Need help? Use the Help tab in the upper right of your screen.

Choose 100% Width page to display a page with pagebuilder without margins, spacings or title section.

Page Style

Right Sidebar

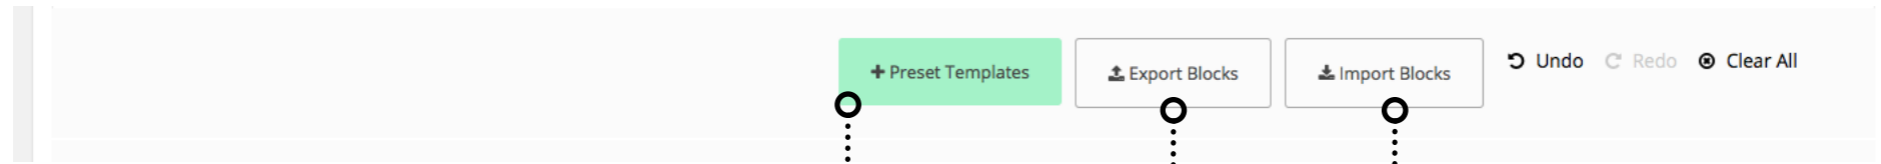

Left Sidebar

No Sidebar

Edge to Edge

Edge to Edge layout is the same as 100% Width Template.

Exporting and Importing Blocks

Add Preset Templates

Export block data for all blocks seen in Page Builder area.

