

FIDELITY MUTUAL FUND PERFORMANCE

Quarter ending June 30, 2014

▶ Get Mutual Fund Performance Online

Looking to get mutual fund performance closer to the quarter end?

Visit Fidelity.com/fidelityfundperformance.

This performance data represents past performance, which is no guarantee of future results. Investment return and principal value of an investment or 529 plan will fluctuate; therefore, you may have a gain or loss when you sell your shares or units. Current performance may be higher or lower than the performance data quoted. Please visit Fidelity.com/performance, Fidelity.com/college, or call Fidelity for the most recent month-end performance figures.

❖ Retirement account investment minimums are lower for certain Fidelity funds.

Note: State municipal money market funds' yields reflect that a portion of the funds' income was subject to state taxes. Compound Effective Yield assumes reinvested income.

For current annuity fund performance, please visit Fidelity.com/annuityperformance, or review the printed performance report included with your quarterly statement(s). To request a printed report, or to discuss the investment options in your deferred variable or variable income annuity, please contact an Annuity Service Representative at 1-800-634-9361, or your advisor.

FIDELITY MANAGED 529 COLLEGE SAVINGS PLAN PERFORMANCE

Quarter ending June 30, 2014

529 College Savings Plans:²⁰ Each Portfolio invests in underlying mutual funds. "Age-Based Portfolios" are tailored toward the age of the beneficiary. "Static Portfolios" are designed without regard to age. "Individual Fund Portfolios" are designed without regard to age and follow the same investment objective of the underlying mutual fund in which they invest.

Footnotes:

Total returns are historical and include changes in share price and reinvestment of dividends and capital gains. All fund share prices (except for money market funds), investment returns, and yields vary, so you may have a gain or loss when you sell your shares.

Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market, or economic developments.

In general, the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. Unlike individual bonds, most bond funds do not have a maturity date, so avoiding losses caused by price volatility by holding them until maturity is not possible. Lower-quality debt securities generally offer higher yields, but also involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.

The commodities industry can be significantly affected by commodity prices, world events, import controls, worldwide competition, government regulations, and economic conditions.

In general the bond market is volatile, and fixed income securities carry interest rate risk. (As interest rates rise, bond prices usually fall, and vice versa. This effect is usually more pronounced for longer-term securities.) Fixed income securities also carry inflation risk and credit and default risks for both issuers and counterparties. The municipal market is volatile and can be significantly affected by adverse tax, legislative or political changes and the financial condition of the issuers of municipal securities. Unlike individual debt securities, which typically pay principal at maturity, the value of an investment in the fund will fluctuate. As the fund approaches its liquidation date, the funds securities will mature, and the fund may reinvest the proceeds in money market securities with lower yields than the securities previously held by the fund. Although money market funds seek to maintain a stable NAV of a \$1.00 per share, this is not guaranteed and they may in fact lose money. The amount

of the funds income distributions will vary over time, and the breakdown of returns between fund distributions and liquidation proceeds will not be predictable at the time of investment, and you may experience a gain or loss for tax purposes. To fully benefit from the funds' expected decline in price volatility, investors should consider holding the funds to defined end date. Otherwise they may experience more price (NAV) uncertainty. A portion of fund distributions may be subject to state or federal income taxes, AMT, or taxable as capital gains. Principal invested is not guaranteed at any time, including at or after the funds target date. Leverage can increase market exposure and magnify investment risk.

β Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund. The cap is voluntary and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying at that time. The Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return. For more information on expense cap arrangements please refer to the fund's prospectus.

ð Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund. The cap is contractual and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying at that time. Subject to board approval, the Expense Cap may be terminated or revised, which may lower the fund's yield and return. For more information on expense cap arrangements please refer to the fund's prospectus.

✓ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 6/30/15 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

★ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 1/31/2015 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield

and return.

† Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 4/30/2015 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

▲ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 6/30/2015 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

◆ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 9/30/2014 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

■ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 10/31/2014 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

● Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 12/31/2014 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

✘ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 2/28/2015 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.

Footnotes (continued):

