panel (vertical) – small (2006 x 1006 x 85mm), aperture area 1.79m ² , weight 35kg, water content 1.3 L. Max. 6 bar	EKSV21P	£352.00
	Mounting rail for small panels Consisting of mounting profile rails and securing ties Note: Was 162013	162066	£25.00
	4x Support hooks for high profile tiles 4 double height-adjustable roof ties including fixing material for one solar panel Note: Was EKSFIXADP	162036-RTX	£72.00
	4x Support hooks for flat tiles (slate) 4 roof ties for flat roofing, e.g. slate, for one solar panel Note: Was EKSFIXADS	164723	£40.00
	Pump station Consisting of: Pipe connection (diameter 22mm) including pipe compression fittings and support sleeves (5x), flow regulator with 2 x KFE valves, integrated air separator, ball valves with integrated backflow preventor, Grundfos UPM3 Solar 25-75 pump, safety group with pressure gauge, including insulation and mounting accessories	EKS RDS2A	£296.00
	Hydraulic connection kit (pressurised) Connection kit for pressurised only, includes connection to solar panel, 2m UV resistant heat insulation for the external area, solar panel temperature sensor and endcaps	EKS RCP	£117.00
	Solar controller for standalone solar Wall mounted, small and compact. Easy to use solar controller with back-lit graphical illuminated display. Auxiliary heat source timer and pump speed control Note: To control auxiliary gas boiler only	UK.SOLCTRBS4	£199.00
	Twin coil solar cylinder Unvented stainless steel cylinder. Designed for gas boiler auxiliary heating and solar hot water connections. Delivered with full G3 compliance kit including 2-port motorised valve (except expansion vessel - field supply)	FKU-HWS200TC 200L	£500.00*
		FKU-HWS250TC 250L	£525.00*
		FKU-HWS300TC 300L	£570.00*

Note: Further standalone solar components are available to complete the standalone system (see pages 141-143)

* Special offer price

Selecting the right Solar System

Daikin has a full range of solar thermal solutions including Drainback and Pressurised solutions to suit many installation requirements. Solar systems are available to work with heat pumps or with boilers and offer enhanced DHW energy savings.

Use the table below to help select the right kind of solar system for your Daikin heat pump or your existing boiler.

Solar system	Drainback		Pressurised		
Auxiliary heat source	HT, LT & Hybrid Heat Pump		HT, LT & Hybrid Heat Pump	Boiler	
Tank	Thermal Store (EKHWP-B)		Thermal Store (EKHWP-PB)	Twin coil (FKU)	
Panel orientation and size	Vertical 2.6m ²	Vertical 2.0m ²	Vertical 2.6m ²	Horizontal 2.6m ²	Vertical 2.0m ²
On-roof	✓ (page 149)	✓ (page 152)	✓ (page 150)	✓ (page 150)	✓ (page 152)
In-roof	✓ (page 149)	✓ (page 152)	✓ (page 151)	✗	✓ (page 152)
Flat roof	✓ (page 149)	✗	✓ (page 151)	✓ (page 151)	✗

Selecting the right Solar Pack

Daikin offer solar systems in ready to order packs with all the key components include.

After deciding between drainback or pressurised solar, use this table to select the right solar pack for your project.

Daikin Solar Thermal System

Coupling kit for multiple panels	162016-RTX	0	1	2	3	4
Connection cable to disable heat pump	164110-RTX	1	1	1	1	1
Pack price		£936.00	£1,464.00	£1,992.00	£2,520.00	£3,048.00

Vertical in-roof pack	Part number	1 panel pack	2 panel pack	3 panel pack	4 panel pack	5 panel pack
Vertical pack order reference		-	UK.SP2VIDBA/R	UK.SP3VIDBA/R	UK.SP4VIDBA/R	UK.SP5VIDBA/R
This pack contains:		Quantity	Quantity	Quantity	Quantity	Quantity
Vertical flat plate collector	EKSV26P	-	2	3	4	5
Mounting rail for panel	162067	-	2	3	4	5
Hydraulic connection kit (in-roof)	162037-RTX	-	1	1	1	1
Solar controller & pump station*	EKSRRS4A	-	1	1	1	1
Coupling kit for multiple panels	162016-RTX	-	1	2	3	4
In-roof kit for 2x vertical panels	162019	-	1	1	1	1
In-roof extension kit for 1x panel	162020	-	0	1	2	3
Connection cable to disable heat pump	164110-RTX	-	1	1	1	1
Pack price		-	£1,755.00	£2,450.00	£3,145.00	£3,840.00

Vertical flat roof pack	Part number	1 panel pack	2 panel pack	3 panel pack	4 panel pack	5 panel pack
Vertical pack order reference		UK.SP1VADBA/R	UK.SP2VADBA/R	UK.SP3VADBA/R	UK.SP4VADBA/R	UK.SP5VADBA/R
This pack contains:		Quantity	Quantity	Quantity	Quantity	Quantity
Vertical flat plate collector	EKSV26P	1	2	3	4	5
Mounting rail for panel	162067	1	2	3	4	5
Hydraulic connection kit (flat roof) including flat roof penetration	162038-RTX	1	1	1	1	1
Solar controller & pump station*	EKSRRS4A	1	1	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2	3	4
Solar flat roof kit for 2xV26P	162058	1	1	1	1	1
Solar flat roof kit for additional V26P	162059	0	0	1	2	3
Connection cable to disable heat pump	164110-RTX	1	1	1	1	1
Pack price		£1,496.00	£1,984.00	£2,630.00	£3,276.00	£3,922.00

Important:

When installing a Daikin Altherma heat pump and Daikin drainback solar system, the following accessories need to be ordered separately:

EKHWP-B – Thermal store

EKR1HBA – Option PCB for use with Hydrobox for alarm monitoring (Solar priority PCB), not applicable for EDLQ-CV3

EKSCON*** – Solar connection pipe

*When installing an integrated ROTEX Gas Compact Unit and Daikin drainback solar system, order 164126 instead of EKSRRS4A

Solar Packs – Pressurised System for Daikin Altherma

Vertical on-roof profiled tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Vertical pack order reference		UK.SP1VPP	UK.SP2VPP	UK.SP3VPP
This pack contains:		Quantity	Quantity	Quantity
Vertical flat plate collector	EKSV26P	1	2	3
Roof brackets for concrete / profiled tiles x 4	162036-RTX	1	2	3
Mounting rail for panel	162067	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,205.00	£1,765.00	£2,325.00

Vertical on-roof slate / flat tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Vertical pack order reference		UK.SP1VSP	UK.SP2VSP	UK.SP3VSP
This pack contains:		Quantity	Quantity	Quantity
Vertical flat plate collector	EKSV26P	1	2	3
Roof brackets for slate / flat tiles x 4	164723	1	2	3
Mounting rail for panel	162067	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,173.00	£1,701.00	£2,229.00

Horizontal on-roof profiled tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Horizontal pack order reference		UK.SP1HPP	UK.SP2HPP	UK.SP3HPP
This pack contains:		Quantity	Quantity	Quantity
Horizontal flat plate collector	EKSH26P	1	2	3
Roof brackets for concrete / profiled tiles x 4	162036-RTX	1	2	3
Mounting rail for panel	162068	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,227.00	£1,809.00	£2,391.00

Horizontal on-roof slate / flat tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Horizontal pack order reference		UK.SP1HSP	UK.SP2HSP	UK.SP3HSP
This pack contains:		Quantity	Quantity	Quantity
Horizontal flat plate collector	EKSH26P	1	2	3
Roof brackets for slate/flat tiles x 4	164723	1	2	3
Mounting rail for panel	162068	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,195.00	£1,745.00	£2,295.00

Important:

When installing an integrated Daikin Altherma heat pump and pressurised Daikin solar thermal system, the following accessories need to be ordered separately:
 EKHWP-PB - Thermal store
 1620** – Solar pressurised pipe and connectors
 EKR1HBA – Option PCB for use with Hydrobox for alarm monitoring (Solar priority PCB), not applicable for EDLQ-CV3

Solar Packs – Pressurised System for Daikin Altherma (Continued)

Vertical in-roof pack	Part number	2 panel pack	3 panel pack
Vertical pack order reference		UK.SP2VIP	UK.SP3VIP
This pack contains:		Quantity	Quantity
Vertical flat plate collector	EKSV26P	2	3
Mounting rail for panel	162067	2	3
Hydraulic connection kit	EKSRCP	1	1
Solar controller	162084	1	1
Solar pump station	EKSRDS2A	1	1
Solar fluid (20 Litres)	162052-RTX	1	1
Coupling kit for multiple panels	162016-RTX	1	2
In roof kit for 2 x V26P	162019	1	1
In roof extension kit for additional V26P	162020	0	1
Solar expansion vessel (25 litres)	162050	1	1
Connection cable to disable heat pump	164110-RTX	1	1
Pack price		£1,607.00	£2,106.00

Vertical flat roof pack	Part number	1 panel pack*	2 panel pack	3 panel pack
Vertical pack order reference		UK.SP1VAP	UK.SP2VAP	UK.SP3VAP
This pack contains:		Quantity	Quantity	Quantity
Vertical flat plate collector	EKSV26P	1	2	3
Mounting rail for panel	162067	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKSRDS2A	1	1	1
Solar fluid (20 Litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar flat roof kit for 2xV26P	162058	1	1	1
Solar flat roof kit for additional V26P	162059	0	0	1
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,531.00	£2,019.00	£2,665.00

Horizontal flat roof pack	Part number	1 panel pack	2 panel pack	3 panel pack
Horizontal pack order reference		UK.SP1HAP	UK.SP2HAP	UK.SP3HAP
This pack contains:		Quantity	Quantity	Quantity
Horizontal flat plate collector	EKSH26P	1	2	3
Mounting rail for panel	162068	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller	162084	1	1	1
Solar pump station	EKSRDS2A	1	1	1
Solar fluid (20 Litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar flat roof kit for H26P	162060	1	1	1
Solar flat roof kit for additional H26P	162061	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Connection cable to disable heat pump	164110-RTX	1	1	1
Pack price		£1,344.00	£1,984.00	£2,624.00

*** Important:**

When ordering the **vertical** flat roof pack, please be aware the solar flat roof kit is sufficient for two vertical panels, thus some wastage will occur (the wastage is not enough to be used for another panel).