Import Individual blocks or multiple blocks using export data

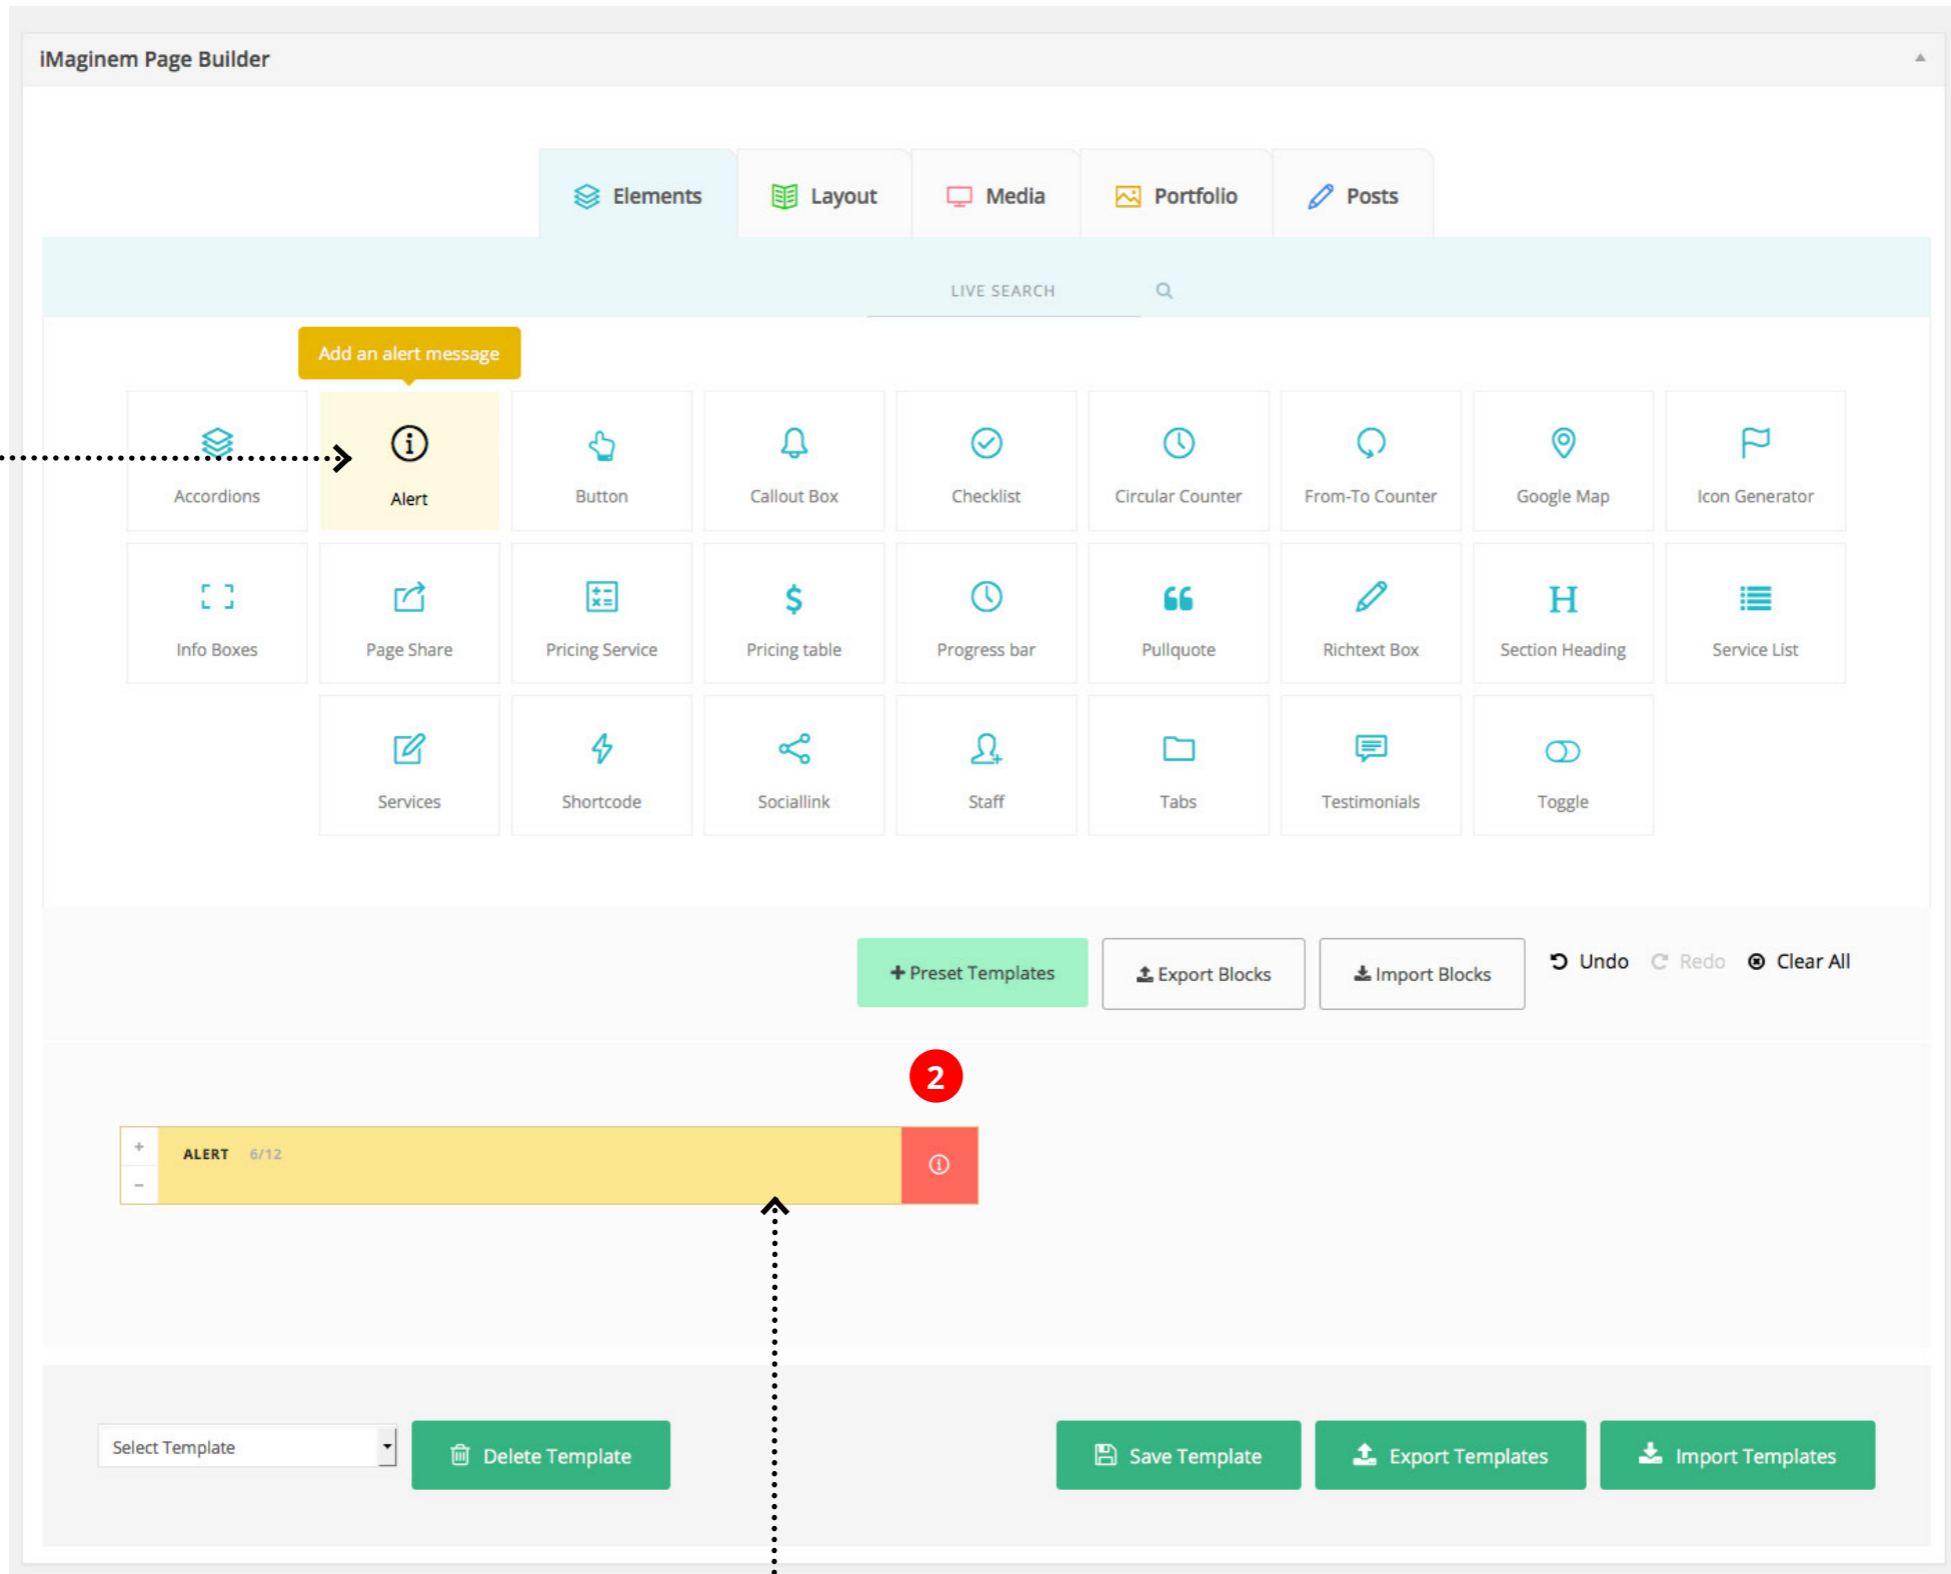

Export Individual Block

Blocks

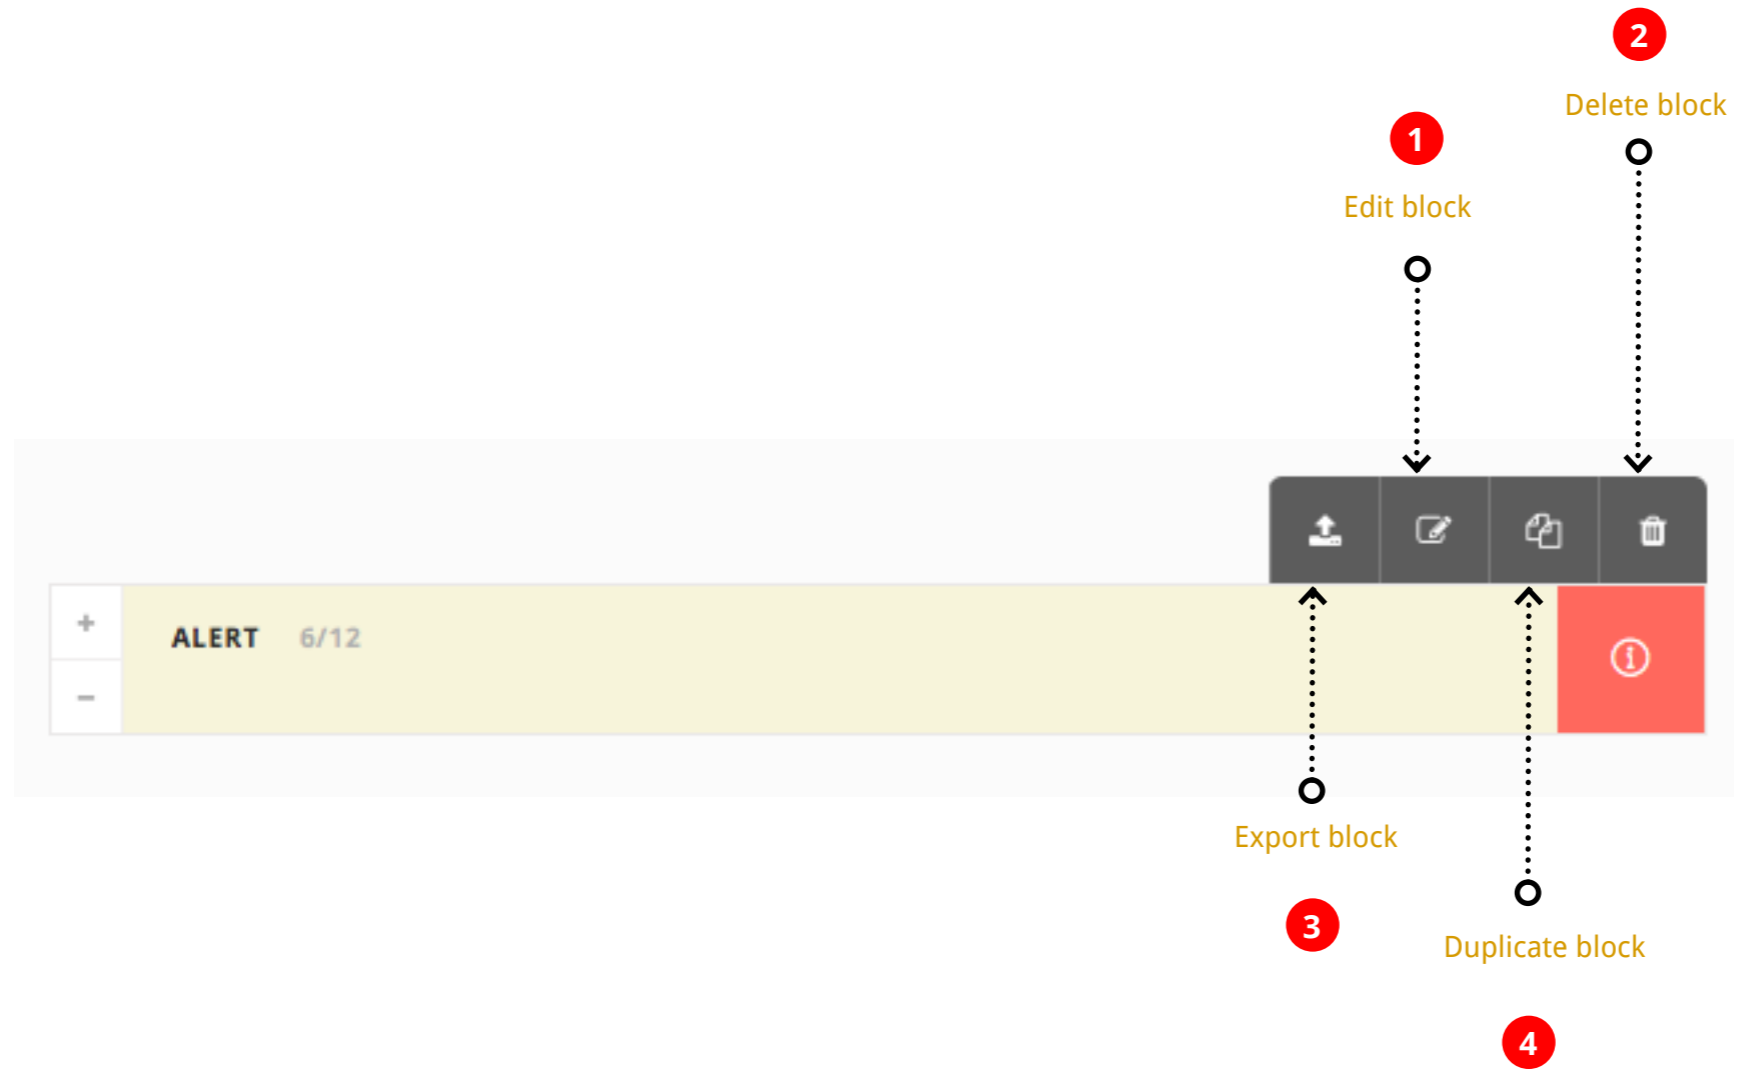

Adding a Block

1
Click to add a block

