1. Avaya Professional Credential Program Overview

The Avaya Professional Credential Program is designed to ensure individuals have the knowledge and skills to successfully sell, design, implement and maintain Avaya products and solutions that exceed customer expectations. The Avaya Professional Credential Program currently consists of Sales, Design, and Services credentials and distinguishes between solution Credentials and Product Specific Credentials.

Sales and Design Credentials

Avaya Engagement solutions Certifications

- Avaya Certified Design Specialist (ACDS)
- Avaya Certified Sales Professional (ACSP)

Avaya Product Professional Credentials

- Avaya Professional Design Specialist (APDS)
- Avaya Professional Sales Specialist (APSS)

Services Credentials

Avaya Engagement Solutions Certifications

- Avaya Certified Solution Specialist (ACSS)
- Avaya Certified Integration Specialist (ACIS)

Avaya Product Certifications

- Avaya Certified Support Specialist (ACSS)
- Avaya Certified Implementation Specialist (ACIS)

Avaya Product Professional Credentials

- Avaya Support Professional Specialist (ASPS)
- Avaya Implementation Professional Specialist (AIPS)

Avaya uses a blend of online tests and proctored exams to validate competencies. Professional Specialist credentials are awarded based upon passing Online Tests. Certified Credentials incorporate Proctored Exams and Online Tests as a requirement to earn the credential.

