Walkaround

Device parts

Before using the product, familiarize yourself with its components.

1	Optional tray 3
2	Tray 2
3	Tray 1 (pull to open)
4	Latch to open the front door (provides access to the print cartridge)
5	Top output bin
6	Control panel
7	Convenience stapler
8	Right-side cover (provides access to DIMMs)
9	On/off switch
10	Interface ports (see Interface ports on page 6)
11	Scanner assembly
12	ADF output bin
13	Automatic document feeder (ADF)
14	Rear output bin (pull to open)

Interface ports

1	Fax port (HP LaserJet M3027x and HP LaserJet M3035xs only)
2	Network connection
3	Foreign interface harness (FIH) port
4	Type A Hi-Speed USB 2.0 connection for adding accessories
5	Power connection
6	Type B Hi-Speed USB 2.0 connection for printing
7	EIO slot

Device software

The printing-system software is included with the device. See the getting started guide for installation instructions.

The printing system includes software for end users and network administrators, and printer drivers for access to the device features and communication with the computer.

NOTE For a list of printer drivers and updated HP printer software, go to www.hp.com/go/LJM3027mfp_software or www.hp.com/go/LJM3035mfp_software.

Supported operating systems

The device supports the following operating systems:

Full software installation

- Windows XP (32-bit and 64-bit)
- Windows Server 2003 (32-bit and 64-bit)
- Windows 2000
- Mac OS X V10.2.8, V10.3, V10.4 and later

Printer driver only

- Linux (Web only)
- UNIX model scripts (Web only)

NOTE For Mac OS V10.4 and later, PPC and Intel Core Processor Macs are supported.

Minimum system requirements

In order to install and use the device software, your computer must meet the following minimum requirements:

Windows requirements

- Pentium II (233 MHz) processor
- 64 MB of RAM
- 35 MB of disk space
- SVGA 800x600 16-bit color monitor

Macintosh requirements

- G3, G4, or G5 PowerPC processor
- 128 MB of RAM
- 30 to 50 MB of disk space

Supported printer drivers

Operating system ¹	PCL 5	PCL 6	PS level 3 emulation
Windows ^{2,3}	✓	✓	✓
Mac OS X V10.2 and later			✓
Linux ⁴			✓

¹ Not all device features are available from all drivers or operating systems.

² For Windows 2000 and Windows XP (32-bit and 64-bit), download the PCL 5 driver from www.hp.com/go/LJM3027mfp_software or www.hp.com/go/LJM3035mfp_software.

³ For Windows XP (64-bit), download the PCL 6 driver from www.hp.com/go/LJM3027mfp_software or www.hp.com/go/LJM3035mfp_software.

⁴ For Linux, download the postscript level 3 emulation driver from www.hp.com/go/linuxprinting.

The printer drivers include online Help that has instructions for common printing tasks and also describes the buttons, checkboxes, and drop-down lists that are in the printer driver.

Select the correct printer driver

Printer drivers allow you to gain access to the device features and allow the computer to communicate with the device (using a printer language). Check the installation notes and readme files on the device CD for additional software and languages.

The device uses the PCL 5, PCL 6, and HP postscript level 3 emulation printer description language (PDL) drivers.

- Use the PCL 6 printer driver for the best overall performance.
- Use the PCL 5 printer driver for general office printing.
- Use the HP postscript level 3 emulation driver for printing from postscript level 3 emulation needs, or for postscript flash font support.

Universal printer drivers

The HP Universal Print Driver Series for Windows includes separate HP postscript level 3 emulation and HP PCL 5 versions of a single driver that provides access to almost any HP device while providing system administrator with tools to manage devices more effectively. The Universal Print Driver is included on the device CD, under the Optional Software section. For more information, go to www.hp.com/go/universalprintdriver.

Driver Autoconfiguration

The HP LaserJet PCL 5, PCL 6, and PS level 3 emulation drivers for Windows 2000 and Windows XP feature automatic discovery and driver configuration for device accessories at the time of installation. Some accessories that the Driver Autoconfiguration supports are the duplexing unit, optional paper trays, and dual inline memory modules (DIMMs).

Update Now

If you have modified the device configuration since installation, the driver can be automatically updated with the new configuration. In the **Properties** dialog box (see [Open the printer drivers on page 11](#)), on the **Device Settings** tab, click the **Update Now** button to update the driver.

HP Driver Preconfiguration

HP Driver Preconfiguration is a software architecture and set of tools that you can use to customize and distribute HP software in managed corporate printing environments. Using HP Driver Preconfiguration, information technology (IT) administrators can preconfigure the printing and default settings for HP printer drivers before installing the drivers in the network environment. For more information, see the *HP Driver Preconfiguration Support Guide*, which is available at www.hp.com/go/hpdpc_sw.

Priority for print settings

Changes to print settings are prioritized depending on where the changes are made:

NOTE The names of commands and dialog boxes might vary depending on your software program.

- **Page Setup dialog box:** Click **Page Setup** or a similar command on the **File** menu of the program you are working in to open this dialog box. Settings changed here override settings changed anywhere else.
- **Print dialog box:** Click **Print**, **Print Setup**, or a similar command on the **File** menu of the program you are working in to open this dialog box. Settings changed in the **Print** dialog box have a lower priority and do *not* override changes made in the **Page Setup** dialog box.
- **Printer Properties dialog box (printer driver):** Click **Properties** in the **Print** dialog box to open the printer driver. Settings changed in the **Printer Properties** dialog box do not override settings anywhere else in the printing software.
- **Default printer driver settings:** The default printer driver settings determine the settings used in all print jobs, *unless* settings are changed in the **Page Setup**, **Print**, or **Printer Properties** dialog boxes.
- **Printer control panel settings:** Settings changed at the printer control panel have a lower priority than changes made anywhere else.

Open the printer drivers

Operating System	To change the settings for all print jobs until the software program is closed	To change the default settings for all print jobs	To change the device configuration settings
Windows 2000, XP, and Server 2003	<ol style="list-style-type: none"> 1. On the File menu in the software program, click Print. 2. Select the driver, and then click Properties or Preferences. <p>The steps can vary; this procedure is most common.</p>	<ol style="list-style-type: none"> 1. Click Start, click Settings, and then click Printers or Printers and Faxes. 2. Right-click the driver icon, and then select Printing Preferences. 	<ol style="list-style-type: none"> 1. Click Start, click Settings, and then click Printers or Printers and Faxes. 2. Right-click the driver icon, and then select Properties. 3. Click the Device Settings tab.
Mac OS X V10.2.8, V10.3, V10.4 and later	<ol style="list-style-type: none"> 1. On the File menu, click Print. 2. Change the settings that you want on the various pop-up menus. 	<ol style="list-style-type: none"> 1. On the File menu, click Print. 2. Change the settings that you want on the various pop-up menus. 3. On the Presets pop-up menu, click Save as and type a name for the preset. <p>These settings are saved in the Presets menu. To use the new settings, you must select the saved preset option every time you open a program and print.</p>	<ol style="list-style-type: none"> 1. In the Finder, on the Go menu, click Applications. 2. Open Utilities, and then open Print Center (OS X V10.2.8) or Printer Setup Utility. 3. Click on the print queue. 4. On the Printers menu, click Show Info. 5. Click the Installable Options menu.

NOTE Configuration settings might not be available in Classic mode.

Software for Macintosh computers

The HP installer provides PostScript® Printer Description (PPD) files, Printer Dialog Extensions (PDEs), and the HP Printer Utility for use with Macintosh computers.

For network connections, use the embedded Web server (EWS) to configure the device. See [Embedded Web server on page 13](#).

The printing system software includes the following components:

- **PostScript Printer Description (PPD) files**

The PPDs, in combination with the Apple PostScript printer drivers, provide access to device features. Use the Apple PostScript printer driver that comes with the computer.

- **HP Printer Utility**

Use the HP Printer Utility to set up device features that are not available in the printer driver:

- Name the device.
- Assign the device to a zone on the network.
- Assign an internet protocol (IP) address to the device.
- Download files and fonts.
- Configure the device for IP or AppleTalk printing.

You can use the HP Printer Utility when your device uses a universal serial bus (USB) cable or is connected to a TCP/IP-based network. For more information, see [Use the HP Printer Utility for Macintosh on page 52](#).

Remove software from Macintosh operating systems

To remove the software from a Macintosh computer, drag the PPD files to the trash can.

Utilities

The device is equipped with several utilities that make it easy to monitor and manage the device on a network.

HP Web Jetadmin

HP Web Jetadmin is a browser-based management tool for HP Jetdirect-connected printers within your intranet, and it should be installed only on the network administrator's computer.

To download a current version of HP Web Jetadmin and for the latest list of supported host systems, visit www.hp.com/go/webjetadmin.

When installed on a host server, any client can gain access to HP Web Jetadmin by using a supported Web browser (such as Microsoft® Internet Explorer 4.x or Netscape Navigator 4.x or later) by navigating to the HP Web Jetadmin host.

Embedded Web server

The device is equipped with an embedded Web server, which provides access to information about device and network activities. This information appears in a Web browser, such as Microsoft Internet Explorer or Netscape Navigator.

The embedded Web server resides on the device. It is not loaded on a network server.

The embedded Web server provides an interface to the device that anyone who has a network-connected computer and a standard Web browser can use. No special software is installed or configured, but you must have a supported Web browser on your computer. To gain access to the embedded Web server, type the IP address for the device in the address line of the browser. (To find the IP address, print a configuration page. For more information about printing a configuration page, see [Use information pages on page 45](#).)

For a complete explanation of the features and functionality of the embedded Web server, see [Use the embedded Web server on page 49](#).

HP Easy Printer Care software

The HP Easy Printer Care software is a program that you can use for the following tasks:

- Discovering printers on the network and checking the status of each device
- Setting and viewing device and supplies alerts for multiple printers at the same time
- Shopping online for supplies
- Using HP online troubleshooting and maintenance tools

You can use the HP Easy Printer Care software when the device is directly connected to your computer or when it is connected to a network. To download the HP Easy Printer Care software, go to www.hp.com/go/easyprintercare.

Supported operating systems

For information about supported operating systems, go to www.hp.com/go/easyprintercare.

Supported browsers

To use the HP Easy Printer Care software, you must have one of the following browsers:

- Microsoft Internet Explorer 5.5 or later
- Netscape Navigator 7.0 or later
- Opera Software ASA Opera 6.05 or later

All pages can be printed from the browser.

Other components and utilities

Windows	Macintosh OS
<ul style="list-style-type: none">● Software installer — automates the printing system installation● Online Web registration	<ul style="list-style-type: none">● PostScript Printer Description files (PPDs) — use with the Apple PostScript drivers that come with the Mac OS● The HP Printer Utility — change device settings, view status, and set up printer-event notification from a Mac. This utility is supported for Mac OS X V10.2.8, V10.3, V10.4 and later.

Media specifications

The device accepts a variety of media, such as cut-sheet paper, including up to 100% recycled fiber content paper; envelopes; labels; transparencies; and custom-size paper. Properties such as weight, composition, grain, and moisture content are important factors that affect device performance and output quality. Media that does not meet the guidelines that are outlined in this manual can cause the following problems:

- Poor print quality
- Increased jams
- Premature wear on the device, requiring repair

NOTE Some media might meet all of media specifications and still not produce satisfactory results. Improper handling, unacceptable temperature and humidity levels, and other variables over which Hewlett-Packard has no control can affect print quality. Before purchasing large quantities of media, make sure that it meets the requirements that are specified in the user guide and in the *HP LaserJet Printer Family Print Media Guide*, which is available for download at <http://www.hp.com/support/ljpaperguide>. Always test paper before buying large quantities.

CAUTION Using media that does not meet HP specifications can cause problems for the device, requiring repair. This repair is not covered by the HP warranty or service agreements.

General guidelines for media

Before purchasing any paper or specialized forms in quantity, verify that your paper supplier has obtained and understands the print-media requirements that are specified in the *HP LaserJet Printer Family Print Media Guide*.

See [HP Customer Care on page 322](#) to order the *HP LaserJet Printer Family Print Media Guide*. To download a copy of the guide, go to www.hp.com/support/ljpaperguide.

It is possible that paper could meet all of the guidelines in this chapter or the *HP LaserJet Printer Family Print Media Guide* and still not print satisfactorily. This can result from abnormal characteristics of the printing environment or other variables over which HP has no control (for example, extremes in temperature and humidity).

Hewlett-Packard Company recommends testing any paper before buying it in large quantities.

CAUTION Using paper that does not conform to the specifications listed here or in the print media guide can cause problems that require service. This service is not covered by the Hewlett-Packard warranty or service agreements.

Paper to avoid

The product can handle many types of paper. Using paper that does not meet specifications will cause lower print quality and increase the chance of jams.

- Do not use paper that is too rough. Use paper with a tested smoothness rating of 100–250 Sheffield.
- Do not use paper, other than standard 3-hole punched paper, that contains cutouts or perforations.
- Do not use multipart forms.
- Do not use paper that has already been printed on, or that has been fed through a photocopier.
- Do not use paper that contains a watermark if you are printing solid patterns.
- Do not use heavily embossed or raised-letterhead papers.
- Do not use papers that have heavily textured surfaces.
- Do not use offset powders or other materials that prevent printed forms from sticking together.
- Do not use paper that has a colored coating that was added after the paper was produced.

Paper that can damage the device

In rare circumstances, paper can damage the device. The following paper must be avoided to prevent possible damage to the device:

- Do not use paper with staples attached.
- Do not use transparencies, labels, or photo or glossy paper designed for Inkjet printers or other low temperature printers. Use only media that is specified for use with HP LaserJet printers.
- Do not use any media that produces hazardous emissions, or that melts, offsets, or discolors when exposed to the temperature of the fuser.
- Do not use paper that is embossed or coated, or any media that is not designed to withstand the fusing temperature of the device. Do not use letterhead paper or preprinted forms that are made with dyes or inks that cannot withstand the heat of the fuser.

To order HP LaserJet printing supplies, see [Order parts, accessories, and supplies on page 314](#).

General media specifications

For complete paper specifications for all HP LaserJet devices, see the *HP LaserJet Printer Family Print Media Guide* (available at www.hp.com/support/ljpaperguide).

Category	Specifications
Acid content	5.5 pH to 8.0 pH
Caliper	0.094 to 0.18 mm (3.0 to 7.0 mils)
Curl in ream	Flat within 5 mm (0.02 in)
Cut edge conditions	Cut with sharp blades with no visible fray.
Fusing compatibility	Must not scorch, melt, offset, or release hazardous emissions when heated to 200° C (392°F) for 0.1 second.
Grain	Long grain
Moisture content	4% to 6% by weight
Smoothness	100 to 250 Sheffield

Select print media

This device accepts a variety of media, such as cut-sheet paper, including up to 100% recycled fiber content paper; envelopes; labels; transparencies; and custom-size paper. Properties such as weight, composition, grain, and moisture content are important factors that affect device performance and output quality. Paper that does not meet the guidelines that are outlined in this manual can cause the following problems:

- Poor print quality
- Increased jams
- Premature wear on the device, requiring repair

NOTE Some paper might meet all of the guidelines in this manual and still not produce satisfactory results. This might be the result of improper handling, unacceptable temperature and humidity levels, or other variables over which Hewlett-Packard has no control. Before purchasing large quantities of media, make sure that it meets the requirements that are specified in this user guide and in the *HP LaserJet Printer Family Print Media Guide*, which is available for download at www.hp.com/support/ljpaperguide. Always test paper before buying large quantities.

CAUTION Using media that does not meet HP specifications can cause problems for the device, requiring repair. This repair is not covered by the HP warranty or service agreements.

Supported media sizes

Table 1-1 Supported media sizes

Input tray	Letter	Legal	A4	A5	Executive (JIS)	B5 (JIS)	16K	Custom	Statement	S Postcard (JIS)	Envelope ¹
Tray 1	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓	✓
Tray 2, tray 3	✓	✓	✓	✓	✓	✓					

¹ Supported envelope sizes are #10, Monarch, C5, DL, and B5.

Table 1-2 Automatic 2-sided printing ¹

Media size	Dimensions	Weight and thickness
Letter	216 x 279 mm (8.5 x 11 in)	60 to 120 g/m ² (16 to 32 lb bond)
Legal	216 x 356 mm (8.5 x 14 in)	
A4	211 x 297 mm (8.3 x 11.7 in)	
JIS	216 x 330 mm (8.5 x 13 in)	

¹ Automatic 2-sided printing on weights heavier than those shown can produce unexpected results.

NOTE Automatic 2-sided (duplex) printing is available with the HP LaserJet M3027x, HP LaserJet M3035, and HP LaserJet M3035xs models.

Manual 2-sided printing. Most of the supported media sizes and types listed for printing from tray 1 can be manually duplexed. See the user guide for more information.

Supported media types

Table 1-3 Tray 1 media types

Type	Dimensions	Weight or thickness	Capacity ¹
Plain	Minimum: 76 x 127 mm (3 x 5 in)	60 to 199 g/m ² (16 to 53 lb)	100 sheets
Preprinted	Maximum: 216 x 356 mm (8.5 x 14 in)	60 to 120 g/m ² (16 to 32 lb)	100 sheets
Letterhead		60 to 120 g/m ² (16 to 32 lb)	100 sheets
Prepunched		60 to 120 g/m ² (16 to 32 lb)	100 sheets
Bond		60 to 120 g/m ² (16 to 32 lb bond)	100 sheets
Recycled		60 to 120 g/m ² (16 to 32 lb)	100 sheets
Colored paper		60 to 120 g/m ² (16 to 32 lb)	100 sheets
Rough		60 to 199 g/m ² (16 to 53 lb)	Up to 100 sheets
Light		60 to 75 g/m ² (16 to 20 lb)	100 sheets
Custom		60 to 199 g/m ² (16 to 53 lb)	Up to 100 sheets
Transparencies ²		0.10 to 0.14 mm thick (4.7 to 5 mils thick)	Up to 60 sheets
Envelopes		75 to 90 g/m ² (20 to 24 lb)	10 envelopes
Labels		0.10 to 0.14 mm thick (4.7 to 5 mils thick)	Up to 60 sheets
Cardstock		Greater than 163 g/m ² (greater than 43 lb)	Up to 100 sheets

¹ Capacity can vary depending on media weight and thickness and environmental conditions. Smoothness should be 100 to 250 (Sheffield). For ordering information, see [Supplies and accessories on page 313](#).

² Use only transparencies that are designed for use with HP LaserJet printers. This printer can detect transparencies that were not designed for use with HP LaserJet printers. For more information, see the user guide.

Table 1-4 Tray 2 and tray 3 media types

Type	Dimensions	Weight or thickness	Capacity
Plain	Minimum: 140 x 216 mm (5.5 x 8.5 in)	60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets
Preprinted	Maximum: 216 x 356 mm (8.5 x 14 in)	60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets
Letterhead		60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets
Prepunched		60 to 120 g/m ² (16 to 32 lb bond)	Up to 500 sheets
Bond		60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets
Recycled		60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets
Colored paper		60 to 120 g/m ² (16 to 32 lb)	Up to 500 sheets

2 Installation and configuration

Chapter contents

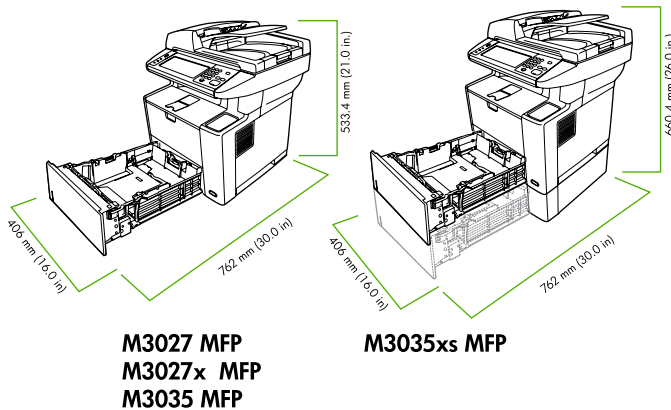

- [Site preparation](#)
- [Install trays](#)
- [Install supplies](#)
- [Install accessories](#)

Site preparation

Location specifications

Place the device on a sturdy, level surface in a well-ventilated area that meets the following environmental requirements:

- Temperature: 15° to 32°C (59° to 89°F)
- Humidity: 10% to 80% relative humidity (no condensation)
- Away from direct sunlight, open flames, and ammonia fumes
- Allow sufficient space around the device for access and ventilation. (See [Table C-2 Printer dimensions with all doors and trays fully opened on page 328](#) for the minimum space requirements.)

Operating environment

Environmental condition	Recommended	Allowed
Temperature (device and print cartridge)	17° to 25°C (63° to 77°F)	15° to 32°C (59° to 89°F)
Relative humidity	30% to 70% (no condensation)	10% to 80% (no condensation)

NOTE Optimum performance of the device is assured under the recommended temperature and humidity specifications. Print quality might deteriorate and occurrences of paper jams might increase when the device is operated within the allowed temperature and humidity specifications.

Install trays

Load tray 1 (multipurpose tray)

Tray 1 holds up to 100 sheets of paper, up to 75 transparencies, up to 50 sheets of labels, or up to 10 envelopes. For information about loading special media, see the user guide.

1. Open tray 1 by pulling the front cover down.

2. Slide out the plastic tray extender. If the media that is being loaded is longer than 229 mm (9 in), also flip open the additional tray extender.

3. Slide the media-width guides slightly wider than the media.

4. Place media into the tray (short-edge in, print-side up). The media should be centered between the media-width guides and under the tabs on the media-width guides.

5. Slide the media-width guides inward until they lightly touch the media stack on both sides without bending it. Make sure that the media fits under the tabs on the media-width guides.

NOTE Do not add media to tray 1 while the device is printing. This could cause a jam. Do not close the front door when the device is printing.

Load tray 2 and optional tray 3

Trays 2 and 3 support only paper. For supported paper sizes, see [Media specifications on page 15](#).

1. Pull the tray out of the device and remove any paper.

2. On the rear paper-length guide, press the tab and slide it so that the pointer matches the paper size that you are loading. Make sure that the guide clicks into place.

3. Adjust the side media-width guides outward so that the pointer matches the paper size that you are loading.

4. Place the paper in the tray and make sure that it is flat at all four corners. Keep the paper below the height tabs on the paper-length guide in the rear of the tray.

5. Push down on the paper to lock the metal paper-lift plate in place.
6. Slide the tray into the device.

Configure trays

1. At the device control panel, touch **Supplies Status**.
2. Touch **Trays**.
3. Select the tray that you want to set and then touch **Modify Tray**.
4. Set the size and type of media that is loaded in the tray.

Install supplies

Carefully follow the guidelines in this section when replacing device supplies.

Supply replacement guidelines

To facilitate the replacement of supplies, keep the following guidelines in mind when setting up the device.

- Sufficient space is required above and in the front of the device for removing supplies.
- The device should be located on a flat, sturdy surface.

For instructions on installing supplies, see the installation guides provided with each supply item or see more information at www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp.

NOTE Hewlett-Packard recommends the use of HP products in this device. Use of non-HP products may cause problems requiring service that is not covered by the HP warranty or service agreements.

Change the print cartridge

When a print cartridge approaches the end of useful life, a message appears on the control panel recommending that you order a replacement. The device can continue to print using the current print cartridge until a message appears instructing you to replace the cartridge.

1. Open the front cover.

2. Remove the used print cartridge from the device.

3. Remove the new print cartridge from the bag. Place the used print cartridge in the bag for recycling.

4. Grasp both sides of the print cartridge and distribute the toner by gently rocking the print cartridge.

CAUTION Do not touch the shutter or the surface of the roller.

5. Remove the shipping tape from the new print cartridge. Discard the shipping tape according to local regulations.

6. Align the print cartridge with the tracks inside the device, and, using the handle, insert the print cartridge until it is firmly seated, and then close the front door.

After a short time, the control panel should display **Ready**.

7. Installation is complete. Place the used print cartridge in the box in which the new cartridge arrived. See the enclosed recycling guide for recycling instructions.
8. If you are using a non-HP print cartridge, check the device control panel for further instructions.

For additional help, go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp.

Install accessories

Install memory

You might want to add more memory to the device if you often print complex graphics, print PostScript (PS) documents, or use many downloaded fonts. Added memory also gives you more flexibility in supporting job-storage features, such as quick copying.

Install device memory

CAUTION Static electricity can damage DIMMs. When handling DIMMs, either wear an antistatic wrist strap or frequently touch the surface of the DIMM antistatic package, then touch bare metal on the device.

The HP LaserJet M3027/M3035 devices come with one DIMM slot. If desired, you can replace a DIMM installed in the slot with a higher memory DIMM.

If you have not already done so, print a configuration page to find out how much memory is installed in the device before adding more memory. See [Use information pages on page 45](#).

1. After the configuration page has printed, turn the device off and disconnect the power cord.

2. Disconnect all interface cables.

3. Remove the right side panel by sliding it towards the rear of the device until the side slides from the device.

4. Open the access door by pulling on the metal tab.

5. Remove the DIMM from the antistatic package.

CAUTION To reduce the possibility of damage caused by static electricity, always wear an electrostatic discharge (ESD) wrist strap or touch the surface of the antistatic package before handling DIMMs.

6. Hold the DIMM by the edges, and align the notches on the DIMM with the DIMM slot. (Check that the locks on each side of the DIMM slot are open.)

7. Press the DIMM straight into the slot, and press firmly. Make sure the locks on each side of the DIMM snap into place.

NOTE To remove a DIMM, first release the locks.

8. Close the access door, and press firmly until it snaps into place.

9. To replace the right side panel, line up the alignment arrows and slide the panel toward the front of the device until it latches into place.

10. Reconnect the interface cable(s) and the power cord.

11. Turn the device on.

Check DIMM installation

After installing the DIMM, make sure that the installation was successful.

Verify that DIMM is installed correctly

1. Turn the device on. Check that the Ready light is illuminated after the device has gone through the startup sequence. If an error message appears, a DIMM might have been incorrectly installed. See [Control-panel messages on page 201](#).
2. Print a configuration page (see [Use information pages on page 45](#)).
3. Check the memory section on the configuration page and compare it to the configuration page that was printed before the memory installation. If the amount of memory has not increased, the DIMM might not be installed correctly, or the DIMM might be defective. Repeat the installation procedure. If necessary, install a different DIMM.

NOTE If you installed a device language (personality), check the "Installed Personalities and Options" section on the configuration page. This area should list the new device language.

Enable memory for Windows

1. On the **Start** menu, **Settings**, and **Printers** or **Printers and Faxes**.
2. Select this device and select **Properties**.
3. On the **Configure** tab, click **More**.
4. In the **Total Memory** field, type or select the total amount of memory that is now installed.
5. Click **OK**.

Use HP Jetdirect print server cards

Follow these procedures to install or remove an EIO card.

Install an HP Jetdirect print server card

1. Turn off the device.
2. Remove the two screws and cover plate from the EIO slot on the back of the device.

NOTE Do not discard the screws or the cover plate. Save them for future use if you remove the EIO card.

3. Install the EIO card in the EIO slot and tighten the screws.

4. Connect the network cable to the EIO card.

5. Turn on the device, and then print a configuration page to verify that the new EIO device is recognized. See [Use information pages on page 45](#).

NOTE When you print a configuration page, an HP Jetdirect configuration page that contains network configuration and status information also prints.

Remove an HP Jetdirect print server card

1. Turn off the device.
2. Disconnect the network cable from the EIO card.
3. Loosen the two screws from the EIO card, and then remove the EIO card from the EIO slot.
4. Place the cover plate from the EIO slot onto the back of the device. Insert and tighten the two screws.
5. Turn on the device.

3 Maintenance

Chapter contents

- [Manage supplies](#)
- [Clean the device](#)
- [Management tools](#)

Manage supplies

Using, storing, and monitoring the print cartridge can help ensure high-quality output.

Supplies life

The average cartridge yield is 6,500 pages (for the Q7551A cartridge) or 13,000 pages (for the Q7551X cartridge), in accordance with ISO/IEC 19752. Actual cartridge yield depends on specific use.

CAUTION The Economode feature allows the device to use less toner per page. Selecting Economode extends the life of the toner supply and reduces the cost per page but reduces print quality. The printed image is lighter but is adequate for printing drafts or proofs. Hewlett-Packard does not recommend full-time use of Economode. If Economode is used full-time, the toner supply might outlast the mechanical parts in the print cartridge. If print quality begins to degrade under these circumstances, install a new print cartridge even if the print cartridge still contains toner.

Approximate print-cartridge replacement intervals

Print cartridge	Page count	Approximate time period ¹
Black (Q7551A)	6,500 pages ¹	3 months
Black (Q7551X)	13,000 pages	6 months

¹ Approximate life is based on 2,000 pages per month.

To order supplies online, go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp.

Manage the print cartridge

Print-cartridge storage

Do not remove the print cartridge from its package until you are ready to use it.

CAUTION To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

Use genuine HP print cartridges

When you use a genuine new HP print cartridge, you can obtain the following supplies information:

- Percentage of supplies remaining
- Estimated number of pages remaining
- Number of pages printed

HP policy on non-HP print cartridges

Hewlett-Packard Company cannot recommend the use of non-HP print cartridges, either new or remanufactured. Because they are not HP products, HP cannot influence their design or control their quality.

NOTE Any damage caused by a non-HP print cartridge is not covered under the HP warranty and service agreements.

To install a new HP print cartridge, see [Change the print cartridge on page 27](#). To recycle the used cartridge, follow the instructions included with the new cartridge.

Print-cartridge authentication

The device automatically authenticates the print cartridge when it is inserted into the device. During authentication, the device notifies you whether a cartridge is a genuine HP print cartridge.

If the device control-panel message states that this is not a genuine HP print cartridge and you believe you purchased an HP print cartridge, see [HP fraud hotline and Web site on page 39](#).

HP fraud hotline and Web site

Call the HP fraud hotline (1-877-219-3183, toll-free in North America) or go to www.hp.com/go/anticounterfeit when you install an HP print cartridge and the control-panel message says the cartridge is non-HP. HP will help determine if the cartridge is genuine and take steps to resolve the problem.

Your print cartridge might not be a genuine HP print cartridge if you notice the following:

- You are experiencing a high number of problems with the print cartridge.
- The cartridge does not look like it usually does (for example, the orange pull tab is missing, or the packaging differs from HP packaging).

Clean the device

Over time, particles of toner and paper accumulate inside the device. This can cause print-quality problems during printing. Cleaning the device eliminates or reduces these problems.

