Banham Patent Locks Ltd was founded in 1926 by lock pioneer William F. Banham when he invented the first automatic door bolt. The Banham Group is still owned and run by the Banham Family and the company's present Chairman is the founder's Grandson, taking the company into it's third generation.

Mr & Mrs W.F. Banham

Banham offer a complete fire and security service with experienced consultants available to advise on how to make your premises safe and secure. Our advice is entirely free with no obligation and available for both home and business premises. With over 84 years of excellence and experience in Security, Banham has built its reputation on fitting high quality products and putting customer service first.

Banham is now the largest supplier of burglary prevention systems in London. For 5 consecutive years Banham have been awarded the coveted Metropolitan Police Gold Award for the low number of false police activations, highlighting the quality of our installations. We are proud to be accredited by the Master Locksmith Association and are a gold standard member of the National Security Inspectorate.

CERTIFICATE NO. NACIG/1836

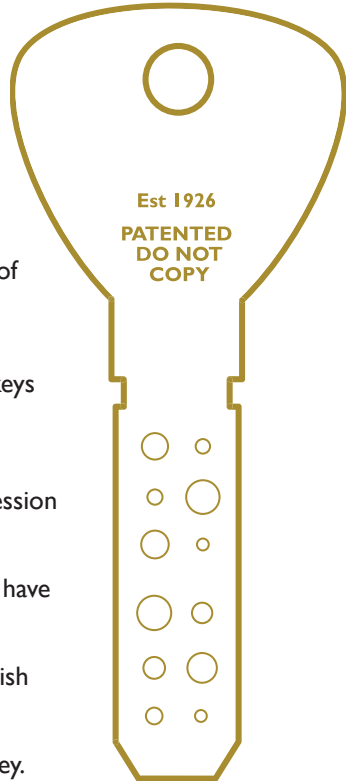

BANHAM LOCKS

The Banham Key Registration System

Banham has the most effective key registration system, protected by Patents on all our new keys & high security locks. Whilst others may purport to offer such a system, Banham offers an exclusive, totally reliable and foolproof system, on the basis that our latest key section is protected by the law of patent.

- You can feel secure in the knowledge that your keys cannot be copied without your consent.
- We will only copy keys for people registered or authorised on our registration system & in possession of a Banham Gold Key Card.
- We hold on record the number of keys that you have copied for your added security.
- Our Door Locks are Insurance Approved to British Standard 3621 & 8621.
- All your locks can work off one single Banham Key.

Keys can be cut at the following Banham locations:

Kensington
Vauxhall
Golders Green
Guildford
Maidenhead
Berkhampsted

SECURITY

RECOMMENDATIONS

This guide gives you an overview of Banham's comprehensive product range.

Statistics prove that by taking quite simple, relatively inexpensive precautions you can deter the would-be intruder(s), the majority of whom are opportunistic burglars. It is of course necessary to take extra precautions to keep out the professional burglar but remember that security buys you time, something the intruder does not have.

The list below will help you to decide what steps you need to take to protect your premises.

All Banham locks are insurance approved.

FRONT DOOR - should have a BS3621 Kitemarked 5, 6 or 7 lever mortice lock or cylinder mortice lock together with a cylinder rim deadlock also to BS3621.

SIDE & BACK DOORS - fit a 5, 6 or 7 lever BS3621 mortice lock together with top and bottom security bolts.

WINDOWS - windows are most vulnerable to forced entry, especially at the rear of the house. Fit window locks to all ground and upper floor windows where necessary particularly where there is a flat roof or drainpipe etc.

FRENCH WINDOWS & PATIO DOORS - fit appropriate key-operated locks to the top, bottom and centre (if necessary) of doors.

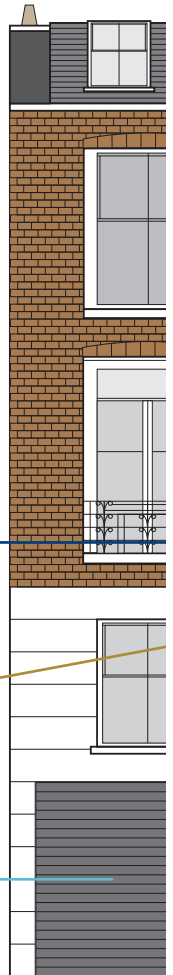

GARAGES & OUTBUILDING - can provide an easy access point to burglars or contain valuable equipment. Make sure garage doors are secure with suitable locks or that they are security shutters or secure garage doors installed.

