TECHNICAL INFORMATION							55

INTRODUCTION

Welcome to Issue 1.0 of our IEC Shipboard/Offshore Cables catalog.

Tricab has been pioneering and re-defining cable technologies for over 30 years.

The cables within this catalogue represent a milestone for the marine industry as they combine the highest technical performance, outstanding flexibility, reduced weight and user-friendliness.

All cables now include a high strength ripcord under all jackets, and under the insulation 10mm² and larger conductors, for ease of stripping extended lengths.

All Tricab Marine Cables conform to major international standards including IEC and IEEE and carry approvals from ABS, LR, DNV, BV, GL, NATO, USCG, TC NAVSEA.

Our cables are used globally across a broad range of platforms, including Navy and Defense vessels, Fast Ferries, Commercial and Work Boats, Tankers, Passenger Liners, and Megayachts.

We operate our own Sales and Distribution networks across Australia, New Zealand, Asia, the Middle East, Europe, the USA and Canada. This enables us to work directly with our customers in partnership agreements and deliver the highest possible service levels. Our Manufacturing facility in Worcester, MA, USA also includes Sales, Engineering, and Warehousing.

We trust that you will find this catalog of value and we look forward to being of service to you in the near future.

108ft Orca Class inshore patrol vessel by Victoria Shipyard, Victoria BC

LOW SMOKE ZERO HALOGEN (LSZH)

What does it mean?

LSZH

LSZH simply translates to Low Smoke Zero Halogen and refers to the behaviour of chemical compounds when combusted - specifically the quantity of smoke generated and the toxicity of the emissions.

Halogens - What are they?

Halogens are a group of five elements comprising; Fluorine, Chlorine, Bromine, Iodine and Astatine.