2
Added Block with highlight indicating recent movement

Block Controls

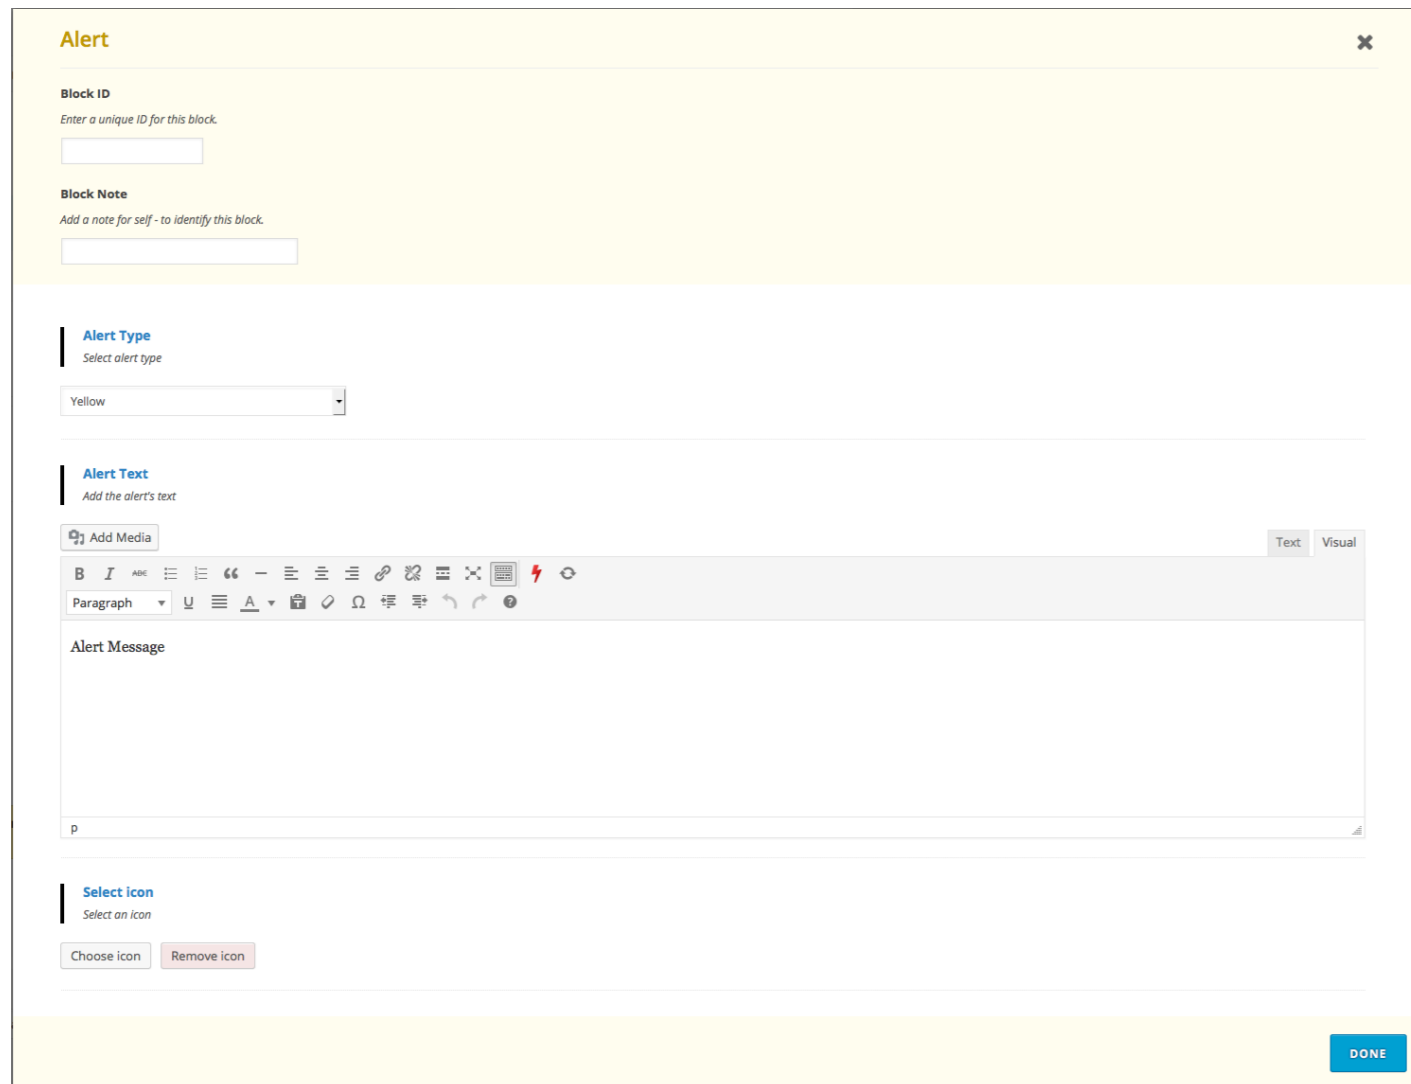

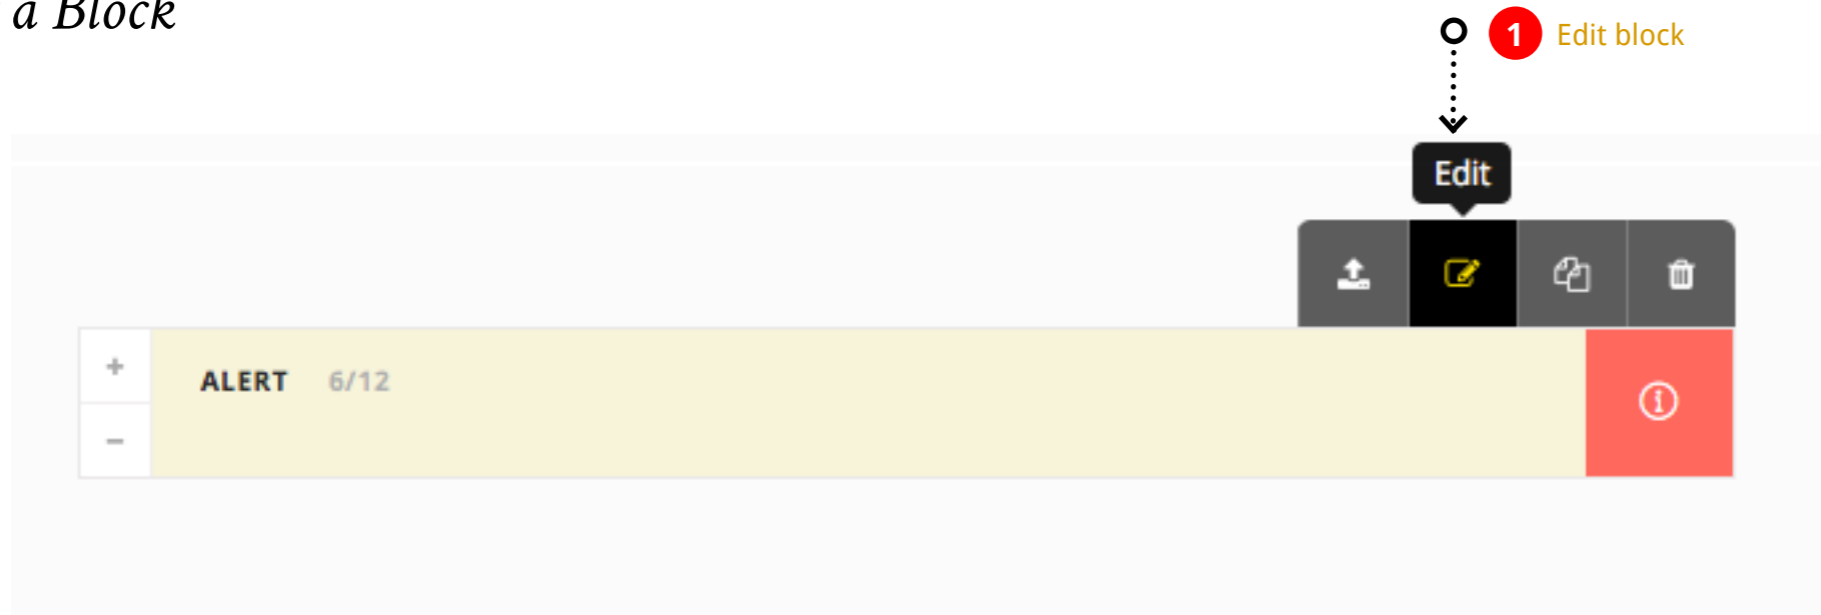

Resizing a Block

Hover at the edge to find
Resize indicator.

