

FAULTY TEMPERATURE SENSOR REV. 01

Electronic appliances can be provided with two different types of temperature sensors:

1. replaceable (part number is available in the spare part list of the appliance)
2. not replaceable (part number is not available in the spare part list of the appliance)

The cables of the temperature sensors that are not replaceable are foamed in the inside of the appliance.

In case of a faulty temperature sensor that is not replaceable (which is displayed through a symbol on the electronic board or after checking it by following the procedure described in the Service Instructions Publ. no. 599374205), it is possible to carry out the repair of the appliance by ordering the relevant kit as described in Tab. A.

SPARE PART NOS.:

5 different kits have been created according to the different installations of the temperature sensors:

KIT	PART NO.	INSTALLATIONS
A1	50286481002	Only for (cooler) Door On Door type refrigerators with ERF2000 electronic board
A2	50286482000	Only for (cooler) Door On Door type refrigerators with FLEC electronic board
B	50286483008	Foamed sensor with foamed cable
C	50286484006	Sensor in view with foamed cable
C1	50292572000	Sensor in view with foamed cable (only for ZERO DEGREE models)
D	50286485003	Accessible sensor with foamed cable

The kits include:

50286481002 - KIT A1

PART NO.	DESCRIPTION	QUANTITY
2425035454	ERF 2000 control and display board	1
5993741346	Service instructions	1

50286482000 - KIT A2

PART NO.	DESCRIPTION	QUANTITY
2425035371	ERF 2000 control and display board	1
50287143007	Connector + wiring	1
50287144005	Connector + cable for temperature sensor	1
50287145002	15 mm heat shrink tubing	2
5993741353	Service instructions	1

50286483008 - KIT B

PART NO.	DESCRIPTION	QUANTITY
2425155013	Temperature sensor for the service	1
2425156011	Housing cover for temperature sensor	1
2230073013	White screw cover	1
5190900133	Fixing screw	1
50287147008	50 mm heat shrink tubing	1
50287145002	15 mm heat shrink tubing	2
5993741361	Service instructions	1

50286484006 - KIT C

PART NO.	DESCRIPTION	QUANTITY
2425155013	Temperature sensor for the service	1
50287147008	50 mm heat shrink tubing	1
50287145002	15 mm heat shrink tubing	2
5993741379	Service instructions	1

50292572000 - KIT C1

PART NO.	DESCRIPTION	QUANTITY
2425155021	Temperature sensor for the service	1
50287147008	50 mm heat shrink tubing	1
50287145002	15 mm heat shrink tubing	2
5993741379	Service instructions	1

50286485003 - KIT D

PART NO.	DESCRIPTION	QUANTITY
2425155013	Temperature sensor for the service	1
50287147008	50 mm heat shrink tubing	1
50287145002	15 mm heat shrink tubing	2
5993741395	Service instructions	1

The fitting procedure regarding the different kits is described in the relevant appendix of this Service Bulletin and in any case in the fitting instructions supplied with the kit.

Appendix KIT A1

REPLACEMENT PROCEDURE FOR APPLIANCES WITH AN A1 – 50286481002 KIT

Warning! Unplug the appliance, before carrying out the operations.

- a) Access the control board support of the appliance.
- b) Remove the support and the previous electronic boards.
- c) Disconnect the connectors from the previous power board.
- d) Connect the connectors to the new power board.
- e) Fit the support and the new electronic boards (power and display board), fig. A

Note:

Even if the faulty temperature sensor of the evaporator is still connected to the connector, the new electronic board uses only the air temperature sensor of the refrigerator.

Appendix KIT A2

REPLACEMENT PROCEDURE FOR APPLIANCES WITH AN A2 – 50286482000 KIT

Warning! Unplug the appliance, before carrying out the operations.

- a) Access the support of the control panel of the appliance.

- b) Cut the cable of the temperature sensor of the evaporator as shown in figure.
Note: the temperature sensor of the evaporator is fitted in the first positions on the left side of the connector.

- c) Insulate the cable previously cut with some electrical insulating tape.

- d) ~~Cut the cables of the temperature sensor as shown in figure.~~

- e) Cut the wiring as shown in figure.

cd001456

- f) Cut and remove the end of the sleeves from all cables.

cd001457

- g) Connect the wiring to the new connector (the two-pole cable in the first two positions on the left side of the connector; the three-pole cable in the first three positions on the right side of the connector) taking care of the colours (for ex.: blue with blue, black with black, etc.).

cd001458

- h) View of the new connections:
A. two-pole cable
B. three-pole cable

cd001459

- i) Solder the air temperature sensor cables.

cd001460

- j) Connect the cables of the new connector of the sensor to the soldered cables.
Note: before soldering, fit the two 15 mm heat shrink tubings to the cables of the new connector.

cd001461

- k) Warm up the two heat shrink tubings to insulate the 2 soldered junctions.

cd001462

- l) Connect the connectors to the new power board.