Important:

When installing an integrated Daikin Altherma heat pump and pressurised Daikin solar thermal system, the following accessories need to be ordered separately:

- EKHWP-PB - Thermal store
- 1620** – Solar pressurised pipe and connectors
- EKRP1HBA – Option PCB for use with Hydrobox for alarm monitoring (Solar priority PCB), not applicable for EDLQ-CV3

Solar Packs – Standalone Pressurised System for use with Auxiliary Gas Boiler

Vertical on-roof profiled tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Vertical pack order reference		UK.V21PP1	UK.V21PP2	UK.V21PP3
This pack contains:		Quantity	Quantity	Quantity
Vertical flat plate collector (small panel)	EKSV21P	1	2	3
Roof brackets for concrete / profiled tiles x 4	162036-RTX	1	2	3
Mounting rail for panel	162066	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller (for auxiliary gas boiler)	UK.SOLCTRBS4	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Pack price		£1,047.00	£1,460.00	£1,873.00

Vertical on-roof slate / flat tile pack	Part number	1 panel pack	2 panel pack	3 panel pack
Vertical pack order reference		UK.V21SP1	UK.V21SP2	UK.V21SP3
This pack contains:		Quantity	Quantity	Quantity
Vertical flat plate collector (small panel)	EKSV21P	1	2	3
Roof brackets for slate / flat tiles x 4	164723	1	2	3
Mounting rail for panel	162066	1	2	3
Hydraulic connection kit	EKSRCP	1	1	1
Solar controller (for auxiliary gas boiler)	UK.SOLCTRBS4	1	1	1
Solar pump station	EKS RDS2A	1	1	1
Solar fluid (20 litres)	162052-RTX	1	1	1
Coupling kit for multiple panels	162016-RTX	0	1	2
Solar expansion vessel (25 litres)	162050	1	1	1
Pack price		£1,047.00	£1,460.00	£1,873.00

Vertical in-roof pack	Part number	2 panel pack	3 panel pack
Vertical pack order reference		UK.V21IP2	UK.V21IP3
This pack contains:		Quantity	Quantity
Vertical flat plate collector (small panel)	EKSV21P	2	3
Mounting rail for panel	162066	2	3
Hydraulic connection kit	EKSRCP	1	1
Solar controller (for auxiliary gas boiler)	UK.SOLCTRBS4	1	1
Solar pump station	EKS RDS2A	1	1
Solar fluid (20 litres)	162052-RTX	1	1
Coupling kit for multiple panels	162016-RTX	1	2
Solar expansion vessel (25 litres)	162050	1	1
In roof kit for 2 x V21P	162017	1	1
In roof extension kit for additional V21P	162018	0	1
Pack price		£1,460.00	£1,873.00

Important:

Packs detailed above are not designed to be used with Daikin Altherma heat pumps.
 The above packs are designed to be used with an auxiliary gas boiler and twin coil cylinder.
 To complete the Daikin standalone pressurised solar system, please order twin coil cylinder (FKU-HWS***TC).

ROTEX underfloor heating system is designed to work seamlessly with the Daikin Altherma range to provide high heat pump efficiency and low surface temperatures for the most comfortable room climate. When partnered with heat pumps, UFH with low flow temperatures helps to achieve high heat pump efficiencies and even higher running cost savings.

- > Energy saving and highly versatile, can be used with heat pumps and condensing boilers
- > Simple installation with easy to lay components
- > Additional energy benefits recognised in SAP and MCS
- > Rotex Monopex is ideal for low temperature systems such as heat pumps and is available in a variety of pipe sizes
- > Rotex System 70 is ideal for mixed UFH and radiator systems and commercial heating systems with primary flow temperatures 55 - 70°C

For information on Daikin's underfloor heating design process go to page 156.

Underfloor Heating System

Heat Emission Plate

Dual channel aluminium spreader plates for timber suspended or battened floor installations. For joists at 400mm centres. Plate dimensions 1000x390mm

	Description	Length	Part number	Trade Price
	Spreader plates For Ø 17mm pipe	10 (3.9m ²)	171141	£70.00

Underfloor Heating System

Underfloor Heating Pipes

Monopex heating pipes: Thick-walled, linked basic PE-X pipe with oxygen-tight barrier for Monopex low temperature underfloor heating systems.

	Description	Length	Part number	Trade Price
	Monopex 14 PE-X 14 x 2 OD For Monopex underfloor heating system	120m	170008	£133.00
		240m	170009	£266.00
	Monopex 14 ALU thick-walled PE-X 14 x 2 OD Aluminium coating and PE external layer. For Monopex underfloor heating systems	120m	170604	£189.00
		240m	170605	£375.00
	Monopex 17 PE-X 17 x 2 OD For Monopex underfloor heating system	120m	170029	£148.00
		240m	170028	£295.00
		600m	170062	£734.00
	Monopex 20 PE-X 20 x 2 OD For Monopex underfloor heating system	120m	170030	£170.00
		240m	170109	£338.00
		400m	170108	£562.00
	Protective pipe Black corrugated pipe made of plastic as additional insulation in the area of the manifold and expansion joints	25m	170053 Ø 19/25mm	£15.00
		25m	170098 Ø 16/21mm	£12.00
		75m	170001 Ø 23/28mm	£49.00

DUO heating pipes: Thick-walled linked PE-X basic pipe, with oxygen-tight barrier, and additional highly flexible PE ribbed pipe. For underfloor heating systems operated in direct combination with other heating surfaces, e.g. radiators.

	DUO 17 PE-X 17/12 x 2 OD For system 70 underfloor heating & heating radiator connection	120m	170068	£207.00
		Outer pipe Ø 17mm Inner pipe 12 x 2mm	240m	170086
	DUO 17 ALU PE-X 17/12 x 2 OD With aluminium coating and PE external layer. For system 70 radiator connection and underfloor heating	120m	170601	£239.00
		Outer pipe Ø 17mm Inner pipe 12 x 2mm	240m	170602
	DUO 25 PE-X 25/18 x 2 OD For system 70 industrial underfloor heating	200m	170050	£453.00

Underfloor Heating System

Manifolds

RMX manifold: RMX heating circuit manifold, for underfloor heating systems and radiators. Suitable for the smallest fitting heights. Buy clamping ring sets separately to suit pipe.

	Description	Quantity per pack	Part number	Trade Price
	Manifold RMX 2-port	1	172702	£110.00
	Manifold RMX 3-port	1	172703	£129.00
	Manifold RMX 4-port	1	172704	£152.00
	Manifold RMX 5-port	1	172705	£174.00
	Manifold RMX 6-port	1	172706	£197.00
	Manifold RMX 7-port	1	172707	£220.00
	Manifold RMX 8-port	1	172708	£242.00
	Manifold RMX 9-port	1	172709	£265.00
	Manifold RMX 10-port	1	172710	£288.00
	Manifold RMX 11-port	1	172711	£308.00
	Manifold RMX 12-port	1	172712	£332.00
		RMX actuator (230V) Actuator for RMX manifold and kombi box	1	175145

Clamping ring set on RMX heating circuit manifold for flow and return per heating circuit

	RMX connection set DUO17	2	170312	£8.00
	RMX connection set Monopex 14	2	170314	£8.00
	RMX connection set Monopex 17	2	170317	£7.00
	RMX connection set DUO25	2	170318	£7.00
	RMX connection set Monopex 20	2	170320	£7.00
	RMX manifold isolating valves 1"	2	175514	£21.00

HKV manifold: HKV heating circuit manifold, suitable for underfloor heating and radiators, with fast mounting system.

	Description	Quantity per pack	Part number	Trade Price
	Manifold HKV 2-port	1	172502	£75.00
	Manifold HKV 3-port	1	172503	£90.00
	Manifold HKV 4-port	1	172504	£107.00
	Manifold HKV 5-port	1	172505	£121.00
	Manifold HKV 6-port	1	172506	£143.00
	Manifold HKV 7-port	1	172507	£153.00
	Manifold HKV 8-port	1	172508	£169.00
	Manifold HKV 9-port	1	172509	£183.00
	Manifold HKV 10-port	1	172510	£200.00
	Manifold HKV 11-port	1	172511	£215.00
	Manifold HKV 12-port	1	172512	£232.00
	Manifold HKV 13-port	1	172513	£247.00
	Manifold HKV 14-port	1	172514	£303.00
		HKV actuator (230V) Actuator for HKV manifold and kombi box	1	175110

Clamping ring set on HKV heating circuit manifold for flow and return, per heating circuit

	HKV connection set DUO17	2	177012	£7.00
	HKV connection set Monopex 14	2	177014	£7.00
	HKV connection set Monopex 17	2	177017	£7.00
	HKV connection set DUO25	2	177018	£7.00
	HKV connection set Monopex 20	2	177020	£8.00
	Connection kit for HKV2 to HKV14 Contains 2 x isolating valves (1"), 2 x connection pieces, 2 x filling and draining valves and 2 x temperature gauges	1	175510	£71.00

Manifold Accessories

	Description	Quantity per pack	Part number	Trade Price
	Coupling nipple (3/4") for combination with 1703** clamping ring sets	2	177227	£8.00
	Connection nipple (3/4" PEX x 1/2" male) for combination with 1703** clamping ring sets	2	177327	£6.00
	Manifold cabinet up to 7-port	1	174110	£131.00
	Manifold cabinet up to 10-port	1	174115	£145.00
	Manifold cabinet up to 14-port	1	174120	£166.00
	Kombi box Subdivision for distribution room-by-room and controller for max. 2 underfloor heating circuits with system 70 for DUO 17 heating pipe and optionally with a radiator complete in UP case incl. cover plates, without clamping ring set and actuator	1	172415	£99.00

Underfloor Heating (UFH) System Design Process

To prepare an accurate bill of materials and quotation for your underfloor heating project, we need to carry out a detailed UFH system design. This will take account of parameters including room heat losses, water flow temperature, floor construction, floor coverings and preferred manifold positions.

If you require an UFH system design, please contact your sales representative or your local branch for assistance. To enable us to carry out the UFH design, you will need to submit:

- > Autocad drawings – floor plans and elevations
- > Completed Daikin UFH design request form (available from your local branch)

Please allow up to 20 working days from submitting your drawings to receiving your quotation.

Once you have placed an order for the UFH materials, we will send you the UFH system design for your approval prior to shipping the materials.