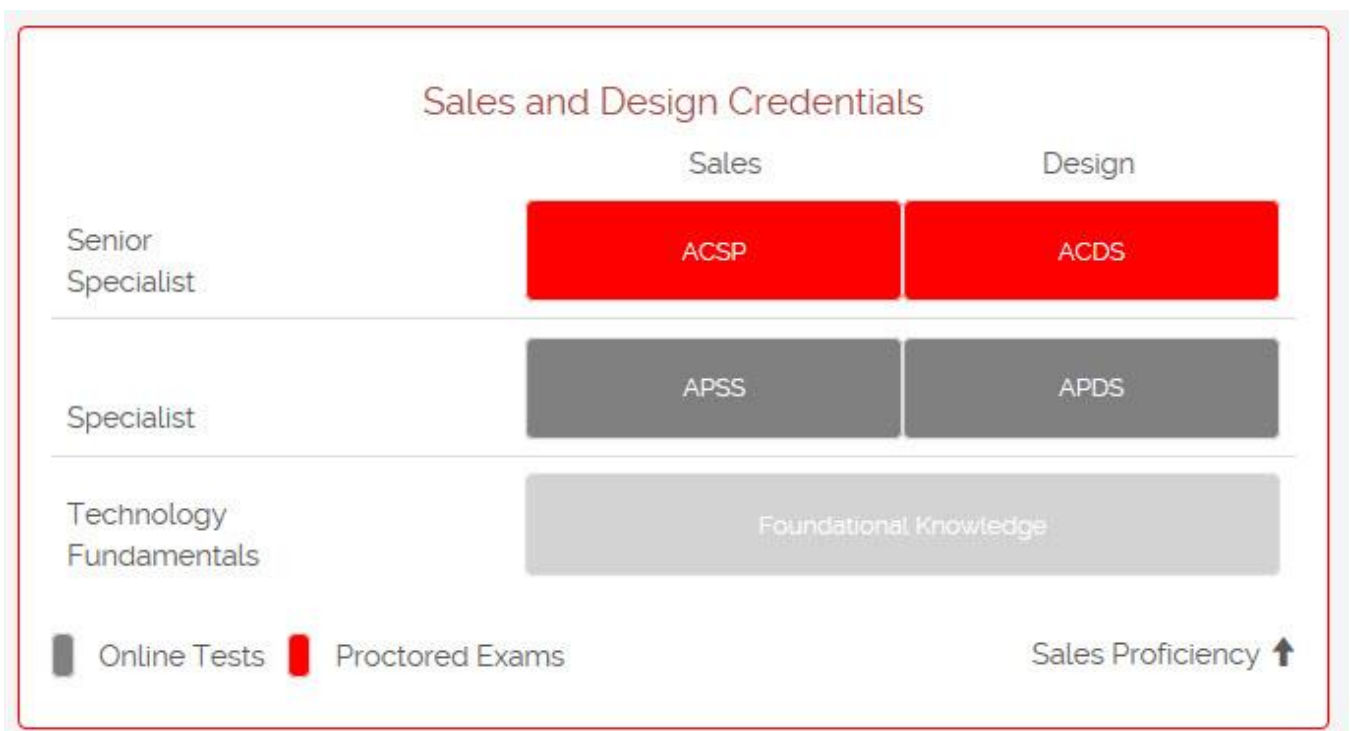

The Avaya Professional Sales Specialist (APSS), Avaya Professional Design Specialist (APDS), Avaya Certified Sales Professional (ACSP) and Avaya Certified Design Specialist (ACDS) credentials are the Avaya sales and design authorizations validating knowledge and skills in the areas of selling and designing Avaya products and solutions.

The Avaya Services credentials validate knowledge and skills in the areas of implementation, administration, maintenance and troubleshooting for Avaya products and solutions.

This guide provides background and planning information for the Avaya Professional Sales Specialist (APSS), Avaya Professional Design Specialist (APDS), Avaya Certified Sales Professional (ACSP) and Avaya Certified Design Specialist (ACDS) credentials.

2. Avaya Sales and Design Credential Program Structure

Avaya Professional Specialist credentials use non-proctored Online Tests delivered via the Avaya Learning Center.

Not all solution areas have both Avaya Professional Sales Specialist (APSS) and Avaya Professional Design Specialist (APDS) credentials. The types of credentials and the number of Online Tests to earn a credential is a function of the solution’s complexity in the areas of sales and design.

The Avaya Certified Sales Professional (ACSP) credential validates that the candidate has an advanced level of technical proficiency necessary to understand Avaya Sales skills and processes. The Avaya Certified Design Specialist (ACDS) credential validates the candidate has an intermediary level of technical proficiency to create specific greenfield, upgrade and migration solution designs based on customer business needs. Refer to article [New Avaya Certified Sales Professional \(ACSP\) Credential Focuses on Avaya Engagement Solutions](#) for details and release dates for this new credential.

The ACDS portfolio has undergone a major redesign to provide the Avaya Sales Engineer (SE) community a growth path to mastery in Avaya Engagement Solutions. The ACDS

curriculum for Avaya Engagement Solutions instills a common methodology and approach to solution design across the entire SE community and builds upon the foundation established with the Avaya Professional Design Specialist (APDS) curriculum. Refer to article [Avaya Certified Design Specialist \(ACDS\) Credential Re-launches With Focus On Avaya Engagement Solutions](#) for the release dates of the re-launched credentials.

In support of the Avaya Professional Credential Program, Avaya Learning offers a wide variety of training content to meet the needs of our Partners, Customers, and Associates.

Fundamental to all earning Avaya Professional Credentials is a solid understanding of the core technologies upon which the products and solutions are built. Avaya recommends the Programs of leading industry players to provide foundational knowledge: WestNet Learning (Foundational Technology Expert) and The SIP School (SSCA).

3. Avaya Professional Sales Specialist (APSS) Description

This credential validates that the candidate has a basic-to-intermediary level of knowledge to sell Avaya products and customer focused solutions.

Qualified candidates typically have sales skills background and have had success in closing deals.

The Credential will equip the sales candidate with the ability to:

- Articulate the purpose and features of a given product/solution.
- Craft appropriate probing questions to use with constituents (IT, LOB, CxO) to identify details about their problems that can form the basis for the solution ROI.
- Leverage this knowledge in developing a set of solution capabilities that can be delivered to address a client's problems.
- Communicate the value of the offers and associated services offerings (software, applications, hardware and software-based, as applicable).
- Communicate market position, technology, and product expertise and how it addresses key or common business problems found within particular market segments.

This credential is valid for two years, uses online test(s), and is reserved exclusively for Avaya Channel Partners and Associates.

