INDEX TO BRE DIGESTS, GUIDES and INFORMATION PAPERS

January 2013

This leaflet provides a classified subject index to BRE Digests, Good Building Guides, Good Repair Guides and Information Papers. It also includes numerical listings of titles in each series. The publications are available on subscription through BRE Connect and BRE Connect Online and individual copies can be ordered from IHS BRE Press, Willoughby Road, Bracknell, RG12 8FB, 01344 328038, brepres@ihs.com, or online at www.brebookshop.com.

Subscribers to BRE Connect Online receive all new leaflets published each month in pdf format, and have access to the complete catalogue of BRE reports and guides, and many other discounts and benefits.

DIGESTS

Digests are authoritative summaries of the state of the art on specific topics in construction design and technology. They draw on BRE's expertise in these areas and provide essential support for all involved in design, specification, construction and maintenance.

GOOD BUILDING GUIDES

Good Building Guides give construction professionals concise guidance on the principles and practicalities for achieving good-quality building.

GOOD REPAIR GUIDES

Good Repair Guides deal with the defects most commonly encountered in buildings and offer sound advice on putting them right.

INFORMATION PAPERS

Information Papers summarise recent BRE research findings, and give advice on how to apply this information in practice.

SUBJECT INDEX

Building elements and structures

Doors, windows, glazing and cladding	2
Floors, flooring and stairs	2
Masonry, walls and chimneys	2
Roofs and roofing	3
Soils, ground investigation and foundations	3

Design and management

Building design	3
Procurement, maintenance, site organisation and waste management	4

Environment and services

Air quality, radon and ventilation	4
Condensation and dampness	5
Electrical, lighting, acoustics and control systems	5
Energy, insulation and air conditioning	5
Sustainability and green issues	6
Water supply, drainage and sanitation	6
Wind, floods and climate	6

Fire and security**Materials**

Bricks, mortar, render, plaster and stone	7
Composites, metals, paints, adhesives and sealants	7
Concrete	8
Timber	8

LISTINGS

Good Repair Guides	9
Good Building Guides	9
Pollution Control Guides	10
In-situ Ground Testing Guides	11
Digests	11
Special Digests	13
Information Papers	13

UPDATING

IHS BRE Press produces regular catalogues of new and best-selling titles, and email newsletters about new publications. Pdfs of most of our titles can be downloaded from www.brebookshop.com.

To receive our regular email publications update, please contact brepress@ihs.com.

BRE CONNECT SUBSCRIBERS

To claim your subscriber discount (plus your extra 10% discount before 31st May 2013), quote: AP295, then order via email, phone, fax or post. (We are unable to apply subscriber discount online).

How to order

- t: +44 (0)1344 328038
- f: +44 (0)1344 328005
- e: brepress@ihs.com
- www.brebookshop.com

SUBJECT INDEX

This index lists all BRE Digests, Good Building Guides and Good Repair Guides in print, and Information Papers published from 2001, grouped under 19 subject headings.

BUILDING ELEMENTS AND STRUCTURES**Doors, windows, glazing and cladding**

Double glazing for heat and sound insulation DG379 1993	
Factory glazed windows 2005	
Part 1. Introduction and the glazing process DG497/1	
Part 2. Transport, storage and installation DG497/2	
Hot air repair of PVC-U profiles IP12/01 2001	
Hot air repair of PVC-U window and door frames GR31 2001	
Impact standards for glass IP1/05 2005	
Installing domestic automatic door controls CG48 2001	
Installing domestic automatic window controls CG49 2001	
Insulated external cladding systems CG31 1999	
Insulating glazing units DG453 2000	
Level external thresholds: reducing moisture penetration and thermal bridging GG47 2001	
Metal cladding: assessing the thermal performance of built-up systems which use 'Z' spacers IP10/02 2002	
Plastics external glazing DG430 1998	
PVC-U windows DG404 1995	
Reinforced plastics cladding panels DG161 1974	
Repairing or replacing lintels GG1 1992	
Repairing timber windows 1997	
Part 1. Investigating defects and dealing with water leakage GR10/1	
Part 2. Dealing with draughty windows, condensation in sealed units, operating problems, and deterioration of frames GR10/2	
Selecting windows by performance DG377 1992	
Wall cladding defects and their diagnosis DG217 1977	
Wall cladding: designing to minimise defects due to inaccuracies and movements DG223 1979	
Weathering of white external PVC-U DG440 1999	
Whole life performance of domestic automatic window controls IP3/02 2002	

Floors, flooring and stairs

Domestic floors: repairing or replacing floors and flooring 1997	
Part 1. Construction, insulation and damp-proofing GG28/1	
Part 2. Concrete floors, screeds and finishes GG28/2	
Part 3. Timber floors and decks GG28/3	
Part 4. Magnesite, tiles, slabs and screeds GG28/4	
Part 5. Wood blocks and suspended timber GG28/5	
Flooring, paving and setts – requirements for safety in use IP10/00 2000	
Heat losses through ground floors DG145 1972	
Increasing the fire resistance of existing timber floors DG208 1988	
Industrial platform floors: mezzanine and raised storage DG437 1999	
Insulating ground floors GG45 2001	
Joist hangers GG21 1996	
Proprietary nosings for non-domestic stairs IP15/03 2003	
Repairing and replacing ground floors GR17 1998	
Safer floors: guidance on specifying flooring for internal and external safety in domestic buildings IP10/07 2007	

Masonry, walls and chimneys

AAC 'aircrete' blocks and masonry 2002	
Part 1. DG468/1	
Part 2. DG468/2	
Aircrete: thin joint mortar systems DG432 1998	
Aircrete tongue and grooved block masonry IP7/05 2005	
Building brickwork or blockwork retaining walls GG27 1996	
Building damp-free cavity walls GG33 1999	
Building reinforced, diaphragm and wide plan freestanding walls GG19 1994	
Building simple plan brick or blockwork freestanding walls GG14 1994	
Cleaning exterior masonry 2000	
Part 1. Developing and implementing a strategy DG449/1	
Part 2. Methods and materials DG449/2	

Cleaning external walls of buildings 2000
 Part 1. Cleaning methods GR27/1
 Part 2. Removing dirt and stains GR27/2
 Corrosion of metal components in walls DG461 2001
 Domestic chimneys for solid fuel – flue design and installation GG46 2001
 Dynamic stiffness of wall ties used in masonry cavity walls: measurement procedure IP3/01 2001
 Earth, clay and chalk walls: inspection and repair methods GR35 2006
 Freestanding brick walls – repairs to copings and cappings GG17 1993
 Installing wall ties GG41 2000
 Installing wall ties in existing construction DG329 2000
 Insulating masonry cavity walls 2001
 Part 1. Techniques and materials GG44/1
 Part 2. Principal risks and guidance GG44/2
 Insulating solid masonry walls GG50 2002
 Masonry and concrete structures: measuring in-situ stress and elasticity using flat jacks DG409 1995
 Measuring the compressive strength of masonry materials: the screw pull-out test DG421 1997
 Principles of masonry conservation management DG502 2007
 Providing temporary support during work on openings in external walls GG15 1992
 Removing internal loadbearing walls in older dwellings GG20 1999
 Repairing brick and block freestanding walls GR28 2000
 Repairing brick and block masonry DG359 1991
 Repairing chimneys and parapets GR15 1998
 Repairing damage to brick and block walls GR3 1996
 Replacing masonry wall ties GR4 1996
 Replacing wall ties DG401 1995
 Repointing external brickwork walls GR24 1999
 Retro-installation of bed joint reinforcement in masonry GG62 2004
 Supporting temporary openings GR25 1999
 Surveying brick or blockwork freestanding walls GG13 1992
 Surveying masonry chimneys for repair or rebuilding GG2 1990
 Temporary support for openings in external walls: assessing load GG10 1991
 Testing bond strength of masonry DG360 1991
 Thin layer mortar masonry GG58 2003
 Ties for masonry walls: a decade of development IP11/00 2000
 Untied cavity party walls: structural performance when using AAC blockwork IP1/99 1999

Roofs and roofing

Bracing trussed rafter roofs GG8 1991
 Building a new felted flat roof GG36 1999
 Cool roofs and their application in the UK IP13/10 2010
 Designing roofs for climate change: modifications to good practice guidance DG499 2006
 Designing roofs with safety in mind IP7/04 2004
 Erecting, fixing and strapping trussed rafter roofs GG16 1993
 Flat roof design
 Part 1. Bituminous roofing membranes DG419 1996
 Part 2. The technical options DG312 1986
 Part 3. Thermal insulation DG324 1987
 Flat roofs: assessing and making roof repairs
 Part 1. Assessing bitumen felt and mastic asphalt roofs for repair GR16/1 1998
 Part 2. Making repairs to bitumen felt and mastic asphalt roofs GR16/2 1988
 Insulated profiled metal roofs GG43 2000
 Insulating roofs at rafter level: sarking insulation GG37 2000
 Loft conversion
 Part 1. Structural considerations GG69/1 2006
 Part 2. Safety, insulation and services GG69/2 2006
 Re-covering old timber roofs DG351 1990
 Re-covering pitched roofs GR14 1998
 Roof loads due to local drifting of snow DG439 1999
 Safety considerations in designing roofs DG493 2005
 Site-cut pitched timber roofs
 Part 1. Design GG52/1 2002
 Part 2. Construction GG52/2 2002
 Slate and tile roofs: avoiding damage from aircraft wake vortices DG467 2002
 Stability under wind load of loose-laid external roof insulation boards DG295 1985
 Structural appraisal of buildings with long-span roofs DG282 1984
 Swimming pool roofs: minimising the risk of condensation using warm-deck roofing DG336 1988

Tiling and slating pitched roofs
 Part 1. Design criteria, underlays and battens GG64/1 2005
 Part 2. Plain and profiled clay and concrete tiles GG64/2 2005
 Part 3. Natural and manmade slates GG64/3 2005
 Ventilated and unventilated cold pitched roofs GG51 2002
 Ventilating thatched roofs GG32 1999

