Compact & Portable

MiniCrane M1 (Giraffe)

Maximum Radius	120cm	Max. Load	5kg
Extended Length	200cm ± 5cm	Weight	1.52kg ± 0.03kg
Tilt Length	210cm	Tube Diameter	30mm
Material	Anodized Aluminum+ SUS304+Carbon fiber	Folded Length	75cm ± 5cm

Contains: Main Section,Rear Section,Section Joint, Counter Weight Clamp, Clamp Lever,Hand Grip, Hook, Hex Keys, Bag, 3/8 Adapter.

Durable & lightweight

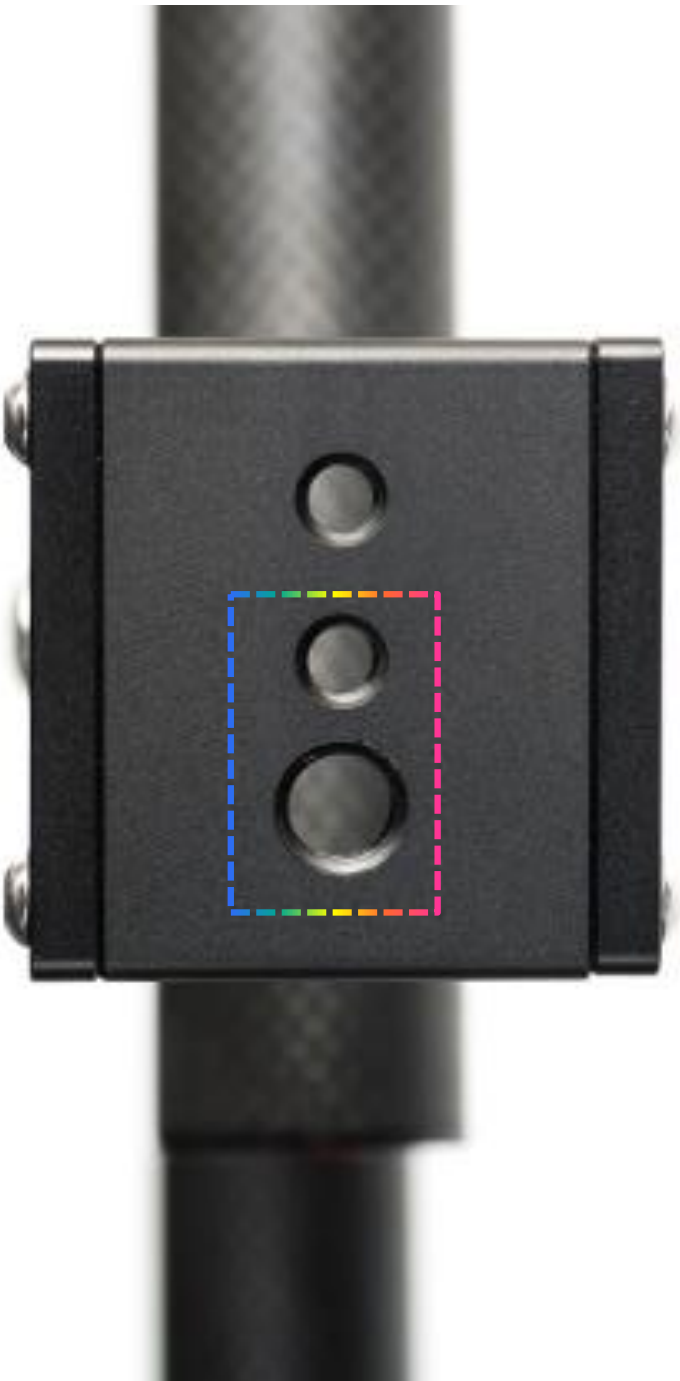

**100% Strong 6x Layers Carbon Fiber
Sections: light, firm ,waterproof ,heat-
resistant.**

**Precise CNC machined provide
strong support and high
quality anodized black finish
increase durability.**

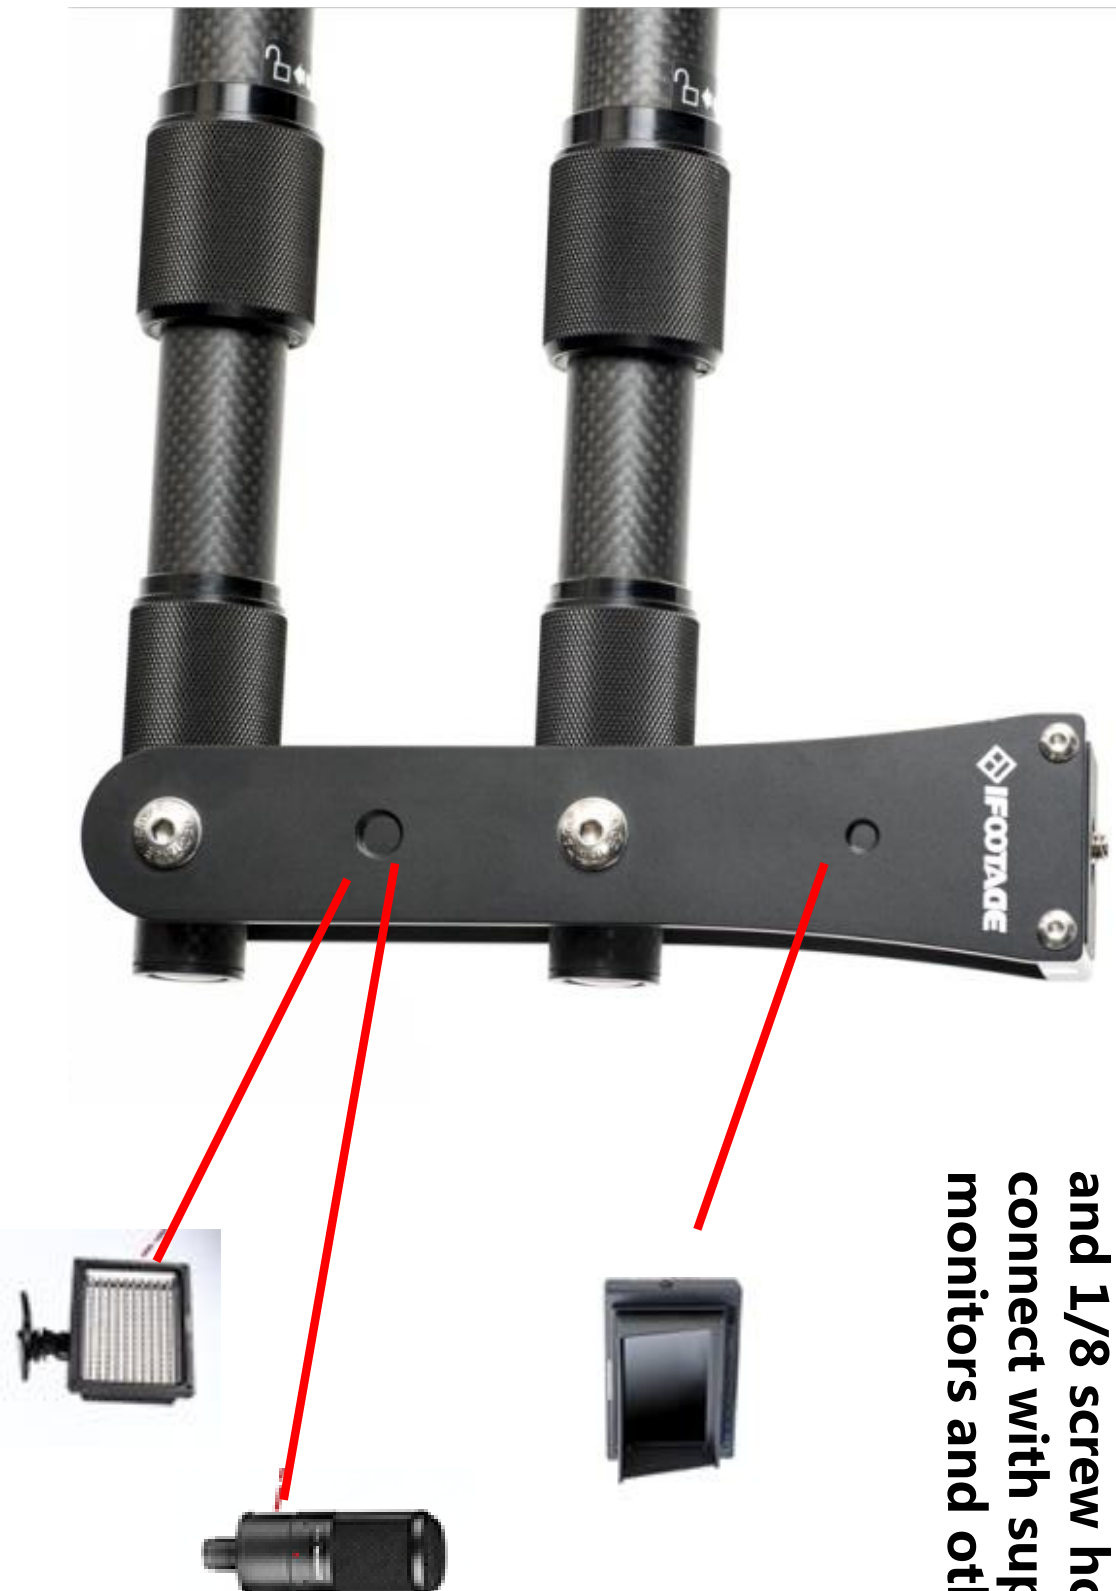

Universal Mounting

The base contains 1/4 and 3/8 threaded holes for a variety of mounting options.

Monitor mounting

Side plates contain 1/4 screw and 1/8 screw holes that can connect with support hands, monitors and other accessories.

Stability

On the top equipped with non-slip mat, it can prevent your devices from falling ,so you can completely concentrate on shooting.

High quality material

All the screws are made from SUS stainless steel which is corrosion and oxidation resistant.

