

DDA ENTRY PANELS

With a comprehensive understanding and appreciation of the Disability Discrimination Act 1995 regulations, BPT have been supplying DDA panels since 2000 and also offer specialist DDA training.

BPT have put a lot of work into clarifying the issues that relate to door entry and access control systems, into fully understanding what is required in order to assist you to meet your duties under the DDA and into subsequent product development. There are over eight million disabled people in the UK as well as an increasingly elderly population, and our understanding and appreciation is highly valued by our customers, in both the public and private sectors.

What products are available to meet the requirements?

We can offer many solutions to providing access to goods, facilities and services to disabled persons. Vandal resistant entry panels can be manufactured, depending on the customer/site requirements, to incorporate:

- Large illuminated tactile and/or Braille buttons
- A 'Speak Now' red LED to indicate when to speak and a 'Door Open' green LED to indicate lock release/door opening to those with a hearing impairment
- An Audible tone to indicate lock release/door opening to those with a visual impairment
- A video camera for added security
- Proximity access control to allow access to the rightful occupants with ease
- Tactile and/or Braille signage for those with a visual impairment
- A Hearing aid induction loop for those with a hearing impairment
- Double height panels to accommodate wheelchair users

Don't take chances... specify BPT!

Useful information on all aspects of the DDA can be obtained from the Centre for Accessible Environments at www.cae.org.uk, the Government's Disability Unit at www.disability.gov.uk and The Equality and Human Rights Commission at www.equalityhumanrights.com or on their helpline, 08457 622 633.

BPT DDA ENTRY PANELS

VRVDDA/1 SINGLE BUTTON VIDEO ENTRY PANEL WITH VRSH/300/2 SURFACE HOUSING

Our entry panels have all the quality, durability and style you expect from BPT, but are adapted to include tactile illuminated buttons, Braille characters and LED indicators.

The range is based on our interpretation of the relevant requirements of the DDA and we also offer other designs and styles including double height panels and proximity access control.

VRADDA/6 + HMI HEARING AID MODULE

A 12swg stainless steel vandal-resistant audio flush mount entry panel, which includes six illuminated/tactile 'CALL' buttons, 'SPEAK NOW' LED and 'DOOR OPEN' LED. This panel has front plate dimensions of 470mm high x 120mm wide and the panel shown includes a HMI hearing aid module.

This module enhances speech and reduces background noise for hearing aid users. The use of this module is likely to increase the size of panel. Dimensions will be provided at the time of design.

VRVDDA/1

12swg stainless steel vandal-resistant video, flush mount entry panel, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED (requires MVT/100 mono camera or MVTC/100 colour camera), 325hx120w front plate dimensions

VRVDDA/1 + VRSH/300/2 SURFACE HOUSING

80mm depth at top reducing to 70mm at the base

VRADDA/DUAL

12swg stainless steel vandal-resistant audio entry panel, flush mount with dual controls, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED, 700hx120w front plate dimensions

VRAPDDA/5
12swg stainless steel vandal-resistant audio entry panel with a proximity access control reader cut-out to allow contact-free access to the rightful occupants

VRADDA/1

12swg stainless steel vandal-resistant audio entry panel, flush mount, includes illuminated/tactile 'CALL' button, 'SPEAK NOW' LED and 'DOOR OPEN' LED, 225hx120w front plate dimensions

VRADDA/1 + VRSH/300/1 SURFACE HOUSING

70mm depth at top reducing to 60mm at the base