Fluorine

Chlorine

Bromine

Iodine

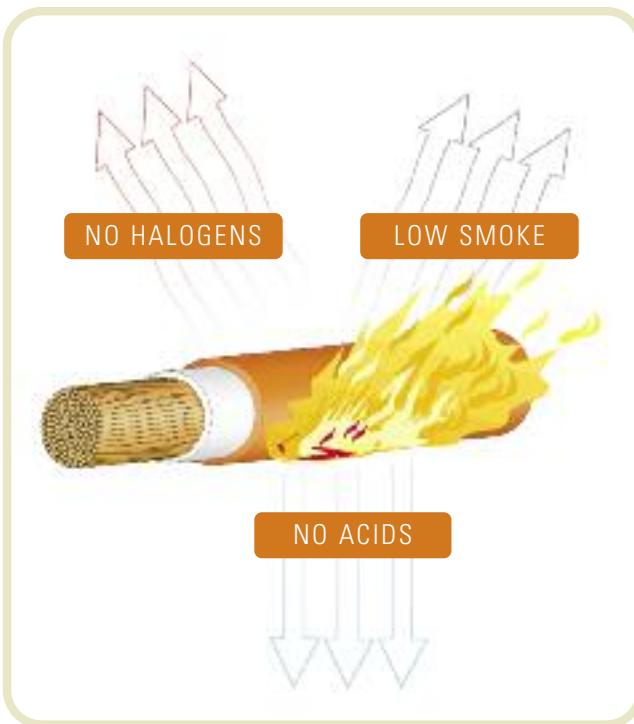

Astatine

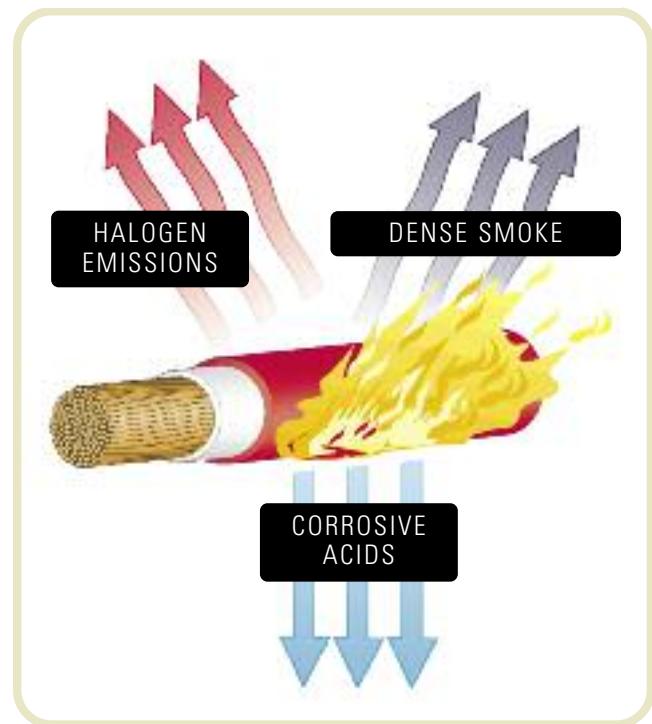

Halogens - and the effect of combustion

In their basic form, Halogens are very toxic, strong oxidizers and very chemically reactive. In the event of combustion, LSZH and non LSZH cables behave in very different ways, as indicated below.

Tricab LSZH Cables

Non LSZH Cables

LOW SMOKE ZERO HALOGEN (LSZH)

What does it mean?

What is the difference between LSZH and non LSZH cables?

LSZH cables have a zero Halogen content, emit no toxic fumes, generate very little smoke and produce no corrosive or caustic acids. LSZH cables are therefore ideally suited for all marine applications where personnel safety and protection of valuable equipment are of paramount importance.

Non LSZH cables, or Halogenated Cables, are typically manufactured from thermoplastic compounds, such as PVC. On combustion, these compounds generate highly toxic fumes that cause severe irritation to the eyes, nose, mouth, throat and lungs. Increased concentrations are considered fatal to humans.

They also generate large volumes of dense black smoke that blocks visibility and severely disrupts evacuation procedures. The smoke and fumes can also lead to suffocation from smoke inhalation. A one metre length of burning cable that contains 0.85Kg of PVC will completely obscure a room of 1000m³ with black toxic smoke in less than five minutes.

When combusted, Halogens combine with moisture to form Hydrochloric Acid. This extremely corrosive acid is potentially deadly to humans and always causes extensive property damage. Acids of this nature aggressively attack electrical switchboards, motors, fixtures, furnishings, floor coverings, paint surfaces etc. In many cases the effects of acid corrosion after a fire are much more severe than the actual fire damage itself.

Tricab LSFLEX® - Insulation & Sheath Materials

- ✓ are halogen free
- ✓ emit low smoke
- ✓ do not form corrosive acids
- ✓ have an extremely low fuel element

Tricab LSFLEX® - Insulation & Sheath Materials comply to the following standards:

IEC 60332-1	AS/NZS1660.5.1
IEC 60332-3(A)	AS/NZS1660.5.2
IEC 60754-1&2	AS/NZS1660.5.3
IEC 61034-1&2	AS/NZS1660.5.6

FEATURES AND BENEFITS

FEATURES

BENEFITS

<ul style="list-style-type: none">Ripcord - Tricab includes a high strength ripcord under all bedding and overall jackets, and under the insulation on 10mm² and larger conductors.	Provides quick and efficient removal of any length of jacket or insulation without the risk of damage to underlying components. Eliminates the risk of injury from using razor knives or blades.
<ul style="list-style-type: none">Fine Copper Stranding - Tricab uses very fine copper wire for all conductors, in accordance with ASTM B3-01, ASTM B33-00 and IEC 60228.	Significantly increased flexibility has numerous practical benefits, including reduced installation time and easier cable handling. These benefits translate directly into reduced installation time and cost. Fine stranded conductors also offer improved performance and reliability when subjected to vibration.
<ul style="list-style-type: none">Round Concentric Cores - Tricab exclusively manufactures round cores throughout its entire size range, and does not use sectorial conductors.	Standard lugs, terminals and connectors can be used, saving installation time, inventory and cost - also providing better electrical contact with standard round lugs.
<ul style="list-style-type: none">Lightweight - Tricab has developed specific product ranges that have reduced weight.	Especially relevant to high speed craft, where weight saving translates into improved performance and overall cost benefits.
<ul style="list-style-type: none">Small OD - Tricab has developed specific product ranges that have reduced OD's.	Additional cables can be installed within a specified cable tray, ladder or conduit. A smaller bending radius benefits tight configurations, and smaller glands reduce cost.
<ul style="list-style-type: none">Flexible Construction - Tricab uses a combination of fine conductors, special compounds and manufacturing processes to produce a very flexible cable.	Reduced installation time and cost, improved bending radius and safer cable handling (especially larger sizes).
<ul style="list-style-type: none">Foot marking - All Tricab cables are foot-marked as standard, with a descending number (metre marking also available).	Assists the installation process and enables accurate stock management.
<ul style="list-style-type: none">Product marking - Tricab offers personalized text messages printed onto the cable at regular intervals, even for short lengths.	Project Reference Codes, Company Name, Part Numbers, Quality Data, Marketing Information etc. can all be clearly marked.

