Chassis

WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

1-2. General Guidelines

When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.

After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.

After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

- 1) Leakage Current Cold Check
- 2) Leakage Current Hot Check
- 3) Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive

1-3. Important Notice

1-3-1. Follow the regulations and warnings

Most important thing is to list up the potential hazard or risk for the service personnel to open the units and disassemble the units. For example, we need to describe properly how to avoid the possibility to get electrical shock from the live power supply or charged electrical parts (even the power is off).

This symbol indicates that high voltage is present inside. It is dangerous to make any kind of contact with any inside part of this product.

This symbol indicates that there are important operating and maintenance instructions in the literature accompanying the appliance.

1-3-2. Be careful to the electrical shock

To prevent damage which might result in electric shock or fire, do not expose this TV set to rain or excessive moisture. This TV must not be exposed to dripping or splashing water, and objects filled with liquid, such as vases, must not be placed on top of or above the TV.

1-3-3. Electro static discharge (ESD)

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. The following

techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

Electrostatically Sensitive (ES) Devices

Some semiconductor (solid-state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by static by static electricity.

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any electrostatic charge on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging wrist strap device, which should be removed to prevent potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.

1-3-4. About lead free solder (PbF)

This product is manufactured using lead-free solder as a part of a movement within the consumer products industry at large to be environmentally responsible. Lead-free solder must be used in the servicing and repairing of this product.

1-3-5. Use the genuing parts (specified parts)

Special parts which have purposes of fire retardant (resistors), high-quality sound (capacitors), low noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

Safety Component

- Components identified by mark have special characteristics important for safety.

1-3-6. Safety check after repairment

Confirm that the screws, parts and wiring which were removed in order to service are put in the original positions, or whether there are the positions which are deteriorated around the serviced places serviced or not. Check the insulation between the antenna terminal or external metal and the AC cord plug blades. And be sure the safety of that.

General Servicing Precautions

1. Always unplug the receiver AC power cord from the AC power source before:

- a. Removing or reinstalling any component, circuit board module or any other receiver assembly.
- b. Disconnecting or reconnecting any receiver electrical plug or other electrical connection.
- c. Connecting a test substitute in parallel with an electrolytic capacitor in the receiver.

CAUTION: A wrong part substitution or incorrect polarity installation of electrolytic capacitors may result in an explosion hazard.

2. Test high voltage only by measuring it with an appropriate high voltage meter or other voltage measuring device (DVM, FETVOM, etc) equipped with a suitable high voltage probe.

Do not test high voltage by "drawing an arc".

3. Do not spray chemicals on or near this receiver or any of its assemblies.

4. Unless specified otherwise in this service manual, clean electrical contacts only by applying the following mixture to the contacts with a pipe cleaner, cotton-tipped stick or comparable non-abrasive applicator; 10% (by volume) Acetone and 90% (by volume) isopropyl alcohol (90%-99% strength).

CAUTION: This is a flammable mixture.

Unless specified otherwise in this service manual, lubrication of contacts is not required.

Capacitors may result in an explosion hazard.

5. Do not defeat any plug/socket B+ voltage interlocks with which receivers covered by this service manual might be equipped.

6. Do not apply AC power to this instrument and/or any of its electrical assemblies unless all solid-state device heat sinks are correctly installed.

7. Always connect the test receiver ground lead to the receiver chassis ground before connecting the test receiver positive lead.

Always remove the test receiver ground lead last. Capacitors may result in an explosion hazard.

8. Use with this receiver only the test fixtures specified in this service manual.

CAUTION: Do not connect the test fixture ground strap to any heat sink in this receiver.

9. Remove the antenna terminal on TV and turn on the TV.

10. Insulation resistance between the cord plug terminals and the external exposure metal should be more than Mohm by using the 500V insulation resistance meter.

11. If the insulation resistance is less than M ohm, the inspection repair should be required. If you have not the 500V insulation resistance meter, use a Tester. External exposure metal: Antenna terminal Headphone jack.

12. Use only a grounded-tip soldering iron to solder or unsolder ES devices.

13. Use only an anti-static type solder removal device. Some solder removal devices not classified as "anti-static" can generate electrical charges sufficient to damage ES devices.

14. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.

15. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it.

(Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).

16. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

CAUTION: Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

17. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity sufficient to damage an ES device.)

1-3-7. Ordering Spare Parts

Please include the following informations when you order parts. (Particularly the Version letter)

1. Model number, serial number and software version

The model number and serial number can be found on the back cover of each product. Software version can be found in the *Spare Parts List*.

2. Spare part No. and description

Spare part No. and description can be found in the *Spare Parts List*.

1-3-8. Photo used in this manual

The illustration and photos used in this Service Manual may not base on the final design of products, which may differ from your products in some way.

1-4. How to Read this Service Manual

1-4-1. Using icons:

Icons are used to attract the attention of the reader to specific information. The meaning of each icon is described in the table below:

Note:

A “note” provides information that is not indispensable, but may nevertheless be valuable to the reader, such as tips and tricks.

Caution:

A “caution” is used when there is danger that the reader, through incorrect manipulation, may damage equipment, lose data, get an unexpected result or has to restart (part of) a procedure.

Warning:

A “warning” is used when there is danger of personal injury.

Reference:

A “reference” guides the reader to other places in this binder or in this manual, where he/she will find additional information on a specific topic.

Chapter 2. Specification

2-1. Specification list

Model	LEA46T3
Screen size	46 inch
Aspect ratio	16:9
Resolution	1920*1080
Response Time(ms)	6 ms
Angel of view	178
Contrast	5000:1
Brightness	450cd/m2
OSD language	English etc.
Color system	ATSC/NTSC
Audio system	BG\DK\IL
Audio output power(Built-in)(W)	9W*2
Audio output power(outer)(W)	No
Total power input(W)	160W
Voltage range(V)	90-240V
Power frequency(Hz)	50/60HZ
Net weight(KG)	18.4
Gross weight(KG)	26
Net dimension(MM)	1122*31*706
Packaged dimension(MM)	1255*245*830

2-2. External pictures (four faces)

Front Side

Left Side

Back Side

Chapter 3. Disassemble and Assemble

3-1. Remove the Stand

1. Lay down the unit so that back cover faces upward

2. Remove the Five screws from the back cover which are indicated with the circles in the picture above.

3. Remove the stand

3-2. Remove the Power Cord

Remove the screw indicated by the red circles in below picture.

Then remove the power cord.

2. Then remove the back cover from the unit.

3-3. Remove the Back Cover

1. Remove the twenty-two screws indicated by the red circles in below picture.

3-4. Remove the Mainboard

Remove the five screws indicated by the red circles in below picture.

Then remove the mainboard.

3-5. Remove the speaker

Remove the screw indicated by the red circles in below picture.

Then remove the speaker.

3-6. Remove the Keypad

The Keypad is conglutinated with front frame , just uncover the keypad gently.

Then remove the keypad.

3-7. Remove the Remote Control Board

Remove the screw indicated by the red circles in below picture.

Take out the remote control board.

3-8. Remove the Stand backstop

Remove the six screws indicated by the red circles in below picture.

Take out the stand backstop.

3-9. Remove the indicator light

The indicator light is buckled into the front frame,remove the clasp indicated by the red circles in below picture.

Take out the indicator light.

Chapter 4. Location of Controls and Components

4-1. Board Location

No.	Parts number	Description
A Board	0094001116AB	PANEL
B Board	////	Power Board
C Board	DC1AK0E0100M	Mainboard (0090724287)

4-2. Main Board

4-2-1. Function Description:

Main Board

Process signal which incept from exterior equipment then translate into signal that panel can display.

4-2-2. Connector definition

Main board connector

Speaker connector (CON2)

Pin number	Signal name
1	LOUT+
2	LOUT-
3	ROUT-
4	ROUT+

Keypad Connector (CNE2)

Pin number	Signal name

Warning

The lightning flash with arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated dangerous voltage within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION: TO PREVENT ELECTRIC SHOCK DO NOT USE THIS POLARIZED PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

Caution:

- These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

Important Safety Instructions

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/ Apparatus combination to avoid injury from tip-over. 
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.
16. The mains plug or appliance inlet is used as the disconnect device, remain it readily operable during the apparatus normal use.

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rule. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, use and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encourage to try to correct the interference by one or more of the following measures:

- *Reorient or relocate the receiving antenna.
- *Increase the separation between the equipment and receiver.
- *Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- *Consult the dealer or an experienced radio/TV technician for help.

This device compiles with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may be not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC CAUTION:

To assure continued compliance and possible undesirable interference, the provided ferrite cores must be used when connecting this LCD display to video equipment; and maintain at least 40cm spacing to other peripheral device.

CANADIAN NOTICE:

This Class B digital apparatus compiles with Canadian ICES-003.

Energy Star compliant

By being Energy Star compliant you are assured that your Haier model is helping the environment by using less energy while saving you money. ENERGY STAR is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy promoting energy efficiency.

SAVE THESE INSTRUCTIONS

Thank you for purchasing the Haier product. This easy-to-use manual will guide you in getting the best use of your product. Remember to record the model and serial number. They are on label in back of the unit.

Model number

serial number

Date of purchase

Staple your receipt to your manual. **You will need it to obtain warranty service.**

Introduction

Controls

This is a simplified representation of the TV front panel, side panel control buttons and side inputs.

TV Side panel controls and connections

①	MENU	Menu display. Press to access the on-screen menu display.
②	INPUT	Press to access the input source mode. Press repeatedly to change the source to the one you want to watch. In the MENU screen, the INPUT button serves as the ENTER button.
③	VOL +/-	Press to adjust the volume. In the MENU screen, these buttons serve as left/right buttons.
④	CH +/-	Press to scan through channels. To scan quickly through channels, press and hold down either +/- . In the MENU screen, these buttons serve as up/down buttons.
⑤	POWER	Press to turn on and off the TV.
⑥	Remote Sensor	Receives IR signals from the remote control. Do not put anything near the sensor, which may block the remote control signal.
⑦	Power indicator	

Connection Options

Back panel connections

- | | | |
|---|---------------------------|---|
| ① | AUDIO Out | Connect the audio L/R cables to your audio equipment. |
| ② | VIDEO In | Connects the video signal from a video device. |
| ③ | Component Video In | Connect a component video device to these jacks. |
| ④ | COMPONENT AUDIO In | Connect the audio L/R cables from the component video signal source to these jacks. |
| ⑤ | PC Video In | Connect a video cable from a computer to this jack. |
| ⑥ | PC Audio In | Connect the audio L/R cables from a computer to this jack. |
| ⑦ | HDMI In | Connect a HDMI device to receive digital audio and uncompressed digital video. |

- | | | |
|---|-----------------------------|---|
| ⑧ | COMPONENT AUDIO In | Connect the audio L/R cables from the component video signal source to these jacks. |
| ⑨ | Component Video In | Connect a component video device to these jacks. |
| ⑩ | Digital Audio Output | Connect various types of digital audio equipment.
Note
□ In standby mode, these ports will not work. |
| ⑪ | Antenna Input | Connect cable or antenna signals to the TV, either directly or through your cable box. |
| ⑫ | Headphone jack | Headphone audio output terminal. |
| ⑬ | USB input | Connect a USB flash drive to view MPEG2 videos, JPEG images or listen to MP3 songs. |

Universal Remote control

The remote control cannot be operated unless the batteries are properly loaded.
When using the remote control, aim it at the remote sensor on the TV.

