# **Getting Started: Shipping API**

The Aramex Shipping API (Application Programing Interface) allows your system to communicate directly with our shipping and tracking systems over the internet. Aramex Shipping API provides you with a wide range of functionalities which enables your system and applications to integrate directly with Aramex's systems in an easy and automated way. The APIs are built based on SOAP (Simple Object Access Protocol) and provide a secure channel of communication, as all web calls are made through secured HTTPS.

A SOAP message is an ordinary XML document containing the following elements:

- An Envelope element that identifies the XML document as a SOAP message (required)
- A Header element containing header information (optional)
- A Body element containing call and response information (required)
- A Fault element containing errors and status information (optional)

# **Security Certificate**

To connect securely through HTTPs to our testing website the certificate in the following link will need to be downloaded, a manual is also present through the below link to guide the user through the download and installation of the certificate:

#### http://www.aramex.com/PKI/trust.aspx

This certificate should be imported and trusted on the machine or user account used to connect to our testing website.

### **Testing URL**

http://ws.dev.aramex.net/shippingapi/shipping/service\_1\_0.svc

### Live URL

http://ws.aramex.net/shippingapi/shipping/service\_1\_0.svc

# **Shipping Services API**

### Introduction

This document contains a complete guide on how to use the Shipping Services API, which is one of the main functionalities required by customers to start shipping. The Shipping Services Service is part of the Aramex Shipping API allowing you to create shipments, generate labels, create and cancel pick up requests.

### Features

The Shipping Services API provides these features:

### Security

Two levels of security are provided for each method:

- a) Each submitted request should contain a valid email address and password which are obtained by registering your email address on aramex.com. This is used for authorizing the request.
- b) Each submitted request should contain a valid account number and a valid PIN code. This is used to authenticate and verify the identity of the customer.

### Encryption

By using HTTPS all transmission are insured to be encrypted.

### Simple and easy to use

Creating shipments, requesting pickups and other functionalities are easily generated by providing very basic and simple information about the shipper, consignee and shipments

### Flexibility

- Users can have different means of providing the same information.
- Pickup request can be generated with detailed shipments information, or just a summary about the shipments. Shipments can be added to a pickup request after the request has been created.
- A printing label can be requested within the shipment creation request or as a separate label printing request by simply providing the Airway bill number to print.

### Accuracy and error handling

During the process of shipment or pickup creation, the submitted information such as addresses, payment methods and more, goes through a detailed validation procedure to insure the validity and correctness. In case of errors, detailed descriptive error messages are provided in the generated response.

### **Main Functionalities**

#### **Creating shipments**

Allows you to create shipments, providing a wide range of options for customers to provide full details about their shipments, such as:

- 1. Attaching additional documentation:
  - a) Clients can attach Performa Invoices, clearance forms or any other documentation required.
- 2. Generating a label for the Shipment being created.
- 3. Providing us with sensitive details such as Operations (Handling) instructions.
- 4. Adding Shipments to an existing pickup, given that the pickup is un-assigned or pending details.

#### **Printing labels**

Allows you to generate shipping labels for an existing shipment. Users will be provided with the report ID used to generate the label. Also, different label formats are available for customers to use and the customer can specify which format by providing the report ID in the request.

Two methods are provided for getting and printing the label from the customer side, a URL to download the PDF file, or a data stream that will be provided in the response message.

#### **Creating pickups**

Allows you to create pickups, providing flexible options such as:

1. After a pickup is created, shipments can be added later to it through the Create Shipments function, given that the pickup is un-assigned or pending details.

#### Cancelling pickups

Allows you to cancel an existing pickup, assuming it has not been assigned to a courier or processed by the dispatcher.

# **Using Shipping Services API: How does it Work?**

• The Shipping Services API uses a Web Service Definition Language (WSDL) that can be downloaded at <u>http://www.aramex.com/developers/aramex-apis/42194/Shipping-Services-API</u>, enabling developers to add reference to the web service in their code.

• The user must be registered at <u>http://www.aramex.com</u> with a valid user name and password.