FEATURES

- Make to order facility** - Tricab can manufacture cables exactly to customer specifications.
- Global distribution** - Tricab operates its own network of company offices and warehouses worldwide. We currently have operations in the Pacific, Asia, the Middle East, Europe and North America.
- Research & development** - Tricab maintains a very active R&D programme, working very closely with our sales team and customers. In conjunction with our in-house laboratory, we are continually improving cable performance.
- Quick response** - Tricab has invested in manpower, machinery and materials to provide a short leadtime manufacturing capability.
- Reliable long-term partner** - Tricab has been supplying innovative cable solutions since 1978. We believe in long term partnerships and have a solid track record of successfully completed projects worldwide.
- Approvals** - Tricab maintains approvals from numerous certification bodies, including LR, DNV, ABS, BV, GL, UL, CSA. If required, we also obtain specific case approval.
- Quality accreditation** - Tricab operates an accredited Quality system in accordance with ISO 9001:2000, both within our manufacturing plant and our global offices and warehouses.

BENEFITS

- No need for the user to compromise or accept an alternative cable. Customers receive exactly what they need.
- We support customer projects wherever they may be, streamlining logistics, increasing supply reliability and saving time and money.
- New cable technologies are introduced to our customers on an ongoing basis.
- When cable is needed urgently, either due to an emergency or unexpected contingency, Tricab has the systems in place to fast-track the manufacturing process, reducing downtime and saving time and money.
- We believe that satisfied customers are our strength and we do everything in our power to ensure that we both grow and prosper over the long term.
- Reliable certification simplifies the task for procurement and engineering, saving time and money. It also allows cables left over from one project to be used for future projects.
- We continually improve our quality performance, which in turn provides improved products and services to our customers.

**APPLICATION**

Flexible Power and Control cables suitable for all shipboard and marine applications.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125. Available in plain or tinned.

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. Includes ripcord on 10mm² and larger.

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

FLEXIBLE SHIPBOARD BRAIDED/ARMOURED POWER & CONTROL

0.6/1kV 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Power and Control cables suitable for all shipboard and marine applications where mechanical or EMC protection is required.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125. Available in plain or tinned.

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. Includes ripcord on 10mm² and larger.

Overall Tape: Polyethylene

Braid/Armour Options:

Tinned Copper Wire Braid (90%)
Galvanized Steel Wire Braid (90%)
(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

OPERATING TEMP

-40°C to +110°C

VOLTAGE RATING

**APPLICATION**

Flexible Instrumentation cables suitable for all shipboard and marine applications.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

FLEXIBLE SHIPBOARD COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all shipboard and marine applications, where mechanical or EMC protection is required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Overall Tape: Polyethylene

Braid/Armour Options:

Tinned Copper Wire Braid (90%)
Galvanized Steel Wire Braid (90%)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water.

Resists ozone and UV.

OPERATING TEMP

FLEXIBLE SHIPBOARD INDIVIDUAL & COLLECTIVE SCREENED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all shipboard and marine applications.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Individual and Collective Aluminium/Laminate Tape

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

FLEXIBLE SHIPBOARD FIRE RESISTANT POWER AND CONTROL

0.6/1kV 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Power and Control cables suitable for all shipboard and marine applications, where circuit integrity is required under fire conditions

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.
Available in plain or tinned.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV. Includes ripcord on 10mm² and larger.

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV.

OPERATING TEMP

-40°C to +110°C

FLEXIBLE SHIPBOARD FIRE RESISTANT BRAIDED/ARMOURED POWER & CONTROL

0.6/1kV 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Power and Control cables suitable for all shipboard and marine applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.
Available in plain or tinned.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV. Includes ripcord on 10mm² and larger.

