Philips AVENT product catalogue

Welcome to Philips AVENT

Pregnancy and early parenthood is an exciting and challenging time, when it's good to know there is expert advice on hand to help take care of you and your baby. AVENT has been designing and manufacturing products since 1984 that are inspired by nature and have been developed through extensive research and clinical trials. Now, as part of the Philips Group, the new Philips AVENT will continue to produce innovative solutions that make feeding and caring for your baby's health and safety easier.

These superior quality products help to support the choices you make, whether breastfeeding, bottle feeding or combining the two. Then as your baby grows their interchangeable design features mean they can be adapted to meet your baby's developing needs. We are here to guide you through all these wonderful changes. Take a look at our website www.philips.com/AVENT to see how we can help you.

The Philips AVENT Advantage

Choosing Philips AVENT means you have the assurance of superior quality products, designed with you and your baby's needs in mind.

Through extensive research and clinical trials, Philips AVENT products work effectively together to promote baby's well-being and give you the flexibility to care for a growing baby.

Breastfeeding

We are all aware of the unique benefits of breastfeeding and doctors recommend breast milk as the ideal nutrition for baby's first year, supplemented with solid food after 6 months.

However, mothers today often have to combine breastfeeding with other activities and responsibilities, or they may wish to involve other family members in feeding the new baby. For this reason, Philips AVENT developed a range of breast pumps.

Philips AVENT Manual Breast Pump

Helping mothers breastfeed longer.

The award winning Philips AVENT Manual Breast Pump allows you to express your milk directly into AVENT Feeding Bottles or pre-sterilised VIA Cups for storage in the fridge or freezer.

That way, your baby can still enjoy the benefits, even if you are not there to give the feed yourself. The Philips AVENT Manual Breast Pump works quickly, gently and quietly without the need for motors or batteries.

Philips AVENT natural approach is a breakthrough in breast pump design. In a study our breast pumps have been clinically proven to express more milk than a hospital electric breast pump.*

The Philips AVENT Manual Breast Pump has an award-winning design that imitates your baby's suckling pattern. The result – more milk faster and more naturally than with any other manual breast pump. And because it is so gentle, the Manual Breast Pump can also help overcome early common problems such as engorgement or cracked nipples.

The secret is the combination of the unique patented Let-down Massage Cushion and silicone diaphragm which work together to imitate your baby's suckling.

The soft Let-down Massage Cushion inside the funnel of the pump has five, soft petal massagers that gently flex in and out as you pump gently massaging the area around the nipple to help stimulate natural milk flow.

The silicone diaphragm provides a guaranteed 100% reliable and consistent vacuum to draw milk from the breast. The vacuum is controlled through light pressure of your fingertips on the handle so that you can adjust it exactly to your own comfort level.

* Randomised trial comparing the efficacy of a novel Manual Breast Pump with a Standard electric breast pump on mothers who delivered pre term infants, compared on equal terms (sequential pumping) in a fixed 20 minute time period. M S Fewtrell, P Lucas et al. MRC Childhood Nutrition Research Centre, London, Paediatrics, June 2001.

Philips AVENT Electronic Breast Pump

Designed for comfort – The Philips AVENT Electronic Breast Pump with the gentleness of nature.

The Philips AVENT Electronic Breast Pump has a memory that learns and continues your personal pumping rhythm for maximum comfort – designed to make feeding and caring for your baby easier.

Like the Manual Pump, the electronic pump offers:

- Patented Let-down Massage Cushion naturally imitates your baby's suckling pattern
- Silicone diaphragm to provide a guaranteed 100% reliable and consistent vacuum to draw milk from the breast

With a unique addition – an electronic memory that learns from you and continues your personal pumping rhythm. The Electronic Breast Pump has been designed to give you infinitely variable control over speed, vacuum and rhythm for your complete comfort. The result – a comfortable and relaxed pumping experience.

Put the pump to your breast and press the handle gently with your fingertips to imitate your baby's suckling rhythm. Simply press the button on the handle and quietly, effortlessly, the Electronic Breast Pump continues your exact pumping rhythm.

To change the rhythm at any time, press the button on the handle to return to manual control.

