Redcrest

50 years of boating excellence

Initial development of the Avon inflatable boats began at the Avon India Tyre Company in 1959 and manufacture followed at the Bradford on Avon factory in Wiltshire UK. The first products manufactured were a range of four Dinghies: the Redstart, Redcrest (both still produced today) and the larger Redseal and Redshank.

Under the direction of Tom Norreys (MD of Avon Inflatables until 1992), the company developed quickly and moved to new larger premises at its current site in Dafen, South Wales UK.

Good design and quality manufacture became a hallmark of the Avon brand, which carried the Logo "Safe as the Ark".

The UK and USA markets were the target markets aimed at the yachting sector, where safety and portability were critical. Avon quickly became a market leader.

Avon progressively expanded the range of inflatable boats and in 1966 launched a range of 4, 6 and 8 man Liferrafts.

In 1970, Avon in conjunction with Atlantic College, Wales, developed a hybrid inflatable, the first Rigid Inflatable and in 1971 launched the first Avon Searider RIB, a fantastic sea-going boat which still in manufacture today.

In addition to its reknowned range of leisure craft, Avon was a pioneer of "white water rafting" in the USA and is also a key supplier of inflatables and RIBs defence, rescue and commercial customers worldwide including the UK MOD, the RNLI, US Navy and Coastguard agencies and has been long closely associated with epic explorers such as Colonel John Blashford Snell, Sir Francis Chichester and very many other marine luminaries for almost all of its history.

For 50 years, boating excellence has been Avon's commitment.

WORLD LEADERS

AVON has an enviable reputation among the most discerning of boating enthusiasts, boat builders and professional users world-wide. Attention to detail and quality standards ensure that AVON maintains its premier position in world markets. Our global network ensures we are well equipped to meet the needs of our global customer base and deliver a first class product and service support wherever it is needed. AVON are world leaders in every sense, offering a wealth of experience and expertise that is difficult to match.

The company has also been awarded Quality Standard BS EN ISO 9001.

Products manufactured by Avon conform to the requirements of ISO 6185, USA/H28, and British Standard MA16.

CE Certification
All applicable Avon craft conform to the Essential Safety Requirements of the new Recreation Craft Directive No. 94/25/EC and are CE marked.

THE PROFESSIONAL'S CHOICE

Every AVON is designed and built to the highest standards of efficiency and safety, and your chosen model will be reassuringly safe, seaworthy, buoyant and stable. It's no coincidence that AVON is the preferred choice of major defence agencies, the R.N.L.I, United States coast guard, N.A.T.O, major rescue services, explorers and adventurers world wide. Professionals expect and demand the ultimate in performance and dependability... just follow their example.

Quality in build and design

THE FINEST DESIGNS AND HAND BUILT QUALITY

Continually keeping ahead of the increasing demands of our marketplace has always been a key component of AVON culture and is a cornerstone of our continued success. Our year 2010 range of products combine our expertise and traditional skills with the latest available design technology and flair. Carefully designed products, individually hand built by skilled craftsmen to quite exceptional standards, are as much our hallmark today as they have been throughout our history. We have fine tuned our range to meet the needs of the most discerning of users. For tender duties, family fun or high speed performance, there's an AVON inflatable or Rib, perfect for your needs... just look at our choice.

FABRIC AND MATERIAL

AVON uses the best available materials from our Hypalon®* coated fabrics, immensely strong, wear resistant and waterproof, providing a craft that is virtually unaffected by weather (and excesses of heat, cold or humidity), fuel, oil, strong sunlight and everyday abrasion, to our highest quality adhesives, fibreglass mouldings, woodwork and inflation valves. We provide you with the best in class components, the best in industry standard.

Our buoyancy tubes are all internally sealed and with great attention to the design engineering of our construction, we provide an air holding standard that is second to none. Each and every one of our components are carefully selected and rigorously tested prior to being included in our material specifications and suitable for you !

*Dupont® Dow elastomers

Avon's distinctive lower 'sit in the boat' seating position gives increased safety and is an ideal driving position.