Insulating Strips and Installation Accessories

	Description	Quantity per pack	Part number	Trade Price
	Tacker gun Tacker gun for 60mm pipe staples. The tacker gun can be used to secure pipe directly to floor insulation	1	171134	£208.00
	Pipe staples 60mm pipe staples for use with tacker gun (171134) and high density insulation with DPM	300	171137	£36.00
	Clip rail 1m pieces, pipe centres 50mm	100	171224	£282.00
	Clip rail nail KN06	100	171127	£28.00
	Edging strip For cement or anhydrite screed. PE foam with welded foil, height 150mm, 8mm thick	25m	171101	£16.00
	Edging strip For free-flowing screed PE foam with welded foil, and additional sealing cord. Height 150mm, 10mm thick	25m	171126	£31.00
	Combined pipe cutters and stripping pliers RAZ1	1	171110	£55.00
	Pipe decoiler RAW 240 for <240m	1	171006	£546.00
	Pipe clips	50	171117 For Ø 17-20mm	£6.00
			171125 For Ø 25mm	£9.00
	Pipe bend This is recommended to facilitate the bend of the pipe up-to the manifold	10	171142 For Ø 14-18mm	£16.00
			171143 For Ø 20-22mm	£20.00

Underfloor Heating System

Underfloor Heating Room Controls Basic Range

Note: Cannot be combined with advanced range (see page 159)

	Description	Quantity per pack	Part number	Trade Price
	RTR5 control Electronic room temperature control (230V)	1	175117	£21.00
	RTK control Room temperature control with heating/cooling function	1	175125	£31.00
	FRT wireless control Wireless room temperature control	1	175120	£80.00
	Single FRT wireless receiver Receiver FEM1 for 1x FRT	1	175121	£89.00
	Multiple FRT wireless receiver Receiver FEM4 for 4x FRT	1	175122	£158.00

Underfloor Heating System

Wiring Centres and Accessories Basic Range

Note: Cannot be combined with advanced range (see page 159)

	Description	Quantity per pack	Part number	Trade Price
	Wiring box for 14x SAT Wiring box 6xRTR and max 14xSAT DIN rail field supplied	1	175131	£64.00
	Wiring box extension for 4x SAT Wiring box extension for 175131. Additional 2xRTR and Max 4x SAT DIN rail field supplied	1	175132	£27.00
	Pump module for wiring box Provides on/off signal to the heat source Note: Can only be combined with wiring box 175131. One required per UFH manifold DIN rail field supplied	1	175134	£64.00

Underfloor Heating System

Underfloor Heating Room Controls **Advanced Range**

Modern aesthetics, easy to install and greater user comfort

Note: Cannot be combined with basic range (see page 158)

	Description	Quantity per pack	Part number	Trade Price
	Room thermostat (wired) - Electronic room temperature control (5V) - Adjustment range 5-26°C - Display of heating and cooling mode (red and blue LED)	1	175139	£28.00
	Room thermostat (RF) - Electronic room temperature control - Adjustment range 5-26°C - Solar powered (no batteries required) - Allow 24 hours to charge before commissioning	1	175142	£133.00

Underfloor Heating System

Wiring Centres and Accessories **Advanced Range**

Modern aesthetics, easy to install and greater user comfort

Note: Cannot be combined with basic range (see page 158)

	Description	Quantity per pack	Part number	Trade Price
	Wiring centre - 6 channels - 4 actuators (230 V) per channel - Automatic heating/cooling switchover DIN rail field supplied	1	175140	£126.00
	Wiring centre - 2 channels - 4 actuators (230 V) per channel - Automatic heating/cooling switchover DIN rail field supplied	1	175141	£62.00
	Wiring centre (RF) - 6 channels - 4 actuators (230 V) per channel - Automatic heating/cooling switchover - Including antenna for wireless communication DIN rail field supplied	1	175143	£237.00
	Wiring centre (RF) - 2 channels - 4 actuators (230 V) per channel - Automatic heating/cooling switchover - Including antenna for wireless communication DIN rail field supplied	1	175144	£157.00
	Wiring centre power module To supply power to the wiring centres, including: - Pump input/output for heating and cooling DIN rail field supplied	1	175137	£118.00
	Wiring centre clock module - Removable clock module - 2 setback timers for heating circuits Note: To be combined with the wiring centre power module	1	175138	£62.00

Heat Pump Convectors

Heat pump convectors can provide both heating and cooling if required and can be used with the Daikin Altherma heat pump to offer a compact and highly efficient solution:

- > Designed to operate at low flow temperature (35°C) to optimise the efficiency of an air-to-water heat pump
- > Quiet operation and no draughts
- > Able to heat and cool
- > Available in 1.5 and 2kW

Daikin Heat Pump Convectors

Indoor Unit				FWXV15A	FWXV20A
Description				Cased, low wall mount type, 2-pipe*	
Must be ordered with:				EKVKHPC	EKVKHPC
Combined Trade Unit Price				£511.00	£550.00
Heating capacity	Total capacity	Nom.	kW	1.5	2.0
Cooling capacity	Total capacity	Nom.	kW	1.2	1.7
	Sensible capacity	Nom.	kW	0.98	1.4
Power input	Heating	Nom.	kW	0.013	0.015
	Cooling	Nom.	kW	0.013	0.015
Dimensions	Height x Width x Depth		mm	600 x 700 x 210	
Weight			kg	15	
Piping connections	Drain/OD/Inlet/Outlet		mm/inch	18/G 1/2/G 1/2	
Sound pressure level	Heating	Nom.	dB(A)	19	29
	Cooling	Nom.	dB(A)	19	29
Power supply	Phase/Frequency/Voltage		Hz/V	1-phase / 230V / 50Hz	

Nominal capacity based on following conditions:

Heating: indoor temp, 20°CDB; entering water temp. 45°C, water temperature drop 5°C.

Cooling: Indoor temp. 27°CDB; entering water temp. 7°C, water temperature rise 5°C.

Features:

- > The highly efficient, low noise Daikin heat pump convectors is designed to provide the maximum comfort and high efficiency in combination with Daikin Altherma heat pumps
- > The heat pump convectors improves system efficiency compared to a combined under floor heating and radiator system and to a fan coil heating system
- > The Daikin heat pump convectors has been designed to work effectively at low temperatures, while retaining a compact size compared to an equivalent output radiator sized for 45°C
- > The heat pump convectors can easily replace existing heat emitters
- > The unit is very quiet in operation and is ideal for bedroom applications
- > The unit has a quiet operation mode which can be selected using the remote controller
- > The sound levels are as low as 18dB(A) on 2kW system and 12dB(A) on 1.5kW system on the quiet mode
- > Daikin heat pump convectors offer a solution combined with UFH systems to provide heat in areas where UFH is difficult to integrate
- > It is designed to support heating only and heating / cooling applications
- > When combined with Daikin Altherma outdoor units, the heat pump convectors can be linked together for total system control, additional comfort and increased efficiency
- > Additional third party controls are needed to link simple fan coil systems with Daikin Altherma heat pumps
- > Delivered with individual controller and with 2-way valve
- > Drain pan is included

Notes:

- i) * Please note that EKVKHPC (2 way valve) needs to be ordered as a separate item, but price shown includes the value of this part

Conveni-Pack (CVP)

Conveni-Pack is a compact, low noise system which integrates high and low temperature refrigeration along with heating and cooling into one system. It's a total solution that helps retailers save energy and reduce their environmental impact.

Benefits

- > **Optimum efficiency:** inverter driven outdoor units match system output to the actual demand in order to reach optimum efficiency under all conditions
- > **Connection flexibility:** supports a wide range of refrigeration and cooling cases
- > **Save energy:** by recovering the heat extracted from the connected refrigeration appliances and using sophisticated controls, energy savings of up to 50% can be reached compared with conventional 3P systems
- > **Small footprint:** along with reduced piping makes the compact Conveni-Pack ideal for densely populated urban areas
- > **Flexible:** VRV (Variable Refrigerant Volume) technology for flexible application range. Full range of VRV fan coils available together with air curtains
- > **Minimal noise:** lowest operating sound level including night set back function

ZEAS Condensing Units

When you select a refrigeration condensing unit, you want premium performance with simple installation and maintenance. That's why you should specify Daikin ZEAS condensing units.

A complete solution for refrigeration applications

Compact yet powerful and extremely energy efficient, Daikin ZEAS condensing units offer an industry-leading solution for all kinds of installation projects.

ZEAS is an adaptable and controllable solution for all kinds of environments with fluctuating loads such as supermarkets, hotels, restaurants, hospitals and florists, as well as food production facilities such as cold storage, and blast coolers and freezers.

Delivering all the benefits of inverter controlled VRV technology for commercial refrigeration systems, ZEAS offers a comprehensive product range suitable for low temperature applications of 5.51 to 15.4 kW at -35/+32°C and medium temperature applications of 12.5 to 37.9 kW at -10°C /+32°C.

Its small footprint and low sound levels offer installation flexibility, so you can gain larger capacities even in small spaces. What's more, the ZEAS solution comes fully packaged and programmed, with minimal pipe work required, so installation time and cost is reduced.

All in all, it's a quality solution that delivers maximum refrigeration capacity with minimal fuss.

ZEAS condensing units offer:

- > Highly efficient packaged refrigeration condensing units
- > Low noise mode, reducing noise by a further 5 dBA
- > Optimum efficiency, Inverter driven compressor and condenser fan motors.

Multi-ZEAS Condensing Units

The Multi-ZEAS units deliver the higher capacities required for larger supermarkets, food storage and processing plants, while reducing energy consumption by 35%, compared with traditional refrigeration systems.

Multi-ZEAS provides a superior solution to the traditional rack systems typically used for bigger capacities, because the units can be connected easily – in master and slave combination – so installation piping is reduced and installation time is much quicker. The new high capacity Multi-ZEAS consists of two 15hp units or two 20hp units. This system offers the perfect solution for multiple refrigeration needs in supermarkets and for applications with fluctuating loads and high energy efficiency requirements, such as blast coolers and freezers, cold storage, food outlets and restaurants.

ZEAS condensing units are far quieter than traditional units, because inverter control keeps fan speeds low while still meeting cooling demand. At night maximum fan speeds can be lowered to reduce noise, with only a limited loss of refrigeration capacity. The 'plug and play' units come fully equipped and do not need to be installed in a plant room, so retail space is maximised. All ZEAS units have optimised controls, which can communicate with a third party monitoring system or building management system via Daikin's powerful Modbus interface. Servicing and maintenance is also simple.

Accessories for ZEAS and Conveni-Pack

BHGP26A1

Digital pressure gauge kit

The digital measurement display allows you to diagnose a unit at a glance and it can be used with all ZEAS units and Conveni-Pack systems.

- > Digital measurement display for fixed installation or service applications
- > Displays high and low pressure
- > Displays error codes in the event of a fault
- > Displays up to 32 operating parameters
- > Displays error code history (last three)
- > Scrolls and stores output values
- > Automatically returns to normal operating display mode

BHGP26A1

Part No	Description	Trade Price
BHGP26A1	Digital pressure gauge	£320.00

BRR9A1V1

Modbus communication kit

The Daikin Modbus Communication Interface lets you fully integrate Daikin ZEAS and Daikin Conveni-Pack systems with building control automation networks and other monitoring systems.

