PHOTOGRAPHY

◆Photography—Digital Camera Refresher

So you have a digital camera and are wondering how it works? This class is designed for those wanting to learn more about how to use their digital camera. Various camera settings will be covered using a hands-on method with the students own camera. There are so many camera settings that can take the fun out of photography. We will help to take the mystery out of using these new feature-packed cameras. The class will also cover solid photographic principles and composition so that your photos will stand out from the rest. The class will consist of lecture, PowerPoint presentations, videos and plenty of hands-on digital camera use in the classroom. Students will be encouraged to bring in digital pictures they shoot for review in class. Be prepared to do weekly photo assignments that will be designed to help make you a better photographer. Bring your camera to class so that we may be able to check out and use your camera while in class. **Prerequisites: One must own a modern digital camera, have basic knowledge of camera use, and have a desire to learn more about camera settings and controls.**

Wednesdays

Location: JobLink

3333 Michigan Ave East Chicago, Indiana

Instructor: Bill Staniec

Photography—Lighting Essentials

Lighting is essential to all photography, but how do you control it, modify it, and choose the right tools and positions for your work?

Take the mystery and confusion out of lighting and join us at JobLink for Lighting Essentials. In this class, you will learn the basics of how light works, how to modify it and with what tools. You will develop a working knowledge of studio lighting and know how to discover and distinguish light by quality, quantity, and direction. You will gain insights into how to control light, and the application of formal studio portrait lighting, location lighting, and flash fundamentals.

This course will teach you basic lighting workflow, how to adjust lighting for creative mood, ambience, and when to apply creative choices. We will demonstrate key concepts that will give you the opportunity to make your own shots during class.

Course Takeaways

You will gain the foundations necessary to create studio/portrait lighting and an understanding of how light affects creative decisions. **Prerequisites: One must own a modern digital single lens reflex camera, have basic knowledge of camera use, and have a desire to learn how to use light to create better photos.**

Why join a book club? Here are four reasons:

1. You read books you would never have thought of reading (and you enjoy it!)
2. Some books just need to be discussed.
3. You meet interesting people.
4. It's fun!

Here's how it works: a month or so before the book club meets, you register for the next meeting and you pick up a copy of the book from JobLink. Read the book and come to the discussion. (If you don't like the selection, you don't have to participate that month.) Try it - you'll like it! **Prerequisites: None**

Wednesdays

**April 30, May 28, June 25, and August 20

What is Telecasting?

Telecasted classes are live classes that are also recorded and uploaded to the Internet. This means that if students miss a class or simply want to review the class, they can watch it online at their convenience 24 hours after the live session has taken place. These classes meet at Leon Lynch Learning Center and are often broadcasted to other learning centers around the country. Some students opt to stream all the sessions, which means they can just attend the class by uploading the telecasted classes and watching online. Participants still have the opportunity to email instructors and get all of their questions answered.

That's the beauty of telecasting. Taking and completing a course has never been easier!

Telecasted classes are held on the second floor of the Leon Lynch Center at 1410 Broadway Avenue in East Chicago.

◆Meet Me at the Dunes: Geology of Our Region

Join instructor Dave Dolak at the dunes, an area of unique natural and cultural significance. The "birthplace of ecology" and the only national park in the Chicago area, the dunes offer a unique geological story that is often overlooked. This field trip will provide a good introduction to geology and will cover the natural story of the Indiana Dunes from the glacier ice age to the modern park. The trip will include hikes at some of the following locations:

- Marquette Park
- Indiana Dunes National Lakeshore
- Miller Woods
- West Beach
- Chellberg Farm
- Cowles Bog
- Kemil Beach Blowout

Dave, a former steelworker, did graduate study at the Indiana Dunes and is on the faculty of the Science and Math Department at Columbia College Chicago.

