Customer Service Standards

What service can you expect from us?

Our aim is to administer the intellectual property legislation fairly and consistently. We believe it is important that you should know what you can expect from us and so we set specific standards for our dealings with you. Our guiding principles are that you may expect to:-

- be treated fairly;
- be treated courteously; and
- get help from us with your application.

To achieve this we aim to do the following:

- publish details of all the applications for Intellectual Property Rights (IPR) we accept, and publish major decisions which lay down new principles or reinforce existing ones for the grant and protection of IPR;
- always explain and give reasons for our decisions and give you the chance to challenge them;
- be positive and helpful to you; and
- staff our enquiry points form 09:00 to 17:00.

The standards, including the performance against them for the quarter July to September 2006 are set out below. Performance will continue to be monitored with the results updated quarterly.

We will:

- | | |
|--------------------------------------------------------------------|-------|
| • See visitors within 10 minutes of pre-arranged appointment times | 100% |
| • Answer enquiries politely and professionally: | |
| letters and faxes within 5 working days | 100% |
| e-mail enquiries within 1 working day | 100% |
| 90% of telephone calls within 20 seconds. | 93.6% |

The following are targets that are not able to be measured

- Provide clear information about our services
- Make our services available to everyone
- Act on feedback to solve problems and make sure they do not happen again.

If you wish to comment generally on performance against standards, or wish to suggest any other areas of the Office where standards might be established, please contact:-

Complaints Procedure

The Patent Office is committed to providing high quality best value services.

If things go wrong we want to know.

If you wish to complain about the quality of service you have received from us and cannot resolve the problem with the person you have been dealing with or his/her manager, please write to:

Ron Marchant
Chief Executive
The Patent Office
PO Box 49
Cardiff Road

e-mail: box49@patent.gov.uk

Your complaint will be acknowledged within one working day and you will receive a full reply within 10 working days. If, in exceptional circumstances, we cannot meet this target, we will explain why and give you a new deadline.

If you have followed this procedure and are still not satisfied, you have the right to ask your MP to take up your complaint and our handling of it with the Parliamentary Commissioner for Administration (the "Ombudsman"). Your local Citizen's Advice Bureau will give you the address of your MP. You may get further advice from the Ombudsman's office at:

Provision of Information from the Patent Office

On-Line Web Services

A number of **free** services are available via our web site which is located at **www.patent.gov.uk**.

esp@cenet

This service provides an interface to the published patent application databases of the UK Patent Office, the European Patent Office and other European national patent offices, as well as access to the PCT database of published patent applications. A full copy of the specification, claims and drawings may be viewed if available.

Designs Image Search

This service provides access to images of UK registered designs along with bibliographic information.

Trade Mark Text

This service provides searches for trade marks matching/starting with specified text.

Trade Mark Proprietor

This service provides searches for trade mark proprietors.

Trade Mark Classification Index

The index serves as a guide to the classes of goods and services to specify when applying for Trade Mark registration. With over 70,000 terms, the index shows which class to put each term in.

Legal Decisions

This service provides the text of reasoned decisions issued by the Patent Office since the beginning of 1998.

Status Information

This service provides the status information for Patents, Supplementary Protection Certificates, Trade Marks and Designs.

Other Services

The Status Information and further information can also be obtained on paper from the Patent Office. Some of the information available is shown below, along with the relevant prices.

Patents	Request for uncertified copy from file or register	£5
Designs	Request for uncertified copy of extract	£5
Trade Marks	Request for uncertified copy from file or register	£5
General	Cost, per page, of faxing information	£1 (plus VAT)

Copies can also be obtained in person from the Patent Office, London Front Office, Harmsworth House, 13-15 Bouverie Street, London, EC4Y 8DP.

Filing of documents by facsimile transmission

The UK Patent Office operates a facility for the filing of documents by facsimile transmission. This notice updates the operational arrangements for such filings and supersedes all previous notices.