The interface allows you to read all the operational parameters and control important values using the Modbus protocol. This unifying component transforms ZEAS and Conveni-Pack into a transparent, customisable refrigeration unit and means that you can create object-specific and energy-optimised shop concepts, including remote monitoring application.

Pro-interfaces can be used to connect up to 32 ZEAS units, and are also suitable for use with Conveni-Pack systems and the Booster.

BRR9A1V1

Control values

- > Target evaporation temperature
- > Low pressure level for on and off points
- > Forced stop
- > Error messages can be cancelled remotely

Display values

Industrial Condensing Units with Screw Compressor

Condensing unit for industrial refrigeration

- > High energy efficiency: inverter controlled compressor, economiser, high performance condenser
- > Possibility of having a stand-by compressor
- > Easy installation, ready to connect evaporators
- > Integrated starter and control panel with electronic controller
- > Space saving construction due to the compact design of the condenser coils arranged in a 'W' configuration
- > Low sound operation
- > Approved according to EN 378: 2008 (Safety and environmental requirements)
- > Refrigerants: R-404A, R-134a, R-407C, R-507A

Optional

- > Variable speed inverter technology
- > Variable condenser fan speed
- > Economiser (sub cooler)
- > Optional standby compressor on single compressor systems
- > Low sound level unit with sound pressure level 64 dBA at 10 metres. Sound reduction kits can be supplied with lower sound level up to 52 dBA at maximum capacity

Applications

- > Cold stores
- > Blast chillers
- > Blast freezers
- > Food processing
- > Food distribution centres
- > Large supermarkets

Daikin Chillers

Whatever your needs in climate control or process chilling, there is a system that has proved its value in many situations – from factories and warehouses to hotels and department stores, and even district cooling for residential applications.

Daikin's ranges of air-cooled and water-cooled chillers are designed to suit every application – large or small – offering the ultimate in flexibility and control. The unique combination of advanced technology, experience and reliability make Daikin chillers the ideal choice.

Daikin chillers have nominal cooling capacities of 5kW to 2,000kW (air-cooled) or 13kW to 2,156kW (water-cooled).

Worldwide experience

A global leader in HVAC solutions, Daikin has the world's most advanced facilities for air conditioning research and development, meaning that we can manufacture all main chiller components (compressors, fans, condenser coils, software) in-house.

Highest efficiency

Using the latest technology, Daikin achieves industry-leading efficiency and energy-saving operation for outstanding cost saving performance.

- > Lowest total cost of ownership
- > Fast payback time
- > Environment-friendly solutions

Quality, reliability

- > Zero defect policy ensures quality of components and finished products
- > All chillers factory run and subjected to quality audit before shipment
- > Eurovent and AHRI certification

High Efficiency Inverter Chiller Ranges

Why break from tradition?

- > Seasonal efficiency
- > Seasonal quietness
- > Low starting currents
- > Flexibility for new build or replacement projects

Benefits for the installer

- > Factory leak-tested and pre-charged
- > High serviceability
- > User-friendly smart controls which can be integrated easily with building management systems

Benefits for the consultant

- > Multiple options available, e.g. rapid restart, variable speed water pumps, smart energy meter, EC fans
- > Ideal for both new and retrofit projects: same footprints of non-inverter unit with higher efficiencies and performance

Benefits for the end user

- > Rapid payback of three years for comfort cooling applications
- > 50% reduction of energy consumption
- > Designed for sound-sensitive environments

High efficiencies both at full load and part load

- > Daikin compressor with in-built inverter and Variable Volume Ratio (VVR) for optimised efficiency
- > In-house developed software with dynamic condensing pressure management and innovative economiser control logic

Rapid return on investment

- > Payback of three years, compared to a non-inverter unit for comfort cooling applications
- > Less than one year for process cooling applications

Perfect comfort level

- > Infinitely variable load regulation
- > Precise leaving water temperature control thanks to stepless regulation

Compact design

- > More compact heat exchanger with superior efficiencies
- > Reduced electrical panel dimensions thanks to the inverter compressor mounted.

Mini chillers

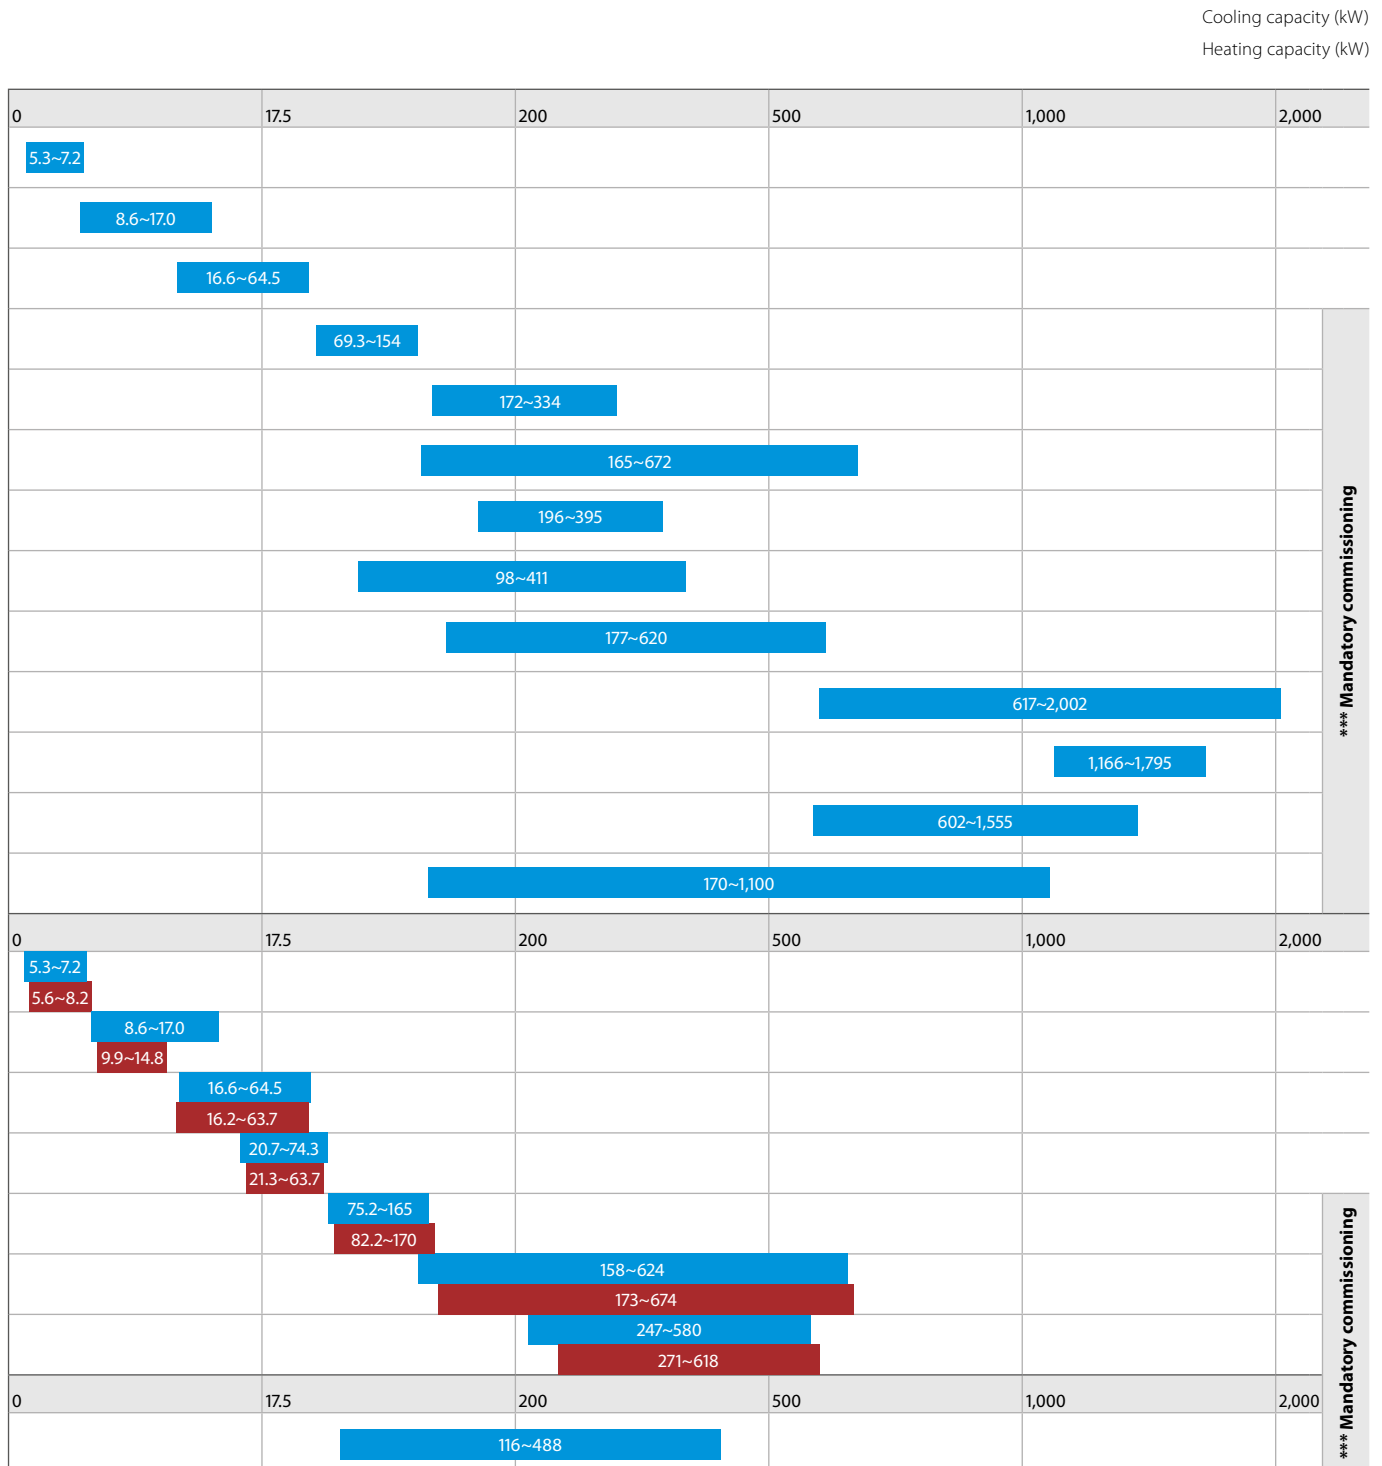

Ideal for residential or light commercial applications, Daikin mini chillers are equipped with an inverter swing or scroll compressor allowing a smooth, more reliable and energy-efficient operation with low noise levels and class-leading ESEERs.