INTRUDER ALARMS - the installation of a simple intruder alarm with the deterrent value of a strategically located external siren cover bearing the Banham name, with pulsing lights incorporated to provide clear indication of a live and fully functional system. Designed and installed to be fully compliant with the ACPO policy, DD243 and European Standard EN 50131-1:2006 / PD6662 for Intruder Alarm installations. Our Alarm Receiving Centre provides 24-hour monitoring for all types of alarm systems. The Keyholding & Alarm Response service is for domestic & commercial properties.

FIRE PROTECTION - minimise risk of injury and damage to property by installing a fire alarm, smoke detectors & fire extinguishers.

CCTV - for an increased level of security to monitor your business or home.

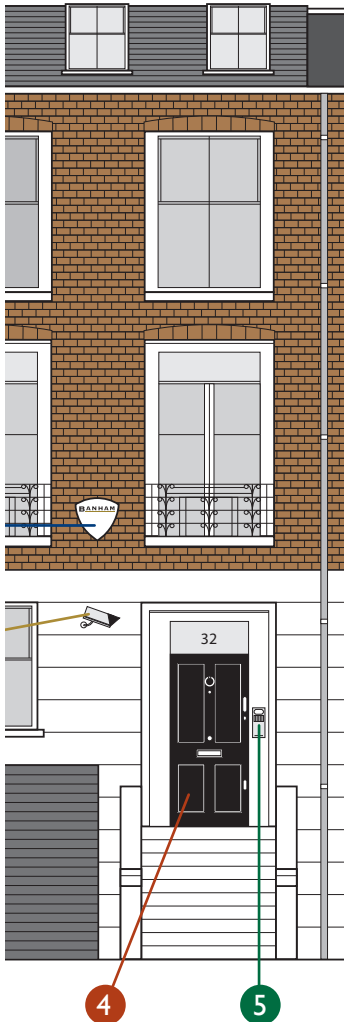

DOOR ENTRY & ACCESS CONTROL - giving you the opportunity to see or talk to visitors before allowing entry.

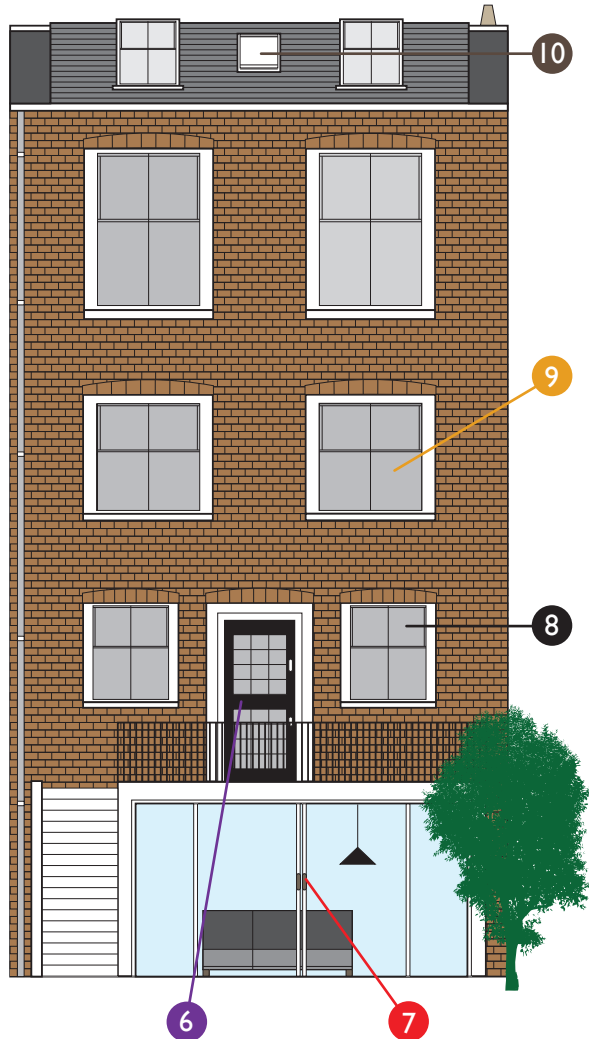

- 1 ALARM SYSTEM
- 2 CCTV
- 3 GARAGE Roller doors with remote control
- 4 MAIN ENTRANCE Mortice lock, Security Deadlatch, Hinge Bolts, Steel Reinforcing Strip, Steel Sheet, Anti-Bandit Gate, Door Vue, Door Chain, Grille for glass area, Alarm Keypad Control