Soils, ground investigation and foundations

A simple guide to in-situ ground testing 2003
 Part 1. What is it and why do it? IS1
 Part 2. Cone penetration testing IS2
 Part 3. Flat dilatometer testing IS3
 Part 4. Dynamic probing IS4
 Part 5. Pressuremeter testing IS5
 Part 6. Large-diameter plate loading tests IS6
 Part 7. Geophysical testing IS7
 Assessment of damage in low-rise buildings DG251 1995
 Basement construction and waterproofing 2007
 Part 1. Site investigation and preparation GG72/1
 Part 2. Construction, safety, insulation and services GG72/2
 Building on brownfield sites
 Part 1. Identifying the hazards GG59/1 2003
 Part 2. Building on brownfield sites: reducing the risks GG59/2 2004
 Contaminated land: ingress of organic vapours into buildings DG482 2004
 Cracks caused by foundation movement GR1 1996
 Damage to buildings caused by trees GR2 1996
 Desiccation in clay soils DG412 1996
 Development of sites containing expansive ferrous slags IP8/05 2005
 Foundations for low-rise building extensions GG53 2002
 Hardcore for supporting ground floors of buildings 2011
 Part 1. Selecting and specifying materials DG522/1
 Part 2. Placing hardcore and the legacy of problem materials DG522/2
 Low-rise building foundations on soft ground DG471 2002
 Low-rise building foundations: the influence of trees in clay soils DG298 1999
 Low-rise buildings on fill
 Part 1. Classification and load-carrying characteristics DG427/1 1997
 Part 2. Site investigation, ground movement and foundation design DG427/2 1998
 Part 3. Engineered fill DG427/3 1998
 Low-rise buildings on shrinkable clay soils 1993
 Part 1. DG240
 Part 2. DG241
 Monitoring building and ground movement by precise levelling DG386 1993
 Optimising ground investigation DG472 2002
 Pfa grouts for stabilising mine workings IP10/06 2006
 Principal drivers for reusing foundations IP5/07 2007
 Pruning trees to reduce water use: summaries of research; conclusions and recommendations IP7/06 2006
 Simple foundations for low-rise housing
 Part 1. Site investigation GG39/1 2000
 Part 2. 'Rule of thumb' design GG39/2 2001
 Part 3. Groundworks: getting it right GG39/3 2002
 Site investigation for low-rise building
 Part 1. Desk studies DG318 1987
 Part 2. Procurement DG322 1987
 Part 3. Soil description DG383 1993
 Part 4. The walk-over survey DG348 1989
 Part 5. Trial pits DG381 1993
 Part 6. Direct investigations DG411 1995
 Simple measuring and monitoring of movement in low-rise buildings 1989
 Part 1. Cracks DG343
 Part 2. Settlement, heave and out-of-plumb DG344
 Slurry trench cut-off walls to contain contamination DG395 1994
 Soakaway design DG365 1991
 Sustainability in foundations IP11/10 2010
 Tilt of low-rise buildings with particular reference to progressive foundation movement DG475 2003
 Timber piles and foundations DG479 2003
 Underpinning DG352 1993

DESIGN AND MANAGEMENT

Building design

Access to buildings DG505 2008
 An introduction to building with Structural Insulated Panels (SIPs) IP13/04 2004
 An introduction to structural dynamic comfort criteria IP21/12 2012

- Applying the code for sustainable homes on the BRE Innovation Park (4-part set) 2008
- Part 1. Lessons learnt about building fabric IP9/08/1
 - Part 2. Lessons learnt about energy sources, overheating and ventilation IP9/08/2
 - Part 3. Lessons learnt about water use, harvesting, recycling and drainage IP9/08/3
 - Part 4. Lessons learnt about architecture, construction and material sourcing IP9/08/4
- Bats and refurbishment GR36 2009
- Bird, bee and plant damage to buildings DG418 1996
- Building performance feedback: getting started DG478 2003
- Building without cold spots GG35 1999
- Common defects in low-rise traditional housing DG268 1982
- Connecting walls and floors 1997
- Part 1. A practical guide GG29/1
 - Part 2. Design and performance GG29/2
- Consumer feedback on low-carbon housing IP14/10 2010
- Control of lichens, moulds and similar growths DG370 1992
- Damage to structures from ground-borne vibration DG403 1995
- Delivering a successful demonstration project IP20/10 2010
- Flood-resilient building) 2012
- Part 1. Legislation, planning, flood risk assessment and performance of buildings DG523/1
 - Part 2. Building in flood-risk areas and designing flood-resilient buildings DG523/2
- Habitability guidelines for existing housing GG9 1991
- Helping visually impaired people in their homes: assistive technology IP8/03 2003
- Lessons learned from the Barratt Green House IP3/09 2009
- Loads generated by jumping crowds: experimental assessment IP4/02 2002
- Masonry walls and beam-and-block floors U-values and building regulations SD4:2007
- Modern methods of construction (MMC) in housing 2007
- Part 1. Drivers and barriers to their use IP3/07/1
 - Part 2. Planning for manufactured housing IP3/07/2
 - Part 3. Designing for manufacture IP3/07/3
 - Part 4. Successful development and manufacture of MMC products IP3/07/4
- Naturally innovative: using biomimetics in construction IP11/07 2007
- New build and refurbishment in the sustainable communities plan IP2/08 2008
- Outline guide to assessment of traditional housing for rehabilitation GG6 1990
- Permanent cantilever grandstands: dynamic response IP5/00 2000
- Prefabricated housing in the UK 2001
- Part 1. A case study – Murray Grove, Hackney IP16/01/1
 - Part 2. A case study – CASPAR II, Leeds IP16/01/2
 - Part 3. A summary paper IP16/01/3
- Prefabricated relocatable extensions: evaluating their use for people with disabilities IP7/07 2007
- Quantifying the cost of poor housing IP16/10 2010
- Refurbishing Victorian housing IP9/06 2006
- Retractable grandstands: dynamic response IP4/00 2000
- Reducing the risk of pest infestations in buildings DG415 1996
- Relocatable buildings: structural design, construction and maintenance DG374 2002
- Static load testing: concrete floor and roof structures within buildings DG402 1995
- Structural assessment of existing large panel system (LPS) dwelling blocks for accidental loads DG526 2012
- Structural appraisal of existing buildings, including for a material change of use DG366 2012
- Structural composite connections for sequential seismic and fire performance IP2/09 2009
- Structural design in architecture DG12 1960
- Supplementary guidance for assessment of timber-framed houses 1993
- Part 1. Examination GG11
 - Part 2. Interpretation GG12
- Sustainable housing refurbishment IP18/10 2010
- Sustainable refurbishment of non-traditional housing and pre-1920s solid wall housing IP3/10 2010
- Sustainable refurbishment of the BRE Victorian Terrace 2011
- Part 1. Design philosophy IP12/11/1
 - Part 2. The construction process IP12/11/2
- Temporary demountable grandstands: dynamic response IP3/00 2000
- The response of structures to dynamic crowd loads DG426 2004
- Timber frame dwellings. Conservation of fuel and power: AD L1A guidelines SD2:2006
- U-values for light steel-frame construction DG465 2002
- Why do buildings crack? DG361 1991
- ## Procurement, maintenance, site organisation and waste management
- Achieving cost effective responsive maintenance IP14/05 2005
- A guide to certification and approval for engineers and designers IP5/08 2008
- Balanced Value for sustainable procurement IP6/06 2006
- Better building – integrating the supply chain: a guide for clients and their consultants DG450 2000
- Cleaning buildings: legislation and good practice DG448 2000
- Composting in the construction industry IP3/05 2005
- Construction and demolition waste 2003
- Part 1. GG57/1
 - Part 2. GG57/2
- Construction logistics: an introduction DG459 2001
- Construction site communication 2003
- Part 1. General GG54/1
 - Part 2. Masonry GG54/2
- Construction site packaging wastes: a market position report IP8/02 2002
- Delivering a sustainable masterplan IP4/10 2010
- Handover of Office Building Operations protocol (HOBO) DG474 2002
- Lists of excluded materials: a change in practice DG425 1997
- Non-ferrous metal wastes as aggregates in highway construction IP8/06 2006
- Offsite construction: an introduction GG56 2003
- Reclamation and recycling of building materials: industry position report IP7/00 2000
- Recycling fibre reinforced polymers in the construction industry IP4/04 2004
- The Construction Products Regulation and CE marking IP13/12
- The Quality Mark Scheme GG55 2003
- Using small volume wastes in construction IP9/05 2005
- Waste minimisation on a construction site DG447 2000
- Whole building commissioning 2004
- Part 1. A guide for clients IP8/04/1
 - Part 2. A guide for designers IP8/04/2
 - Part 3. A guide for specifiers IP8/04/3
 - Part 4. A guide for facilities managers IP8/04/4
- Working with local businesses and residents GG71 2007
- ## ENVIRONMENT AND SERVICES
- ### Air quality, radon and ventilation
- Achieving airtightness 2006
- Part 1. General principles GG67/1
 - Part 2. Practical guidance on techniques – floors, walls and roofs GG67/2
 - Part 3. Practical guidance on techniques – windows and doors, sealing methods and materials GG67/3
- Airtightness in UK dwellings IP1/00 2000
- Airtightness of ceilings: energy loss and condensation risk IP4/06 2006
- Background ventilators for dwellings IP2/03 2003
- Buildings and radon GG25 1996
- Carbon monoxide detectors GG30 1999
- CFCs in buildings DG358 1991
- Continuous mechanical ventilation in dwellings: design, installation and operation DG398 1994
- Humidistat controlled extract fans: performance in dwellings IP5/99 1999
- Improving air quality in homes with supply air windows IP6/03 2003
- Improving ventilation in housing GR21 1998
- Maintaining good air quality in your home IP9/04 2004
- Natural ventilation in non-domestic buildings DG399 1994
- Pollution control guides: controlling emissions of particles, vapour and noise on construction sites 2003
- Part 1. Pre-project planning and effective management PG1
 - Part 2. Site preparation, demolition, earthworks and landscaping PG2
 - Part 3. Haulage routes, vehicles and plant PG3
 - Part 4. Materials handling, storage, stockpiles, spillage and disposal PG4
 - Part 5. Fabrication processes and internal and external finishes PG5
- Positive input ventilation IP12/00
- Radon protection for new domestic extension and conservatories GG73 2008