Exception: APSS – Avaya Aura® Application Server 5300 (APSS -1101) remains a one year credential until further notice.

4. Avaya Professional Design Specialist (APDS) Description

This credential validates that the candidate has an introductory level of technical proficiency necessary to create specific designs and build foundational knowledge for solution designs based on the customer requirements.

Qualified candidates typically have technical awareness and understanding of solutions and products within a portfolio and the credential will aid them in understanding:

- Understand typical customer issues and trends in the target market.
- Discuss the products in a portfolio and explain the role they play in a solution: functionalities, capabilities, interdependencies, integration, interoperability, upgrade/migration requirements.
- Describe the value and functionalities a solution made up by the products in a portfolio bring to the customer.
- Discuss the available services and support (ProServ and/or AGS) options for a product or solution.
- Describe licensing options.
- Compare, contrast and position a solution over a competitor.
- Conduct application discovery.
- Clarify customer's request, current configuration and future needs.

This credential is valid for two years, uses online test(s) and is reserved exclusively for Avaya Channel Partners and Associates.

5. Avaya Certified Sales Professional (ACSP) Description

The Avaya Certified Sales Professional (ACSP) credential validates that the candidate has achieved an advanced understanding of and competence in Avaya Sales skills and processes for sales strategy and deployment.

Building upon the foundation established with the Avaya Professional Sales Specialist (APSS) curriculum, students completing the ACSP curriculum will be able to sell and position solutions that address the customer's issues and objectives.

Qualified candidates must have an APSS Certification in the portfolio they are attempting the ACSP in, and typically have advanced sales skills. The ACSP credential will aid them in their ability to:

- Describe the solution and create an innovation conversation.
- Identify customer needs based on industry and market challenges.
- Understand and apply the Avaya Sales skills and processes to your sales strategy and deployment.
- Ability to discuss the Avaya Innovations, how to whiteboard the solution, close on the deal and demonstrate as appropriate.
- Tailor your conversation approach to the appropriate audience.
- Identify the Avaya Services and Support offers for the Solution.
- Create value propositions that align to the customer's culture, strategy and long term business and revenue goals.
- Use Avaya differentiators to influence buying decisions.

ACSP Credentials use Online Tests and Proctored Exams, are valid for 2 years and are reserved exclusively for Avaya Channel Partners and Associates. To obtain an ACSP credential individuals need to hold the relevant APSS credential and successfully complete the proctored exam noted on the credential map.

Note: The ACSP credentials are planned for full deployment in Calendar Year 2016.

6. Avaya Certified Design Specialist (ACDS) Description

The Avaya Certified Design Specialist (ACDS) credential validates that the candidate has an intermediary level of technical proficiency necessary to create specific greenfield, upgrade and migration solution designs based on customer business needs.

Avaya recognizes that individuals responsible for designing customer **solutions** demonstrate advanced Sales Engineering skills and therefore should be distinguished with a credential that signifies their achievement.

Qualified candidates must have an APDS Certification in the portfolio they are attempting the ACDS in, and typically have intermediate Technical Sales Skills. The ACDS credential will aid them in their ability to:

- Create and explain Greenfield and legacy solution designs based on the customer discovery and requirements.
- Follow standard methodology during the customer discovery and designing process
- Create and diagram a complex solution architecture based on Avaya Reference Architectures
- Explain and estimate complex licensing scenarios
- Use given customer requirements and Avaya components, to recognize and recommend a solution design ready for pricing tool (i.e. ASD) configuration design.
- Compare and contrast the configuration design and BoM with the solution design and identify discrepancies.

The ACDS Certification is valid for 2 years, uses Online Tests and Proctored Exams, and is reserved exclusively for Avaya Channel Partners and Associates. To obtain an ACDS credential individuals need to hold the relevant APDS credential.

Note: The ACDS portfolio has undergone a major redesign to provide the Avaya Sales Engineer (SE) community a growth path to mastery in Avaya Engagement Solutions. The ACDS curriculum for Avaya Engagement Solutions instills a common methodology and approach to solution design across the entire SE community and builds upon the foundation established with the Avaya Professional Design Specialist (APDS) curriculum.