What mothers say:

"Fabulous – as a health care professional I recommend this item. After using it only once I may continue to breastfeed for a year"
Mrs T, London

"I think it is really clever how the Single Electronic Breast Pump pumped at exactly the same pace as I had set and it felt comfortable on my breast"
Ms B, Essex

Single Electronic Breast Pump

The Single Electronic Breast Pump is a portable handheld electronic pump. Battery or mains powered. Includes all you need to express, store and feed your breast milk.

Contains:

- Single Electronic Breast Pump
- 1 breast milk containers (125ml/4oz)
- 1 bottle stands/funnel covers
- 1 teat travel pack
- 1 sealing discs
- 1 Battery pack
- Mains power lead
- Manual pump parts for when power is not available

SCF 302/01

Nipplette™

A simple cure for flat or inverted nipples invented by a leading UK plastic surgeon.

Flat or inverted nipples can be a potential problem for women wishing to breastfeed. Through gentle suction the Nipplette pulls the nipple out into a small plastic thimble-like cup. In a matter of weeks of continued wear, the nipple will stay permanently erect.

SCF 152/01 Nipplette™ Single Pack

Ultra Comfort Disposable Breast Pads

Unique four layered construction for ULTRA absorbency, comfort and dryness.

ULTRA soft top layer with nipple indent – keeps breast dry at all times.

ULTRA absorbent layer, cushioned for extra comfort.

ULTRA absorbent core – draws in moisture to guard against embarrassment.

ULTRA breathable outer layer – helps avoid sore nipples. Anti-slip with adhesive tape – keeps pad in place.

Contains: 24 Pads

SCF 154/24

Washable Breast Pads

AVENT Washable Breast Pads have a brushed cotton lining which is soft and gentle and feature an absorbent layer which draws moisture away from the skin behind a leakproof liner.

An attractive lace outer layer gives a feminine appearance and prevents slippage. Machine washable and dryable.

Contains: 6 pads and laundry bag

SCF 155/06

What mothers say:

Nipplette

"Thanks to your Nipplette I managed to breastfeed my son – this product is revolutionary" Raphelle A, France

Disposable Breast Pads

"Very dry against my skin, excellent for size and fit, very absorbent and felt like I wasn't wearing them. I especially liked the indent for the nipple" Jan B, Yorkshire

Breast Shells

"I found the shells very comfortable to wear, they really helped relieve my engorged breasts" Mrs R, County Durham

Breast Shell Set

These ultrasoft breast shells are worn inside your bra to protect your nipples from chafing and to collect leaking breast milk.

Ventilated shells – protect sore or cracked nipples to help them heal more quickly. Their gentle pressure helps relieve engorgement. The holes allow air to circulate.

Breast milk collection shells (no holes) – collect excess breast milk when feeding or using a breast pump.

Contains:

- 2 ventilated shells
- 2 breast milk collection shells
- 2 ultrasoft silicone backing cushions

SCF 157/02

Nipple Protectors

Made of ultra-fine, soft, odourless, taste-free silicone, they protect sore or cracked nipples during breastfeeding. They are butterfly shaped to allow your baby more contact with your breast. Your baby can still feel and smell your skin and continue to stimulate your milk supply whilst suckling, and will return easily to the breast once your nipples are healed.

Available in two sizes, small and standard.

Contains: 2 Nipple Protectors

NOTE: Nipple Protectors are only designed for use when you have sore or cracked nipples and should be used with health professional advice.

SCF 156/00 Nipple Protectors Small

SCF 156/01 Nipple Protectors

Moisturising Nipple Cream (30ml)

Moisturises and softens dry or sensitive nipples. Apply once or twice a day during pregnancy to help prepare skin for breastfeeding and after the birth between feeds or as required to help maintain healthy supple skin. No need to remove prior to breastfeeding.

Contains Medilan™, an ultra pure grade of lanolin which penetrates the skin's outer layers to improve moisture levels and ensure suppleness. Also contains Coconut Oil and Aloe Vera, both natural ingredients, to hydrate the skin and soften nipples.

No added colouring, preservative or perfume.

SCF 504/30

Bottle feeding

Whilst we believe breast is best, only you and your healthcare professional can know which method is right for you. Many mothers introduce some bottle feeding into their babies' lives.