Radon protection for new dwellings GG74 2008
 Radon protection for new large buildings GG75 2009
 Radon solutions for homes
 Part 1: Improving underfloor ventilation GR37/1 2012
 Ventilation and indoor air quality in schools IP6/05 2005
 Ventilation rate measurement IP13/11 2011
 Ventilators: ventilation and acoustic effectiveness IP4/99 1999
 VOC emissions from building products 2002
 Part 1. Sources, testing and emission data DG464/1
 Part 2. Control, evaluation and labelling schemes DG464/2
 VOC emissions from flooring adhesives: European test methods and labelling IP12/03 2003

Condensation and dampness

Assessing moisture in building materials 2002
 Part 1. Sources of moisture GR33/1
 Part 2. Measuring moisture content GR33/2
 Part 3. Interpreting moisture data GR33/3
 Condensation in roofs DG180 1975
 Damp-proof courses DG380 1993
 Diagnosing the causes of dampness GR5 1997
 Drying out buildings DG163 1974
 Estimation of thermal and moisture movements and stresses DG227 1979
 Estimation of thermal and moisture movements and stresses DG228 1979
 Interstitial condensation and fabric degradation DG369 1992
 Modelling and controlling interstitial condensation in buildings IP2/05 2005
 Modelling condensation and airflows in pitched roofs IP5/06 2006
 Remedying condensation in domestic pitched tiled roofs GR30 2001
 Rising damp in walls: diagnosis and treatment DG245 2007
 Surface condensation and mould growth in traditionally-built dwellings DG297 1985
 Temperature and humidity in batten voids IP20/01 2001
 Treating condensation in houses GR7 1997
 Treating dampness in basements GR23 1999
 Treating rain penetration in houses GR8 1997
 Treating rising damp in houses GR6 1997

Electrical, lighting, acoustics and control systems

An introduction to intelligent buildings 2008
 Part 1. Benefits and technology IP13/08/1
 Part 2. Legislation, planning and design IP13/08/2
 Control of solar shading IP12/02 2002
 Dealing with poor sound insulation between new dwellings IP14/02 2002
 Developments in innovative lighting IP9/00 2000
 Digitally enabled communities IP8/10 2010
 Dwellings and energy efficient lighting: new regulation Part L IP5/02 2002
 Electrical interference in buildings DG335 1988
 Electronic tagging and wireless technologies 2002
 Part 1. Application in the construction industry IP16/02/1
 Part 2. An overview IP16/02/2
 Estimating daylight in buildings DG309 1986
 Hospitals in the best light: an introduction to hospital lighting IP14/00 2000
 Impact of horizontal shading devices on peak solar gains through windows IP17/03 2003
 Improving sound insulation 1999
 Part 1. GR22/1
 Part 2. GR22/2
 Improving the sound insulation of separating walls and floors DG293 1985
 Installing BMS to meet electromagnetic compatibility requirements DG424 1997
 Installing smart home digital networks GG77 2009
 Insulation against external noise DG338 1988

Internet Protocol: an introductory guide IP1/07 2007
 Minimising noise from domestic fan systems: fan-assisted radon mitigation systems GG26 1996
 Lighting 2004
 Part 1. General principles GG61/1
 Part 2. Domestic and exterior GG61/2
 Part 3. Non-domestic GG61/3
 Photoelectric control of lighting: design, setup and installation issues IP2/99 1999
 Photovoltaics: integration into buildings DG438 1999
 Prefabricated power cabling for buildings: procuring, installing and testing DG456 2001
 Protecting buildings against lightning DG428 1998
 Rain noise from glazed and lightweight roofing IP2/06 2006
 Reducing impact and structure-borne sound in buildings IP4/01 2001
 Retrofitting solar shading IP11/02 2002
 Selecting lighting controls DG498 2006
 Site layout planning for daylight IP23/12 2012
 Site layout planning for sunlight and solar gain IP22/12 2012
 Smart meters and smart energy networks for dwellings IP2/12
 Sound insulation: basic principles DG337 1994
 Specifying LED lighting IP15/10 2010
 Standardised and prefabricated wiring for buildings 2001
 Part 1. Use in building services IP15/01/1
 Part 2. Case studies IP15/01/2
 Traffic noise and overheating in offices DG162 1974
 Whole life performance of domestic automatic door controls IP2/02 2002

Energy, insulation and air conditioning

Air as a refrigerant in air conditioning systems in buildings IP21/00 2000
 Ammonia refrigerant in buildings: minimising the hazards IP18/00 2000
 An introduction to PassivHaus IP 12/08 2008
 Assessing the effects of thermal bridging at junctions and around openings IP1/06 2006
 Biomass systems IP7/11 2011
 Building-integrated photovoltaic systems IP11/12 2012
 Condensing boilers DG339 1988
 Determining the minimum thermal resistance of cavity closers IP8/08 2008
 Domestic energy use and carbon emissions: scenarios to 2050 IP16/05 2005
 Dynamic insulation for energy saving and comfort IP3/03 2003
 Energy efficiency in dwellings DG355 1990
 Energy in schools: developing and implementing an energy management strategy IP2/11 2011
 Free cooling with displacement ventilation IP6/02 2002
 Funding renewable energy projects IP18/12 2012
 Ground source heat pumps IP2/10 2010
 Improving energy efficiency 1999
 Part 1. Thermal insulation GR26/1
 Part 2. Boilers and heating systems, draughtstripping GR26/2
 Installing thermal insulation: good site practice 2006
 Part 1. GG68/1
 Part 2. GG68/2
 Large-scale low-carbon heating IP9/11 2011
 Making use of carbon emissions in the built environment IP25/12 2012
 Mechanical installation of roof-mounted photovoltaic systems DG495 2005
 Micro-wind turbines on tall buildings IP1/10 2010
 Modelling the performance of thermal mass IP6/01 2001
 Perimeter chilled beams IP11/04 2004
 Photovoltaic systems on dwellings IP8/11 2011
 Planning decentralised energy systems in large new developments IP22/10 2010
 Potential for reducing carbon emissions from commercial and public-sector buildings IP3/12 2012
 Reliability and performance of solar-collector systems DG254 1981
 Ground source heat pumps and low-temperature systems IP10/11 2011
 SAP for beginners IP10/10 2010
 SBEM for non-domestic buildings IP7/10 2010
 Small scale, building integrated, wind power systems IP12/05 2005
 Solar energy in urban areas IP5/01 2001
 Solar thermal systems IP11/11 2011
 The Carbon Performance Rating for offices DG457 2001
 The importance of energy quality in matching supply and demand IP5/12 2012
 The performance of district heating in new developments IP3/11 2011
 Thermal mass in office buildings 2001
 Part 1. An introduction DG454/1
 Part 2. Design criteria DG454/2
 The scope for reducing carbon emissions from housing IP15/05 2005

Sustainability and green issues

A guide to GreenPrint IP6/10 2010

Assessing environmental impacts of construction: industry consensus, BREEAM and UK Ecopoints DG446 2000

Assessing the sustainability of office refurbishment with BREEAM IP19/11 2011

Biodiversity offsetting for developments IP10/12 2012

Carbon emission reductions as a driver for economic regeneration IP5/10 2010

Carbon footprinting and labelling of construction products IP5/11 2011

Carbon reduction commitment IP7/09 2009

Costing sustainability: how much does it cost to achieve BREEAM and Ecohomes ratings IP4/05 2005

Creating a funding mechanism for UK carbon reduction projects IP17/10 2010

Delivering sustainability objectives through planning IP3/08 2008

Delivering sustainable development in the built environment IP4/09 2009

Environmental benchmarking for property portfolio managers IP1/01 2001

Environmental sustainability in bridge management IP14/04 2004

Environmental weightings: their use in the environmental assessment of construction products IP4/07 2007

Green buildings revisited 2000

Part 1. Small projects IP13/00/1

Part 2. Large projects IP13/00/2

LCA and REACH: The relationship between life-cycle assessment and the regulation on the registration, evaluation, authorisation and restriction of chemicals IP7/12 2012

Life cycle impacts of timber: a review of the environmental impacts of wood products in construction DG470 2002

LIST (Low Impact Shopfitting Tool) for designing greener shopfitting display equipment IP1/11 2011

Local authorities' performance on sustainable construction IP7/01 2001

Managing sustainable construction AP146 2002

Measuring the wellbeing benefits of interior materials IP20/12 2012

Performance and service life in the Environmental Profiles Methodology and Green Guide to Specification IP1/09 2009

Reducing the effects of climate change by roof design DG486 2004

Refurbishment or redevelopment of office buildings? 2002

Part 1. Sustainability comparisons IP9/02/1

Part 2. Sustainability case histories IP9/02/2

Responsible sourcing of construction products IP6/09 2009

Smart growth IP12/12 2012

Sustainability at BRE IP8/12 2012

Sustainability indicators for utilities IP21/01 2001

Sustainability lessons from private finance and similar private initiatives IP13/02 2002

Sustainability strategies for healthcare estates IP24/12 2012

Sustainable buildings 2003

Part 1. Benefits for occupiers IP13/03/1

Part 2. Benefits for designers IP13/03/2

Part 3. Benefits for investors and developers IP13/03/3

Part 4. Benefits for constructors IP13/03/4

Sustainable information technology IP19/12 2012

The price of sustainable schools IP1/08 2008

Whole life costing and life-cycle assessment for sustainable building design DG452 2000