ADDITIONAL SECURITY

DI00 Door Vue

- The Door Vue incorporates three optically ground convex lenses giving unrestricted vision through the door with a field of view of 170°.
- Finish: Polished Brass / Chrome.

CI22 Banham Door Chain

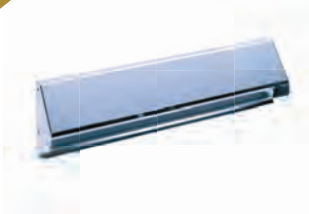

- This door chain is spring loaded to prevent it being slid back when the door is partially open.
- Finish: Satin Brass / Chrome & Polished Brass / Chrome.

P2005 Banham Padlock

- Ideal for most applications.
- Operates on the Banham registered key. Key retention ensures the padlock cannot be left open and the key taken out of the cylinder.
- Padlock body complete with drainage holes to prevent build up of water.

LB01 Letter Box Protector

- Ideal protection for your letter box denying intruders access to your premises.
- For fitting to the inside of wood doors.
- Finish: Satin Brass / Chrome & Polished Brass / Chrome.

H103 Hinge Reinforcing Bolts

- These robust bolts are designed to secure the hinge side of the door and come into operation automatically when the door is closed.
- A must for all exit doors.

* fitted in pairs.

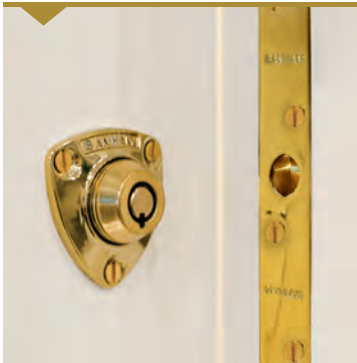

R102 2 5/8" (67mm) Mortice Rack Bolt

- It is suitable for fitting to internal doors or to the top of French doors. Optional fixed or detachable key. This lock can be supplied with 7" (178 mm) boxed striker plate embodying a boxed recess as additional protection.
- Finish: Polished Brass / Chrome.

* for Internal & French Doors.

R104 Cylinder Mortice Rack Bolts

- The R104 is a more sophisticated version of the R102 and is ideal for fitting to glass panelled doors as it features differing keys. It is also suitable for French doors, cupboards etc. 7" (178 mm) boxed striker plate fitted as standard.
- Finish: Polished Brass / Chrome.

* for Internal & French Doors.

WINDOW LOCKS

FOR SASH WINDOWS

W107 Sash Window Lock

- This key operated lock enables a window to be locked shut or open in two positions, allowing fresh air in while giving protection.
- Finish: Polished Brass.

W121 Sash Stops

- Enables a window to be locked in open or closed position.
- Finish: Polished Chrome / Satin Brass.

FOR WOOD CASEMENT & FRENCH WINDOWS

W104 1 1/4" (30mm) W105 1 3/4" (45mm) Mortice Rack Bolts

- Security bolts for wood casement and wood French windows. Fitted to top & bottom of French door. Protects against intruders who break the glass in order to operate the casement handle.
- Finish: Polished Brass / Polished Chrome.

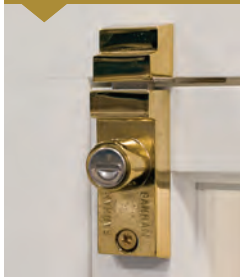

W106 Casement Windows & Fanlight Locks

- This lock is specially made for rebated and narrow stile wooden framed casement windows and fanlights. These are at right angles to the reception plate and secured into the stile by a heavy fixed thread. When locked it tightens the stile to the frame for maximum security.
- Finish: Polished Brass / Polished Chrome / Black / White.

B119 Banham Multi-Purpose Bolt

- Designed to give security to French doors and inward opening casement windows.
- The multi purpose bolt incorporates: solid long shoot bolt and cylinder key security.
- Finish: Polished Brass / Chrome.