Whatever your choice, you can rely on Philips AVENT to support your decision with our award-winning range of feeding products.

Less Colic

Clinically proven to reduce colic**

Clinical studies show that the AVENT Bottle significantly reduces colic** and fussing*. As your baby feeds, the unique skirt on the AVENT teat flexes to allow air into the bottle, preventing any vacuum build-up. This allows your baby to suckle almost as at the breast. Listen for the gentle whistling sound and watch the air bubbles burst on the surface of the milk. That's your guarantee that the air is being released into the bottle – not into your baby's tummy.

How it works

Shaped for stability and comfort, the bottle's waisted shape is easier to hold and its wide-neck design makes filling simple. Clear markings on the bottle ensure accurate measurement and make it easier to determine how much baby has been fed. The dome cap seals the AVENT Teat securely to ensure leakproof mixing and travel without the need for separate sealing discs.

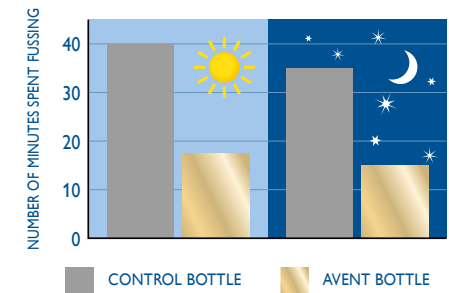

*At 2 weeks of age babies fed with an AVENT Bottle showed less fussing compared to babies fed with another bottle. ** At 2 weeks of age babies fed with an AVENT Bottle showed less colic compared to babies fed with a conventional bottle.

Helps settle your baby especially at night*

Unsettled and irritable behaviour, known as fussing, is by far the most commonly known crying behaviour in babies. A randomised clinical trial was carried out to see whether infant feeding bottle design affects "infant behaviour".

The Philips AVENT bottle was shown to significantly reduce fussing by approximately 28 minutes a day as compared to the comparator bottle (46 min vs 74 min, $p=0.05$). This was especially true during night-time.

Did you know?

Sleep and nutrition are vital to your baby's health and happiness.

- Infants aged 3 to 11 months need 14-15 hours sleep
- 70% of children experience sleep problems, affecting baby, mother and family both on an emotional and physical level

What is fussing?

Fussing is when a baby is unsettled and irritable. They may be vocalising but not continuously crying.

A certain amount of fussing is considered normal in babies. Like colic, fussing results in crying, unsettled or irritable behaviour. However, what mainly distinguishes a fussy baby from a colicky one is the level of discomfort and apparent distress, which is noticeably less in a fussy baby.

What is colic?

No one knows for sure why colic occurs. Common theories suggest it may be caused by spasms as the digestive system learns to process food, excess wind from air swallowed whilst feeding, or lack of good bacteria in the gut or allergies to cow's milk. Although we can't be sure of the cause, fortunately colic is not a serious medical condition.

Philips AVENT Bottle Range

Our feeding bottle range has two types of BPA-Free bottles (0% Bisphenol A) and one polycarbonate bottle. One BPA-Free bottle is extra durable and easy-to-clean and is made from the honey-colored material Polyethersulfone (PES).

The other BPA-Free bottle is a semi-transparent bottle made from Polypropylene (PP) which has a unique adaptor ring to ensure the skirt on the teat works optimally.

	PC Polycarbonate	PP Polypropylene	PES Polyethersulfone

Highly durable • Fewer scratches • Fewer stains	✓	✗	✓

TEATS ARE NUMBERED ON THE SIDE TO INDICATE FLOW RATE

Choosing the right teat for your baby

Remember that age indications are approximate as babies develop at different rates. You will know when your baby is ready to move onto a faster flow rate because he or she will try to suck harder to get the milk more quickly. They may also show signs of tiredness or frustration during feeding. AVENT Teat packs are colour coded to help you find the correct flow rate.

0m+

1 hole

NEWBORN FLOW

EXTRA SOFT SILICONE TEAT

Ideal for newborns and breastfed babies of all ages.

1m+

2 holes

SLOW FLOW

EXTRA SOFT SILICONE TEAT

Ideal for newborns and breastfed babies of all ages.