Function introduction

①	POWER	Press to turn on and off the TV.
②	TV DVD SETBOX CABLE VCR AUD	To select one of the system modes in which the remote control can be used.
③	PICTURE	Press repeatedly to cycle through the available picture modes.
④	AUDIO	Press to cycle through different sound settings.
⑤	INPUT	Show the input source.
⑥	MUTE	Switches the video sound on or off.
⑦	VOLUME UP/DOWN	Press to adjust the volume.
⑧	MENU	Press to open the on-screen menu.
⑨	THUMBSTICK (Up/Down/Left/Right)	Allows you to navigate the on-screen menus and adjust the system settings to your preference.
⑩	SLEEP button	Press to display the sleep timer option.
⑪	USB	Press to switch input source to USB in.
⑫	MTS/SAP	Selects MTS sound: Mono, Stereo, and SAP in Analog mode. Change the audio language in DTV mode.
⑬	GUIDE	Press to display the guide when you are watching analog or digital channels.
⑭	CCD(closed caption)	Select a closed caption.
⑮	HDMI	Press to select a device connected to the HDMI input
⑯	PC	Press to select the computer connected to the VGA input
⑰	Number buttons	Press to change a channel.
⑱	- button	Press to select digital channels. For example, to enter "54-3", press "54", "-", and "3".
⑲	● RECALL	Press to jump back and forth between two channels.
⑳	CHANNEL UP/DOWN	Press to scan through channels. To scan quickly between the last two channels, press and hold down either +/-.
㉑	EXIT	Clears all on-screen displays and returns to TV viewing from any menu.
㉒	ENTER	Accesses the highlighted item in the on-screen menu.
㉓	DISPLAY	Press to display the TV status information on the top of the TV screen.
㉔	REC	Press to start the recording process
㉕	USB Functions	Control the USB System. ◀◀/▶▶ Rewind / Fast Backward / Forward ▶▶/▶▶ Play/Pause REPEAT
㉖	FREEZE	Press once to display a frozen image of the current program, but audio continues. Press again to return to the program.
㉗	CH.LIST	Open the channel list in TV.
㉘	FAV.LIST	Press to open the favorite channel list in TV.
㉙	ARC(Aspect Ratio Control)	Press to change the aspect ratio.

Installation

External Equipment Connections

Accessories

Remote control

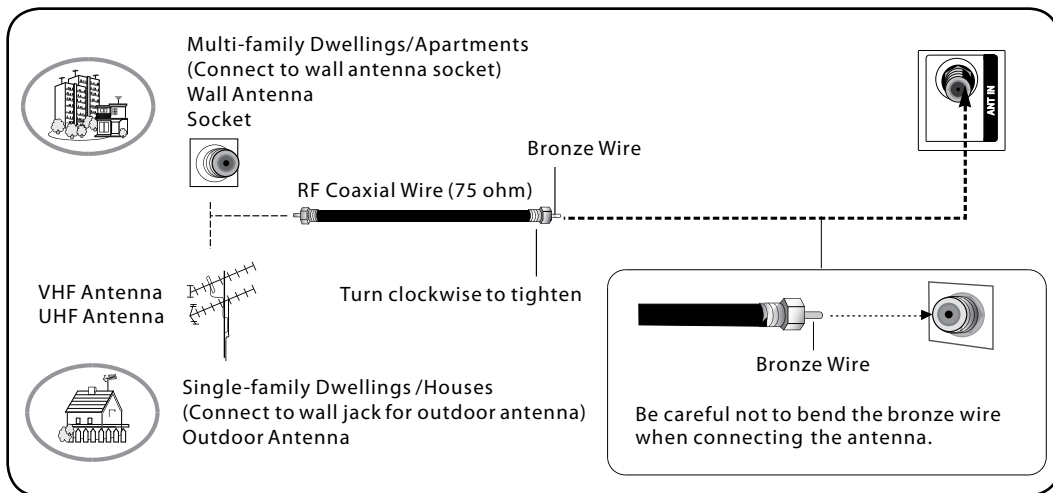

Owner's manual

Alkaline battery (AAA) x2

Antenna Connection

Over-the-air TV reception quality will depend on your antenna type, antenna location and antenna positioning.

- To improve the picture quality in a poor signal area, please purchase a signal amplifier and install properly.
- If the antenna needs to be split for two TV's, install a "2-Way Signal Splitter" in the connections.
- To install the antenna properly please contact a professional in your area.

Note

- All cables shown are not included with the TV.

Choose Your Connection

There are several ways to connect your television, depending on the components you want to connect and the quality of the signal you want to achieve. The following are examples of some different ways to connect your TV with different input sources.

Connecting a VCR

To avoid picture noise (interference), leave an adequate distance between the VCR and TV.

Connection Option 1

Set VCR output switch to channel 3 or 4 and then turn the TV to the same channel number.

Connection Option 2

- 1** Connect the audio and video cables from the VCR's output jacks to the TV input jacks, as shown in the figure. When connecting the TV to VCR, match the jack colors (Video = yellow, Audio Left = white, and Audio Right = red). If you connect a S-VIDEO output from VCR to the S-VIDEO input, the picture quality is improved; compared to connecting a regular VCR to the Video input.
- 2** Insert a video tape into the VCR and press **PLAY** on the VCR. (Refer to the VCR owner's manual.)
- 3** Select the input source with using the **INPUT** button on the remote control, and then press **▲ / ▼** button to select the source, press **ENTER** button to confirm.

External A V Source Setup

How to connect

- Connect the audio and video cables from the external equipment's output jacks to the TV input jacks, as shown in the figure.
- When connecting the TV to external equipment, match the jack colors (Video = yellow, Audio Left = white, and Audio Right = red).

How to use

- 1** Select the input source with using the **INPUT** button on the remote control.
- 2** Press **▲ / ▼** button to select the desired source.
- 3** Press **ENTER** button to confirm.
- 4** Operate the corresponding external equipment.

Component Setup

How to connect

Connect the DVD video outputs (COMPONENT) to the Y Pb Pr jacks on the TV and connect the DVD audio outputs to the YPbPr Audio IN jacks on the TV, as shown in the figure.

How to use

- 1 Turn on the DVD player, insert a DVD disc.
- 2 Use **INPUT** button on the remote control to select component mode.

■ Component Input ports

To get better picture quality, connect a DVD player to the component input ports as shown below.

Component ports on the TV	Y	Pb	Pr
Video output ports on DVD player	Y	Pb	Pr
	Y	B-Y	R-Y
	Y	Cb	Cr
	Y	Pb	Pr

Connecting a DTV (digital TV)

This TV can receive Digital Over-the-air/Cable signals without an external digital set-top box. However, if you do receive Digital signals from a digital set-top box or other digital external device, refer to the figure as shown below. This TV supports HDCP (High-bandwidth Digital Contents Protection) protocol for Digital Contents (480 p, 720 p, 1080 i).

How to connect

- Use the TV's COMPONENT, VGA or HDMI jack for video connections, depending on your set-top box connector. Then, make the corresponding audio connections.

How to use

- 1 Turn on the digital set-top box. (Refer to the owner's manual for the digital set-top box.)

- 2 Use **INPUT** on the remote control to select COMPONENT, VGA or HDMI source.

Signal	COMPONENT	HDMI
480 i	Yes	Yes
480 p	Yes	Yes
720 p	Yes	Yes
1080 i	Yes	Yes
1080 p	Yes	Yes

Connecting a digital audio output

Send the TV's audio to external audio equipment (stereo system) via the Digital Audio Output (Optical) port.

How to connect

- 1 Connect one end of an optical cable to the TV Digital Audio (Optical) Output port.
- 2 Connect the other end of the optical cable to the digital audio (optical) input on the audio equipment. See the external audio equipment instruction manual for operation.

Note

- When connecting with external audio equipments, such as amplifiers or speakers, please turn the TV speakers off.

⚠ Caution:

- Do not look into the optical output port. Looking at the laser beam may damage your vision.

Connecting a computer

How to connect

- 1 To get the best picture quality, adjust the VGA graphics card to 1024×768.
- 2 Use the TV's VGA or DVI (Digital Visual Interface) Audio IN port for audio connections, depending on your computer connector.
 - If the graphic card on the computer does not

output analog and digital RGB simultaneously, connect only one of either VGA IN or HDMI IN to display the VGA on the TV.

- If the graphic card on the computer does output analog and digital RGB simultaneously, set the TV to either VGA or HDMI; (the other mode is set to Plug and Play automatically by the TV.)

3 Then, make the corresponding audio connection. If using a sound card, adjust the VGA sound as required.

How to use

- 1** Turn on the computer and the TV.
- 2** Use INPUT on the remote control to select VGA or HDMI source.
- 3** Check the image on your TV. There may be noise associated with the resolution, vertical pattern, contrast or brightness in VGA mode. If noise is present, change the VGA mode to another resolution, change the refresh rate to another rate or adjust the brightness and contrast on the menu until the picture is clear. If the refresh rate of the VGA graphic card can not be changed, change the VGA graphic card or consult the manufacturer of the VGA graphic card.

Note

- Use a DVI cable.
- Avoid keeping a fixed image on the TV's screen for a long period of time. The fixed image may become permanently imprinted on the screen.
- The synchronization input form for Horizontal and Vertical frequencies is separate.

Resolution

Mode	Resolution	Frame frequency (Hz)
VGA	640×480	60 Hz
SVGA	800×600	60 Hz
		75 Hz
XGA	1024×768	60 Hz
		75 Hz

HDMI and DVI input

When the source device (DVD player or Set Top Box) supports HDMI

How To Connect

- 1** Connect the source device to HDMI port of this TV with an HDMI cable (not supplied with this product).
- 2** No separated audio connection is necessary.

How To Use

- If the source device supports Auto HDMI function, the output resolution of the source device will be automatically set to 1280×720 p.
- If the source device does not support Auto HDMI, you need to set the output resolution appropriately. To get the best picture quality, adjust the output resolution of the source device to 1280×720 p.
- Select HDMI input source in input source option of Select Main source menu.

When the source device (DVD player or Set Top Box) supports DVI

How To Connect

- 1** Connect the source device to HDMI port of this TV with a HDMI-to-DVI cable (not supplied with this product).
- 2** A separated audio connection is necessary.
- 3** If the source device has an analog audio output connector, connect the source device audio output to DVI Audio In port located on the left side of HDMI port.

How To Use

- If the source device supports Auto DVI function, the output resolution of the source device will be automatically set to 1280×720 p.
- If the source device does not support Auto DVI, you need to set the output resolution appropriately. To get the best picture quality, adjust the output resolution of the source device to 1280×720 p.
- Press the **INPUT** button to select HDMI input source in input source option of Select Main source menu.

Connecting Headphones

You can connect a set of headphones to your set if you wish to watch a TV programme without disturbing the other people in the room.

Plug a set of headphones into the 3.5 mm mini-jack socket on the side panel of the set.

Note

- ❑ Prolonged use of headphones at a high volume may damage your hearing.
- ❑ You will not receive sound from the speakers when you connect headphones to the system.

Power source

TO USE AC POWER SOURCE

- Use the AC polarized line cord provided for operation on AC. Insert the AC cord plug into a standard polarized AC outlet.

Note

- ❑ Never connect the AC line cord plug to other than the specified voltage. Use the attached power cord only.

- ❑ If the polarized AC cord does not fit into a non-polarized AC outlet, do not attempt to file or cut the blade. It is the user's responsibility to have an electrician replace the obsolete outlet.
- ❑ If you cause a static discharge when touching the unit and the unit fails to function, simply unplug the unit from the AC outlet and plug it back in. The unit should return to normal operation.