Whole Life Value: sustainable design in the built environment IP10/04 2004

Water supply, drainage and sanitation

Access to domestic underground drainage systems DG292 1984

Below-ground drainage systems CG78 2010

Dealing with noisy plumbing GR32 2002

Disposing of rainwater CG38 2000

Drainage design for buildings with reduced water use IP1/04 2004

Gravity drainage systems for buildings CG76 2009

Preventing hot water scaldings in bathrooms: using TMVs IP14/03 2003

Protecting pipes from freezing CG40 2000

Provision of sanitary appliances and their space requirements CG79 2010

Rainwater harvesting for domestic properties GG82 2012

Reed beds 2000

Part 1. Application and specification GG42/1

Part 2. Design, construction and maintenance GG42/2

Repairing and replacing rainwater goods GR9 1997

Sanitary pipework 1981

Part 1. Design basis DG248

Part 2. Design of pipework DG249

Self-sealing waste valves for domestic use: an assessment IP8/07 2007

Unvented domestic hot water systems DG308 1986

Water conservation: low flow showers and flow restrictors IP2/00 2000

Water services for domestic properties GG80 2010

Weathering of plastics pipes and fittings IP8/01 2001

Wind, floods and climate

Building in winter GG34 1999

Building overseas in warm climates DG302 1985

Climate and site development 1990

Part 1. General climate of the UK DG350/1

Part 2. Influence of microclimate DG350/2

Part 3. Improving microclimate through design DG350/3

Climate change GG63 2004

Designing urban streets to minimise heat island effects IP19/10 2010

Micro-wind turbines on house roofs IP4/08 2008

New materials in hot climates DG382 1993

Repairing flood damage 1997

Part 1. Immediate action GR11/1

Part 2. Ground floors and basements GR11/2

Part 3. Foundations and walls GR11/3

Part 4. Services, secondary elements, finishes, fittings GR11/4

Repairing frost damage 1998

Part 1. Roofing GR20/1

Part 2. Walls GR20/2

Static and dynamic wind loads on building-mounted microwind turbines IP14/12 2012

The assessment of wind loads

Part 1. Background and method DG346/1 1989

Part 2. Classification of structures DG346/2 1989

Part 3. Wind climate in the United Kingdom DG346/3 1989

Part 4. Terrain and building factors and gust peak factors DG346/4 1989

Part 5. Assessment of wind speed over topography DG346/5 1989

Part 6. Loading coefficients for typical buildings DG346/6 1989

Part 7. Wind speeds for serviceability and fatigue assessments DG346/7 1989

Part 8. Internal pressures DG346/8 1990

Wind actions on buildings and structures DG406 1995

Wind around tall buildings DG390 1994

Wind loading on buildings 1999

Part 1. Brief guidance for using BS 6399-2:1997 DG436/1

Part 2. BS 6399-2:1997 worked examples – effective wind speeds for a site, and loads on a two-storey house DG436/2

Part 3. BS 6399-2:1997 worked examples – loads on a portal frame building and on an office tower on a podium DG436/3

Wind loads on canopy roofs DG284 1984

Wind loads on roof-based photovoltaic systems DG489 2004

Wind loads on temporary stage decks DG483 2004

Wind loads on unclad structures SD5 2004

Wind microclimate around buildings DG520 2011

Wind scour of gravel ballast on roofs DG311 1986

FIRE AND SECURITY

An introduction to the use of fire modelling IP12/10 2010

Assessing the fire performance of existing reinforced concrete flooring systems IP9/12 2012

BR135: Annex B: performance criteria and classification method of BS 8414-4:2005 DG501 2007

Domestic smoke alarms DG525 2012

Dust explosions DG288 1984

External fire performance of roofs DG528 2012

Evacuation modelling and human behaviour in fire DG516 2010

Fire doors DG524 2012

Fire engineering in tunnels DG509 2009

Fire modelling DG367 2004

Fire modelling with computational fluid dynamics DG511 2009

Fire performance of light steel-framed buildings IP6/11 2011

Fire performance of Structural Insulated Panel systems IP21/10 2010

Fire risks from combustible cavity insulation DG294 1985

Fixed gas extinguishing systems for fire protection DG513 2009

Installing fire-resisting ductwork and dampers GG81 2011

Lessons learned from real fires DG515 2010

Passive and reactive fire protection to structural steel IP6/12 2012

Precast Hollowcore slabs in fire IP5/03 2003

Residential sprinklers for fire protection

Part 1. Introduction DG519/1 Revised 2012

Part 2. Installation DG519/2 Revised 2012

focus on building

Get **clear technical advice and building solutions** from a source you can trust

This CD-ROM compilation of BRE Good Building and Repair Guides from IHS BRE Press gives you access to a huge training resource of practical guidance and expertise from BRE, the UK's leading centre of excellence on the built environment. Containing over 150 Good Building and Repair Guides, the CD-ROM covers a range of topics, including:

- ▶ Water services
- ▶ Basement construction
- ▶ Installing thermal insulation
- ▶ Fixing and finishing plasterboard
- ▶ Roofing
- ▶ Achieving airtightness
- ▶ Loft conversion
- ▶ Radon protection
- ▶ Plastering

A vast reference library of concise and practical advice for only £150 + VAT

Risks of dust fires and explosions IP14/08 2008
Safe and secure town centres at night IP10/08 2008
Safe as houses? DG458 2001
Security fog generators DG506 2008
Selecting electronic security systems IP11/12 2012
Self heating and spontaneous combustion IP11/08 2008
Smoke detection in high ceiling spaces
Part 1. Introduction, literature review and modelling IP15/12/1 2012
Part 2. Fire tests and conclusions IP15/12/2 2012
Sprinkler systems for fire protection of commercial and industrial buildings DG518 2010
Steel structures supporting composite floor slabs: design for fire DG462 2001
Structural fire engineering design – Introduction DG484 2004
Structural fire engineering design 2004
Part 1. Aspects of life safety DG490
Part 2. Fire and thermal response DG488
Part 3. Fire development DG485
Structural fire engineering design – Materials behaviour 2004
Part 1. Concrete DG487/1
Part 2. Steel DG487/2
Part 3. Masonry DG487/3
Part 4. Timber DG487/4
Wireless fire detection and European regulations IP6/08 2008

MATERIALS

Bricks, mortar, render, plaster and stone

Assessing external rendering for replacement or repair GG23 1995
Bricks, blocks and masonry made from aggregate concrete 2001
Part 1. Performance requirements DG460/1
Part 2. Appearance and environmental aspects DG460/2
Building masonry with lime-based mortars GG66 2005
Building mortar DG362 1991
Choosing external rendering GG18 1994

Clay bricks and clay brick masonry 1999
Part 1. DG441/1
Part 2. DG441/2
Cleaning exterior masonry 2000
Part 1. Developing and implementing a strategy DG449/1
Part 2. Methods and materials DG449/2
Cleaning exterior masonry: pretreatment assessment of a stone building IP9/99 1999
Cleaning exterior masonry: assessing cleaning of a brick-built church IP10/99 1999
Conservation and cleaning of masonry
Part 1. Stonework DG508/1 2008
Part 2. Brickwork, blockwork and terracotta DG508/2 2009
Part 3. Renders, plasters and stucco DG508/3 2011
Lightweight veneer stone cladding panels IP10/01 2001
Perforated clay bricks DG273 1983
Plasterboard 2007
Part 1. Types and their applications GG70/1
Part 2. Fixing and finishing non-separating walls and floors GG70/2
Part 3. Fixing and finishing separating and compartment walls and floors GG70/3
Plastering and internal rendering 2005
Part 1. Design and specification GG65/1
Part 2. Workmanship GG65/2
Proprietary renders IP16/03 2003
Repairing external rendering GG24 1995
Replacing failed plaster GG7 1991
Replacing plasterwork GR18 1998
Selecting natural building stones DG420 1997
Unfired clay masonry IP16/11 2011

Composites, metals, paints, adhesives and sealants

Advanced polymer composites in construction IP7/99 1999
Architectural use of polymer composites DG442 1999
Choosing wood adhesives DG340 1989
Corrosion of metals by wood DG301 1985
EN 927: the new European Standard for exterior wood coatings DG466 2002
Fibre reinforced polymer materials in construction IP5/04 2004

Fibre reinforced polymers in construction: durability IP10/03 2003
 Fibre reinforced polymers in construction: predicting weathering IP11/03 2003
 Internal painting: tips and hints GR19 1998
 Low-solvent primers: performance in construction steelwork IP16/00 2000
 Maintaining exterior wood finishes GG22 1995
 Natural fibre installation IP18/11 2011
 Painting exterior wood DG422 1997
 Planned maintenance painting: improving value for money IP7/03 2003
 Refixing ceramic wall tiles to internal walls GR29 2001
 Repair and maintenance of FRP structures GR34 2003
 Selecting building sealants with ISO 11600 DG463 2002
 Selecting gaskets for construction joints DG469 2002
 Stainless steel as a building material DG349 1989
 Straw bale IP15/11 2011
 The performance and use of coatings with low solvent content IP8/99 1999
 The performance of fibre cement slates: effects of condensation IP19/01 2001
 Wood plastic composites and plastic lumber DG480 2004
 Wood plastic composites: market drivers and opportunities in Europe IP2/04 2004
 Zinc-coated steel DG305 1986

Concrete

Accelerated carbonation testing of concrete IP20/00 2000
 Alkali-activated binder concretes in construction IP4/11 2011
 Alkaline ash binders IP9/10 2010
 Alkali-silica reaction in concrete 2004
 Part 1. Background to the guidance notes DG330/1
 Part 2. Detailed guidance for new construction DG330/2
 Part 3. Worked examples DG330/3
 Part 4. Simplified guidance for new construction using normal reactivity aggregates DG330/4
 Blastfurnace slag and steel slag: their use as aggregates IP18/01 2001
 Carbonation of concrete and its effect on durability DG405 1995
 Cements with lower environmental impact IP7/08 2008
 Concrete in aggressive ground SD1 2005
 Concrete strength: the effect of ocean-depth water pressure IP6/00 2000
 Concretes with high ggbs contents for use in hard/firm secant piling IP17/05 2005
 Concrete with minimal or no primary aggregate content: the MAGCON pilot study IP12/04 2004
 Corrosion of reinforcement in concrete: electrochemical monitoring DG434 1998
 Corrosion of steel in concrete 2000
 Part 1. Durability of reinforced concrete structures DG444/1
 Part 2. Investigation and assessment DG444/2
 Part 3. Protection and remediation DG444/3
 Corrosion of steel in concrete: a review of the effect of humidity DG491 2004
 Corrosion of steel in concrete: service life design and prediction DG455 2001
 Delayed ettringite formation: in-situ concrete IP11/01 2001
 Deterioration of cement-based building materials: lessons learnt IP4/03 2003
 Durability of precast HAC concrete in buildings IP8/00 2000
 Effects of chemical, physical and mechanical processes on concrete DG527 2012
 HAC concrete in the UK: assessment, durability management, maintenance and refurbishment SD3 2002
 Hemp lime IP14/11 2011
 Innovation in concrete frame construction IP11/05 2005
 Marine aggregates in concrete DG507 2008
 Minimising the risk of alkali-silica reaction: alternative methods IP1/02 2002
 Porous aggregates in concrete
 Part 1. Jurassic limestones IP9/01 2001
 Part 2. Sandstones from NW England IP6/04 2004
 Recycled aggregates DG433 1998
 Reinforced autoclaved aerated concrete panels: test results, assessment and design IP7/02 2002
 Reinforced concrete service life design 2006
 Part 1. Overview IP3/06/1
 Part 2. Design for durability IP3/06/2
 Part 3. Service life forecasting and enhancement IP3/06/3
 Self-compacting concrete IP3/04 2004