For additional Sales and Design credential comparative information see Appendix A – APSS, APDS, ACSP and ACDS Knowledge and Skills Matrices.

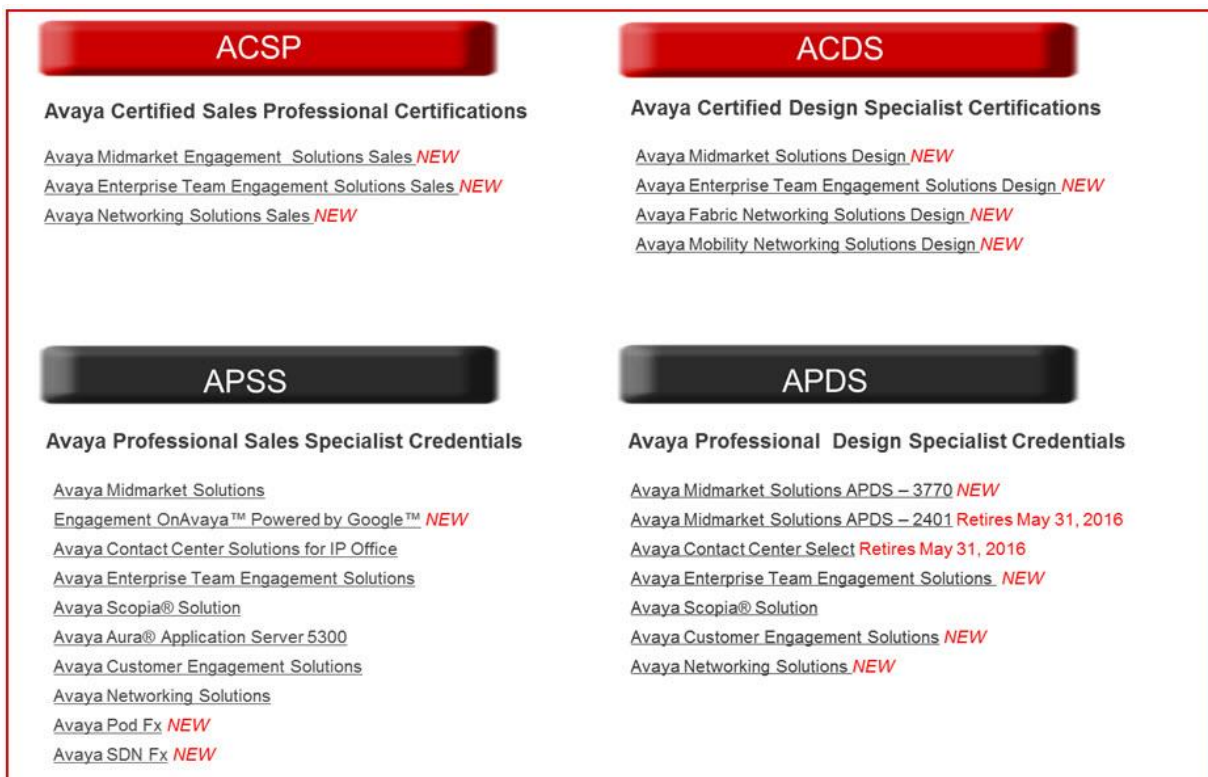

7. Credential Portfolio Overview

Avaya Sales and Design Certifications are in alignment with Avaya's new era of Avaya Engagement Solutions. The below table lists available Avaya Engagement Sales and Design Certifications first, followed by Avaya Professional Specialist Credentials.

The types of credentials and the number of online tests and proctored exams to earn a credential is a function of the solution's complexity in that particular area of sales and design.

The following diagram illustrates Sales and Design Credentials available and coming soon.

Sales and Design Credentials

8. Credential Plan-of-Record

Following is the status for the Avaya Professional Sales Specialist (APSS), Avaya Professional Design Specialist (APDS), Avaya Certified Sales Professional (ACSP) and Avaya Certified Design Specialist (ACDS) credentials. It reflects APSS, APDS and ACDS credentials available, coming soon and/or retiring.