Removing the table stand and installing a wall mount bracket

Remove 5 × M4 screws securing the stand to the TV, then remove the stand.

Use 4 × M8 screws to secure the wall bracket (not supplied) to the back of your TV.

Operation

In the manual, the OSD (on screen display) may be different from your TV's, because it is just an example to help you with the TV operation. There are several options you might need to set up in order for your TV to work properly. Read the instructions that follow.

Initial Setup: Set according to the screen display.

Video	Language	English	◀▶
Audio	OSD Timeout	Short	◀▶
Channel	OSD Transparency	Middle	◀▶
Function	DPMS	On	◀▶
Lock	Blue Screen	On	◀▶
	DCR	On	◀▶
	Time Setup		◀▶
	Closed Caption		◀▶
	Default		◀▶
Function		◀▶ Select	EXIT Back

Switching On/Off the TV set

- 1 First, connect power cord correctly.
- 2 Select the viewing source by using **INPUT** button on the remote control.
- 3 When finished using the TV, press **POWER** button on the remote control. The TV reverts to standby mode.
- 4 If you intend to be away on vacation, disconnect the power plug from the wall power outlet.

Note

- If the TV in power on, the screen show information according the type of input signal, the information will disappear. If there is no signal, "No Signal" will display on the screen.

Choose the Menu Language

When you start using your set for the first time, you must select the language which will be used for displaying menus and indications.

- 1 Choose **TV** Input and then press **MENU** button.
- 2 Press **▲ / ▼** button to select **Function** menu.
- 3 Press **▶ / ENTER** button and then use **▲ / ▼** button to select **Language**.
- 4 Press **◀ / ▶** button to select language. (**English, Spanish or French**)

Choose the Input source

Change the picture source so you can watch your TV, VCR, DVD, Cable, or any other devices that are connected to your TV.

- 1 Press **INPUT** button to enter the Select Source menu and then use **▲ / ▼** button to select the desired items (TV, Video, Component 1, Component 2, PC, HDMI 1, HDMI 2, HDMI 3, HDMI 4).
- 2 Press **ENTER** button to confirm.

Channel menu

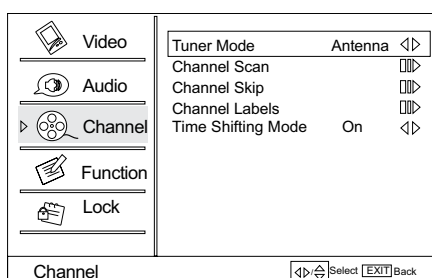

- This TV set has two methods to set channels, which are respectively Channel Scan, Channel Skip.
- In this section, how to use the remote control to set channel is explained. You can also use buttons on the TV to set channel.

Note

- The Channel menu will be only operated in normal TV mode.

Channel Scan

- 1 Press **MENU** button and then use **▲ / ▼** button to select **Channel** menu.
- 2 Press **▶ / ENTER** button to select **Tuner**.
- 3 Press **◀ / ▶** button to select **Cable** or **Antenna** mode.
- 4 Press **▲ / ▼** button to select **Channel Scan**.

5 Press ► / ENTER button to start searching.

6 To cancel searching, press EXIT button.

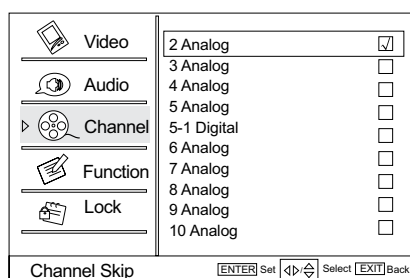

Note

- ❑ When **Antenna** is selected, the TV will detect antenna signals and will search for antenna TV (NTSC and ATSC) channels available in your local area.
- ❑ When **Cable** is selected, the TV will detect cable company supplied signals and will search for cable TV (NTSC, QAM modulated) channels available in your Area.

Channel Skip

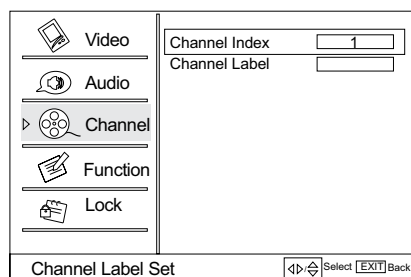

A skip channel is skipped when using ▲ / ▼ button to browse the channels. A skip channel can be watch by key-in the channel number or select by list. Default un-scanned analog channels are skip. Channel with a check icon ✓ is a skipped channel.

- 1 Press **MENU** button and then use ▲ / ▼ button to select **Channel** menu.
- 2 Press ► / ENTER button and then use ▲ / ▼ button to select **Channel Skip**.
- 3 Press ▲ / ▼ button to select a channel, then press ENTER button to toggle between and .

Channel Labels

Allows you to name the channel that is selected. Press ► / ENTER button to enter the submenu. Then press ▲ / ▼ to select **Channel Index** and **Channel Labels** and ◀ / ▶ to select the position of the item that you want to change, afterward press INPUT to input the numbers and symbols and ENTER button to confirm.

Time Shifting Mode

To turn the Time Shifting Mode on or off.

- 1 Set the Time Shifting On, then insert the USB drive in the USB input.
- 2 Press **PLAY/PAUSE** to play or pause the program. If you want to stop time shift function, press the **STOP** button.

1. Time shift time. The time delay to the current program time.

Operation

2. Playback status: It shows the playback status (Play, Pause, Fast Forward, Rewind).

	Play		Fast forward
	Pause		Fast reverse

3. Playback speed: playback speed can be changed - 1x, 2x, 4x, 8x, 16x, 32x.

4. Playback position: The playback position is always at the center of the time bar.

5. Time scale: shows the time in half hour increments.

Note

- Time Shift function is only available in DTV mode.
- The maximum recording duration is determined by the memory size of the USB drive and the signal resolution. Please use a high-speed USB 2.0 drive with a minimum of 1GB capacity.
- Time shift only supports FAT32 file-system.
- Time shift supports more than 4GB recording by using multi-file storage.
- When the maximum recording duration is reached, the oldest program would be deleted and the latest program is recorded.
- When changing channel or changing input source, the timeshift would stop automatically.
- Time shift record will store the fact of no signal.
- Time shift will store the video, audio and data service. we only support:

Video streams: Max 1 stream

Audio streams: Max 8 streams

CC stream: No limited.

- In recording, the data is not guaranteed to be stored in the disk. If the timeshift playback plays a corrupted data block, it would show "Data lost" message to indicate that the current data is not stored correctly.
- Please connect the TV antenna or Cable TV coaxial cable to the Antenna input on the TV. Then please complete the channel scan. The Time Shift feature is available when using your ATSC tuner and QAM cable tuner.

Select the desired program

1 Using **CH+/-** buttons.

- Press **CH+** button to select a channel number in number increasing direction.
- Press **CH-** button to select a channel number in

number decreasing direction.

Note

- If skip is ON on one channel, press **CH+/-** button, the channel will not appear.

2 Also can enter channel number directly, eg:2-0.

Select the desired sound

Press **VOL-/+** buttons on the remote or the front of the TV set to adjust the volume level. The range is 0~100. When the volume buttons are pressed the volume level is displayed automatically on the TV screen.

Mute

1 Press **MUTE** button on the remote control and "M" type face will display on the screen. At this time, the sound of the TV set is turned off.

2 If you want to recover the sound, press **MUTE** button again or directly press **VOL+** button.

Video menu

The TV menu gives you an overview of the menus you can select.

Note

- Depending on the input signal, one or more menu items may not be selectable.

How to select picture mode

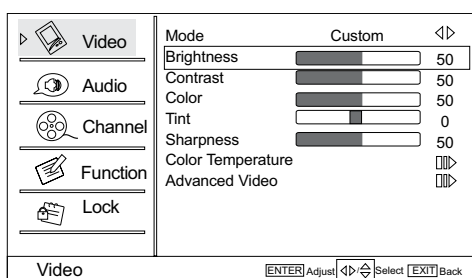

The picture mode provides the pre-defined images settings: Standard, Vivid, Custom and Mild .

1 Press **MENU** button and then use **▲ / ▼** button to

select **Video** menu.

- 2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **Mode**.
- 3 Press **◀** / **▶** button to select the option Standard, Vivid, Custom and Mild.

You can also press **PICTURE** button on the remote control to select the option Standard, Vivid, Custom and Mild.

How to customize your own picture status

- 1 Press **MENU** button and then use **▲** / **▼** button to select **Video** menu.
- 2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select the desired items.
- 3 Press **▶** / **ENTER** button and then use **◀** / **▶** button to adjust the setting.

❖ Mode

Select the mode of picture (Standard/Vivid/ Custom/ Mild).

❖ Brightness

This will adjust the light output of the complete picture, which will mainly affect the darker areas of the picture.

❖ Contrast

This will adjust the intensity of bright parts in the picture but keep the dark parts unchanged.

❖ Color

This will adjust the saturation level of the colors to suit your personal preference.

❖ Tint

Allows you to select the color mix (Tint) of the picture.

❖ Sharpness

This will adjust the sharpness of fine details in the picture.

📌 Note

- ❑ Only when the item of mode is custom, the Brightness, Contrast, Color, Tint, Sharpness and Color Temperature can be set by user. In other mode the value of them are preset.

❖ Color temperature

This will increase or decrease Warm (red) and Cool (blue) colors to suit personal preferences. Select Cool to give the white colors a blue tint, Standard to give the white colors a neutral tint, Warm to give the white colors a red tint.

❖ Advanced Video

To adjust the picture in advanced: DNR, Black Level Extender, White Peak Limiter, CTI, Flech Tone, Adaptive Luma Control.

- **DNR:** Digital Noise Reduction, to adjust to reduce the appearance of digitizing error caused by the compressin: Medium/Strong/Auto/off/Low.
- **MPEG NR:** To adjust the MPEG Noise Reduction: Medium, Strong, Off and Low.
- **Adaptive Luma Control:** To adjust changes in the luminance of the picture On or Off.
- **Flesh Tone:** To adjust the flesh colors: High, Off, Low or Medium.
- **Blue Stretch:** To set Blue Stretch: On and Off.
- **Game Mode:** To set Game Mode: On and Off.
- **MJC:** Motion judder cancellation (MJC), capable of solving film judder and motion blur.

Effect:To set the MJC level: Off, Low ,Middle, High.

Demo Partition:To set the effective area of MJC: Left, All, Right.

- 1 Press **MENU** button and then use **▲** / **▼** button to select **Video** menu.
- 2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **Advanced Video**.
- 3 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **MJC**.
- 4 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select the desired items.

PC Set

When you select the PC input, this function is used.

Adjustment for screen Position, Clock, Phase, Setting

Display adjust menu by pressing **INPUT** button then use ▲ / ▼ button to select the source of PC item.

❖ Auto sync:

Automatically adjust display of the picture (Only available in PC source).

❖ **H Position:** Press ▲ / ▼ button and then press ◀ / ▶ button to adjust the horizontal position of the picture.

❖ **V Position:** Press ▲ / ▼ button and then press ◀ / ▶ button to adjust the vertical position of the picture.

❖ Phase :

Adjust the phase of Pixel clock.

❖ Clock :

Adjust the clock of input signal.

- 1 Press **MENU** button and then use ▲ / ▼ button to select **Video** menu.

- 2 Press ▶ / **ENTER** button and then use ▲ / ▼ button to select **PC**.