Basic features

1. Any document which can be filed by post or by hand may also be filed by fax. However, each facsimile transmitted document must be legible and the responsibility for ensuring legibility rests with the sender. If upon subsequent examination (see paragraph 11) it transpires that any part of the document received is unintelligible, no filing date will be accorded to that part. Design, trade mark or other applications which incorporate photographic or other forms of representation may involve a particular risk and customers will need to bear this in mind.
2. Customers may fax both fee-bearing and non-fee-bearing documents, but where a fee is payable for a document at the time of filing, the customer must have a deposit account with adequate funds in it in order to secure a filing date (see paragraphs 8-10). Where charges against a deposit account arise customers should include a fee sheet with their faxed submission, clearly indicating their account number and any reference they would like to appear on the fee sheet acknowledgement.

Regular Notices - cont

3. **The facsimile transmission number for this service is +44(0)1633 814444.**
Customers should not fax documents to be filed in connection with a patent, design or trade mark application to any other number in the Office unless specifically instructed otherwise.
4. The facsimile machines of the Patent Office are open to receive transmissions on a continuous basis (24 hours a day and seven days a week) and the time and date of receipt of the documents is recorded automatically.
5. Some documents require duplicate copies to be submitted and other formal presentation requirements to be met. Customers filing by fax should, however only fax one set of documents and except as detailed in paragraph 6 below, should not submit the original or additional copies of the document transmitted by fax unless and until requested to do so by the Patent Office.

Restricted requirement for confirmatory hard copies

6. Confirmation copies should only be sent automatically in the following cases:
 - evidence (whether affidavit, witness statement or statutory declaration),
 - patent applications filed with an accompanying search request (Patent Form 9/77),
 - PCT applications, and
 - translations of granted European Patents designating the UK.Confirmatory copies should be prominently marked "In confirmation of fax".
7. In cases other than those listed in paragraph 6, confirmatory copies should not be sent but may exceptionally be requested by the Office eg if there is a problem with the clarity/completeness of the faxed document received.

Filing dates

8. The filing date accorded is the date of receipt of the complete fax if the office is open for the class of documents, or if not, the next working day.
9. Where a fee is due for a transaction at the time of filing, the filing date will be as in paragraph 8 above, or the date on which sufficient funds are available in the deposit account (see paragraph 10) or the fee is otherwise paid, whichever is the later.
10. With the exception of trade mark applications, UK legislation does not allow the Patent Office to accord a filing date to a document unless we receive any associated fees at the same time. To help them meet this requirement, customers may open and fund a deposit account with the Patent office against which we will charge the appropriate fees. Deposit account terms and conditions are available on request.

Fax-back Service

11. Documents filed by fax to the number given in paragraph 3 are checked, upon receipt, for legibility and to ensure that the number of pages specified on the fax header is the number received. No appraisal is made of them until they are examined in the normal course of business.
12. Facsimile machines will generally tell the sender whether the transmission has been completed; but transmission may involve a risk and the customer may want assurance that the documents received by the Patent Office are correct and legible.
13. With this in mind, we offer to deposit account holders and customers paying by credit/debit card a fax-back service of the entire transmission to any destination in the UK, for a charge of £25(Pounds Sterling) per transmission. Fax-back to locations outside the UK can also be provided by prior arrangement. Customers requiring the fax-back service must indicate this on the fee sheet.

Regular Notices - cont

14. The fax-back service is available for documents filed by fax to the number given in paragraph 3 from Monday to Friday (excluding public holidays) between 9.00 and 21.00 (UK time). Transmissions received outside these hours will be faxed back as soon as the Patent Office re-opens for business. With this proviso, the Office will endeavour to fax back within 30 minutes of receipt.

Caveat

15. Customers should note that the facsimile services do not offer an infallible means of transmission. Interception of data, or misdirection due to operator or technical error is possible. Documents which the customer believes might include information of relevance to national defence and security must not be filed by fax; and others are faxed at the customer's risk, although every effort will of course be made to ensure an efficient and accurate service.

National Security

Attention is drawn to the provisions of section 23 of the Patents Act 1977 (as amended by the Patents Act 2004 with effect from 1 January 2005).

Under these provisions, certain patent applications may NOT be filed abroad by a person resident in the United Kingdom, unless permission is obtained from the comptroller. These are patent applications which contain information relating to military technology or information the publication of which might be prejudicial to national security or public safety. For such patent applications, permission to file abroad should be sought from the comptroller, unless an application for a patent for the same invention has first been made in the United Kingdom, and six weeks have elapsed from the date of such application and no directions prohibiting publication or communication have been given or all such directions have been cancelled. Requests for permission from the comptroller to make an application abroad should be made even if, for example, such an application is required by contract with a foreign firm.

