CLARK REPLACEMENT MODEL: CL450, CL455, CL457

ADDITIONAL PARTS AND WORK REQUIRED:

DRIVELINE: CL450 series transmission case is .50" shorter than 280V series. Driveline may require alterations.

GEAR SHIFT LEVER ASSEMBLY: A new gear shift lever assembly is required. Use 241792 assembly. Lever is 27.5" long. Cut and bend to suit

TRANSMISSION OUTPUT: Output parts such as flanges, speedo meter gears and **most** brake parts are interchangeable.

CLUTCH HOUSING: No Change.

PTO: RIGHT SIDE: P.T.O. will mount to CL450 but requires a new drive gear. (In some cases the entire must be changed) See ratio chart for R.P.M. changes

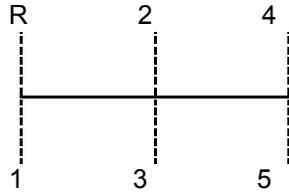

LEFT SIDE: CL450 P.T.O. opening is located forward of the 280V series, which may require driveline alterations. Rotation of the driving gear of the CL450 is ipposite of the 280V series. See ratio chart for R.P.M. changes.

DRIVELINE: CL550 cases are 1" shorter than the 300-380 cases. A change in driveline length may be required.

GEAR SHIFT LEVER ASSEMBLY: Use existing lever or 233083 assembly, bend and cut lever to suit. Units with forward control top can be serviced with CL550 units but shift lever will be 5 to 6 inches to rear of original unit.

TRANSMISSION OUTPUT: Obtain output parts from O.E.M. dealers. If 250011 or 250013 base units are used, output parts can be obtained from G.M. Rear bearing cap with brake 793395, seal 685262, gasket Clark #235653.

CLUTCH HOUSING: Use existing.

PTO: P.T.O. mounting patterns remain the same, however drive gears, speeds, spacers and relative locations will change. In some cases for the entire P.T.O. must be changed. See ratio chart for R.P.M. changes. Units equipped with C/S driven P.T.O. cannot be serviced with CL551/557 unless P.T.O. can be converted to a side mount unit.

Some FS-5205C (C03-11 and C03-13) units were build with electronic speedometer rear bearing covers, with and without a brake, while some were build with mechanical rear bearing covers, also with and without a brake. If your unit is equipped with an electronic speedo, without a brake, simply reconnect your current harness to the sensor supplies in the rear bearing cover of the new unit. If your unit was build with a mechanical speedo rear bearing cover, you must convert your mechanical system to the electronic rear bearing cover system. See below:

Some FS-5205C (C03-14) units were built with electronic speedometer rear bearing covers, with or without a brake, while some were built with mechanical rear bearing covers, also with and without brake. If your current unit is equipped with a mechanical speedo **without** a brake, you must contact your OEM to verify the use of your current speedo drive and driven gear components with your new service unit (C02-12).

If your current unit is equipped with a mechanical speedo **with** a brake, you must utilize the rear bearing cover from your current unit and contact your OEM to verify the use of your current speedo drive and driven gear components with your new service unit (C02-12). See additional required components below:

SHEET NO: 1028D-----
SHEET 2 OF 3

If your current unit was built with an electronic speedo rear bearing cover, you must convert your new unit mechanical system to the electronic rear bearing cover system.