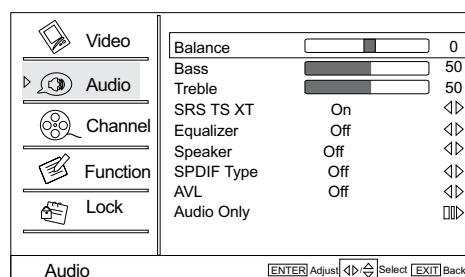

- 3 Press ▶ / **ENTER** button and then use ◀ / ▶ button to adjust the setting.

Audio menu

How to select audio mode

- 1 Press **MENU** button and then use ▲ / ▼ button to select **Audio** menu.
- 2 Press ▶ / **ENTER** button and then use ▲ / ▼ button to select **Mode**.

- 3 Press ▶ / **ENTER** button to select the option Off, Concert, Living Room, Hall, Bathroom, Cave, Arena and Church.
 - You can also press **AUDIO** button on the remote control to select the Audio Mode Off, Concert, Living Room, Hall, Bathroom, Cave, Arena and Church.

How to Customize your own audio status

- 1 Press **MENU** button and then use ▲ / ▼ button to select **Audio** menu.
- 2 Press ▶ / **ENTER** button and then use ▲ / ▼ button to select desired items.
- 3 Press ▶ / **ENTER** button and then use ◀ / ▶ button to adjust the setting.

❖ Balance

Adjust to emphasize left or right speaker balance.

❖ Bass

Adjust to increase or decrease lower-pitched sounds.

❖ **Treble**

Adjust to increase or decrease higher-pitched sounds.

❖ **SRS TS XT**

To turn the simulated surround sound on and off.

❖ **Equalizer**

To adjust the equalizer: Off, Rock, Pop, Live, Dance, Techno, Classic and Soft.

❖ **Speaker:** To adjust the speaker on or off.

❖ **SPDIF Type**

To adjust the SPDIF output: Off, Dolby Digital and PCM.

❖ **AVL (Automatic Volume Control)**

This will reduce the differences in volume level among broadcasters.

❖ **Audio Only**

Press **▶** / **ENTER** button to confirm, the following display will appear on the screen.

Press **◀** to select **OK**, then press **OK** to confirm. The TV screen will be black and no picture, but the sound is still normal.

You can press **POWER** button to reveal the picture on the screen.

SAP Broadcasts Setup

This TV can receive MTS stereo programs and SAP (Secondary Audio Program) that accompanies the stereo program; if the station transmits an additional sound signal as well as the original one.

When having selected **SAP** button on the remote control, this TV can only receive the signal when the TV station transmits the proper signals.

Mono sound is automatically received if the broadcast is only in Mono; even though Stereo or SAP has been selected. Select Mono if you want to listen to mono sound during stereo/ SAP broadcasting. Stereo or SAP can be received in a Analog channel.

1 Use **SAP** button to select your desired MTS mode in a analog signal.

- Each time you press **SAP** button, Mono, Stereo or SAP appear. If other languages are available on the digital signal, select them with the **SAP** button.

2 Press **EXIT** button to save and return to TV viewing.

Function menu

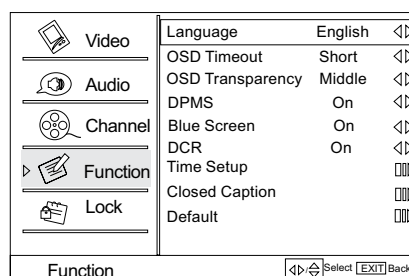

Menu Language

When you start using your set for the first time, you must select the language which will be used for displaying menus and indications.

1 Press **MENU** button and then use **▲** / **▼** button to select **Function** menu.

2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **Language**.

3 Press **◀** / **▶** button to select language. (**English, Spanish or French**)

OSD Timeout

1 Press **MENU** button and then use **▲** / **▼** button to select **Function** menu.

2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **OSD Timeout**.

3 Press **◀** / **▶** button to select **Short, Middle or Long**. (Short is for 5 seconds; Middle is for 10 seconds; Long is for 15 seconds)

OSD Transparency

1 Press **MENU** button and then use **▲** / **▼** button to select the **Function** menu.

2 Press **▶** / **ENTER** button and then use **▲** / **▼** button to select **OSD transparency**.

3 Press **◀** / **▶** button to select **Low, Middle or High**.

DPMS

PC Power Management. When set On, the set will be put in standby mode automatically if there is no signal received for 2 minutes.

Note

- ❑ DPMS is useful only in VGA source.

Blue Screen

- 1 Press **MENU** button and then use ▲ / ▼ button to select **Function** menu.
- 2 Press ▶ / **ENTER** button and then use ▲ / ▼ button to select **Blue Screen**.
- 3 Press ◀ / ▶ button to select **On** or **Off**.

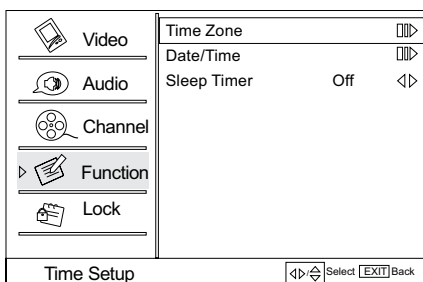

DCR

Dynamic Contrast Ratio. Press **VOL+/-** button to select On or Off.

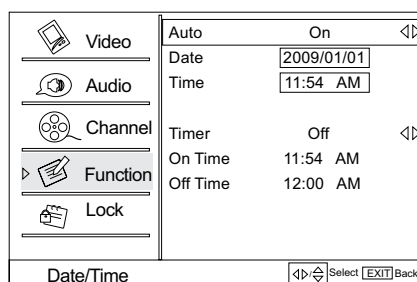

Time Setup

This function allows you to select your local time zone. Broadcasted time information will correct the clock display for your local time.

- ❖ **Time Zone:** Press **VOL+/-** button to select the appropriate time zone.

- ❖ **Date/Time:** Press **VOL+/-** / **ENTER** button to enter the submenu.

- Auto:** Press **VOL+/-** button to select On or Off . When Auto mode on , the time can not be adjusted. Select Off , you can operate to set the time manually.

- Date:** Press **VOL+/-** button to select the position and digits button to set the date.

- Time:** Press **VOL+/-** button to select the position and digits button to set the time.

- Timer:** Press **VOL+/-** button to select On or Off . To select Off, the time can not be adjusted.

- On Time/Off Time:** Press **VOL+/-** button to select the position and digits button to set the time. Press **ENTER** button to switch on **AM** and **PM**.

- ❖ **Sleep Timer:** Press **VOL+/-** button to select the number of minutes: To select Off, 5Min, 10Min, 15Min, 30 Min, 45Min, 60Min, 90Min, 120Min, 180Min or 240Min.

- You can also press **SLEEP** button to select quickly the sleep timer.

Close Caption

This allows you to modify how digital captions are displayed on your TV. Select from the following options to change the visual characteristics of your TV's digital captioning. Customize the DTV/CADTV captions that appear on your screen.

- Press **VOL+/-** / **ENTER** button to enter the submenu.

- ❖ **Analog Caption** Press **VOL+/-** button to select

the Closed Caption options. It helps the hearing impaired with the broadcast program, as well as helping children learn how to read. A built in decoder displays the audio portion of a program as text on the screen when this option is selected.

CC1: When CC1 is displayed on TV means CC mode is turned on.

CC2 to CC4: For other modes of video related broadcast information.

Text1: For program guide and other information displayed by broadcasters. (This blocks a large portion of the picture on your screen).

Text2 to Text4 :For other modes of information displayed by broadcasters. (This blocks a large portion of the picture on your screen).

IMPORTANT:Closed captioning availability entirely depends on broadcasters supplying the signal. Therefore, closed captioning might not always be available and language availability will differ by broadcast.

Select CC1 for full translation of the primary language such as English in your area. Select CC2 for secondary language translation such as French or any other language that may be broadcast in your area.

❖ **Digital Closed Caption:** Press **VOL+/-** button to select Service1/Service2/Service3/Service4/Service5/Service6/Off.

❖ **Digital Caption Style:** Press **VOL+/- ENTER** button to enter the submenu.

Caption Style: To display the digital closed caption automatically or by Custom mode.

Font Size :To adjust the font size: Large, Small or Medium.

Font Style :To adjust the font style: Style1, Style2, Style3, Style4, Style5, Style6 and Style7.

Font Color: To adjust the font color: White, Green, Blue, Red, Cyan, Yellow, Magenta and Black.

Font Opacity: To adjust the font opacity: Solid, Translucent and Transparent.

Background Color: To adjust the background color: Black, White, Green, Blue, Red, Cyan, Yellow and Magenta.

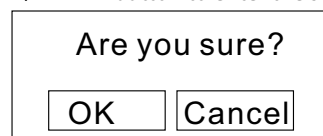

Background Opacity: To adjust the background opacity: Solid, Translucent and Transparent.

Window Color: To adjust the window color: Black, White, Green, Blue, Red, Cyan, Yellow and Magenta.

Window Opacity: To adjust the window opacity: Translucent, Transparent or Solid.

Default

Press **VOL+/- ENTER** button to enter the submenu.

Press **VOL+/-** button to select OK or Cancel, then press **OK** to confirm. If **OK** the parameter will return to the factory set.

Lock Menu

Parental Control can be used to block specific channels, ratings and other viewing sources.

The parental control function is used to block program viewing based on the ratings sent by the broadcasting station. The default setting is to allow all programs to be viewed. Viewing can be blocked by choosing the type of the program and the categories.

Parental Control rating and categories

Rating guidelines are provided by broadcasting stations. Most television programs and television movies can be blocked by TV Rating or Individual Categories. Movies that have been shown at the theaters or direct-to-video movies use the Movie Rating System (MPAA) only.

Ratings for Television programs:

Parental Guide:	
TV-Y	(All children)
TV-Y7	(Children 7 years older)
TV-G	(General audience)
TV-PG	(Parental guidance suggested)

Operation

TV-14 (Parents strongly cautioned)

TV-MA (Mature audience only)

Ratings for Movies previously shown in theaters:

MPAA Rating:

G (General audience)

PG (Parental guidance suggested)

PG-13 (Parents strongly cautioned)

R (Restricted)

NC-17 (No one 17 and under admitted)

X (Adult only)

If you set PG-13 : G and PG movies will be available, PG-13, R, NC-17 and X will be blocked.

CA Eng Rating:

C Children

C8+ Children eight years and older

G General Programming, suitable for all audiences

PG Parental Guidance

14+ Viewers 14 years and older

18+ Adult Programming

CA Fren Rating:

G General

8 ans+ Not recommended for young children

13 ans+ Programming may not be suitable for children under the age of 13

16 ans+ Programming is not suitable for children under the age of 16

18 ans+ Programming restricted to adults

TV Rating:

A (Age) (applies to TV-Y, TV-Y7, TV-G, TV-PG, TV-14, TV-MA)

D (Dialogue - sexual dialogue) (applies to TV-PG, TV-14)

L (Language - adult language) (applies to TV-PG, TV-14, TV-MA)

S (Sex - sexual situations) (applies to TV-PG, TV-14, TV-MA)

V (Violence) (applies to TV-PG, TV-14, TV-MA)

FV (Fantasy Violence) (applies to TV-Y7)

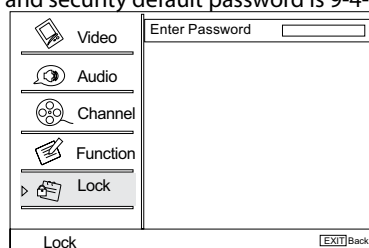

Lock setup

Set up blocking schemes to block specific channels, ratings, and external viewing sources.