Can be increased by
resizing with mouse click
dragging from the edge

Edit a Block

2 Editing Displays a popup to edit settings.

3 Apply and Close.

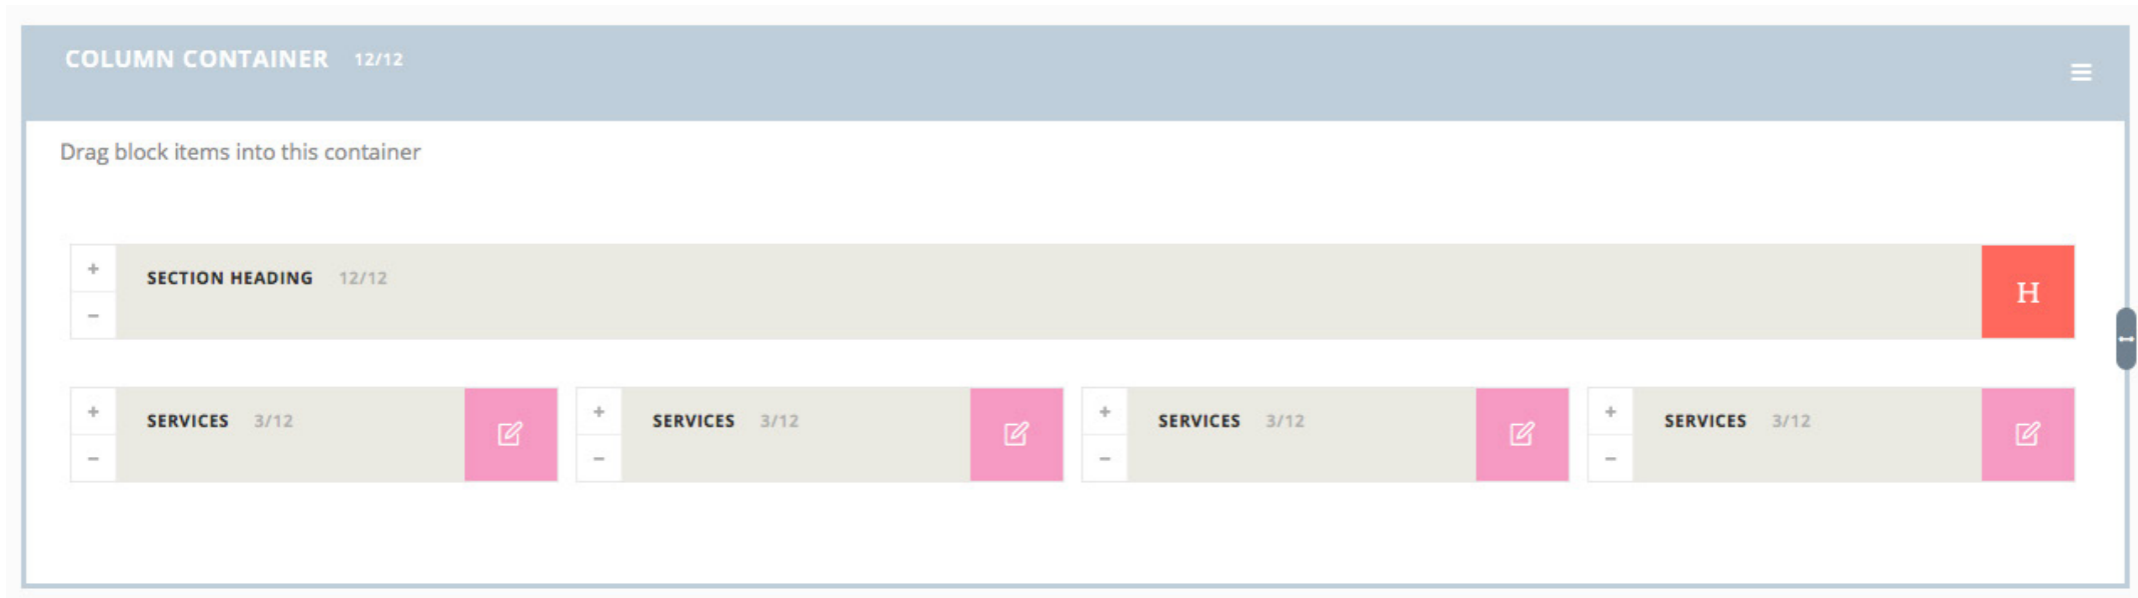

Columns

Organize the Blocks in Grids

Add a Column

The screenshot shows the iMagine Page Builder interface. At the top, there are navigation tabs: Elements, Layout (highlighted with a red circle '1'), Media, Portfolio, and Posts. Below the tabs is a 'LIVE SEARCH' bar. In the center, there is a yellow 'Add a Column' button (highlighted with a red circle '2') which has opened a dropdown menu. The menu contains three options: 'Column Container' (highlighted with a red circle '3'), 'Dividers', and 'Horizontal Line'. Below the menu is a toolbar with buttons for '+ Preset Templates', 'Export Blocks', 'Import Blocks', 'Undo', 'Redo', and 'Clear All'. At the bottom, there is a 'COLUMN CONTAINER 12/12' section with a blue header and a large white area containing the text 'Drag block items into this box'. The bottom of the interface features a 'Select Template' dropdown, a 'Delete Template' button, and three buttons: 'Save Template', 'Export Templates', and 'Import Templates'.

Columns with Blocks

Column with Blocks added inside it.

Edit Columns

- 1 **Edit Columns**
Edit Columns to apply paddings and backgrounds

Edit Column Container

COLUMN CONTAINER 12/12

Drag block items into this container

- SECTION HEADING 12/12
- SERVICES 3/12
- SERVICES 3/12
- SERVICES 3/12
- SERVICES 3/12

Adding Column IDs and Notes

Column ID

Column IDs can be used for various purposes such as for Jump links or CSS style targeting to isolate others.

Block Note

Add a small note to make it easy for column identification within pagebuilder when there are multiple columns.

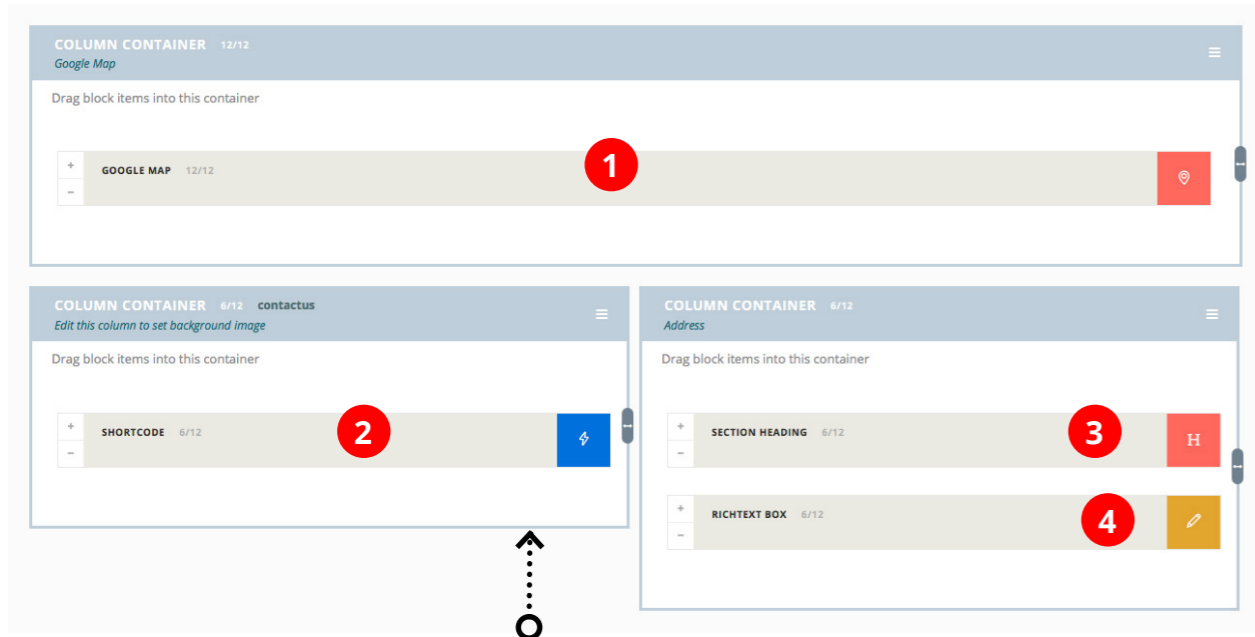

The image shows two parts of the iMaginem Page Builder interface. The top part is a 'Column Container' configuration window with a yellow background. It has a title bar with 'Column Container' and a close button. Below the title, there are two sections: 'Column ID' with the instruction 'Enter a unique ID for this column.' and a text input field containing 'a-unique-id' (marked with a red circle '1'); and 'Block Note' with the instruction 'Add a note for self - to identify this block.' and a text input field containing 'A note to easily identify the block' (marked with a red circle '2').

The bottom part is a main page builder workspace with a blue header. The header shows 'COLUMN CONTAINER 12/12 a-unique-id' (with a red circle '1') and 'A note to easily identify the block' (with a red circle '2'). Below the header, there is a text prompt 'Drag block items into this box'. At the bottom, there is a horizontal bar containing three block items: 'ACCORDIONS 6/12' with a stack icon, and two 'SERVICES 3/12' items, each with a pink edit icon.

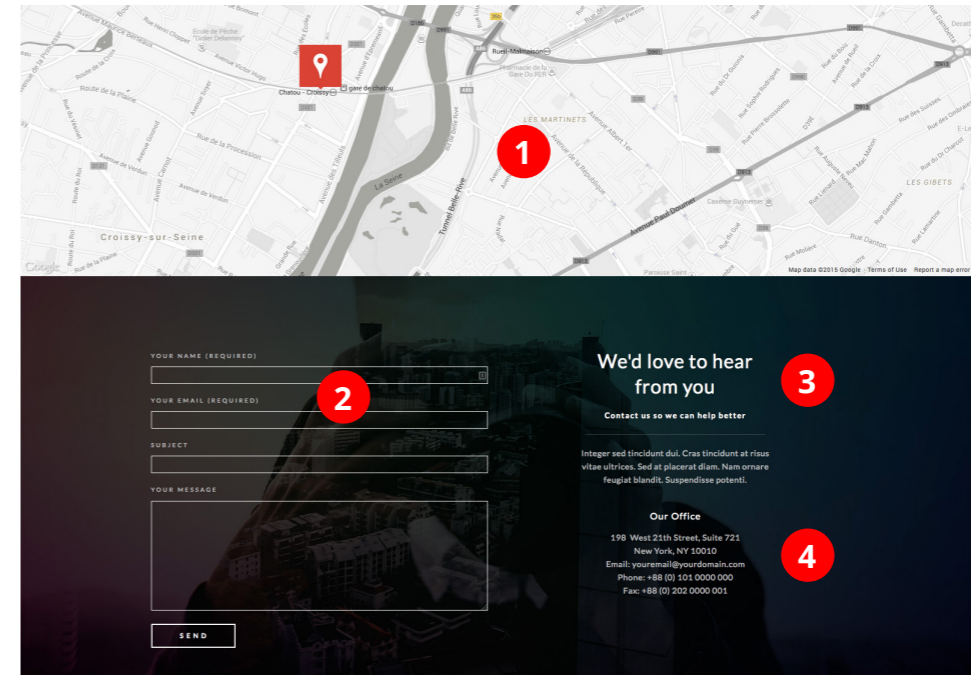

Row of Columns

Row of columns

In a row of columns the properties such as background color, background image or margins are applied from the first column to the whole row.