Requests for permission will be facilitated by explicitly addressing them "For attention in Room G.R70". Alternatively, requests may be faxed to +44 (0)1633 814415. Enquiries regarding this notice may be made by telephoning +44 (0)1633 813558.

Filing of Patents and Registered Designs Documents by Post

Anything sent to the Patent Office under UK patents and registered designs law¹ by posting in the United Kingdom is deemed to have been filed when it would have been delivered in the ordinary course of post. In practice, this has generally meant that patents and registered designs documents sent through the Royal Mail could, if delayed, be given a filing date before their actual date of receipt. Supporting evidence is called for in some cases before the earlier date is granted.

Schedule 8 of the Postal Services Act 2000, which came into force on 26 March 2001, makes clear that the use of the terms "post", "registered post", "recorded delivery", and "first class post" in legislation cannot be limited only to services provided by what it calls "the Post Office company". As a result, the Patent Office now recognises as "post" any items delivered to it by any commercial service which undertakes to deliver mail in exchange for a fee. It follows that patents and registered designs documents sent by such commercial services can, if delayed, be deemed to have been filed before the actual date of receipt.

Enquiries about this notice, and requests for documents to be given a filing date earlier than the actual date of receipt, should be directed to Kerry Collings at the Patent Office

UK Classification Key

1. **There are no changes planned for 2006.**
2. **Summary of changes effective from 1 January 2005.**

On 1 January 2005 certain parts of the Key were republished. These parts together with the un-amended parts of Edition W collectively constitute Edition X. All parts are now available at <http://www.patent.gov.uk/patent/reference/ukc/index.htm>.

All changed headings, whether to reflect changes of substance or corrections of clerical errors have been republished completely. All pages of these headings carry the designation X as the first part of the code at the bottom left hand corner.

The following pamphlets are now available without charge from the above website.

- 1) "Notes on the use of the Classification Key";
- 2) "Introduction to U1S";
- 3) "Heading U1S Universal Indexing Schedules for Use, Application, Utility and Property";
- 4) "The Documentation Record" (revised to edition X)
- 5) "Unit Introductions" (showing changed headings).

The following pamphlets are available in printed form but are not available on our website:-

- 1) "Structure of the Classification Key";
- 2) "Concordance between the UK Key and the IPC";
- 3) "Catchwords Index to the Classification Key"
- 4) "Catchwords Index to Heading U1S".

3. Prices

A number of different packages are available. For details see the Regular Notices section.

4. Classification Key changes operative from 1 January 2005 (Edition X)

The following classification changes are operative from Patent Specification GB2403389A

<u>Heading</u>	<u>Detail</u>
A5R	Deletion of erroneous exclusion reference
A6S	Correction of clerical error - page 3
B5N	Complete restructuring to reflect changes in European patent classification
E2F	Correction of error - page 4; addition of exclusion reference
G2J	Addition of exclusion reference
G4A	Creation of new part Heading - Part F
H1N	Correction of error - page 17
H4L	Further detail classification; clarifying amendments.

Eighth edition of the International Patent Classification (IPC8)

Following the introduction of the eighth edition of the international Patent Classification (IPC8), all GB patents published after 31 December 2005 will be classified under the advanced level of IPC8.

All patent documents also continue to be classified under the UK Classification Key.

IPC8 is a new, internationally-recognised classification system which came into force worldwide on 1 January 2006. It was introduced by the World Intellectual Property Organization (WIPO), 34, Chemin des Colombettes, CH-1211 Geneva 20, Switzerland; email ipc.mail@wipo.int. Any enquiries about IPC8 and its use should be directed to WIPO.

IPC8 classifying terms look similar to IPC7 terms except that all classifying terms now include a version indicator in brackets, currently "(2006.01)". This indicates that the classifying term in question was first introduced in January 2006.

All existing IPC7 terms that remain valid under IPC8, as well as new terms introduced on 1 January 2006, carry the version indicator "(2006.01)". Any new terms introduced after January 2006 will carry a version indicator appropriate to the month of introduction. Changes in the IPC8 classification scheme are expected every 3 months from July 2006.