Air cooled scroll chillers

Daikin scroll chillers are designed for small and medium cooling and heating capacities. Our wide range of models matches every building's air conditioning and process cooling needs.

Air cooled screw chillers

Manufactured for large capacities, Daikin screw chillers deliver unparalleled reliability and efficiency, both for comfort and process cooling. Equipped with an inverter they provide high efficiency at part load.

Water cooled scroll chillers

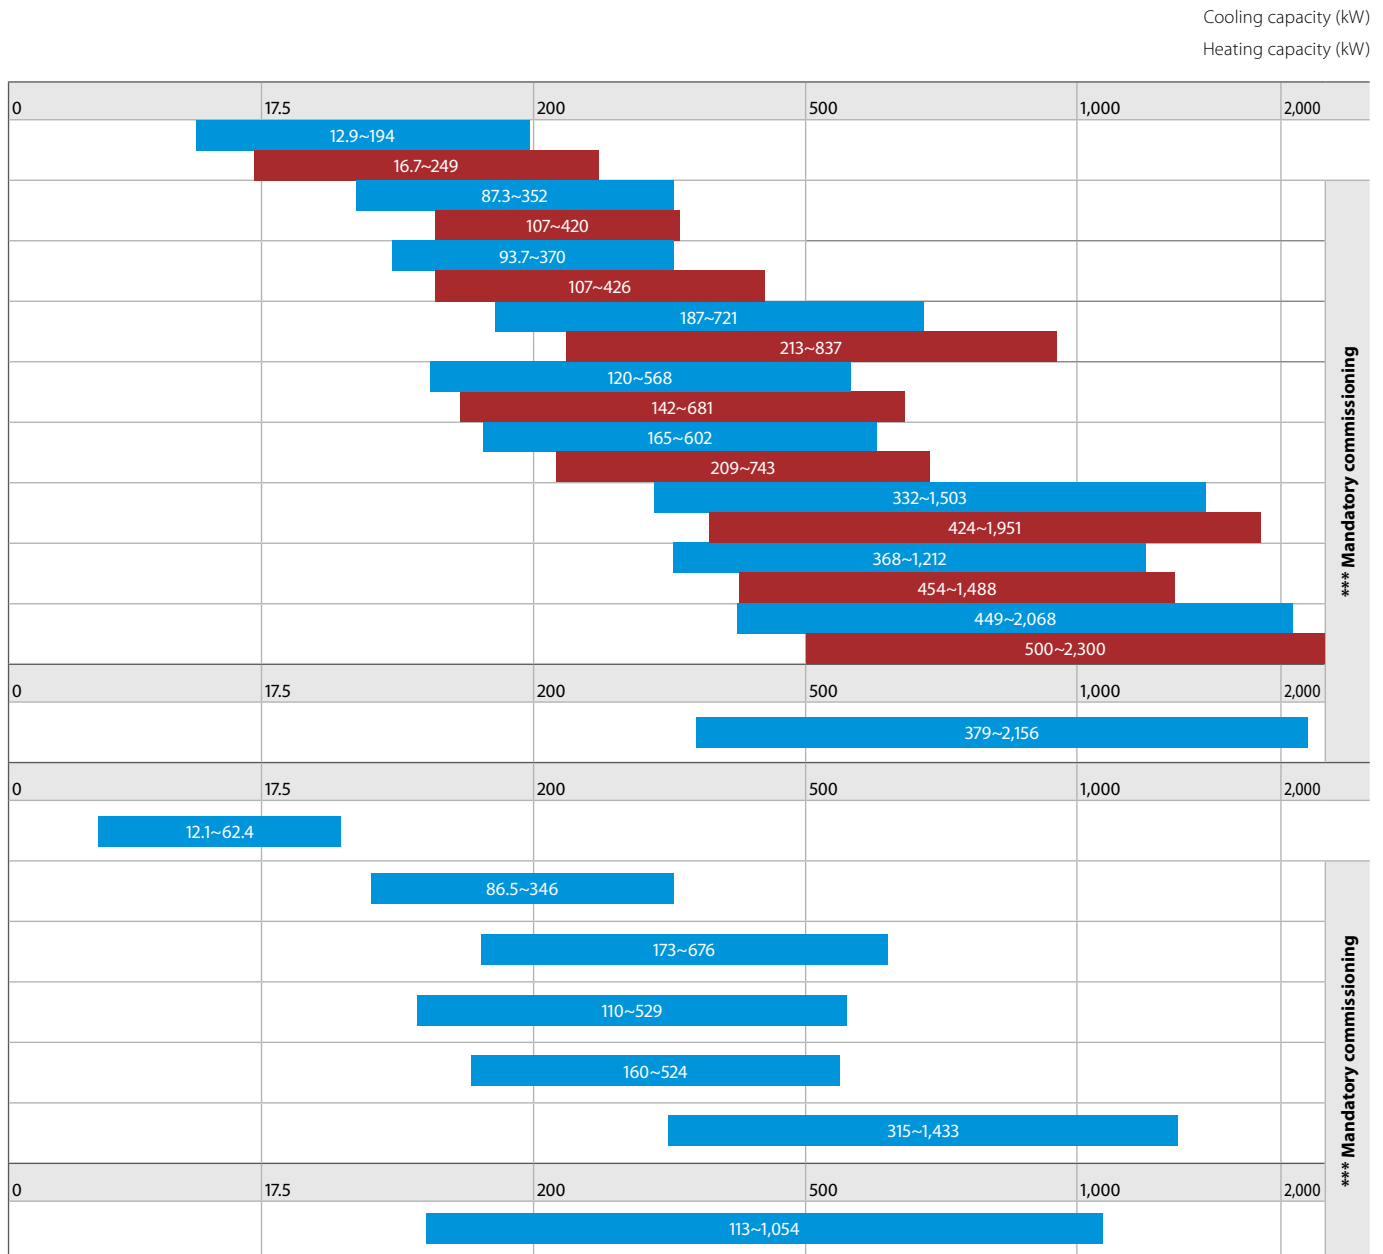

These units are among the most efficient, quiet and reliable chillers available today which can be easily integrated with the HVAC system of your choice.

Water cooled screw chillers

The Daikin water cooled screw chillers provide the ideal solution for sound sensitive environments. Applications range from comfort cooling to ice making.

Water cooled, oil free centrifugal chillers

With a small footprint, quiet compressor and ability to integrate easily with existing HVAC systems, this chiller is the ideal solution for large cooling requirements (e.g. district cooling) and offers a return on investment throughout its lifecycle.

Daikin Commissioning & Maintenance

Model	Description	Net Price
UK.FSCC/SMALL	Commissioning for small size chiller <70kW (price per chiller)	£685.00
UK.FSCC/MEDIUM	Commissioning for medium size chiller 70-999kW (price per chiller)	£877.50
UK.FSCC/LARGE	Commissioning for chiller large >1000kW ~ (price per chiller)	£1,170.00
UK.FSCM/SMALL	Maintenance contract for small size chiller <70kW (price per maintenance visit)	£342.50
UK.FSCM/MED	Maintenance contract for medium size chiller 70-999kW (price per maintenance visit)	£685.00
UK.FSCM/LARGE	Maintenance contract for large size chiller >1000kW ~ (price per maintenance visit)	£1,027.50

Notes:

- Commissioning is mandatory on all chillers with a nominal capacity >70kW and as indicated on the product overview pages 174-177

Please contact your regional service department for further information on these services.

Fan Coil Units

Fan Coil Units are a highly efficient means of turning a water chiller, heat pump or hot water boiler into an efficient, quiet air conditioning system. These units are an effective solution to provide a comfortable environment for both commercial and residential applications. Daikin offers a wide range of Fan Coil Units for both concealed and exposed applications, to suit particular installation requirements. Many of these are available with Brushless Direct Current (BLDC) Fan Motors providing high energy efficiency and comfort levels.

High Efficiency BLDC Fan Coil Units

High efficiency BLDC Fan Coil units for comfort cooling / heating.

Brushless DC Motors for:

- > Higher operational efficiency
- > Tighter comfort control
- > Low sound levels

Benefits for the installer

- > Reduced amount of sizes; less stock space needed
- > Modular designs for multiple configurations
- > Easy integration in BMS system via modbus protocol*

* except for FWG-AT/AF range

Benefits for the consultant

- > Best solution in the market in order to have top efficiency, best comfort and lowest sound levels

Benefits for the end user

- > High comfort level
- > Up to 70% savings on running costs
- > Controller with timer programmed operating mode

Higher efficiency than AC (Alternative Current) motor

- > Up to 70% energy savings
- > No heat generation
- > No power losses
- > Higher efficiency than AC motors to reach set point

High comfort level

- > Less fluctuation of air temperature and relative humidity
- > More consistent output level
- > Stepless speed change for gradual air output
- > More accurate adjustments to reach set point

Low sound levels

- > Lower minimum rotation speed
- > No start-stop sequence
- > Gradual air output