Overall Tape: Polyethylene

Braid/Armour Options:

Tinned Copper Wire Braid (90%)
Galvanized Steel Wire Braid (90%)
(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV.

FLEXIBLE SHIPBOARD FIRE RESISTANT COLLECTIVE SCREENED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all shipboard and marine applications, where circuit integrity is required under fire conditions.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

OPERATING TEMP

FLEXIBLE SHIPBOARD FIRE RESISTANT COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all shipboard and marine applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Overall Tape: Polyethylene

Braid/Armour Options:

Tinned Copper Wire Braid (90%)
Galvanized Steel Wire Braid (90%)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

FLEXIBLE SHIPBOARD FIRE RESISTANT INDIVIDUAL & COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all shipboard and marine applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene Tape

Drain Wire: Tinned annealed copper

Screen: Individual and Collective Aluminium/Laminate Tape

Overall Tape: Polyethylene

Braid/Armour Options:

Tinned Copper Wire Braid (90%)
Galvanized Steel Wire Braid (90%)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

OPERATING TEMP

-40°C to +110°C

**APPLICATION**

Flexible Shorepower cables suitable for all shipboard and marine applications.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.
Available in plain or tinned.

Insulation: LSFLEX® R-30 (X-HF-110)
Cross-linked, Thermoset, Elastomeric,
Flame Retardant, Low Smoke, Zero Halogen
Splash resistant to oil, skydrol, petrol, acid,
sea water. Resists ozone and UV. Includes
ripcord on 10mm² and larger.

Ripcord: High strength ripcord under
sheath..

Sheath: E-Rubber® N-40, Elastomeric Rubber,
Splash resistant to oil, skydrol, petrol, acid,
sea water. Resists ozone and UV.

APPLICATION

Flexible Power and Control cables suitable for all offshore applications, where mechanical or EMC protection is required.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125. Available in plain or tinned.

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. Includes ripcord on 10mm² and larger.

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX® S-50 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)
Tinned Copper Wire Braid (90%)
(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. SHF-2 also available.

OPERATING TEMP

FLEXIBLE OFFSHORE COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all offshore applications, where mechanical or EMC protection is required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX® S-50 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)

Tinned Copper Wire Braid (90%)

(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic,

Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water.

Resists ozone and UV. SHF-2 also available.

FLEXIBLE OFFSHORE INDIVIDUAL & COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all offshore applications, where mechanical or EMC protection is required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Individual and Collective Aluminium/Laminate Tape

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX®F-10 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)

Tinned Copper Wire Braid (90%)

(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. SHF-2 also available.

OPERATING TEMP

-40°C to +110°C

VOLTAGE RATING

250 Volts

FLEXIBLE OFFSHORE FIRE RESISTANT BRAIDED/ARMOURED POWER & CONTROL

0.6/1kV 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Power and Control cables suitable for all offshore applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.
Available in plain or tinned.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV. Includes ripcord on 10mm² and larger.

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX® F-10 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)
Tinned Copper Wire Braid (90%)
(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX® S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water.
Resists ozone and UV. SHF-2 also available.

OPERATING TEMP

FLEXIBLE OFFSHORE FIRE RESISTANT COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all offshore applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded tinned annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Aluminium/Laminate Tape

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX®F-10 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)

Tinned Copper Wire Braid (90%)

(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. SHF-2 also available.

OPERATING TEMP

-40°C to +110°C

FLEXIBLE OFFSHORE FIRE RESISTANT INDIVIDUAL & COLLECTIVE SCREENED BRAIDED/ARMOURED INSTRUMENTATION

250V 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Instrumentation cables suitable for all offshore applications, where circuit integrity is required under fire conditions and mechanical or EMC protection is also required.

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125. Available in plain or tinned.

Flame Barrier: Fire Resistant, Halogen Free, Glass Mica Tape

Insulation: LSFLEX®R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV.

Overall Tape: Polyethylene

Drain Wire: Tinned annealed copper

Screen: Individual and Collective Aluminium/Laminate Tape

Ripcord: High strength ripcord under bedding.