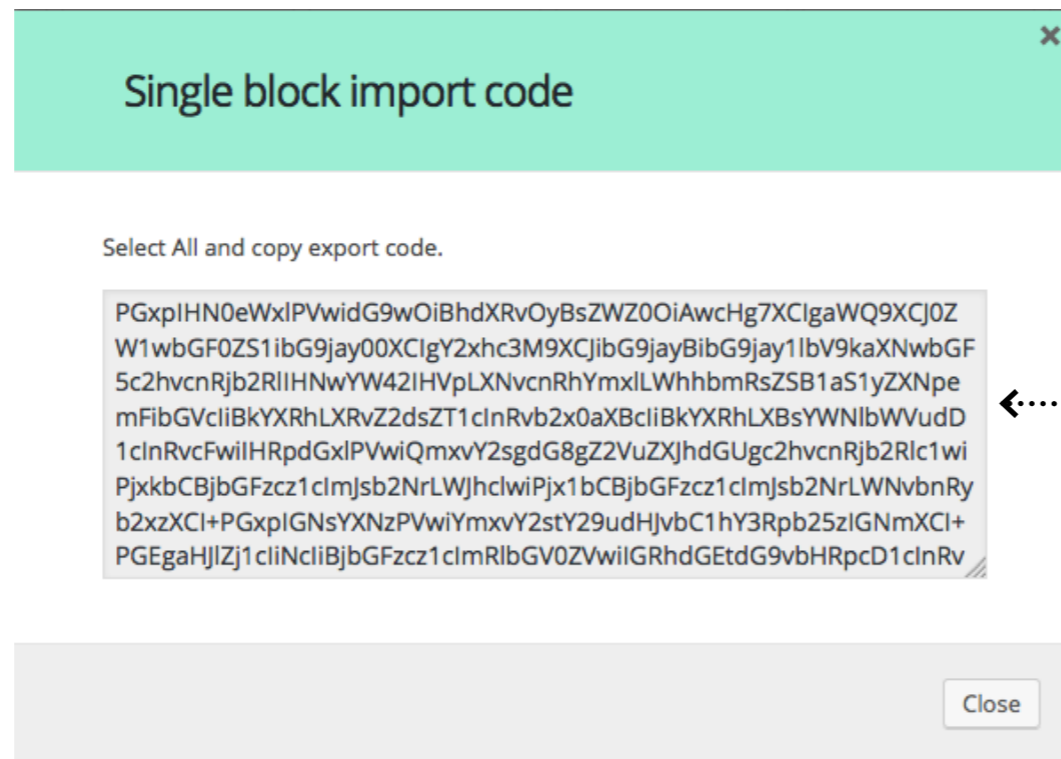

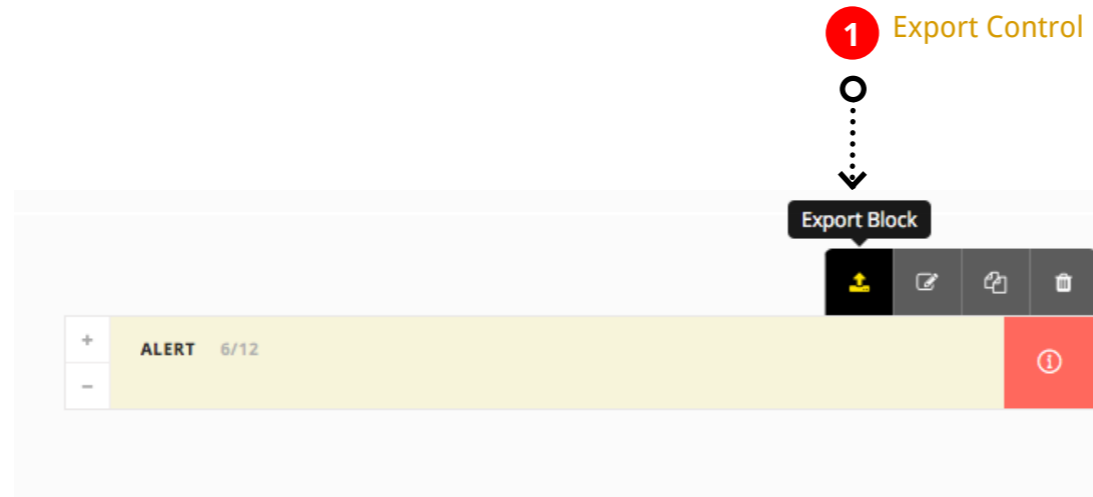

Background from 1st Column in the Row.

Background is set from first column in the Row.