SAFE AND EASY TO USE

Across the range, our boats can be assembled, inflated and launched in minutes. Unpack, inflate, fasten any deck or accessories and your outboard and off you go!

Inflation is easy with our latest large bore valves offering quick inflation and secure air holding and our tough new valve cap provides a secondary seal for added safety. With up to six independent air chambers, wide beams, low centres of gravity and large diameter tubes, AVON boats are extremely safe.

You will notice that our inherent design feature allows everyone to sit comfortably and safely inside the craft, adding considerably to the well-being of everyone on board. Safety has always been a key element of our design parameters.

Carefully designed hulls and light weight designs ensure maximum performance and fuel efficiency, whilst our smaller tenders can be easily rowed using our strong wooden oars and unique rowlocks.

Our inflatable models are light enough for you to carry easily, pack down and stow, and the Rover and Rover Ribs ranges can be easily transported by car rack (not Rib 340), by trailer or stowed aboard your mother craft. All Rover Ribs, Rover Compact, Seasport De Luxe and Seasport Jet Rib are suitable to be either davit, passarelle or crane hung, dependent on model.

Seasport Jet

The Avon range of Seasport Jet Ribs continue to enjoy exceptional success, based on great design, quality and performance. Three craft, all styled to perfection and powered by a super charged 4-stroke 98 HP* jet unit, offer exhilarating and safe on water performance for tender duties, water sports towing and great fun!

The Seasport 430 Jet SC De Luxe is another example of the stylish and innovative design that has become a hallmark for the Seasport Jet series. The level of equipment featured on the Seasport Jet 430 SC De Luxe, including comfortable upholstered seats, luxurious teak deck, as well as high quality flush mounted stainless steel fittings, ensures that the craft is simply second to none. Always designed with the customer in mind, every single detail has been thoughtfully studied in order to permit passengers a comfortable ride and ease of access on board. The new Seasport 430 Jet's sleek lines will enable easy storage inside the garage or on the stern platform or flybridge of your yacht.

* 104 HP for US marked model.

Adventure Open

Alongside the Adventure range, Avon offers you Adventure Open model (delivered in blue fabric as standard), with the same hulls but with the opportunity to customise your boat to your own particular requirements. Now you can choose exactly the deck layout that suits you best, whatever your needs. Discuss with your Dealer the best for you and choose from our range of recommended fittings.

The 2010 Adventure Open range introduce 3 new models: 470, 750 and 850. These new additions to the range are the perfect synthesis between tradition and modernity, combining the technological innovation of removable tubes and in-built large capacity fuel tanks (A750 and A850) whilst guarding the traditional Avon know how with the use of handmade fabrics.

The seaworthiness and the spacious self-draining deck of the Adventure 750 and 850 guarantee exciting sea trips in very comfortable conditions.

This equipment is primarily designed for the UK market, for other markets, please check with your dealer.

STANDARD FEATURES

- GRP "V" rigid hull / Transom
- Top buoyancy tube fabric lifeline handles
- High profile rubbing strake
- Bow "U" bolt
- Bellows
- Repair kit
- Owners manual

A 410 AND A 470

R 315 Rib

TENDER BOATS

The Rover Ribs include built-in lifting points as standard.

The bow locker (including polyurethane coating on Rover 315) is ideal for personal belongings, safety equipment, or small anchor.

R 315 Rib

R 315 Rib

Rover Ribs

Avon Rover Ribs are a real favourite choice among boaters, with large diameter tubes and well designed hulls providing stability, buoyancy and comfort. Great on-water performance is a hallmark of the Avon Rover Rib range, long established as an industry leader in this class. The Rover 315 R, built using the latest injection technology, makes no exception. This tender is full of assets and innovative features : modern tube design that ensures better spray protection, increased internal space, foamed hull that provides additional buoyancy, 4 lifting points as standard, large volume bow locker including internal polyurethane coating, reinforced counter-moulded deck designed for console fitting purpose...