Bedding: LSFLEX®F-10 Low Smoke, Zero Halogen (pressure extruded)

Braid/Armour Options:

Galvanized Steel Wire Braid (90%)

Tinned Copper Wire Braid (90%)

(Also available with drain wire under the braid)

Ripcord: High strength ripcord under sheath.

Sheath: LSFLEX®S-50, Polyolefinic, Flame Retardant, Low Smoke, Zero Halogen (SHF-1 to IEC 60092-359) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. SHF-2 also available.

FLEXIBLE OFFSHORE SWITCHBOARD/PANEL WIRE

0.6/1kV 110°C LSZH Oxygen Index >32, HCL Emission <0.5%

APPLICATION

Flexible Single Insulated Power Cables suitable for all shipboard and marine applications

CONSTRUCTION

Conductor: Finely stranded annealed copper to IEC 60228 Class 5&6 & AS/NZS 1125. Available in plain or tinned.

Insulation: LSFLEX® R-30, Cross-linked, Polyolefinic, Thermoset, Flame Retardant, Low Smoke, Zero Halogen (HF-90 to IEC 60092-351) Splash resistant to oil, skydrol, petrol, acid, sea water. Resists ozone and UV. Includes ripcord on 10mm² and larger.

OPERATING TEMP

-40°C to +110°C

PRODUCT CODING

SHIPBOARD CABLE - PRODUCT CODES

OFFSHORE CABLE - PRODUCT CODES

1. PRODUCT SERIES

eg. (BV series)
(PJ series)

2. SHEATH TYPE (Shipboard/Offshore Cables only)

A = SHF-1
C = SHF-2

3. CORE COLOUR CONFIGURATION

eg. PA = IEC 60092-350

4. BRAID/ARMOUR

P= Plain Copper Wire Braid
T= Tinned Copper Wire Braid
G= Galvanized Steel Wire Braid
L= Tinned Copper Wire Braid + drain wire
M= Galvanized Steel Wire Braid + drain wire
A = Aluminium Braid
R= Aluminium Laminate Tape
X= Not Applicable

5. CONDUCTOR

N= Plain Annealed Copper Wire
D= Tinned Annealed Copper Wire

6. NUMBER OF CONDUCTORS/PAIRS/TRIADS

7. CORE TYPE

C= Power/Control
P= Pair
T= Triad
Q= Quad

8. CONDUCTOR CROSS SECTION AREA (mm²)

9. SHEATH COLOUR

OR= Orange
BK= Black
WH= White
GY= Grey
BR= Brown
RE= Red
BL= Blue
GN= Green
EA= Green/Yellow (Earth)

Cable Stripping Recommendation

1

4

2

1. Use Tricab Approved Cable Stripping tool.
2. Check blade depth before stripping jacket.

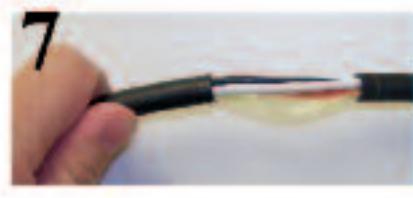

3

3. Strip off 4-5" of Jacket.

6

6. Bend jacket in all directions to ensure cut.

7

7. Pull off jacket piece & save piece for next step.

8

8. Use center of jacket piece to wrap ripcord around jacket piece.

9

9. Hold primes and pull on jacket piece to strip jacket.

10

10. Continue pulling to strip off jacket.

INSTALLATION RECOMMENDATION

CORRECTION FACTORS FOR CABLE CURRENT RATING

Bunching of cable

Where more than six cables are bunched together and operating at their maximum capacity, a correction factor of 0.85 should be applied (assuming insufficient free air circulation). Single core cables are exempted from this requirement.

Ambient temperature

The maximum current ratings in this catalogue are based on an ambient temperature of 45°C. For other ambient temperatures, the correction factors shown below should be applied.

Maximum conductor temperature	Ambient air temperature						
	35°C	40°C	45°C	50°C	55°C	60°C	65°C
90	1.10	1.05	1.00	0.94	0.88	0.82	0.74
110*	1.04	1.00	0.96	0.93	0.89	0.85	0.81

* Shorepower cable only

INSTALLATION

Cable runs should be fixed in straight lines as far as practicable. The minimum bending radius for cable should be selected in accordance with the table below.