• Sample Codes are available in VB.NET, C# and PHP, downloadable at <a href="http://www.aramex.com/developers/aramex-apis/42194/Shipping-Services-API">http://www.aramex.com/developers/aramex-apis/42194/Shipping-Services-API</a>.

Users are free to use any development tool provided these tools support the WSDL and messages conform to the standards and structure required. However the preferred programming languages for client implementations are:

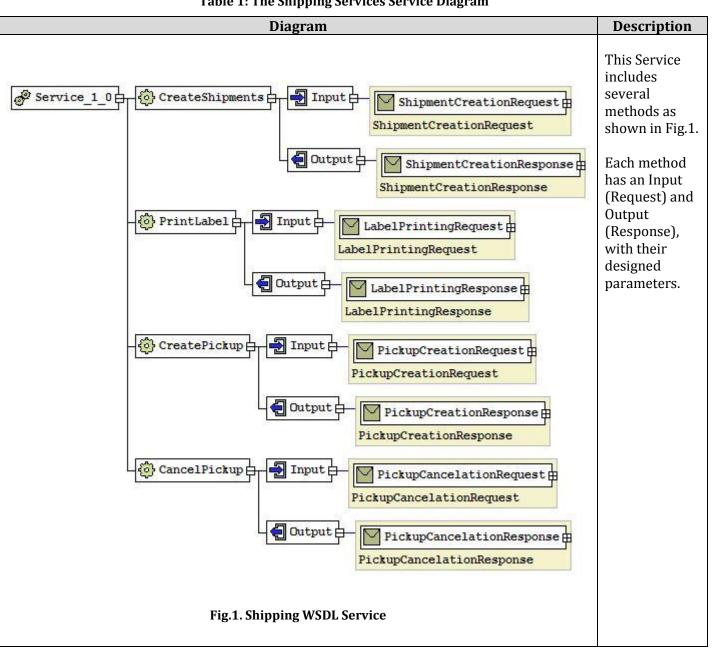

- Visual Basic 2005 (with VB.NET framework 2) or later
- C#
- PHP

# **Xml Structure Diagrams:**

XML request or reply messages have to be constructed like below. The Tables below show the structure, element, child element, semantics as well as the validation conditions in the Shipping Services API XML.

# **Shipping Services Service**

**Table 1: The Shipping Services Service Diagram** 

# 1 Methods

A General outlook on the method diagrams, their overall description and requirements.