- ✿ Expense Cap is a limit that Fidelity has placed on the level of the expenses borne by the fund until 4/30/2015 and indicates the maximum level of expenses (with certain exceptions) that the fund would be paying until that time. After the expiration date, the Expense Cap may be terminated or revised at any time, which may lower the fund's yield and return.
- ◇ The current yield more closely reflects the current earnings of the portfolio, while total return refers to a specific past holding period. 7-day annualized yields are stated for month end. Annualized yields are based on net investment income for the stated periods. Annualized yields are historical, will fluctuate, and are based on the portfolio's total net investment income during the period. If certain expenses had not been voluntarily reimbursed by the portfolio's investment advisor during these periods, annualized yields would have been lower.
- 1 Foreign securities are subject to interest-rate, currency-exchange-rate, economic, and political risks, all of which are magnified in emerging markets. These risks are particularly significant for funds that focus on a single country or region.
- 3 Because of their narrow focus, sector funds may be more volatile than funds that diversify across many sectors.
- 4 Lower-quality debt securities generally offer higher yields, but also involve greater risk of default or price changes due to potential changes in the credit quality of the issuer.
- 5 A portion of these funds' income may be subject to state taxes. New York municipal funds may also be subject to local taxes. A portion of these funds' income may be subject to the federal alternative minimum tax or capital gain taxes.
- 6 Shareholders pay for transactions they make, which will decrease their yields depending on the number they choose to make. Transaction fees will be waived for accounts that maintain a minimum balance of \$50,000.
- 7 Taxable equivalent yield is calculated using a 38.8% effective federal ordinary income tax rate (35% marginal rate plus 3.8% Medicare surtax on net investment income). For 2013, this rate is based on the \$398,351 to \$450,000 (joint) taxable income range. State funds' taxable equivalent yields are based on combined federal and highest applicable state tax rates; taxable equivalent yields for Maryland and New York include county and city taxes.
- 8 Turnover Rates calculated as of the funds'/portfolios' most recent annual/semiannual period.
- 9 Return figure is for the life of fund/portfolio since its inception date.
- 10 Value stocks can perform differently from the market as a whole. They can remain undervalued by the market for long periods of time.
- 11 The securities of smaller, less well-known companies may be more volatile than those of larger companies.
- 12 An investment in a money market fund is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the fund seeks to preserve the value of your investment at \$1.00 per share, it is possible to lose money by investing in the fund. The current yield more closely reflects the current earnings of the fund, while the total return refers to a specific past holding period.
- 13 Expense Ratio is the total annual fund/portfolio operating expense ratio from the fund's/portfolio's most recent prospectus/fact kit. The total annual operating expense ratio for the 529 college savings plan portfolios ("529 portfolios") includes a program administration fee of .09% for Fidelity Index Funds portfolios, .20% for Fidelity Funds portfolios, .35% for Multi-Firm Funds portfolios, and .05-.50% for the Bank Deposit Portfolio. This ratio for the 529 portfolios may be higher or lower depending on the allocation of the portfolio's assets among the underlying mutual funds and the actual expenses of the underlying mutual funds.
- 14 Investments in mid-sized companies may involve greater risks than those in larger, more well-known companies, but may be less volatile than investments in smaller companies.
- 15 Leverage can magnify the impact of adverse issuer, political, regulatory, market or economic developments on a company. Nondiversified funds tend to be more volatile than diversified funds.
- 16 Floating-rate loans generally are subject to restrictions on resale and they sometimes trade infrequently in the secondary market, and as a result may be more difficult to value, buy, or sell. A floating-rate loan might not be fully collateralized, which may cause the floating-rate loan to decline significantly in value.
- 17 Changes in real estate values or economic downturns can have a significant negative effect on issuers in the real estate industry. Nondiversified funds that focus on a relatively small number of stocks tend to be more volatile than diversified funds and the market as a whole.
- 18 Investments in mortgage securities are subject to the risk that principal will be repaid prior to maturity. As a result, when interest rates decline, gains may be reduced, and when interest rates rise, losses may be greater.
- 19 The yield quoted for Inflation-Protected Bond Fund is before adjustment due to the rate of inflation. The actual yield will be a combination of this yield and an inflation adjustment.
- 20 The U.Fund® College Investing Plan, UNIQUE College Investing Plan, Delaware College Investment Plan, and Fidelity Arizona College Savings Plan, are offered by MEFA, the state of New Hampshire, the state of Delaware, and the Arizona Commission for Postsecondary Education, respectively, and managed by Fidelity Investments. If you or the designated beneficiary is not a Massachusetts, New Hampshire, Delaware, or Arizona resident, you may want to consider, before investing, whether your state or the designated beneficiary's home state offers its residents a plan with alternate state tax advantages or other benefits. Units of the portfolios are municipal securities and may be subject to market volatility and fluctuation.
- 21 Initial offering of the Fidelity Advantage® Share Class took place on October 17, 2005. Returns prior to that date are those of the Investor Class and reflect the Investor Class expense ratio. Had the Fidelity Advantage Class expense ratio been reflected, total returns would have been higher.