Cable Construction	Cable OD	Minimum bending radius (times cable OD)
Unbraided	all sizes	4X
Unbraided, fire resistant	all sizes	8X
Braided	all sizes	6X
Braided, fire resistant	all sizes	10X
Nylon protected	all sizes	15X

The installation of cables across expansion joints in any structure should be avoided. Where this is not feasible, a loop of cable sufficient to accommodate the expansion of the joint should be provided. The internal radius of the loop is to be at least 12 times the overall diameter of the cable.

Cables should be installed away from heat sources as far as practicable. If this cannot be avoided and there is possibility of damage to the cable, then suitable shields, insulation or other protective measures should be installed.

Cables are not to be coated or painted with materials which may adversely affect their sheath or fire performance.

Cables should be installed away from sources of mechanical damage, as far as is practicable. If this cannot be avoided the cables should be protected with suitable metallic casing.

VOLTAGE DROP

When selecting cable size, consideration must be given to voltage drop. Refer to formula and table below:

$$Vd = \frac{L \times I \text{ mV/Am}}{1000}$$

Where: Vd = voltage drop in volts

L = route length of cable in meters

I = current to be carried in amps

mV/Am = millivolts per ampere metre value

(the drop in voltage shall not exceed 5% of supply voltage)

CONDUCTOR SIZE - SHORT CIRCUIT RATING

The short circuit current ratings in this catalogue are based on a one second duration. To calculate the maximum permissible short circuit ratings, the following formula should be applied.

$$\frac{C \times 143}{\sqrt{t}} \quad (90^\circ\text{C})$$

$$\frac{C \times 132}{\sqrt{t}} \quad (110^\circ\text{C})$$

C = cross section area of conductor in mm²

t = short circuit time in seconds

Cross Sectional Area (mm ²)	Short Circuit Current (Amps for 1 second)		Voltage Drop at 50Hz (mV/Am)	
	90°C	110°C	90°C	110°C
0.5	-	65	-	-
0.75	-	99	-	-
1	-	132	-	49.7
1.5	215	198	30.0	31.9
2.5	358	330	16.4	17.4
4	572	528	10.2	10.8
6	858	792	6.81	7.23
10	1430	1320	4.05	4.30
16	2288	2112	2.55	2.71
25	3575	3300	1.62	1.72

150	21450	19800	0.316	0.344
185	26455	24420	0.269	0.296
240	34320	31680	0.227	0.252
300	42900	39600	0.202	0.227
400	57200	52800	0.183	0.208
500	75100	66000	0.170	0.195
630	90090	83160	0.159	0.184

MAXIMUM INSTALLATION TENSION

To calculate the maximum allowable tension of cables during installation the following formula should be applied:

$$50 \times C \times N_c$$

C = cross section area of conductor in mm²

N_c = total number of cores

Maximum tension must not exceed 20,000N (kg = N/9.81)

* All information above is intended as a guide only

CONDUCTOR DATA

CONDUCTOR - CONSTRUCTION

Tricab uses very fine 0.3mm copper wires to ensure maximum flexibility and ease of use. The following table from IEC 60228 provides a comparative analysis.