Clean the paper path and print-cartridge areas every time that you change the print cartridge or whenever print-quality problems occur. As much as possible, keep the device from dust and debris.

Clean the exterior

Use a soft, damp, lint-free cloth to wipe dust, smudges, and stains off of the exterior of the device.

Clean the ADF

If the ADF has trouble feeding documents, clean the ADF pickup roller assembly.

1. Turn off the device and unplug the power cord.

2. Open the ADF cover.

3. Press the round blue button while lifting the green lever. Rotate the green lever until it stops in the open position. The pickup roller assembly should remain on the surface.

4. Remove the assembly, and then wipe the assembly with a soft, dry, lint-free cloth.

5. Replace the assembly, with the largest roller down, in the upright holder, and then press until the assembly snaps into place.

6. Make sure that both sides of the assembly are secured by the blue hooks.

7. Lower the roller assembly, and then close the ADF cover.

8. Plug in the device, and then turn on the device.

Clean the scanner lid backing

Minor debris can accumulate on the white document lid backing that is located underneath the scanner lid.

1. Open the scanner lid.
2. Clean the white document lid backing by using a soft cloth or sponge that has been moistened with a mild soap and warm water.

3. Wash the backing gently to loosen debris; do not scrub the backing.
4. Dry the backing by using a chamois or soft cloth.

CAUTION Do not use paper-based wipes because they might scratch the backing.

5. If this does not clean the backing well enough, repeat the previous steps and use isopropyl alcohol to dampen the cloth or sponge, and then wipe the backing thoroughly with a damp cloth to remove any residual alcohol.

Clean the scanner glass

Dirty glass, from fingerprints, smudges, hair, and so on, slows down performance and affects the accuracy of special features such as fit-to-page and copy.

NOTE If streaks or other defects appear only on copies produced using the automatic document feeder (ADF), clean the scanner strip (step 3). It is not necessary to clean the scanner glass.

1. Open the scanner lid.
2. Clean the glass by using a damp, lint-free cloth.

CAUTION Do not use abrasives, acetone, benzene, ammonia, ethyl alcohol, or carbon tetrachloride on any part of the device; these can damage the device. Do not place liquids directly on the glass. They might seep under it and damage the device.

3. Clean the scanner strip by using a damp, lint-free cloth.

Clean the fuser

Run the device cleaning page to keep the fuser free of toner and paper particles that can sometimes accumulate. Accumulation of toner and particles can cause specks to appear on the front or back side of your print jobs.

To ensure optimum print quality, HP recommends that you use the cleaning page every time that you replace the print cartridge.

The cleaning procedure takes about 2.5 minutes to complete. A **CLEANING** message appears on the device control panel display while the cleaning is taking place.

In order for the cleaning page to work correctly, print the page on copier-grade paper (not bond, heavy, or rough paper).

Create and use the cleaning page

1. From the Home screen, touch **Administration**.
2. Touch **Print Quality**.
3. Touch **Calibration/Cleaning**.
4. Touch **Create Cleaning Page**.

The device prints a cleaning page.

5. Follow the instructions printed on the cleaning page.

Clean spilled toner

If you spill toner on your clothes, wash them in *cold* water. Hot water sets the toner into the fabric.

Management tools

Use information pages

From the control panel, print pages that give details about the device and its current configuration. The table below provides the instructions for printing the information pages.

Page description	How to print the page
Menu map Shows the control-panel menus and available settings.	<ol style="list-style-type: none">1. From the Home screen, touch Administration.2. Touch Information.3. Touch Configuration/Status Pages.4. Touch Administration Menu Map.5. Touch Print. <p>The content of the menu map varies, depending on the options currently installed in the device.</p> <p>For a complete list of control panel menus and possible values, see the user guide.</p>
Configuration page Shows device settings and installed accessories.	<ol style="list-style-type: none">1. From the Home screen, touch Administration.2. Touch Information.3. Touch Configuration/Status Pages.4. Touch Configuration Page.5. Touch Print. <p> NOTE If the device contains an HP Jetdirect print server or an optional hard disk drive, additional configuration pages print that provide information about those devices.</p>
Supplies status page Shows print-cartridge toner levels.	<ol style="list-style-type: none">1. From the Home screen, touch Administration.2. Touch Information.3. Touch Configuration/Status Pages.4. Touch Supplies Status Page.5. Touch Print. <p> NOTE If you are using non-HP supplies, the supplies status page might not show the remaining life for those supplies. For more information, see HP policy on non-HP print cartridges on page 39.</p>
Usage page Shows a page count for each size of paper printed, the number of one-sided (simplex) or two-sided (duplexed) pages, and the average percentage of coverage.	<ol style="list-style-type: none">1. From the Home screen, touch Administration.2. Touch Information.3. Touch Configuration/Status Pages.4. Touch Usage Page.5. Touch Print.

Page description	How to print the page
<p>File directory</p> <p>Contains information for any mass storage devices, such as flash drives, memory cards, or hard disks, that are installed in the device.</p>	<ol style="list-style-type: none"> 1. <p>Fax reports</p> <p>Five reports show fax activity, fax calls, billing codes, blocked fax numbers, and speed-dial numbers.</p> <hr/> <p> NOTE Fax reports are available only on device models that have fax capabilities.</p>	<ol style="list-style-type: none"> 1. From the Home screen, touch Administration. 2. Touch Information. 3. Touch Fax Reports. 4. Touch one of the following buttons to print the corresponding report: <ul style="list-style-type: none"> • Fax Activity Log • Fax Call Report • Billing Codes Report • Blocked Fax List • Speed Dial List 5. Touch Print. <p>For more information, see the fax guide that came with the device.</p>
<p>Font lists</p> <p>Shows which fonts are currently installed in the device.</p>	<ol style="list-style-type: none"> 1. From the Home screen, touch Administration. 2. Touch Information. 3. Touch Sample Pages/Fonts. 4. Touch either PCL Font List or PS Font List. 5. Touch Print. <hr/> <p> NOTE The font lists also show which fonts reside on a hard disk accessory or DIMM.</p>

Use the HP Easy Printer Care software

The HP Easy Printer Care software is a program that you can use for the following tasks:

- Check the device status.
- Check supplies status.
- Set up alerts.
- Gain access to problem-solving and maintenance tools.

You can use the HP Easy Printer Care software when the device is directly connected to your computer or when it is connected to a network. You must perform a complete software installation to use the HP Easy Printer Care software.

NOTE You do not have to have Internet access to open and use the HP Easy Printer Care software. However, if you click a Web-based link, you must have Internet access to go to the site associated with the link.

Open the HP Easy Printer Care software

Use one of the following methods to open HP Easy Printer Care software:

- On the **Start** menu, select **Programs**, select **Hewlett-Packard**, and then select **HP Easy Printer Care software**.
- In the Windows system tray (in the lower-right corner of the desktop), double-click the HP Easy Printer Care software icon.
- Double-click the desktop icon.

HP Easy Printer Care software sections

Section	Options
<p>Device List tab</p> <p>Shows information about each device in the Devices list</p>	<ul style="list-style-type: none"> • Device information, including device name, make, and model • An icon (if the View as drop-down box is set to Tiles, which is the default setting) • Any current alerts for the device <p>If you click a device in the list, the HP Easy Printer Care software opens the Overview tab for that device.</p>
<p>Supplies Ordering window</p> <p>Provides access to online or e-mail supplies ordering</p>	<ul style="list-style-type: none"> • Ordering list: Shows the supplies that you can order for each device. If you want to order a certain item, click the Order check box for that item in the supplies list. • Shop Online for Supplies button: Opens the HP SureSupply Web site in a new browser window. If you have checked the Order check box for any items, the information about those items can be transferred to the Web site, where you will receive information on options for purchasing your selected supplies. • Print Shopping List button: Prints the information for the supplies that have the Order check box selected.
<p>Alert Settings window</p> <p>Allows you to configure the device to automatically notify you of device issues</p>	<ul style="list-style-type: none"> • Alerts on or off: Activates or deactivates the alerts feature. • When alerts appear: Sets when you want alerts to appear—either when you are printing to that particular device, or anytime there is a device event. • Alert event type: Sets whether you want alerts for only critical errors, or for any error, including continuable errors. • Notification method: Sets what type of alert should appear (pop-up message or desktop alert).
<p>Overview tab</p> <p>Contains basic status information for the device</p>	<ul style="list-style-type: none"> • Devices list: Shows the devices that you can select. • Device Status section: Shows device status information. This section will indicate device alert conditions, such as an empty print cartridge. It also shows device-identification information, control-panel messages, and print-cartridge levels. After you correct a problem with the device, click the  button to update the section. • Supplies Status section: Shows detailed supplies status, such as the percentage of toner remaining in the print cartridge and the status of the media that is loaded in each tray. • Supplies Details link: Opens the supplies status page to view more detailed information about device supplies, ordering information, and recycling information.
<p>Support tab</p> <p>Provides help information and links</p>	<ul style="list-style-type: none"> • Provides device information, including alerts for items needing attention. • Provides links to troubleshooting and maintenance tools.
<p>Find Other Printers window</p> <p>Allows you to add more printers to your printer list</p>	<p>Clicking the Find Other Printers link in the Devices list opens the Find Other Printers window. The Find Other Printers window provides a utility that detects other network printers so that you can add them to the Devices list and then monitor those devices from your computer.</p>

Use the embedded Web server

When the device is connected to the network, the embedded Web server is automatically available.

NOTE When the device is directly connected to a computer, use the HP Easy Printer Care software to view the device status.

- View device control status information
- Set the type of paper loaded in each tray
- Determine the remaining life on all supplies and order new ones
- View and change tray configurations
- View and change the device control panel menu configuration
- View and print internal pages
- Receive notification of device and supplies events
- View and change network configuration
- View support content that is specific to the current state of the device

To use the embedded Web server, you must have Microsoft Internet Explorer 4 and later or Netscape Navigator 4 and later. The embedded Web server works when the device is connected to an IP-based network. The embedded Web server does not support IPX-based or AppleTalk device connections. You do not need Internet access to open and use the embedded Web server.

Open the embedded Web server by using a network connection

1. In a supported Web browser on your computer, type the device IP address or host name in the address/URL field. To find the IP address or host name, print a configuration page. See [Use information pages on page 45](#).

NOTE After you open the URL, you can bookmark it so that you can return to it quickly in the future.

2. The embedded Web server has three tabs that contain settings and information about the device: the **Information** tab, the **Settings** tab, and the **Networking** tab. Click the tab that you want to view.

See [Embedded Web server sections on page 50](#) for more information about each tab.

Embedded Web server sections

Tab or section	Options
Information tab Provides device, status, and configuration information	<ul style="list-style-type: none">● Device Status: Shows the device status and shows the life remaining of HP supplies, with 0% indicating that a supply is empty. The page also shows the type and size of print paper set for each tray. To change the default settings, click Change Settings.● Configuration Page: Shows the information found on the configuration page.● Supplies Status: Shows the life remaining of HP supplies, with 0 percent indicating that a supply is empty. This page also provides supplies part numbers. To order new supplies, click Order Supplies in the Other Links area on the left side of the window.● Event log: Shows a list of all device events and errors.● Usage page: Shows a summary of the number of pages the device has printed, grouped by size and type.● Device Information: Shows the device network name, address, and model information. To change these entries, click Device Information on the Settings tab.● Control Panel: Shows messages from the device control panel, such as Ready or Sleep mode on.● Print: Allows you to send print jobs to the device.
Settings tab Provides the ability to configure the device from your computer	<ul style="list-style-type: none">● Configure Device: Allows you to configure device settings. This page contains the traditional menus found on devices using a control-panel display.● E-mail Server: Network only. Used in conjunction with the Alerts page to set up incoming and outgoing e-mail, as well as to set e-mail alerts.● Alerts: Network only. Allows you to set up to receive e-mail alerts for various device and supplies events.● AutoSend: Allows you to configure the device to send automated e-mails regarding device configuration and supplies to specific e-mail addresses.● Security: Allows you to set a password that must be entered to gain access to the Settings and Networking tabs. Enable and disable certain features of the embedded Web server.● Edit Other Links: Allows you to add or customize a link to another Web site. This link is displayed in the Other Links area on all embedded Web server pages.● Device Information: Allows you to name the device and assign an asset number to it. Enter the name and e-mail address for the primary contact who will receive information about the device.● Language: Allows you to determine the language in which to display the embedded Web server information.● Date & Time: Allows time synchronization with a network time server.● Wake Time: Allows you to set or edit a wake time for the device. <p> NOTE The Settings tab can be password-protected. If this device is on a network, always consult with the system administrator before changing settings on this tab.</p>

Tab or section	Options
<p>Digital Sending tab</p> <p>Provides the ability to configure digital sending options</p>	<ul style="list-style-type: none"> ● General Settings: Allows you to set digital-sending administrator information. ● Send to E-mail: Allows you to configure SMTP settings, set the maximum e-mail attachment size, and set the default e-mail address for the device. ● Send to Fax: Allows you to configure the send-to-fax features for the device. ● Send to Folder: Allows you to send scanned documents to shared folders or FTP sites. ● Addressing: Allows you to set features so that the device can obtain addresses directly from the database of an LDAP server instead of from a replicated LDAP Address Book. ● Address Book: Allows you to add a predefined list of destination addresses, in the form of a comma-separated value (.CSV) file, to be imported into the internal address book of the device. ● Log: Allows you to view digital sending job information, including any errors that occur. ● Preferences: Allows you to configure general settings for the digital-sending features.
<p>Networking tab</p> <p>Provides the ability to change network settings from your computer</p>	<p>Network administrators can use this tab to control network-related settings for the device when it is connected to an IP-based network. This tab does not appear if the device is directly connected to a computer, or if the device is connected to a network using anything other than an HP Jetdirect print server.</p> <hr/> <p> NOTE The Networking tab can be password-protected.</p>
<p>Other links</p> <p>Contains links that connect you to the Internet</p>	<ul style="list-style-type: none"> ● HP Instant Support™: Connects you to the HP Web site to help you find solutions. This service analyzes your device error log and configuration information to provide diagnostic and support information specific to your device. ● Order Supplies: Connects to the HP SureSupply Web site, where you will receive information on options for purchasing original HP supplies, such as print cartridges and paper. ● Product Support: Connects to the support site for the device, from which you can search for help regarding general topics. <hr/> <p> NOTE You must have Internet access in order to use any of these links. If you use a dial-up connection and did not connect when you first opened the embedded Web server, you must connect before you can visit these Web sites. Connecting might require that you close the embedded Web server and reopen it.</p>

Use HP Web Jetadmin software

HP Web Jetadmin is a Web-based software solution for remotely installing, monitoring, and troubleshooting network-connected peripherals. The intuitive browser interface simplifies cross-platform management of a wide range of devices, including HP and non-HP devices. Management is proactive, allowing network administrators the ability to resolve issues before users are affected. Download this free, enhanced-management software at www.hp.com/go/webjetadmin_software.

To obtain plug-ins to HP Web Jetadmin, click **plug-ins**, and then click the **download** link that is next to the name of the plug-in that you want. The HP Web Jetadmin software can automatically notify you when new plug-ins are available. On the **Product Update** page, follow the directions to automatically connect to the HP Web site.

If installed on a host server, HP Web Jetadmin is available to any client through a supported Web browser, such as Microsoft Internet Explorer 6.0 for Windows or Netscape Navigator 7.1 for Linux. Browse to the HP Web Jetadmin host.

NOTE Browsers must be Java-enabled. Browsing from an Apple PC is not supported.

Use the HP Printer Utility for Macintosh

Use the HP Printer Utility to configure and maintain a device from a Mac OS X computer.

Open the HP Printer Utility

Open the HP Printer Utility in Mac OS X V10.2.8

1. Open the Finder, and then click **Applications**.
2. Click **Library**, and then click **Printers**.
3. Click **hp**, and then click **Utilities**.
4. Double-click **HP Printer Selector** to open the HP Printer Selector.
5. Select the device that you want to configure, and then click **Utility**.

Open the HP Printer Utility in Mac OS X V10.3, V10.4 and later

1. In the Dock, click the **Printer Setup Utility** icon.

NOTE If the **Printer Setup Utility** icon does not appear in the Dock, open the Finder, click **Applications**, click **Utilities**, and then double-click **Printer Setup Utility**.

2. Select the device that you want to configure, and then click **Utility**.

HP Printer Utility features

The HP Printer Utility consists of pages that you open by clicking in the **Configuration Settings** list. The following table describes the tasks that you can perform from these pages.

Item	Description
Configuration Page	Prints a configuration page.
Supplies Status	Shows the device supplies status and provides links for online supplies-ordering.
HP Support	Provides access to technical assistance, online supplies ordering, online registration, and recycling and return information.
File Upload	Transfers files from the computer to the device.
Upload Fonts	Transfers font files from the computer to the device.
Firmware Update	Transfers updated firmware files from the computer to the device.
Duplex Mode	Turns on the automatic two-sided printing mode.
Economode & Toner Density	Turns on the Economode setting to conserve toner, or adjusts toner density.
Resolution	Changes the resolution settings, including the REt setting.
Lock Resources	Locks or unlocks storage products, such as a hard disk.
Stored Jobs	Manages print jobs that are stored on the device hard disk.
Trays Configuration	Changes the default tray settings.
IP Settings	Changes the device network settings and provides access to the embedded Web server.
Bonjour Settings	Provides the ability to turn on or off Bonjour support or change the device service name that is listed on a network.
Additional Settings	Provides access to the embedded Web server.
E-mail Alerts	Configures the device to send e-mail notices for certain events.

4 Theory of operation

Chapter contents

- [Basic operation](#)
- [Internal components](#)
- [Timing](#)
- [Print cartridge memory system](#)

Basic operation

This chapter presents an overview of the relationships among major components in the device, and includes a detailed discussion of the image-formation system. The following systems are discussed:

- ADF/scanner system
- Formatter
- Engine control unit
- Laser/scanner system
- Pickup/feed/delivery system
- Image-formation system

Figure 4-1 Block diagram on page 56 illustrates the relationships between the systems.

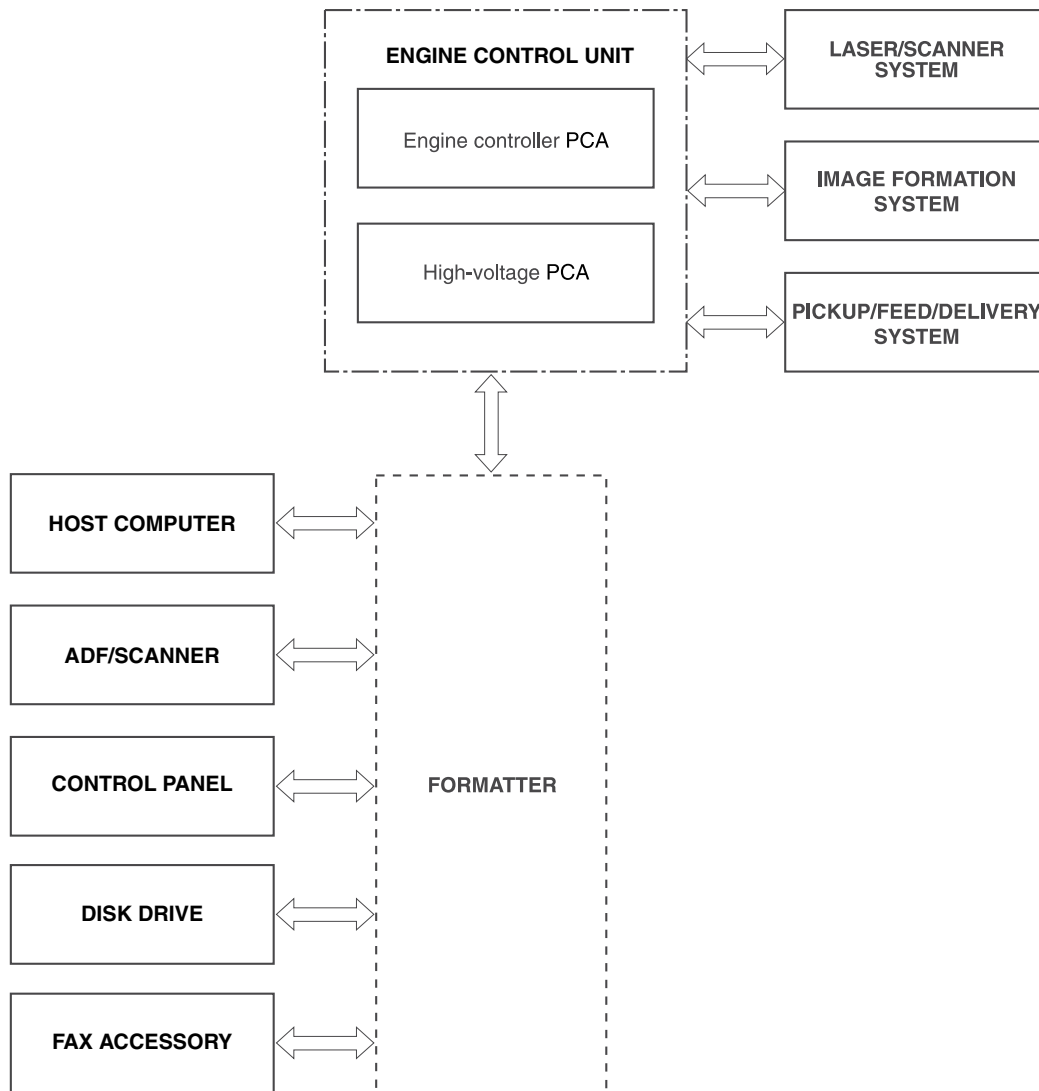

Figure 4-1 Block diagram

ADF/scanner system

ADF

If the ADF fails, it can be replaced as a whole-unit replacement part.

Sensors in the ADF

The ADF contains the following sensors:

- **ADF-cover sensor.** Detects whether the ADF cover is open or closed.
- **Top-of-page sensor.** Detects the top of the page before sending a page through the ADF and the end of the page after feeding/scanning is complete.
- **Paper-present sensor.** Detects whether a document is present in the ADF. If paper is present in the ADF when copies are made, the device scans the document using the ADF. If no paper is present when copies are made, the device scans the document using the scanner glass.

ADF paper path

The ADF feeds documents past the ADF glass for scanning. [Figure 4-2 ADF path for single-sided documents on page 57](#) shows the path for single-sided documents.

Figure 4-2 ADF path for single-sided documents

1	Separation pad	5	ADF input tray
2	Pickup roller	6	Delivery/duplex-feed rollers
3	Stack stop	7	ADF glass
4	Pre-pick roller	8	ADF feed rollers

For two-sided documents, the delivery rollers reverse the direction of each page to feed the second side of the document past the ADF glass. [Figure 4-3 ADF path for two-sided documents on page 58](#) shows the path for two-sided documents.

Figure 4-3 ADF path for two-sided documents

NOTE Callouts in [Figure 4-3 ADF path for two-sided documents on page 58](#) are identical to callouts in [Figure 4-2 ADF path for single-sided documents on page 57](#).

Scanner

If the scanner fails, it can be replaced as a whole-unit replacement part. The scanner replacement part does not include the ADF or the control panel.

The scanner is a carriage-type platen scanner, which includes the frame, glass, an internal power-supply, a scanner-controller PCA, and internal electronics and firmware. The ADF and control panel are attached to the scanner assembly.

The scanner has a sensor that detects whether the scanner lid is open or closed.

Formatter

The formatter is responsible for the following actions:

- Controlling the ADF/scanner assembly
- Formatting and controlling copies
- Receiving and processing print data from the computer interface
- Monitoring the control panel and relaying device status information
- Developing and coordinating data placement and timing with the print engine

[Figure 4-4 Formatter connections on page 59](#) shows the formatter connections.

Figure 4-4 Formatter connections

1	Disk drive power	8	Network port
2	Disk drive interface	9	FIH port
3	ECU power	10	Type A Hi-Speed USB 2.0 connection for adding accessories
4	ECU interface	11	Type B Hi-Speed USB 2.0 port
5	ADF/scanner interface	12	DIMM slot
6	Control panel interface	13	EIO connection
7	Fax accessory interface		

Engine control unit (ECU)

The ECU coordinates all device functions, according to commands that the formatter sends. It drives the laser/scanner system, the image formation system, and the pickup/feed/delivery system.

The ECU contains the following components:

- Engine-controller PCA
- Low-voltage PCA

[Figure 4-5 Print engine general structure on page 60](#) shows the relationship of the ECU to the pickup/feed/delivery system, the laser/scanner system, and the image-formation system. [Figure 4-6 Engine control unit circuit diagram on page 61](#) provides the ECU circuit diagram. [Figure 4-7 LVPS circuit diagram on page 61](#) shows the low-voltage power supply circuit on the ECU.

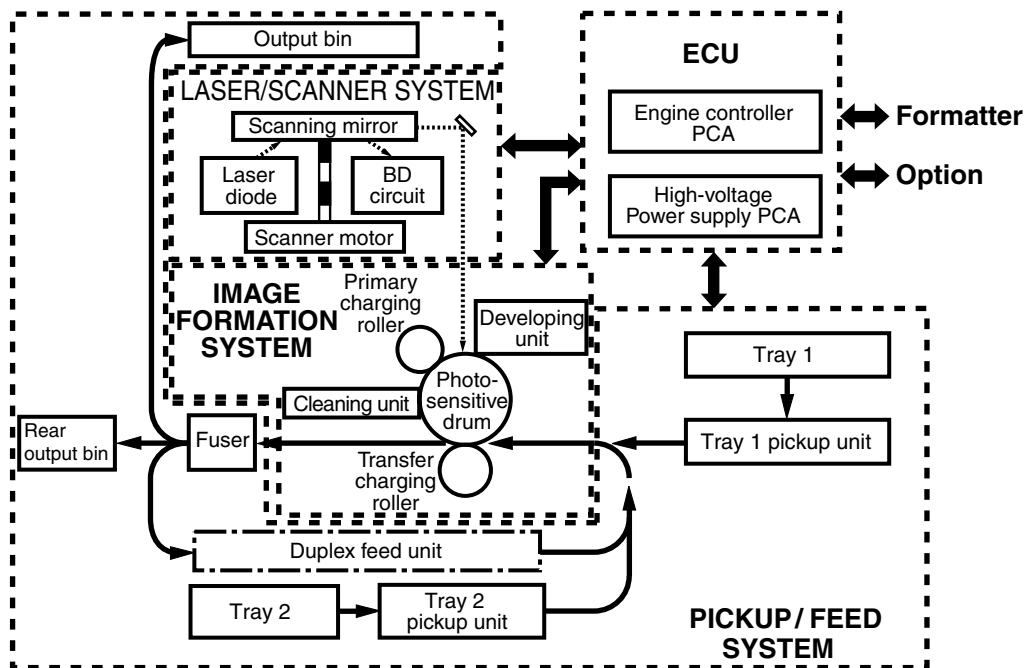

Figure 4-5 Print engine general structure

Figure 4-6 Engine control unit circuit diagram

NOTE Figure 6-11 ECU connections on page 268 shows the ECU connections.

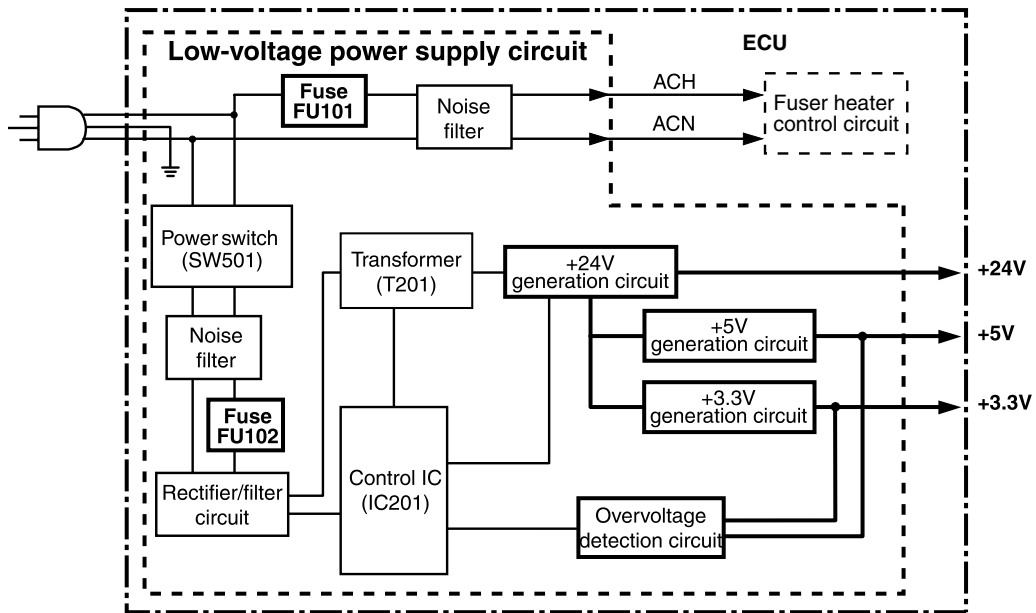

Figure 4-7 LVPS circuit diagram

Pickup/feed/delivery system

The pickup/feed/delivery system consists of several types of feed rollers and sensors. The ECU uses two motors and two solenoids to drive the rollers. Three media-detection sensors detect media as it passes through the device. If media does not reach or pass each sensor within a specified time period, the ECU determines that a jam has occurred and alerts the formatter.

The following components work together to feed media through the device:

- M1, main motor
- M2, fuser motor
- SL1, tray 1 pickup solenoid
- SL2, tray 2 pickup solenoid
- PS502, duplexer media-detection sensor
- Output-bin-full sensor
- PS901, top-of-page sensor
- PS902, tray 1 media-detection sensor
- PS903, media-width sensor
- SR1, top output-bin delivery flag
- SR2, fuser-delivery flag

Figure 4-8 Pickup/feed/delivery system block diagram

Laser/scanner system

The laser/scanner system receives video signals from the ECU and the formatter and converts the signals into latent images on the photosensitive drum.

Figure 4-9 Laser/scanner system

Image-formation system

Laser printing requires the interaction of several different technologies, including electronics, optics, and electrophotographics, to provide a printed page.

Figure 4-10 Print cartridge diagram

Each process functions independently and must be coordinated with the other device processes. Image formation consists of the following five processes:

- Electrostatic latent-image formation
- Developing
- Transfer
- Fusing
- Drum cleaning

The five processes contain eight steps, which are shown in the figure [Figure 4-11 Image-formation system on page 64](#) and described in the following sections.