Footnotes (continued):

- 22 Prior to October 1, 2006, this fund operated under certain different investment policies, and compared its performance to a different benchmark. The fund's historical performance may not represent its current investment policies.
- 23 On October 1, 2006, the fund began comparing its performance to a different benchmark and adjusted its investments.
- 24 Prior to July 1, 1999, Value Strategies operated under certain different investment policies. Accordingly, the fund's historical performance may not represent its current investment policies.
- 25 Prior to September 1, 2000, China Region operated under certain different investment policies. Accordingly, the fund's historical performance may not represent its current investment policies.
- 26 Prior to February 11, 2000, International Capital Appreciation operated under certain different investment policies. Accordingly, the fund's historical performance may not represent its current investment policies.
- 27 Prior to December 29, 2001, Focused Stock operated under certain different investment policies. Accordingly, the fund's historical performance may not represent its current investment policies.
- 28 Prior to October 1, 2004, International Discovery operated under certain different investment policies. Accordingly, the fund's historical performance may not represent its current investment policies.
- 29 Fidelity Floating Rate High Income Fund is a class of Fidelity® Advisor Floating Rate High Income Fund.
- 30 Fidelity Mortgage Securities Fund is a class of Fidelity® Advisor Mortgage Securities Fund.
- 31 Fidelity Value Strategies Fund is a class of Fidelity® Advisor Value Strategies Fund.
- 32 Prior to February 1, 2007, the fund operated under certain different investment policies, and compared its performance to a different benchmark. The fund's historical performance may not represent its current investment policies.
- 33 Performance depends on that of the underlying Fidelity funds. These funds are subject to the volatility of the financial markets in the U.S. and abroad and may be subject to the additional risks associated with investing in high yield, small cap and foreign securities.
- 34 Initial offering of the Fidelity Stock Selector Mid Cap Retail Class took place on June 12, 2012. Returns prior to that date are those of the FA Stock Selector Mid Cap—Class I and reflect the Class I's expense ratio. Had the Fidelity Stock Selector Mid Cap Retail Class expense ratio been reflected, total returns would have been lower.
- 35 An investment in the Money Market Portfolio is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. It is possible to lose money by investing in the Portfolio.
- 36 Although the underlying deposits are eligible for FDIC insurance, subject to applicable federal deposit insurance limits, the Units of the Bank Deposit Portfolio are not insured or guaranteed by the FDIC or any other government agency. You are responsible for monitoring the total amount of your assets on deposit at the depository bank, including amounts held directly at the depository bank. All such deposits held in the same ownership capacity at the depository bank are subject to aggregation and to the current FDIC insurance coverage limitation of \$250,000. Please see a 529 fact kit for more details.
- 37 Prior to July 1, 2010, the fund was named Fidelity Select Environmental Portfolio, operated under certain different investment policies, and compared its performance to a different benchmark. The fund's historical performance may not represent its current investment policies.
- 38 Initial offering of the Fidelity Advantage® Share Class took place on May 4, 2011. Returns prior to that date are those of the Investor Class and reflect the Investors Class' expense ratio. Had the Fidelity Advantage Class' expense ratio been reflected, total returns would have been higher.
- 39 Institutional Class commenced operations on 12/12/2007. Returns prior to that date are those of Class I, the original class of the fund. Had Institutional Class' expenses been reflected during the respective periods, returns would have been higher.
- 40 Prior to June 1, 2011, the fund was named Fidelity Dynamic Strategies Fund. The fund operated under certain different investment policies and compared its performance to a different benchmark. The fund's historical performance may not represent its current investment policies.
- 41 The gold industry can be significantly affected by international monetary and political developments such as currency devaluations or revaluations, central bank movements, economic and social conditions within a country, trade imbalances, or trade or currency restrictions between countries. Fluctuations in the price of gold and precious metals can dramatically affect the profitability of companies in the gold and precious metals sector and can directly affect the value of the securities issued by such companies.
- 42 Yield Without Subsidy is the yield without applicable waivers or reimbursements, whenever Fidelity is subsidizing all or a portion of the fund's expenses as of the current reporting period. Absent such waivers or reimbursements, the returns would have been lower. Waivers and/or reimbursements may be discontinued any time.
- 43 Formerly Fidelity U.S. Treasury Money Market.
- 44 Formerly Fidelity Short-Intermediate Municipal Income.
- 45 Formerly Fidelity California Short-Intermediate Tax-Free Bond.
- 46 Prior to August 1, 2013, the fund was named Fidelity Institutional Short-Intermediate Government, operated under certain different investment policies. The fund's historical performance may not represent its current investment policies.
- 47 Investments in mid-sized companies may involve greater risk than those of larger, more well-known companies, but may be less volatile than investments in smaller companies.

Before investing, consider the fund's, annuity's and its investment options', or 529 plan's investment objectives, risks, charges, and expenses. Contact Fidelity for a prospectus/Fact Kit or, if available, a summary prospectus containing this information. Read it carefully.

This publication does not constitute an offer to sell shares of funds that may not be available in your state. Fidelity Distributors Corporation is not a bank, and fund shares are not backed or guaranteed by any bank or insured by the FDIC.