The design of front pages of patent documents has been altered according to new internationally-agreed formats which stipulate a tabular presentation of IPC8 data. IPC8 data presented in the indexes of this Journal has been altered to include the version indicator mentioned above.

Indexes Used in this Journal

The head notes to some of the indexes in this Journal include examples of entries appearing in the indexes. Where appropriate, component parts of the examples are preceded by a two-figure INID code (Internationally agreed Numbers for the Identification of bibliographic Data) and include two-letter country codes. The codes are those of standards of the World Intellectual Property Organisation (WIPO) and more details can be found on the WIPO Website: www.wipo.int/scit/en/standards/standards.htm.

Specifications on Sale in London

Current Specifications, although not available for sale at the London Front Office, can be ordered during the week commencing 7 February 2007 are in the range GB 2428171 - GB 2428954.

Special Notices

Announcement of the European Qualifying Examination 2007

The next European Qualifying Examination will be held from 6 - 8 March 2007. Full information regarding the examination centres and conditions of enrolment has been published in the Official Journal of the European Patent Office and can be accessed via this link:

<http://eqe.european-patent-office.org/site/application/>

UK Examination Centre (Bristol)

Candidates may request to sit the examination at The British Empire and Commonwealth Museum, Bristol. The adoption of Bristol as an examination centre is conditional on at least 10 candidates enrolling there. However, it is expected that this number will be well exceeded. Candidates must indicate on their enrolment forms whether, in the event that Bristol is not a centre, they would wish to sit the examination at Munich, The Hague or Berlin (which the EPO would determine according to availability) or withdraw.

Patent Office Mediation Service

The Patent Office offers a high quality, value-for-money mediation service for use in settling Intellectual Property disputes.

Why you should use our service

The service aims to provide a quick and cost-effective alternative to litigation. The service allows parties to reach agreement in Intellectual Property disputes through mutual consent, which is vital if goodwill is to be preserved for future business relations.

The Patent Office's team of CEDR accredited mediators has extensive experience of dealing with Intellectual Property disputes, ranging from ownership and inventorship disputes to complex licensing agreements.

What we offer

We can provide an accredited mediator and/or facilities to accommodate mediation at either our London or Newport offices.

Our mediators and accommodation facilities can be booked on either a half or full day basis.

Special Notices - cont**What it costs**

Mediation & Accommodation: includes the costs of a mediator, accommodation, general administration and travelling expenses.

Venue	Full day	Half day
Central London	£1000	£750
Newport	£750	£500

Accommodation only: £100 per half day at either our central London or Newport offices.

All costs are subject to VAT for UK customers and will be borne equally by the parties unless agreed otherwise.

Applications for Patents Filed

Application Number Range

GB0625702.6 - GB0700099.5

This index sets out details of applications for patents filed in the application number range given above. The entries are arranged in alphabetical order according to the applicant's name. Where there are joint applicants, then the entry under the name of the first applicant sets out details of the application, including the names of the other applicants. The entries under the names of the other applicants are cross referenced to the entry for the first applicant.

Each entry in the index under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the title of the invention; the filing date of the application; any priority details; and the application number allotted to the application.

Where an application is requesting an early date under Section 8, 12,15(9), or 37 of the Act, then the filing date of the earlier application is included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent Application, then the application number, the publication number, and the date of filing of the PCT or EP application are included (see example 3).

The application number includes, at its end, a check digit. The full application number, including the check digit, should be quoted in all correspondence concerning proceedings in respect of an application up to the grant of a patent. When the application is published under Section 16(1) of the Act, it will be accorded to a seven-figure serial number. This should be used only when seeking to identify printed copies of the specification and its abstract and to make enquiries concerning entries in the Register of Patents.

These applications will not be available to the public for inspection or purchase until the date of publication under Section 16(1) of the Act. This date will be advertised in a subsequent issue of this Journal.

Where applicant details are not initially available that entry will appear at the end of the index and the relevant data field will be blank. A further entry will be made in the Journal when the identity of the applicant is supplied.