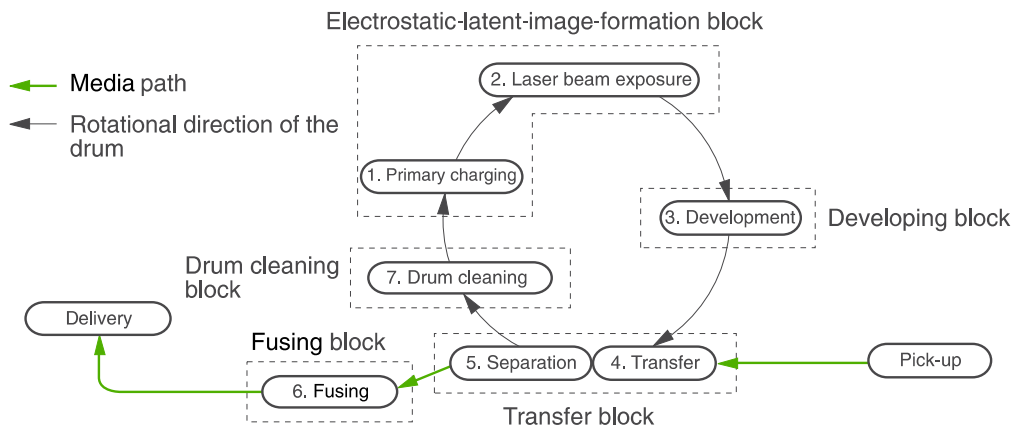

Figure 4-11 Image-formation system

Step 1: Primary charging

Dc and ac biases are applied to the primary charging roller, which transfers a uniform negative potential to the photosensitive drum.

Figure 4-12 Primary charging

Step 2: Laser beam exposure

The laser beam scans the photosensitive drum to neutralize negative charges on parts of the drum. An electrostatic latent image is formed on the drum where negative charges were neutralized.

Step 3: Developing

The developing cylinder comes in contact with the photosensitive drum to deposit toner onto the electrostatic latent image.

NOTE The charges on the exposed area of the drum are shown as positive in [Figure 4-13 Developing on page 65](#). The charges are actually negative, but they are more positive than the charges on the developing cylinder.

Figure 4-13 Developing

Toner acquires a negative charge through friction from the developing cylinder and the blade. When the negatively charged toner comes in contact with the drum, the toner adheres to the electrostatic latent image. The image on the drum becomes visible because of the toner.

Step 4: Transfer

The transfer charging roller, to which a dc positive bias is applied, imparts a positive charge on the print media. When the print media comes in contact with the photosensitive drum, the toner is transferred to the print media.

Figure 4-14 Transfer

Step 5: Separation

The elasticity of the print media causes its separation from the photosensitive drum. A static charge eliminator aids separation by weakening any electrostatic adhesion.

Figure 4-15 Separation

Step 6: Fusing

The dc negative bias applied to the fusing film strengthens the holding force of the toner on the print media and prevents the toner from scattering.

Figure 4-16 Fusing

Step 7: Drum cleaning

The cleaning blade scrapes the residual toner off of the photosensitive drum and deposits it into the waste toner case.

Figure 4-17 Drum cleaning

Internal components

Figure 4-18 Cross-section of device on page 68 highlights the major internal components.

Figure 4-18 Cross-section of device

1	Top output-bin delivery roller	10	Tray 2 separation pad
2	Fusing roller	11	Tray 2 pickup roller
3	Laser/scanner	12	Duplexer pickup roller
4	Photosensitive drum	13	Feed roller
5	Print cartridge	14	Transfer roller
6	Registration shutter	15	Duplexer feed roller
7	Tray 1 pickup roller	16	Oblique roller
8	Tray 1 separation pad	17	Fuser pressure-roller
9	Tray 2 feed roller	18	Fuser delivery-roller

Timing

The microprocessor on the ECU controls the device operation sequences. [Table 4-1 Operation sequences on page 69](#) describes engine operations for each period of a print operation. [Figure 4-19 Operational sequences on page 70](#) provides a graphical representation of the operation sequences. [Table 4-2 Power-on sequence on page 72](#) describes each step of the power-on sequence. [Table 4-3 Power-on sequence for the ADF/scanner assembly on page 72](#) describes the ADF power-on sequence.

Table 4-1 Operation sequences

Name	Timing	Purpose
WAIT	From power-on until the end of the main motor initial drive	<p>Detects presence of a print cartridge. Clears potential from the drum surface and cleans the transfer roller.</p> <p>See Table 4-2 Power-on sequence on page 72 for a complete description of the WAIT (power-on) period. Also see Figure 4-20 Timing diagram, HP LaserJet M3027/M3035 on page 71 for detailed information about device timing.</p>
STBY (standby)	From the end of the WAIT or LSTR period until either a print command is sent from the formatter or the power is turned off.	Prepares the device to receive print commands
INTR (initial rotation)	From the time of the print command until the pickup solenoid is turned on.	Prepares the photosensitive drum for printing.
PRINT	From the end of the INTR period until the top-of-page sensor detects the trailing edge of the media.	Forms the image on the photosensitive drum and transfers the toner image to the media.
LSTR (last rotation)	From the end of the PRINT period until the main motor stops rotating.	<p>Delivers the last page of a print job.</p> <p>After LSTR, the device either returns to STBY or, if another print command was sent from the formatter, enters INTR.</p>

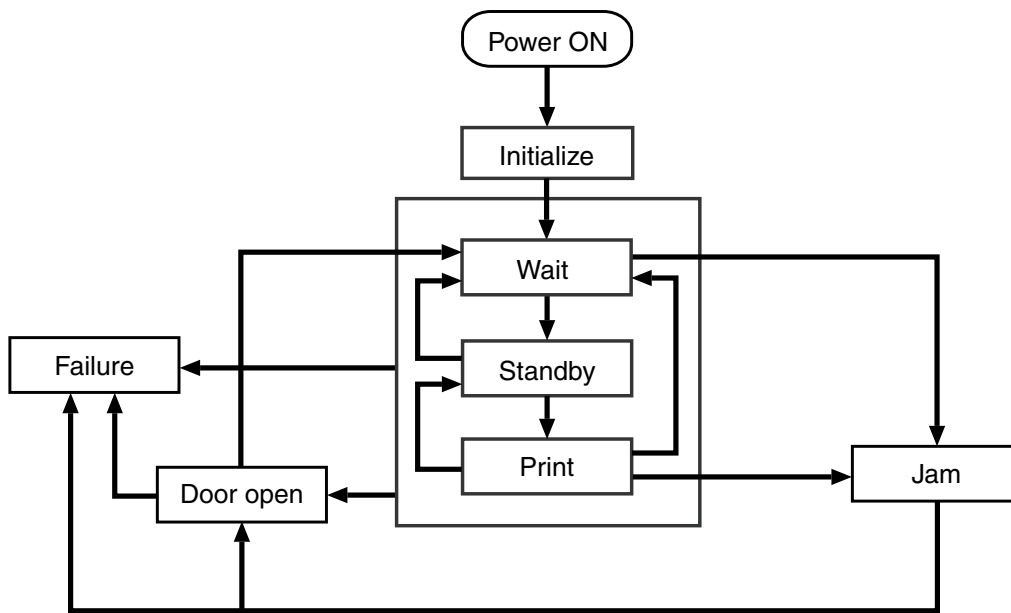

Figure 4-19 Operational sequences

Figure 4-20 Timing diagram, HP LaserJet M3027/M3035

Table 4-2 Power-on sequence

Step	Action
1	Power-on
2	CPU initialization
3	Video-interface communication start
4	Sensors check for residual media
5	Main motor initial drive
6	Fuser heater initial drive. The fuser heater reaches a surface temperature of 120°C.
7	Fuser-motor initial drive
8	Laser/scanner-motor initial drive
9	High-voltage control Detection of the presence of a print cartridge Cleaning of the transfer roller after the primary charging ac bias is turned on
10	Failure/abnormality check: detection of laser/scanner failure, fuser failure, and open covers
11	Communication with the memory tag

Table 4-3 Power-on sequence for the ADF/scanner assembly

Step	Action
1	Power-on
2	Initialize ADF and jam check
3	Carriage-lock check
4	Lamp warm-up
5	Lamp-stability check
6	Find reference-mark (for scanner right-side-edge location)
7	AFE (analog front-end)
8	PRNU (photo-response non-uniformity) and DSNU (dark-signal non-uniformity) correction. This procedure is performed with the lamp on. The carriage moves under the white calibration strip.

NOTE The lamp profile changes after 10 minutes of non-use. The device again performs lamp warm-up and PRNU and DSNU correction.

Print cartridge memory system

The memory tag is a nonvolatile memory built into the print cartridge. The cartridge usage condition is detected as the engine controller reads or writes the data stored on the memory tag. The engine controller renews the information in the prescribed timing and reads or writes it from or to the memory tag.

The engine controller commands the memory tag to read or write with the following conditions:

- **Read**
 - Power is ON
 - The top cover is closed
 - A command has been received from the formatter
- **Write**
 - A page of media is printed.
 - A command has been received from the formatter

When the engine controller failed to read or write three times in a row, it determines that the memory tag is abnormal and notifies the formatter of a "cartridge memory abnormality warning".

Figure 4-21 Print cartridge memory tag

Introduction

This chapter documents removal and replacement of field replaceable units (FRUs) only.

Removal and replacement strategy

Replace parts in the reverse order of their removal. Directions for difficult or critical replacement procedures are included.

WARNING! The sheet-metal edges of the device can be sharp. Use caution when working on the device.

NOTE Note the length, diameter, color, type, and location of each screw. Be sure to return each screw to its original location during reassembly.

Incorrectly routed or loose cables can interfere with other internal components and can become damaged or broken. Frayed or pinched cables can be difficult to locate. When reconnecting the cables, always use the provided wire loops, lance points, or cable guides.

Electrostatic discharge

CAUTION The device contains parts that are sensitive to electrostatic discharge (ESD). Always service the device at an ESD-protected workstation, or use an ESD mat.

Watch for the ESD symbol (shown at left) to identify the parts that are sensitive to ESD. Protect these parts by using an ESD wrist strap and by placing ESD-sensitive parts into protective ESD pouches.

User-replaceable parts

To remove and replace the pickup roller or separation pad, see [Separation pad on page 189](#).

Required tools

The following tools are needed to service this device:

- #2 Phillips screwdriver with magnetic tip
- Short Phillips screwdriver with magnetic tip (also known as a “stubby” screwdriver)
- Small flat-blade screwdriver
- Small needle-nose pliers
- ESD mat
- Small flashlight

CAUTION A pozidriv screwdriver will damage screw heads on the device. Use a #2 Phillips screwdriver.

If you use a multispeed screwdriver, use a torque limiter.

Before performing service

Follow the pre-service procedures before you perform service.

Pre-service procedures

1. Remove all media from the device.
2. Place the device on an ESD mat. If an ESD mat or an ESD-protected workstation is not available, discharge body static and ground the device chassis before servicing the device.
3. Unplug the power cord and the interface cable.
4. Lift the device off of any installed optional trays.
5. Remove the print cartridge.

CAUTION To prevent light from degrading the surface of the photosensitive drum, cover the print cartridge after removing it from the device.

6. Remove tray 2.

Parts removal order

Each section contains a list of covers and assemblies that have to be removed before working on the major assembly that is the subject of the section.

Figure 5-1 Parts removal diagram

Automatic document feeder (ADF) and scanner assemblies

Automatic document feeder (ADF) and scanner assemblies

ADF assembly

The ADF cover and the ADF input tray need not be removed unless they require service.

ADF cover

1. Open the ADF cover.
2. Rotate the ADF cover firmly toward the left side of the device and down to release three tabs (callout 1).

Figure 5-2 Removing the ADF cover

Figure 5-3 Reinstalling the ADF cover

Reinstallation tip When reinstalling the ADF cover, firmly press the three tabs until they click into place. When the three tabs are installed correctly, the cover should close easily. If it does not, open the ADF cover and check the tabs. Do not force the ADF cover closed. Forcing the ADF cover closed can damage the cover.

ADF input tray

1. Open the ADF cover.
2. Pull the ADF input tray up firmly to release one tab (callout 1).

Figure 5-4 Removing the ADF input tray

Figure 5-5 Reinstalling the ADF input tray

Reinstallation tip When reinstalling the ADF input tray, slide the tray straight into place. ADF jams and skew can result from incorrect reinstallation.

Control panel

1. Insert a flat-blade screwdriver into the gap at the left side of the control panel to disengage the control panel and then lift up the front of the control panel.

Figure 5-6 Removing the control panel (1 of 2)

2. Disconnect one cable (callout 1).

Figure 5-7 Removing the control panel (2 of 2)

3. Lift the control panel off of the device.

Figure 5-8 Reinstalling the control panel

Reinstallation tip Make sure that you insert the tabs at the back of the control panel (callout 2) into the slots.

ADF

1. Unscrew the thumb screws (callout 1) on the ADF cable at the back of the device and then unplug the cable.

Figure 5-9 Removing the ADF (1 of 3)

2. Lift the ADF lid and then press the hinge-release tab (callout 2) toward the right side of the device.

Figure 5-10 Removing the ADF (2 of 3)

3. Lift the ADF off of the device.

Figure 5-11 Removing the ADF (3 of 3)

Scanner assembly

NOTE If you are not replacing the scanner assembly, but need to remove it in order to gain access to assemblies inside the printer portion of the device, you can remove the scanner assembly and ADF together. To remove the scanner assembly and ADF together, begin this procedure with step 2.

1. Remove the ADF (see [ADF assembly on page 80](#)).
2. Remove the right-side cover (see [Right-side cover on page 94](#)), the formatter shield (see [Formatter shield on page 95](#)), the fax cover (see [Fax cover on page 96](#)), and the left-side cover (see [Left-side cover on page 97](#)).
3. Remove one cable from the cable guide (callout 1) and then disconnect the cable (callout 2) from the formatter.

CAUTION Failure to remove the cable from the cable guide can cause damage to the cable.

4. Disconnect the ribbon cable (callout 3) and then separate the power-cable connector (callout 4).

Figure 5-12 Removing the scanner assembly (1 of 4)

5. Remove one screw (callout 5) at the left side and two screws (callouts 6 and 7) at the back of the device.

Figure 5-13 Removing the scanner assembly (2 of 4)

6. Slide the scanner assembly toward the back of the device until it stops.

Figure 5-14 Removing the scanner assembly (3 of 4)

Reinstallation tip Upon reinstallation, the stapler can block the scanner assembly from moving into the correct position. If the assembly is blocked, open the stapler door and then press down on the stapler as you try to slide the scanner assembly toward the front of the device.

7. Lift the assembly straight up and off of the device.

Figure 5-15 Removing the scanner assembly (4 of 4)

Covers

Not all covers have to be removed to get to various FRUs. Use the list provided in each section to determine which covers and other components must be removed.

Right-side cover

1. Slide the right-side cover toward the back of the device.

Figure 5-16 Removing the right-side cover

2. Lift the cover away from the device.

Formatter shield

1. Remove the right-side cover (see [Right-side cover on page 94](#)).
2. Rotate the formatter shield away from the front of the device, and then lift it off of its hinges (callout 1) at the back of the device.

Figure 5-17 Removing the formatter shield

Fax cover

Pull the fax cover away from the back of the device.

Figure 5-18 Removing the fax cover

Left-side cover

1. Remove two screws (callout 1).

Figure 5-19 Removing the left-side cover (1 of 3)

2. Open the cartridge door.
3. Open the rear output bin all the way, and then press the output bin down firmly to disengage two door-stops (callout 2 in [Figure 5-20 Removing the left-side cover \(2 of 3\) on page 98](#)).

4. Use a flat-blade screwdriver to press one tab (callout 3) toward the back of the device, and then rotate the cover away from the back of the device.

Figure 5-20 Removing the left-side cover (2 of 3)

5. Slide the cover toward the front of the device to clear tabs at the front (callout 4), and then lift the cover away from the device.

Figure 5-21 Removing the left-side cover (3 of 3)

Legal cover (dust cover)

1. Rotate the cover up to the horizontal position.
2. Flex the middle of the cover until one of the hinges is released from its slot.

3. Slide the cover toward the released hinge to release the other hinge.

Back cover

1. Remove the left-side cover (see [Left-side cover on page 97](#)) and leave the rear output bin all the way open.
2. Remove two screws (callout 1).

Figure 5-22 Removing the back cover (1 of 2)

3. Release one tab (callout 2) inside the device and then rotate the bottom of the cover away from the device.

Figure 5-23 Removing the back cover (2 of 2)

4. Lift the cover away from the device.

I/O cover

1. Remove the back cover (see [Back cover on page 101](#)).
2. Rotate the I/O cover to clear tabs at the right side of the cover.

Figure 5-24 Removing the I/O cover

3. Lift the cover off of the device.

Fax rail

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Fax cover (see [Fax cover on page 96](#))
 - Left-side cover (see [Left-side cover on page 97](#))
 - Back cover (see [Back cover on page 101](#))
 - I/O cover (see [I/O cover on page 103](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
2. Remove two screws (callout 1).

Figure 5-25 Removing the fax rail

3. Lift the fax rail off of the device.

Top cover

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Fax cover (see [Fax cover on page 96](#))
 - Left-side cover (see [Left-side cover on page 97](#))
 - Back cover (see [Back cover on page 101](#))
 - I/O cover (see [I/O cover on page 103](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax rail (see [Fax rail on page 104](#))
2. Remove two screws (callout 1) from each side of the device (a total of four screws).

Figure 5-26 Removing the top cover (1 of 3)

3. Squeeze the cover at the back of the device to release two tabs and lift up the cover slightly.

Figure 5-27 Removing the top cover (2 of 3)

- Slide the cover toward the front of the device to clear the tabs (callout 2) at the front of the device.

Figure 5-28 Removing the top cover (3 of 3)

- Lift the cover off of the device.

Reinstallation tip The grounding connection (callout 3) can become caught in the chassis when lifting the cover. Make sure that it is still attached to the cover before you reinstall the cover.

Figure 5-29 Reinstalling the top cover

Reinstallation tip After reinstalling the cover, make sure that the exit-sensor flag (callout 4) moves freely.

Front, right cover

1. Remove the right-side cover (see [Right-side cover on page 94](#)).
2. Remove two screws (callout 1).

Figure 5-30 Removing the front, right cover (1 of 2)

3. Rotate the cover away from the back of the device to clear two tabs (callout 2) at the front of the device.

Figure 5-31 Removing the front, right cover (2 of 2)

4. Lift the cover away from the device.

Fax accessory

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Fax cover (see [Fax cover on page 96](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
2. Disconnect one cable (callout 1) from the fax accessory.

Figure 5-32 Removing the fax accessory (1 of 2)

3. Slide the fax accessory toward the back and out of the device.

Figure 5-33 Removing the fax accessory (2 of 2)

Disk drive

1. Remove the right-side cover (see [Right-side cover on page 94](#)) and the formatter shield (see [Formatter shield on page 95](#)).
2. Disconnect two cables (callout 1) and remove one screw (callout 2).

Figure 5-34 Removing the disk drive (1 of 3)

3. Slide the disk drive up slightly to clear three tabs from the tab slots (callout 3 in [Figure 5-35 Removing the disk drive \(2 of 3\) on page 114](#)), and then lift the disk drive away from the device.

Reinstallation tip Upon reinstallation, make sure that all three tabs are inserted correctly into the slots. Also make sure that the screw-hole tab on the disk drive housing is on top of the tab in the device.

NOTE If you are replacing the disk drive, complete the additional steps below. If you are removing the disk drive in order to replace the formatter or other parts, there is no need to complete the remaining steps in this section.

4. Remove two screws (callout 4) from the metal housing.

Figure 5-35 Removing the disk drive (2 of 3)

5. Open the metal-housing door, remove the disk drive from the metal housing, and then disconnect two cables (callout 5).

Figure 5-36 Removing the disk drive (3 of 3)

Formatter

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Disk drive (see [Disk drive on page 113](#))

NOTE Removing the disk drive is not a required step. However, you might find it easier to remove the formatter if you have already removed the disk drive.

2. Disconnect three cables (callout 1) from the top of the formatter.
3. Disconnect four cables (callout 2) from the left side (toward the front of the device) of the formatter.
4. Remove six screws (callout 3).

Figure 5-37 Removing the formatter

5. Lift up the formatter slightly to clear one tab at the bottom, rotate the left edge of the formatter (at the front of the device) away from the device, and then slide the formatter toward the front of the device to remove it.

Stapler

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Fax cover (see [Fax cover on page 96](#))
 - Left-side cover (see [Left-side cover on page 97](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
2. Remove one screw (callout 1) from the stapler cover and then lift the cover off of the device.

Figure 5-38 Removing the stapler (1 of 3)

3. Remove two screws (callout 2) from the stapler bracket.

Figure 5-39 Removing the stapler (2 of 3)

Reinstallation tip Be careful not to pinch the stapler cables when reinstalling and tightening the screws.

4. Lift the stapler out of the device and then disconnect one cable (callout 3) from the back of the stapler.

Figure 5-40 Removing the stapler (3 of 3)

Figure 5-41 Reinstalling the stapler (1 of 3)

 **Reinstallation tip** For correct placement, insert the metal tab at the back of the stapler (callout 4) into the slot in the chassis (callout 5). The following figure shows correct placement of the metal tab in callout 6 and incorrect placement of the metal tab in callout 7.

Figure 5-42 Reinstalling the stapler (2 of 3) – correct (callout 6) and incorrect (callout 7) reinstallation of the metal tab.

Figure 5-43 Reinstalling the stapler (3 of 3)

Reinstallation tip Make sure that the actuator rod (callout 8) is inserted into the hole in the stapler and that it moves freely.

Stapler testing – to be performed after the device is fully reassembled

WARNING! Incorrect reinstallation of the stapler can cause the stapler-door switch to operate incorrectly, resulting in a safety hazard. Test the stapler for correct operation before releasing the device back to the customer.

Final stapler-test procedure

Test #1: Does the stapler operate correctly when the stapler door is closed?

With the stapler door closed, use the stapler to staple several sheets of paper together. The stapler should staple the sheets.

Test #2 (safety-switch test): Does the stapler operate when the stapler door is open?

Open the stapler door and attempt to use the stapler to staple several sheets of paper together. When the stapler and stapler door safety-switch are operating correctly, the open door cuts power to the stapler and the stapler does *not* staple the sheets.

WARNING! Do *not* release the device back to the customer unless the stapler passes both of the tests. *If the stapler fails either test, remove the stapler and then reinstall it by carefully following the installation steps shown in this manual. If the stapler continues to fail one or both tests, replace the stapler and the stapler power supply.*

If the staple activates when the stapler door is open, and the stapler cannot be repaired without ordering parts, disconnect the stapler power supply before reassembling the device and before you leave the customer site. When the stapler power supply is disconnected, the customer can safely operate all device functions, except for stapling, while waiting for repair of the stapler.

Stapler power-supply

1. Remove the following components:
 - All covers except for the top cover and the right, front cover (see [Covers on page 94](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax accessory (see [Fax accessory on page 111](#))
 - Formatter (see [Formatter on page 116](#))
 - Stapler (see [Stapler on page 117](#))
2. Remove two screws (callout 1) from the side of the I/O plate and one screw (callout 2) from the back of the plate.

Figure 5-44 Removing the stapler power supply (1 of 5)

3. Lift the I/O plate up slightly to dislodge it from the tabs (callout 3) on the ECU plate, and then slide it toward the back and off of the device.

Figure 5-45 Removing the stapler power supply (2 of 5)

4. Remove three screws (callout 4) from the stapler-power-supply plate.

Figure 5-46 Removing the stapler power supply (3 of 5)

5. Slide the stapler-power-supply plate toward the back of the device until it stops, and then guide cables through a hole in the stapler-power-supply plate while lifting the plate straight away from the device.

Figure 5-47 Removing the stapler power supply (4 of 5)

Reinstallation tip Guide the cables through the hole in the stapler-power-supply plate before attaching the plate.

6. Unplug the power-supply cable (callout 5) and then remove one screw (callout 6) to release the power-supply cover.

Figure 5-48 Removing the stapler power supply (5 of 5)

7. Lift the cover off of the power supply and then lift the power supply off of the plate.

Right-side fan

1. Remove the following components:
 - All covers except for the top cover (see [Covers on page 94](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax accessory (see [Fax accessory on page 111](#))
 - Disk drive (see [Disk drive on page 113](#))
 - Formatter (see [Formatter on page 116](#))
 - Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
2. Remove the grounding wire (callout 1) from the fan housing.

Figure 5-49 Removing the right-side fan (1 of 3)

3. Remove three screws (callout 2) from the clip-tray/stapler housing assembly and then lift the assembly off of the device.

Figure 5-50 Removing the right-side fan (2 of 3)

Reinstallation tip When reinstalling the clip-tray/stapler-housing assembly, route the scanner power cable (callout 3) through an opening in the assembly.

4. Disconnect the fan cable (callout 4) at the ECU and then remove two screws (callout 5).

Figure 5-51 Removing the right-side fan (3 of 3)

5. Slide the fan out of the device.

Engine control unit (ECU)

1. Remove the following components:
 - All of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax accessory (see [Fax accessory on page 111](#))
 - Disk drive (see [Disk drive on page 113](#))
 - Formatter (see [Formatter on page 116](#))
 - Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
 - Right-side fan (see [Right-side fan on page 128](#))
2. Disconnect ten cables (callout 1) from the ECU.
3. Remove two screws (callout 2—one from the right-side riser and one from the ECU plate).

Figure 5-52 Removing the ECU (1 of 6)

4. Remove five screws (callout 3) at the back of the device.

Figure 5-53 Removing the ECU (2 of 6)

5. Remove three screws (callout 4) from the right-side riser and then lift the riser off of the device. Also remove two screws (callout 5) from the ECU plate.

Figure 5-54 Removing the ECU (3 of 6)

6. Disconnect two sensor cables (callout 6) and the fuser power cable (callout 7).

Figure 5-55 Removing the ECU (4 of 6)

7. Unplug the laser/scanner ribbon cable (callout 8) from the laser/scanner and disconnect one inline connector (callout 9). Then, unwind the front-door microswitch cable from the cable guides and then remove the microswitch (callout 10) from its housing.

Figure 5-56 Removing the ECU (5 of 6)

Figure 5-57 Reinstalling the front-door microswitch cable

Reinstallation tip Upon reinstallation, replace the microswitch in its housing and then route the cable as shown in [Figure 5-57 Reinstalling the front-door microswitch cable on page 135](#).

8. Lift up the ECU slightly and rotate the top of the ECU away from the device. After it is rotated, disconnect one ribbon cable (callout 11) from the ECU.

Figure 5-58 Removing the ECU (6 of 6)

9. Lift the ECU off of the device.

NOTE The ECU and the ECU pan together are a single FRU. You do not have to separate the ECU and the ECU pan.

Figure 5-59 Reinstalling the ECU

Reinstallation tip Make sure that the power switch (callout 12) fits into the correct position in the switch link (callout 13).

Left-side riser

1. Remove all covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
2. Remove four screws (callout 1).

Figure 5-60 Removing the left-side riser

3. Lift the left-side riser off of the device.

Fuser

1. Remove the back cover (see [Back cover on page 101](#)) and the I/O cover (see [I/O cover on page 103](#)).
2. Remove the duplexer inlet guide by releasing two tabs (callout 1) on the guide, and then sliding the guide toward the back of the device.

Figure 5-61 Removing the fuser (1 of 3)

Reinstallation tip Make sure that both tabs snap into place when reinstalling the duplexer inlet guide.

3. Disconnect the fuser power cable (callout 2) and remove the cable from the cable guide (callout 3). Also disconnect two cables (callout 4) at the right side of the fuser and remove one of the cables from the cable guide (callout 5).

Figure 5-62 Removing the fuser (2 of 3)

4. Remove three self-tapping screws (callout 6) and one grounding screw (callout 7).

Figure 5-63 Removing the fuser (3 of 3)

5. Tilt the fuser slightly toward the back of the device, and then slide the fuser out of the back of the device.

Laser/scanner

1. Remove all covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#)).
2. Release one tab (callout 1) on the air duct, and then lift the air duct out of the device.

Figure 5-64 Removing the laser/scanner (1 of 2)

3. Disconnect two cables (callout 2) and then remove four screws (callout 3).

Figure 5-65 Removing the laser/scanner (2 of 2)

4. Lift the laser/scanner out of the device.

Access plate

1. Remove the following components:
 - Left-side cover (see [Left-side cover on page 97](#))
 - Back cover (see [Back cover on page 101](#))
 - I/O cover (see [I/O cover on page 103](#))
 - Duplexer inlet guide (see [Figure 5-61 Removing the fuser \(1 of 3\) on page 139](#))
2. At the front of the device, push the green button on the top, right front of the tray 2 opening to release the access plate.

Figure 5-66 Removing the access plate (1 of 2)

3. At the back of the device, press one tab (callout 1) to release the access plate, and then lower the access plate until the other side slides off of the other tab (callout 2).

NOTE You might have to pry the tab with a flat-blade screwdriver. If you bend the tab, straighten the tab before you reinstall the plate.

Figure 5-67 Removing the access plate (2 of 2)

4. Slide the plate out of the device.

CAUTION Make sure that you do not damage the spring that is attached to the plate.

Oblique-roller assembly

1. Remove the following components:
 - Left-side cover (see [Left-side cover on page 97](#))
 - Back cover (see [Back cover on page 101](#))
 - I/O cover (see [I/O cover on page 103](#))
 - Duplexer inlet guide (see [Figure 5-61 Removing the fuser \(1 of 3\) on page 139](#))
 - Access plate (see [Access plate on page 144](#))
2. At the bottom of the device, remove the two screws (callout 1) that secure the oblique-roller assembly to the device, and then lift the assembly from the device.

Figure 5-68 Removing the oblique-roller assembly

Figure 5-69 Reinstalling the oblique-roller assembly

Reinstallation tip To reinstall the oblique-roller assembly, first make sure that the tab (callout 2) is parallel to the assembly. Then line up the the roller shaft (callout 3) with its hole on the assembly and rotate the assembly into place. Rotate the roller toward the back of the device to align the gears.

Left-side fan

1. Remove all of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#)).
2. Disconnect the left-side-fan cable from the ECU.
3. Remove two screws (callout 1) at the left side of the device and then lift the fan plate and fan straight away from the hole in the chassis.