Please note that as the Avaya Professional Credential Program evolves, information on changes is posted and distributed through standard communication channels (i.e: Avaya Learning Center, Avaya Learning News, Avaya Partner Portal, and Partner Newsflash).

Note:

9. Preparing For and Scheduling Avaya Online Tests and Proctored Exams

Preparing for Avaya Sales and Design Online Tests and Proctored Exams

Log-in to the Avaya Learning Center at www.avaya-learning.com and use the “Catalog Search” functionality to search either by “Curriculum/Credential” or “Search by Course Code.”

The Avaya Professional Credential Program landing page provides additional information around available credentials and the Credential Program Links page provides useful program documentation and latest news.

Training is recommended and core training courses are often supplemented as part of a comprehensive study program. Review the credential, online test / proctored exam and all curriculum map training course descriptions to determine the scope of training and experience most appropriate for you to prepare for the online test or proctored exam.

Technology Fundamentals

Selling, designing, implementing and maintaining Avaya Products / Solutions require a solid understanding of the core technologies upon which they are built.

Avaya recommends the programs of leading industry players to provide foundational knowledge: WestNet Learning (Foundational Technology Expert) and The SIP School (SSCA).

Access the “Foundational Knowledge” link on the Avaya Professional Credential Program landing page to learn more about these important programs.

Taking an Avaya Online Test

Avaya Online Tests are taken via the Avaya Learning Center. Students are required to log in to the Avaya Learning Center via Avaya Single Sign-On (SSO) process.

For questions related to registering for an Online Test or the SSO process please contact the Helpdesk at:

- **Avaya Learning Help Desk Call Center**
Call 866-Avaya-54 or 866-282-9254 [North American Region]
Outside North America: [Regional Local Number Listing](#)
- **Avaya Learning Help Desk Website**
Submit a request to the Support team at <https://partner-itss.avaya.com>

[Avaya Learning Center - Access via Secure Sign-on \(SSO\) Information](#)

To register for an Avaya online test, log in to www.avaya-learning.com.

Online Test Re-take Policy

Avaya Learning policy allows three pre-course attempts for all online tests. If you do not pass the online test you must re-register to attempt it again. If you have not passed the online test after the third attempt, you will need to complete the associated learning activity and call the Avaya Learning Center Help Desk requesting a re-set for that specific online test.

Please note: This policy applies only to online tests.

Scheduling a Proctored Exam at Pearson VUE Test Centers

Pearson VUE Authorized Test Centers represent a network of Pearson VUE independent business partners primarily in the commercial and academic market spaces. Availability of testing centers varies by city/state/geographic region based upon business partner participation in the Pearson VUE testing program.

As independent business partners, Pearson VUE Test Centers establish their own hours of operation and testing seat capacity. Reservations are accepted on a first come / first serve basis independent of the vendor exam chosen. Test Center, Online or Pearson VUE Call Center reservations all work from the same inventory of available testing sessions. Contacting a Pearson VUE Test Center can provide candidates with the best understanding of what parameters drive a Center's days / hours of operation; this can be particularly helpful for Testing Centers associated with academic institutions.

Pearson VUE encourages candidates to book testing sessions well in advance (2+ months) to help ensure individual requirements can be met. Candidate demand often fluctuates. Visit the Pearson VUE website at www.pearsonvue.com/avaya to see currently available Avaya exams, regional exam pricing and register for a proctored exam session.

10. APSS, APDS, ACSP and ACDS Core Training Course Curriculum Maps

Following are the core training course Curriculum Maps for APSS, APDS, ACSP and ACDS credentials available as of 15 April 2016.

For the most current information on the Avaya Credential Curriculum Maps including Foundational Knowledge and Supplemental Learning options visit the Avaya Learning Center www.avaya-learning.com.

For questions about the Avaya Professional Credential Program and scheduling training please contact the Avaya Learning Helpdesk.