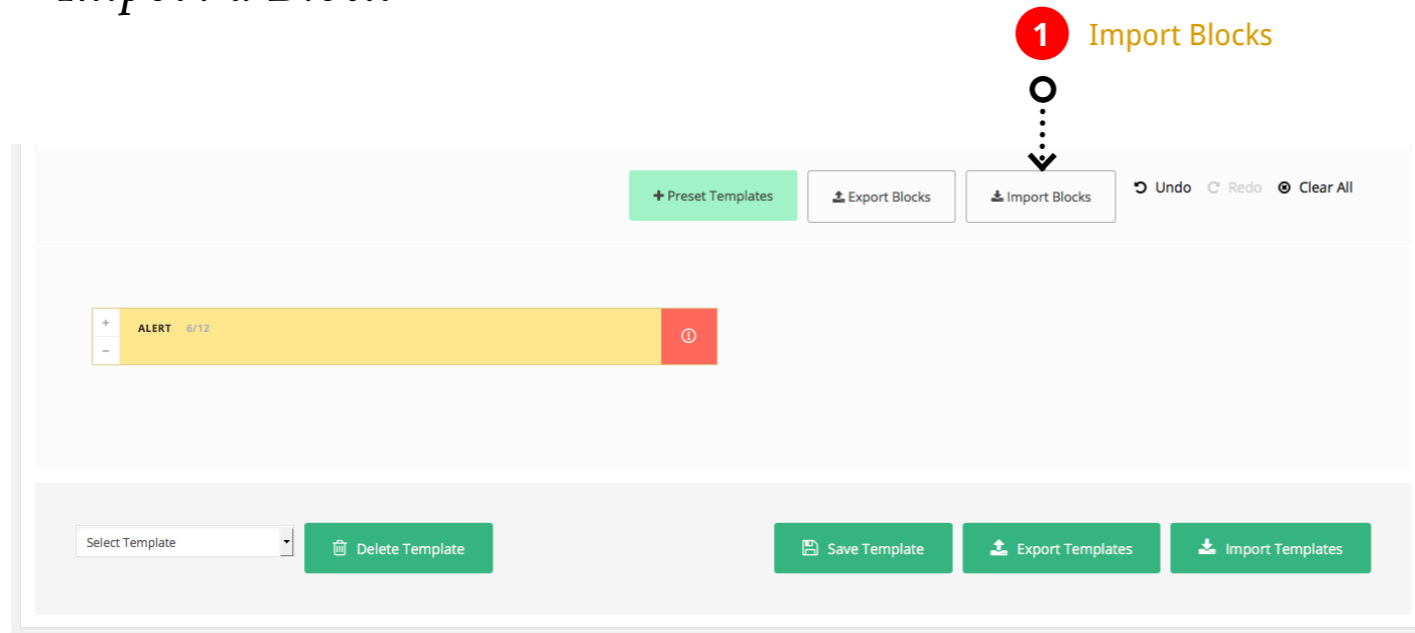

Export & Import Blocks

Export a Block

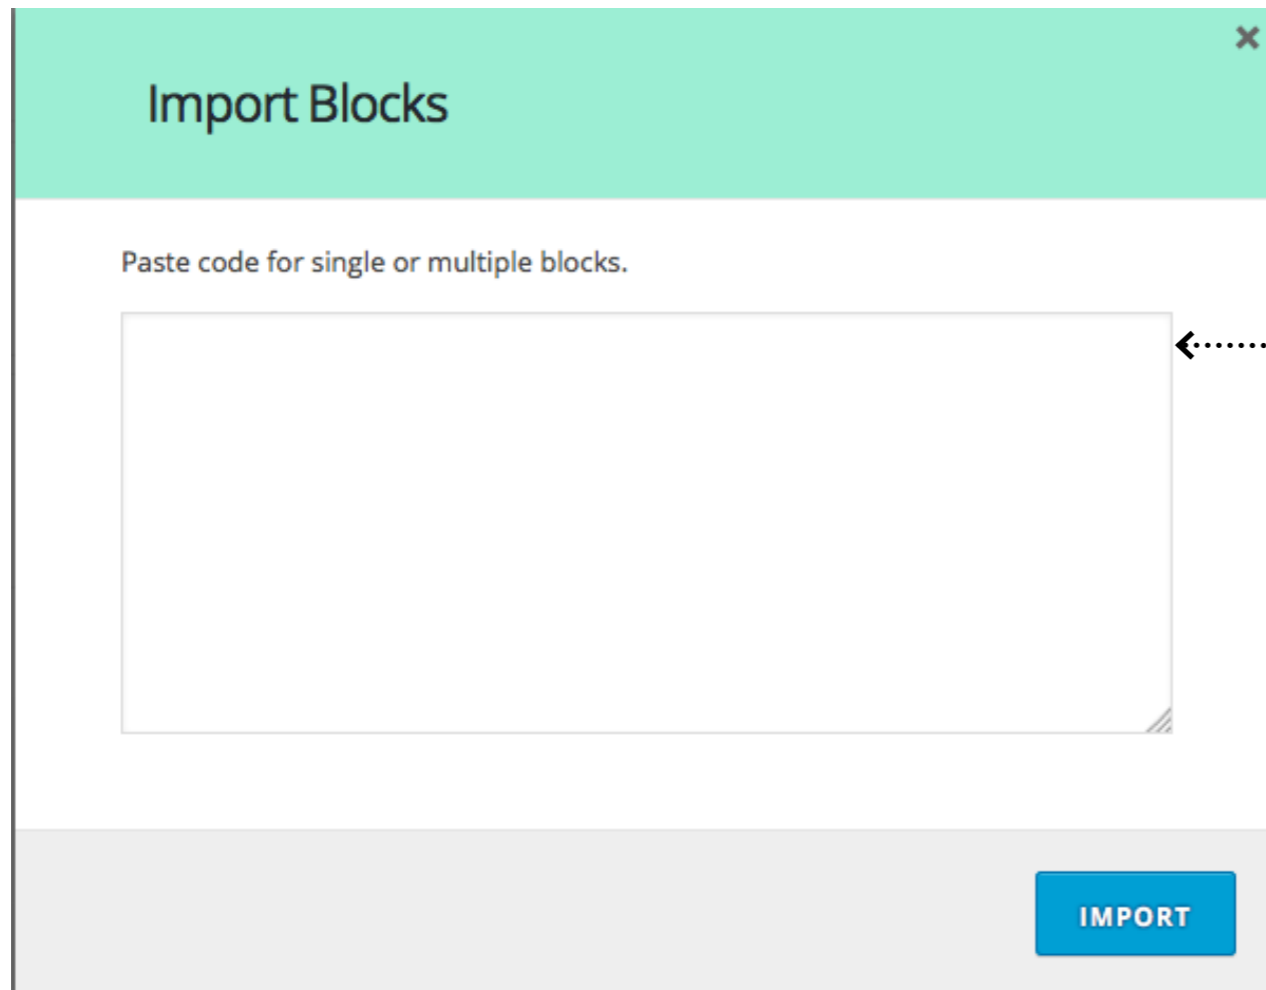

2 Single block import code
Select All and copy the export code which can later be used to import the blocks.

Import a Block

1 Import Blocks

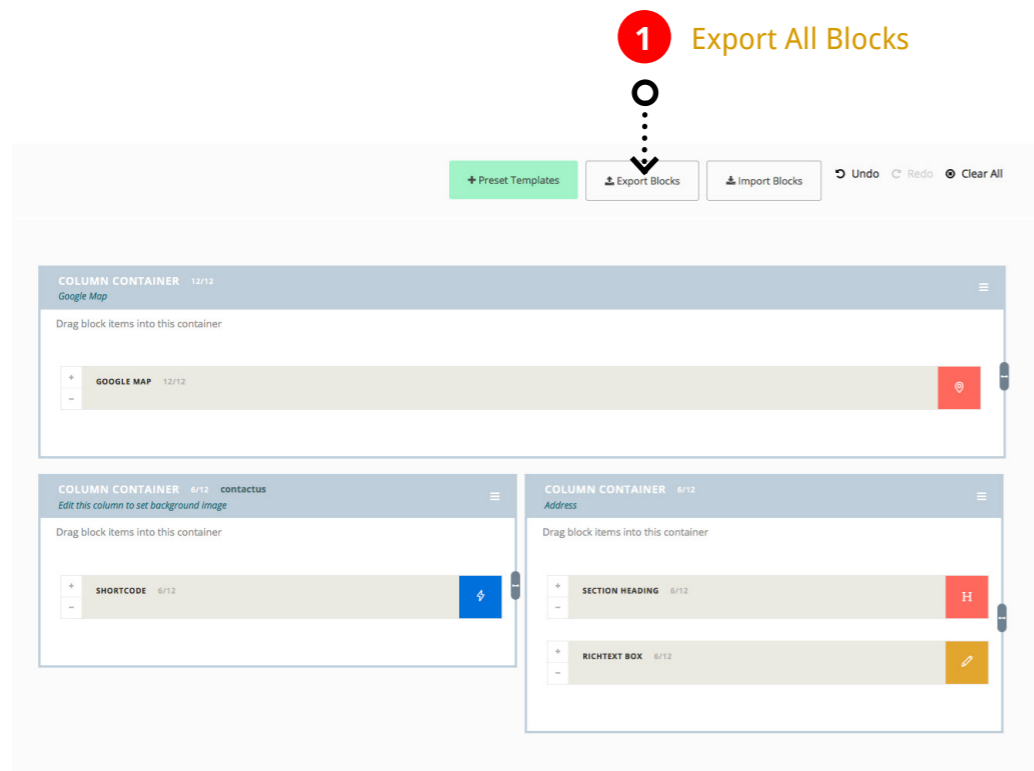

2

Import Blocks

Paste code and press import button to import single or multiple blocks. New blocks will appear at the end of existing blocks.