Asset management and service life of concrete structures and components IP26/12 2012
 Shrinkage of natural aggregates in concrete DG357 1991
 Silica fume in concrete IP5/09 2009
 Tension tests for concrete DG451 2000
 Volumetric strain of concrete under uniaxial compression: sustained loading and high grade concrete IP15/02 2002
 Water reducing admixtures in concrete IP15/00 2000

Timber

Advances in timber grading DG445 2000
 Assessment of timber structures DG517 2010
 Best practice of timber waste management IP9/03 2003
 Bio-resins in construction IP4/12 2012
 Cross-laminated timber IP17/11 2011
 Design of timber floors to prevent decay DG364 1991
 Drying distortion of timber DG514 2010
 Dry rot: its recognition and control DG299 1993
 Durability of timber in ground contact IP14/01 2001
 European Standards for wood preservatives and treated wood IP1/03 2003
 Evaluating joinery preservatives: performance prediction using BS EN 330 L-joint trials IP2/01 2001
 Five-storey timber-frame hall of residence: a reconstruction case study IP19/00 2000
 Green gluing of timber: a feasibility study IP10/05 2005
 Guide to machine strength grading of timber DG476 2003
 Hardwoods for construction and joinery: current and future sources of supply DG417 1996
 Hardwoods for joinery and construction 1998
 Part 1. Technical assessment methods DG431/1
 Part 2. Test results and recommendations DG431/2
 Part 3. Test results and recommendations DG431/3
 Identifying damage by wood-boring insects DG307 2003
 Incising UK-grown Sitka spruce IP13/05 2005
 Innovation in timber supply at the London 2012 Olympic and Paralympic Games IP17/12 2012
 Insecticidal treatments against wood-boring insects DG327 1992
 Insulation of timber-frame construction: U-values and regulations for the UK, Republic of Ireland and Isle of Man SD7 2008
 Preservative-treated timber: ensuring conformity with European Standards IP6/99 1999
 Preservative treated timber: the UK's code of best practice IP13/01 2001
 Service life prediction for timber cladding IP16/12 2012
 Specifying structural timber DG416 1996
 Termites and UK buildings 1998
 Part 1. Biology, detection and diagnosis DG443/1
 Part 2. Control and management of subterranean termites DG443/2
 The structural use of wood-based panels DG423 1997
 Timber bridges DG481 2004
 Timber cladding DG521 2011
 Timber for joinery DG407 1995
 Timber frame: a guide to the construction process DG496 2005
 Timber frame construction: an introduction GG60 2004
 Timber-frame dwellings: section six of the Domestic Technical Handbook (Scotland): energy SD6 2008
 Timber grading and scanning DG492 2005
 Timbers: their natural durability and resistance to preservative treatment DG429 1998
 Using UK-grown Douglas fir and larch timber for external cladding DG494 2005
 Using UK-grown Sitka spruce for exterior cladding DG500 2006
 Wet rots: recognition and control DG345 1989
 Wood-based panel products: their contribution to the conservation of forest resources DG375 1992
 Wood-based panels
 Part 1. Oriented strand board (OSB) DG477/1 2003
 Part 2. Particleboard (chipboard) DG477/2 2003
 Part 3. Cement-bonded particleboard DG477/3 2003
 Part 4. Plywood DG477/4 2003
 Part 5. Medium density fibreboard (MDF) DG477/5 2004
 Part 6. Hardboard, medium board and softboard DG477/6 2004
 Part 7. Selection DG477/7 2004
 Wood-boring insect attack 1998
 Part 1. Identifying and assessing damage GR13/1
 Part 2. Treating damage GR13/2
 Wood rot: assessing and treating decay GR12 1997

GOOD REPAIR GUIDES

- GR1 Cracks caused by foundation movement 1996
 GR2 Damage to buildings caused by trees 1996
 GR3 Repairing damage to brick and block walls 1996
 GR4 Replacing masonry wall ties 1996
 GR5 Diagnosing the causes of dampness 1997
 GR6 Treating rising damp in houses 1997
 GR7 Treating condensation in houses 1997
 GR8 Treating rain penetration in houses 1997
 GR9 Repairing and replacing rainwater goods 1997
 GR10 Repairing timber windows 1997
 Part 1. Investigating defects and dealing with water leakage
 Part 2. Draughty windows, condensation in sealed units, operating problems, deterioration of frames
 GR11 Repairing flood damage 1997
 Part 1. Immediate action
 Part 2. Ground floors and basements
 Part 3. Foundations and walls
 Part 4. Services, secondary elements, finishes, fittings
 GR12 Wood rot: assessing and treating decay 1997
 GR13 Wood-boring insect attack 1998

GOOD BUILDING GUIDES

- GG1 Repairing or replacing lintels 1992
 GG2 Surveying masonry chimneys for repair or rebuilding 1990
 GG6 Outline guide to assessment of traditional housing for rehabilitation 1990
 GG7 Replacing failed plaster 1991
 GG8 Bracing trussed rafter roofs 1991
 GG9 Habitability guidelines for existing housing 1991
 GG10 Temporary support for openings in external walls: assessing load 1992
 GG11 Supplementary guidance for assessment of timber-framed houses: Part 1. Examination 1993
 GG12 Supplementary guidance for assessment of timber-framed houses: Part 2. Interpretation 1993
 GG13 Surveying brick or blockwork freestanding walls 1992

focus on building elements

Build to last

with the BRE Building Elements series

Get comprehensive information about the main elements of buildings with BRE's Building Elements series. Over 1500 pages of extensively illustrated practical details, descriptions and best practice advice provide an essential reference for all building professionals.

- ▶ Roofs and roofing **BR 504** £47.50
- ▶ Walls, windows and doors **BR 352** £47.50
- ▶ Floors and flooring **BR 460** £47.50
- ▶ Building services **BR 404** £47.50
- ▶ Foundations, basements and external works **BR 440** £47.50
- ▶ Understanding dampness **BR 466** £42.50
- ▶ Building Elements series – set of 6 books **AP 243** £195

- GG61 Lighting 2004
 - Part 1. General principles
 - Part 2. Domestic and exterior
 - Part 3. Non-domestic
- GG62 Retro-installation of bed joint reinforcement in masonry 2004
- GG63 Climate change 2004
- GG64 Tiling and slating pitched roofs 2005
 - Part 1. Design criteria, underlays and battens
 - Part 2. Plain and profiled clay and concrete tiles
 - Part 3. Natural and manmade slates
- GG65 Plastering and internal rendering 2005
 - Part 1. Design and specification
 - Part 2. Workmanship
- GG66 Building masonry with lime-based mortars 2005
- GG67 Achieving airtightness 2006
 - Part 1. General principles
 - Part 2. Guidance on techniques: floors, walls and roofs
 - Part 3. Guidance on techniques - windows and doors, sealing methods and materials
- GG68 Installing thermal insulation 2006
 - Part 1. Good site practice
 - Part 2. Good site practice
- GG69 Loft conversion 2006
 - Part 1. Structural considerations
 - Part 2. Safety, insulation and services
- GG70 Plasterboard 2007
 - Part 1. Types and their applications
 - Part 2. Fixing and finishing non-separating walls and floors
 - Part 3. Fixing and finishing separating and compartmenting walls and floors
- GG71 Working with local businesses and residents 2007
- GG72 Basement construction and waterproofing 2007
 - Part 1. Site investigation and preparation
 - Part 2. Construction, safety, insulation and services
- GG73 Radon protection for new domestic extensions and conservatories with solid concrete ground floors 2008
- GG74 Radon protection for new dwellings 2008
- GG75 Radon protection for new large buildings 2009
- GG76 Gravity drainage systems for buildings 2009
- GG77 Installing smart home digital networks 2009
- GG78 Below-ground drainage systems 2010

- GG79 Provision of sanitary appliances and their space requirements 2010
- GG80 Water services for domestic properties 2010
- GG81 Installing fire-resisting ductwork and dampers 2011
- GG82 Rainwater harvesting for domestic properties 2012

POLLUTION CONTROL GUIDES

- AP160 Controlling particles, vapour and noise pollution from construction sites 2003 (5-part set):
 - Part 1. Pre-project planning and effective management
 - Part 2. Site preparation, demolition, earthworks and landscaping
 - Part 3. Haulage routes, vehicles and plant
 - Part 4. Materials handling, storage, stockpiles, spillage and disposal
 - Part 5. Fabrication processes and internal and external finishes

IN-SITU GROUND TESTING GUIDES

- AP159 A simple guide to in-situ ground testing 2003 (7-part set):
 - Part 1. What is it and why do it?
 - Part 2. Cone penetration testing
 - Part 3. Flat dilatometer testing
 - Part 4. Dynamic probing
 - Part 5. Pressuremeter testing
 - Part 6. Large-diameter plate loading tests
 - Part 7. Geophysical testing