NOTE Do not disconnect the left-side-fan cable from the fan. Instead, unroute the fan cable starting at the ECU connector.

Figure 5-70 Removing left-side fan

High-voltage power supply (HVPS)

1. Remove the following components:

- All covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
- Fax accessory (see [Fax accessory on page 111](#))
- Disk drive (see [Disk drive on page 113](#))
- Formatter (see [Formatter on page 116](#))
- Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
- ECU (see [Engine control unit \(ECU\) on page 131](#))
- Left-side riser (see [Left-side riser on page 138](#))
- Access plate (see [Access plate on page 144](#))
- Oblique-roller assembly (see [Oblique-roller assembly on page 146](#))
- Left-side fan (see [Left-side fan on page 148](#))

Tip You do not have to unroute the left-side-fan cable in order to remove the HVPS. After removing the fan from its hole in the chassis, simply set the fan down on the workspace.

2. Tip the device so that it rests on its top.

3. Remove one grounding screw from inside the slot (callout 1) for the flat ribbon cable.

Figure 5-71 Removing the HVPS (1 of 5)

4. At the left side of the device, disconnect one cable (callout 2) and then remove two screws (callout 3).

Figure 5-72 Removing the HVPS (2 of 5)

Reinstallation tip Remember how the cable is threaded and connected to the device.

5. Remove two screws (callout 4) from the ribbon-cable protector (callout 5) and then lift the protector out of the device.

Figure 5-73 Removing the HVPS (3 of 5)

6. Guide the ribbon cable (callout 6) through the hole in the chassis and then remove the remaining three screws (callout 7) from the HVPS pan.

Figure 5-74 Removing the HVPS (4 of 5)

7. Lift the edge of the HVPS pan and then disconnect two cables (callout 8) from the HVPS.

Figure 5-75 Removing the HVPS (5 of 5)

NOTE The HVPS pan and the HVPS together are a single FRU. You do not have to separate the HVPS from the pan.

Figure 5-76 Grounding-spring locations

Reinstallation tip As you remove the power supply, note the locations of the grounding springs. You might need to reinstall one non-captive spring (callout 9) before reinstalling the power supply.

Feed-guide assembly

1. Remove the following components:

- All of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
- Fax accessory (see [Fax accessory on page 111](#))
- Disk drive (see [Disk drive on page 113](#))
- Formatter (see [Formatter on page 116](#))
- Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
- ECU (see [Engine control unit \(ECU\) on page 131](#))
- Left-side riser (see [Left-side riser on page 138](#))
- Access plate (see [Access plate on page 144](#))
- Fuser (see [Fuser on page 139](#))
- Oblique-roller assembly (see [Oblique-roller assembly on page 146](#))
- Left-side fan (see [Left-side fan on page 148](#))

Tip You do not have to unroute the left-side-fan cable in order to remove the HVPS or the feed-guide assembly. After removing the fan from its hole in the chassis, simply set the fan down on the workspace.

- High-voltage power supply (see [High-voltage power supply \(HVPS\) on page 149](#))
2. Lift one non-captive grounding spring (see callout 9 in [Figure 5-76 Grounding-spring locations on page 155](#)) out of the device.
 3. Loosen the grounding wire from the routing guides (see callout 1 in [Figure 5-77 Removing the feed-guide assembly \(1 of 2\) on page 157](#)).

CAUTION Do not bend or remove the grounding wire.

4. Remove two screws (callout 2).

Figure 5-77 Removing the feed-guide assembly (1 of 2)

5. On the edge of the assembly that is farthest from you, lift the right corner up, twist the assembly counterclockwise, and remove the assembly from the device.

Figure 5-78 Removing the feed-guide assembly (2 of 2)

Reinstallation tip Make sure that the loosened grounding wire is out of the way before reinstalling the feed-guide assembly.

Main motor

1. Remove the following components:

- All of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
- Fax accessory (see [Fax accessory on page 111](#))
- Disk drive (see [Disk drive on page 113](#))
- Formatter (see [Formatter on page 116](#))
- Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
- ECU (see [Engine control unit \(ECU\) on page 131](#))
- Left-side riser (see [Left-side riser on page 138](#))
- Access plate (see [Access plate on page 144](#))
- Fuser (see [Fuser on page 139](#))
- Oblique-roller assembly (see [Oblique-roller assembly on page 146](#))
- Left-side fan (see [Left-side fan on page 148](#))

Tip You do not have to unroute the left-side-fan cable in order to remove the HVPS, the feed-guide assembly, or the main motor. After removing the fan from its hole in the chassis, simply set the fan down on the workspace.

- High-voltage power supply (see [High-voltage power supply \(HVPS\) on page 149](#))
- Feed-guide assembly (see [Feed-guide assembly on page 156](#))

2. Remove three screws (callout 1) from the main motor cover and then lift the cover out of the device.

Figure 5-79 Removing the main motor (1 of 2)

⚠ WARNING! The teeth on the static-eliminator sheet are *sharp*. Be careful not to cut yourself on the static-eliminator teeth when removing screws in the area of the main motor.

3. Remove three screws (callout 2), unroute the main-motor cable, and then lift the motor out of the device.

Figure 5-80 Removing the main motor (2 of 2)

NOTE Do not attempt to disconnect the cable at the main motor. The cable is permanently connected to the main motor.

Gear assembly

1. Remove the following components:

- All of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
- Fax accessory (see [Fax accessory on page 111](#))
- Disk drive (see [Disk drive on page 113](#))
- Formatter (see [Formatter on page 116](#))
- Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
- ECU (see [Engine control unit \(ECU\) on page 131](#))
- Left-side riser (see [Left-side riser on page 138](#))
- Access plate (see [Access plate on page 144](#))
- Fuser (see [Fuser on page 139](#))
- Oblique-roller assembly (see [Oblique-roller assembly on page 146](#)).
- Left-side fan (see [Left-side fan on page 148](#))

Tip You do not have to unroute the left-side-fan cable in order to remove the HVPS, the feed-guide assembly, or the gear assembly. After removing the fan from its hole in the chassis, simply set the fan down on the workspace.

- High-voltage power supply (see [High-voltage power supply \(HVPS\) on page 149](#))
- Feed-guide assembly (see [Feed-guide assembly on page 156](#))

2. Remove two screws (callout 1) from the switch-link assembly, slide the assembly toward the front of the device, and then lift it out of the device.

Figure 5-81 Removing the gear assembly (1 of 2)

3. Remove cables from four cable guides (callout 2) and then remove four screws (callout 3) from the gear-assembly plate.

NOTE Make sure that you duplicate the cable routing when you reinstall the assembly.

Figure 5-82 Removing the gear assembly (2 of 2)

4. Pull the gear assembly straight away from the device.

NOTE The spring (callout 4 in [Figure 5-83 Reinstalling the gear assembly on page 165](#)) is not attached to the gear-assembly plate or to the large gear. As a result, the spring might fall out of the device when you remove the gear assembly.

Reinstallation notes for the gear assembly

Reinstallation tip Close the cartridge door and press the large gear against the device chassis before you start to reinstall the gear assembly.

Reinstallation tip The spring (callout 4) has a locating pin that must be inserted into the small hole in the gear-assembly plate before reinstallation.

Reinstallation tip Use the rod (callout 5) on the gear-assembly plate as a locator to find the correct position for the gear assembly. Insert the rod into the hole in the lower gear on the device chassis.

Reinstallation tip Be careful not to catch any cables behind the gear-assembly plate when reinstalling the screws.

Figure 5-83 Reinstalling the gear assembly

Tray 1 solenoid

1. Remove the following components:
 - All covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax accessory (see [Fax accessory on page 111](#))
 - Disk drive (see [Disk drive on page 113](#))
 - Formatter (see [Formatter on page 116](#))
 - Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
 - Right side fan (see [Right-side fan on page 128](#))
 - ECU (see [Engine control unit \(ECU\) on page 131](#))
2. Remove one screw (callout 1).

Figure 5-84 Removing the tray 1 solenoid

3. Lift the solenoid off of the device chassis.

Tray 2 solenoid

1. Remove the following components:
 - All covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
 - Fax accessory (see [Fax accessory on page 111](#))
 - Disk drive (see [Disk drive on page 113](#))
 - Formatter (see [Formatter on page 116](#))
 - Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
 - Right-side fan (see [Right-side fan on page 128](#))
 - ECU (see [Engine control unit \(ECU\) on page 131](#))
 - High-voltage power supply (see [High-voltage power supply \(HVPS\) on page 149](#))
 - Gear assembly (see [Gear assembly on page 162](#))
2. Remove one screw (callout 1).

Figure 5-85 Removing the tray 2 solenoid

3. Lift the solenoid off of the device chassis.

Pickup assembly

1. Remove the following components:

- All of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#))
- Disk drive (see [Disk drive on page 113](#))
- Formatter (see [Formatter on page 116](#))
- Stapler (see [Stapler on page 117](#)) and stapler power-supply (see [Stapler power-supply on page 123](#))
- ECU (see [Engine control unit \(ECU\) on page 131](#))
- Left-side riser (see [Left-side riser on page 138](#))
- Access plate (see [Access plate on page 144](#))
- Fuser (see [Fuser on page 139](#))
- Oblique-roller assembly (see [Oblique-roller assembly on page 146](#)).
- Left-side fan (see [Left-side fan on page 148](#))

Tip You do not have to unroute the left-side-fan cable in order to remove the HVPS, the feed-guide assembly, the gear assembly, or the pickup assembly. After removing the fan from its hole in the chassis, simply set the fan down on the workspace.

- High-voltage power supply (see [High-voltage power supply \(HVPS\) on page 149](#))
- Feed-guide assembly (see [Feed-guide assembly on page 156](#))
- Gear assembly (see [Gear assembly on page 162](#))

2. Remove the cables from the cable guide (callout 1) and then remove two screws (callout 2) from the tray 2 solenoid plate. Press the tab on the pickup shaft gear (callout 3) and then slide the gear off of the shaft.

NOTE Keep the parts of the pickup-shaft gear together to make sure that the small spring inside remains with the gear.

Figure 5-86 Removing the pickup assembly (1 of 4)

3. Remove three screws (callout 4) from two tray guides at the right side of the device and then lift the guides out of the device. Repeat the procedure to remove the tray guides at the left side of the device.

Figure 5-87 Removing the pickup assembly (2 of 4)

4. Tip the device so that it rests on its top.

5. Press in the green tab (callout 5), remove two screws (callout 6) from the roller-stay assembly, and then lift the assembly out of the device.

Figure 5-88 Removing the pickup assembly (3 of 4)

NOTE After removing the roller-stay assembly, the media-present sensor for tray 1 is exposed. To remove the sensor, remove one screw, unthread the sensor cable, and lift the sensor out of the device.

6. Use a short screwdriver to remove two screws (callout 7) and then remove the remaining two screws (callout 8) from the pickup assembly.

Figure 5-89 Removing the pickup assembly (4 of 4)

7. Lift the assembly out of the device starting at the opposite end from the gear-end of the assembly.

NOTE After removing the pickup assembly, the top-of-page sensor is easily accessible. To remove the top-of-page sensor, use a short screwdriver to remove two screws from the sensor cover, remove one screw from the sensor, unthread the sensor cable, and then lift the sensor out of the device.

Tray 1 media-present sensor and top-of-page sensor

The tray 1 media-present sensor is exposed when the roller-stay assembly is removed in step 5 of the pickup assembly removal (see [Pickup assembly on page 168](#)). To remove the sensor, remove one screw (callout 1), unthread the sensor cable, and then lift the sensor out of the device.

To remove the top-of-page sensor, remove the pickup assembly (see [Pickup assembly on page 168](#)) and then remove two screws (callout 2) from the sensor cover. Lift the sensor cover out of the device to expose the top-of-page sensor, and then remove one screw from the sensor.

Figure 5-90 Removing the tray 1 media-present sensor and the top-of-page sensor

Figure 5-91 Media-width, top-of-page, and tray 1 media-present sensors

NOTE [Figure 5-91 Media-width, top-of-page, and tray 1 media-present sensors on page 174](#) shows three sensors:

Media-width sensor (callout 3), which can be removed after removing the high-voltage power-supply (see [High-voltage power supply \(HVPS\) on page 149](#))

Top-of-page sensor (callout 4), which can be removed according to instructions in this section

Tray 1 media-present sensor (callout 5), which can be removed according to instructions in this section

E-label reader (memory tag)

1. Remove all of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#)).
2. Disconnect one cable (callout 1), and then thread the cable through the hole in the device chassis.

Figure 5-92 Removing the e-label reader (1 of 2)

3. Remove one screw (callout 2).

Figure 5-93 Removing the e-label reader (2 of 2)

4. Lift the e-label reader out of the device.

Reinstallation tip Insert the tab at the front of the reader into the metal slot first.

Face-down-roller shaft

1. Remove all of the covers (see [Covers on page 94](#)) and the ADF/scanner assembly (see [Scanner assembly on page 90](#)).
2. Rotate the bushings (callout 1) at both ends of the face-down-roller shaft .

NOTE The bushing on the left side of the device rotates to a horizontal position. The bushing on the right side rotates approximately 45°.

Figure 5-94 Removing the face-down-roller shaft (1 of 2)

3. Lift the end at the right side of the device, and then slide the shaft toward the right side to clear the hole on the left side of the device chassis.

Figure 5-95 Removing the face-down-roller shaft (2 of 2)

Cartridge door

1. Remove the left-side cover (see [Left-side cover on page 97](#)).
2. With the cartridge door closed, unhook the spring (callout 1) at the device chassis, and then remove one screw (callout 2).

Figure 5-96 Removing the cartridge door (1 of 3)

3. Open the cartridge door, and then use a flatblade screwdriver to release the cartridge-door arm (callout 3) at the right side of the cartridge door.

Figure 5-97 Removing the cartridge door (2 of 3)

4. Slide the cartridge door to the left, off of the hinges, and then pull the door away from the device.

Figure 5-98 Removing the cartridge door (3 of 3)

Transfer roller

1. Open the cartridge door.
2. Release the left end of the transfer roller by using needle-nose pliers or a small flatblade screwdriver to pinch two tabs at the left end of the transfer roller.

Figure 5-99 Removing the transfer roller

3. Use the needle-nose pliers or flatblade screwdriver in the same manner to release the other end.
4. Lift the transfer roller out of the device.

NOTE The left end of the transfer roller has a spring attached. At the right end of the roller, the spring is attached to the device rather than to the roller. As a result, the spring at the right end remains in the device. Also, the gear assembly at the right end of the roller is not captive on the roller.

CAUTION Be careful not to touch the surface of the new transfer roller.

Reinstallation tip Align the springs with the tabs on the bottom of the roller-mounts before pressing the roller into place.

Registration assembly

1. Remove the following components:
 - Right-side cover (see [Right-side cover on page 94](#))
 - Formatter shield (see [Formatter shield on page 95](#))
 - Fax cover (see [Fax cover on page 96](#))
 - Left-side cover (see [Left-side cover on page 97](#))
 - ADF/scanner assembly (see [Scanner assembly on page 90](#))
2. Unhook the clasp on the registration assembly gear (callout 1), and then slide the gear off of the shaft.

Figure 5-100 Removing the registration assembly (1 of 3)

3. Remove two screws (callout 2) from the registration-assembly cover, and then lift the cover out of the device.

Figure 5-101 Removing the registration assembly (2 of 3)

4. Remove four screws (callout 3).

Figure 5-102 Removing the registration assembly (3 of 3)

5. Lift the registration assembly out of the device, gear-end first.

Tray 1 pickup roller

1. Spread the pickup-roller locks (callout 1) on each side of the tray 1 pickup roller to release the roller.

Figure 5-103 Removing the tray 1 pickup roller

2. Rotate the top of the roller off of the shaft, and then lift the roller out of the device.

Tray 2 pickup roller

NOTE Also follow these instructions to remove any optional-tray pickup rollers.

1. Tip the device over on its rear side, with the top of the device facing you.
2. Rotate the bushings (callout 1) on each side of the roller upward.

Figure 5-104 Removing the tray 2 pickup roller (1 of 2)

3. Remove the left-side bushing by sliding the bushing to the left.
4. Slide the roller and shaft toward the left until they clear the hole in the right-side bushing, and then lift the right end of the shaft.

5. Slide the roller and shaft toward the right, and then lift the roller and shaft together out of the device.

Figure 5-105 Removing the tray 2 pickup roller (2 of 2)

Separation pad

NOTE To replace a separation pad, replace the entire separation-pad assembly.

1. Pull the tray out of the device.
2. Remove two screws (callout 1) from the separation-pad assembly.

Figure 5-106 Removing the separation pad

3. Lift the assembly out of the tray.

Troubleshooting process

Troubleshooting tree

Figure 6-1 Basic troubleshooting

Troubleshooting flowchart

If the device is not responding correctly, use the flowchart to determine the problem. If the device does not pass a step, follow the corresponding troubleshooting suggestions.

1. Does the control-panel display show READY?

YES →	Go to step 2.
NO ↓	
The control-panel display is blank, and the device fan is off.	<ul style="list-style-type: none">• Turn the device off, and then turn it on again.• Check the power cord connections and the power switch.• Plug the device into a different outlet.• Check that the power supplied to the device is steady, and meets device specifications. (See Electrical specifications on page 328.)
The control-panel display appears with no backlighting.	Check the power connector to the ADF/scanner assembly.
The control-panel display is blank, but the device fan is on.	<ul style="list-style-type: none">• Press a control-panel button to see if the device responds.• Check the ribbon cable to the ADF/scanner assembly.• Turn the device off, and then turn it on again.
The control-panel display is in the wrong language.	<ul style="list-style-type: none">• Turn the device off, and then turn it on again. When XXX MB appears on the control-panel display, press and hold down the 6 key until all three lights remain illuminated. This could take up to 10 seconds. Then, release the 6 key. Use the 3 and 9 keys to scroll to Language and then press the 6 key to select it. Use the 3 and 9 keys to scroll through the available languages to the language you want and then press the 6 key to select it.
The control-panel display shows garbled or unfamiliar characters.	<ul style="list-style-type: none">• Make sure that the appropriate language is selected at the device control panel.• Turn the device off, and then turn the device on again.
A message other than READY appears on the control-panel display.	<ul style="list-style-type: none">• See Control-panel messages on page 201.

2. Can you print a configuration page?

(See [Use information pages on page 45.](#))

YES →

Go to step 3.

NO ↓

A configuration page does not print.

- Verify that all trays are correctly loaded, adjusted, and installed in the device.
 - At the computer, check the print queue or print spooler to see if the device has been paused. If problems exist with the current print job, or if the device is paused, a configuration page will not print. Press **Stop** and try again to print a configuration page.
-

A blank page prints.

- Verify that the sealing tape was removed from print cartridge. (See the getting started guide or the instructions that came with the print cartridge.)
 - The print cartridge might be empty. Install a new print cartridge.
-

A message other than READY or PRINTING CONFIGURATION appears on the control-panel display.

- See [Control-panel messages on page 201.](#)
-

3. Does the device copy?

YES →	Go to step 4.
--------------	----------------------

NO ↓	
-------------	--

Poor copy quality from the ADF.	<ol style="list-style-type: none">1. If the print quality from the internal tests and the copy from the flatbed were acceptable, clean the ADF scanning strip. See Clean the scanner glass on page 43.2. If the ADF is damaged, replace the ADF (see ADF assembly on page 80).
--	---

Media does not move smoothly through the ADF path.	<ol style="list-style-type: none">1. Make sure that the media HP specifications. See Media specifications on page 15.2. Clean the ADF roller and separation pad. See Clean the ADF on page 40.3. If the problem persists, replace the ADF roller.4. If the problem persists, replace the ADF (see ADF assembly on page 80).
---	--

Poor copy quality from the flatbed.	<ol style="list-style-type: none">1. If the print quality from the internal tests and the copy from the ADF were acceptable, clean the flatbed glass. See Clean the scanner glass on page 43.2. If, after performing the maintenance, the problem persists, see the user guide.3. If the problem persists, replace the scanner assembly (see Scanner assembly on page 90).
--	--

4. Does the device send a fax?

YES →	Go to step 5.
--------------	----------------------

NO ↓

The telephone line is not operational or the device is not plugged into the telephone line.	Verify that the device is plugged into a telephone line that operates correctly.
--	--

The telephone cord is faulty or is plugged into the wrong connector.	<ol style="list-style-type: none">1. Verify that the device is connected to an analog fax line.2. Try plugging the telephone cord into the other connector.3. Try a new telephone cord.
---	---

The fax number is incorrect or incomplete.	Check the fax number and re-enter the correct and complete fax number.
---	--

Sent fax is incomplete or of poor quality.	See the user guide.
---	---------------------

The device fax settings are set incorrectly.	Review the device fax settings. See the <i>HP LaserJet Analog Fax Accessory 300 User Guide</i> .
---	--

If the error persists, replace the fax accessory (see [Fax accessory on page 111](#)).

5. Does the device receive a fax?

YES →

Go to step 6.

NO ↓

Too many telephone devices are plugged in, or telephone devices are not connected in the correct order.

Make sure that the device is the only device on the telephone line and try again to receive the fax.

The telephone cord does not meet specifications.

Verify that the device is connected to an analog fax line.

The device fax settings are set incorrectly.

Review the device fax settings. See the user guide.

If the error persists, replace the fax accessory (see [Fax accessory on page 111](#)).

6. Can you print from a program?

YES →

Go to step 7.

NO ↓

- The job will not print.**
- If the job will not print, and a message appears on the control-panel display, see [Control-panel messages on page 201](#).
 - By using the computer, check to see if the device has been paused. Press **Stop** to continue.
 - If the device is on a network, print a configuration page. (See [Use information pages on page 45](#).) If an HP Jetdirect print server is installed, a Jetdirect page also prints. Check the Jetdirect configuration page to verify that the network protocol status and settings are correct for the device.
 - If the device is on a network, check that you are printing to the correct device. To verify that no network problem exists, connect the computer directly to the device.
 - Check the interface cable connections. Disconnect and reconnect the cable at the computer and the device.
 - Test the cable by trying it on another computer.
 - Make sure that the print job is being sent to the correct port (LPT1 or network printer port, for example).
 - Make sure that you are using the correct printer driver. (See the user guide.)
 - Reinstall the printer driver. (See the getting started guide.)
 - Check that the computer port is configured and working correctly. (Try connecting another device to that port and printing.)
 - If you are using the PS driver to print, set **Print PS Errors** (on the **General Print Behavior** submenu of the **Device Behavior** menu), to **On** and then try again to print the job.
 - Make sure that **Personality** (on the **General Print Behavior** submenu of the **Device Behavior** menu) is set to **Auto**.
 - You might be missing a device message that could help you solve the problem. On the **Warning/Error Behavior** submenu (of the **Device Behavior** menu) at the device control panel, temporarily turn off the **Clearable Warnings** and **Auto-Continuable Events** settings. Then try again to print the job.
-
- A PS error page or list of commands prints.**
- The device might have received a nonstandard PS code. For this print job, set the **Personality** (on the **General Print Behavior** submenu of the **Device Behavior** menu) to **PS**. After the job has printed, return the setting to **Auto**.
 - Make sure that the print job is a PS job, and that you are using the PS driver.
 - The device might have received PS code although it is set to PCL. Set **Personality** (on the **General Print Behavior** submenu of the **Device Behavior** menu) to **Auto**.
-

7. Does the job print as expected?

YES→	Go to step 8.
NO↓	
Print is garbled, or only a portion of the page prints.	<ul style="list-style-type: none">● Make sure that you are using the correct printer driver. (See the user guide.)● The data file that was sent to the device might be corrupt. To check, try printing the file to another device (if possible), or try a different file.● Check the interface cable connections. Test the cable by trying it on another computer (if possible).● Replace the interface cable with a high-quality cable (see Parts and diagrams on page 269).● Simplify the print job, print at a lower resolution, or install more device memory.● You might be missing a device message that could help you solve the problem. On the Warning/Error Behavior submenu (of the Device Behavior menu) at the device control panel, temporarily turn off the Clearable Warnings and Auto-Continuable Events settings. Then, print the job again.
Printing stops in the middle of the job.	<ul style="list-style-type: none">● Stop might have been pressed.● Check that the power supplied to the device is steady, and that it meets device specifications. (See Electrical specifications on page 328.)
Print speed is slower than expected.	<ul style="list-style-type: none">● Simplify the print job.● Add more memory to the device.● Turn banner pages off. (See the network administrator.)● Note that slower speeds should be expected if you are printing narrow paper, printing from tray 1, using the HIGH 2 fuser mode, or if you have set Small Paper Speed to SLOW.
A control-panel setting is not taking effect.	<ul style="list-style-type: none">● Check settings in the printer driver or program. (The printer driver and program settings override control-panel settings.)
The print job is not formatted correctly.	<ul style="list-style-type: none">● Check that you are using the correct printer driver. (See the user guide.)● Check the program settings. (See the program online Help.)● Try a different font.● Downloaded resources might have been lost. You might need to download them again.
Media does not feed correctly or is damaged.	<ul style="list-style-type: none">● Make sure that the media is loaded correctly and that the guides are not too tight or too loose against the stack of media.● If you are having problems printing custom-size paper, see the user guide.● If pages are wrinkled or curled, or if the image is skewed on the page, see Troubleshoot print-quality problems on page 248.
Print-quality problems occur.	<ul style="list-style-type: none">● Adjust the print resolution. (See the user guide.)● Check that Resolution Enhancement Technology (RET) is on. (See the user guide.)● Go to Troubleshoot print-quality problems on page 248.

8. Does the device select the correct trays?

YES →	For other problems, check the table of contents or the index in this manual, or see the printer-driver online Help.
--------------	--

NO ↓	
The device pulls media from the wrong tray.	<ul style="list-style-type: none">● Make sure that you have selected the correct tray. (See the user guide.)● Make sure that trays are correctly configured for size and type. (See the user guide.) Print a configuration page to see current tray settings. (See Use information pages on page 45.)● Make sure that the tray selection (Source) or Type in the printer driver or program is set correctly. (The printer driver and program settings override the device control-panel settings.)● By default, media loaded in tray 1 will be printed first. If you do not want to print from tray 1, remove any media loaded in the tray or change the USE REQUESTED TRAY setting. (See the user guide.) Change TRAY 1 SIZE and TRAY 1 TYPE to a setting other than ANY.
An optional tray is not working correctly.	<ul style="list-style-type: none">● Print a configuration page to verify that the tray is installed correctly and is functional. (See Use information pages on page 45.)● Configure the printer driver to recognize the installed tray. (See the printer driver online Help.)● Turn the device off, and then turn it on again.● Verify that you are using the correct optional tray for the device.
A message other than READY appears on the control-panel display.	<ul style="list-style-type: none">● See Control-panel messages on page 201.

Control-panel messages

Control-panel message types

Four types of control-panel messages can indicate the status of or problems with the device.

Message type	Description
Status messages	Status messages reflect the current state of the device. They inform you of normal device operation and require no interaction to clear them. They change as the state of the device changes. Whenever the device is ready, not busy, and has no pending warning messages, the status message Ready appears if the device is online.
Warning messages	Warning messages inform you of data and print errors. These messages typically alternate with the Ready or status messages and remain until you touch OK . Some warning messages are clearable. If Clearable Warnings is set to Job on the device Device Behavior menu, the next print job clears these messages.
Error messages	<p>Error messages communicate that some action must be performed, such as adding paper or clearing a jam.</p> <p>Some error messages are auto-continuable. If Auto Continue is set on the menus, the device will continue normal operation after an auto-continuable error message appears for 10 seconds.</p> <p> NOTE Pressing any button during the 10-second auto-continuable error message overrides the auto-continue feature, and the button function takes precedence. For example, pressing the Stop button pauses printing and offers the option to cancel the print job.</p>
Critical-error messages	Critical error messages inform you of a device failure. Some of these messages can be cleared by turning the device off and then on. These messages are not affected by the Auto Continue setting. If a critical error persists, service is required.

Resolve control-panel messages

Table 6-1 Control-panel messages

Control panel message	Description	Recommended action
Digital Send Server is not Responding. Contact Administrator.	The device cannot communicate with the Digital Send Server.	Contact the network administrator.
10.10.00 ERROR	The device cannot read or write to the print cartridge e-label, or the e-label is missing from the print cartridge.	<ol style="list-style-type: none">1. Verify that a genuine HP print cartridge is installed in the device.2. Verify that the memory tag PCA is installed in the device.3. Verify that the memory tag connector is firmly seated in connector J510 on the ECU. You might have to remove the main cooling fan to see this connection.
10.32.00 - Unauthorized Supply	A supply has been installed that does not pass the authentication test for genuine HP supplies.	<p>If you believe you purchased a genuine HP supply, visit us at www.hp.com/go/anticounterfeit. Any repair required as a result of using non-HP supplies or unauthorized supplies is not covered under warranty. HP cannot ensure the accuracy or the availability of certain features.</p> <p>To continue printing, touch OK.</p>

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
11.XX - Internal clock error To continue touch OK	The device real time clock has experienced an error.	<p>Whenever the device is turned off and then turned on again, set the time and date at the control panel. See the Time/Scheduling menu in the user guide.</p> <p>If the error persists, you might need to replace the formatter.</p>
13.00.02 - Jam in Tray 1 Clear jam then touch OK	Paper is fed from tray 2 to the device by the tray 2 pick-up roller. When energized, solenoid SL2 releases a clutch, and then the pick-up roller rotates to pick up the paper and advance it into the paper path.	<ol style="list-style-type: none">1. Follow the instructions in the onscreen dialog box, or see Clear jams from the input-tray areas on page 220.2. Verify that the type and quality of the media that you are using meet HP specifications. (See Media specifications on page 15.)3. Verify that the media is loaded correctly and that the guides are not too tight or too loose against the stack of media.4. Verify that the tray 2 pickup roller and separation pad are installed correctly.5. Verify that solenoid SL2 is being energized. If you cannot hear it during a print job, remove tray 2, override the paper presence sensor flag, start a print job, and then see if the pick-up roller is rotating.6. Verify that solenoid SL2 is firmly seated in connector J504 on the ECU.
13.01.00 - Jam in Tray 1 Clear jam then touch OK	The paper did not reach the top of page sensor within the specified period of time. The tray 1 feed roller moves paper into the paper path. When solenoid SL1 is energized, a clutch mechanism allows the paper stack in tray 1 to lift, and then allows the feed roller to rotate one time to move the paper into the paper path.	<ol style="list-style-type: none">1. Follow the instructions in the onscreen dialog box, or see Clear jams from the input-tray areas on page 220.2. Verify that the type and quality of the media that you are using meet HP specifications. (See Media specifications on page 15.)3. Verify that the media is loaded correctly and that the guides are not too tight or too loose against the stack of media.4. Verify that the tray 1 pickup roller and separation pad are installed correctly.5. Verify that solenoid SL1 is firmly seated in ECU connector J508. Verify that SL1 is being energized by removing the cover and observing the solenoid during a feed operation.6. Open and close the cartridge door to clear the error message.