3m+

3 holes

MEDIUM FLOW

SOFT SILICONE TEAT

For bottle fed babies at 3 months of age and up.

6m+

SCF 143/06

Bottle and Teat Brush

Specially curved brush head and moulded handle-tip reach the corners of all types of bottles, teats and feeding equipment for thorough cleaning.

SCF 145/06

Preparing for feeding

Good hygiene is most important in the care of newborn babies.

Poor cleaning of breast and bottle feeding equipment can lead to tummy upsets and diarrhoea. To help you protect your baby, Philips AVENT recommends steam sterilisation as the safest, fastest and easiest way to eliminate harmful bacteria.

And to warm milk or baby food quickly and safely use a Philips AVENT Bottle and Baby Food Warmer. Our versatile pre-sterilised VIA Storage System offers a convenient way to express, store, transport and feed milk and baby's first food.

Philips AVENT Steam Sterilisers

Steam sterilisation is proven to be the most effective way to protect your baby from harmful germs. Based on the hospital principle, Philips AVENT Sterilisers use the intensive heat of the steam to eliminate harmful bacteria. They include an internal rack specially designed to take the Philips AVENT Manual Breast Pump and its accessories and can also be clipped together to form a dishwasher basket.

NOTE: Health professionals recommend sterilisation of feeding equipment for baby's first 12 months.

What mothers say:

Digital Steam Steriliser

"The 24 hour cycle on the Digital Steriliser is brilliant!!! Could turn it on in the evening and know that if I needed a bottle or breast pump it would always be sterile"
Mrs L, Surrey

Electric Steam Steriliser

"I like the size, look and rack system, particularly the baskets that convert to a dishwasher basket"
Mrs G, Scotland

Microwave Steam Steriliser

"I love the fact that it's quick and easy to use and very compact, making it easy to store away and ideal for taking on holiday"
Vilma H, Middlesex

Digital Steam Steriliser

Philips AVENT Digital Steam Steriliser takes steam sterilisation to a new level. It works quickly and continuously, keeping contents sterile for up to 24 hours. The pause feature lets you remove items without interrupting the cycle giving you the freedom to make up the bottles when it suits you.

Advanced digital display and sound alerts keep you informed throughout the sterilisation cycle.

Holds up to six 260ml/9oz AVENT Bottles or two Philips AVENT Breast Pumps and accessories.

Optional 6 hour mode – sterilises in 6 minutes and contents are sterile for up to 6 hours if unopened.

Simply load, add water, press the button and let Philips AVENT Digital Steam Steriliser do the rest!

SCF 276/42 - Bottles not included

Electric Steam Steriliser

The Philips AVENT Electric Steam Steriliser sterilises up to 6 AVENT Bottles and feeding accessories in approximately 8 minutes.

SCF 274/34 - Bottles not included

*2 mins for 1100-1850W microwaves
4 mins for 850-1000W microwaves
6 mins for 500-800W microwaves

Preparing for feeding

Digital Bottle and Baby Food Warmer

The new Digital Bottle and Baby Food Warmer makes it easy to warm baby's feeds quickly and safely.

- The technology automatically calculates the warming time. Just select whether you are warming milk or food, the quantity and whether the contents are coming from the fridge or freezer and let the Electronic Bottle Warmer do the rest!
- Easy to use digital display with audible signal keeps you informed throughout the warming cycle
- Ultra fast – Warms 125ml/4oz milk at room temperature in under 2 minutes
- Ideal for milk and baby food from the fridge, freezer or at room temperature

SCF 260

Electric Bottle and Baby Food Warmer

The fast, safe way to warm expressed milk and baby food, the Electric Bottle and Baby Food Warmer warms 125ml/4oz milk at room temperature in around 4 minutes.

SCF 255

Weaning Spoons

Small-bowled spoons specially designed for small mouths and tender gums. The long handle is easy to hold, use and clean. Shaped for easier feeding without spills. Available in white or blue.

Contains: 2 spoons

SCF 175/11

What mothers say:

Bottle and Baby Food Warmer

"I feel using this product is much safer than boiling kettles and transferring water into jugs etc when warming up bottles and food"
K.B., North Yorkshire

NOTE: Philips AVENT recommends that you do not heat baby milk or food in a microwave as uneven heating may cause burns to the throat and some vitamins may be destroyed. Bottles not included.