A password is required to gain access to this menu.

- Press **MENU** button and then use **▲ / ▼** button to select **Lock** menu. Then, press **▶** button.

- The TV is set up with the initial password "0-0-0-0" and security default password is 9-4-4-3.

- Use **▲ / ▼** button to select the desired items, and press **▶** or **ENTER** button to enter the next menu. Once the option is selected, change the settings to your preference.

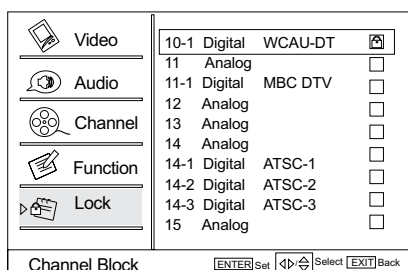

Password

- Change the password by inputting a new password twice.

Channel Block

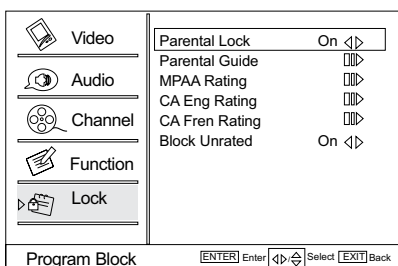

- Press **MENU** button and then use **▲ / ▼** button to select **Lock** menu.
- Press **▶ / ENTER** button and then use **▲ / ▼** button to select **Channel Block**.

- Press ▲ / ▼ button to select the item, press **OK** button to set.

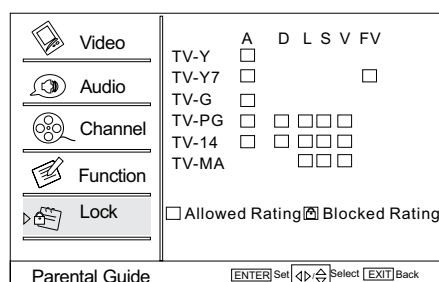

Program Block

Press **VOL+ / ENTER** button to enter the submenu as follows.

- ❖ **Parental Lock:** Press **VOL+/-** button to select On or Off. Used to lock all the system following. To set Off, the system following can not be available.
- ❖ **Parental Guide:** Press **VOL+ / ENTER** button to enter the submenu as follows. To clearly understand TV program rating codes, read the following information:

Note

- ❑ The Parental control will automatically block certain categories that are "more restrictive". For example, if you block "TV-Y" category, then all the categories in the "young adult" group will be blocked (TV-Y, TV-Y7, TV-G, TV-PG, TV-14 and TV-MA).

- ❑ The sub-ratings (A, D, L, S, V, FV) work together similarly.

❖ How to set the A, D, L, S, V and FV sub-ratings

- First, press ▲ / ▼ button select one of these Ratings: TV-Y, TV-Y7, TV-G, TV-PG, TV-14, or TV-MA, and press ◀ / ▶ button.
- A symbol "□" will be displayed for each sub-rating.
- While "□" is selected, press **ENTER** button to go to a sub rating. To select a different Rating, press ▲ / ▼ buttons and then repeat the process.

Note

- ❑ The V-chip will automatically block certain categories that are "More restrictive". For example, if you block "A" sub-rating in TV-PG, then the "A" sub-ratings in TV-14 and TV-MA will automatically be blocked.

MPAA Rating

- Blocks movies according to the movie ratings limits specified, so children cannot view certain movies. You can set the ratings limit by blocking out all the movies with the ratings above a specified level. Keep in mind that the movie ratings limit only applies to movies shown on TV, not TV programs, such as soap operas.

- Press ▲ / ▼ button to select **MPAA Rating** item.
- Press ▶ / **ENTER** button and then use ▲ / ▼ button to select the rating.
- Press **ENTER** button to set block or unblock.

CA Eng Rating

❖ Canadian English Language Rating

- Press ▲ / ▼ button to select **CA Eng Rating** item.
- Press ▶ / **ENTER** button and then use ▲ / ▼ button to select the rating.

3 Press **ENTER** button to confirm.

Note

❑ If there is any lock mark on the top of the set such as channel lock, parental lock and so on, you can press OK to resume it. (Press OK to display password menu and input your password.)

Other Functions

Brief Info

Brief Info shows the present screen information.

- Press **DISPLAY** button to show the Brief Info on the screen.
- Press **DISPLAY** button or **EXIT** button to exit.

Function

- Show the present screen information.
- Press **DISPLAY** button or **EXIT** button to exit.

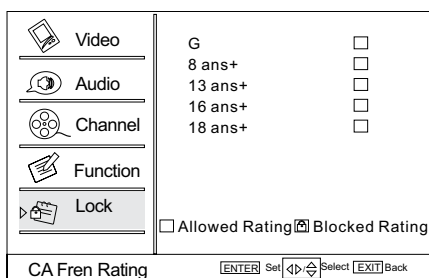

- A:** Video resolution
- B:** Program name
- C:** Program rating categories
- D:** Program show time
- E:** Program title
- F:** Channel label
- G:** Tuner mode
- H:** Program details

CA Fren Rating

❖ **Canadian French Language Rating**

- 1 Press **▲ / ▼** button to select **CA Fren Rating** item.
- 2 Press **▶ / ENTER** button and then use **▲ / ▼** button to select the rating.
- 3 Press **ENTER** button to confirm.

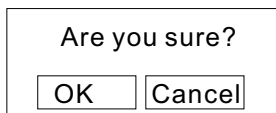

Change Password

Press **VOL+ / ENTER** button to enter the submenu, press digits button to input the number of 0-9 twice in the New Password and Confirm Password. Then you can change the password when you input the same number twice.

Clean All

Press **VOL+ / ENTER** button to enter the submenu:

Press **VOL+/-** button to select OK or Cancel then **OK** to confirm. If OK, the parameter will return to the factory set.

Using the Guide

The guide allows you to select the channels from a channel list. The guide allows provides information about the current program being shown on each channel (if information is available from the station).

Note

- ❑ Program information in the guide is provided by the broadcasters. As a result, it may sometimes include only the channel number, without a program title or description.

- A:** Program title
- B:** Program options
- C:** Program show time
- D:** Program details
- E:** Program rating categories

Quick program view

Press to jump back and forth between two channels. The TV alternates between the current channel and the last channel that was selected.

- 1** Suppose the channel number you used just now is 8 and the channel number you are using is 18 (as shown in the figure).
- 2** If you want to return to the last watched program channel 8, you can simply press **RECALL** button.
- 3** If you want to return to channel 18, press the button again.

CC (Closed Caption Display)

Closed Captions

- Closed captioning is a process which converts the

audio portion of a television program into written words which then appear as subtitles on the television screen. Closed captions allow viewers to read the dialogue and narration of television programs.

Using Closed Captions

- Captions are the subtitles of the dialogue and narration of television programs. For prerecorded programs, program dialogue can be arranged into captions in advance. Its possible to caption a live program by using a process called real-time captioning, which creates captions instantly.
- Real-time captioning is normally done by professional reporters using a machine shorthand system and computer for translation into English. Captioning is an effective system for the hearing-impaired, and it can also aid in teaching language skills.
- In ATV mode CCD function allows you to configure the way you choose to view the digital captioning (Off, CC 1, CC 2, CC 3, CC 4, Text 1, Text 2, Text 3 or Text 4).

❖ CAPTION

The term for the words that scroll across the bottom of the TV screen; usually the audio portion of the program provided for the hearing impaired.

❖ TEXT

The term for the words that appear in a large black frame and almost cover the entire screen; usually messages provided by the broadcaster.

- In DTV mode allows you to configure the way you choose to view the digital captioning (Off, service 1, service 2, service 3, service 4, service 5 or service 6).
- Select one of the digital service channels made available by the caption provider.
- There are 6 standard services. Service 1 is designated as the Primary Caption Service. This service contains the verbatim, or near-verbatim captions for the primary language being spoken in the accompanying program audio. Service 2 is designated as the Secondary Language Service. This service contains captions in a secondary language which are translations of the captions in the primary Caption Service. The other service subchannels are not pre-assigned. It is up to the discretion of the individual caption provider to utilize the remaining service channels.

Note

- ❑ The captions do not always use correct spelling and grammar. Not all TV programs and product commercials are made for broadcast with Closed Caption information included. Refer to your area's TV program listings for the TV channels and times of Closed Caption shows. The captioned programs are usually noted in the TV listings with service marks such as "CC".

USB Input

- 1 Supporting media and file format: Digital pictures (.JPG/.JPEG/.BMP(Baseline & Progressive)/.PNG), digital music (.MP3(8~320kbps)) and Video(.avi/.mpg/.mpeg/.vro/.vob/.ts coded with MPEG-1 or MPEG-2 standard) files.
 - Due to differences in the file code and file mode, It is possible that some files cannot be read.
- 2 Before starting operation, verify USB storage device is of FAT32 file system format. At present, this television does not support NTFS and the file systems of other format.
- 3 Supports USB/Memory Card Plug & Play (don't need to reset TV system),USB Hard-drive support - only support the class of USB HD that follows USB power consumption spec.
- 4 The television operation may be halted due to excessive rate of information code errors. In such case, restart the system. Please note - there are many nonstandard USB mobile devices in the market. If a nonstandard device is used then an identification problem may occur.

USB Media Menu operation

- 1 Plug-in an external storage device into USB port.
- 2 Press **USB** button on the remote to display multimedia.
- 3 Press **ENTER** button on the remote to display the sub page.

- 4 Press **EXIT** button on the remote to return to the previous menu.

To play pictures

- 1 Press **USB** button on the remote to enter USB media system.The system start up takes about 3 seconds.
 - Then insert the USB drive in the USB input.

- 2 Press **MENU** button, and the press **▲ / ▼** to select Media Type , Press **ENTER** and press **▲ / ▼** to select Photo.

- 3 Press **▲ / ▼ / ◀ / ▶** button to select folder or file, and then press **ENTER** button to enter the play interface.

1. Play mode: None/Dissolve/Wipe right/ Wipe left/Wipe up/Wipe down/Box in/Box out/ Random	3. File name
2. Play time: Short/Medium/Long	4. Pause
	5. Duration
	6. Effect
	7. Information

- 4 Press **MENU** button to display the option list.

1. Play/Pause	4. Duration
2. Repeat	5. Effect
3. Shuffle	6. Information

5 Press the button on the remote control to select the adjusted item, press **ENTER** button to confirm.

1. Play previous picture
2. Play next picture

6 Press **EXIT** button to return to the previous menu. Press **USB** button to exit the USB mode.

Note

☐ You may play the pictures among selected.

To play music

1 Press **USB** button on the remote to enter stream media system.

2 Press **MENU** button, and the press **▲** / **▼** to select Media Type , Press **ENTER** and press **▲** / **▼** to select Music.

3 Press **▲** / **▼** / **◀** / **▶** button to select folder or file, and then press **ENTER** button to enter the play interface.

1. Play Time	4. Shuffle On or Off
2. File Name	5. Audio Only
3. Repeat	6. Information

4 Press **MENU** button to display the option list.

1. Play/Pause	4. Show Info
2. Repeat	5. Show Spectrum
3. Shuffle On or Off	6. Audio Only

5 Press the button on the remote control to select the adjusted item, press **ENTER** button to confirm.

- | |
|------------------------|
| 1. Play or pause |
| 2. Stop |
| 3. Fast reverse |
| 4. Repeat |
| 5. Fast forward |
| 6. Play previous music |
| 7. Play next music |

6 Press **EXIT** button to return to the previous menu. Press **USB** button to exit the USB mode.

Note

☐ You may play the music among selected.