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
13.05.00 Jam inside front door	Paper failed to reach the delivery sensor within a specified period of time when a print job was initiated. When troubleshooting paper jams, always observe where the leading edge of the paper stops in the jam.	<ol style="list-style-type: none"> 1. Follow the instructions in the onscreen dialog box, or see Clear jams from the input-tray areas on page 220. 2. Verify that nothing is obstructing paper movement within the paper path. 3. Verify that the fuser motor (M2) connector is firmly seated. The fuser motor wiring is hard-wired to the back of the ECU at connector J501. The motor connector is free-standing behind the ECU. To see if the fuser motor is functional, observe the output stacker rollers while turning on the device. If the rollers rotate, the motor is functional. If they do not rotate, verify the connection.
13.15.00 - Jam inside front door Remove print cartridge	Media is jammed in the fuser area.	<p>Follow the instructions in the onscreen dialog box, or see Clear jams from the print-cartridge area on page 219.</p> <p>If the message persists, check the thermistor delivery sensor (J405) and delivery sensor (SR2) cable connections.</p>
13.20 - Jam inside rear bin Clear jam then open and close front door	Media is jammed in the output bin.	Open the rear output bin and gently remove the jammed media. Follow the instructions in the onscreen dialog box, or see Clear jams from the output-bin areas on page 223 .
13.31.00 Jam inside front door	Media is jammed in the paper path.	<p>Follow the instructions in the onscreen dialog box, or see Clear jams from the input-tray areas on page 220.</p> <p>If the message persists, check the rear door (face-up bin) sensor cable connection.</p>
13.65 - Jam inside rear bin Clear jam then open and close front door	Media is jammed in the fuser area.	<p>Open the rear output bin and gently remove the jammed media. Follow the instructions in the onscreen dialog box, or see Clear jams from the output-bin areas on page 223.</p> <p>If the message persists, check the thermistor delivery sensor (J405) and delivery sensor (SR2) cable connections.</p>
13.67.00 - Jam inside front door	Media is jammed in the paper path.	<p>Follow the instructions in the onscreen dialog box, or see Clear jams from the print-cartridge area on page 219.</p> <p>If the message persists, check the HVPS ribbon-cable connection at J404.</p>
13.XX.YY - Paper wrapped around fuser	A jam has occurred because paper has wrapped around the fuser.	Follow the instructions in the onscreen dialog box.
13.XX.YY - Remove Tray 2 Clear jam then touch OK	Media is jammed in the duplex area.	Follow the instructions in the onscreen dialog box, or see Clear jams from the input-tray areas on page 220 .
20 Insufficient memory To continue touch OK	The device received more data than can fit in the available memory. You might have tried	Touch OK to print the transferred data (some data might be lost), and then simplify the print job or install additional memory.

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
	to transfer too many macros, soft fonts, or complex graphics.	
21 Page too complex To continue touch OK	The page formatting process was not fast enough for the device.	Touch OK to print the transferred data. (Some data might be lost.) If this message appears often, simplify the print job.
22 EIO <X> buffer overflow To continue touch OK	Too much data was sent to the EIO card in the specified slot (X). An incorrect communications protocol might be in use.	Touch OK to print the transferred data. (Some data might be lost.) Check the host configuration. If this message persists, you might have to replace the EIO card.
22 Embedded I/O buffer overflow To continue touch OK	Too much data was sent to the embedded HP Jetdirect print server.	Touch OK to print the transferred data. (Some data might be lost.)
22 USB I/O buffer overflow To continue touch OK	Too much data was sent to the USB buffer.	Touch OK to clear the error message. (Data will be lost.)
30.1.YY Scanner failure	An error has occurred in the scanner.	<ol style="list-style-type: none"> 1. Make sure that the scanner lock is in the unlocked position. 2. Turn the device off and then on. 3. Check the cable connections between the ADF/scanner assembly and the formatter. 4. If this message persists, replace the scanner assembly (see Scanner assembly on page 90). 5. If, after replacing the scanner assembly, the message persists, replace the formatter (see Formatter on page 116).
40 EIO <X> bad transmission To continue touch OK	The connection between the device and the EIO card in the specified slot has been broken.	Touch OK to clear the error message and continue printing. Check the EIO connection.
40 Embedded I/O bad transmission To continue touch OK	A temporary printing error has occurred.	<ol style="list-style-type: none"> 1. Turn the device off, and then turn the device on. 2. If this message persists, replace the formatter (see Formatter on page 116).
41.3 - Load tray <XX> To use another tray, touch OK	The specified tray does not contain the specified media size.	Touch OK to use a tray that contains media of the correct size.
41.3 - Load tray <XX>: <Type>, <Size>	The specified tray is loaded with media that is longer or shorter in the feed direction than the size configured for the tray.	Touch OK to display Tray <X> Size . Reconfigure the size in a tray so that the device will use a tray that is loaded with the size of media required for the print job. If the message does not clear automatically from the control-panel display, turn the device off, and then turn the device on.
41.X Error To continue touch OK	A temporary printing error occurred.	<ol style="list-style-type: none"> 1. Touch OK to clear the error. If the error is not cleared, turn the device off, and then turn the device on. 2. If the message persists, replace the fuser (see Fuser on page 139).

Control panel message	Description	Recommended action
49.XXXXX ERROR To continue turn off then on	A critical firmware error has occurred.	<ol style="list-style-type: none">1. Turn the device off, and then turn the device on.2. Go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp to check the latest firmware image version. If the latest firmware image version is newer than the one installed on the device, upgrade the device.3. Try printing a job from a different software program. If the job prints, go back to the first program and try printing a different file. If the message appears only with a certain software program or print job, then the error is in the software program and not in the device. If the job fails to print using a different software program, then turn off the device and disconnect all cables that connect the device to the network or to a computer.4. Remove any DIMMs and EIO cards, and then turn the device on.5. If, after removing DIMMs and EIO cards, the device behaves normally, turn off the device and reinstall DIMMs and EIO cards one-by-one, turning off the device off and then on again each time you reinstall a DIMM or EIO card. If a certain DIMM or EIO card causes the message to reappear, replace the DIMM or EIO card.6. Reconnect all cables that connect the device to the network or to a computer.7. If the message persists, replace the formatter (see Formatter on page 116).
50.1 FUSER ERROR	AC power is not being provided to the fuser assembly. AC voltage is necessary to generate heat in the fuser assembly.	<ol style="list-style-type: none">1. Verify that the connection between the fuser assembly and the ECU is fully seated.2. If the message persists, replace the fuser assembly.
50.6 FUSER ERROR	The main or sub thermistors are unable to provide temperature feedback to the ECU. The main and sub thermistors monitor the fuser assembly hot-roller temperature and provide feedback to regulate the fusing temperature.	<ol style="list-style-type: none">1. Verify that the seven-wire connector is firmly seated in connector J405 on the ECU. You might have to remove the main cooling fan to see this connection.2. Verify that the four-wire connector is firmly seated in the fuser assembly.3. Verify that the AC voltage is being provided to the fuser assembly.4. If the message persists, replace the fuser assembly.

If, after removing DIMMs and EIO cards, the device behaves normally, turn off the device and reinstall DIMMs and EIO cards one-by-one, turning off the device off and then on again each time you reinstall a DIMM or EIO card. If a certain DIMM or EIO card causes the message to reappear, replace the DIMM or EIO card. Reconnect all cables that connect the device to the network or to a computer. If the message persists, replace the formatter (see Formatter on page 116).
8X.YYYY EIO ERROR To continue turn off then on	The EIO accessory card has encountered a critical error, as specified by YYYY .	<ol style="list-style-type: none"> Turn the device off, and then turn the device on. Turn the device off, reinstall the EIO accessory, and then turn the device on. Replace the EIO accessory.
8X.YYYY EMBEDDED JETDIRECT ERROR To continue turn off then on	The embedded HP Jetdirect print server has encountered a critical error, as specified by YYYY .	<ol style="list-style-type: none"> Turn the device off, and then turn the device on. Go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp to check the latest firmware image version. If the latest firmware image version is newer than the one installed on the device, upgrade the device, if possible. If the message persists, replace the formatter (see Formatter on page 116).
Action not currently available for Tray <X> Tray size cannot be any size/any custom	A duplexed (2-sided) document was requested from a tray that is set to Any size or Any custom . Duplexing is not allowed from a tray configured to Any size or Any custom .	Select another tray or reconfigure the tray.
Authentication Required	Authentication has been enabled for this feature or destination. A user name and password are required.	Type the user name and password, or contact the network administrator.
Authentication Required To Use This Feature	A user name and password are required.	Type the user name and password, or contact the network administrator.

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
Cannot duplex close rear bin	The device cannot print on both sides of the page if the rear output bin is open.	Close the rear output bin.
Check the glass and remove any paper To continue press Start	A digital send or copy job has been performed from the scanner glass, but the original document needs to be removed.	Remove the original document from the scanner glass, and then press Start .
Chosen personality not available To continue touch OK	A print job requested a language (personality) that is not available for this device. The job will not print and will be cleared from memory.	Print the job by using a printer driver for a different printer language, or add the requested language to the device (if possible). To see a list of available personalities, print a configuration page. See Use information pages on page 45 .
CLEANING DISK X% COMPLETE alternates with DO NOT POWER OFF	The memory disk is being cleaned. This process might take up to an hour. During this time, no jobs can be printed.	Do not turn off the device. Wait for the process to complete. The device automatically restarts at the end of the cleaning process.
Close front door	The front door is open.	Close the front door. If the message persists, make sure that the front-door microswitch is installed correctly and that it is operational.
Digital send communication error	The device is unable to connect to the Digital Sending Software.	Make sure that the Digital Sending Software is running and that the Digital Sending Software and the device are on the network.
Document feeder cover open	The document feeder (ADF) cover is open.	Close the document feeder (ADF) cover. Follow the instructions in the onscreen dialog box.
Document feeder empty	The document feeder (ADF) does not contain paper.	Load paper in the document feeder (ADF) input tray.
Document feeder pick error	The document feeder (ADF) experienced an error while picking media.	Make sure that your original contains no more than 50 pages. Follow the instructions in the onscreen dialog box. If this message appears frequently, clean the ADF roller assembly (see Clean the ADF on page 40). If, after cleaning the ADF roller assembly, the message persists, replace the ADF roller assembly.
E-mail Gateway did not accept the job because the attachment was too large.	The scanned documents have exceeded the size limit of the e-mail gateway.	Send the job again using a lower resolution, smaller file size setting, or fewer pages. See Use the embedded Web server on page 49 to learn how to reduce the size of the attachment. Contact the network administrator to enable sending the scanned documents by using multiple e-mails.
E-mail Gateway did not respond. Job failed.	A gateway has exceeded the time out value.	Validate the SMTP IP address. See the user guide.
E-mail Gateway rejected the job because of the addressing information. Job failed.	One or more of the e-mail addresses is incorrect.	Send the job again with the correct addresses.
Error executing Digital Send job. Job failed.	A digital send job has failed and cannot be delivered.	Try to send the job again.
HP digital sending: delivery error	A digital send job has failed and cannot be delivered.	Send the job again.

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
Initializing scanner	The device is initializing the scanner.	Wait for the control-panel display to show Ready .
Install black cartridge	The device detects the print cartridge by detecting a voltage differential within the cartridge. The photo-conductive drum connected to the high-voltage power supply provides the reference with which to measure the differential.	<ol style="list-style-type: none"> 1. Verify that a print cartridge is installed in the device. 2. Verify that the drum ground connector on the high-voltage power supply is correctly seated on the mechanical connector. 3. Verify that the cartridge mechanism functions correctly. When the cartridge is removed from the device, the mechanism swings outward, away from the chassis. When the cartridge is inserted into the device, the mechanism closes toward the chassis.
Insufficient memory to load fonts/data <device> To continue touch OK	The device does not have enough memory to load the data (for example, fonts or macros) from the location specified.	Touch OK to continue without this information. If the message persists, add more memory.
Jam in document feeder	Media is jammed in the document feeder (ADF).	<p>Remove jammed media from the document feeder (ADF). Follow the instructions in the onscreen dialog box, or see Clear jams from the ADF on page 217.</p> <p>If the message persists after all jams have been cleared, a sensor might be stuck or broken. Check the sensors in the ADF. If a sensor is broken, replace the ADF assembly (see ADF assembly on page 80).</p>
Load Tray 1: <type>, <size>	The tray is empty or configured for a different size than the size requested.	Follow the instructions in the onscreen dialog box. If the message persists, make sure that the tray 1 media-present sensor (PS902) is operational.
Manually feed: <type>, <size>	The specified job requires manual feed from tray 1.	<p>Load the requested media into tray 1.</p> <p>To override the message, touch OK to use a type and size of media that is available in another tray.</p>
Non HP supply installed Economode disabled	A non-HP supply or a refilled HP supply has been installed.	Follow the instructions in the onscreen dialog box.
Order black cartridge	The number of pages remaining for the print cartridge has reached the low threshold. The device was set to stop printing when a supply needs to be ordered.	<p>Touch OK to continue printing until the print cartridge is out of toner.</p> <p>To order a new print cartridge, see Order parts, accessories, and supplies on page 314.</p>
Output bin <X> full	The specified output bin is full, and printing cannot continue.	Empty the bin to continue printing.
Password or name is incorrect. Please enter correct login.	The user name or password was typed incorrectly.	Retype the user name and password.
PIN is incorrect. Please re-enter PIN.	The PIN was typed incorrectly.	Retype the PIN.

Table 6-1 Control-panel messages (continued)

Control panel message	Description	Recommended action
Please turn device off and install hard disk.	The requested job requires a hard disk, but the device does not have a hard disk installed.	Turn the device off and install a hard disk.
Replace black cartridge	The print cartridge is out of toner.  NOTE Depending on how the device is configured, this message might appear when it is time to order a new print cartridge. In this case, the message indicates that you can touch OK to continue printing.	Replace the print cartridge. (See Change the print cartridge on page 27.)
Sanitizing disk <X>% complete Do not power off	The hard disk is being cleaned.	Contact the network administrator.
Scan failure Press Start to rescan	The scan was unsuccessful and the document needs to be rescanned.	If necessary, reposition the document to rescan it, and then press Start .
SMTP gateway not responding	The SMTP gateway has exceeded a time out value.	Verify the e-mail server address. See the user guide. Contact the network administrator.
The digital sending service at <IP Address> does not service this MFP. Contact administrator.	The device cannot communicate with the specified IP address.	Verify the IP address. Contact the network administrator.
The digital sending service must be upgraded to support this version of the MFP firmware. Contact administrator.	The digital sending service is not supported by the device firmware version that is currently installed.	Check the firmware version. Contact the network administrator.
The folder you have entered is not a valid folder.	The folder name was entered incorrectly, or the folder does not exist.	Re-enter the folder name correctly, or add the folder.
Tray XX Open or Empty	The tray indicated is either open or empty.	Load or close the tray. Printing can continue from another tray.
Unable to connect	A network connection is not detected.	Verify the network connection. Contact the network administrator.
Unable to copy	The device was unable to copy the document. If this message persists, contact an HP-authorized service or support provider. (See the HP support flyer, or go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp .)	To temporarily hide this message in order to fax or send to e-mail, touch Hide .
Unable to send	A network connection is not detected.	Verify the network connection. Contact the network administrator.
Unable to send fax. Please check fax configuration.	The device is unable to send a fax job.	Contact the network administrator. Also see the <i>HP LaserJet Analog Fax Accessory 300 User Guide</i> for additional configuration and troubleshooting information.
Unable to store job	The device is unable to store a job.	To temporarily hide this message in order to fax or send to e-mail, touch Hide . If this message persists, replace the disk drive (see Disk drive on page 113).
User name or password is incorrect. Please re-enter.	The user name or password was typed incorrectly.	Retype the user name and password.
User name, job name, or PIN is missing.	One or more of the required items has not been selected or typed.	Select the correct user name and job name, and type the correct PIN.

Clear jams

When clearing jams, be very careful not to tear the media. If a small piece of media remains in the device, it could cause additional jams.

Common causes of jams

The device is jammed.¹

Cause	Solution
The media does not meet specifications.	Use only media that meets HP specifications. See Media specifications on page 15 .
A component is installed incorrectly.	Verify that the print cartridge is correctly installed.
You are using media that has already passed through a device or copier.	Do not use media that has been previously printed on or copied.
An input tray is loaded incorrectly.	Remove any excess media from the input tray. Make sure that the stack is below the maximum stack height mark in the tray. See Install trays on page 23 .
The media is skewed.	The input-tray guides are not adjusted correctly. Adjust them so they hold the stack firmly in place without bending it.
The media is binding or sticking together.	Remove the media, flex it, rotate it 180°, or flip it over. Reload the media into the input tray.
The media is removed before it settles into the output bin.	Reset the device. Wait until the page completely settles in the output bin before removing it.
During two-sided printing, you removed the paper before the second side of the document was printed.	Reset the device and print the document again. Wait until the page completely settles in the output bin before removing it.
The media is in poor condition.	Replace the media.
The internal tray rollers are not picking up the media.	If the media is heavier than 120 g/m ² (32 lb), it might not be picked from the tray.
The media has rough or jagged edges.	Replace the media.
The media is perforated or embossed.	Perforated or embossed media does not separate easily. Feed single sheets from tray 1.
Device supply items have reached the end of their useful life.	Check the device control panel for messages prompting you to replace supplies, or print a supplies status page to verify the remaining life of the supplies. See Use information pages on page 45 .
Paper was not stored correctly.	Replace the paper in the trays. Paper should be stored in the original packaging in a controlled environment.
Not all device packing material was removed.	Verify that the packing tape, cardboard, and plastic shipping locks have been removed from the device.

¹ If the device still continues to jam, contact HP Customer Support or your authorized HP service provider.

Jam locations

Use this illustration to locate media jams in the device. For instructions about clearing jams, see the section listed for each jam location.

1	Automatic document feeder (ADF)	See Clear jams from the ADF on page 217 .  NOTE If documents jam frequently in the ADF, make sure that the ADF input tray is installed correctly (see Figure 5-5 Reinstalling the ADF input tray on page 83). ADF jams and skew can result from incorrect reinstallation.
2	Print cartridge	See Clear jams from the print-cartridge area on page 219 .
3	Input trays	See Clear jams from the input-tray areas on page 220 .
4	Duplex path (for two-sided printing)	See Clear jams from the duplexer on page 222 .
5	Output bins	See Clear jams from the output-bin areas on page 223 .

Jam detection

The device contains five sensors that verify whether or not media is transported smoothly through the device. [Figure 6-2 Jam-detection sensors on page 216](#) shows the sensors.

Figure 6-2 Jam-detection sensors

PS901	Top-of-page sensor	SR2	Delivery sensor
PS903	Media-width sensor	PS4	Output-bin-full sensor
PS502	Duplex sensor		

The CPU on the ECU identifies jams by checking whether media is present during the printing process against media-transport timing, which is stored in memory. When the CPU determines that a jam has occurred, it stops the printing operation and sends a signal to the formatter so that the touchscreen can show an error message.

The CPU determines a **residual-media jam** if one or more of the sensors PS901, SR2, PS502, or PS903 detects that media is present after power-on or when an open door (for example, the cartridge door) is shut.

The CPU determines a **delivery-delay jam** if PS4 does not detect the leading edge of the media within a specified time after PS901 detects the leading edge.

Clear jams from the ADF

1. Open the ADF cover.

2. Lifting the green lever, rotate the pick mechanism until it stays open.

3. Gently try to remove the page without tearing it. If you feel resistance, go to the next step.

4. Open the scanner lid and gently loosen the media by using both hands. When the media is free, gently pull it out in the direction shown.

5. Close the scanner lid, and then lower the roller assembly.

6. Close the ADF lid.

7. If any media is visible in the output bin area, gently pull it out.

Clear jams from the print-cartridge area

1. Open the front door and remove the print cartridge.

CAUTION To prevent damage to the print cartridge, do not expose it to light for more than a few minutes.

2. Open the plate, and then slowly pull the media out of the device. Be careful to not tear the media.

CAUTION Avoid spilling loose toner. Use a dry, lint-free cloth, to clean any toner that might have fallen into the device. If loose toner falls into the device, it might cause temporary problems with print quality. Loose toner should clear from the paper path after a few pages are printed. If toner gets on your clothing, wipe it off with a dry cloth and wash clothing in cold water. (Hot water sets toner into fabric.)

3. Replace the print cartridge, and then close the front door.

If a jam message persists, there is still media in the device. Look for media in other locations.

Clear jams from the input-tray areas

NOTE To remove media from the tray 1 area, slowly pull the media out of the device. For all other trays, complete the following procedure.

1. Slide the tray out of the device, and remove any damaged paper from the tray.

2. If the edge of the paper is visible in the feed area, slowly pull the paper down and out of the device. If the paper is not visible, look in the front door area.

NOTE Do not force the paper if it will not move easily. If the paper is stuck in a tray, try removing it through the tray above (if applicable) or through the front door area.

3. Before replacing the tray, make sure the paper is flat in the tray at all four corners and below the tabs on the guides.

4. Open and close the front door, and then touch **OK** on the touchscreen to clear the jam message.
If a jam message persists, there is still media in the device. Look for media in other locations.

Clear jams from the duplexer

1. Remove tray 2 from the device.

2. Push the green button on the top right front of the tray 2 opening to access the duplex paper path.

3. Reach in and pull out the jammed paper.

4. Push the bottom of the duplex access plate back up until it clicks into place on both sides (both sides need to be engaged).

5. Reinstall tray 2.

6. Open and close the front door, and then touch **OK** on the touchscreen to clear the jam message.
If a jam message persists, there is still media in the device. Look for media in other locations.

Clear jams from the output-bin areas

NOTE If media is jammed in the top output area, but most of the media is still inside the device, it is best to remove it through the rear door.

1. Open the rear output bin.

2. Push down on the bin door to unclip the door stops, and then let the door drop open.

3. Grasp both sides of the media, and slowly pull the media out of the device. (There might be loose toner on the media. Be careful not to spill it on yourself or into the device.)

NOTE If media is difficult to remove, try opening the front door and removing the print cartridge to release pressure on the media.

4. Close the rear bin.

5. Open and close the front door, and then touch **OK** on the touchscreen to clear the jam message. If a jam message persists, there is still media in the device. Look for media in other locations.

Interface troubleshooting

Communications checks

NOTE Communication problems are normally the customer's responsibility. Time spent attempting to resolve these problems might not be covered by the Hewlett-Packard product warranty. Refer the customer to the network administrator for assistance in troubleshooting network problems.

LAN hardware test

1. To perform a LAN hardware test, touch [Administration](#).
2. Touch [Initial Setup](#).
3. Touch [Networking and I/O](#).
4. Touch [Embedded Jetdirect](#).
5. Touch [Diagnostics](#).
6. Touch [LAN HW Test](#).
7. Touch [Yes](#) to run the test.

If the test fails, replace the formatter (see [Formatter on page 116](#)).

NOTE For a complete list of Jetdirect menus, see the user guide.

Service mode functions

Boot-up key sequences

Use boot-up key sequences to accomplish the following service functions:

- **Select language.**
- **Cold reset.** A cold reset unlocks menus that have been previously locked and sets all control panel menu items (including EIO settings) back to the factory defaults. However, it *does not* clear the values in the **SERVICE** menu (such as the serial number and page counts).

NOTE Before performing a cold reset, print a configuration page (see [Use information pages on page 45](#)). Use the information on the configuration page to reset any customer-set device configuration values that the cold reset procedure changes.

- **Embedded LAN enable.**
- **Embedded LAN disable.**
- **Initialize disks.**

CAUTION A hard-disk initialization erases and reformats the device hard disk. Perform a hard-disk initialization only if an error code on the control panel indicates a disk error. Always try initializing the hard disk before replacing it.

NOTE Before performing a hard-disk initialization, print a configuration page (see [Use information pages on page 45](#)). Use the information on the configuration page to reset any customer-set device configuration values that the hard-disk initialization procedure changes.

- **Skip disk-load.** When the power is turned on the device begins the power-on sequence. By performing a skip disk-load, you can cause the device to resume the power-on sequence but not to recognize the hard disk. This can be helpful in isolating hard-disk errors.
- **NVRAM init.**

CAUTION Initializing the NVRAM resets the event log, the page counts, and embedded EIO and resets service menu values to factory defaults. NVRAM initialization does *not* reset the model number, serial number, service ID (born-on date), usage data, or the error log.

Use the service menu to restore the serial number and page counts. Also reconfigure any computers that print to this device so that the computers can recognize the device. Initialize the NVRAM only when absolutely necessary. In most situations, use a cold reset rather than a NVRAM initialization to reset device settings and retain the values in the service menu.

NOTE Before performing a NVRAM initialization, print a configuration page (see [Use information pages on page 45](#)). Use the information on the configuration page to reset any customer-set device configuration values that the NVRAM initialization procedure changes. Take special note of the *total page count*, *maintenance count*, and the *serial number*.

- **Skip calibration.**

Low-level boot-up key sequence for selecting a language, performing a cold reset, and enabling and disabling embedded LAN

1. Turn off the device.
2. Turn on the device.
3. When the control-panel display shows that the device has begun to count the memory, press and hold the **6** key.
4. When the LED lights turn on, release the **6** key.
5. Use the **3** and **9** keys to scroll through the options (select language, cold reset, embedded LAN enable, and embedded LAN disable) and then press the **6** key to select the option you want.

The device continues the power-on sequence.

Medium-level boot-up key sequence for initializing disks

1. Turn off the device.
2. Turn on the device.
3. When the control-panel display shows that the device has begun to count the memory, press and hold the **Start** key.
4. When the LED lights turn on, release the **Start** key.

NOTE Initialize disks is the only option available when using the medium-level boot-up key sequence.

5. Press the **6** key to select **Initialize disks**.

The device continues the power-on sequence.

High-level boot-up key sequence for NVRAM initialization, manufacturing, and skipping disk-load and calibration

1. Turn off the device.
2. Turn on the device.
3. When the control-panel display shows that the device has begun to count the memory, press and hold the **9** key.
4. When the LED lights turn on, release the **9** key.
5. Press the **3** key, and then press the **Start** key.
6. Use the **3** and **9** keys to scroll through the options (skip disk-load, NVRAM init, manufacturing, and skip calibration) and then press the **6** key to select the option you want.

The device continues the power-on sequence.

Service menu

Authorized HP service technicians can use this menu to gain access to device settings that are reserved for service personnel. The **SERVICE** menu is protected by use of a personal identification number (PIN). When you select **SERVICE** from the list of menus, you are prompted to type an eight-digit PIN code.

NOTE The device automatically exits the **SERVICE** menu after about one minute if no menu items are selected or changed.

1. Touch **Administration**.
2. Touch **Service**.
3. Enter the service PIN code and then touch **OK**. Use the PIN code 11303506 for the HP LaserJet M3027/M3035 Series MFP.
4. Use the control panel to select the menu item you want.
 - **Clear event log**. Select this item to clear (reset to zero) the internal event log.
 - **Total page count**. Select this item to set the total number of pages that have been printed to-date. Typically this is only required when a new formatter is installed.
 - **Serial number**. Select this item to update the serial number if you replace the formatter.
 - **Service ID**. Select this item to specify the date when the device was first used, rather than the date when a replacement formatter is installed. See [Service ID on page 228](#).
 - **Cold reset**. Select this item to reset the default paper size when you replace the formatter or restore factory settings (see [Boot-up key sequences on page 226](#)). When you replace a formatter or restore factory settings in a country/region that uses A4 as the standard paper size, use this item to reset the default paper size to A4. Letter and A4 are the only cold-reset values available.

Service ID

This information appears on the configuration page (see [Use information pages on page 45](#)), which eliminates the need for customers to keep paper receipts for proof of the warranty. Because the device does not have an internal clock, the availability of the service ID date depends on the device being connected to a source that can provide the date, in this case a time server on the same network as the device. When the device is not connected to a date source, the service ID is not available, and **00000** appears on the configuration page.

Restore the service ID

If you replace the formatter, the service ID is lost. Use this menu item to reset the value to the date that the device was first used. The date format is YYDDD. Use the following procedure to calculate the date.

1. To calculate YY, subtract 1990 from the calendar year. For instance, if the device was first used in 2002, calculate YY as follows: $2002 - 1990 = 12$ (YY = 12).
2. To calculate DDD, use the following formula: $30 (\text{calendar month} - 1) + \text{calendar day} = \text{DDD}$. If the calendar day is 31, use 30 instead. For instance, if the printer was first used on October 17, calculate DDD as follows:
 - a. Subtract 1 from 10 (October is the tenth month of the year): $10 - 1 = 9$.
 - b. Multiply 9 by 30: $9 \times 30 = 270$.
 - c. Add 17 to 270: $270 + 17 = 287$ (DDD = 287).

Convert the service ID to an actual date

You can use the device service ID number to determine whether the device is still under warranty. Use the following procedure to convert the service ID into the installation date.

1. Add 1990 to YY to determine the actual year that the device was installed.
2. Divide DDD by 30 and add 1 to the remainder. The total is the month.
3. The remainder from the calculation in step 2 is the day of the month.

Using the Service ID 12287 as an example, the date conversion is as follows:

- $12 + 1990 = 2002$, so the year is 2002.
- $287 \text{ divided by } 30 = 9 \text{ with a remainder of } 17$. Add 1 to 9 to get 10 so the month is October.
- The remainder (from the above calculation) is 17, so that is the day of the month.
- The complete date is 17-October-2002.

A six-day grace period is built into the date system.

Troubleshooting tools

Control-panel menus

Touch **Administration** to open the control-panel menus. Use the scroll bar on the control panel to scroll through the menus. Touching a menu item opens the menu. The high-level menus appear in the following order:

Main menu	Information menu
	Default Job Options menu
	Time/Scheduling menu
	Management menu
	Initial Setup menu
	Device Behavior menu
	Print Quality menu
	Troubleshooting menu
	Resets menu
	Service menu

Print Quality menu

Use the **Optimize** submenu of the **Print Quality** menu to troubleshoot print-quality issues.