There follows three examples of entries for this index. The first example shows an entry under the name of the first applicant for an application having joint applicants, and includes an entry under the name of one of the other applicants. The second example shows an entry for a divisional application and includes priority details. The third example shows an application derived from a PCT application.

Applications published : Subject-Matter Index

GB2428548 - GB2428954

This index sets out details of applications in the above number range which are published under Section 16(1) as from the date of publication of this issue of the Journal. Printed copies of the applications, together with the front pages containing their abstracts and bibliographic and classification data, and copies of search report under section 17, are now available at £2.67 per copy (including postage) from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ. These items are also available, but for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP

The index also includes applications in the above number range derived from applications under the Patent Cooperation Treaty (PCT) which have entered the UK national phase. Printed copies of the front page of these applications are similarly available together with English translations of those applications published under the PCT in a language other than English.

Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the applicant(s) and the country of incorporation; the abstract title; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and the date of filing of the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European Patent application, then the application number, the date of filing, the publication number and the date of publication of the PCT or EP application are included (see example 3).

In the index, the entries are grouped in ascending publication number order according to the UK Classification Headings. The UK Heading is given at the beginning of each group. Where an application has been classified in a supplementary (or secondary) Heading, then the entry under the primary Heading includes details of the application and the entry under the supplementary Heading is in the form of a cross reference to the primary Heading (see example 4).

The publication number is the seven figure number given to an application when it is published and by which it will be recorded on the Register of Patents. Printed copies of each application will also be identified by the publication number, followed by the document type "A". This identification should be quoted in full when ordering copies. However, for all proceedings up to grant of a patent, the application number originally assigned should be used.

There follows four examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried

for a divisional application, and the third includes information carried for an application derived from a PCT application. The fourth example shows an entry under a supplementary Heading.

Applications published: Name Index

This index lists, in alphabetical order, the names of applicants and inventors for the applications the publication of which is announced in this issue of the Journal. The entry under the name of the applicant sets out the details of the application including the name of any inventor who is not also an applicant. Where an inventor is also an applicant, the name appears in the index only as an applicant. Where there are joint applicants, details of the application are given only for the entry under the name of a first applicant, the entries under the names of the other applicants being cross referenced to the entry for the first applicant. Where an inventor is not also an applicant, the entry under the name of the inventor is cross referenced to the entry of the applicant, or the first applicant in the case of joint applicants.

Each entry under the name of the (or the first) applicant provides the following information: the name(s) of the applicant(s); the country of incorporation; the names of inventors who are not also applicants; the UK Classification Headings accorded to the

application; and the publication number of the application.

There follows three examples of entries for this index. The first example shows the entry for an application having two joint applicants and an inventor who is not also an applicant, the second shows the entry for the inventor who is not the applicant, the third shows the entry for the other applicant.

Patents granted:**Number Index**

Patents whose grant is indicated in the index below take effect for the purposes of all provisions of the Act subsequent to Section 25(1) as from the date of publication of this issue of the Journal. Printed copies of the corresponding specifications of the patents identified by the publication number listed, and followed by the letter "B", are now available for sale at £4.04 per copy (including postage). These items are available from The Patent Office (Sales), Concept House, Cardiff Road, Newport, South Wales NP10 8QQ and, for a limited period only, to personal callers at Harmsworth House, 13-15 Bouverie Street, London EC4Y 8DP.

This index lists the granted patents in ascending publication number order. Each entry in the index provides the following information: the publication number; the application number; the date on which the application was filed at the Office; the name(s) of the proprietor(s) and the country of incorporation; the name(s) of the inventor(s); the title of the invention; any priority details; the United Kingdom Classification Heading(s) assigned to the application; and the International Patent Classification assigned to the application.

Where an application is requesting an early date under Section 8, 12, 15(4), or 37 of the Act, then the application number and date of filing the earlier application are included (see example 2). Where an application is derived from an application under the Patent Cooperation Treaty or is converted from a European patent application, then the application number, the date of filing, the publication number, and the date of publication of the PCT or EP application are included (see example 3).

There follows three examples of entries for this index. The first does not include any information on priorities, earlier applications, or PCT or EP applications. The second and third include priority information. In addition, the second includes information carried for a divisional application, and the third includes information carried for an application derived from a PCT application.