DIGESTS

Current titles showing date of latest revision:

r=minor revision, E=new edition

- DG12 Structural design in architecture 1969r
 DG145 Heat losses through ground floors 1984r
 DG161 Reinforced plastics cladding panels 1973
 DG162 Traffic noise and overheating in offices 1973
 DG163 Drying out buildings 1973
 DG180 Condensation in roofs 1986r
 DG208 Increasing the fire resistance of existing timber floors 1988
 DG217 Wall cladding defects and their diagnosis 1977
 DG223 Wall cladding: designing to minimise defects due to inaccuracies and movements 1978
 DG227 Estimation of thermal and moisture movements and stresses: Part 1. 1978
 DG228 Estimation of thermal and moisture movements and stresses: Part 2. 1978
 DG240 Low-rise buildings on shrinkable clay soils: Part 1. 1993E
 DG241 Low-rise buildings on shrinkable clay soils: Part 2. 1990r
 DG245 Rising damp in walls: diagnosis and treatment 2007E
 DG248 Sanitary pipework: Part 1. Design basis 1981
 DG249 Sanitary pipework: Part 2. Design of pipework 1981
 DG251 Assessment of damage in low-rise buildings 1990E, 1995r
 DG254 Reliability and performance of solar-collector systems 1981
 DG268 Common defects in low-rise traditional housing 1988r
 DG273 Perforated clay bricks 1983
 DG282 Structural appraisal of buildings with long-span roofs 1984
 DG284 Wind loads on canopy roofs 1986E
 DG288 Dust explosions 1984
 DG292 Access to domestic underground drainage systems 1985
 DG293 Improving the sound insulation of separating walls and floors 1985
 DG294 Fire risks from combustible cavity insulation 1985
 DG295 Stability under wind load of loose-laid external roof insulation boards 1985
 DG297 Surface condensation and mould growth in traditionally-built dwellings 1990r
 DG298 Low-rise building foundations: the influence of trees in clay soils 1999E
 DG299 Dry rot: its recognition and control 1993r
 DG301 Corrosion of metals by wood 1985
 DG302 Building overseas in warm climates 1985
 DG305 Zinc-coated steel 1986
 DG307 Identifying damage by wood-boring insects 1996r
 DG308 Unvented domestic hot water systems 1986
 DG309 Estimating daylight in buildings 1986
 DG311 Wind scour of gravel ballast on roofs 1986
 DG312 Flat roof design: the technical options 1986
 DG318 Site investigation for low-rise building: desk studies 1987
 DG322 Site investigation for low-rise building: procurement 1987
 DG324 Flat roof design: thermal insulation 1987
 DG327 Insecticidal treatments against wood-boring insects 1993r
 DG329 Installing wall ties in existing construction 2000E
 DG330 Alkali-silica reaction in concrete 2004
 Part 1. Background to the guidance notes
 Part 2. Detailed guidance for new construction
 Part 3. Worked examples
 Part 4. Simplified guidance for new construction using normal reactivity aggregates
 DG335 Electrical interference in buildings 1988
 DG336 Swimming pool roofs: minimising the risk of condensation using warm-deck roofing 1989
 DG337 Sound insulation: basic principles 1994
 DG338 Insulation against external noise 1989
 DG339 Condensing boilers 1990r
 DG340 Choosing wood adhesives 1989
 DG343 Simple measuring and monitoring of movement in low-rise buildings: Part 1. Cracks 1989
 DG344 Simple measuring and monitoring of movement in low-rise buildings: Part 2. Settlement, heave and out-of-plumb 1995r
 DG345 Wet rots: recognition and control 1989
 DG346 The assessment of wind loads
 Part 1. Background and method 1992r
 Part 2. Classification of structures 1989
 Part 3. Wind climate in the United Kingdom 1992r
 Part 4. Terrain and building factors and gust peak factors 1992r
 Part 5. Assessment of wind speed over topography 1989
 Part 6. Loading coefficients for typical buildings 1989
 Part 7. Wind speeds for serviceability and fatigue assessments 1989
 Part 8. Internal pressures 1990
 DG348 Site investigation for low-rise building: the walk-over survey 1989
 DG349 Stainless steel as a building material 1989
 DG350 Climate and site development 1990
 Part 1. General climate of the UK
 Part 2. Influence of microclimate
 Part 3. Improving microclimate through design
 DG351 Re-covering old timber roofs 1990
 DG352 Underpinning 1993r
 DG355 Energy efficiency in dwellings 1990
 DG357 Shrinkage of natural aggregates in concrete 1991
 DG358 CFCs in buildings 1992E
 DG359 Repairing brick and block masonry 1991
 DG360 Testing bond strength of masonry 1991
 DG361 Why do buildings crack? 1991
 DG362 Building mortar 1991
 DG364 Design of timber floors to prevent decay 1991
 DG365 Soakaway design 2007r
 DG366 Structural appraisal of existing buildings, including for a material change of use 2012 E
 Part 1. Requirements for a structural appraisal
 Part 2. Preparation for structural appraisal
 Part 3. Structural appraisal procedures
 Part 4. Additional considerations and information sources
 DG367 Fire modelling 2004
 DG369 Interstitial condensation and fabric degradation 1992
 DG370 Control of lichens, moulds and similar growths 1992
 DG374 Relocatable buildings: structural design, construction and maintenance 1992
 DG375 Wood-based panel products: their contribution to the conservation of forest resources 1992
 DG377 Selecting windows by performance 1992
 DG379 Double glazing for heat and sound insulation 1993
 DG380 Damp-proof courses 1993
 DG381 Site investigation for low-rise building: trial pits 1993
 DG382 New materials in hot climates 1993
 DG383 Site investigation for low-rise building: soil description 1993
 DG386 Monitoring building and ground movement by precise levelling 1994
 DG390 Wind around tall buildings 1994
 DG395 Slurry trench cut-off walls to contain contamination 1994
 DG398 Continuous mechanical ventilation in dwellings: design, installation and operation 1994
 DG399 Natural ventilation in non-domestic buildings 1994
 DG401 Replacing wall ties 1995
 DG402 Static load testing: concrete floor and roof structures within buildings 1995
 DG403 Damage to structures from ground-borne vibration 1995
 DG404 PVC-U windows 1995
 DG405 Carbonation of concrete and its effect on durability 1995
 DG406 Wind actions on buildings and structures 1995
 DG407 Timber for joinery 1995
 DG409 Masonry and concrete structures: measuring in-situ stress and elasticity using flat jacks 1995
 DG411 Site investigation for low-rise buildings: direct investigations 1996
 DG412 Desiccation in clay soils 1996
 DG415 Reducing the risk of pest infestations in buildings 1996
 DG416 Specifying structural timber 1996
 DG417 Hardwoods for construction and joinery: current and future sources of supply 1996
 DG418 Bird, bee and plant damage to buildings 1996
 DG419 Flat roof design: bituminous roofing membranes 1996
 DG420 Selecting natural building stones 1997
 DG421 Measuring the compressive strength of masonry materials: the screw pull-out test 1997
 DG422 Painting exterior wood 1997
 DG423 The structural use of wood-based panels 1997
 DG424 Installing BMS to meet electromagnetic compatibility requirements 1997
 DG425 Lists of excluded materials: a change in practice 1997
 DG426 The response of structures to dynamic crowd loads 2004
 DG427 Low-rise buildings on fill 1998
 Part 1. Classification and load-carrying characteristics
 Part 2. Site investigation, ground movement and foundation design
 Part 3. Engineered fill
 DG428 Protecting buildings against lightning 1998
 DG429 Timbers: their natural durability and resistance to preservative