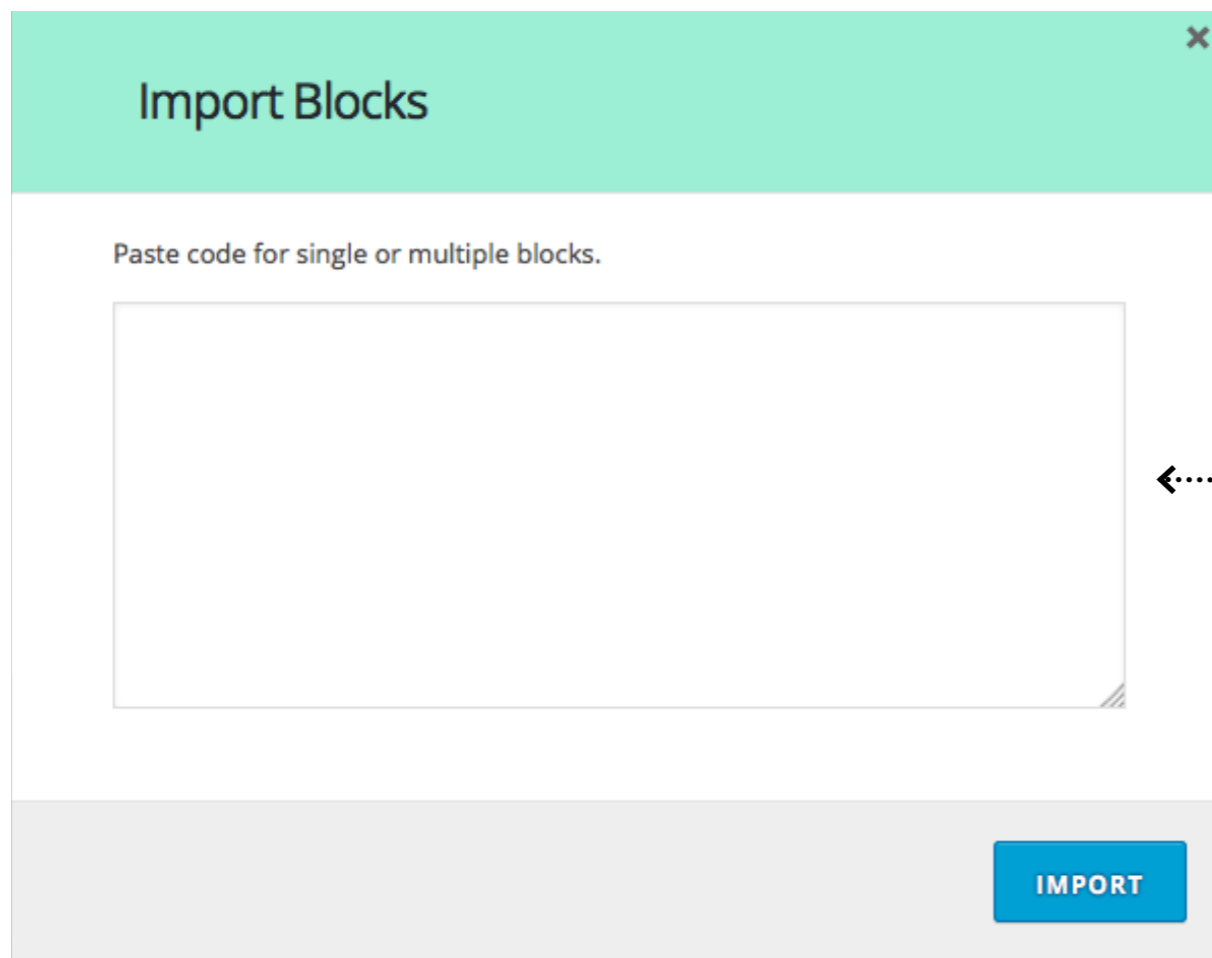

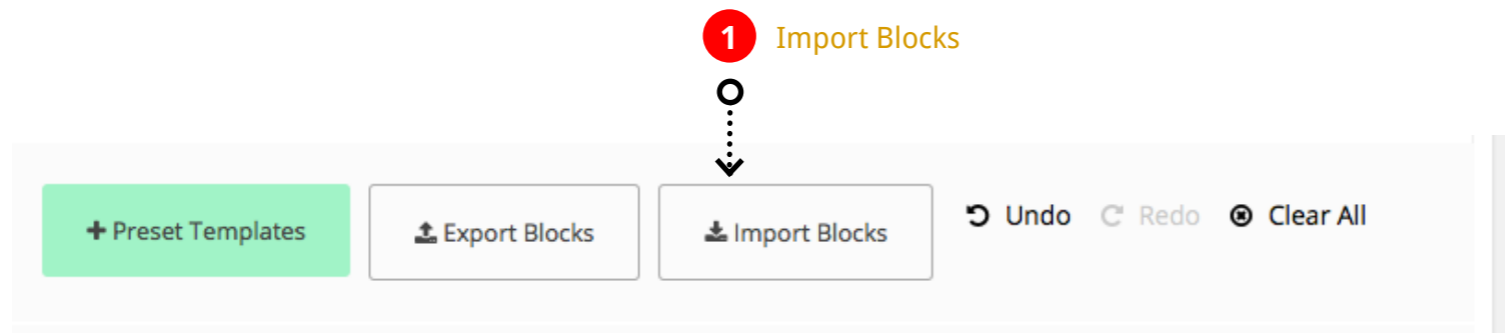

Export All Blocks

- 1** Export All Blocks
- 2** **Import code for all blocks**
Select All and Copy the export code.

Export code contains all blocks seen in page builder.

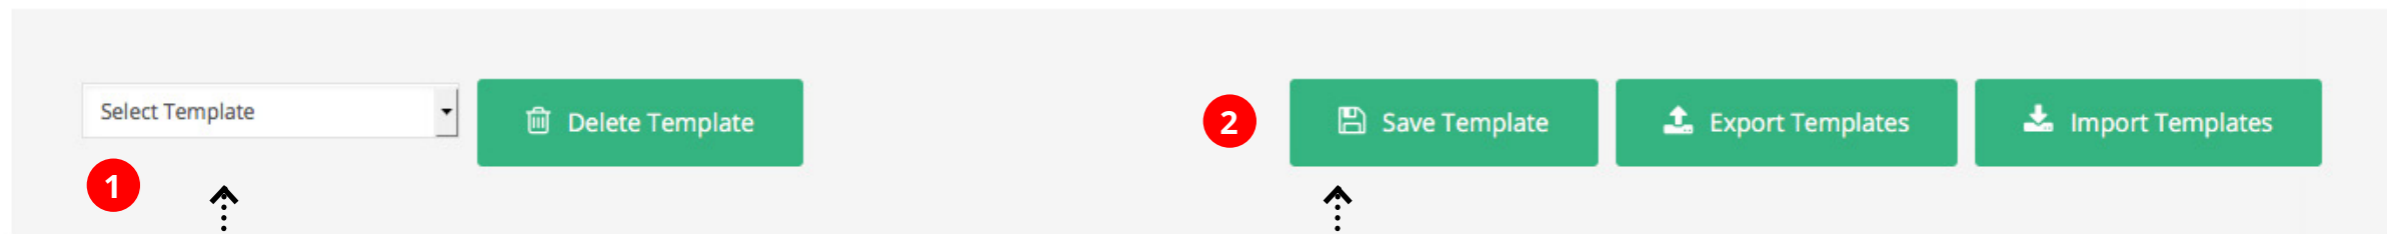

Import Multiple Blocks

2 Import Blocks
Paste code to import all blocks.

*Managing
Page Builder
Templates*

Saving a Template

1

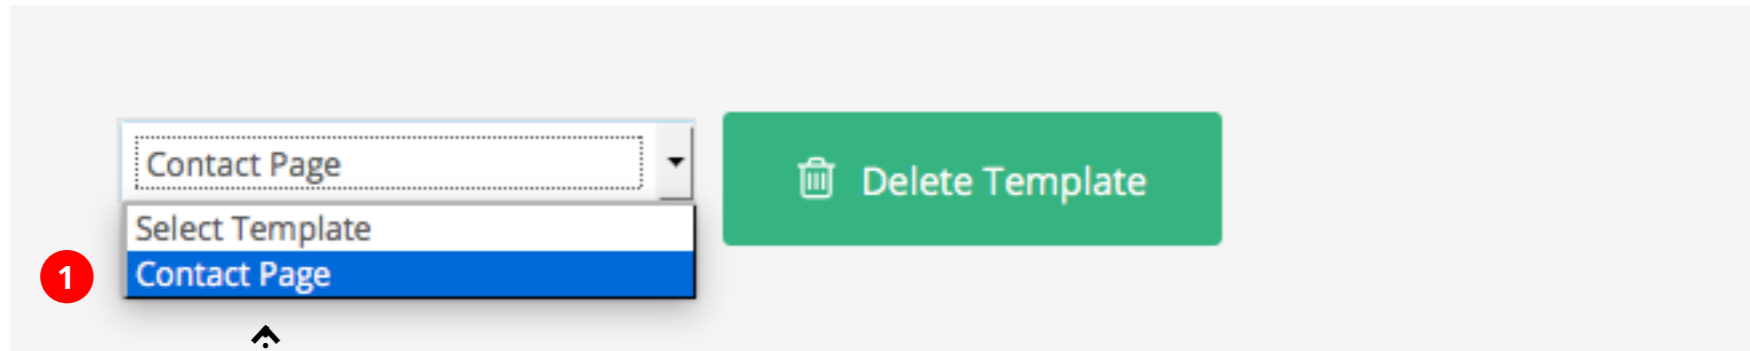

Saved Template selector.

Saved Templates will appear in this selector.

2

Save Template

Click this button to Save Template. Enter a unique template name and choose 'Save'

1

Template loader

Simply choose a saved template from this list to load the saved template.

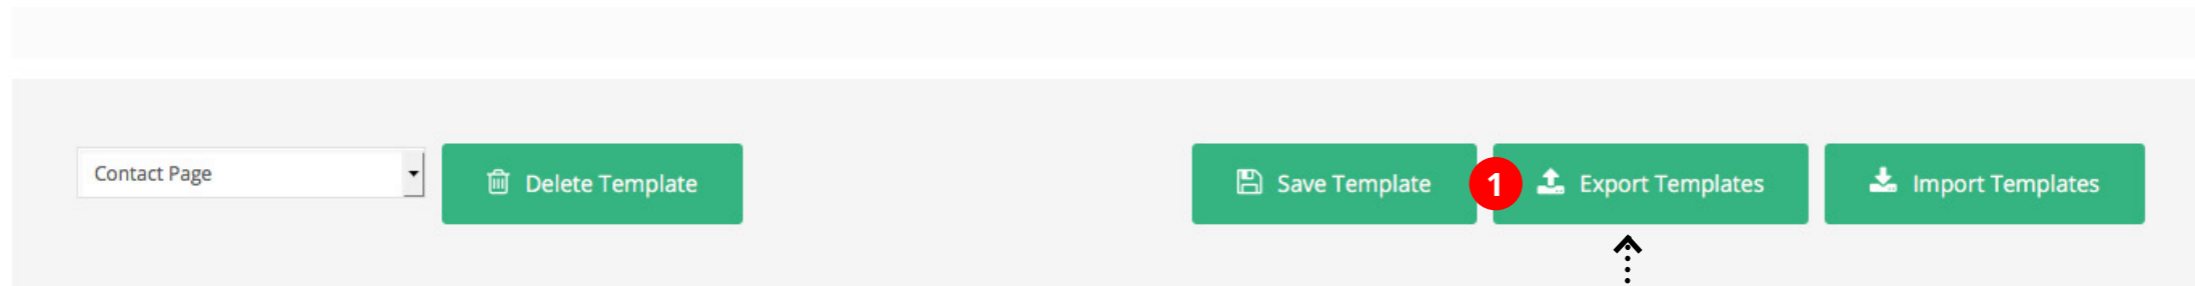

Deleting a Saved Template

The screenshot displays the iMaginem Page Builder interface with three column containers. The top container is titled 'COLUMN CONTAINER 12/12 Google Map' and contains a 'GOOGLE MAP 12/12' block. The middle container is titled 'COLUMN CONTAINER 6/12 contactus Edit this column to set background image' and contains a 'SHORTCODE 6/12' block. The right container is titled 'COLUMN CONTAINER 6/12 Address' and contains a 'SECTION HEADING 6/12' and a 'RICHTEXT BOX 6/12' block. At the bottom, a toolbar contains a dropdown menu with 'Contact Page' selected, a 'Delete Template' button, and 'Save Template', 'Export Templates', and 'Import Templates' buttons. Red circles with numbers 1 and 2 point to the dropdown and the 'Delete Template' button respectively.