Patents granted:**Name Index**

This index lists, in alphabetical order, the names of proprietors and inventors for patents whose grant is announced in this issue of the Journal. The entry under the name of the proprietor sets out the details of the patent including the name of any inventor who is not also a proprietor. Where an inventor is also a proprietor, the name appears in the index only as a proprietor. Where there are joint proprietors, details of the patent are given only for the entry under the name of a first proprietor, the entries under the names of the other proprietors being cross referenced to the entry for the first proprietor. Where an inventor is not also a proprietor, then the entry under the name of the inventor is cross referenced to the entry for the proprietor, or the first proprietor in the case of joint proprietors.

Each entry under the name of the (or the first) proprietor provides the following information: the name(s) of the proprietor(s); the country of incorporation; the names of inventors who are not also proprietors; the UK Classification Headings accorded to the patent; and the publication number of the patent.

There follows three examples of entries in this index. The first example illustrates the case where there is a single proprietor who is also the inventor. The second example illustrates the case where there is a single proprietor and an inventor who is not also a proprietor, and includes the entry for the inventor. The third example illustrates the case where there are joint proprietors and an inventor who is not also a proprietor, and includes the entries for the other proprietors and the inventor.

European Patents granted

Grants mentioned in EPO Bulletin No 07/06 dated 7 February 2007

This index lists, in ascending publication number order, European patents designating the United Kingdom as a Contracting State, which have been granted under Article 97 of the European Patent Convention as of the date of the EPO Bulletin mentioned above. For each entry in this index, the first item is the publication number of the European application and the second item is the application number. The item (NOT ENGLISH) is used to indicate when the language of publication is French or German, and the last item is the name(s) of the proprietor(s). For patents having a publication language of French or German, an English translation must be filed if the patent is to continue to be effective in the UK.

There follows an example of an entry for this index.

Translations filed: European Patents

This index lists European Patents designating the United Kingdom as a Contracting State, for which a translation has been filed under Section 77(6)(a). The entries are arranged in blocks in order of date on which the filing of the translation was entered in the Register. Within each block, the entries are arranged in ascending publication number order with the application number, the date on which grant took effect in the UK, and the name of the proprietor given against each publication number.

There follows an example of an entry in the index.

(Date of entry in Register) 15 DEC 1989
 (11) EP0145872 (21) EP84111927.4
 (Effective date of UK grant) 20 Dec 1989

European Patents void

This index lists European Patents designating the United Kingdom as a Contracting State, which were published in French or German and for which an English translation has not been filed within the period prescribed by the Patents Rules. In accordance with Section 77(7), they are therefore treated as always having been void. The patents are listed in ascending publication number order. Against each publication number is the corresponding application number and the date of the European Bulletin in which grant by the EPO was announced.

There follows an example of an entry in the index.

Section 13 Mention of Inventor

Application for Inventor to be mentioned under Section 13(1)

Application filed

GB 2330068 AUTOLIV DEVELOPMENT AB Improvements in or relating to an accessory for a vehicle seat. Application for a person to be mentioned as inventor under Section 13(1) by Autoliv Development AB filed on 13 September 2006

Application allowed

GB 2330068 AUTOLIV DEVELOPMENT AB Improvements in or relating to an accessory for a vehicle seat. In a decision of the comptroller dated 23 November 2006, the application filed under Section 13(1) was allowed. The comptroller found that Bertil Mattson should be mentioned as a joint inventor in the published patent application and granted patent for the invention and directed that an addendum slip mentioning him as such be prepared for the published patent application and granted patent for the invention.

EP 1007750 TITANOX DEVELOPMENTS LIMITED

Titanium alloy based dispersion-strengthened composites. In a decision of the comptroller dated 28 December 2006, the application filed under section 13(1) was allowed. The comptroller found that Danyang Ying should be mentioned as a joint inventor in the granted patent and directed in accordance with rule 14(5) that an addendum slip mentioning him as a joint inventor be prepared for the granted patent for the invention.

Application to amend the specification of a patent (under Section 27 and Section 75)

Application to Amend the Specification of a patent now Open to Opposition

Section 27 amendments and Section 75 before the Comptroller

If you intend to oppose the amendments filed under section 27 or 75 before the Comptroller, you must **within two months** of the appearance of the advertisement, file two copies of Patents Form 15/77 giving the comptroller notice of opposition to the amendments. You also need to file two copies of a statement setting out fully the facts of your case and the relief that you are seeking.