Fan Coil Units

Type	Model	Product name	Fan motor type
Ceiling mounted cassette	Roundflow cassette - Brushless DC fan motor unit for ceiling mounting - 360° air discharge ensures uniform air flow - Integrated fresh air intake - Easy installation in corners - Standard drain pump with 850 mm lift	 FWC-BT/BF	 BLDC
	4-way blow ceiling mounted cassette - AC fan motor unit for ceiling mounting - Integrated fresh air intake - Horizontal auto swing - Easy installation in corners - Standard drain pump with 750 mm lift	FWF-BT/BF	 AC
Floor standing unit	Floor standing unit - Brushless DC fan motor for vertical mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels	FWZ-AT/AF	 BLDC
	Floor standing unit - AC fan motor unit for horizontal or vertical concealed mounting - Insulated valve packages, no extra drain pan required - Fast-on connections for electrical options: no tools needed - Easy maintenance	FVW-DAT/DAF	 AC
Flexi type unit	Flexi type unit - Brushless DC fan motor unit for horizontal or vertical mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels	FWR-AT/AF	 BLDC
	Flexi type unit - AC fan motor unit for horizontal or vertical concealed mounting - Insulated valve packages, no extra drain pan required - Fast-on connections for electrical options: no tools needed - Easy maintenance	FWL-DAT/DAF	 AC
	Concealed flexi type unit - Brushless DC fan motor unit for horizontal or vertical concealed mounting - Continuous air flow regulation and fan speed modulation - Up to 70% energy savings - Low sound levels	FWS-AT/AF	 BLDC
	Concealed flexi type unit - AC fan motor unit for horizontal or vertical concealed mounting - Insulated valve packages, no extra drain pan required - Fast-on connections for electrical options: no tools needed - Easy maintenance	FWM-DAT/DAF	 AC
Wall mounted unit	Wall mounted unit - AC fan motor unit for wall mounting - High aesthetic cabinet design - Optimum air distribution - Easy installation - 3-speed fan motor	FWT-CT	 AC
Concealed ceiling unit	Concealed ceiling unit with medium ESP - Brushless DC fan motor unit for horizontal concealed mounting - Instant adjustment to temperature and relative humidity changes - Available static pressure up to 80 Pa - Low sound levels	FWP-AT	 BLDC
	Concealed ceiling unit with medium ESP - AC fan motor unit for horizontal concealed mounting - Available static pressure up to 80 Pa - 7-speed electrical motors (thermal protection on windings) - Easy maintenance	FWB-BT	 AC
	Concealed ceiling unit with high ESP - Brushless DC fan motor unit for horizontal concealed mounting - Instant adjustment to temperature and relative humidity changes - Available static pressure up to 120Pa - Low sound levels	FWN-AT/AF	 BLDC
	Concealed ceiling unit with high ESP - AC fan motor unit for horizontal or vertical concealed mounting - Available static pressure up to 120 Pa - Easy maintenance	FWD-AT/AF	 AC

Capacity conditions

EUROVENT conditions

Cooling

27°C db / 19°C wb - Entering water 7°C
 - Leaving water 12°C

Heating 4 Pipe

20°C db - Entering water 70°C
 - Leaving water 60°C

Heating 2 Pipe

20°C db - Entering water 50°C
 - Flow rate as in cooling mode

Floor Standing and Flexi Fan Coil Unit Accessories

Loose Accessory Options:

FWZ, FWR, FWS	02-03	06	08
2-pipe 3-way 230V on/off valve kits c/w lockshields	E2MV03A6		E2MV10A6
	£127.00		£134.00
4-pipe 3-way 230V on/off valve kits c/w lockshields	E4MV03A6		E4MV10A6
	£228.00		£241.00
Vertical drainpan		EDPVB6	
		£5.00	
Horizontal drainpan		EDPHB6	
		£5.00	
Advanced Plus Electronic Controller		FWEC3A	
		£119.00	
Split Electronic Controller Power control board + Control panel		FWECSA = FWEC SAP + FWEC SAC	
		£148.00 or £85.00 + £63.00	
On board installation kit (FWZ & FWR - Low Wall Mounted Only)		FWECKA	
		£11.00	
Return Air Sensor		FWTSKA	
		£8.00	

Notes:

- Each controller version includes the water probe
- The on board installation kit includes a remote air probe (if installed the internal fan coil probe is disabled)
- The FWEC3A can operate up to 247 fan coils as master slave control, plus weekly schedule timer, proportional valve control and 2 digital outputs (1 per fan coil required)
- The FWECSA can operate up to 256 fan coils as master slave control on RS485 network
- The FWEC SAP and FWEC SAC can be ordered individually or as a pack

Trade Fan Coil Price			£200.00	£207.00	£238.00	£288.00	£306.00

Loose Accessory Options:

FWT	FWT
Standard wired remote controller	MERCA £77.00
Simplified wired remote controller	SRC-HPA £39.00
Wireless controller for heat pump	WRC-HPC £15.00

Notes:

- FWT fan coils are optimised for valveless control in cooling. We would recommend that a valve is fitted if being used for heating only and for more precise control in cooling.
- We would recommend the field supply of a 240V - 4 port 3 way valve complete with 240V actuator.

Daikin Air Handling Units

Daikin air handling units, with their plug-and-play design and inherent flexibility, can be configured and combined specifically to meet the exact requirements of any building, no matter what it is used for, or who is to work there. Our systems are designed to be the most environmentally friendly and the most energy efficient on the market, thus reducing their ecological impact, while, at the same time, keeping costs down through the minimisation of energy consumption.

When combined with the small physical footprint of the system, these features make our air handling units ideal for all markets.

Air Handling Units

Modular AHU with high efficiency heat recovery

Energy efficiency and indoor air quality

- > Predefined sizes
- > IE4 premium efficiency motor
- > High efficiency heat wheel (heat recovery)
- > Compact design
- > Advanced control features
- > Easy installation
- > Indoor air quality compliant with VDI 6022 hygiene guideline
- > Operating limits from -25 °C, -40 °C with electric heaters, up to +46 °C ambient temperature
- > VRV IV and ERQ coupling capability
- > Indoor and outdoor versions
- > Free cooling capability
- > Economy and Night mode operation
- > Monitoring and control through Daikin ITM

EC fan

- > Air flow or pressure control (Variable Air Volume – Constant Air Volume)
- > Nominal air flow programmed at factory
- > Silent operation

Simple, quick installation

The Modular series' Plug & Play design is more than just a convenient feature for installers. It offers cost-saving benefits as there is no need for expensive adjustments before the unit is commissioned. Plug & Play makes everyone's life simpler, safer and more economical.

Note: Final pricing will be dependent on actual selection configuration, unit construction and additional modules required. Above pricing will provide a sufficiently accurate indication for budget purposes

Please contact your local sales office for further information on selection at different working conditions and matched Daikin ERQ & VRV IV condenser units for DX applications

Air Handling Units

Modular AHU application with Daikin DX condensers

Daikin fresh air package

The Daikin fresh air package provides a complete solution, including all unit controls (expansion valve, control box and AHU controller) and sensors factory mounted and configured.

This unique solution allows for plug and play connection of our AHU series to Daikin ERQ and VRV condensing units.

High efficiency

Daikin heat pumps are renowned for their high energy efficiency. Integrating the AHU with a heat recovery system is even more effective since an office system can frequently be in cooling mode while the outdoor air is too cold to be brought inside in an unconditioned state. In this case heat from the offices is merely transferred to heat up the cold incoming fresh air.

High comfort levels

Daikin ERQ and VRV units respond rapidly to fluctuations in supply air temperature, resulting in a steady indoor temperature and resultant high comfort levels for the end user. The ultimate is the VRV range which improves comfort even more by offering continuous heating, also during defrost.

Please refer to pricing of our VRV IV (pages 71 - 73 and pages 76 - 83 and page 95) and ERQ (Page 52) inverter driven condensing unit ranges which are compatible with the Modular AHU.

Special Vehicle - Weekday / Weekend			
Hiab: kerbside drop	-	From £390.00	Requires two working days' notice
FORS (fleet operator recognition scheme)		From £390.00	Requires two working days' notice
Flat Bed		From £390.00	Requires two working days' notice
Two man delivery service		From £390.00	Requires two working days' notice

* Information available from your local Daikin Sales Order Support team.

Notes:

- > Weekday hours: Monday - Friday 08:00 - 17:00
- > Out of Hours: before 08:00 or after 17:00
- > 98% of UK mainland postcodes are covered under the Next Day delivery service
- > Standard delivery will normally be made by a single driver on an 18T rigid lorry equipped with tail lift and pump truck. Alternative sized vehicles may be utilised from time to time. If you face site restriction at your nominated delivery address and a vehicle other than an 18T rigid lorry is required, notification is needed two working days prior to delivery
- > Next day delivery is subject to postcode restrictions, full details of delivery areas can be obtained from the business portal on my.daikin.co.uk (deliveries to Scotland, Off shore UK Islands, Northern Ireland and the ROI may be subject to 2 to 5 day delivery routes)
- > Time specific deliveries are +/- 30 minutes from the requested time
- > Hiab pricing (vehicle with lifting arm) is based on kerbside drop. Deliveries requiring further lifting capabilities or outside of normal hours (08:00 - 17:00) may incur additional charges. Prices can be requested at time of order
- > Two man deliveries can be requested for heavier items and deliveries above ground level
- > Delivery address, site contact name and number are required for every delivery
- > Our drivers are not permitted to make part delivery against a delivery note. Additional charges may apply for refused deliveries

Goods Returns Procedure

Daikin UK policy for acceptable returned goods

Goods returns timescales

Daikin UK allows returned goods within the following timescales:

Units & accessories: 10 working days from date of invoice

Spare Parts: 1 month from date of invoice

Within these timescales, Daikin may accept unwanted goods provided they are boxed in the original packaging, in perfect condition and have not been used.

Arranging goods returns

To arrange the process of returning goods, please complete a Goods Returns Form available from my.daikin.co.uk and fax or email:

Units & Accessories:

Fax: 0845 641 9150 or **email:** returns@daikin.co.uk

Spare Parts:

Fax: 0845 641 9299 or **email:** spares@daikin.co.uk

Conditions of returned goods

All returned items are subject to a minimum 20% restocking/administration charge with the following collection charges applied to the final credit:

Collected goods up to 15KG: **£15**

Collected goods over 16KG: **£90**

All returned goods will be fully inspected by our technical engineers. If returned goods are in a non-satisfactory condition then Daikin reserves the right to decline the return or apply an increase to the restocking charge.

Damaged items

Daikin will only accept claims for damages when the goods have been signed for as damaged on the delivery note and you have notified Daikin Returns Team within three working days of delivery. If you identify damage at point of delivery, you are entitled to refuse the delivery and contact us to arrange for a new unit to be sent out.

If after unpacking the units, you identify damage, claims must be reported within three working days from the delivery date to Daikin Returns Team along with photographs of the damage.

What happens next

Once the Goods Return Form is received, an email will be sent to the confirmation email address provided notifying you of the goods for collection and a date for this to be carried out. If you have any queries regarding this date please respond to the email address provided as soon as possible.

Once inspected and confirmation is received that the goods are in perfect condition, a credit will be raised against the original invoice.

Please note returns for chillers and made to order units will not be accepted

Goods covered by warranty

Once a unit has been installed and commissioned, any faults or breakdowns that occur should be reported to our warranty department on:

Telephone: 0845 641 9275 or **email:** warranty@daikin.co.uk

The Daikin UK Service Department

The Daikin UK Service department supplies a range of services to support our customers.

Pre-installation, commissioning and project support

Workshop

In our workshop in Bristol we modify standard Daikin equipment to current specifications in order to meet our clients' needs. We can offer bespoke modifications to suit your exact requirements – please speak to your sales engineer to discuss how we can help you.

Typical modifications include:

- > Creating weather-proof enclosures for VAM Total Heat Exchangers. See page 111
- > Repainting indoor and outdoor units. For VRV units, see page 69, for Sky units see page 41
- > Customisation of controls
- > Removing flare connections
- > Strip and rebuilds. See page 69
- > Blygolding. See below.