To play video

1 Press **USB** button on the remote to enter stream media system.

2 Press **MENU** button, and the press **▲** / **▼** to select Media Type , Press **ENTER** and press **▲** / **▼** to select

Video.

- Press **▲ / ▼ / ◀ / ▶** button to select desired video folder, and then press **ENTER** button to enter the play interface.

1. Play Time	4. Shuffle On or Off
2. File Name	5. Audio Only
3. Repeat	6. Information

- Press **MENU** button to display the option list.

1. Play/Pause	4. Picture Mode
2. Repeat	5. Screen Mode
3. Show Info	

- Press the button on the remote control to select the adjusted item, press **ENTER** button to confirm.

1. Play or pause
2. Stop
3. Fast reverse
4. Repeat
5. Fast forward
6. Play previous music
7. Play next music

- Press **EXIT** button to return to the previous menu. Press **USB** button to exit the USB mode.

Note

- Do not remove USB device from the TV until you have exited the USB mode otherwise you may damage the USB device.

Universal Remote Control

Setting Up Your Remote Control

After it has been set up properly, your remote control can operate in six different modes: TV, DVD, VCR, SETBOX, CABLE or AUDIO.

Note

- The remote control might not be compatible with all DVD Players, VCRs and Cable boxes.

Control Operation

- Program the Controller to work with your device.
- Changing device mode by pressing the TV, DVD, STB, CABLE, VCR, AUD key. When device is set, related device LED will be on for 1 second and then be off.
- Aim the remote at the device.
- Use the other Controller buttons to operate the device. Device LED will blink if user presses any key (if the key has data in current mode.). If the key has no data, then LED will not blink.
- Default init status: TV/Haier codeset.

❖ Manually Programming the Control

Check the code no. from the code list.

- Choose the device you want to program.
- While Press and holding **ENTER** key, press **INPUT** key, and device LED will be ON. Keep the status for about 3 seconds and the LED will blink, indicating that the Controller is ready for programming, then release both keys.
- Led will blink once when you enter a digit key, indicating the digit key is programmed. If 3 digits are programmed successfully, device LED will be ON for about 3 seconds and then blink twice per second. Then User now can:
 - Try to operate the device by using power key.
 - If operation can be done, press **ENTER** key to save current 3-digits code brand to EEPROM and exiting manually programming mode.
 - Return to beginning of step 3. Reprogram the control.

- 4** If user's input is incorrect, LED will blink 6 times in 3 seconds (2 HZ). And then keep 2 HZ blink, user now can return to step 3 and re-program the device. Within 30 seconds, user should enter the 3-digit brand code corresponding to your device. If time out or any key other than Power and digits is pressed, LED will be off and manually programming process is exit.

❖ Manually scan mode

With manually scan programming, the Controller tests all the codes available in the codeset database and assign the correct one for the selected device. Although this method is more time consuming, it saves you the trouble of looking up the brand codes necessary for manual programming.

To manually-scan program the Controller:

- 1** Manually turn OFF the device for manually scan mode. (TV, VCR, DVD, STB, cable box or audio equipment).
- 2** Choose the device you want to program.
- 3** While Press and holding **ENTER** key, press **INPUT** key, and device LED will be ON. Keep the status for about 3 seconds and the LED will blink, indicating that the Control is ready for programming, then release both keys.
- 4** Press and release the **CH+/CH-** key. it will emit the next or the previous **POWER** key code. The LED blinks with 10 HZ freq, indicating that the Remote is in manually scan mode.
- 5** Press **CH+/CH-** key repeatedly until the device switches ON (**CH+** key conducts a upward search while the **CH-** key conducts a downward search in the code set database). When the device turns ON, press and release the **ENTER** key to program the Controller with the new code, saving the code to EEPROM and exit.
- 6** After saving the new code, press **POWER** key. If the device responds, no further programming is required. If the device does not respond, repeat step 3 through 5. And searching will start from current code set.

To exit without programming, press any key or no key was pressed in 30 seconds, manually scan mode will be automatically exit. The code can not be saved to EEPROM.

After searching the entire data base, this mode will be automatically exited and led will blink for 3 times in

1.5 seconds. The code can not be saved to EEPROM.

❖ Automatic Scan Programming the Controller

To automatic scan program the Controller:

- 1** Manually turn OFF the device you wish to power scan. (TV, VCR, DVD,STB, cable box or audio equipment).
- 2** Choose the device you wish to program.
- 3** While Press and holding **ENTER** key, press the **INPUT** key and device LED will be ON. Keep the status for about 3 seconds and the LED will blink, indicating that the Controller is ready for programming, then release both keys.
- 4** Press and release the Mute key to enter automatic scan mode. And the remote will automatically sending codes to the device per 2 seconds.
- 5** When the device turns ON, press **ENTER** key to program the Controller with the new code, saving it to EEPROM and exit.
- 6** Press **POWER** key, If the device responds, no further programming is required. If the device does not respond repeat steps 1 through 5.
- 7** After searching the entire data base, this mode will be automatically exited and led will blink for 3 times. The codeset is not saved to EEPROM.

In automatic scan mode, press any key other than **ENTER** key will exit without programming.

Display mode

- 1** Choose the device you wish to program.
- 2** To enter display mode, while press and holding **ENTER** key, press the **INPUT** key and device LED will be ON, keep the status for about 3 seconds and the LED will blink, indicating that the Controller is ready for programming, then release both keys.
- 3** Sequence press 9, 8, 0 to enter display mode.
- 4** Press digit 1 key to get the first digit of current codeset. For example, if the first digit of codeset is 1, so then led will blink once and remains OFF. Digit "0" in codeset will not be displayed. Blink Freq is 1 HZ.
- 5** Press digit 2 key to get the second digit of current codeset. For example, if the second digit of codeset is 3, so then led will blink three times and remains OFF. Blink Freq is 1 HZ.

Universal Remote Control

6 Press digit 3 key to get the third digit of current codeset. Blink Freq is 1 HZ.

7 Only digit 1, 2, 3 are valid in this mode. And the sequence is not fixed.

Controller will not send out data in this mode if user presses any keys other than digit 1, 2, 3, or no key was pressed in 30 seconds, display mode is ended.

Punch-Through Features

The Controller provides two punch-through features that allow users to control TV volume and DVD or VCR operation while the Controller is in another device mode control certain features of another device.

❖ Volume Punch-Through

The TV Volume/Mute punch-through feature allows you to control the volume and mute function of your TV while the Controller is in another device mode. The feature is applicable for all devices and brands that do not use the volume control buttons for other purposes.

❖ Transport Key Punch-Through

The DVD or VCR transport key punch through feature lets you control the PLAY, STOP, PAUSE, REWIND, FF and RECORD functions of your DVD or VCR while the Control operates in other modes. The feature is applicable for all devices and brands that do not use the transport keys for other purposes.

Fast Programming Haier default TV codeset

Press and holding the **ENTER** key and then press **POWER** key for 3 seconds, the LED will blink 3 times and turn off, default Haier codeset (001) will be programmed to the control.

Maintenance

Maintenance

Early malfunctions can be prevented. Careful and regular cleaning can extend the amount of time you will have your new TV. Be sure to turn the power off and unplug the power cord before you begin any cleaning.

Cleaning the Screen

- Here's a great way to keep the dust off your screen for a while. Wet a soft cloth in a mixture of lukewarm water and a little fabric softener or dish washing detergent. Wring the cloth until it's almost dry, and then use it to wipe the screen.
- Make sure the excess water is off the screen, and then let it air-dry before you turn on your TV.

Cleaning the Cabinet

To remove dirt or dust, wipe the cabinet with a soft, dry, lint-free cloth. Please be sure not to use a wet cloth.

Extended Absence

If you expect to leave your TV dormant for a long time (such as a vacation), it's a good idea to unplug the power cord to protect against possible damage from lightning or power surges.

Specification

Product Specification

Resolution	42"46" 1920X1080 (Dot)
Power requirement	120 V~ , 60 Hz
Stand-by Consumption	less than 1 W (models - HL26R1/HL32R1/HL26K1/HL32K1/HL32XK1/HL32P1)
Color system	NTSC, ATSC, Clear QAM
External Antenna Impedance	75 ohm
Color	16,770,000 (256 steps of each R, G and B)
Operating Temperature Range	32~104 °F (0~40 °C)
Operating Humidity Range	Less than 80%
Maximum Elevation	6561 feet (2000 m)

MODEL	Dimensen (WDXH) Unit:inches/mm (Including stand)	Weight (pounds/kg)
42"	26.1X7.9 X19.7 inches 662X200X501 mm	22.0/10.0
46"	26.1X7.9 X19.6 inches 662X200X500 mm	18.1/8.2

Troubleshooting

Troubleshooting

- For the sake of time and cost, it is strongly recommended that you check out the problem by yourself according to the instructions listed hereunder before contacting the after-sales service for technical assistance.

No picture, no sound	Verify if the television is properly plugged. Verify if the television is properly supplied power. Verify if electricity is available.
Blank screen	Verify if correct signals are input. Press INPUT button to change signal input to TV input. Restart the television of power supply is interrupted.
No sound	Press Mute button and verify if Mute mode is set. Switch to other channel and verify if the same problem happens. Press VOL+ button to see if the problem can be solved.
Poor sound	Verify if sound system is correct. Refer to Page 20 for adjustments.
No picture in some channel	Verify if correct channel is selected. Adjust the antenna. Make adjustments by Fine Tune and Manual Scan.
No color for some channel program (black and white)	Verify if the same problem exists in other channels. Check out of picture and sound systems. Refer to relative instructions in the Manual for color adjust.
Spots with some or all pictures	Verify if the antenna is correctly connected. Verify if the antenna is in good condition. Make fine adjustment of channel.
Horizontal/vertical bars or picture shaking	Check for local interference such as an electrical appliance or power tool.
Television out of control	Disconnect the television from power supply and, 10 seconds later, connect the television to the power supply. If the problem still exists, contact authorized after-sales service for technical assistance.

Note

- ❑ Do not leave the television with static picture in an extended period as the image may become permanently burned.

Note

- ❑ Production of the LCD screen requires high and precision technologies. However, there might be some dark or bright (red, blue or green) spots, or some anomalistic stripes or spots. This is not defect. If the TV set is used in an area 2,400 meters above the sea level where the air pressure is below 750 hpa, the picture on the LCD screen may be affected and a muffled sound might be produced. These phenomena might happen in the area 1,500 meters above the sea level. This is resulted from difference between air pressures inside and outside the display. This is not a defect covered by the limited warranty.

Warranty

Warranty

This Haier brand product, when shipped in its original container, will be free from defective workmanship and materials, and agrees that it will, at its option, either repair the defect or replace the defective product with a new or remanufactured equivalent at no change to the purchaser, for parts or labor for the periods set forth below:

This warranty does not apply to the appearance of the product or the exterior of the product, which has been damaged or defaced, altered or modified in design or construction. It does not apply to the additional excluded items set forth below:

The warranty commences on the date the item was purchased and the original purchase receipt must be presented to the authorized service center before warranty repairs are rendered.

The limited warranty described herein is in addition to whatever implied warranties may be granted to purchasers by law. ALL IMPLIED WARRANTIES INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR USE ARE LIMITED TO THE PERIOD(S) FROM THE DATE OF PURCHASE SET FORTH BELOW. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Neither the sales personnel of the seller nor any other person is authorized to make any warranties other than those described herein, or to extend the duration of any warranties beyond the time period described herein on behalf of Haier.

