## Definitions for Refrigerator and Freezer Product Listing Column Headers

Column Header	Definition
<b>Brand</b>	An identifier assigned by the manufacturer or private labeler to a product or family/series of products for sales and marketing purposes.
<b>Model Number</b>	A distinguishing identifier, usually alphanumeric, assigned to a product by the manufacturer or private labeler.
<b>Additional Model Information</b>	This column includes for the qualified model or family, family members, additional model names, model numbers and other identifying information associated with a product or family/series of products for sales and marketing purposes. Other identifying information includes, but is not limited to, SKUs, UPC codes, retail numbers, and/or descriptions of models included/not included in the reported Model Family.
<b>Configuration</b>	This shows the configuration of the refrigerator. The basic types are: <ul style="list-style-type: none"> <li>* TF: Top Freezer</li> <li>* BF: Bottom Freezer</li> <li>* SS: Side-by-Side</li> <li>* SD: Refrigerator only - single door</li> <li>* SR: Refrigerator/Freezer - single door</li> <li>* UF: Upright Freezer</li> <li>* CF: Chest Freezer</li> </ul>
<b>Defrost Type</b>	This is the type of defrost function. Automatic, manual, and partial automatic are the standard defrost types.
<b>Compact</b>	Designation for refrigerators, refrigerator-freezers, and freezers with a total volume of less than 7.75 cubic feet and 36 inches or less in height.
<b>Through The Door Ice Service</b>	Indicates if the model has the through-the-door ice feature. It does not indicate whether or not the model has an ice maker. Please contact the manufacturer directly to determine if the model has an ice maker.
<b>Total Volume (ft3)</b>	This is the interior volume of the refrigerator. It is the total volume of both the refrigerator and freezer compartments.
<b>Adjusted Volume (ft3)</b>	This is a figure accounting for the fact that freezers require more energy than refrigerators per unit of actual volume, because they are colder.
<b>Annual Energy Use (kWh/year)</b>	This number is the estimated annual energy use in kilowatt hours of the refrigerator or freezer under typical conditions. Your actual energy consumption will vary depending on how you use your refrigerator, such as frequency of opening and closing, surrounding room temperature, and how full the unit is kept. This figure is calculated according to U.S. Department of Energy test procedures.
<b>Federal Standard (kWh/year)</b>	This column shows the maximum energy consumption in kWh/year allowed for a refrigerator or freezer of that particular volume and configuration based on the Federal standard. The National Appliance Energy Conservation Act (NAECA) dictates the Federal standards for energy consumption in refrigerators and freezers. The energy consumption standards vary depending on the size and configuration of the refrigerator.
<b>% Better Than Federal Standard (kWh/year)</b>	This column shows how much less energy the model uses compared to the 2001 NAECA (Federal) standard.  ENERGY STAR qualified refrigerators must use at least 20% less energy than the Federal standard requirements.
<b>Date Available on Market</b>	The date that the model is available for purchase.
<b>Date Qualified</b>	The date on which the product was confirmed to meet the ENERGY STAR specification.
<b>Markets</b>	This list/dataset includes products sold in the U.S. and/or Canada and other ENERGY STAR partner countries.
<b>ENERGY STAR Model Identifier</b>	A unique string of characters used to identify models with the same performance characteristics. This sequence is generated by certification bodies and is reported as a single row of data on the lists of certified products.

## Refrigerators and Freezers Key Product Criteria

Qualified models meet all ENERGY STAR requirements as listed in the Version 4.1 ENERGY STAR Program Requirements for Refrigerators and Freezers that are effective as of April 28, 2008.

Equipment	Volume	Criteria
Full Size Refrigerators	7.75 cubic feet or greater	At least 20% more energy efficient than the minimum federal government standard (NAECA).
Full Size Freezers	7.75 cubic feet or greater	At least 10% more energy efficient than the minimum federal government standard (NAECA).
Compact Refrigerators and Freezers	Less than 7.75 cubic feet and 36 inches or less in height	At least 20% more energy efficient than the minimum federal government standard (NAECA).

On April 28, 2008, the ENERGY STAR criteria changed for all full-size refrigerators. All refrigerators greater than 7.75 cubic feet must be at least 20% more efficient than the federal standard. The ENERGY STAR criteria for full-sized freezers and compact refrigerators and freezers did not change at this time.

On January 1, 2004, the ENERGY STAR criteria for refrigerators changed to require all full-size models to be at least 15% above the minimum federal standard to qualify for ENERGY STAR. Please note, the ENERGY STAR criteria for full-sized freezers and compact refrigerators and freezers did not change at this time.

On January 1, 2003, the ENERGY STAR criteria for refrigerators expanded to include all sizes and configurations of refrigerators and freezers.

\* All refrigerators and freezers 7.75 cubic feet or greater in volume must be at least 10% above the minimum federal standard to qualify for ENERGY STAR.

\* All refrigerators and freezers less than 7.75 cubic feet in volume and 36 inches or less in height had to be at least 20% above the minimum federal standard to qualify for ENERGY STAR.

This expansion allowed the qualification of the previously ineligible products in the following categories:

- \* Chest freezers
- \* Upright freezers
- \* Manual defrost freezers and refrigerators
- \* Partial automatic defrost refrigerators
- \* Single door refrigerators
- \* Compact refrigerators and freezers

### Federal Standards (NAECA)

The National Appliance Energy Conservation Act (NAECA) dictates minimum standards for energy consumption in refrigerators and freezers. The standard varies depending on the size and configuration of the refrigerator or freezer.

Refrigerators and freezers are categorized by:

- \* Configuration (side-by-side, top freezer, bottom freezer, single door refrigerator and freezer, single door refrigerator only, chest freezer, and upright freezer)
- \* Automatic or manual defrost
- \* For refrigerators, whether or not they have through-the-door ice service

Adjusted Volume (AV) for refrigerators is calculated as follows:  $AV = (\text{Fresh Volume}) + 1.63 \times (\text{Freezer Volume})$ .

For freezers, the adjustment factor is 1.73 so the calculation is:  $AV = 1.73 \times \text{Freezer Volume}$ .

Fresh Volume is the total volume of the main refrigerator compartment.

Freezer Volume is the total volume of the freezer compartment.

You may still find refrigerator and freezer models designated as ENERGY STAR at retail that met the previous ENERGY STAR criteria for an extended period of time. If you have recently purchased one of these models, even though these models do not meet the current ENERGY STAR criteria for refrigerators and freezers, you can be confident that the product is highly efficient.

In addition, some of the ENERGY STAR qualified refrigerators and freezers displayed on the Web site were recently introduced into the market and may not be available for purchase in certain areas.