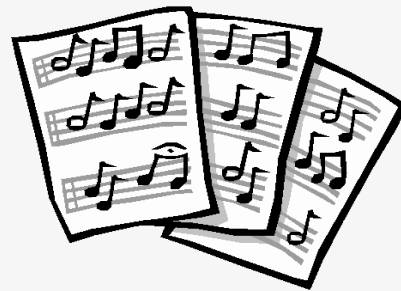

Bring your spouse and kids age 10+ along for a great learning experience for all! Participants are required to meet at West Beach (pick up a map at JobLink). Dress for leisurely hikes over established trails. **Prerequisites: None**

Cut the Cord—Mini Class

In the face of rising prices, poor customer service and ever more frequent blackouts, many of us want a way out of the grip of cable TV providers. "Cut the Cord" describes how you can use your computer as a high definition TV tuner and much more. Did you know that your existing TV or Smart TV can be connected to the Internet without a computer to stream Netflix shows, radio stations and all kinds of digital entertainment? Save money on your cable bill and have more choices, too! Attend this mini-class and learn how to choose and setup your own cord cutting systems. **Prerequisites: None**

Digital Forensics—How Did They Know That?

Computers, cellphones, tablets, cars, pagers and cloud computing all leave a digital footprint 24/7. Criminal investigators use this information to solve crimes. Unfortunately hackers can use this information, too. They can steal your digital identity and online information. This course introduces students to computer forensic tools and the methods used to retrieve the digital crumbs left by your devices. Of course, you will also learn techniques to protect yourself when using digital devices. Students will have hands-on laboratory experience using various digital forensic tools. (2 hours study, 1 hour lab weekly)

◆iCloud and iTunes—Mini Class

Confused about the cloud and iTunes?

iTunes is Apple's media player and library organizer. iCloud is a service provided by Apple that stores your music, TV shows, and other files in the cloud (online). iCloud also automatically pushes (downloads) your files to all of your devices so that they stay up-to-date. It works with iOS devices (such as the iPad and iPhone), Macs, and even Windows PCs. With iCloud, you'll no longer need to connect your iOS device to your computer in order to sync your files and settings; everything will stay in sync using wireless. Bring your devices and let us help you get your accounts set up and optimized. As a bonus, this class will be available in the cloud for download. **Prerequisites: None**

◆Let's Learn Linux—It's Easy!

Linux is free and easier to use than ever. Ubuntu Linux is a general-purpose operating system for the PC that often rivals Microsoft Windows and Macintosh OS for ease of use, security, and freedom from restrictions. This step-by-step beginner's course to Ubuntu Linux is designed to guide anyone with basic computer experience. Included is an explanation of what Linux is, how you can obtain a free copy of Ubuntu Linux, and how to boot the "live" CD to test your Ubuntu Linux. You will learn configuration, customization, adding software to the system, working with the desktop environment, as well as the many included free programs and features of Ubuntu Linux. (1.5 hours study and 1.5 hours of hands-on lab each week.) **Prerequisites: None**

We go to great pains to make sure that everything in this Schedule of Classes is accurate and up to date. However, anything can happen. Please note that class times and dates are subject to change at any time. In the event of a time change, date change, or course cancellation, we will try to the best to notify you in advance.

Attention: All Retirees and Spouses

NEW Registration Policy

Please be aware of this change in policy as it may affect how you register for classes:

- There will no longer be specific spouse and retiree registration dates.
- Retirees and spouses can sign up for any eligible class (a diamond class) **during the week before the start of that class.**
- Online registration will begin at 8:00 am and phone and in-person registration will begin at 9:00 a.m.
- **No one will be registered by leaving a voicemail message.**
- You will receive your confirmation at that time, but we cannot guarantee a spot for any spouse or retiree.

Please note that if you register online or by phone, your confirmation will be mailed to you.

Example: If you wish to take a class scheduled to begin on the 19th of the month, registration for that class will begin on the 12th. So the earliest you could register would be 8:00 a.m. through online registration. In-person and phone registration would begin at 9:00 a.m. Registration will still be on a **first-come, first-serve basis.**

Thank you for your cooperation!