Section 75 before the Court

If you intend to oppose the amendments, filed under Section 75 before the court, you must **within 14 days** from the appearance of this advertisement, file and serve on all parties and the comptroller a notice opposing the application. This must include the grounds relied on.

Sections 74A and 74B**Patent Office opinions**

Details of Patent Office opinions (under section 74A) are not
given in this Journal, but are published on the Patent Office
website at:

<http://www.patent.gov.uk/patent/p-other/p-object/p-object-opinion.htm>

These web pages contain information on all requests for opinions
and their outcome (including where the request has been refused
or withdrawn). In addition, they give information generally on
the opinions process, including an explanation of the procedure
for filing observations on a request, and the deadline for doing so.
Details of any reviews of opinions (under section 74B) may also
be found there.

Proceedings under EC Regulations 1768/92 and 1610/96

Supplementary Protection Certificates for Medicinal Products and Plant Protection Products, respectively

These entries include details of all proceedings relating to Supplementary Protection Certificates. Applications for Supplementary Protection Certificates are numbered in a single yearly sequence commencing SPC/GB93/001 covering both medicinal and plant protection products and the same number is retained for the granted certificate. Proceedings are open to public inspection but the granted certificate is not separately published.

The entries are grouped in categories according to the type of proceedings. Within each category the entries are arranged in alphabetical order according to the name of the applicant for, or holder of, the certificate and provide the following information; the name and address of the applicant or holder; the product in respect of which the certificate has been applied for or granted; the product type; ie. "Medicinal" or "Plant Protection"; the number and date of the first authorisation under Directive 65/65/EEC or Directive 81/851/EEC to place the product on the market as a medicinal product in the United Kingdom or the number and date of the first authorisation under Article 4 of Directive 91/414/EEC or an equivalent provision of national law to place the product on the market as a plant protection product in the United Kingdom; where relevant, the country; number and date of the first authorisation to place the product on the market in the European Community; the number and title of the basic UK patent or European patent (UK) which protects the product; and the number of the application or certificate.

The entries will also state as appropriate: the filing date of the application; the date of grant or rejection of the application; the maximum period of the granted certificate; the effective period of the certificate on entry into force; and the date of lapse or invalidity of the certificate.

There follows three examples of entries under these proceedings. The first relates to a new application for a certificate based on a European patent designating the United Kingdom and having first authorisation of the product in the United Kingdom. The second example relates to a certificate granted based, once again, on a European patent designating the United Kingdom but with the first product authorisation in the EEC in Denmark. The third refers to a certificate entering into force based on a United Kingdom patent with first product authorisation in the EEC in Belgium.

Certificates of Registration issued

Week Ending 17 January 2007

The details of designs in this list as well as previously registered designs, are open to public inspection, details of which may be inspected without provision of a copy, free of charge at The Patent Office, Designs Registry, Newport, South Wales NP10 8QQ or at the London Front Office at Harmsworth House, 13-15 Bouverie St, London EC4Y 8DP.

Copies of the Designs Register entry and representations of the registered design may be obtained from the date on which the Certificate of Registration is issued (Grant Date), on payment of a fee of £5. Photographic copies, where reproduction is from a large or coloured specimen or a photograph that will not effectively photocopy, may be obtainable exceptionally at market price.

Alternatively the Register of Designs and registered representations may be inspected on The Patent Office web site at:

<http://www.patent.gov.uk>

Clicking on the Database Services button on the home page will display services available of which the following relate to Designs.

Design Status Information Service

Displays the Register entry for each design number input.

Designs Image Search Service

Displays all registered representations and a brief register extract for each registered design. Designs can be searched and examined by proprietor, classification or design number.

No fee is charged for the use of either of the above database services.

Restrictions

Designs registered for wallpaper or lace are not available for public inspection until two years after the date of grant and for textiles 3 years, after the date of grant.

Any enquiries about designs registered prior to 1965 should be addressed to the **Public Record Office, Ruskin Avenue, Kew, Richmond, Surrey TW9 4FU.**