Table 6-2 Print Quality menu

Menu item	Sub-menu item	Values	Description
Optimize	High Transfer	Normal (default) Increased	Set High Transfer to Increased if parts of the printed image appear to have extra toner.
	More Separation	Off (default) On	Set More Separation to On if media repeatedly jams in the print cartridge when printing single-sided print jobs.  NOTE When More Separation is set to On , a print defect across the width of the page near the leading edge might be noticeable.
	Line Detail	Off (default) On	Set Line Detail to On if printed lines and text are blurred.
	Restore Optimize	Restore (button)	Reset all the Optimize parameters to the factory default settings.

Troubleshooting menu

Administrators can use this menu to isolate parts and to troubleshoot jam and print-quality issues.

The following section lists the settings and their possible values in the **Troubleshooting** menu.

Table 6-3 Troubleshooting menu

Menu item	Sub-menu item	Values	Description
Event Log		Print (button)	Use this feature to show the 50 most recent events in the event log. Touch Print to print the full event log.
Calibrate Scanner		Calibrate	Use this feature to compensate for offsets in the scanner imaging system (carriage head) for ADF and flatbed scans. You might need to calibrate the scanner if it is not capturing the correct sections of scanned documents.
Fax T.30 Trace	T.30 Report		Use this feature to print or configure the fax T.30 trace report. T.30 is the standard that specifies handshaking, protocols, and error correction between fax machines.
	When to Print Report	Never auto print	
		Print after any fax job	
		Print after fax send jobs	
		Print after any fax error	
		Print after send errors only	
		Print after receive errors only	
Fax Transmit Signal Loss		A value between 0 and 30.	Use this feature to set loss levels to compensate for phone line signal loss. You should not modify this setting unless requested to do so by an HP service representative because it could cause the fax to stop functioning.
Fax V.34		Normal (default)	Use this feature to disable V.34 modulations if several fax failures have occurred or if phone line conditions require it.
		Off	
Fax Speaker Mode		Normal (default)	This feature is used by a service technician to evaluate and diagnose fax issues by listening to the sounds of fax modulations.
		Diagnostic	

Table 6-3 Troubleshooting menu (continued)

Menu item	Sub-menu item	Values	Description
Paper Path Test	Test Page	Print (button)	Generate a test page for testing paper handling features. You can define the path that is used for the test in order to test specific paper paths.
	Source	All trays	Specify whether the test page will be printed from all trays or from a specific tray.
		Tray 1	
		Tray 2	
		(Additional trays are shown, if applicable.)	
Duplex	Off (default) On	Select whether the duplexer should be included in the Paper Path test.	
Copies		1 (default)	Select how many pages should be sent from the specified source as part of the Paper Path test.
		10	
		50	
		100	
		500	
Scanner Tests			This menu item is used by a service technician to diagnose potential problems with the device scanner.
Control Panel	LEDs		Use this feature to make sure the components of the control panel are functioning correctly.
	Display		
	Buttons		
	Touchscreen		

Early-boot diagnostic test

The device runs several formatter self-tests when power is turned on. The sequence of tests and power-on events is shown below.

1. Power on
2. Early boot
3. Memory test
4. Initialization (formatter support package) ready
5. Power supplied by line to power supplies, fans on
6. Control panel
7. Control panel LEDs
8. Memory count
9. HP "blooming" logo

If the power-on sequence stops with no control panel display, check to see if any of the control-panel LEDs are on.

1. Note which LEDs are on and which LEDs are off and compare the combination to [Table 6-4 Early-boot diagnostic test on page 233](#).

Table 6-4 Early-boot diagnostic test

Test	Ready	Data	Attention	Test	Ready	Data	Attention
A	–	–	–	E	–	–	+
B	+	–	–	F	+	–	+
C	–	+	–	G	–	+	+
D	+	+	–	H	+	+	+

2. Turn the device off.
3. Reseat the formatter and make sure that all formatter connectors are seated correctly.
4. Remove any installed memory DIMM (especially if the combination of LEDs indicated LED status D, E, F, G, or H).
5. Check control-panel connections.
6. Turn the device on.

If the power-on sequence fails again and the combination of LEDs is the same combination of LEDs as the first time it failed, replace the formatter.

NOTE If the device passes the early-boot diagnostic test, the formatter is working correctly and should not be replaced.

Test pages

Printing test pages helps you determine whether or not the device engine and the formatter are functioning.

NOTE Information pages also can be used to solve device issues. See [Use information pages on page 45](#).

Engine-test page

To verify that the device engine is functioning, print an engine-test page. To print an engine-test page, press the engine-test-page switch (callout 1).

Figure 6-3 Locating the engine-test-page switch

The test page should have a series of horizontal lines. The test page prints from the last tray that the device pulled from, unless the device has been turned off and then turned on again since the most recent print job. If the device has been turned off and then on again since the most recent print job, then the page will print from tray 2. The device will continuously print test pages until the test-page switch is released. The device will not print a test page if it is in Sleep mode.

NOTE A damaged formatter might interfere with the engine test. If the engine test page does not print, try removing the formatter and performing the engine test again. If the engine test is then successful, the problem is in the formatter, the control panel, or the cable that connects them.

Formatter test page

To verify that the formatter is functioning, print a configuration page. See [Use information pages on page 45](#).

Embedded Web server

When the device is connected to the network, the embedded Web server is automatically available.

Use the embedded Web server to view device and network status and to manage printing functions from your computer instead of from the device control panel. The following are examples of what you can do through the embedded Web server:

- View device status information
- Specify the type of media that is loaded in each tray
- Determine the remaining life for all supplies and order new supplies
- View and change tray configurations
- View and change the device control panel menu configurations
- View and print internal pages
- Receive notification of device and supplies events
- View and change the network configuration

To use the embedded Web server, you must have Microsoft Internet Explorer 4 or later, or Netscape Navigator 4 or later. The embedded Web server works when the device is connected to an IP-based network. The embedded Web server does not support IPX-based device connections. You do not have to have Internet access to open and use the embedded Web server.

Gaining access to the embedded Web server

In a supported Web browser on your computer, type the IP address for the device. (To find the IP address, print a configuration page.)

NOTE After you navigate to the URL, you can bookmark it so that you can return to it quickly in the future.

The embedded Web server has three tabs that contain settings for and information about the device: the **Information** tab, the **Settings** tab, and the **Network** tab. Click the tab that you want to view. See the following sections for more information about each tab.

Information tab

The **Information** tab contains the following pages.

- **Device Status.** Shows the device status and the life that remains in HP supplies (0% indicates that a supply is empty). This page also shows the type and size of print media that is set for each tray. To change the default settings, click **Change Settings**.
- **Configuration page.** Shows the information that is contained on the device configuration page.
- **Supplies Status.** Shows the life that remains in HP supplies (0% represents that a supply is empty). This page also provides supplies part numbers. To order new supplies, click **Order Supplies** in

the **Other Links** area on the left side of the window. To visit this or any Web site, you must have Internet access.

- **Event log.** Shows a list of all device events and errors.
- **Usage page.** Shows a summary of the number of pages the device has printed, grouped by size and type (this page is only available if an optional hard disk is installed).
- **Device Information.** Shows the device network name, address, and model information. To change these entries, click **Device Information** on the **Settings** tab.

Settings tab

Use the **Settings** tab to configure the device from your computer. The **Settings** tab can be password protected. If the device is on a network, always consult with the network administrator before changing settings on this tab.

The **Settings** tab contains the following pages.

- **Configure Device.** Use this page to configure all of the device settings. This page contains the traditional device menus: **Information**, **Paper Handling**, **Configure Device**, and **Diagnostics**.
- **Alerts.** (On networks only.) Use this page to establish e-mail alerts for various device and supplies events.
- **E-mail.** (On networks only.) Use this page in conjunction with the Alerts page to set up incoming and outgoing e-mail, as well as to establish e-mail alerts.
- **Security.** Use this page to set a password that must be typed to gain access to the **Settings** and **Networking** tabs. Also use it to enable and disable certain features of the embedded Web server.
- **Other Links.** Use this page to add or customize a link to another Web site. The link you establish appears in the **Other Links** area on all embedded Web server pages. The following permanent links always appear in the **Other Links** area: **HP Instant Support**, **Order Supplies**, and **Product Support**.
- **Device Information.** Use this page to name the device and assign an asset number to it. Use the name and e-mail address for the primary contact who will receive information about the device.
- **Language.** Use this page to specify the language in which the embedded Web server information appears.

Networking tab

The network administrator uses this tab to control network-related settings for the device when it is connected to an IP-based network. This tab does not appear if the device is directly connected to a computer, or if the device is connected to a network with anything other than an HP Jetdirect print server.

Other links

This section of the embedded Web server contains links that connect you to the Internet. You must have Internet access in order to use any of these links. If you use a dial-up connection and did not connect

when you first opened the embedded Web server, you must connect before you can visit these Web sites. Connecting to the Internet might require that you close your Web browser and reopen it.

- **HP Instant Support** connects to the HP Web site to help you find solutions. This service analyzes your device error log and configuration information to provide diagnostic and support information that is specific to your device.
- **Order Supplies** connects to the HP Web site so that you can order genuine HP supplies, such as print cartridges and paper.
- **Product Support** connects to the support site for the device, where you can search for help.

Image defect ruler

Use a ruler to measure occurrences of repetitive image defects to help solve image quality problems. Place the ruler next to the first occurrence of the defect on the page. Find the distance between identical defects and use the figure below to identify the component that is causing the defect.

Firmware updates and recovery

The device uses a flash-memory-based formatter that enables the firmware code to be updated when updated firmware is available. Flash memory also provides a method for product recovery if the installed firmware becomes corrupted or fails.

The device has remote firmware update (RFU) capability. Use the information in this section to upgrade the firmware. The overall process involves the following steps:

1. Determine the current level of firmware that is installed on the device.
2. Go to the HP Web site and find out whether a firmware update is available. If an update is available, download the latest firmware to your computer.
3. Transfer the new firmware from your computer to the device.

NOTE If after attempting to update the firmware code the device does not return to the **Ready** state, perform the following procedures:

Try the firmware update again.

Perform the NVRAM init procedure. See [Service mode functions on page 226](#).

If the device still does not reach the **Ready** state, replace the formatter. See [Formatter on page 116](#).

Determine the current level of firmware

The current level of firmware is shown on the configuration page. To print a configuration page, touch [Administration](#), touch [Configuration/Status Pages](#), touch [Configuration Page](#), and then touch [Print](#).

The firmware datecode is listed in the section called **Device Information**. The firmware datecode has this format: YYYYMMDD XX.XXX.X. The first string of numbers is the date, where YYYY represents the year, MM represents the month, and DD represents the date. For example, a firmware datecode of that begins with 20040225 represents February 25, 2004.

Download the new firmware from the HP Web site

To find the most recent firmware upgrade for the device, go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp. This page provides instructions for downloading the new firmware version.

Transfer the new firmware to the device

Use one of the following methods to update the firmware.

Use FTP to upgrade the firmware on a network connection

NOTE The device can receive an .RFU file update as long as it is in a **Ready** state.

The elapsed time for an update depends on the I/O transfer time, as well as the time that it takes for the device to reinitialize. The I/O transfer time depends on a number of things, including the speed of the host computer that is sending the update. If the remote firmware update process is interrupted before the firmware is downloaded (while **Receiving Upgrade** appears on the control-panel display), the firmware file must be sent again. If power is lost during the flash DIMM update (while the **Performing Upgrade** message appears on the control-panel display), the update is interrupted and the message **Resend Upgrade** appears (in English only) on the control-panel display. In this case, you must send the upgrade by using the parallel port. Finally, any jobs that are ahead of the RFU job in the queue are completed before the update is processed.

Follow these instructions to perform the upgrade by using FTP.

1. Take note of the IP address on the HP Jetdirect page. The HP Jetdirect page is the second page that prints when you print the configuration page.

NOTE Before upgrading the firmware, make sure that the device is not in Sleep mode. Also make sure that any error messages are cleared from the control-panel display.

2. Open an MS-DOS command prompt on your computer.
3. Type: `ftp <TCP/IP ADDRESS>`. For example, if the TCP/IP address is 192.168.0.90, type `ftp 192.168.0.90`.
4. Press **Enter** on the keyboard.
5. When prompted for the user name, press **Enter**.
6. When prompted for the password, press **Enter**.
7. Type `bin` at the command prompt.
8. Press **Enter**. The message **200 Types set to I, Using binary mode to transfer files** appears in the command window.
9. Type `put <filename>` where `<filename>` is the name of the .RFU file that was downloaded from the Web, including the path. For example, type `put C:\LJ\M3035FW.RFU`, and then press **Enter**.

NOTE If the file name or path includes a space, you must enclose the file name or path in quotation marks. For example, type `put "C:\MY DOCUMENTS\LJ\M3035FW.RFU"`

The following series of messages appears in the command window:

200 PORT command successful

150 Opening BINARY mode data connection

226 Ready

226 Processing Job

226 Transfer complete

Then, a message that contains the transfer-speed information appears.

10. The download process begins and the firmware is updated on the device. This can take approximately five minutes. Let the process finish without further interaction with the device or computer.

NOTE The device automatically turns off and then on again after processing the upgrade.

11. At the command prompt, type: `bye` to exit the ftp command.
12. At the command prompt, type: `exit` to return to the Windows interface.

Use HP Web Jetadmin to upgrade the firmware

This procedure requires that you install HP Web Jetadmin Version 7.0 or later on the computer. See [Use HP Web Jetadmin software on page 52](#). Complete the following steps to update a single device through HP Web Jetadmin after downloading the .RFU file from the HP Web site.

1. Start HP Web Jetadmin.
2. Open the **Device Management** folder in the drop-down list in the **Navigation** panel. Navigate to the **Device Lists** folder.
3. Expand the **Device Lists** folder and select **All Devices**. Locate the device in the list of devices, and then click to select it.

If you need to upgrade the firmware for more than one device, select all of them by pressing the **Ctrl** key as you click the name of each device.

4. Locate the drop-down box for **Device Tools** in the upper-right corner of the window. Select **Update Printer Firmware** from the action list.
5. If the name of the .RFU file is not listed in the **All Available Images** box, click **Browse** in the **Upload New Firmware Image** dialog box and navigate to the location of the .RFU file that you downloaded from the Web at the start of this procedure. If the filename is listed, select it.
6. Click **Upload** to move the .RFU file from your hard drive to the HP Web Jetadmin server. After the upload is complete, the browser window refreshes.
7. Select the .RFU file from the **Printer Firmware Update** drop-down menu.
8. Click **Update Firmware**. HP Web Jetadmin sends the selected .RFU file to the device. The control panel shows messages that indicate the progress of the upgrade. At the end of the upgrade process, the control panel shows the **Ready** message.

Use MS-DOS commands to upgrade the firmware

To update the firmware by using a network connection, follow these instructions.

1. From a command prompt or in an MS-DOS window, type the following: `copy /B <FILENAME> \\<COMPUTERNAME>\<SHARENAME>`, where <FILENAME> is the name of the .RFU file (including the path), <COMPUTERNAME> is the name of the computer from which the device is being shared, and <SHARENAME> is the device share name. For example: `C:\>copy /b C:\M3035FW.RFU \\YOUR_SERVER\YOUR_COMPUTER.`

NOTE If the file name or path includes a space, you must enclose the file name or path in quotation marks. For example, type: `C:\>copy /b "C:\MY DOCUMENTS\M3035FW.RFU" \\YOUR_SERVER\YOUR_COMPUTER.`

2. Press **Enter** on the keyboard. The control panel shows a message that indicates the progress of the firmware upgrade. At the end of the upgrade process, the control panel shows the **Ready** message. The message **1 file(s) copied** appears on the computer screen.

Upgrade the HP Jetdirect firmware

The HP Jetdirect network interface in the device has firmware that can be upgraded separately from the device firmware. This procedure requires that you install HP Web Jetadmin Version 7.0 or later on the computer. See [Use HP Web Jetadmin software on page 52](#). Complete the following steps to update the HP Jetdirect firmware by using HP Web Jetadmin.

1. Open the HP Web Jetadmin program.
2. Open the **Device Management** folder in the drop-down list in the **Navigation** panel. Navigate to the **Device Lists** folder.
3. Select the device that you want to update.
4. In the **Device Tools** drop-down list, select **Jetdirect Firmware Update**.
5. Under **Jetdirect firmware version** the HP Jetdirect model number and current firmware version are listed. Make a note of these.
6. Go to www.hp.com/go/wja_firmware.
7. Scroll down to the list of HP Jetdirect model numbers and find the model number you wrote down.
8. Look at the current firmware version for the model, and see if it is later than the version you wrote down. If it is, right-click on the firmware link, and follow the instructions on the Web page to download the new firmware file. The file must be saved into the <drive>:\PROGRAM FILES\HP WEB JETADMIN\DOC\PLUGINS\HPWJA\FIRMWARE\JETDIRECT folder on the computer that is running the HP Web Jetadmin software.
9. In HP Web Jetadmin, return to the main device list and select the digital sender again.
10. In the **Device Tools** drop-down list, select **Jetdirect Firmware Update** again.
11. On the HP Jetdirect firmware page, the new firmware version is listed under **Jetdirect Firmware Available on HP Web Jetadmin**. Click the **Update Firmware Now** button to update the Jetdirect firmware.

Troubleshoot general printing problems

The device selects media from the wrong tray.

Cause	Solution
The tray selection in the software program might be incorrect.	For many software programs, the tray selection appears on the Page Setup menu within the program. Remove any media in other trays to make the device select from the correct tray. For Macintosh computers, use the HP LaserJet Utility to change the priority of the tray.
The configured size does not match the size of the media that is loaded in the tray.	Through the control panel, change the configured size to match the size of the media that is loaded in the tray.

The device does not pull media from a tray.

Cause	Solution
The tray is empty.	Load media in the tray.
The paper guides are set incorrectly.	To set the guides correctly, see the user guide. For the 500-sheet tray, make sure that the leading edge of the media stack is even. An uneven edge can prevent the lift plate from rising.

Paper curls when it exits the device.

Cause	Solution
The paper curls when it exits to the top output bin.	Open the rear output bin to allow the paper to exit in a straight path through the device. Turn over the paper that you are printing on. Reduce the fusing temperature to reduce the curling. (See the user guide.)

Print job is extremely slow.

Cause	Solution
The job might be very complex.	Reduce the complexity of the page or try adjusting the print-quality settings. If this problem occurs frequently, add memory to the device.
The maximum speed of the device cannot be exceeded even when more memory is added.	
Printing speeds might be automatically reduced when printing on custom-sized media.	
Note: Slower speeds are expected when printing on narrow paper, when printing from tray 1, or when using the HIGH 2 fuser mode.	

Print job is extremely slow.

Cause	Solution
You are printing a PDF or PostScript (PS) file but are using a PCL printer driver.	Try using the PS printer driver rather than the PCL printer driver. (You can usually do this from a software program.)
In the printer driver, Type is set to card stock, heavy, rough, or bond paper.	In the printer driver, set the type to plain paper (see the user guide). Note: If you change the setting to plain paper, the print job will print more quickly. However, if you are using heavy media, for best results leave the printer driver set to heavy even though printing might be slower.

Print job prints on both sides of the paper.

Cause	Solution
The device is set for duplexing.	See the user guide to change the setting, or see the online Help.

Print job contains only one page but the device also processes the back side of the page (the page comes part of the way out, and then goes back into the device).

Cause	Solution
The device is set for duplexing. Even if the print job contains only one page, the device also processes the back side.	See the user guide to change the setting, or see the online Help. Do not try to pull the page out of the device before duplexing is complete. Jamming might result.

Pages print, but are totally blank.

Cause	Solution
The sealing tape might still be in the print cartridge.	Remove the print cartridge and pull out the sealing tape. Reinstall the print cartridge.
The file might have blank pages.	Check the file to make sure that it does not contain blank pages.
The print cartridge is empty.	Replace the print cartridge.

The device prints, but the text is wrong, garbled, or incomplete.

Cause	Solution
The device cable is loose or defective.	Disconnect the device cable and reconnect it. Try a print job that you know works. If possible, attach the cable and device to another computer and try a print job that you know works. Finally, try a new cable.

The device prints, but the text is wrong, garbled, or incomplete.

Cause	Solution
The device is on a network or sharing device and is not receiving a clear signal.	Disconnect the device from the network and use a USB cable to attach it directly to a computer. Print a job that you know works.
The wrong driver was selected in the software.	Check the software device-selection menu to make sure that the device is selected.
The software program is malfunctioning.	Try printing a job from another program.

The device does not respond when you select Print in the software.

Cause	Solution
The device is out of media.	Add media.
The device might be in the manual-feed mode.	Change the device from manual-feed mode.
The cable between the computer and the device is not connected correctly.	Disconnect and reconnect the cable.
The device cable is defective.	If possible, attach the cable to another computer and print a job that you know works. You might also try using a different cable.
The wrong device was selected in the software.	Check the software device selection menu to make sure that the correct device is selected.
The device might have a jam.	Clear any jams, paying careful attention to the duplexer area (if your model has a duplexer). See Clear jams on page 214 .
The software for the device is not configured for the printer port.	Check the software device-selection menu to make sure that it is using the correct port. If the computer has more than one port, make sure that the device is attached to the correct one.
The device is on a network and is not receiving a signal.	Check cable connections. Reinstall the printing software. Print a job that you know works. Clear any stopped jobs from the print queue.
The device is not receiving power.	If no lights are on, check the power-cord connections. Check the power switch. Check the power source.
The device is malfunctioning.	Check the control-panel display for messages and lights to determine if the device is indicating an error. Note any messages and see Control-panel messages on page 201 .

Troubleshoot media-handling problems

If media is feeding incorrectly, use the information in this section to identify and resolve the problem.

Multiple pages feed

Table 6-5 Causes for multiple pages feeding

Cause	Solution
Too much media (particularly envelopes) is loaded in tray 1.	Remove some of the media and resend the print job.
The separation rollers and pads in the trays are worn or damaged.	Replace the rollers and pads.
The media edges are locked together.	Flex the media stack before loading it into the device. <i>Do not</i> fan the media.
The spring pushing the separation roller or pad is defective.	Replace the spring.
The media is of poor quality.	Check the media type and quality (see Media specifications on page 15).

Pages are wrinkled or folded

Table 6-6 Causes for wrinkled or folded paper at the paper-path entrance

Cause	Solution
The feed rollers or registration rollers are dirty or defective.	Replace the affected rollers.
The paper path contains foreign substances or dirt.	Remove any foreign substances or dirt from the paper path.
The cartridge shutter open/close mechanism is damaged. (This can cause jams in which the media is crumpled into an accordion fold under the print cartridge.)	The shutter in the print cartridge should open as you insert the cartridge. If a shutter does not open, replace the print cartridge.
The registration assembly is defective.	If the registration arm is dirty, clean it. If the arm is scarred or worn, replace the registration assembly (see Registration assembly on page 183).

Table 6-7 Causes for wrinkled or folded paper at the paper-path exit

Cause	Solution
The fuser inlet guide is dirty.	Replace the fuser (see Fuser on page 139).
The fuser pressure roller is dirty or damaged.	Run several cleaning pages through the device. If the problem persists, replace the fuser (see Fuser on page 139).

Pages are skewed

Table 6-8 Causes for skewed pages

Cause	Solution
Paper dust or dirt has accumulated on the tray feed roller or separation roller.	Clean or replace the rollers.
The tray feed roller and separation roller are worn irregularly.	Replace the affected roller.
The registration assembly is defective.	Replace the registration assembly (see Registration assembly on page 183).
Tray 2 is defective.	Replace tray 2.

Troubleshoot print-quality problems

This section helps you define print-quality problems and what to do to correct them. Often print-quality problems can be handled easily by making sure that the device is correctly maintained, using print media that meets HP specifications, or running a cleaning page.

Print-quality checklist

Follow the checklist to solve general print-quality problems.

- Process a cleaning page to clean the fuser (see [Clean the fuser on page 44](#)).
- Check the printer driver to make sure that you are using the best available print-quality option (see the user guide).
- Try printing with one of the alternative printer drivers. The most recent printer drivers are available for download from www.hp.com/go/LJM3027mfp_software or www.hp.com/go/LJM3035mfp_software.
- Clean the inside of the device (see [Clean the device on page 40](#)).
- Check the paper type and quality (see [Media specifications on page 15](#)).
- Check to make sure that Economode is off in the software.
- Troubleshoot general printing problems (see [Troubleshoot general printing problems on page 243](#)).
- Install a new HP print cartridge, and then check the print quality again. (See the instructions provided with the print cartridge.)

NOTE If the page is totally blank, check to make sure that the sealing tape is removed from the print cartridge and that the print cartridge is installed correctly. Newer devices have been optimized to print characters more accurately. This might result in characters that look lighter or thinner than you are used to from an older device. If the page is printing images darker than those from an older device, and you want the images to match the older device, make these changes in the printer driver: on the **Finishing** tab, select **Printer Quality**, select **Custom**, click **Details**, and select **Print Images Lighter**.

Image-defect examples

Use the examples in this image-defect table to determine which print-quality problem you are experiencing, and then see the corresponding reference pages to troubleshoot the problem. These examples identify the most common print-quality problems.

NOTE The examples below depict letter-size paper that has passed through the device short-edge first.

See [Light print \(partial page\) on page 250](#)

See [Light print \(entire page\) on page 251](#)

See [Specks on page 251](#)

See [Specks on page 251](#)

See [Dropouts on page 252](#)

See [Dropouts on page 252](#)

See [Dropouts on page 252](#)

See [Lines on page 252](#)

See [Gray background on page 253](#)

See [Toner smear on page 253](#)

See [Loose toner on page 254](#)

See [Repeating defects on page 254](#)

See [Repeating image on page 255](#)

See [Misformed characters on page 255](#)

See [Page skew on page 256](#)

See [Curl or wave on page 256](#)

See [Wrinkles or creases on page 257](#)

See [Vertical white lines on page 257](#)

See [Tire tracks on page 258](#)

See [White spots on black on page 258](#)

See [Scattered lines on page 259](#)

See [Blurred print on page 259](#)

See [Random image repetition on page 260 \(dark\)](#)

See [Random image repetition on page 260 \(light\)](#)

Light print (partial page)

1. Make sure that the print cartridge is fully installed.
2. The toner level in the print cartridge might be low. Replace the print cartridge.
3. The media might not meet HP specifications (for example, the paper is too moist or too rough). See [Media specifications on page 15](#).
4. The transfer roller might be worn or contaminated. Replace the transfer roller (see [Transfer roller on page 182](#)).

Light print (entire page)

1. Make sure that the print cartridge is fully installed.
2. Make sure that the EconoMode setting is turned off at the control panel and in the printer driver.
3. Open the **Print Quality** menu at the device control panel. Open the **Toner Density** submenu and increase the toner density setting. See the user guide.
4. Try using a different type of media.
5. The print cartridge might be almost empty. Replace the print cartridge.
6. The print cartridge might be installed incorrectly. Reinstall the print cartridge.
7. The transfer roller might be defective or installed incorrectly. Verify that the transfer roller is installed correctly. If the transfer roller is damaged, replace it.
8. The power supply might be defective. Replace the power supply (see [High-voltage power supply \(HVPS\) on page 149](#)).

Specks

Specks might appear on a page after a jam has been cleared.

1. Print a few more pages to see if the problem corrects itself.
2. Clean the inside of the device and run a cleaning page to clean the fuser. (See [Clean the device on page 40](#).)
3. Try using a different type of media.
4. Check the print cartridge for leaks. If the print cartridge is leaking, replace it.
5. The print cartridge might be defective. Replace the print cartridge.
6. The fuser might be defective. Replace the fuser [Fuser on page 139](#).

Dropouts

1. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
2. If the paper is rough, and the toner easily rubs off, open the **Print Quality** menu at the device control panel. Open the **Fuser Modes** submenu and then select the paper type that you are using. Change the setting to **HIGH 1** or **HIGH 2**, which helps the toner fuse more completely onto the paper. See the user guide.
3. Try using a smoother paper.
4. The print cartridge might be defective. Replace the print cartridge.
5. Fuser rollers might be dirty. Run a cleaning page (several pages might be required if the fuser is very dirty). If the image defect persists, replace the fuser (see [Fuser on page 139.](#))
6. The transfer roller might be damaged, dirty, or worn. Try cleaning the transfer roller by using a dry, lint-free cloth. If the image defect persists, replace the transfer roller.
7. The power supply might be defective. Replace the power supply (see [High-voltage power supply \(HVPS\) on page 149.](#))

Lines

1. Print a few more pages to see if the problem corrects itself.
2. Clean the inside of the device and run a cleaning page to clean the fuser. (See [Clean the device on page 40.](#))
3. Replace the print cartridge.

Gray background

1. Do not use media that has already been run through the device.
2. Try using a different type of media.
3. Print a few more pages to see if the problem corrects itself.
4. Turn over the stack of media in the tray. Also, try rotating the stack 180°.
5. Open the [Print Quality](#) menu at the device control panel. Open the [Toner Density](#) submenu and increase the toner density setting. See the user guide.
6. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
7. Replace the print cartridge.
8. The power supply might be defective. Replace the power supply (see [High-voltage power supply \(HVPS\) on page 149.](#))

Toner smear

1. Print a few more pages to see if the problem corrects itself.
2. Try using a different type of media.
3. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
4. Clean the inside of the device and run a cleaning page to clean the fuser. (See [Clean the device on page 40.](#))
5. Replace the print cartridge.
6. The fuser might be defective. Replace the fuser (see [Fuser on page 139.](#))
7. The ECU might be defective. Replace the ECU (see [Engine control unit \(ECU\) on page 131.](#))

Also see [Loose toner on page 254.](#)

Loose toner

Loose toner, in this context, is defined as toner that can be rubbed off the page.

1. If the paper is rough, and the toner easily rubs off, open the [Print Quality](#) menu at the device control panel. Open the [Fuser Modes](#) submenu and then select the paper type that you are using. Change the setting to [HIGH 1](#) or [HIGH 2](#), which helps the toner fuse more completely onto the paper. See the user guide.
2. If you have observed a rougher texture on one side of the paper, try printing on the smoother side.
3. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22](#).)
4. Make sure that type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15](#).)
5. The fuser might be defective. Replace the fuser (see [Fuser on page 139](#)).
6. The ECU might be defective. Replace the ECU (see [Laser/scanner on page 142](#)).