Strip and rebuild

Strip and rebuild offers the benefit of time and cost savings by having VRV outdoor units delivered to site in portable components, so they can be transported to the roof without the need for cranes and road closure applications.

For more information, see page 69.

Blygold treatment for heat exchangers

Daikin UK can offer additional treatment for Heat Exchangers to protect against corrosion and pollution, ensuring the long term efficiency of the units.

We can apply a Blygold treatment to the coil and fins. This is recommended for salt laden air (coastal) projects or areas in which high levels of pollutants can create a barrier between the air and the heat exchanger.

Lead time: 2-3 weeks

Applicable units: All Condensers

Unit	Treatment Price (Excludes Unit Price)
Split Unit	£490.00
SkyAir 71-140 Class	£540.00
SkyAir 200-250 class	£610.00

Commissioning

Daikin UK offers a full commissioning service, which includes the charging of additional refrigerant, setting up of all Daikin control systems, operation testing and validation. A detailed commissioning report is produced per system to aid you with handover of the project. If you require dedicated support throughout your project, we can now offer an extended service to meet all your project requirements.

Dedicated project support

For larger projects, Daikin UK Service department offers complete Project Support from the point of order to system handover. Our service engineers will assist you throughout the project, providing a dedicated contact for technical queries and support, installation checks and commissioning.

As part of our Project Support service, we conduct surveys during the installation to ensure it is installed to our specification and rules, witness the strength/pressure test on the DX side, evacuate the systems, charge with any additional refrigerant and configure any ITM controls prior to commissioning.

Prior to project commencement, our service engineer will meet with you to:

- > Discuss project time scales and schedule Daikin UK engineer attendances
- > Discuss potential installation restrictions/issues
- > Identify potential issues and give advice on how to avoid
- > Source copies of the site drawings

Our service engineer will liaise with you throughout the project to agree sign off dates, commissioning dates and schedules. We will then commission the system, ensuring all systems are operating correctly according to the site requirements.

Upon completion, a commissioning booklet is produced including:

- > Installation Certification Reports – number of reports depends on number of checks
- > Pressure/Strength Test Certificate
- > Evacuation Verification Certificate
- > Commissioning Reports
- > F-Gas Log

If you would like Daikin UK Project Support, please speak to your sales engineer who will liaise with service management team to assign you a dedicated service engineer.

Post-installation, spare parts and service support

Aftersales technical helpdesk

This invaluable service offers technical support and guidance when you are experiencing on-site problems when commissioning or diagnosing faults. Final diagnosis is the responsibility of the site engineer.

Your calls will be answered by Daikin trained engineers. To help provide a quick and efficient response, please make sure you have the full model number of the unit. It is important to remind you that using the D1/D1+ PIN number gives you priority access to our engineers.

For support with Air Conditioning systems, please contact:

Tel 0845 641 9200
Mon - Fri 8.30 - 17.30

For support with Heating systems, please contact:

Tel 0845 641 9277
Mon - Fri 8.30 - 20.00 & Sat 9.00 - 15.00

Email technicalhelp@daikin.co.uk
SMS Fault Code Service 07797 801908

If you need an explanation and remedy on a fault code and haven't got your service manual, just send the fault code to our SMS message service and we will advise you by return.

Maintenance contracts

Commercial customers: if you would like Daikin UK to support you with commercial maintenance contracts, we can offer a full service package, including 24 hour support, for account holding customers.

Domestic heating customers: Daikin UK offers comprehensive heat pump maintenance as a premium after care service for Daikin Altherma systems. All parts, labour and call-outs are covered in the unlikely event of a heating or hot water failure.*

For total comfort and peace of mind, this heat pump maintenance package also includes an annual maintenance visit, to help keep your customers' systems running efficiently throughout the year and minimise the risk of any breakdowns.

Daikin UK also offers a basic heat pump maintenance package, which entitles you to an annual maintenance visit, during which our engineer will ensure that your Altherma heat pump is operating within the optimum conditions to maximise energy efficiency. Any potential issue can be dealt with by a Daikin engineer. You will also be entitled to a discount on the cost of spare parts and labour.

*subject to t&c's

Spare parts

When a component fails, Daikin has over 13,000 spare parts based in the UK, supported by our European parts centre with 700,000 parts. This helps us to achieve our target of delivering 97% of critical A parts within two days.

To contact the Spares team directly

Tel 0845 641 9230
Fax 0845 641 9299
Email spares@daikin.co.uk

If you hold a direct account with Daikin UK, you can send and view your spare parts orders online using our Spare Parts Bank – available 24 hours a day, 365 days a year. Plus, there are no delivery charges on orders placed via the Spare Parts Bank, which is equivalent to almost 5% extra discount.

To register for Spare Parts Bank go to www.daikin.co.uk/spares

Service support on-site

We can provide service engineers to assist you with on-site commissioning or service support. All work is documented in a report and sent for your records. So that we can give you the best service possible, it is important to ensure that you are in attendance at that time.

To book an engineer, please contact the Regional Service office closest to the site where your equipment is installed:

Energy monitoring and auditing

Daikin UK offers an increasing range of energy monitoring and auditing services, plus remote monitoring and prediction solutions (DNSS). Please ask your sales engineer if you have a project that you think may be suitable for including in an energy monitoring and auditing trial.

Daikin UK warranties

Daikin UK offers a range of warranties and extended warranties for our Air Conditioning, Applied, Refrigeration and Heating equipment.

Our warranties have been designed to meet the needs of our customers and, as such, offer different terms for customers belonging to our D1 partner programme, KEY heating installer scheme and customers belonging to neither D1 nor KEY.

Our KEY heating installer scheme offers end-user warranties for our domestic heating customers. Please see key.daikin.co.uk for more information.

For all other customers - whether D1, D1+ or not yet a D1 partner – we offer a commercial warranty. From April 2016, commercial warranties are held between the installing contractor and Daikin UK only (non transferable).

For detail on our warranties and how to claim, please see www.daikin.co.uk or visit our business portal my.daikin.co.uk for more information.

Making a warranty claim

If you have a component failure and it is within the warranty period then we are here to help. After you have spoken to our Technical Helpdesk to confirm diagnosis, you can simply contact the warranty team.

Contact the warranty team on:

Tel 0845 641 9275

Fax 0845 641 9299

Email warranty@daikin.co.uk

Daikin Service Tools

Daikin Service App

The Daikin Service Application supports service engineers working with Daikin VRV Equipment.

It's available for both android and iPhone devices.

The application covers various functions to help field engineers to fault-find Daikin VRV equipment. Service App functions include:

Android functions

Fault Codes
VRV Additional Charge Calculation
Replacement PCB Dip Switch Settings
Pressure Transducer and Temperature Thermistor Checks

Outdoor Unit field settings include:
Fan Coil and BSVQ Box Count Check
Refrigerant Recovery Setting
Outdoor Unit Emergency Modes
VRV III & IV Short Test Run

There is also Daikin Altherma support for:
Fault Codes
Additional Refrigerant Charges
C Series Altherma Field Settings
Dip Switch Settings and much more...

iPhone functions

Fault Codes
VRV Additional Charge Calculation
Replacement PCB Dip Switch Settings
Pressure Transducer and Temperature Thermistor Checks

Outdoor Unit field settings include:
Fan Coil and BSVQ Box Count Check
Refrigerant Recovery Setting
Outdoor Unit Emergency Modes
VRV III Short Test Run

To download the Apps go to:

Android:

<https://play.google.com/store/apps/details?id=com.daikin.aircon&hl=en>

iPhone:

Service checker (part no. 999165T)

The service checker type 3 can read and record the operational data from various Daikin equipment. This data consists of thermistor readings, pressure sensor values, solenoid valve operation, expansion valve pulses, operation modes etc.

Software version 1.53 or later is required for connection to VRV IV systems.

DChecker

The DChecker is a service tool used to capture operational data from the following equipment, Split-Multisplit, Sky-Air & Altherma products. This will record and graph all sensor data, PCB inputs & outputs from indoor and outdoor units. From the operational data this will help to identify any operational issue.

Please note the DChecker is a USB interface which provides a direct wired link to the main PCBs and enables real-time data to be viewed on a laptop running windows. Software included.

Inverter analyser RS UK0917A (part no. 136 8521)

The inverter analyser can be used to check the inverter outputs on all VRV models (can also be used on various Split & Sky Air units).

Daikin UK's Customer Training

During 2016 we will continue to further invest in all our regional training centres, hands-on training facilities and online resources, to ensure that the training you receive is relevant to the ever-changing market. By doing so, we aim to help you provide your customers with the highest quality Installation, commissioning, maintenance, service and fault-finding support.

Leading the way in R32 and R410A training

New hands-on training rigs for R410A or R32 Split systems are now situated in all Daikin UK training centres. Purpose built R410A Sky Air product training rigs can also be found at both our Woking and Birmingham centres from March 2016. Attendees on our training courses will get the opportunity to improve their operational product knowledge and practice fault finding hands-on.

With the introduction of R32 products into the UK market, and the popularity of R32 training courses to date, we will be investing further in our Woking Technology Centre during 2016, so that we can offer hands-on R32 product installation and commissioning courses.

New Birmingham training centre

Adjacent to our new Birmingham sales office, the Birmingham training centre covers an area of over 200m² and provides hands on training on the latest Split, VRV, Altherma and control systems.

Woking Technology Centre

The Technology Centre in Woking is Daikin's largest training facility in the UK, over two floors, covering an area close to 1000m².

The facility is able to hold three training events at one time, with additional equipment demonstration facilities and a dedicated suite for conducting Web based live training events.

The centre includes VRV Heat Recovery, VRV Heat Pump, Water Cooled VRV, R22 Replacement VRV-Q, as well as a variety of Split and Sky Air systems. A specially designed controls section has been constructed to demonstrate the many different configuration possibilities of individual and central controls together with the many BMS interface options.

The first floor is dedicated to Heating products with eight individual working bays containing a wide selection of systems to allow for practical hands-on training of commissioning and fault diagnosis. The award winning Altherma Hybrid system is installed in each of these eight bays, so every attendee receives the highest quality product training experience.

To find out when courses are scheduled at regional Daikin UK regional training centres and at PGL Training, check availability and book a place: please go to the Daikin UK booking web site at www.daikintraining.co.uk

Online short courses

For anyone operating in the HVACR market, the skills and knowledge required is getting greater every year. Daikin UK recognises our training needs to keep pace with the demands on people working in the industry – not least the pressures on your time. So we are continually looking at new and innovative ways to deliver the training you need.