As a tender, runabout or leisure craft, this range is a real winner. The Rover Ribs series include moulded non-skid inner decks and bow lockers (R 315 Rib and R 340 Rib) as standard, together with chunky rub strakes for greater protection and great looks. Available in light grey or white, bow locker cushions and single seat centre consoles are available as accessories.

STANDARD FEATURES

- Large buoyancy tubes extended at stern (available in grey and white)
- Medium "V" fibreglass hull and transom (including foam on R 315 Rib)
- Moulded anti-skid fibreglass deck
- Removable fibreglass seat
- Bow and stern carry handles
- Moulded bow locker (R 315 Rib and R 340 Rib)
- Fabric pilot handles (R 315 Rib and R 340 Rib)
- Rowlocks / Oarlocks
- One piece wooden oars
- Oar stowage internal and external
- High profile rubstrake
- Lifelines
- Towing bridle patches (2)
- Bow "U" bolt
- Transom drain plug

- Aluminum transom plate
- Hull/drain plug
- Fuel tank retainers with strap
- 3 lifting points (4 on R 315 Rib)
- Bellows
- Repair Kit
- Owners manual

MAIN OPTIONAL ACCESSORIES

- Dealer fitted adjustable twin arm davit lifting kit
- 3 leg lifting sling for single point lift (R 280 and R 340 Rib)
- 4 leg lifting sling for single point lift (R 315 Rib)
- Single seat centre console
- Overall cover
- Launching wheels
- Ski hook (only R 340 Rib)
- Additional fibreglass seat kit
- Bow locker cushion (R 340 Rib)
- Seat stowage bag
- Synthetic teak deck (R 315 Rib)

Rover Aero

Rovers are high powered tenders with generous beams, great internal space and carrying capacity, and a facility to take bigger motors for that extra performance. So seaworthy and safe, yet are packed and stowed so small for easy transportation.

The Rovers are convenient and versatile, with a performance that will surprise you. Inflatable keels and air deck floor make these a great performers, packed with features and now completed with our new high profile rubstrake for added good looks and protection.

STANDARD FEATURES

- Large buoyancy tubes, extended at stern
- Inflatable Aero deck
- Inflatable keel
- Rigid fibreglass seat
- Bow and stern carry handles
- Towing bridle patches
- High profile rubstrake
- Lifelines
- Fabric pilot handle (R 280, R 310)
- Rowlocks/ Oarlocks
- Wooden jointed oars
- Oar stowage internal and external (except R 260)
- Integral marine ply transom with drain plug
- Aluminum motor clamp plate

- Stainless steel transom protection plate (R 310)
- Boat valise
- Fuel tank stowage retainers
- Pressure gauge
- Bellows
- Repair Kit
- Owners manual

MAIN OPTIONAL ACCESSORIES

- Launching wheels
- Lifting fitting kit for twin arm davits
- 3 leg lifting sling for single point lift
- Overall cover
- Additional fibreglass seat kit
- Seat stowage bag
- Bow bag

R 260, R 280, R 310

The Aero deck comprises of two layers of durable fabric joined inside by many thousands of drop stitched fibres, providing the ultimate in a lightweight, portable and rigid deck. Simply inflate for use and deflate for storage inside the boat.

Redcrest

Folded in its carry bag, the Dinghy stows easily in a cockpit locker.

The Dinghy can be half deflated to save stowage space.

Slatted deck, inflatable thwart and outboard bracket are now part of the standard equipment.

Redcrest Dinghy with GRP bracket and optional air deck.

Dinghies

The Avon Dinghy range offers a timeless introduction to inflatable boating, and still regarded without peer by experienced sailors. Superbly designed and now improved, the Dinghy features large diameter buoyancy tubes for greater carrying capacity, sea handling and stability. Perfect for access to offshore moorings or exploring lakes or hidden coves, the Dinghy can be effortlessly rowed or powered by small outboards.

The careful design and features of the Dinghy are enhanced by the standard outboard bracket and the inflatable thwart providing both seating and increased rigidity and buoyancy. You will find the Avon Dinghy, tougher, safer and more seaworthy than any competitor.