Repeating defects

1. Print a few more pages to see if the problem corrects itself.
2. Clean the inside of the device and run a cleaning page to clean the fuser. (See [Clean the device on page 40](#).)
3. Measure the distance between two identical defects and see [Image defect ruler on page 238](#).

Also see [Repeating image on page 255](#).

Repeating image

This type of defect might occur when using preprinted forms or a large quantity of narrow paper.

1. Print a few more pages to see if the problem corrects itself.
2. Run a cleaning page, and then print a few more pages to see if the problem persists.
3. Make sure that type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15.](#))
4. Measure the distance between two identical defects and see [Image defect ruler on page 238.](#)

Misformed characters

1. Print a few more pages to see if the problem corrects itself.
2. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
3. Reseat cables that are connected to the laser/scanner.
4. Reseat cables that are connected to the ECU.
5. If the image defect persists, the laser/scanner might be defective. Replace the laser/scanner. See [Laser/scanner on page 142.](#)
6. Inspect the gears in the main drive assembly and replace the assembly if gears are damaged (see [Gear assembly on page 162.](#))
7. The ECU might be defective. Replace the ECU (see [Engine control unit \(ECU\) on page 131.](#))

Page skew

1. Print a few more pages to see if the problem corrects itself.
2. Verify that there are no torn pieces of media inside the device.
3. Make sure that media is loaded correctly and that all adjustments have been made. (See the user guide.) Make sure that the guides in the tray are not too tight or too loose against the stack.
4. Turn over the stack of paper in the tray. Also, try rotating the stack 180°.
5. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15](#).)
6. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22](#).)
7. The registration assembly might be installed incorrectly or damaged. Make sure that the registration assembly is installed correctly. If necessary, replace the registration assembly (see [Registration assembly on page 183](#)).

NOTE If copies are skewed, but pages printed from the computer are not skewed, make sure that the ADF input tray is installed correctly (see [Figure 5-5 Reinstalling the ADF input tray on page 83](#)). ADF jams and skew can result from incorrect reinstallation.

Curl or wave

1. Turn over the stack of media in the tray. Also, try rotating the stack 180°.
2. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15](#).)
3. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22](#).)

4. Try printing to a different output bin.
5. If paper is lightweight and smooth, open the [Print Quality](#) menu at the device control panel. Open the [Fuser Modes](#) submenu and then select the paper type that you are using. Change the setting to [Low](#), which helps reduce the heat in the fusing process. See the user guide.

Wrinkles or creases

1. Print a few more pages to see if the problem corrects itself.
2. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
3. Turn over the stack of media in the tray. Also, try rotating the stack 180°.
4. Make sure that media is loaded correctly and all adjustments have been made. (See the user guide.)
5. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15.](#))
6. If envelopes are creasing, try storing envelopes so that they lie flat.

Vertical white lines

1. Print a few more pages to see if the problem corrects itself.
2. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15.](#))
3. Replace the print cartridge.
4. The fuser might be defective. Replace the fuser. (See [Fuser on page 139.](#))
5. If the image defect persists, the mirror in the laser/scanner might be dirty. Replace the laser/scanner (see [Laser/scanner on page 142.](#))
6. If the image defect persists, replace the ECU. (See [Engine control unit \(ECU\) on page 131.](#))
7. If the image defect persists, replace the formatter. (See [Formatter on page 116.](#))

Tire tracks

This defect typically occurs when the print cartridge has far exceeded its rated life. For example, if you are printing a very large quantity of pages with very little toner coverage.

1. Perform a half self-test functional check. If the drum is damaged, replace the print cartridge.
2. Run a cleaning page. If the image defect persists, replace the fuser. (See [Fuser on page 139](#).)
3. If the image defect persists, check the device for other sources of contamination or damage in the paper path and clean or replace parts as necessary.

NOTE This type of image defect might also be a repetitive defect. See [Image defect ruler on page 238](#).

White spots on black

1. Print a few more pages to see if the problem corrects itself.
2. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15](#).)
3. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22](#).)
4. Replace the print cartridge.

Scattered lines

1. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15.](#))
2. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
3. Turn over the stack of media in the tray. Also, try rotating the stack 180°.
4. Open the **Print Quality** menu at the device control panel. Open the **Toner Density** submenu and change the toner density setting. See the user guide.
5. Open the **Print Quality** menu at the device control panel. Open the **Optimize** submenu and set **Line Detail** to **On**. See the user guide.

Blurred print

1. Make sure that the type and quality of the media that you are using meet HP specifications. (See [Media specifications on page 15.](#))
2. Make sure that the environmental specifications for the device are being met. (See [Operating environment on page 22.](#))
3. Turn over the stack of media in the tray. Also, try rotating the stack 180°.
4. Do not use paper that already has been run through the device.
5. Open the **Print Quality** menu at the device control panel. Open the **Toner Density** submenu and decrease the toner density setting. See the user guide.
6. Open the **Print Quality** menu at the device control panel. Open the **Optimize** submenu and set **High Transfer** to **Increased**. See the user guide.

Random image repetition

If an image that appears at the top of the page (in solid black) repeats farther down the page (in a gray field), the toner might not have been completely erased from the last job. (The repeated image might be lighter or darker than the field it appears in.)

- Change the tone (darkness) of the field that the repeated image appears in.
- Change the order in which the images are printed. For example, have the lighter image at the top of the page, and the darker image farther down the page.
- From the software application, rotate the whole page 180° to print the lighter image first.
- If the defect occurs later in a print job, turn the device off for 10 minutes, and then turn the device on to restart the print job.

Supplies

Device supplies are listed in this chapter. Consumables are available directly from HP at the following numbers.

- US: 800-538-8787
- Canada: 800-387-3154 (in Toronto: 416-671-8383)
- United Kingdom: 0734-441212
- Germany: 0130-3322

Contact your local HP Parts Coordinator for other local phone numbers.

Consumables and accessories

The following accessories and supplies are available for the HP LaserJet M3027/M3035.

Consumables and accessories

Product name	Description	Product number	Part number
Paper-handling accessories			
Optional 500-sheet tray and feeder unit	Optional tray to increase paper capacity holds Letter, A4, Legal, A5, B5 (JIS), Executive, and 8.5 x 13 inch paper sizes	Q5963A	Q5963A
Print cartridges			
HP LaserJet print cartridge	6,500-page cartridge	Q7551A	Q7551A
HP LaserJet print cartridge	13,000-page cartridge	Q7551X	Q7551X
Memory			
32 MB, 100-pin DDR memory DIMM	Boosts the ability of the device to handle large or complex print jobs	Q3982A	Q3982A
48 MB, 100-pin DDR memory DIMM	Boosts the ability of the device to handle large or complex print jobs	Q6007A	Q6007A
64 MB, 100-pin DDR memory DIMM	Boosts the ability of the device to handle large or complex print jobs	Q2625A	Q2625A
128 MB, 100-pin DDR memory DIMM	Boosts the ability of the device to handle large or complex print jobs	Q2626A	Q2626A
256 MB, 100-pin DDR memory DIMM	Boosts the ability of the device to handle large or complex print jobs	Q2627A	Q2627A
Cables and interfaces			
Enhanced I/O (EIO) cards. HP Jetdirect print server multiprotocol EIO network cards.	HP Jetdirect 620n Fast Ethernet (10/100Base-TX) print server	J7934A	J7934A
Enhanced I/O (EIO) cards. HP Jetdirect print server multiprotocol EIO network cards.	HP Jetdirect 680n 802.11b wireless internal print server	J6058A	J6058A
Enhanced I/O (EIO) cards. HP Jetdirect print server multiprotocol EIO network cards.	HP Jetdirect Connectivity card for USB, serial, and LocalTalk connections	J4135A	J4135A
USB cable	2-meter A to B cable	C6518A	C6518A

ADF/scanner assembly

Gear, 16T	RU5-0951-000CN	Internal components (2 of 6) on page 281
Gear, 17T	RA0-1172-000CN	Internal components (3 of 6) on page 283

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Gear, 17T/17T	RU5-0958-000CN	Internal components (2 of 6) on page 281
Gear, 19T	RU5-0959-000CN	Internal components (2 of 6) on page 281
Gear, 201t	RU5-0950-000CN	Internal components (2 of 6) on page 281
Gear, 20T	RU5-0957-000CN	Internal components (2 of 6) on page 281
Gear, 20T/20T	RU5-0956-000CN	Internal components (2 of 6) on page 281
Gear, 30T	RU5-0366-000CN	Internal components (3 of 6) on page 283
Gear, 31T	RU5-0960-000CN	Internal components (2 of 6) on page 281
Gear, 43T	RU5-0955-000CN	Internal components (2 of 6) on page 281
Gear, 65T	RU5-0962-000CN	Internal components (2 of 6) on page 281
Guide	RC1-4083-000CN	Internal components (5 of 6) on page 287
Guide, air	RC2-0648-000CN	Internal components (2 of 6) on page 281
Guide, cartridge, left lower	RC2-0704-000CN	Internal components (1 of 6) on page 277
Guide, cartridge, left upper	RC2-0703-000CN	Internal components (1 of 6) on page 277
Guide, cartridge, lower-right	RC2-0700-000CN	Internal components (6 of 6) on page 289
Guide, cartridge, upper-right	RC2-0492-000CN	Internal components (6 of 6) on page 289
Guide, cassette, back-right	RC2-0560-000CN	Internal components (6 of 6) on page 289
Guide, cassette, front-right	RC2-0559-000CN	Internal components (6 of 6) on page 289
Guide, cassette, left front	RC2-0565-000CN	Internal components (1 of 6) on page 277
Guide, cassette, left rear	RC2-0566-000CN	Internal components (1 of 6) on page 277
Guide, center plate, left	RC2-0567-000CN	Internal components (1 of 6) on page 277
Guide, center plate, right	RC2-0561-000CN	Internal components (6 of 6) on page 289
Guide, door arm	RC1-4056-000CN	Internal components (1 of 6) on page 277

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Guide, duplex inlet	RC1-4096-000CN	Internal components (4 of 6) on page 285
Guide, feed	RC1-3935-000CN	Internal components (3 of 6) on page 283
Hinge, left	RC1-4057-000CN	Covers on page 275
Hinge, right	RC1-4058-000CN	Covers on page 275
Holder	RC1-4009-000CN	Internal components (1 of 6) on page 277
Holder, cable	RC2-0588-000CN	Internal components (5 of 6) on page 287
Holder, interlock	RC2-0595-000CN	Internal components (6 of 6) on page 289
Holder, main fan	RC2-0592-000CN	Internal components (5 of 6) on page 287
Holder, option connector	RC1-0562-000CN	Internal components (6 of 6) on page 289
Holder, sub fan	RC2-0622-000CN	Internal components (1 of 6) on page 277
Holder, switch	RC2-0632-000CN	Internal components (6 of 6) on page 289
Holder, switch link	RC2-0634-000CN	Internal components (6 of 6) on page 289
Holder, tag	RC1-4127-000CN	Internal components (1 of 6) on page 277
Input tray, ADF	CB414-67903	ADF/scanner assembly on page 273
Laser/scanner assembly	RM1-1521-030CN	Internal components (1 of 6) on page 277
Lever	RC1-4060-000CN	Internal components (3 of 6) on page 283
Lever, cartridge clamp	RC2-0706-000CN	Internal components (1 of 6) on page 277
Lever, coupling	RC1-4115-000CN	Internal components (2 of 6) on page 281
Lever, drive release	RC2-0705-000CN	Internal components (1 of 6) on page 277
Lever, drive release	RC1-4116-000CN	Internal components (2 of 6) on page 281
Lever, grounding contact	RC1-4065-000CN	Internal components (1 of 6) on page 277
Lever, grounding contact	RC1-4066-020CN	Internal components (1 of 6) on page 277
Lever, sensor	RC1-4027-000CN	Internal components (3 of 6) on page 283

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Lever, sensor	RC1-3939-000CN	Internal components (5 of 6) on page 287
Link, drive release	RC1-4117-000CN	Internal components (2 of 6) on page 281
Link, laser shutter	RC1-4125-000CN	Internal components (1 of 6) on page 277
Link, switch	RC2-0633-000CN	Internal components (6 of 6) on page 289
Microswitch	RK2-0534-000CN	Internal components (6 of 6) on page 289
Motor, dc, 26.2 W	RK2-1488-000CN	Internal components (2 of 6) on page 281
Motor, stepping	RK2-1489-000CN	Internal components (2 of 6) on page 281
Mount, solenoid	RC2-0498-000CN	Internal components (6 of 6) on page 289
Pad, separation	RC1-0939-000CN	Internal components (3 of 6) on page 283
Paper clip tray	RC2-0724-000CN	Covers on page 275
Pendulum assembly	RM1-3748-000CN	Internal components (2 of 6) on page 281
Photo-interrupter	WG8-5624-000CN	Internal components (6 of 6) on page 289
Photo-interrupter, tray 2	WG8-5624-000CN	Tray 2 pickup assembly on page 291
Pick-up roller gear assembly	RM1-3714-000CN	Internal components (5 of 6) on page 287
Pickup roller assembly, tray 2	RM1-3763-000CN	Tray 2 pickup assembly on page 291
Pickup roller, tray 2	RL1-1370-000CN	Tray 2 pickup assembly on page 291
Plate, face-up shield	RC2-0697-000CN	Internal components (6 of 6) on page 289
Plate, fan shield, left	RC2-0623-000CN	Internal components (1 of 6) on page 277
Plate, grounding	RC1-4085-000CN	Internal components (4 of 6) on page 285
Plate, I/O	RC2-0736-000CN	Internal components (1 of 6) on page 277
Plate, protective	RC1-4136-000CN	Internal components (1 of 6) on page 277
Position guide assembly	RM1-1506-000CN	Internal components (4 of 6) on page 285

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Power supply	RM1-3758-000CN	Internal components (4 of 6) on page 285
Power switch	RC2-0631-000CN	Internal components (6 of 6) on page 289
Power-supply, stapler	Q7429-69501	Internal components (1 of 6) on page 277
Rear cover assembly	RM1-3724-000CN	Covers on page 275
Registration assembly	RM1-3715-000CN	Internal components (3 of 6) on page 283
Roller assembly, bottom plate	RM1-3727-000CN	Internal components (6 of 6) on page 289
Roller assembly, delivery	RM1-1497-000CN	Internal components (6 of 6) on page 289
Roller assembly, face-down	RM1-3749-000CN	Internal components (6 of 6) on page 289
Roller stay assembly	RM1-1485-000CN	Internal components (5 of 6) on page 287
Roller, face-down	RC1-3994-000CN	Internal components (6 of 6) on page 289
Roller, tray 1 pick-up	RL1-0568-000CN	Internal components (3 of 6) on page 283
Scanner assembly (ADF assembly is <i>not</i> included)	CB414-67905	ADF/scanner assembly on page 273
Screw w/washer, M3x6	XB2-7300-605CN	Internal components (4 of 6) on page 285
Screw w/washer, M3x6	XB2-7300-605CN	Internal components (5 of 6) on page 287
Screw, D, M3x8	XA9-1671-000CN	Internal components (1 of 6) on page 277
Screw, D, M3x8	XA9-1671-000CN	Internal components (2 of 6) on page 281
Screw, D, M3x8	XA9-1671-000CN	Internal components (3 of 6) on page 283
Screw, D, M3x8	XA9-1671-000CN	Internal components (5 of 6) on page 287
Screw, D, M3x8	XA9-1671-000CN	Internal components (6 of 6) on page 289
Screw, RS, M3x8	XA9-1500-000CN	Internal components (2 of 6) on page 281
Screw, tapping, M3x6	XA9-1503-000CN	Internal components (5 of 6) on page 287
Screw, tapping, truss head, M4x10	XB4-7401-005CN	Internal components (3 of 6) on page 283

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Screw, tapping, truss head, M4x10	XB4-7401-005CN	Internal components (4 of 6) on page 285
Screw, tapping, truss head, M4x10	XB4-7401-005CN	Internal components (5 of 6) on page 287
Screw, tapping, truss head, M4x10	XB4-7401-005CN	Internal components (6 of 6) on page 289
Sensor flag assembly, tray 2	RM1-3769-000CN	Tray 2 pickup assembly on page 291
Sensor PCA, multipurpose	RM1-4041-000CN	Internal components (5 of 6) on page 287
Sensor PCA, top-of-page	RM1-4040-000CN	Internal components (4 of 6) on page 285
Sensor PCA, width	RM1-4042-000CN	Internal components (4 of 6) on page 285
Sheet, static charge	RC1-4069-000CN	Internal components (3 of 6) on page 283
Sheet, static charge	RC1-4070-000CN	Internal components (3 of 6) on page 283
Solenoid	RK2-1492-000CN	Internal components (6 of 6) on page 289
Solenoid, tray 1	RK2-1490-000CN	Internal components (5 of 6) on page 287
Spring compression	RC2-0483-000CN	Internal components (3 of 6) on page 283
Spring, compression	RU5-2404-000CN	Internal components (1 of 6) on page 277
Spring, compression	RU5-2405-000CN	Internal components (1 of 6) on page 277
Spring, compression	RC1-4140-000CN	Internal components (1 of 6) on page 277
Spring, compression	RU5-2401-000CN	Internal components (2 of 6) on page 281
Spring, compression	RU5-2920-000CN	Internal components (2 of 6) on page 281
Spring, compression	RU5-2408-000CN	Internal components (3 of 6) on page 283
Spring, compression	RU5-2385-000CN	Internal components (3 of 6) on page 283
Spring, leaf	RC1-4067-000CN	Internal components (1 of 6) on page 277
Spring, tension	RU5-2388-000CN	Covers on page 275
Spring, tension	RU5-2407-000CN	Internal components (1 of 6) on page 277

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Spring, tension	RU5-2403-000CN	Internal components (1 of 6) on page 277
Spring, torsion	RU5-2410-020CN	Internal components (1 of 6) on page 277
Spring, torsion	RC1-4028-000CN	Internal components (3 of 6) on page 283
Spring, torsion	RC1-4059-000CN	Internal components (3 of 6) on page 283
Spring, torsion	RC1-4061-000CN	Internal components (3 of 6) on page 283
Spring, torsion	RC2-0576-000CN	Internal components (3 of 6) on page 283
Spring, torsion	RU5-2386-000CN	Internal components (5 of 6) on page 287
Spring, torsion	RC2-0665-000CN	Internal components (6 of 6) on page 289
Stapler	CB414-60147	Internal components (1 of 6) on page 277
Stapler door (for devices with staplers)	CB414-40064	Covers on page 275
Static wire, right-side fan	RC2-0593-000CN	Internal components (5 of 6) on page 287
Stay, tag holder	RC1-4126-000CN	Internal components (1 of 6) on page 277
Stopper, cartridge, left	RC2-0707-000CN	Internal components (1 of 6) on page 277
Stopper, cartridge, right	RC2-0702-000CN	Internal components (6 of 6) on page 289
Stopper, feed guide, left	RC2-0585-000CN	Internal components (1 of 6) on page 277
Stopper, fuser	RC2-0657-000CN	Internal components (2 of 6) on page 281
Stopper, gear	RC1-4189-000CN	Internal components (3 of 6) on page 283
Top cover assembly	RM1-3772-000CN	Covers on page 275
Transfer guide assembly, lower	RM1-3757-000CN	Internal components (3 of 6) on page 283
Transfer roller assembly	RM1-1508-000CN	Internal components (3 of 6) on page 283
Tray, staple	RC2-0725-000CN	Internal components (1 of 6) on page 277
Tray 1 assembly	RM1-1490-000CN	Covers on page 275
Tray 1 cover assembly	RM1-3723-000CN	Covers on page 275

Table 7-11 Alphabetical parts list (continued)

Description	Part number	Table and page
Tray 1 pickup roller assembly	RM1-3716-000CN	Internal components (3 of 6) on page 283
Tray 2 pickup assembly	RM1-3762-000CN	Tray 2 pickup assembly on page 291
Tray 2 pickup assembly (also see Tray 2 pickup assembly on page 290)	RM1-3762-000CN	Internal components (5 of 6) on page 287
Washer	RC2-0652-000CN	Internal components (2 of 6) on page 281

Numerical parts list

Table 7-12 Numerical parts list

Part number	Description	Table and page
CB414-40064	Stapler door (for devices with staplers)	Covers on page 275
CB414-60101	Control panel	ADF/scanner assembly on page 273
CB414-60147	Stapler	Internal components (1 of 6) on page 277
CB414-67902	Cover, ADF	ADF/scanner assembly on page 273
CB414-67903	Input tray, ADF	ADF/scanner assembly on page 273
CB414-67905	Scanner assembly (ADF assembly is <i>not</i> included)	ADF/scanner assembly on page 273
CB414-67916	ADF assembly	ADF/scanner assembly on page 273
CB414-67904	ADF feed roller kit	ADF/scanner assembly on page 273
Q7429-69501	Power-supply, stapler	Internal components (1 of 6) on page 277
Q7819-60001	Formatter	Internal components (1 of 6) on page 277
RA0-1003-000CN	Foot, rubber	Internal components (1 of 6) on page 277
RA0-1003-000CN	Foot, rubber	Internal components (6 of 6) on page 289
RA0-1172-000CN	Gear, 17T	Internal components (3 of 6) on page 283
RC1-0562-000CN	Holder, option connector	Internal components (6 of 6) on page 289
RC1-0922-000CN	Bushing, transfer, right	Internal components (3 of 6) on page 283
RC1-0939-000CN	Pad, separation	Internal components (3 of 6) on page 283
RC1-3665-000CN	Bushing	Internal components (6 of 6) on page 289
RC1-3935-000CN	Guide, feed	Internal components (3 of 6) on page 283
RC1-3936-020CN	Cover, registration	Internal components (3 of 6) on page 283
RC1-3937-000CN	Arm, pad	Internal components (3 of 6) on page 283
RC1-3939-000CN	Lever, sensor	Internal components (5 of 6) on page 287

Table 7-12 Numerical parts list (continued)

Part number	Description	Table and page
RC1-3994-000CN	Roller, face-down	Internal components (6 of 6) on page 289
RC1-4009-000CN	Holder	Internal components (1 of 6) on page 277
RC1-4025-000CN	Eliminator, static charge	Internal components (3 of 6) on page 283
RC1-4027-000CN	Lever, sensor	Internal components (3 of 6) on page 283
RC1-4028-000CN	Spring, torsion	Internal components (3 of 6) on page 283
RC1-4055-000CN	Arm, door	Internal components (1 of 6) on page 277
RC1-4056-000CN	Guide, door arm	Internal components (1 of 6) on page 277
RC1-4057-000CN	Hinge, left	Covers on page 275
RC1-4058-000CN	Hinge, right	Covers on page 275
RC1-4059-000CN	Spring, torsion	Internal components (3 of 6) on page 283
RC1-4060-000CN	Lever	Internal components (3 of 6) on page 283
RC1-4061-000CN	Spring, torsion	Internal components (3 of 6) on page 283
RC1-4065-000CN	Lever, grounding contact	Internal components (1 of 6) on page 277
RC1-4066-020CN	Lever, grounding contact	Internal components (1 of 6) on page 277
RC1-4067-000CN	Spring, leaf	Internal components (1 of 6) on page 277
RC1-4069-000CN	Sheet, static charge	Internal components (3 of 6) on page 283
RC1-4070-000CN	Sheet, static charge	Internal components (3 of 6) on page 283
RC1-4083-000CN	Guide	Internal components (5 of 6) on page 287
RC1-4085-000CN	Plate, grounding	Internal components (4 of 6) on page 285
RC1-4096-000CN	Guide, duplex inlet	Internal components (4 of 6) on page 285
RC1-4108-000CN	Cover, main motor	Internal components (2 of 6) on page 281
RC1-4114-000CN	Cam	Internal components (2 of 6) on page 281
RC1-4115-000CN	Lever, coupling	Internal components (2 of 6) on page 281

Table 7-12 Numerical parts list (continued)

Part number	Description	Table and page
RC1-4116-000CN	Lever, drive release	Internal components (2 of 6) on page 281
RC1-4117-000CN	Link, drive release	Internal components (2 of 6) on page 281
RC1-4125-000CN	Link, laser shutter	Internal components (1 of 6) on page 277
RC1-4126-000CN	Stay, tag holder	Internal components (1 of 6) on page 277
RC1-4127-000CN	Holder, tag	Internal components (1 of 6) on page 277
RC1-4128-020CN	Duct, scanner	Internal components (1 of 6) on page 277
RC1-4136-000CN	Plate, protective	Internal components (1 of 6) on page 277
RC1-4137-020CN	Cam, contact	Internal components (1 of 6) on page 277
RC1-4140-000CN	Spring, compression	Internal components (1 of 6) on page 277
RC1-4189-000CN	Stopper, gear	Internal components (3 of 6) on page 283
RC2-0468-000CN	Cushion, right lower	Internal components (6 of 6) on page 289
RC2-0483-000CN	Spring compression	Internal components (3 of 6) on page 283
RC2-0492-000CN	Guide, cartridge, upper-right	Internal components (6 of 6) on page 289
RC2-0498-000CN	Mount, solenoid	Internal components (6 of 6) on page 289
RC2-0559-000CN	Guide, cassette, front-right	Internal components (6 of 6) on page 289
RC2-0560-000CN	Guide, cassette, back-right	Internal components (6 of 6) on page 289
RC2-0561-000CN	Guide, center plate, right	Internal components (6 of 6) on page 289
RC2-0565-000CN	Guide, cassette, left front	Internal components (1 of 6) on page 277
RC2-0566-000CN	Guide, cassette, left rear	Internal components (1 of 6) on page 277
RC2-0567-000CN	Guide, center plate, left	Internal components (1 of 6) on page 277
RC2-0575-000CN	Arm, width-sensor	Internal components (3 of 6) on page 283
RC2-0576-000CN	Spring, torsion	Internal components (3 of 6) on page 283

Table 7-12 Numerical parts list (continued)

Part number	Description	Table and page
RC2-0579-000CN	Cover, gear	Internal components (2 of 6) on page 281
RC2-0585-000CN	Stopper, feed guide, left	Internal components (1 of 6) on page 277
RC2-0588-000CN	Holder, cable	Internal components (5 of 6) on page 287
RC2-0590-000CN	Duct, cartridge	Internal components (2 of 6) on page 281
RC2-0592-000CN	Holder, main fan	Internal components (5 of 6) on page 287
RC2-0593-000CN	Static wire, right-side fan	Internal components (5 of 6) on page 287

A Supplies and accessories

This section provides information about ordering parts, supplies, and accessories. Use only parts and accessories that are specifically designed for this device.

- [Order parts, accessories, and supplies](#)
- [Part numbers](#)

Order parts, accessories, and supplies

Several methods are available for ordering parts, supplies, and accessories:

- [Order directly from HP](#)
- [Order through service or support providers](#)
- [Order directly through the embedded Web server \(for printers that are connected to a network\)](#)
- [Order directly through the HP Easy Printer Care software](#)

Order directly from HP

You can obtain the following items directly from HP:

- **Replacement parts:** To order replacement parts in the U.S., go to <http://www.hp.com/go/hpparts>. Outside the United States, order parts by contacting your local authorized HP service center.
- **Supplies and accessories:** To order supplies in the U.S., go to <http://www.hp.com/go/ljsupplies>. To order supplies worldwide, go to <http://www.hp.com/ghp/buyonline.html>. To order accessories, go to www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp.

Order through service or support providers

To order a part or accessory, contact an HP-authorized service or support provider.

Order directly through the embedded Web server (for printers that are connected to a network)

Use the following steps to order printing supplies directly through the embedded Web server.

1. In the Web browser on the computer, type the IP address or host name of the device. The status window opens.
2. In the **Other links** area, double-click **Order Supplies**. This provides a URL for a site from which you can purchase consumables.
3. Select the part numbers that you want to order, and follow the instructions on the screen.

Order directly through the HP Easy Printer Care software

HP Easy Printer Care software is a printer management tool designed to make printer configuration, monitoring, supplies ordering, troubleshooting, and updating as simple and efficient as possible. For more information about HP Easy Printer Care software, go to <http://www.hp.com/go/easyprintercare>.

Part numbers

The following list of accessories was current at the time of printing. Ordering information and availability of the accessories might change during the life of the device.

Paper-handling accessories

Item	Description	Part number
Optional 500-sheet tray and feeder unit (tray 3)	Optional tray to increase paper capacity. Holds Letter, A4, Legal, A5, B5 (JIS), Executive, and 8.5 x 13 paper sizes.	Q7817A

Print cartridge

Item	Description	Part number
HP LaserJet print cartridge	6,500-page cartridge	Q7551A
	13,000-page cartridge	Q7551X

Memory

Item	Description	Part number
100-pin 133MHz DDR DIMM	64 MB	Q7715A
Boosts the ability of the device to handle large or complex print jobs.	128 MB	Q7718A
	256 MB	Q7719A
	512 MB	Q7720A

Cables and interfaces

Item	Description	Part number
Enhanced I/O (EIO) cards	HP Jetdirect 620n Fast Ethernet (10/100Base-TX) print server	J7934A
HP Jetdirect print server multi-protocol EIO network cards:	HP Jetdirect 625n Gigabit Ethernet (10/100Base-TX) print server	J7960A
	HP Jetdirect 680n 802.11b wireless internal print server	J6058A
	HP bt1300 Bluetooth wireless printer adapter	J6072A
	HP Jetdirect 635n IPv6/IPsec print server	J7961A
	HP Jetdirect 635n IPv6/IPsec print server	J7961A
USB cable	2-meter A to B cable	C6518A

Stapler accessories

Item	Description	Part number
Staple cassette	Cassette that contains 1,500 unformed staples	Q7432A

Print media

For more information about media supplies, go to <http://www.hp.com/go/ljsupplies>.