View of the power board (from the component side)

J1 wiring connector (5 pin)
J3 temperature sensor connector (6 pin)

Note:

The new electronic board uses only the air temperature sensor of the refrigerator.

In some models the previous FLEC electronic board displayed GREEN digits. The new electronic board displays only RED digits.

Appendix KIT B

REPLACEMENT PROCEDURE FOR APPLIANCES WITH A B – 50286483008 KIT

Warning! Unplug the appliance, before carrying out the operations.

- a) Remove the drawers and/or the shelves from the inside of the appliance.

INDENTATION EXEMPLE

cd001463

- b) Identify the indentation on the compartment wall (see example above).
To make sure that the indentation's position is in the correct place, check Service Instructions publ. no. 599374207.

cd001464

- c) Drill a 10 mm hole in the compartment just next to the indentation.

cd001465

- d) Cut the cable of the faulty temperature sensor.

cd001466

- e) Take the cable with some pliers (note: the faulty sensor must not be removed from the inside of the compartment).

cd001467

- f) Pull out the cable of the temperature sensor.

cd001469

- g) Cut and remove the sleeve according to the measures shown in the figure.

cd001471

- h) Solder the two cables.

cd001470

- i) Insert the cable into the 50 mm heat shrink tubing.

cd001494

- j) Insert the cables of the new temperature sensor into the two 15 mm heat shrink tubings.

cd001495

- k) Solder the cables of the new temperature sensor with the cables of the cable pulled out before.

cd001496

- l) Warm up the two heat shrink tubings to insulate the 2 soldered junctions.

cd001475

- m) Warm up the 50 mm heat shrink tubing to insulate the cables with the junctions.

cd001476

- n) Fit the new sensor into the cover of the housing and fit the cable as shown in figure.

cd001483

- o) Insert the element P in the hole previously drilled in the compartment (where the cable comes out).

cd001477

- p) Fit the cover in the rectangular seat in the compartment (if no seat is there, place the cover so as not to interfere with the drawers and/or with the shelves) and fix it with the screw supplied with the kit.

cd001478

- q) Fit the screw cover.

Appendix KIT C and C1

REPLACEMENT PROCEDURE FOR APPLIANCES WITH

KIT C - 50286484006

KIT C1 - 50292572000

Warning! Unplug the appliance, before carrying out the operations.

- a) Remove the drawers and/or the shelves from the inside of the appliance.

cd001480

- b) Access the faulty temperature sensor.
Note: the support of the temperature sensor might be different according to the appliance.

cd001490

- c) Cut the cable of the faulty temperature sensor after checking that the new sensor reaches its place.

Only for the Kit C1, for isolation reasons, the cable of the new sensor must not be shortened! The exceeding cable must be properly positioned later.

cd001491

- d) Cut and remove the sleeve according to the measures shown in the figure.

cd001492

- e) Solder the two cables.

cd001493

- f) Insert the cable into the 50 mm heat shrink tubing.

cd001494

- g) Insert the cables of the new temperature sensor into the two heat shrink tubings.

cd001495

- h) Solder the cables of the new temperature sensor with the cables of the cable pulled out before.

cd001496

- i) Warm up the two heat shrink tubings to insulate the 2 soldered junctions.

cd001497

- j) Warm up the 50 mm heat shrink tubing to insulate the cables with the junctions.
- k) Fit the new sensor into its original housing. The exceeding cable must be properly positioned.

Appendix KIT D

REPLACEMENT PROCEDURE FOR APPLIANCES WITH A D – 50286485003 KIT

Warning! Unplug the appliance, before carrying out the operations.

- a) Remove the drawers and/or the shelves from the inside of the appliance.

cd001481

- b) Remove the protection grid of the temperature sensor.
Note: the protection grid might be different according to the appliance.

cd001485

- c) Remove the faulty temperature sensor.

cd001490

- d) Cut the cable of the faulty temperature sensor.

cd001491

- e) Cut and remove the sleeve according to the measures shown in the figure.

cd001492

f) Solder the two cables.

cd001493

g) Insert the cable into the 50 mm heat shrink tubing.

cd001494

h) Insert the cables of the new temperature sensor into the two 15 mm heat shrink tubings.

cd001495

i) Solder the cables of the new temperature sensor with the cables of the cable pulled out before.

cd001496

j) Warm up the two heat shrink tubings to insulate the 2 soldered junctions.

cd001497

k) Warm up the 50 mm heat shrink tubing to insulate the cables with the junctions.

cd001498

l) Fit the new sensor into its original housing.
Note: place the cable so that it doesn't get in contact with the grid's hooks shown in the figure, in order to avoid damaging the cable when fitting the grid.

m) Reposition the protection grid of the temperature sensor.