STANDARD FEATURES

- Inflatable thwart and retainers
- Slatted deck
- Tough raised profile rubstrake
- Rowlocks / Oarlocks
- Wooden jointed oars
- Fibreglass outboard engine bracket
- Towing bridle patches
- Bow handle
- Lifelines
- Boat valise
- Bellows
- Repair Kit
- Owners manual

MAIN OPTIONAL ACCESSORIES

- Air deck
- Lifting fitting kit for twin arm davits
- Additional fibreglass seat kit

Standard and Optional Features

STANDARD EQUIPMENT

Each boat in the Avon range is delivered complete with a comprehensive range of standard equipment, to enable you to use and enjoy your boat to its maximum potential. You will also find each product accompanied by an owner's manual, foot pump and repair kit, sufficient to complete simple repairs.

OPTIONAL EQUIPMENT

Avon offers you a range of optional equipment to enhance your boat and suit your particular needs. All of these items are obtainable through your local dealer.

1. Wooden jointed oars (Rovers, Dinghies)
2. The towing bridle patches allow efficient towing (Rovers, Dinghies)
3. Moulded lifeline retainer
4. Overall cover (Seasport De Luxe, Seasport Jet Rib, Rover Ribs)
5. Rib "A" frame plus navigation lights
6. Bow locker cushion (Adventure)

Other Products and specifications

Total safety and finest quality

LIFERAFTS

AVON has a long pedigree in the design and manufacture of liferafts. An investment in an AVON liferaft is an investment in the finest quality and safety money can buy.

See our separate specialist Liferaft brochure for details.

RIVERBOATS

AVON riverboats can be found on most of the world's most challenging and exhilarating white water rivers.

The preferred choice of many professionals, AVON riverboats have provided the ultimate in excitement and safety for over 30 years.

See our separate specialist Riverboat brochure for details.

FENDERS

AVON manufactures a range of inflatable fenders for quick and easy use. Simply inflated and attached, these extremely strong and durable fenders can be quickly deflated and easily stowed after use.

See our separate literature for details.

(1) Engine weights and power rating. Always ensure that the weight and power rating of your engine does not exceed the capacity of your craft.

Avon advise that the maximum engine sizes for its craft can be used safely on corresponding craft.

(2) Dimensions shown do not include outboard engines. Dimensions for Adventure include standard seating and consoles.

(3) Recreational Craft Directive No. 94/25/EC is a legal requirement within the EEC only, and is applicable to craft 2.5 m to 24 m overall length.

(4) 104 hp / 76,5 kw for the United States models.

(5) Stowed dimensions: For the RIBS this refers to the hull with the deflated buoyancy tube and for the foldable boats, the dimensions of the boat folded in its bag/valise.

* with slatted floor

** awaiting approval

As a leading manufacturer, Avon carries out a continuous programme of product improvements and safety awareness. Specifications are subject to change without notice, although all details shown are accurate at the time of going to press. Occasionally it may become necessary to produce Avon products with a different trim than was originally specified. All dimension measurements indicated have a tolerance of +/- 3%. Weight and speed measurements have a tolerance of +/- 5%. Products availability may vary by country, and carrying capacities on some models will vary with seating configurations. Please check with your dealer. Some models illustrated may feature non-standard equipment. See standard and optional equipment listings for full details. Maximum and approximate performance figures will vary with size and make of outboard, propeller, load and operating conditions. We recommend that you read and understand your owner's manual. Safe boating is enjoyable with the rights of other water users respected. Always wear the appropriate clothing and a personal flotation device or approved life jacket. Follow the manufacturer's recommendations for both boat and engine. It is recommended that you consider training to improve your boat handling skills. Even skilled operators should take extra care when using maximum hp/kW rated outboards, especially in adverse sea conditions or at high speeds. Your dealer will advise on the suitability of a particular outboard to meet your requirements. Avon design categories relate to European directive No. 94/25/CE and all characteristics are given according to the standards of ISO 6185. In certain countries these standards can be more restrictive.