1 **Template selector**
Choose template to delete.

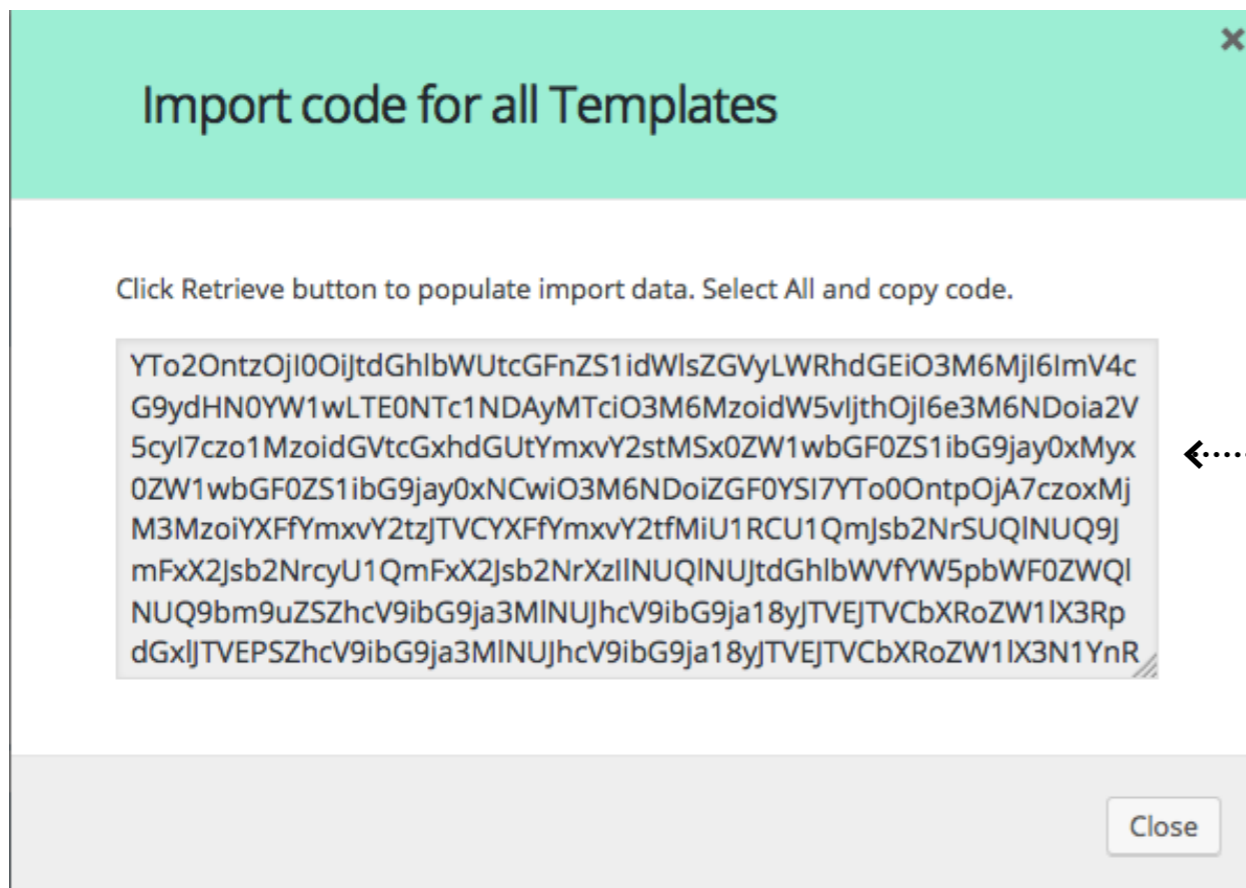

2 **Delete Template**
Click Delete Template to delete the selected template from the list. This process doesn't undo.

Export All Saved Templates

Export Saved Templates

Choose to grab export code for all Saved Templates in the template selector.

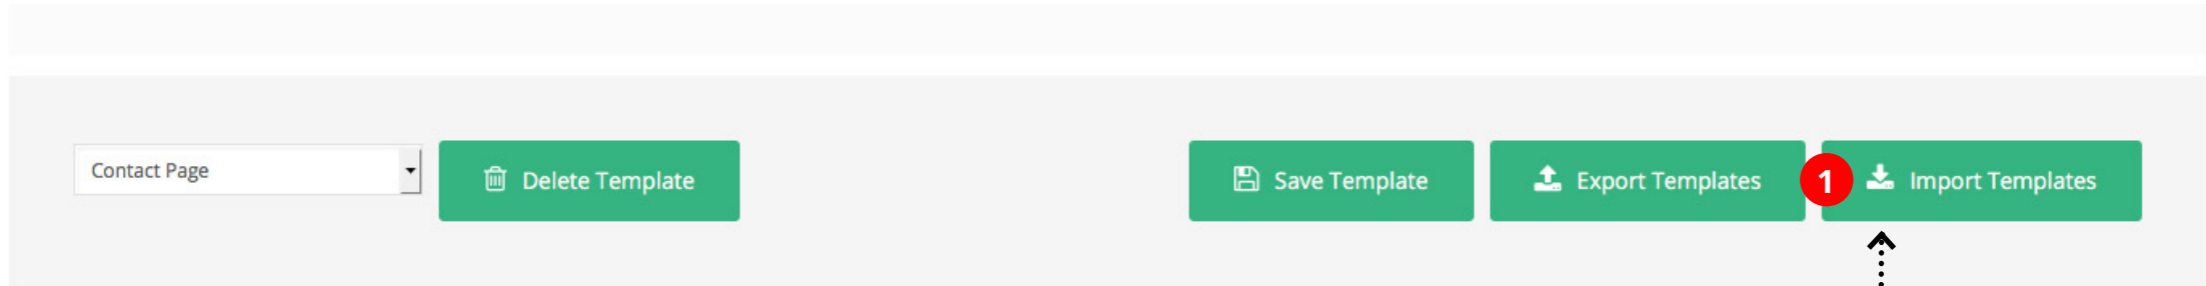

**2**

Code for importing.

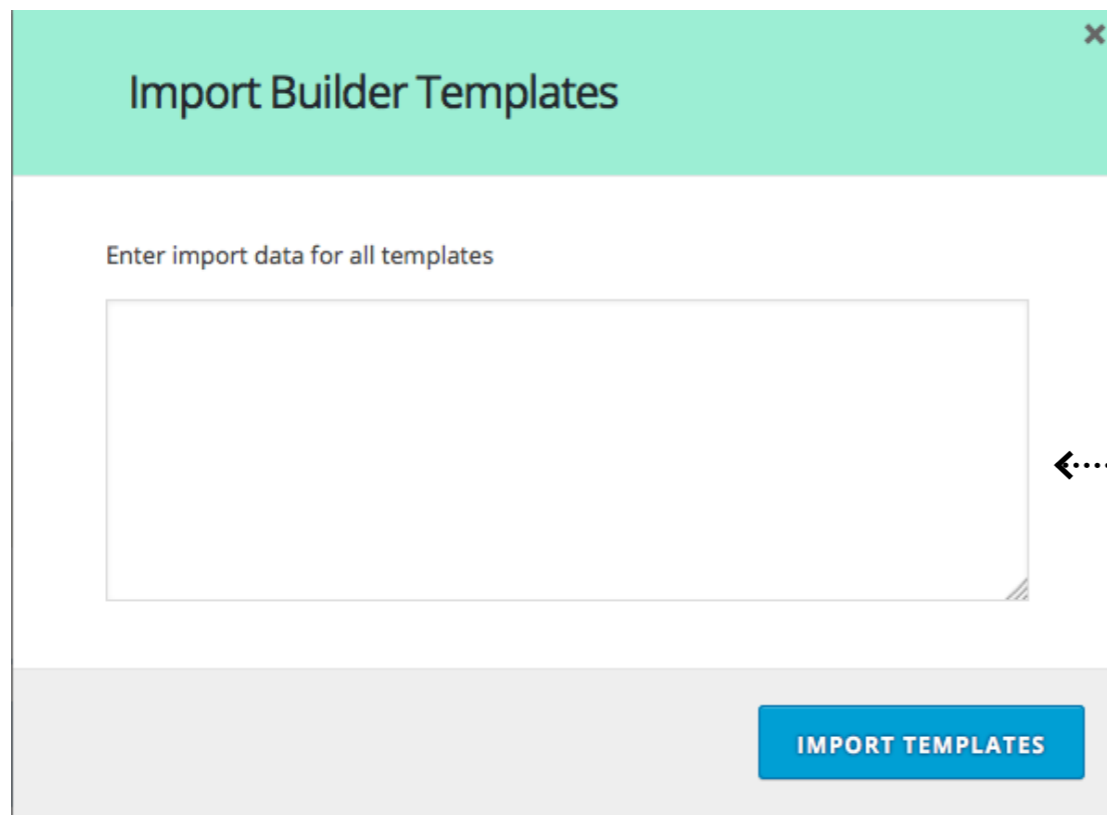

Select All and copy.

Save these codes in a text file if you wish to keep them for later use.

Import Templates

Import Templates
Click to Import Templates

2
Import Builder Templates
Paste previously copied from export templates data. Importing will replace all existing templates with new ones.

{ end }