Combined Steamer and Blender

The new Philips AVENT Combined Steamer and Blender is ideal for preparing healthy, homemade baby meals: first steam fruit, vegetables, fish or meat and then simply lift and flip the jar over to blend it, with no transfer of food required.

Contains:

- Combined Steamer and Blender
- Measuring cup
- Spatula
- Recipe booklet

SCF 870/22

Miniblender and Feeding Set

The Philips AVENT Miniblender lets you easily create healthy, homemade food the way your baby prefers.

At home or on the go, your baby enjoys fresh food that you prepared. Use the stackable VIA Cups for storage in the fridge or freezer or warm the food in the VIA Cup with the Philips AVENT Bottle and Baby Food Warmer.

Contains:

- Mini Blender
- 6 VIA Cups and Lids (240ml/8oz)
- 2 weaning spoons
- Recipe booklet

SCF 860/22

VIA Baby Food Storage

To store, transport and feed baby food. Feed straight from the cup. Ideal for use in fridge or freezer.

Contains:

- 20 pre-sterilised VIA Cups (10 x 180ml/6oz, 10 x 240ml/8oz)

- 2 spoons
- Recipe guide

SCF 613/20

Also available are VIA Refill Cups and Lids.

SCF615/10 Refill Cups (10x 180ml/6oz)

SCF616/10 Refill Cups (10x 240ml/8oz)

SCF614/10 Lids (x10)

Toddler feeding

AVENT Magic is amazingly spill-proof whether shaken, thrown in the air or left on its side, and yet easy to drink from. The secret lies in the patented AVENT Magic valve which flexes to allow air back into the cup, so that baby gets a continuous flow of liquid with minimum effort. The spouts with valves also fit the AVENT Feeding Bottles so they become spill-proof too.

Health and monitoring

Keeping your baby safe and happy is of the utmost importance to every parent. Simple and effective ways to do this are vital, in order that you can relax and enjoy life. The Philips AVENT range of Health and Monitoring products provide you with simple and easy-to-use ways that ensure the well being of your baby.

DECT Baby Monitors

With the new Philips AVENT range of DECT Baby Monitors you can relax, safe in the knowledge your baby's happy even when you're not in the same room. Our new range offers an array of invaluable features: Digital technology alerts you to the slightest murmur, and enables you to reassure your baby via a guaranteed zero-interference connection in and around your house. Soothing lights and lullabies keep baby amused, and temperature and humidity sensors help maintain a healthy, comfortable climate.

SCD 530

- Humidity sensor to help maintain a healthy climate
- Temperature sensor to monitor and keep baby's room comfortable
- Guarantees zero interference from any other device
- Adjustable sound sensitivity
- 330m range ensures secure reception in and around the house

- Adjustable volume on parent unit, to adapt to your surroundings

SCD 470/00

Digital Baby Bath and Room Thermometer

This doubles as a convenient way to monitor the temperature both in baby's room and bath. Ideal as young babies cannot control their own temperature and are more sensitive to hot water than an adult may be able to predict. Has also been designed and tested as a safe, fun bath toy.

SCH 550/20

Digital Thermometer Set

Combines the benefits of a digital thermometer and a soother thermometer. Helping you to get a measurement of your baby's temperature, without upsetting your baby.

Soother thermometer uses the same shield and teat as the well established AVENT Freeflow soother for easy transition from soother to temperature measurement. Soft, flexible tip thermometer for comfortable measurement.

Soothers

There are times when nothing you do seems to settle your baby. Whilst soothers can calm your baby, they may leave you feeling uneasy. At Philips AVENT we understand your concerns and make our soothers to the highest safety standards.

AVENT Soothers

AVENT orthodontic, collapsible and symmetrical teats respect the natural development of baby's palate, teeth and gums – even if the soother ends up upside down in the mouth.

All AVENT Soothers are made of silicone. Silicone soothers are taste and odour-free and tend to last longer than latex soothers.

For ultimate hygiene all our soothers come with a snap on protective cap and because they are vented, they can be steam sterilised. They also come with a safety ring handle and air holes in the shield to help prevent irritation of sensitive baby skin.