FOR ALUMINIUM & METAL WINDOWS

W108 Original Lock for Aluminium & Metal Windows

- This key operated lock enables a window to be locked shut in the closed position only.
- Finish: Polished Brass / Chrome.

W109 Cylinder Lock for Metal Windows

- This key operated lock enables a window to be locked shut in the closed position only.
- Finish: Polished Brass / Chrome / Black / White.

W115 Dome Screw Lock for Metal Windows

- This lock is specially made for rebated and narrow stile wooden framed casement windows and fanlights. These are at right angles to the reception plate and secured into the stile by a heavy fixed thread. When locked it tightens the stile to the frame for maximum security.
- Finish: Polished Brass / Chrome.

SECURITY DOORS

External Hardwood Security Doors

Front Side Face

- Banham hardwood door's available in either a four or six panel style. The recessed panels are fitted with integral 1.5 mm steel sheet for added strength.
- Banham hardwood doors can be supplied primed or unfinished - we can also supply to customer sizes.

Security doors feature a solid steel centre

Rear Side Face

Internal Hardwood Security Doors

- These doors are laminated with a solid core hardwood centre. They have a 30 minute fire check rating and can have planted mouldings to give a panelled effect.
- Exterior quality, fire resistant, flush doors. 30/30 Rating to BS376 Part 8.

Security door to British Standard 376 Part 8

Banham Steel Sheet

The weakest spot in the door design, second only to the lock and hinge area is the central core. It is obvious to say that if the lock and hinge part of a door does not relent; the brunt of most of an attack is focused on the central area. Unless the door frame is fortified there is a good probability that the panel could split, and break open. A simple way of reinforcing the door is a fortified steel sheet made of galvanised steel.

Stock colour is White or RAL / BS colours available at an additional charge

- Banham steel sheet is made from 18 gauge galvanised steel. These can be bolted through a Banham '30 minute fire check' Solid Core Door (BS376 Part 8) with mushroom headed sheet bolts.
- The standard finish is white. Other colours available on request.

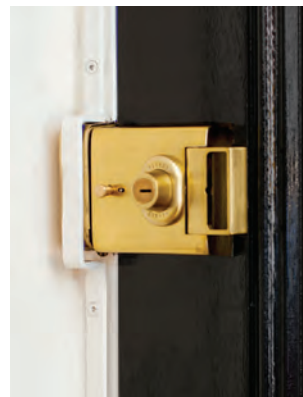

Banham Escutcheon & Door Pull

Banham Reinforcing Strip

- The Banham steel reinforcing strip is screwed onto the back of the door frame thus considerably strengthening the security.
- Available for both lock and hinge side.

GATES, GRILLES & SHUTTERS

Security Gates

Anti-Bandit Gate

- Be safe when you open your front door, Banham anti-bandit gates provide an effective barrier to undesirables. The high security version is ideal to withstand a prolonged attack, and comes with its own steel frame and two high security mortice locks.

All gates can be operated with the same key as your front door

In a range of stock colours or RAL / BS colours at an additional charge

High Security Gate

Collapsible Steel Gates

- These Collapsible gates give protection to windows and doors. Manufactured using galvanised steel, with a stove enamelled paint finish, fitted with special Banham security tracking and secured by high security Banham locks which can operate with the same key as the Banham registered door locks and padlocks.

- The gates can be pushed back out of sight when not in use.

- Standard finish: White. Other colours available on request. Can be supplied with lift out or lift up track.

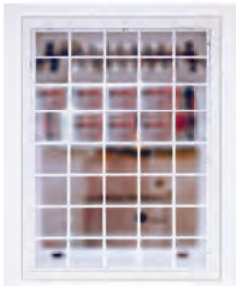

Security Grilles

Diamond Mesh Grilles

- Available in 3 sizes.

Mesh Size	Inches	Millimetres
1	7" x 2 1/2"	178 x 63 mm
2	3 1/2" x 1 3/4"	89 x 45 mm
3	1 5/8" x 5/8"	42 x 16 mm

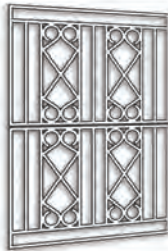

Strapping Grilles

- These Ideal for Georgian type windows.