During 2016 we are introducing a wider range of courses, together with new web based short courses available on whichever online or mobile platform you prefer.

Within our new Woking Technology Centre we have installed a web based broadcast facility. From here we can provide short courses across a range of subjects. The majority of these will also be recorded and made available through our training website.

Our new courses will cover more application and design subjects, legislation, technical topics and also personal development areas such as presentation and selling skills.

In response to valued customer feed back, we will also be introducing short online refresher courses on specific products, where previous product course attendance pre-requisites have been fulfilled.

Users can register as an individual to undertake web based training and each user has a training account that enables them to review past training they have undertaken and print off training records and certificates.

As these courses become available it will be possible to reserve places at www.daikintraining.co.uk. We will announce more specific details throughout the year.

Smith Brothers Stores Ltd

Terms and Conditions of Sale

1. Definitions :-

- a) "the Company" means Smith Brothers Stores Ltd
- b) "the Purchaser" means the person, firm or company placing an order on the Company.
- c) "Quotation" means any Quotation or terms given by the Company.

2. Orders :-

No orders placed by the Purchaser arising as a result of a Quotation, Terms or otherwise will be considered as binding on the Company unless that order has been acknowledged by the Company in writing.

3. Effect of Conditions :-

All orders accepted by the Company will be subject to the Conditions of Sale set out herein. The Company is not willing to contact otherwise than on these Conditions and unless otherwise expressly agreed in writing these Conditions shall apply to all contracts made between the Company and the Purchaser and any documents emanating from the Purchaser which contain printed or standard Conditions which have been or shall be sent by the Purchaser and received by the Company on the understanding that they appear on the Purchasers documents because they are printed thereon will have no legal effect whatsoever and the Purchaser waives any right which he otherwise might have to rely on such conditions.

4. Validity of Offer :-

- a) Any prices and/or discounts quoted by the Company, whether verbally or written, will be considered to have a validity of not exceeding 30 days unless otherwise agreed by the Company in writing.
- b) If the Purchaser intends to place an order with the Company subject to the terms of a nominated or other sub-contract the prices and terms in the tender will not be binding on the Company unless the Purchaser has fully disclosed to the Company such items and conditions of the said sub-contract and that the Company has acknowledged the same in writing.
- c) If the Purchaser intends that the price for the goods should be paid to the Company by a third party (i.e. a Finance Company or similar institution) it must state on the order that it has received written confirmation from the third party that it will make payment to the Company in accordance with the terms of Clause 8 hereof and if it fails to do so, the Purchaser will be bound to make such payments.

5. Prices :-

Unless otherwise agreed in writing the price to be paid will be deemed to have been stated in the Quotation provided that the Quotation is accepted within 30 days of issue and delivery is effected within a further 14 days. Otherwise, the Company may, at its discretion, vary the price by addition upwards to reflect market conditions, labour, material and transportation costs. All prices exclude VAT unless otherwise stated.

6. Specifications :-

Whilst all descriptions, specifications, drawings and illustrations are supplied in good faith they are only intended for guidance purposes and the Company will accept no responsibility whatsoever for any errors, omissions, loss or damage from the Purchasers reliance on such descriptions, drawings and illustrations. Further, the Company reserves the right to amend such descriptions, specifications, drawings and illustrations without notice. The Company provides no warranty, and it shall not be implied, whether through any description or other-wise, that any Goods conform to or are suitable for any specific purpose, unless written confirmation of such a warranty as to suitability of the goods for purpose addresses specific goods and the Purchaser. The Company may recommend to the Purchaser, specific Goods. These recommendations are based solely upon the information received by the Company from the Purchaser. Therefore, any recommendations by the Company to the Purchaser in relation to any Goods shall be provided only as an opinion, and shall not be construed as an express or implied warranty as to any recommendation given, unless written confirmation of a warranty to that effect is provided by the Company to the Purchaser and the Purchaser is referred to the clause immediately preceding this. The suitability of specific goods for use is ultimately the decision of the Purchaser based solely upon the knowledge of the Purchaser.

7. Delivery :-

- a) Delivery periods are given in good faith and are based from the date of receipt of order. Whilst we will make every reasonable effort to meet delivery requirements we will not be liable for any failure to do so, nor for any consequential loss of any kind arising from late delivery.
- b) Deliveries will be made to the destination specified on your order provided this is clearly indicated.
- c) Unless otherwise agreed the cost of carriage will be chargeable to the Purchaser. Where the Purchaser requests the Company to deliver goods within a timescale which is shorter than that covered by the Company's quoted delivery costs then the Company reserves the right to vary the price by addition upwards to reflect additional costs incurred.
- d) Unless otherwise agreed the off loading and safe storage of delivered goods are the sole responsibility of the Purchaser. Where the Purchaser requests the Company to provide off-loading facilities then such facilities will be deemed to be chargeable to reflect the additional costs incurred.
- e) After delivery the goods are expressly held by the Purchaser at his own risk. The Purchaser undertakes, following delivery to maintain the goods in the pre-delivery condition and to insure the goods to their full value and against all risks until such time as payment and the title passes.
- f) The Company reserves the right to levy additional charges against the Purchaser, to cover storage, fire insurance or other costs incurred by us, in the event that the goods are held beyond reasonable period of time or should forward instructions to be withheld.

8. Terms of Payment :-

- a) Unless otherwise agreed in writing, and only for approved accounts, all goods will be invoiced on despatch for payment at the end of month following the date of invoice.
- b) Where an approved account is not established or where the total order value, excluding delivery, is less than £50.00 then, at its discretion, the Company may seek payment prior to delivery.
- c) Time for payment shall be of the essence of the contract without prejudice to any other rights of the Company. If the Purchaser fails to pay the invoice on the due date, the Purchaser shall pay interest on any overdue amount from the date on which payment was due to that which payment was made (whether before or after judgement) on a daily basis of 4% per annum over the base rate quoted from time to time by the National Westminster Bank plc and reimburse to the Company an administration fee of £20.00 together with all costs and expenses, including legal costs, in the collection of any overdue amount.

9. Passing of Property and Risk :-

The risk in the Goods shall pass to the Purchaser on completion of delivery.

Title to the Goods shall not pass to the Purchaser until the Company has received payment in full (in cash or cleared funds) for:

- a) the Goods; and
- b) any other Goods that the Company has supplied to the Purchaser in respect of which payment has become due.

Until title to the Goods has passed to the Purchaser, the Purchaser shall:

- a) hold the Goods on a fiduciary basis as bailee for the Company;
- b) store the Goods separately from all other goods held by the purchaser so that they remain readily identifiable as the Company's property;
- c) not remove, deface or obscure any identifying mark or packaging relating to the Company;
- d) maintain the Goods in satisfactory condition and keep them insured against all risks for their full price from the date of delivery;
- e) notify the Company immediately if it becomes subject to the service of a Statutory Demand or any other action involved in the insolvency of the Purchaser; and

f) give the Company such information relating to the Goods as the Company may require from time to time.

The Purchaser may resell or use the Goods in the ordinary course of its business.

If before title to the Goods passes to the Purchaser the Purchaser is served with a Statutory Demand or any other action involved in the insolvency of the Purchaser, or the Company reasonably believes that any such event is about to happen and notifies the Purchaser accordingly then provided that the Goods haven't been resold and without limiting any other right or remedy the Company may have, the Company may at any time require the Purchaser to deliver up the Goods and, if the Purchaser fails to do so promptly, enter any premises of the Purchaser or of any third party where the Goods are stored/located in order to recover them.

10. Loss and Damage in Transit :-

a) It is the responsibility of the Purchaser to examine the Goods immediately on arrival and any shortage or damage be reported to us and to the carriers within 3 days of receipt.

b) Non delivery of Goods must be reported to us within 10 days of the despatch dates given on the advice note.

c) The Purchaser will be liable to indemnify the Company for any loss it suffers where it is unable to claim against the carriers by reason of non-fulfilment of these Conditions.

11. Returned Goods :-

Any Goods returned to the Company for any reason other than faulty condition will only be accepted with the prior written agreement of the Company.

a) Where such agreement exists then the Purchaser will be responsible for the cost of safe packing and delivery of Goods including adequate insurance against damage and loss.

b) Where such Goods are returned to the Company by agreement and provided that the Goods are received in a condition which is consistent with the condition on despatch then a credit will be issued to the value of the returned Goods less any restocking charge of not less than 15% of the invoice value of the Goods subsequently returned.

12. Fitness for Purpose :-

The Purchaser is solely responsible for suitability of the Goods for which they are bought and is reliant upon his own skill and judgement in this respect.

13. Representation :-

Any statements or claims made by the Company, its representatives, distributors and agents either prior to or during the course of executing a contract between the Purchaser and the Company are superseded by the Conditions herein and as such they are not material.

14. Guarantee :-

a) The Company extends to the Purchaser the terms of warranty, guarantee and conditions that it has, in turn received from the manufacturer. Provided that all amounts due in accordance with clause 8 hereof have been received by the Company.

b) All guarantees and warranties are subject to the equipment having been stored, installed, commissioned and maintained in accordance with good practice and the manufacturer's recommendations.

c) To facilitate prompt replacement of any item or component we will despatch parts at the Purchaser's request on a chargeable basis. When the defective item is returned to us and provided that the fault has been verified under the terms of the guarantee then the invoice will be credited or cancelled. Where no such item or component is subsequently returned within a reasonable period then the Company reserves the right to seek payment for the goods supplied.

d) The Company explicitly excludes any labour, consequential or other costs associated with the replacement of Goods, items or components under the terms of the guarantee.

15. Exclusion of Liability :-

Clause 14 is intended to provide a fair means of resolving disputes about the quality of Goods supplied, and except as provided therein the Company is not liable for any loss or damage, whether consequential or otherwise, howsoever arising out of a contract for the supply of Goods to the Purchaser governed by these Conditions (except for damages for death or personal injury caused by negligence for which the Company is responsible) and all conditions or warranties which might be implied by law are hereby excluded. The Purchaser shall be responsible for ensuring that all Goods subsequently installed on the Purchaser's premises or elsewhere do not contravene existing laws and regulations and are approved by the Purchaser's insurers.

16. Force Majeure :-

Any delay or failure of performance in executing our obligations shall not be determined as a fault or give rise to any claim for lock-outs, restriction of supplies, breakdown of plant or machinery, shortage of labour, war, riots, civil unrest or any other circumstances reasonably beyond our control.

17. Law and Jurisdiction :-

These Conditions shall be subject to English Law and the exclusive jurisdiction of the English Courts.