The warranties described herein shall be the sole and

exclusive warranties granted by Haier and shall be the sole and exclusive remedy available to the purchaser. Correction of defects in the manner and for the period of time described herein, shall constitute complete fulfillment of all abilities and

Responsibility of Haier to the purchaser with respect to the product, and shall constitute full satisfaction of all claims, whether based on contract, negligence, strict liability or otherwise. In no event shall Haier be liable, or in any way responsible for any damages or defects in the product which were caused by repairs or attempted repairs performed by anyone other than an authorized service center or dealer; nor shall Haier be liable, or in any way responsible for incidental or consequential economic or property damage. Some states do not allow the exclusion of incidental or consequential damages, so that above exclusion may not apply to you.

THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.

Warranty period for this product: one year parts and labor. Additional items excluded from warranty coverage: non-rechargeable batteries. Where to obtain service: For the location of the nearest Haier authorized service center or to obtain product literature, accessories, supplies or customer assistance, please call 1-877-337-3639. What to do to obtain service: ship or carry in your product to an authorized service dealer or center. Be sure to have proof of purchase. If you ship the product, be sure it is packaged carefully. Chapter 8. Measurements and Adjustments

8-1. Service Mode

8-1-1. How to enter into Service Mode

The way to the factory mode menu:

1st, press menu,

2en, input 8893,

Finished these operations ,system will be into the factory mode menu.

At the end of the main factory menu, you can see the edition of the software, like this" L_MSD209_AU32 ".

8-1-2. How to exit

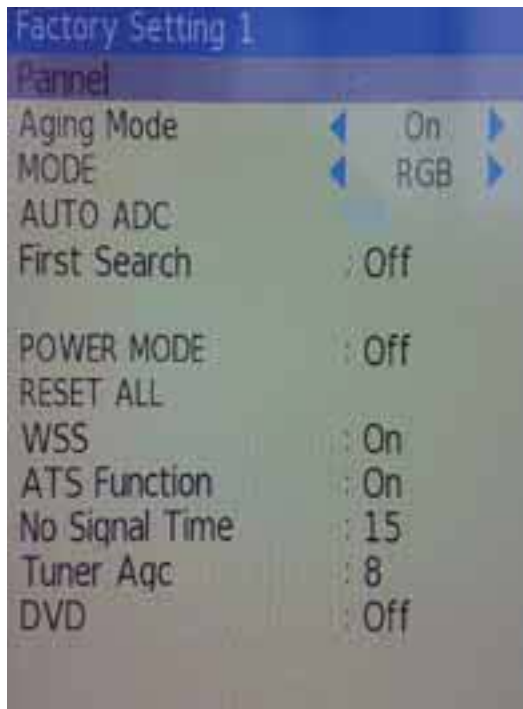

If you want to exit this factory menu, please press the button "Exit" on the remote. system will be out the factory mode menu.

8-2. Measurements and Adjustments

8-2-1. The Main Menu

In factory mode menu,press up/down button to choose the up/down item,press left/right button to the submenu,press "OK"button to affirm .press MENU button go to the next page.

MSD209 Factory Menu

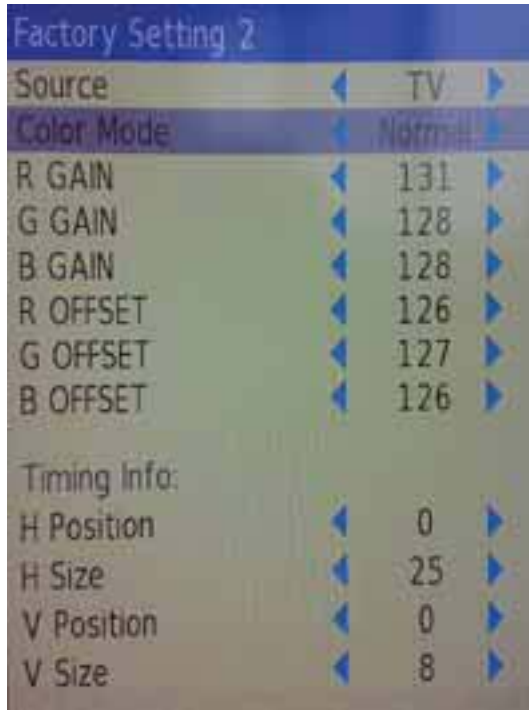

In this page, you just consider "RESET ALL" function. This function you can reset all date return to factory state. if you encounter inextricable problem, you can try this function.

Press up/down button to select "RESET ALL", press "OK" button. It needs a few seconds.

NOTE : After reset ,please shut off the power. Be carefully use this function.

8-2-2. Video

Color Temperature

This page is control the Color Temperature, and the picture size.

Picture Mode

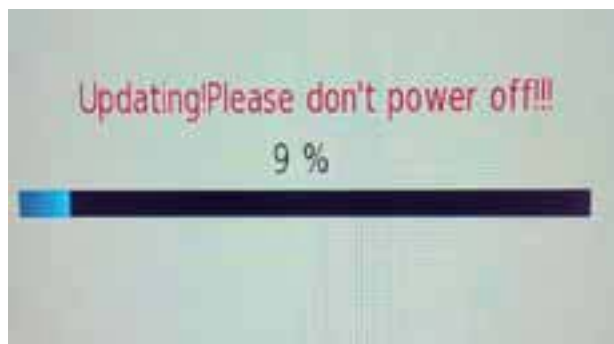

This page is control the picture effect , like Brightness,contrast,color,sharpness.

8-2-3. Audio

This page is control the sound effect ,from 100Hz to 10KHz.

8-2-4. Software UpDate

In this page , you just consider the software update function.Plug USB into the 1st USB port ,select "SOFTWARE UPDATE" press "OK", Then flip the other window,perss "OK",The update is going work.

NOTE : After software update ,turn to the Factory Setting 1 page reset all.

Chapter 9. Trouble shooting

9-1. Simple check

No picture/ No sound	<p>Verify if the television is properly plugged</p> <p>Verify if the television is properly supplied power</p> <p>Verify if electricity is available.</p>
Blank screen	<p>Verify if correct signals are input</p> <p>Press INPUT button to change signal input to TV input</p> <p>Restart the television of power supply is interrupted</p>
No sound	<p>Press Mute button and verify if Mute mode is set.</p> <p>Switch to otger channel and verify if the same problem happens.</p> <p>Press VOL+ button to see of he problem can be solved.</p>
Poor sound	<p>Verufy if sound system is correct .Refer to some chapter for adjust.</p>
No picture in some channel	<p>Verify if correct channel is selected.</p> <p>Adjust the antenna.</p> <p>Make adjustments by Fine Tune and MANUAL Scan.</p>
No color for some channel program (black and white)	<p>Verify if the same problem exists in other channels.</p> <p>check out of picture and sound system.</p> <p>Refer to relative instructions in the Manual for color adjust.</p>
Spots with some or all pictures	<p>Verify if the antennal is correctly connected.</p> <p>Verify if the antennal is in good condition.</p> <p>Make fine adjustment of channel.</p>
Horizontal/ vertical bars or picture shaking	<p>Check for local interference such as an electrical appliance or power tool.</p>
Television out of control	<p>Disconnect the television from power supply and 10 seconds later, connect the television to the power supply.</p> <p>If the problem still exists, contact authorized after-sales service for technical assistance.</p>

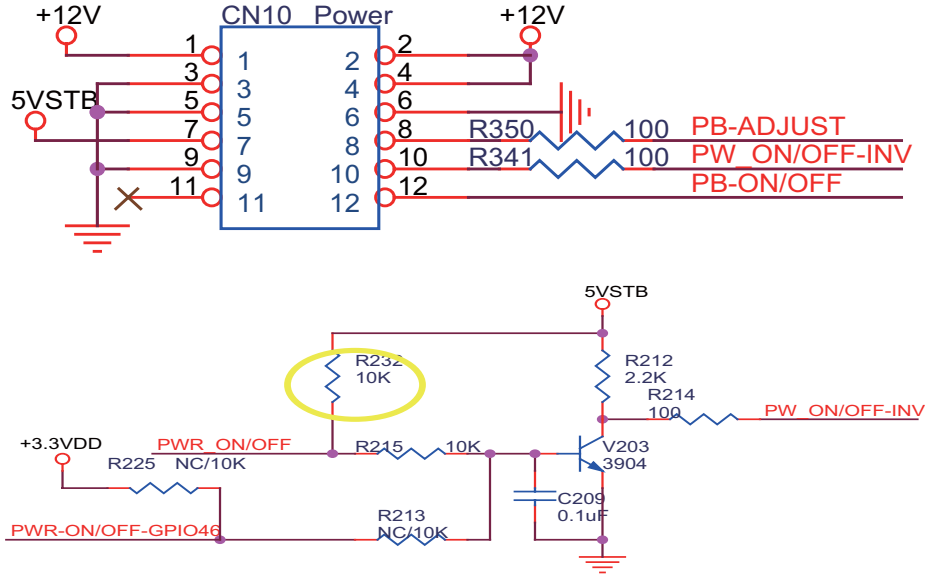

9-2. Power Supply Board Failure Check.