Barred Grilles

- Usually for exterior use.
- Round or square bars.

STYLE 1

STYLE 2

STYLE 3

STYLE 4

STYLE 5

STYLE 6

Ornamental Grilles

Banham offer a wide range of steel security grilles for windows and doors

- Grilles are made to measure and can also be hinged or removable to facilitate window cleaning and emergency exit. Fitted within the window reveal or on the wall surround.
- Standard finish - White. Other colours available upon request.
- Designs are subject to width restrictions.

Security Shutters

Continental Shutters

Continental Shutters have become a frequent security choice for both commercial & residential properties alike. The uniquely neat finish of Security Shutters, due to the compact aluminium boxes & slim line design, offer a tight coiling for a small shutter box. When fitted, the shutter offers exceptional strength as well as heat & sound insulation, shading, blackout and privacy.

- Suitable for higher security applications.
- Available in white / brown and RAL / BS colours.
- Spans widths of up to 5 metres.
- Operation can be with a switch or a key.
- Switch for added security. A remote control is also available.

Steel Roller Shutters

- The classic steel roller shutter is ideal for industrial installations for both internal and external applications offering protection against burglary and vandalism. Its galvanised finish adds to its robust construction.
- Can be manually or electrically operated.
- Available in a powder coated finish.
- Perforated slat available.

Roller Garage Doors

Combining great design and exceptional build quality, offering attractive effortless protection for your home. Vertical opening and the benefits of insulation to provide the perfect solution for any single or double garage.

- We supply and fit insurance approved garage doors.
- 'Secured by Design' Police preferred specification option available, tested to LPS 1175.

BANHAM FIRE

Fire safety in the home and workplace can save lives & money. Banham Fire can provide free advice on fire security solutions of the highest standard at competitive rates. Contact one of our trained specialists for a fire risk assessment of your business or domestic premises & free survey.

Prevent

- Simple precautions can be very effective to avoid fires starting. Minimising the risk of fire breaking out should be a priority for fire safety and our trained surveyors can provide Fire Risk Assessments for residential and commercial premises.

Detect

- The most dramatic reduction in fire loss is achieved from a combination of both fire risk assessments and the utilization of accompanying Automatic Fire Detection. Fire alarm systems are available in a variety of styles from small conventional to multi-loop fire alarm panels - Banham can design a fire alarm solution to match your needs.

Contain

- Banham can assist you with products to contain small fires and smoke and help stop them from spreading. For businesses, assessing Fire Safety Risks and implementing measures to fight, detect and give warning of fire is the responsibility of the employer.

Escape

- Planning exit routes and keeping those routes clear of obstructions and ensuring the safe evacuation of the building are the responsibility of employers as part of a Fire Risk Assessment. For commercial properties, substantial fire extinguishing capability and signage will be required.

SAFES & GUN CABINETS

Free Standing & Security Safes

Nearly all our safes can be supplied with key, combination or digital locking and some are available with the new fingerprint recognition system. We also offer a wide range of options and services that include delivery, installation and floor bolting.

A complete range of insurance rated safes

Safes and Security Cabinets

- The need for secure storage facilities to protect valuables at home is becoming as important as security in commercial premises, with insurers requiring more and more people to buy safes as a condition of continuing insurance.
- The method of locking is by either key, combination or both, and digital lock.

Fire-Resistant Cabinets

- Banham have an extensive range of fire resistant safes and filing cabinets for storing documents and computer data.

Cash & Deed Boxes

- Banham supply a comprehensive range of secure Cash and Deed boxes.

Secured by Design

- Banham supply a complete range of Secured by Design safes.

Wall Safes

Safes and Security Cabinets

- Body 1/4" (6 mm) steel plate electric welded seams to give one solid unit.
- Front frames, heavy section solid steel. Size D - fitted with four adjustable anchor lugs.
- Fitted with two adjustable anchor lugs to firmly embed into wall.
- Lock frame machined from 1 1/2" (38 mm) solid mild steel.
- Door Sizes A, B, C & D. 1/2" (13 mm) solid steel plate.
- All safes can be fitted with micro switches for connection into alarm circuits.
- Door locks. Seven lever key lock supplied with two keys; alternative locking by three wheel keyless combination lock and digital lock.
- Locking into the solid lock frame.
- Drill resistant over entire lock area.
- The door is hung on concealed pivots.
- Size D. Three locking bolts on the front edge.