- treatment 1998
- DG430 Plastics external glazing 1998
- DG431 Hardwoods for joinery and construction 1998
Part 1. Technical assessment methods
Part 2. Test results and recommendations
Part 3. Test results and recommendations
- DG432 Aircrete: thin joint mortar systems 1998
- DG434 Corrosion of reinforcement in concrete: electrochemical monitoring 1998
- DG436 Wind loading on buildings 1999
Part 1. Brief guidance for using BS 6399-2:1997
Part 2. BS 6399-2:1997 worked examples – effective wind speeds for a site, and loads on a two-storey house
Part 3. BS 6399-2:1997 worked examples – loads on a portal frame building and on an office tower on a podium
- DG437 Industrial platform floors: mezzanine and raised storage 1999
- DG438 Photovoltaics: integration into buildings 1999
- DG439 Roof loads due to local drifting of snow 1999
- DG440 Weathering of white external PVC-U 1999
- DG441 Clay bricks and clay brick masonry (2 parts) 1999
- DG442 Architectural use of polymer composites 1999
- DG443 Termites and UK buildings 1999
Part 1. Biology, detection and diagnosis
Part 2. Control and management of subterranean termites
- DG444 Corrosion of steel in concrete 2000
Part 1. Durability of reinforced concrete structures
Part 2. Investigation and assessment
Part 3. Protection and remediation
- DG445 Advances in timber grading 2000
- DG446 Assessing environmental impacts of construction – Industry consensus, BREEAM and UK Ecopoints 2000
- DG447 Waste minimisation on a construction site 2000
- DG448 Cleaning buildings: legislation and good practice 2000
- DG449 Cleaning exterior masonry 2000
Part 1. Developing and implementing a strategy
Part 2. Methods and materials
- DG450 Better building – integrating the supply chain: a guide for clients and their consultants 2000
- DG451 Tension tests for concrete 2000
- DG452 Whole life costing and life-cycle assessment for sustainable building design 2000
- DG453 Insulating glazing units 2000
- DG454 Thermal mass in office buildings 2001
Part 1. An introduction
Part 2. Design criteria
- DG455 Corrosion of steel in concrete: service life design and prediction 2001
- DG456 Prefabricated power cabling for buildings: procuring, installing and testing 2001
- DG457 The Carbon Performance Rating for offices 2001
- DG458 Safe as houses? 2001
- DG459 Construction logistics: an introduction 2001
- DG460 Bricks, blocks and masonry made from aggregate concrete 2001
Part 1. Performance requirements
Part 2. Appearance and environmental aspects
- DG461 Corrosion of metal components in walls 2001
- DG462 Steel structures supporting composite floor slabs: design for fire 2001
- DG463 Selecting building sealants with ISO 11600 2002
- DG464 VOC emissions from building products 2002
Part 1. Sources, testing and emission data
Part 2. Control, evaluation and labelling schemes
- DG465 U-values for light steel-frame construction 2002
- DG466 EN 927: the new European Standard for exterior wood coatings 2002
- DG467 Slate and tile roofs: avoiding damage from aircraft wake vortices 2002
- DG468 AAC 'aircrete' blocks and masonry (2 parts) 2002
- DG469 Selecting gaskets for construction joints 2002
- DG470 Life cycle impacts of timber: a review of the environmental impacts of wood products in construction 2002
- DG471 Low-rise building foundations on soft ground 2002
- DG472 Optimising ground investigation 2002
- DG474 Handover of Office Building Operations protocol 2002
- DG475 Tilt of low-rise buildings with particular reference to progressive foundation movement 2003
- DG476 Guide to machine strength grading of timber 2003
- DG477 Wood-based panels
Part 1. Oriented strand board (OSB) 2003
Part 2. Particleboard (chipboard) 2003
Part 3. Cement-bonded particleboard 2003
Part 4. Plywood 2003
Part 5. Medium density fibreboard (MDF) 2004
Part 6. Hardboard, medium board and softboard 2004
Part 7. Selection 2004
- DG478 Building performance feedback: getting started 2003
- DG479 Timber piles and foundations 2004
- DG480 Wood plastic composites and plastic lumber 2004
- DG481 Timber bridges 2004
- DG482 Contaminated land: ingress of organic vapours into buildings 2004
- DG483 Wind loads on temporary stage decks 2004
- DG484 Structural fire engineering design: introduction 2004
- DG485 Structural fire engineering design: fire development 2004
- DG486 Reducing the effects of climate change by roof design 2004
- DG487 Structural fire engineering design 2004
Part 1. Materials behaviour: concrete
Part 2. Materials behaviour: steel
Part 3. Materials behaviour: masonry
Part 4. Materials behaviour: timber
- DG488 Structural fire engineering design: fire and thermal response 2004
- DG489 Wind loads on roof-based photovoltaic systems 2004
- DG490 Structural fire engineering design: aspects of life safety 2004
- DG491 Corrosion of steel in concrete: a review of the effect of humidity 2004
- DG492 Timber grading and scanning 2005
- DG493 Safety considerations in designing roofs 2005
- DG494 Using UK-grown Douglas fir and larch timber for external cladding 2005
- DG495 Mechanical installation of roof-mounted photovoltaic systems 2005
- DG496 Timber frame buildings. A guide to the construction process 2005
- DG497 Factory glazed windows 2005
Part 1. Introduction and the glazing process
Part 2. Transport, storage and installation
- DG498 Selecting lighting controls 2006
- DG499 Designing roofs for climate change: modifications to good practice guidance 2006
- DG500 Using UK-grown Sitka spruce for exterior cladding 2006
- DG501 BR135: Annex B: performance criteria and classification method for BS 8414-2:2005
- DG502 Principles of masonry conservation management 2007
- DG503 External timber structures: preservative treatment and durability 2007
- DG504 Modified wood: an introduction to products in UK construction 2007
- DG505 Access to buildings 2008
- DG506 Security fog generators 2008
- DG507 Marine aggregates in concrete 2008
- DG508 Conservation and cleaning of masonry
Part 1. Stonework 2008
Part 2. Brickwork, blockwork and terracotta 2009
Part 3. Renders, plasters and stucco 2011
- DG509 Fire engineering in tunnels 2009
- DG510 Concrete structure management 2009
- DG511 Fire modelling with computational fluid dynamics 2009
- DG512 Developments in fire detection and fire alarm systems 2009
- DG513 Fixed gas extinguishing systems for fire protection 2009
- DG514 Drying distortion of timber 2010
- DG515 Lessons learned from real fires 2010
- DG516 Evacuation modelling and human behaviour in fire 2010
- DG517 Assessment of timber structures 2010
- DG518 Sprinkler systems for fire protection of commercial and industrial buildings 2010
- DG519 Residential sprinklers for fire protection
Part 1. Introduction 2012
Part 2. Installation 2012
- DG520 Wind microclimate around buildings 2011

- DG521 Timber cladding 2011
- DG522 Hardcore for supporting ground floors of buildings 2011
Part 1. Selecting and specifying materials
Part 2. Placing hardcore and the legacy of problem materials
- DG523 Flood-resilient building
Part 1. Legislation, planning, flood risk assessment and performance of buildings 2012
Part 2. Building in flood-risk areas and designing flood-resilient buildings 2012
- DG524 Fire doors 2012
- DG525 Domestic smoke alarms 2012
- DG526 Structural assessment of existing large panel system (LPS) dwelling blocks for accidental loads 2012
- DG527 Effects of chemical, physical and mechanical processes on concrete 2012

SPECIAL DIGESTS

- SD1 Concrete in aggressive ground 2005
- SD2:2006 Timber frame dwellings. Conservation of fuel and power: AD L1A guidelines 2nd edition 2006
- SD3 HAC concrete in the UK: assessment, durability management, maintenance and refurbishment 2002
- SD4:2007 Masonry walls and beam-and-block floors U-values and building regulations 2nd edition 2007
- SD5 Wind loads on unclad structures 2004
- SD6 Timber-frame dwellings section six of the Domestic Technical Handbook (Scotland): energy 2008
- SD7 Insulation of timber-frame construction: U-values and regulations for the UK, Republic of Ireland and Isle of Man 2008

INFORMATION PAPERS

Published since January 2001. Approximately 400 Information Papers published before 2001 are available at www.brebookshop.com

- IP1/01 Environmental benchmarking for property portfolio managers
- IP2/01 Evaluating joinery preservatives: performance prediction using BS EN 330 L-joint trials
- IP3/01 Dynamic stiffness of wall ties used in masonry cavity walls: measurement procedure
- IP4/01 Reducing impact and structure-borne sound in buildings
- IP5/01 Solar energy in urban areas
- IP6/01 Modelling the performance of thermal mass
- IP7/01 Local authorities' performance on sustainable construction
- IP8/01 Weathering of plastics pipes and fittings
- IP9/01 Porous aggregates in concrete: Jurassic limestones
- IP10/01 Lightweight veneer stone cladding panels
- IP11/01 Delayed ettringite formation: in-situ concrete
- IP12/01 Hot air repair of PVC-U profiles
- IP13/01 Preservative treated timber: the UK's code of best practice
- IP14/01 Durability of timber in ground contact
- IP15/01 Standardised and prefabricated wiring for buildings (2 parts)
- IP16/01 Prefabricated housing in the UK
Part 1. A case study – Murray Grove, Hackney
Part 2. A case study – CASPAR II, Leeds
Part 3. A summary paper
- IP17/01 Assessing the effects of thermal bridging at junctions and around openings
- IP18/01 Blastfurnace slag and steel slag: their use as aggregates
- IP19/01 The performance of fibre cement slates: effects of condensation
- IP20/01 Temperature and humidity in batten voids
- IP21/01 Sustainability indicators for utilities
- IP1/02 Minimising the risk of alkali-silica reaction: alternative methods
- IP2/02 Whole life performance of domestic automatic door controls
- IP3/02 Whole life performance of domestic automatic window controls
- IP4/02 Loads generated by jumping crowds: experimental assessment
- IP5/02 Dwellings and energy efficient lighting: new regulation Part L
- IP6/02 Free cooling with displacement ventilation
- IP7/02 Reinforced autoclaved aerated concrete panels: test results, assessment and design
- IP8/02 Construction site packaging wastes: a market position report
- IP9/02 Refurbishment or redevelopment of office buildings?
Part 1. Sustainability comparisons
Part 2. Sustainability case histories
- IP10/02 Metal cladding: assessing the thermal performance of built-up systems which use 'Z' spacers
- IP11/02 Retrofitting solar shading
- IP12/02 Control of solar shading
- IP13/02 Sustainability lessons from private finance and similar private initiatives
- IP14/02 Dealing with poor sound insulation between new dwellings
- IP15/02 Volumetric strain of concrete under uniaxial compression: sustained loading and high grade concrete
- IP16/02 Electronic tagging and wireless technologies
Part 1. Application in the construction industry
Part 2. An overview
- IP1/03 European Standards for wood preservatives and treated wood
- IP2/03 Background ventilators for dwellings
- IP3/03 Dynamic insulation for energy saving and comfort
- IP4/03 Deterioration of cement-based building materials: lessons learnt
- IP5/03 Precast Hollowcore slabs in fire
- IP6/03 Improving air quality in homes with supply air windows
- IP7/03 Planned maintenance painting: improving value for money
- IP8/03 Helping visually impaired people in their homes: assistive technology
- IP9/03 Best practice of timber waste management
- IP10/03 Fibre reinforced polymers in construction: durability
- IP11/03 Fibre reinforced polymers in construction: predicting weathering
- IP12/03 VOC emissions from flooring adhesives: European test methods and labelling
- IP13/03 Sustainable buildings
Part 1. Benefits for occupiers
Part 2. Benefits for designers
Part 3. Benefits for investors and developers
Part 4. Benefits for constructors
- IP14/03 Preventing hot water scaldings in bathrooms: using TMVs
- IP15/03 Proprietary nosings for non-domestic stairs
- IP16/03 Proprietary renders
- IP17/03 Impact of horizontal shading devices on peak solar gains through windows
- IP1/04 Drainage design for buildings with reduced water use
- IP2/04 Wood plastic composites: market drivers and opportunities in Europe
- IP3/04 Self-compacting concrete
- IP4/04 Recycling fibre reinforced polymers in the construction industry
- IP5/04 Fibre reinforced polymer materials in construction
- IP6/04 Porous aggregates in concrete: sandstones from NW England
- IP7/04 Designing roofs with safety in mind
- IP8/04 Whole building commissioning
Part 1. A guide for clients
Part 2. A guide for designers
Part 3. A guide for specifiers
Part 4. A guide for facilities managers
- IP9/04 Maintaining good air quality in your home
- IP10/04 Whole Life Value: sustainable design in the built environment
- IP11/04 Perimeter chilled beams
- IP12/04 Concrete with minimal or no primary aggregate content: the MAGCON pilot study
- IP13/04 An introduction to building with Structural Insulated Panels
- IP14/04 Environmental sustainability in bridge management
- IP1/05 Impact standards for glass
- IP2/05 Modelling and controlling interstitial condensation in buildings
- IP3/05 Composting in construction
- IP4/05 Costing sustainability: how much does it cost to achieve BREEAM and EcoHomes ratings?
- IP5/05 Self-sealing waste valves for domestic use: an assessment
- IP6/05 Ventilation and indoor air quality in schools
- IP7/05 Aircrete tongue and grooved block masonry
- IP8/05 Development of sites containing expansive ferrous slags
- IP9/05 Using small volume wastes in construction
- IP10/05 Green gluing of timber: a feasibility study
- IP11/05 Innovation in concrete frame construction
- IP12/05 Small scale, building integrated wind power systems
- IP13/05 Incising UK-grown Sitka spruce
- IP14/05 Achieving cost effective responsive maintenance
- IP15/05 The scope for reducing carbon emissions from housing
- IP16/05 Domestic energy use and carbon emissions: scenarios to 2050
- IP17/05 Concretes with high ggbs contents for use in hard/firm secant piling
- IP1/06 Assessing the effects of thermal bridging at junctions and around openings
- IP2/06 Rain noise from glazed and lightweight roofing
- IP3/06 Reinforced concrete service life design
Part 1. Overview
Part 2. Design for durability
Part 3. Service life forecasting and enhancement