State: No picture

First, check cables which connect with PSU, then check as follows

Check input voltage

voltage: +5VSB --- POWER ON (2.6V) --- +12V

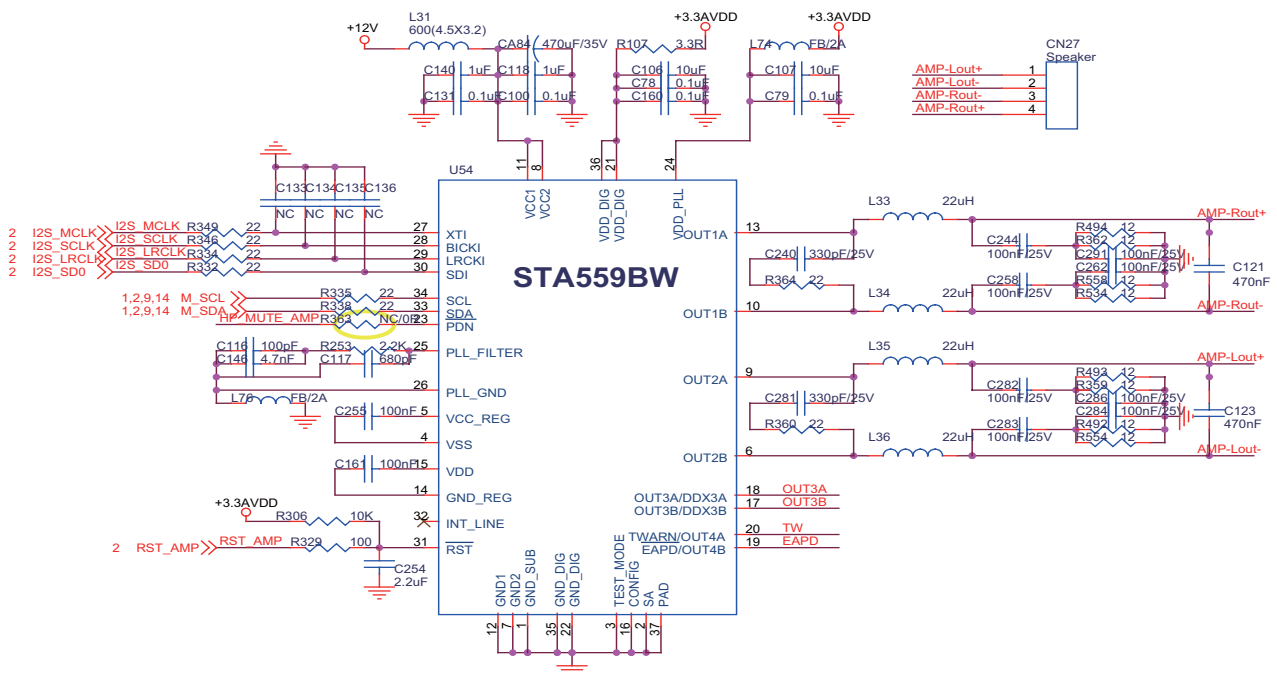

State: No sound

First, check cables which connect with PSU, then check as follows

- 1) Check input voltage as NO picture
- 2) Check speaker output

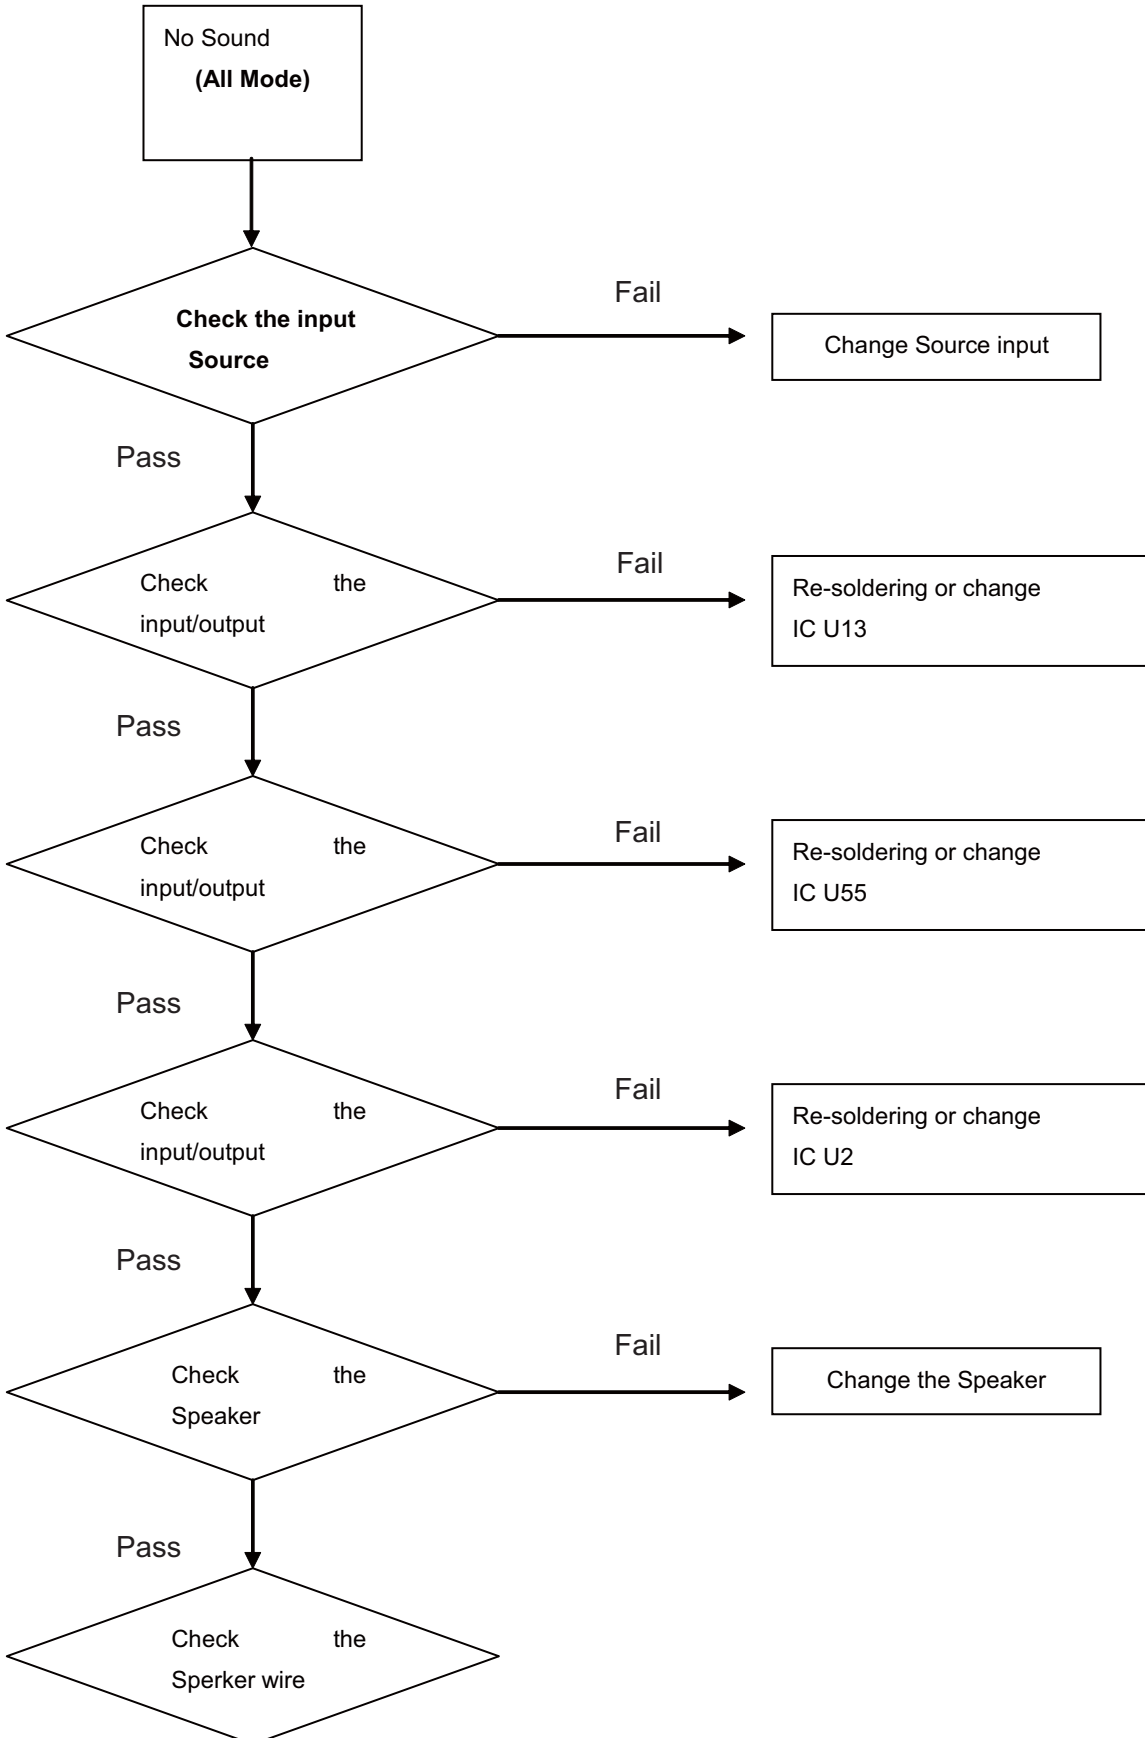

First, check speaker anode(+) and cathode(-), confirm speaker short or not. If short, replace speaker.

Second, check CN27 with oscillograph, confirm wave output or not.

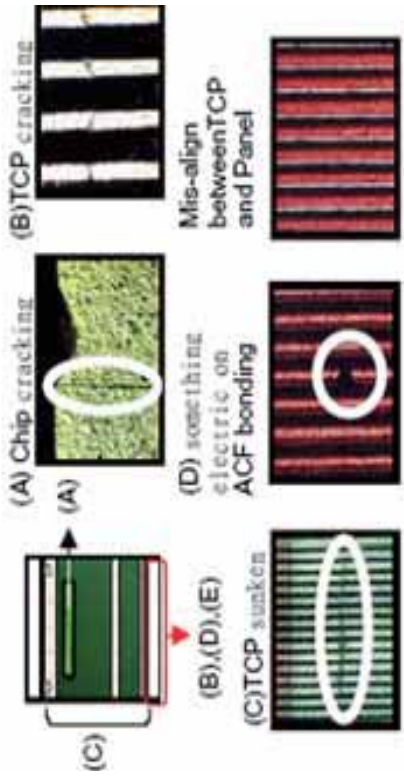

9-3. Mainboard Failure Check

Symptom: No Sound

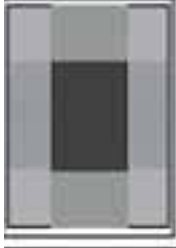

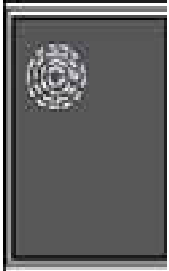

9-4. Pannel Failure

Failure Mode

Part	Name	Description	Phenomena	Failure cause	
TCP	V B/D	Vertical bar		Block Defect :TCP cracking or cracking Dim or L/D :TCP Sunken	
	V Dim	Vertal gray line		:TCP lead cracking :ACF bonding short :Awful environment and something electric enter into LCD	
	V L/D	Vertical color line(light or dark forever)		:Mis-align between TCP and Panel :Panel failure :TCP failure	
	H B/D	Horizontal bar			
	H Dim	Horizontal gary line			
	H L/D	Horizontal line(light or dark forever)			
					 <p>(A) Chip cracking (B) TCP cracking (C) TCP sunken (D) something electric on ACF bonding (E) Mis-align between TCP and Panel</p>

Part	Name	Description	Phenomena	Failure Cause
Panel or Polarizer	Dot Defect	Bright dot dark dot in pannel		Incoming Inspection Standard
	Polarizer Bubble	Bladder in Polarizer		Bladder between Polarizer and top glass
	Polarizer Scratch	Polarizer Scratch		Tine or rigidity arose
	F/inside Polarizer	Eyewinker inside Polarizer		Eyewinker inside Polarizer
Circuit	Abnormal Display	Abnormal Display		1. Chip lose action 2. IC ahort or jointiog bad 3. Pannel and vsc connect bad
	Flashing	Bright and dark display alternately		

Part	Name	Description	Phenomena	Failure Cause
	White Screen	B/L normal, only white screen display		Maybe caused by surge current and EDS
	Black Screen	B/L normal, only Black screen display		
Circuit	Flicker	Crosstalk		LCD Vcom imbalance
	Abnormal Color	Only color abnormal		Capacitance improper bring crosstalk inside LCD pannel
	Abnormal Color	Only color abnormal		

Part	Name	Description	Phenomena	Failure cause
	Mechanical Noise	When turn panel, appear cacophony		Caused by Mechanical noise of backlight unit
	Ripple	Connectric circle		Caused by between mechanism and pannel
	B/L off	B/L lose action		*Connect badness between wire and electrode
	B/L dark	B/L brightness darker than normal		*Connect badness Short between wire and electrode
	B/L wire damaged	B/L wire damaged		Operation abnormal or systemic noise
	B/L wire open	Without backlight		Operation abnormal or systemic noise
	B/L shut down	B/L shutdown in sometime		Short bitween lamp housing and wire, Because consume power too much
	F/M	F/M in B/L, white, balck Rotundity or wirelike		F/M in B/L unit

Part	Name	Description	Phenomena	Failure Cause
Mechanical or B/L	Light leakage	Brightness at bottom of LCM brighter than normal		B/L unit badness
	Uniformity	B/L brightness asymmetric		Sheet in B/L unit is uneven
	Mount hole	Lack screw or screw damage		*Lack screw Screw damage
