1

Raise your desktop unit halfway (approximately 14 inches high). Choose the grommet hole in which you want to mount the monitor arm assembly in. Remove the grommet plug and cover.
2

Use the appropriate size VESA mounting screw for your monitor and small stainless steel spacer to attach the monitor adapter.
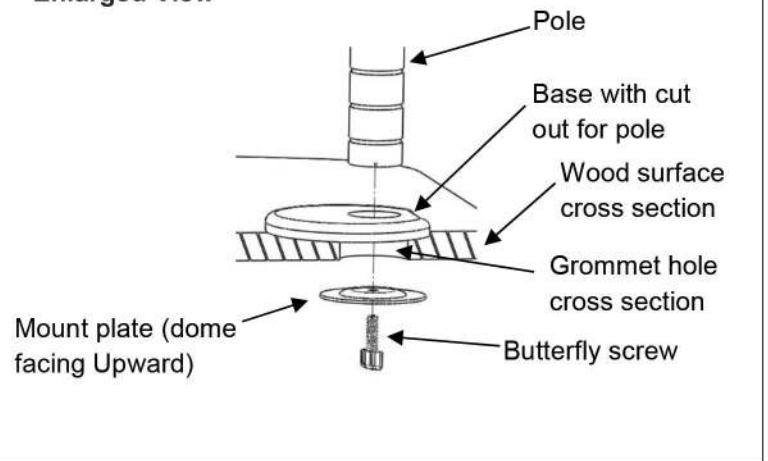

3

Unscrew the butterfly screw from the base and pole. Next, attach the base and pole onto the wood surface grommet hole using the mount plate and butterfly screw. Make sure the dome on the mount plate is facing upward. Firmly hand-tighten the butterfly screw to give the pole stability.

Single Monitor Arm Assembly

Carefully set the monitor arm larger hole only the pole. After adjusting by pushing the height adjustment plastic clip into the nearest groove on the pole.

### Dual Monitor Arm Assembly

Carefully set the dual attachment mount onto the pole. Insert the dual attachent T-knob screw to the pertinent threaded hold in the back and tighten it to adjust the height.
Locate ¼-20 set screw on the side of dual attachment and tighten it using 1/8 Hex Allen key.

Turn Clockwise to tighten the set Screw

5

Place the plastic bushing in the monitor arms other end. Make sure the rectangular tabs and slots line up. Set the monitor adaptor over the plastic bushing onto the monitor arm, or dual monitor attachment for dual mounting. Use the monitor adaptor thumb-screw to secure the monitor adaptor. After the final adjustments, tighten the monitor thumb screw with a wrench to maintain the adjustments.
6

To use the wire management clips located under the monitor arm, simply open the clips and push the wires inside the clips.
7

How to adjust the monitors to the desired position.

Single

Dual

8

Locate the 2 hex key screws under the vesa bracket. To adjust the angle of the monitor, use the 4mm Hex key and turn counter clockwise to loosen both screws. DO NOT loosen the screws all the way out. After reaching the desirable angle, turn the hex key Clockwise to tighten the both screws.