-
- IP4/06 Airtightness of ceilings: energy loss and condensation risk
 IP5/06 Modelling condensation and airflows in pitched roofs
 IP6/06 Balanced Value for sustainable procurement
 IP7/06 Pruning trees to reduce water use: summaries of research; conclusions and recommendations
 IP8/06 Non-ferrous metal wastes as aggregates in highway construction
 IP9/06 Refurbishing Victorian housing: guidance and assessment method for sustainable refurbishment
 IP10/06 Pfa grouts for stabilising mine workings
-
- IP1/07 Internet Protocol: an introductory guide
 IP3/07 Modern methods of construction (MMC) in housing
 Part 1. Drivers and barriers to their use
 Part 2. Planning for manufactured housing
 Part 3. Designing for manufacture
 Part 4. Successful development and manufacture of MMC products
 IP4/07 Environmental weightings: their use in the environmental assessment of construction products
 IP5/07 Principal drivers for reusing foundations
 IP7/07 Prefabricated relocatable extensions: evaluating their use for people with disabilities
 IP8/07 Self-sealing waste valves for domestic use: an assessment
 IP9/07 Performance-based intervention for durable concrete repairs
 IP10/07 Safer floors: guidance on specifying flooring for internal and external safety in domestic buildings
 IP11/07 Naturally innovative: using biomimetics in construction
-
- IP 1/08 The price of sustainable schools
 IP 2/08 New build and refurbishment in the Sustainable Communities Plan
 IP 3/08 Delivering sustainability objectives through planning
 IP 4/08 Micro-wind turbines on house roofs
 IP 5/08 A guide to certification and approval for engineers and designers
 IP 6/08 Wireless fire detection systems and European regulations
 IP 7/08 Cements with lower environmental impact
 IP 8/08 Determining the minimum thermal resistance of cavity closers
 IP 9/08 Applying the code for sustainable homes on the BRE Innovation Park
 Part 1. Lessons learnt about building fabric
 Part 2. Lessons learnt about energy sources, overheating and ventilation
 Part 3. Lessons learnt about water use, harvesting, recycling and drainage
 Part 4. Lessons learnt about architecture, construction and material sourcing
 IP10/08 Safe and secure town centres at night
 IP11/08 Self-heating and spontaneous combustion
 IP12/08 An introduction to PassivHaus
 IP13/08 An introduction to intelligent buildings
 Part 1. Benefits and technology
 Part 2. Legislation, planning and design
 IP14/08 Risks of dust fires and explosions
-
- IP1/09 Performance and service life in the Environmental Profiles Methodology and Green Guide to Specification
 IP2/09 Structural composite connections for sequential seismic and fire performance
 IP3/09 Lessons learned from the Barratt Green House
 IP4/09 Delivering sustainable development in the built environment
 IP5/09 Silica fume in concrete
 IP6/09 Responsible sourcing of construction products
 IP7/09 Carbon reduction commitment
-
- IP1/10 Micro-wind turbines on tall buildings
 IP2/10 Ground source heat pumps
 IP3/10 Sustainable refurbishment of non-traditional housing and pre-1920s solid wall housing
 IP4/10 Delivering a sustainable masterplan
 IP5/10 Carbon emission reductions as a driver for economic regeneration
 IP6/10 A guide to GreenPrint
 IP7/10 SBEM for non-domestic buildings
 IP8/10 Digitally enabled communities
 IP9/10 Alkaline ash binders
 IP10/10 SAP for beginners
 IP11/10 Sustainability in foundations
 IP12/10 An introduction to the use of fire modelling
 IP13/10 Cool roofs and their application in the UK
 IP14/10 Consumer feedback on low-carbon housing
-
- IP15/10 Specifying LED lighting
 IP16/10 Quantifying the cost of poor housing
 IP17/10 Creating a funding mechanism for UK carbon reduction projects
 IP18/10 Sustainable housing refurbishment
 IP19/10 Designing urban streets to minimise heat island effects
 IP20/10 Delivering a successful demonstration project
 IP21/10 Fire performance of Structural Insulated Panel systems
 IP22/10 Planning decentralised energy systems in large new developments
-
- IP1/11 LIST (Low Impact Shopfitting Tool) for designing greener shopfitting display equipment
 IP2/11 Energy in schools
 IP3/11 The performance of district heating in new developments
 IP4/11 Alkali-activated binder concretes in construction
 IP5/11 Carbon footprinting and labelling of construction products
 IP6/11 Fire performance of light steel-framed buildings
 IP7/11 Biomass systems: key factors for successful installations
 IP8/11 Photovoltaic systems on dwellings: key factors for successful installations
 IP9/11 Large-scale low-carbon heating: key factors for successful installations
 IP10/11 Ground source heat pumps and low-temperature systems: key factors for successful installations
 IP11/11 Solar thermal systems: key factors for successful installations
 IP12/11 Sustainable refurbishment of the BRE Victorian Terrace
 Part 1. Design philosophy
 Part 2. The construction process
 IP13/11 Ventilation rate measurement: new tracer gases and techniques for healthy indoor environments
 IP14/11 Hemp lime: an introduction to low-impact building materials
 IP15/11 Straw bale: an introduction to low-impact building materials
 IP16/11 Unfired clay masonry: an introduction to low-impact building materials
 IP17/11 Cross-laminated timber: an introduction to low-impact building materials
 IP18/11 Natural fibre insulation: an introduction to low-impact building materials
 IP19/11 Assessing the sustainability of office refurbishment with BREEM: A case study
-
- IP 1/12 Selecting electronic security systems
 IP 2/12 Smart meters and smart energy networks for dwellings
 IP 3/12 Potential for reducing carbon emissions from commercial and public-sector buildings
 IP4/12 Bio-resins in construction
 IP5/12 The importance of energy quality in matching supply and demand
 IP6/12 Passive and reactive fire protection to structural steel
 IP7/12 LCA and REACH
 IP8/12 Sustainability at BRE
 IP9/12 Assessing the fire performance of existing reinforced concrete flooring systems
 IP10/12 Biodiversity offsetting for developments
 IP11/12 Building-integrated photovoltaic systems
 IP12/12 Smart growth
 IP13/12 The Construction Products Regulation and CE marking
 IP14/12 Static and dynamic wind loads on building-mounted microwind turbine
 IP15/12 Smoke detection in high ceiling spaces
 Part 1. Introduction, literature review and modelling
 Part 2. Fire tests and conclusions
 IP16/12 Service life prediction for timber cladding
 IP17/12 Innovation in timber supply at the London 2012 Olympic and Paralympic Games
 IP18/12 Funding renewable energy projects
 IP19/12 Sustainable information technology
 IP20/12 Measuring the wellbeing benefits of interior materials
 IP21/12 An introduction to structural dynamic comfort criteria
 IP22/12 Site layout planning for sunlight and solar gain
 IP23/12 Site layout planning for daylight
 IP24/12 Sustainability strategies for healthcare estates
 IP25/12 Making use of carbon emissions in the built environment
 IP26/12 Asset management and service life of concrete structures and components
-

BRE Connect Online

Build on your foundation of **knowledge** and **expertise**

WHAT IS BRE CONNECT ONLINE?

BRE Connect Online gives you **access to the unrivalled expertise and insight of BRE** – the UK's leading centre of excellence on the built environment. BRE Connect Online is an **annual subscription service** from IHS BRE Press giving online access to **over 1700 new and published BRE titles**

WHAT DO I GET?

ALL NEW AND PUBLISHED BRE TITLES

700 books, reports and guides – research, innovation, best practice and case studies, including:

- Designing quality buildings
- Foundations, basements and external works
- Roofs and roofing
- The Green Guide to Specification
- Understanding dampness

250 Digests – authoritative state-of-the-art reviews

600 Information Papers – BRE research and how to apply it in practice

150 Good Building and Repair Guides – illustrated practical guides to good building and repair work

AND MUCH MORE ...

WHAT'S NEW IN 2013?

MORE THAN 50 NEW TITLES, INCLUDING:

- A technical guide to district heating
- Design of durable concrete structures
- Designing for future climate change
- Energy-efficient refurbishment
- Energy surveys and audits
- External fire spread
- Performance of building-integrated PV in non-domestic buildings
- Radon solutions for homes
- Security glazing
- Whole-life value of sustainable buildings

All this for an annual subscription of only **£349** + VAT
Call now on +44 (0) 1344 328038 to find out more or **arrange a free trial** on
www.ihs.com/BRE102

Please send me the following publications:

BRE is the UK's leading centre of expertise on the built environment, construction, energy use in buildings, fire prevention and control, and risk management. BRE is part of the BRE group, a world leading organisation, delivering sustainability and innovation across the built environment and beyond. The BRE group is wholly owned by BRE Trust, a registered charity aiming to advance knowledge, innovation and communication in all matters concerning the built environment for the benefit of all. All BRE Group profits are passed to the BRE Trust to promote its charitable objectives.

BRE is committed to providing impartial and authoritative information on all aspects of the built environment. We make every effort to ensure the accuracy and quality of information and guidance when it is published. However, we can take no responsibility for the subsequent use of this information, nor for any errors or omissions it may contain.