size (mm ²)	Tricab	class 2	class 5	class 6
0.5	7 X 0.30	7 X 0.30	16 X 0.20	28 X 0.15
0.75	12 X 0.30	7 X 0.37	24 X 0.20	42 X 0.15
1	14 X 0.30	7 X 0.43	32 X 0.20	56 X 0.15
1.5	21 X 0.30	7 X 0.52	30 X 0.25	84 X 0.15
2.5	35 X 0.30	19 X 0.41	50 X 0.25	140 X 0.15
4	56 X 0.30	19 X 0.52	56 X 0.30	224 X 0.15
6	84 X 0.30	19 X 0.64	84 X 0.30	192 X 0.20
10	144 X 0.30	49 X 0.51	80 X 0.40	320 X 0.20
16	224 X 0.30	49 X 0.65	128 X 0.40	512 X 0.20
25	350 X 0.30	84 X 0.62	200 X 0.40	800 X 0.20
35	490 X 0.30	133 X 0.58	280 X 0.40	1120 X 0.20
50	707 X 0.30	133 X 0.69	400 X 0.40	705 X 0.30
70	980 X 0.30	189 X 0.69	356 X 0.50	999 X 0.30
95	1344 X 0.30	259 X 0.69	485 X 0.50	1340 X 0.30
120	1672 X 0.30	336 X 0.67	614 X 0.50	1699 X 0.30
150	2090 X 0.30	592 X 0.69	765 X 0.50	2123 X 0.40
185	2584 X 0.30	494 X 0.69	994 X 0.50	1470 X 0.40
240	3344 X 0.30	627 X 0.70	1125 X 0.50	1905 X 0.40
300	4144 X 0.30	61 X 2.50	1530 X 0.50	2385 X 0.40
400	5488 X 0.30	61 X 2.89	2035 X 0.50	3200 X 0.40
500	6944 X 0.30	61 X 3.20	1768 X 0.50	4010 X 0.40
630	8736 X 0.30	59 X 3.70	3200 X 0.50	5020 X 0.40

CONDUCTOR - DC RESISTANCE

To calculate the DC Resistance of copper conductors for a given temperature (°C), the resistance at 20°C, as detailed must be multiplied by the appropriate correction factor below.

normal cross-sectional Area (mm ²)	Maximum resistance of conductor at 20°C	
	plain copper Ohm/Km	Tinned Copper Ohm/Km
0.5	39.0	40.1
0.75	26.0	26.7
1	19.5	20.0
1.5	13.3	13.7
2.5	7.98	8.21
4	4.95	5.09
6	3.30	3.39
10	1.91	1.95
16	1.21	1.24
25	0.780	0.795
35	0.554	0.565
50	0.386	0.393
70	0.272	0.277
95	0.206	0.210
120	0.161	0.164
150	0.129	0.132
185	0.106	0.108
240	0.0801	0.0817
300	0.0641	0.0654
400	0.0486	0.0495
500	0.0384	0.0391
630	0.0287	0.0292

CONVERSION TABLE - CROSS-SECTIONAL AREA AWG/MCM TO MM²

1250	633.4
1500	760.0
1750	886.7
2000	1013.4

SECURING OF CABLES

Cables should be effectively supported and secured using flame retardant clips, saddles or straps. Special care should be taken to avoid any damage caused by excessive tensioning during installation.

The distance between fixing points should be selected according to cable type and probability of vibration, but should not exceed 450mm.

Where cables are installed below cable trays, ladder or supports, the fixing distance for securing the cable should be in accordance with the table below.

OVERALL DIAMETER OF CABLE EXCEEDING (mm)	NOT EXCEEDING (mm)	NON-ARMOURED CABLES (mm)	ARMOURED CABLES (mm)
-	8	200	250
6	13	250	300
13	20	300	350
20	30	350	400
30	-	400	450

FIRE PERFORMANCE TESTING -

(IEC 60332-3, AS/NZS 1660.5.1) (IEC 60331, AS/NZS 1660.5.5)

(IEC 60754-1&2, AS/NZS 1660.5.3) (IEC 60134-1&2, AS/NZS 1660.5.2)

IEC 60332-3, AS/NZS 1660.5.1 - FLAME RETARDANT TEST

This test is conducted by placing cables together on a vertical ladder tray and then exposing them to the flames of a ribbon burner for the appropriate time (Detailed below).

After removal of the flame, the cables are wiped clean and the charring should not have exceeded 2.5 metres.

Category A:

7 litres of combustible material exposed to flame for 40 minutes

Category B:

3.5 litres of combustible material exposed to flame for 40 minutes

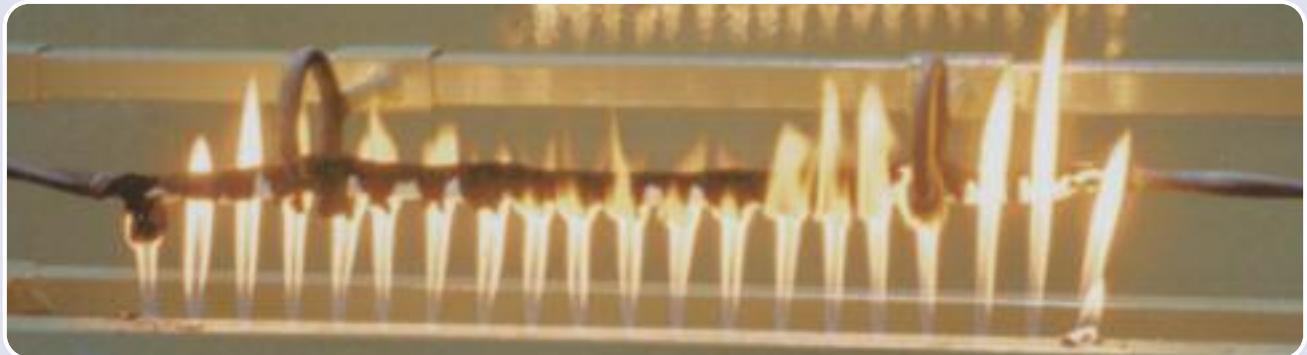

Category C:

1.5 litres of combustible material exposed to flame for 20 minutes

IEC 60331, AS/NZS 1660.5.5 - FIRE TEST

This test is conducted by mounting a 1200mm length of cable over a gas burner and energizing it to its rated voltage. Flames are applied for 90 minutes at a temperature of at least 750°C. After 90 minutes the gas is turned off. After a further 15 minutes the power is disconnected. To pass the requirements of this test, the cable must remain operational both during the 90 minute exposure and the 15 minute cooling period.

IEC 60754-1&2, AS/NZS 1660.5.3 - ACID GAS EMISSION TEST

This test determines the amount of acid gas emitted by burning cables.

IEC 61034-1&2, AS/NZS 1660.5.2 - SMOKE DENSITY TEST

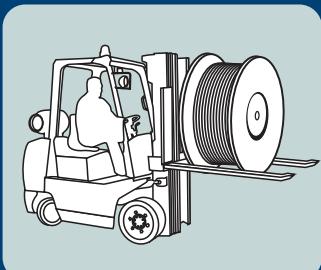

This test measures the smoke emission from cables during fire.

This test is carried out in a 3m cubed enclosure where a cable sample is subjected to fire. The smoke emission and density are measured by a light beam emitted across the inside of the enclosure to a photocell, measuring the amount of luminous transmission received.

RECOMMENDED CABLE DRUM HANDLING PROCEDURES

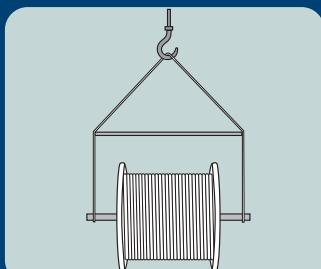

Cradle both reel flanges between forks.

Do not lift by top flange, cable or reel will be damaged

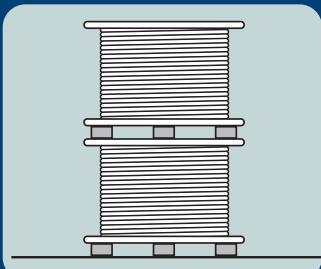

Reels can be hoisted with a shaft extended through both flanges.

Use a spreader bar to prevent bending the reel flanges and mashing the cable.

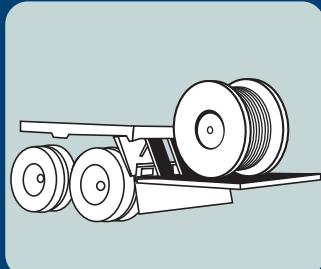

Place spacers under the bottom flange and between reels to create a space to insert the forks

Upended heavy reels will often arrive damaged. Refuse or receive subject to inspection for hidden damage.

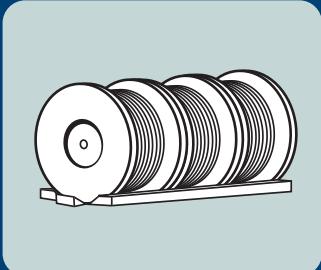

Lower reels from truck using hydraulic gate, hoist or fork lift, LOWER CAREFULLY.

Never drop reels.

Always load with flanges on edge and chock and block securely.

Never allow fork tynes to touch cable surface or reel wrap.