Item	Description	Part number
HP Soft Gloss laser paper	Letter (220 x 280 mm), 50 sheets/box	C4179A/Asia-Pacific countries/regions
For use with HP LaserJet devices. This is coated paper, good for business documents with high impact, such as brochures, sales material, and documents with graphics and photographic images.	A4 (210 x 297 mm), 50 sheets/box	C4179B/Asia-Pacific countries/regions and Europe
Specifications: 32 lb (120 g/m ²).		
HP LaserJet tough paper	Letter (8.5 x 11 in), 50 sheets to a carton	Q1298A/North America
For use with HP LaserJet devices. This satin-finish paper is waterproof and tear-proof, yet doesn't compromise on print quality or performance. Use it for signs, maps, menus, and other business applications.	A4 (210 x 297 mm), 50 sheets to a carton	Q1298B/Asia-Pacific countries/regions and Europe
HP Premium Choice LaserJet paper	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPU1132/North America
HP's brightest LaserJet paper. Expect spectacular color and crisp black from this paper that is extra smooth and brilliantly white. This is ideal for presentations, business plans, external correspondence and other high-value documents	Letter (8.5 x 11 in), 250 sheets/ream, 6-ream carton	HPU1732 North America
	A4 (210 x 297 mm), 5-ream carton	Q2397A/Asia-Pacific countries/regions
	A4 (210 x 297 mm), 250 sheet/ream, 5-ream carton	CHP412/Europe
	A4 (210 x 297 mm), 500 sheet/ream, 5-ream carton	CHP410/Europe
Specifications: 98 bright, 32 lb. (75 g/m ²).		
HP LaserJet paper	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPJ1124/North America
For use with HP LaserJet devices. This is good for letterhead, high-value memos, legal documents, direct mail, and correspondence.	Legal (8.5 x 14 in), 500 sheets/ream, 10-ream carton	HPJ1424/North America
Specifications: 96 bright, 24 lb (90 g/m ²).	Letter (220 x 280 mm), 500 sheets/ream, 5-ream carton	Q2398A/Asia-Pacific countries/regions
	A4 (210 x 297 mm), 500 sheets/ream, 5-ream carton	Q2400A/Asia-Pacific countries/regions
	A4 (210 x 297 mm), 500 sheets/ream	CHP310/Europe

Item	Description	Part number
<p>HP Printing paper</p> <p>For use with HP LaserJet and inkjet devices. This has been created especially for small and home offices. It is heavier and brighter than copier paper.</p> <p>Specifications: 92 bright, 22 lb.</p>	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPP1122/North America and Mexico
	Letter (8.5 x 11 in), 500 sheets/ream, 3-ream carton	HPP113R/North America
	A4 (210 x 297 mm), 500 sheets/ream, 5-ream carton	CHP210/Europe
	A4 (210 x 297 mm), 300 sheets/ream, 5-ream carton	CHP213/Europe
<p>HP Multipurpose paper</p> <p>For use with all office equipment-laser and inkjet devices, copiers, and fax machines. This has been created for businesses that want one paper for all their office needs. It is brighter and smoother than other office papers.</p> <p>Specifications: 90 bright, 20 lb (75 g/m²).</p>	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPM1120/North America
	Letter (8.5 x 11 in), 500 sheets/ream, 5-ream carton	HPM115R/North America HP25011/North America
	Letter (8.5 x 11 in), 250 sheets/ream, 12-ream carton	HPM113H/North America HPM1420/North America
	Letter (8.5 x 11 in), 3-hole, 500 sheets/ream, 10-ream carton	
	Legal (8.5 x 14 in), 500 sheets/ream, 10-ream carton	
<p>HP Office paper</p> <p>For use with all office equipment-laser and inkjet devices, copiers, and fax machines. This is good for high-volume printing.</p> <p>Specifications: 84 bright, 20 lb (75 g/m²).</p>	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPC8511/North America and Mexico
	Letter (8.5 x 11 in), 3-hole, 500 sheets/ream, 10-ream carton	HPC3HP/North America
	Legal (8.5 x 14 in), 500 sheets/ream, 10-ream carton	HPC8514/North America
	Letter (8.5 x 11 in), Quick Pack; 2,500-sheet carton	HP2500S/North America and Mexico
	Letter (8.5 x 11 in), Quick Pack 3-hole; 2,500-sheet carton	HP2500P/North America
	Letter (220 x 280 mm), 500 sheets/ream, 5-ream carton	Q2408A/Asia-Pacific countries/regions
	A4 (210 x 297 mm), 500 sheets/ream, 5-ream carton	Q2407A/Asia-Pacific countries/regions
	A4 (210 x 297 mm), 500 sheets/ream, 5-ream carton	CHP110/Europe
	A4 (210 x 297 mm), Quick Pack; 2500 sheets/ream, 5-ream carton	CHP113/Europe

Item	Description	Part number
HP Office recycled paper	Letter (8.5 x 11 in), 500 sheets/ream, 10-ream carton	HPE1120/North America
For use with all office equipment-laser and inkjet printers, copiers, and fax machines. This is good for high-volume printing.	Letter (8.5 x 11 in), 3-hole, 500 sheets/ream, 10-ream carton	HPE113H/North America
	Legal (8.5 x 14 in), 500 sheets/ream, 10-ream carton	HPE1420/North America
Satisfies U.S. Executive Order 13101 for environmentally preferable products.		
Specifications: 84 bright, 20 lb, 30% post-consumer content.		
HP LaserJet transparencies	Letter (8.5 x 11 in), 50 sheets to a carton	92296T/North America, Asia-Pacific countries/regions, and Europe
For use only with HP LaserJet monochrome printers. For crisp, sharp text and graphics, rely on the only transparencies specifically designed and tested to work with monochrome HP LaserJet printers.	A4 (210 x 297 mm), 50 sheets to a carton	922296U/Asia-Pacific countries/regions and Europe
Specifications: 4.3-mil thickness.		

B Service and support

Hewlett-Packard limited warranty statement

HP PRODUCT

HP LaserJet M3027, M3027x, M3035, and M3035xs

DURATION OF LIMITED WARRANTY

One-year on-site warranty

HP warrants to you, the end-user customer, that HP hardware and accessories will be free from defects in materials and workmanship after the date of purchase, for the period specified above. If HP receives notice of such defects during the warranty period, HP will, at its option, either repair or replace products which prove to be defective. Replacement products may be either new or equivalent in performance to new.

HP warrants to you that HP software will not fail to execute its programming instructions after the date of purchase, for the period specified above, due to defects in material and workmanship when properly installed and used. If HP receives notice of such defects during the warranty period, HP will replace software which does not execute its programming instructions due to such defects.

HP does not warrant that the operation of HP products will be uninterrupted or error free. If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, you will be entitled to a refund of the purchase price upon prompt return of the product.

HP products may contain remanufactured parts equivalent to new in performance or may have been subject to incidental use.

Warranty does not apply to defects resulting from (a) improper or inadequate maintenance or calibration, (b) software, interfacing, parts or supplies not supplied by HP, (c) unauthorized modification or misuse, (d) operation outside of the published environmental specifications for the product, or (e) improper site preparation or maintenance.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTIES ARE EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE. Some countries/regions, states or provinces do not allow limitations on the duration of an implied warranty, so the above limitation or exclusion might not apply to you. This warranty gives you specific legal rights and you might also have other rights that vary from country/region to country/region, state to state, or province to province. HP's limited warranty is valid in any country/region or locality where HP has a support presence for this product and where HP has marketed this product. The level of warranty service you receive may vary according to local standards. HP will not alter form, fit or function of the product to make it operate in a country/region for which it was never intended to function for legal or regulatory reasons.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE REMEDIES IN THIS WARRANTY STATEMENT ARE YOUR SOLE AND EXCLUSIVE REMEDIES. EXCEPT AS INDICATED ABOVE, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR LOSS OF DATA OR FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL

(INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE. Some countries/regions, states or provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.

Customer self repair warranty service

HP products are designed with many Customer Self Repair (CSR) parts to minimize repair time and allow for greater flexibility in performing defective parts replacement. If during the diagnosis period, HP identifies that the repair can be accomplished by the use of a CSR part, HP will ship that part directly to you for replacement. There are two categories of CSR parts: 1) Parts for which customer self repair is mandatory. If you request HP to replace these parts, you will be charged for the travel and labor costs of this service. 2) Parts for which customer self repair is optional. These parts are also designed for Customer Self Repair. If, however, you require that HP replace them for you, this may be done at no additional charge under the type of warranty service designated for your product.

Based on availability and where geography permits, CSR parts will be shipped for next business day delivery. Same-day or four-hour delivery may be offered at an additional charge where geography permits. If assistance is required, you can call the HP Technical Support Center and a technician will help you over the phone. HP specifies in the materials shipped with a replacement CSR part whether a defective part must be returned to HP. In cases where it is required to return the defective part to HP, you must ship the defective part back to HP within a defined period of time, normally five (5) business days. The defective part must be returned with the associated documentation in the provided shipping material. Failure to return the defective part may result in HP billing you for the replacement. With a customer self repair, HP will pay all shipping and part return costs and determine the courier/carrier to be used.

Print cartridge limited warranty statement

This HP product is warranted to be free from defects in materials and workmanship.

This warranty does not apply to products that (a) have been refilled, refurbished, remanufactured or tampered with in any way, (b) experience problems resulting from misuse, improper storage, or operation outside of the published environmental specifications for the device product or (c) exhibit wear from ordinary use.

To obtain warranty service, please return the product to place of purchase (with a written description of the problem and print samples) or contact HP customer support. At HP's option, HP will either replace products that prove to be defective or refund your purchase price.

TO THE EXTENT ALLOWED BY LOCAL LAW, THE ABOVE WARRANTY IS EXCLUSIVE AND NO OTHER WARRANTY OR CONDITION, WHETHER WRITTEN OR ORAL, IS EXPRESSED OR IMPLIED AND HP SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, AND FITNESS FOR A PARTICULAR PURPOSE.

TO THE EXTENT ALLOWED BY LOCAL LAW, IN NO EVENT WILL HP OR ITS SUPPLIERS BE LIABLE FOR DIRECT, SPECIAL, INCIDENTAL, CONSEQUENTIAL (INCLUDING LOST PROFIT OR DATA), OR OTHER DAMAGE, WHETHER BASED IN CONTRACT, TORT, OR OTHERWISE.

THE WARRANTY TERMS CONTAINED IN THIS STATEMENT, EXCEPT TO THE EXTENT
LAWFULLY PERMITTED, DO NOT EXCLUDE, RESTRICT OR MODIFY AND ARE IN ADDITION TO
THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE SALE OF THIS PRODUCT TO YOU.

HP Customer Care

Online Services

For 24-hour access to updated HP device-specific software, product information, and support information through an Internet connection, go to the Web site: www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp.

Go to www.hp.com/support/net_printing for information about the HP Jetdirect external print server.

HP Instant Support Professional Edition (ISPE) is a suite of Web-based troubleshooting tools for desktop computing and printing products. Go to instantsupport.hp.com.

Telephone support

HP provides free telephone support during the warranty period. For the telephone number for your country/region, see the flyer that shipped with the device, or visit www.hp.com/support/. Before calling HP, have the following information ready: the product name and serial number, the date of purchase, and a description of the problem.

Software utilities, drivers, and electronic information

www.hp.com/go/LJM3027mfp_software or www.hp.com/go/LJM3035mfp_software

The Web page for the drivers is in English, but you can download the drivers themselves in several languages.

HP direct ordering for accessories or supplies

- United States: www.hp.com/sbso/product/supplies.
- Canada: www.hp.ca/catalog/supplies
- Europe: www.hp.com/supplies
- Asia-Pacific: www.hp.com/paper/

To order genuine HP parts or accessories, go to the HP Parts Store at www.hp.com/buy/parts (U.S. and Canada only), or call 1-800-538-8787 (U.S.) or 1-800-387-3154 (Canada).

HP service information

To locate HP-Authorized Dealers, call 1-800-243-9816 (U.S.) or 1-800-387-3867 (Canada).

Outside the United States and Canada, call the customer support number for your country/region. See the flyer that shipped in the box with the device.

HP service agreements

Call 1-800-HPINVENT (1-800-474-6836 (U.S.)) or 1-800-268-1221 (Canada). Or, go to the HP SupportPack and Carepaq™ Services Web site at www.hpexpress-services.com/10467a.

For extended service, call 1-800-446-0522.

HP Easy Printer Care software

To check the device status and settings and view troubleshooting information and online documentation, use the HP Easy Printer Care software. You must have performed a full software installation in order to use the HP Easy Printer Care software. See [Use the embedded Web server on page 49](#).

HP support and information for Macintosh computers

Go to www.hp.com/go/macosex for Macintosh OS X support information and HP subscription service for driver updates.

Go to www.hp.com/go/mac-connect for products that are designed specifically for the Macintosh user.

HP maintenance agreements

HP has several types of maintenance agreements that meet a wide range of support needs. Maintenance agreements are not part of the standard warranty. Support services may vary by area. Check with your local HP dealer to determine the services available to you.

On-site service agreements

To provide you with the level of support best suited to your needs, HP has on-site service agreements with a selection of response times.

Next-day on-site service

This agreement provides support by the next working day following a service request. Extended coverage hours and extended travel beyond HP's designated service zones are available on most on-site agreements (for additional charges).

Weekly (volume) on-site service

This agreement provides scheduled weekly on-site visits for organizations with many HP products. This agreement is designated for sites using 25 or more workstation products, including devices, plotters, computers, and disk drives.

Repacking the device

If HP Customer Care determines that your device needs to be returned to HP for repair, follow the steps below to repack the device before shipping it.

CAUTION Shipping damage as a result of inadequate packing is the customer's responsibility.

To repack the device

1. Remove and retain any DIMMs cards that you have purchased and installed in the device. Do not remove the DIMM that came with the device.

CAUTION Static electricity can damage DIMMs. When handling DIMMs, either wear an antistatic wrist strap, or frequently touch the surface of the DIMM antistatic package and then touch bare metal on the device. To remove the DIMMs, see [Install memory on page 30](#).

2. Remove and retain the print cartridge.

CAUTION It is *extremely important* to remove the print cartridge before shipping the device. A print cartridge that remains in the device during shipping will leak and entirely cover the device engine and other parts with toner.

To prevent damage to the print cartridge, avoid touching the roller on it, and store the print cartridge in its original packing material or so that it is not exposed to light.

3. Remove and retain the power cable, interface cable, and optional accessories.

4. If possible, include print samples and 50 to 100 sheets of paper or other print media that did not print correctly.
5. In the U.S., call HP Customer Care to request new packing material. In other areas, use the original packing material, if possible. Hewlett-Packard recommends insuring the equipment for shipment.

Extended warranty

HP Support provides coverage for the HP hardware product and all HP-supplied internal components. The hardware maintenance covers a 1- to 3-year period from date of the HP product purchase. The customer must purchase HP Support within the stated factory warranty. For more information, contact the HP Customer Care Service and Support group.

Printer model	Height	Depth	Width
HP LaserJet M3027, M3027x, and M3035 MFPs	870 mm (34.3 in)	978 mm (38.4 in)	464 mm (19.3 in)
HP LaserJet M3035xs MFP	1,010 mm (39.8 in)		

Electrical specifications

WARNING! Power requirements are based on the country/region where the device is sold. Do not convert operating voltages. This can damage the device and void the product warranty.

Table C-3 Power requirements

Specification	110-volt models	220-volt models
Power requirements	100 to 127 volts (± 10%)	220 to 240 volts (± 10%)
	50/60 Hz (± 2 Hz)	50/60 Hz (± 2 Hz)
Rated current	7.5 Amps	4.5 Amps

Table C-4 Power consumption (average, in watts)¹

Printer model	Printing ²	Ready ^{3,4}	Sleep ⁵	Off
HP LaserJet M3027	625 W ⁶	11 W	8.5 W	0.4 W
HP LaserJet M3027x	625 W ⁶	11 W	8.5 W	0.4 W
HP LaserJet M3035	625 W ⁶	11 W	8.5 W	0.4 W
HP LaserJet M3035xs	625 W ⁶	11 W	8.5 W	0.4 W

¹ Values subject to change. See www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp for current information.

² Power numbers are the highest values measured using all standard voltages.

³ Default time from Ready mode to Sleep = 30 minutes.

⁴ Heat dissipation in Ready mode = 37.5 BTU/hour.

⁵ Recovery time from Sleep to start of printing = less than 8.5 seconds.

⁶ Print speed is 27 or 35 ppm.

Acoustic emissions

Table C-5 Sound power and pressure level^{1,2}

Sound power level	Declared per ISO 9296
Printing ³	$L_{WA_d} = 6.5$ Bels (A) [65 dB(A)]
Ready	Essentially Inaudible
Sound pressure level	Declared per ISO 9296
Printing ³	$L_{pAm} = 56$ dB (A)
Ready	Essentially Inaudible

¹ Values subject to change. See www.hp.com/support/LJM3027mfp or www.hp.com/support/LJM3035mfp for current information.

² Configuration tested: base printer, simplex printing with A4 paper size.

³ Print speed is 27 or 35 ppm.

Operating environment

Table C-6 Necessary conditions

Environmental condition	Printing	Storage/standby
Temperature (printer and print cartridge)	15° to 32.5°C (59° to 89°F)	0° to 40°C (32° to 104°F)
Relative humidity	10% to 80%	0% to 95%

D Regulatory information

This section contains the following regulatory information:

- [FCC regulations](#)
- [Environmental product stewardship program](#)
- [Telecom statement](#)
- [Declaration of conformity](#)
- [Safety statements](#)

FCC regulations

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy. If this equipment is not installed and used in accordance with the instructions, it may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase separation between equipment and receiver.
- Connect equipment to an outlet on a circuit different from that to which the receiver is located.
- Consult your dealer or an experienced radio/TV technician.

NOTE Any changes or modifications to the printer that are not expressly approved by HP could void the user's authority to operate this equipment.

Use of a shielded interface cable is required to comply with the Class B limits of Part 15 of FCC rules.

Environmental product stewardship program

Protecting the environment

Hewlett-Packard Company is committed to providing quality products in an environmentally sound manner. This product has been designed with several attributes to minimize impacts on our environment.

Ozone production

This product generates no appreciable ozone gas (O₃).

Power consumption

Power usage drops significantly while in Ready and Sleep modes, which saves natural resources and saves money without affecting the high performance of this product. This product qualifies for ENERGY STAR® (Version 3.0), which is a voluntary program to encourage the development of energy-efficient office products.

ENERGY STAR® and the ENERGY STAR mark are U.S. registered marks. As an ENERGY STAR partner, Hewlett-Packard Company has determined that this product meets ENERGY STAR Guidelines for energy efficiency. For more information, see www.energystar.gov.

Toner consumption

Economode uses significantly less toner, which might extend the life of the print cartridge.

Paper use

This device's manual/optional automatic duplex feature (two-sided printing) and N-up printing (multiple pages printed on one page) capability can reduce paper usage and the resulting demands on natural resources.

Plastics

Plastic parts over 25 grams are marked according to international standards that enhance the ability to identify plastics for recycling purposes at the end of the product's life.

HP LaserJet print supplies

It's easy to return and recycle your empty HP LaserJet print cartridges—free of charge—with HP Planet Partners. HP is committed to providing inventive, high-quality products and services that are environmentally sound, from product design and manufacturing to distribution, operation and recycling processes. We ensure your returned HP LaserJet print cartridges are recycled properly, processing them to recover valuable plastics and metals for new products and diverting millions of tons of waste from landfills. Since this cartridge is being recycled and used in new materials, it will not be returned to

you. Your empty HP LaserJet print cartridges are recycled responsibly when you participate in the HP Planet Partners program. Thank you for being environmentally responsible!

In many countries/regions, this product's printing supplies (for example, print cartridges) can be returned to HP through the HP Printing Supplies Returns and Recycling Program. An easy-to-use and free take back program is available in more than 35 countries/regions. Multilingual program information and instructions are included in every new HP LaserJet print cartridge and supplies package.

HP print supplies returns and recycling program information

Since 1992, HP has offered HP LaserJet supplies return and recycling free of charge. In 2004, HP Planet Partners for LaserJet Supplies was available in 85% of the world market where HP LaserJet supplies are sold. Postage-paid and pre-addressed labels are included within the instruction guide in most HP LaserJet print cartridge boxes. Labels and bulk boxes are also available through the Web site: www.hp.com/recycle.

Use the label to return empty, original HP LaserJet print cartridges only. Please do not use this label for non-HP cartridges, refilled or remanufactured cartridges, or warranty returns. Printing supplies or other objects inadvertently sent to the HP Planet Partners program cannot be returned.

More than 10 million HP LaserJet print cartridges were recycled globally in 2004 through the HP Planet Partners supplies recycling program. This record number represents 26 million pounds of print cartridge materials diverted from landfills. Worldwide, in 2004, HP recycled an average of 59% of the print cartridge by weight consisting primarily of plastic and metals. Plastics and metals are used to make new products such as HP products, plastic trays, and spools. The remaining materials are disposed of in an environmentally responsible manner.

- **U.S. returns.** For a more environmentally responsible return of used cartridges and supplies, HP encourages the use of bulk returns. Simply bundle two or more cartridges together and use the single, pre-paid, pre-addressed UPS label that is supplied in the package. For more information in the U.S., call 1-800-340-2445 or visit the HP Web site at www.hp.com/recycle.
- **Non-U.S. returns.** Non-U.S. customers should visit the www.hp.com/recycle Web site for further information regarding availability of the HP Supplies Returns and Recycling Program.

Paper

This product is capable of using recycled papers when the paper meets the guidelines outlined in the *HP LaserJet Printer Family Print Media Guide*. This product is suitable for the use of recycled paper according to EN12281:2002.

Material restrictions

This HP product does not contain added mercury.

This HP product contains a battery that might require special handling at end-of-life. The batteries contained in or supplied by Hewlett-Packard for this product include the following:

HP LaserJet M3027/M3035 device	
Type	Carbon monofluoride lithium battery BR1632
Weight	1.5 g
Location	On formatter board
User-removable	No

廢電池請回收

For recycling information, you can go to www.hp.com/recycle, or contact your local authorities or the Electronics Industries Alliance: www.eiae.org.

Disposal of waste equipment by users in private households in the European Union

This symbol on the product or on its packaging indicates that this product must not be disposed of with your other household waste. Instead, it is your responsibility to dispose of your waste equipment by handing it over to a designated collection point for the recycling of waste electrical and electronic equipment. The separate collection and recycling of your waste equipment at the time of disposal will help to conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

Material Safety Data Sheet (MSDS)

Material Safety Data Sheets (MSDS) for supplies containing chemical substances (for example, toner) can be obtained by contacting the HP Web site at www.hp.com/go/msds or www.hp.com/hpinfo/community/environment/productinfo/safety.

For more information

To obtain information about these environmental topics:

- Product environmental profile sheet for this and many related HP products
- HP's commitment to the environment
- HP's environmental management system
- HP's end-of-life product return and recycling program
- Material Safety Data Sheets

Visit <http://www.hp.com/go/environment> or <http://www.hp.com/hpinfo/community/environment/productinfo/safety>.

Telecom statement

The HP LaserJet M3027x and HP LaserJet M3035xs models have the HP LaserJet Analog Fax Accessory 300 already installed to provide communication to the public switch telephone network (PSTN) for fax functionality. See the *HP LaserJet Analog Fax Accessory 300 User Guide* for all regulatory approval information and regulatory notices associated with the fax functionality and that device.

Declaration of conformity

Declaration of Conformity

according to ISO/IEC Guide 22 and EN 45014

Manufacturer's Name: Hewlett-Packard Company
Manufacturer's Address: 11311 Chinden Boulevard,
Boise, Idaho 83714-1021, USA

declares, that the product

Product Name: HP LaserJet M3027 / M3035 Series
Accessories⁵⁾: Q7817A – Optional 1x500 Sheet Tray
BOISB-0308-00 – Fax module
Regulatory Model Number³⁾: BOISB-0406-01
Product Options: ALL
Print Cartridge: Q7551A, Q7551X

conforms to the following Product Specifications:

Safety: IEC 60950-1:2001 / EN60950-1: 2001 +A11
IEC 60825-1:1993 +A1 +A2 / EN 60825-1:1994 +A1 +A2 (Class 1 Laser/LED Product)
GB4943-2001

Safety statements

Laser safety

The Center for Devices and Radiological Health (CDRH) of the U.S. Food and Drug Administration has implemented regulations for laser products manufactured since August 1, 1976. Compliance is mandatory for products marketed in the United States. The device is certified as a "Class 1" laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. Since radiation emitted inside the device is completely confined within protective housings and external covers, the laser beam cannot escape during any phase of normal user operation.

WARNING! Using controls, making adjustments, or performing procedures other than those specified in this user guide may result in exposure to hazardous radiation.

Canadian DOC regulations

Complies with Canadian EMC Class B requirements.

« Conforme à la classe B des normes canadiennes de compatibilité électromagnétiques. « CEM ». »

Luokan 1 laserlaite

Klass 1 Laser Apparat

HP LaserJet M3027, M3027x, M3035, M3035xs, laserkirjoitin on käyttäjän kannalta turvallinen luokan 1 laserlaite. Normaalisissa käytössä kirjoittimen suojakoteloointi estää lasersäteiden pääsyn laitteen ulkopuolelle. Laitteen turvallisuusluokka on määritetty standardin EN 60825-1 (1994) mukaisesti.

VAROITUS !

Laitteen käyttäminen muulla kuin käyttöohjeessa mainitulla tavalla saattaa altistaa käyttäjän turvallisuusluokan 1 ylittävälle näkymättömälle lasersäteilylle.

WARNING !

Om apparaten används på annat sätt än i bruksanvisning specificerats, kan användaren utsättas för osynlig laserstrålning, som överskrider gränsen för laserklass 1.

HUOLTO

HP LaserJet M3027, M3027x, M3035, M3035xs - kirjoittimen sisällä ei ole käyttäjän huollettavissa olevia kohteita. Laitteen saa avata ja huoltaa ainoastaan sen huoltamiseen koulutettu henkilö. Tällaiseksi huoltotoimenpiteeksi ei katsota väriainekasetin vaihtamista, paperiradan puhdistusta tai muita käyttäjän käsikirjassa lueteltuja, käyttäjän tehtäväksi tarkoitettuja ylläpitotoimia, jotka voidaan suorittaa ilman erikoistyökaluja.

VARO !

Mikäli kirjoittimen suojakotelo avataan, olet alttiina näkymättömälle lasersäteilylle laitteen ollessa toiminnassa. Älä katso säteeseen.

WARNING !

Om laserprinterns skyddshölje öppnas då apparaten är i funktion, utsättas användaren för osynlig laserstrålning. Betrakta ej strålen. Tiedot laitteessa käytettävän laserdiodin säteilyominaisuuksista: Aallonpituus 775-795 nm Teho 5 m W Luokan 3B laser.

E Working with memory and print server cards

This section explains the device memory features and provides steps for expansion.

- [Overview](#)

Overview

One dual inline memory module (DIMM) slot is available for upgrading the device with the following items:

- More memory—DIMMs are available in 64, 128, 256, and 512 MB.
- Other DIMM-based printer languages and printer options.

The device uses 100-pin 133 MHz DDR memory modules. Extended data output (EDO) DIMMs are not supported.

For ordering information, see [Order parts, accessories, and supplies on page 314](#).

NOTE Single inline memory modules (SIMMs) used in previous HP LaserJet printers are not compatible with the device.

The device also has one EIO slot for expanding the device networking capabilities. The EIO slot can be used to upgrade the device with an additional network connection, such as a wireless print server, network card, or a connectivity card for a serial or AppleTalk connection.

To find out how much memory is installed in the device, or to find out what is installed in the EIO slots, print a configuration page. See [Use information pages on page 45](#).

NOTE If memory problems occur when you are printing complex graphics, you can make more memory available by removing downloaded fonts, style sheets, and macros from device memory. Reducing the complexity of a print job from within a program can help avoid memory problems.

Glossary

bidirectional communication Two-way data transmission.

bin A receptacle for holding printed pages.

BOOTP Abbreviation for “Bootstrap Protocol,” an Internet protocol that a computer uses to find its IP address.

calibration The process in which the printer makes internal adjustments to produce the best print quality.

chooser A Macintosh accessory that you use to select a device.

control panel The area on the printer that contains buttons and a display screen. Use the control panel to set printer settings and to get information about the printer status.

default The normal or standard setting for hardware or software.

DHCP Abbreviation for “dynamic host configuration protocol.” Individual computers or peripherals that are connected to a network use DHCP to find their own configuration information, including the IP address.

DIMM Abbreviation for “dual inline memory module.” A small circuit board that holds memory chips.

duplex A feature that accommodates printing on both sides of a sheet of paper. Also called “two-sided printing.”

EIO Abbreviation for “enhanced input/output.” A hardware interface that is used to add a print server, network adaptor, hard disk, or other plug-in item for HP printers.

Emulated PostScript Software that emulates Adobe PostScript, a programming language that describes the appearance of the printed page. This printer language appears as “PS” in many menus.

firmware Programming instructions that are stored in a read-only memory unit inside the printer.

font A complete set of letters, numerals, and symbols in a typeface.

fuser The assembly that uses heat to fuse the toner onto the print media.

grayscale Various shades of gray.

halftone pattern A halftone pattern uses differing sizes of ink dots to produce a continuous-tone image such as a photograph.

HP Easy Printer Care software Software that provides the ability to track and maintain printers from your computer desktop.

HP Jetdirect An HP product for network printing.

HP Web Jetadmin An HP-trademarked Web-based printer control software that you can use on a computer to manage any peripheral that is connected to an HP Jetdirect print server.

I/O Abbreviation for “input/output,” refers to computer-port settings.

IP address The unique number assigned to a computer device that is connected to a network.

IPX/SPX Abbreviation for “internetwork packet exchange/sequenced packet exchange.”

media The paper, labels, transparencies, or other material on which the printer prints the image.

memory tag A memory partition that has a specific address.

monochrome Black and white. Devoid of color.

network A system of computers interconnected by telephone wires or other means in order to share information.

network administrator A person who manages a network.

page buffer Temporary printer memory used to hold page data while the printer creates an image of the page.

PCL Abbreviation for “Printer Control Language.”

peripheral An auxiliary device, such as a printer, modem, or storage system, that works in conjunction with a computer.

personality Distinctive features or characteristics of a printer or printer language.

pixel Abbreviation for “picture element,” the smallest unit of area in an image displayed on a screen.

PJL Abbreviation for “printer job language.”

PostScript A trademarked page-description language.

PPD Abbreviation for “PostScript printer description.”

printer driver A software program that a computer uses to gain access to printer features.

RAM Abbreviation for “random access memory,” a type of computer memory that stores data that can change.

raster image An image composed of dots.

render The process of producing text or graphics.

ROM Abbreviation for “read-only memory,” a type of computer memory that stores data that should not change.

supplies Materials that the printer uses and that must be replaced. The supply item for this printer is the print cartridge.

TCP/IP An internet protocol that has become the global standard for communications.

toner The fine black or colored powder that forms the image on the printed media.

transfer unit The black plastic belt that transports media inside the printer and transfers toner from the print cartridge onto the media.

tray The receptacle that holds blank media.
