

RECOMMENDED INSTALLATION FOR DSTV DECODERS IN A SINGLE UNIT DWELLING*

South Africa (April 2015)

DSTV
Explora

Installed in XtraView								
Installed on its own	DStv Explora	DStv HD Decoder	HD PVR 2U	HD PVR 2P	HD PVR 4 (Pace)	HD PVR 4 (UEC)**	SD PVR**	1110, 1131, 1132
REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB	REQUIRES Quad LNB with Multiswitch	REQUIRES DStv Smart LNB	REQUIRES DStv Smart LNB

Important Information

- The performance of your DStv decoder is directly related to the quality of the installation (including use of approved equipment and correct alignment of the satellite dish).
- We recommend an 80cm satellite dish for all installations.
- We recommend the use of a DStv Accredited Installer for all installations. To find your closest installer visit dstv.com.
- The above recommendations are for all NEW installations, upgrades to new decoders or upgrades to XtraView.
- The DStv Explora will work if connected to a twin or quad LNB (used with a multiswitch) and with a UniCable LNB. HOWEVER, if the DStv Explora is installed with any other type of LNB other than the DStv Smart LNB, the installation may require changes to receive future services.
- XtraView installations require the decoders to be linked by a "heartbeat" cable.

- The DStv HD Decoder will work if connected to a twin, quad or UniCable LNB.
- XtraView installations require the decoders to be linked by a "heartbeat" cable.

About the DStv Smart LNB

- The DStv Smart LNB is a new LNB specially designed and manufactured for DStv to meet the growing needs of our non-commercial installations.
- We recommend the DStv Smart LNB for all DStv Explora and most XtraView installations (when installed in a Single Unit Dwelling, ie. not a complex or apartment). It is not suitable for Multiple Unit Dwellings (like complexes and apartments).
- The DStv Smart LNB combines the features of a DStv Switch into a single UniCable LNB and offers a single cable solution for distribution of multiple satellite signals. It has 24 user bands, 4 UniCable outputs and 2 Universal outputs.
- For more information on the DStv Switch, please chat to your DStv Accredited Installer.