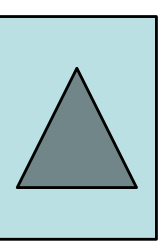

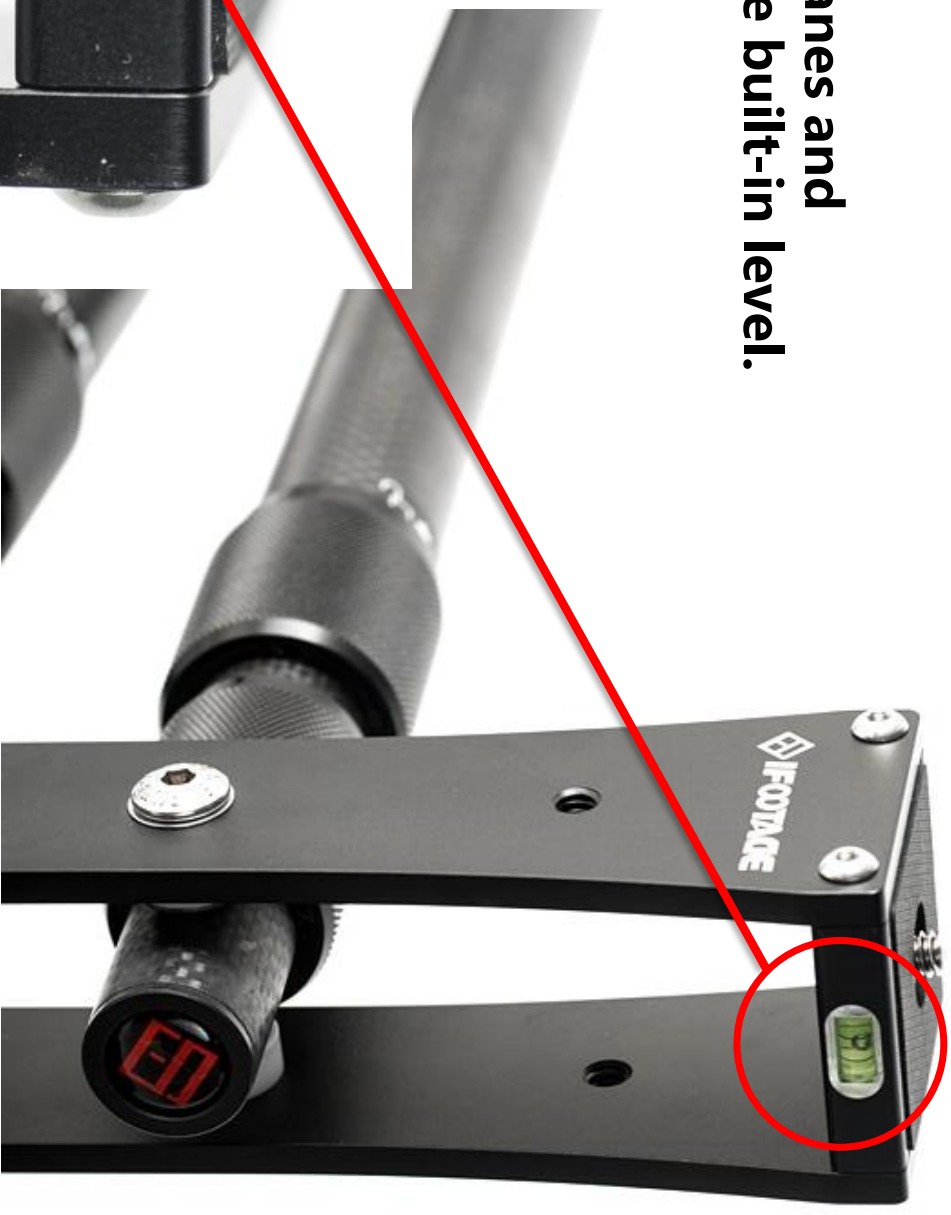

Attention to detail

At the end it adopts a knob design, which is for quick manipulations.

Built-in Level

Quickly balance the mini cranes and cameras with the help of the built-in level.

Comparison

Compared with cheap copies:

1. Abrasion resistant, useful life is 3~5 times longer than the copies.
2. We can know from two pictures that the copied one is bended, and its' weight capacity is apparently lower.
3. All the screws are made from SUS stainless steel, every process is under strict control, the size tolerance is $\pm 0.05\text{mm}$. The copies apply stainless iron.

IFotage mini crane

A cheap copy

Tube

Compared with cheap copies :

1. Materials adopt 100% strong 6 layers imported carbon fiber.
2. To protect the expensive equipment, our tube is double-thickened that make it stronger than ordinary ones.
3. Compared with ordinary tubes, iFootage mini crane has the advantages of light, heat and corrosion resistant, and waterproof.

Comparison

Tail tube

Compared with copied crane:

- 1、 The tail tube adopts a brand new knob design, is more humanize and convenient to operate.
- 2、 Precise CNC machined technology plays a perfect role of metal toughness and mechanic property, thus the tail tube has stronger abrasion and corrosion resistance.

Comparison

Metallic Craft

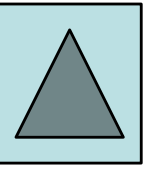

1. CNC machined ensure the mini crane doesn't rust under severe environment, meanwhile it is waterproof and antifriction.
2. The aluminum plate adopts anodizing aircraft grade aluminum, it can improve the product's hardness and abrasion resistance.