Our **FreeFlow Soothers** allow more air to flow behind and around the soother for greater comfort, ideal for babies with even the most sensitive skin.

Available as single and twin pack.

Bear Soothers

Teethers

The Philips AVENT BPA-Free teether ranges are specially designed to fit little mouths and hands. They help soothe teething pain by massaging your baby's sore gums throughout their different teething stages. Colourful, playful designs are available in Animal or Classic ranges.

Stage 1 Front teeth

Stage 1 teethers are shaped to fit younger babies mouths and hands to help soothe teething pain as front teeth emerge. The stage 1 teethers are suitable for sterilisation.

SCF 890/01 Stage 1 Animal Shaped Teether
SCF 880/01 Stage 1 Classic Teether

Stage 2 Middle teeth

Stage 2 teethers are designed to fit slightly older babies' hands and mouths with both hard and soft surfaces for chewing. The teethers can be placed in the fridge so that the water filled teething pods can be cooled to help soothe teething pain as middle teeth begin to emerge.

SCF 892/01 Stage 2 Animal Shaped Teether
SCF 882/01 Stage 2 Classic Teether

Stage 3 Back teeth

Stage 3 teethers can be used when a baby is slightly older as their back teeth start to emerge. These have more playful features to help distract your baby from teething pain. They also have water filled pods and can be placed in the fridge for a cooling effect.

SCF 894/01 Stage 3 Animal Shaped Teether
SCF 884/01 Stage 3 Classic Teether

Skincare

Your natural instinct at this special time is to protect your baby's sensitive skin and keep it feeling soft and smelling wonderfully fresh. AVENT produce skincare products for mums as well as baby because it's just as important to look after your own skin, nurturing your body as it changes during pregnancy and making time for yourself afterwards.

AVENT Future Mother

Indulge yourself with products formulated with marine extracts, harvested off the Breton coast. Rich in minerals, vitamins and amino acids to improve the skin's elasticity and help to combat stretch marks.

Use rich, non-greasy **Indulgent Body Cream 200ml** to de-stress you, as well as firm, smooth and moisturise the skin.

Spray on the fine, rapidly absorbed **Moisturising Light Oil 125ml** and tackle dry skin and stretch marks. The refreshingly citrus fragrance revitalises your whole body.

SCF 500/20 Indulgent Body Cream 200ml
SCF 503/12 Moisturising Light Oil 125ml

AVENT Babycare

The gentlest ingredients have been formulated for this range, to make it suitable for use on the most precious skin. It's undergone rigorous clinical testing to guarantee its mildness and safety. Milk extracts help retain the natural moisture of baby's skin and are combined with the mildest natural flower plant extracts to produce delicately fragranced, hypoallergenic products.

Make bath time fun with **No Tears Body & Hair Wash 250ml**. A mild, low-lather, no-soap, no lanolin wash with waterlily flower extracts, which leaves hair silky and skin and scalp smooth and soft.

Use the velvety **Silky Liquid Talc 125ml** to moisturise. It's a luxurious lotion that melts into the skin and then transforms into a light powder to absorb excess moisture.

Rub on some **Soothing Magic Cream 125ml** and keep baby's skin moisturised, help heal rashes, and protect against the wind and cold.

Help prevent nappy rashes by using **Baby Bottom Balm 125ml**. A rapidly absorbed, non-sticky, water-resistant barrier cream to soothe, moisturises and protects delicate skin at nappy changing time.

SCF 511/25 Magic Cream™ 125ml
SCF 513/25 Body & Hair Wash 250ml
SCF 514/25 Liquid Talc 125ml
SCF 516/25 Bottom Balm 125ml

What mothers say:

Future Mother

"I like the natural oils and the feeling of being pampered after every use – especially when the products are used together"
Mrs S, Suffolk

Babycare

"Excellent for my baby's sensitive skin, gorgeous scent, baby smells and feels really cleansed!"
(No Tears Body & Hair Wash)
Mr S.R Clark, Sunderland

"I like the texture of the cream, the softness of the skin, the yummy smell, the after effects"
(Soothing Magic Cream)
Rachel B, Lincolnshire