'C' (Four Brick Double)	45 lbs (20.3 kgs)	12" x 9 1/4" x 6 1/2" (305mm x 235mm x 165mm)	11 1/2" x 7 3/4" x 5 3/4" (292mm x 197mm x 146mm)
'D' (Heavy Duty 3 Bolt fitted with removable shelf)	54 lbs (24.4 kgs)	14" x 12" x 6 1/2" (356mm x 305mm x 165mm)	13 1/2" x 11 1/2" x 4 5/8" (152mm x 229mm x 121mm)

Gun Cabinets

- Strong 2 mm thick fully welded steel construction (including welded top).
- Full length anti-jimmy bar.
- Full length anti-lever flange and door interlock.
- Recessed door with multiple folds on door and door housing.
- High density foam divider and floor mat.
- Grey textured powder coat finish.
- 14 mm fixing holes in back and base.
- Superior strength 7 lever safe deadlock.
- Extra door reinforcement.

INTRUDER ALARMS

- We offer a range of alarm systems to suit small domestic properties right through to larger private properties & commercial installations.
- Alarm Systems can be individually designed to meet your requirements and your insurance requirements.
- All installations comply with the ACPO Policy, DD243 & European Standard BS EN 50131 / PD6662 requirements and NSI approved.
- We guarantee not to raise the annual maintenance and monitoring charges above the annual rate of inflation.
- We offer a lifetime guarantee on any systems connected to our Alarm Receiving Centre on a fully Police monitored contract.

Routine Maintenance Inspections:

- Our fleet of trained engineers can regularly check your system is in good working order. With 2 optional inspection visits per annum, the system is checked, all batteries & contacts replaced as necessary, free of charge.
- Our Emergency Service Department is available 24 hrs/day with attendance within 4 hours.
- Your alarm panel has Automatic Remote Maintenance (ARM) software, which verifies that your entire system is fully functional every minute of the day. Full reports on the status of your system can be uploaded and checked instantly - this can be printed and copied to you if required.

Panic Alarm

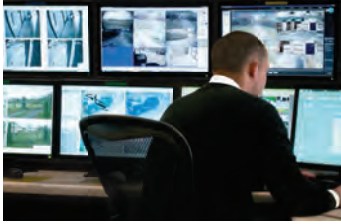

Monitoring Your Alarm with the Alarm Receiving Centre (ARC):

Banham provides 24 hour monitoring for all types of alarm systems. You can choose your own level of response:

- Fully Monitored system **Keyholder** with 24 hour Police Response.
- **Keyholder Response only** - for clients who do not require Police response but would like the added security & peace of mind. The ARC will contact your nominated keyholders to advise of an alarm activation of any kind.
- We can also provide professional Keyholders through **CMS Keyholding** - please see page 28.

CCTV & RECORDERS

We design, supply & install a full range of CCTV & DVR equipment. Camera's can be a formidable tool in the fight against crime, with CCTV monitoring providing a visual aid to the security & safety of your home or business. CCTV can be installed to interface with intruder alarm systems and the Banham Group can also CCTV monitor your property through our own Alarm Receiving Centre.

CMS Keyholding

A **BANHAM** Group Company

When you're not there,
we can be

24
HOURS
A DAY

CMS Keyholding pioneered professional fast response security services for homes and businesses in the capital two decades ago. We were the first to use a fleet of motorcycles to enable us to deal with any emergencies as quickly as possible and we remain the best in the business. Covering London and the Home Counties, our Key Guards are highly trained, comprehensively equipped and fully vetted. You can be confident that you and your property will be in safe hands.

The services we offer are affordable, totally professional and always bespoke to exactly meet your individual needs and requirements. From multi-site businesses through to individual homes, our priorities are to safeguard your property, and give you peace of mind in that we are holding your keys for any emergency. All our Key Guards are fully licensed with the SIA (Security Industry Authority) and we are members of the SIA Approved Contractors Scheme.

We operate in compliance with:

- BS 7984:2008 (Keyholding & Response Services).
- BS EN ISO 9001:2008 (Quality System).
- BS 7858:2006 (Security Screening).

Protecting your property 24 hours a day