### 1.1 Shipment Creation method:

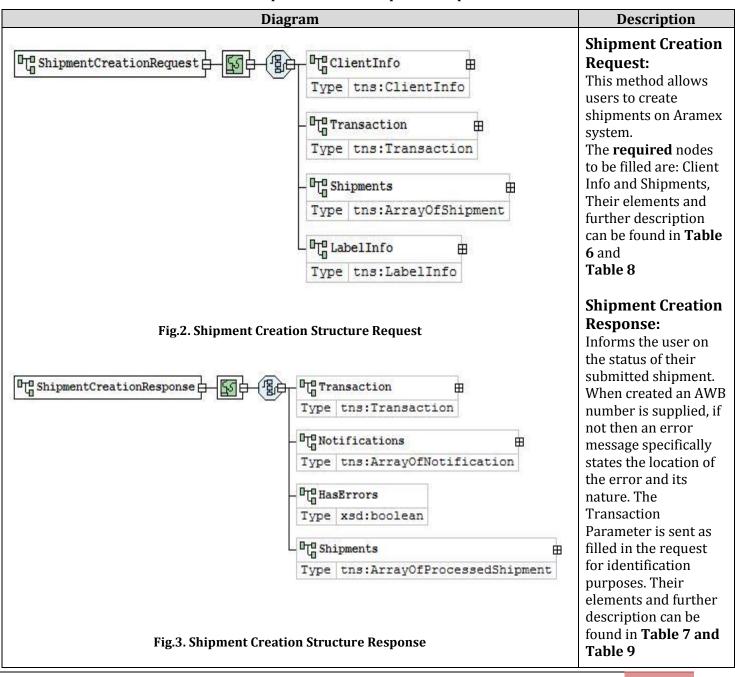

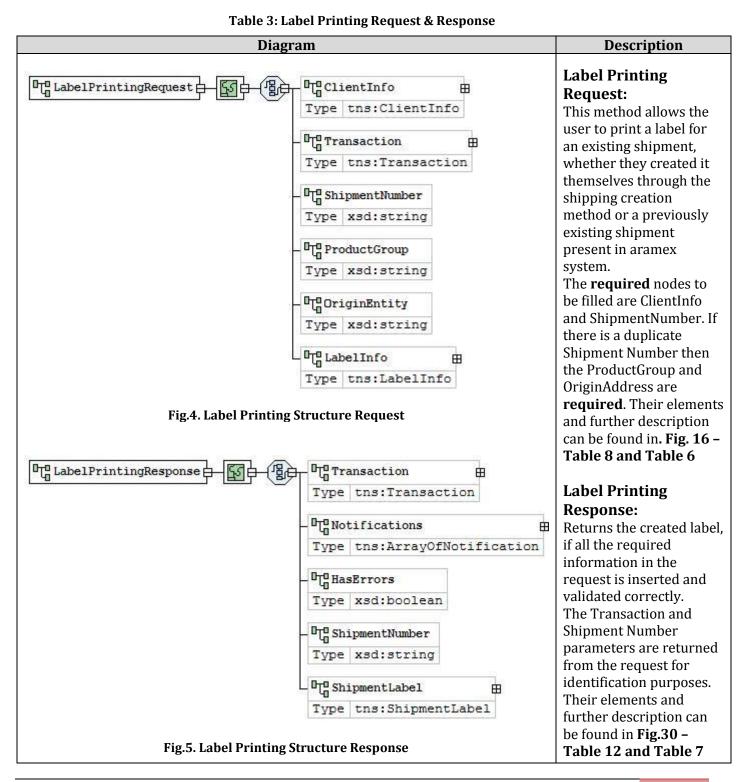

Table 2: Shipment Creation Request & Response

### 1.4 Pickup Cancellation Method

#### **Table 5: Pickup Cancelation Request & Response**

# 2 Elements Data structure

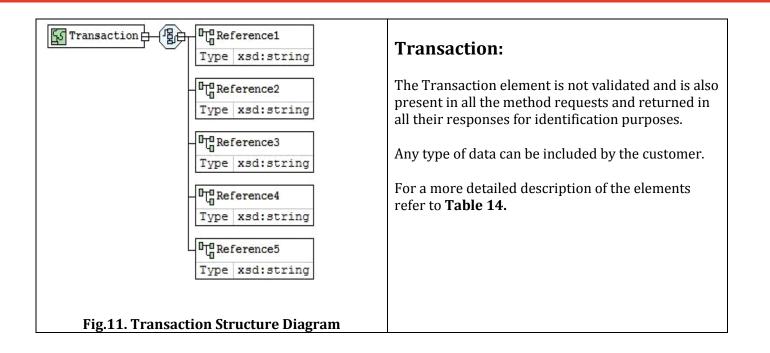

### 2.1 General Request Elements

These elements are present in all the methods of Shipping Services API (shipment creation, printing label, pickup creation and pickup cancellation), in addition to other specified elements.

Diagram	Description	
ClientInfo Type xsd:string Type xsd:string Type xsd:string	<b>Client Info:</b> The Client Info element is present in all the methods of this service. All its child elements are required to be filled.	
- OTO Version Type xsd:string - OTO AccountNumber Type xsd:string - OTO AccountPin Type xsd:string	The user name and password are validated to allow access to the service. Version element, is the Version of the API the customer is using, which needs to be specified in the request	
To AccountEntity         Type       xsd:string         To AccountCountryCode         Type       xsd:string	Account Number, Pin, Entity and Country Code are all needed to verify the users account and obtain vital information from it, such as the ability to create third party shipments among other features provided for each account.	
Fig.10. Client Info Structure Diagram	For a more detailed description of the elements refer to <b>Table 13.</b>	

#### Table 6: General Request Elements - Client Info & Transaction

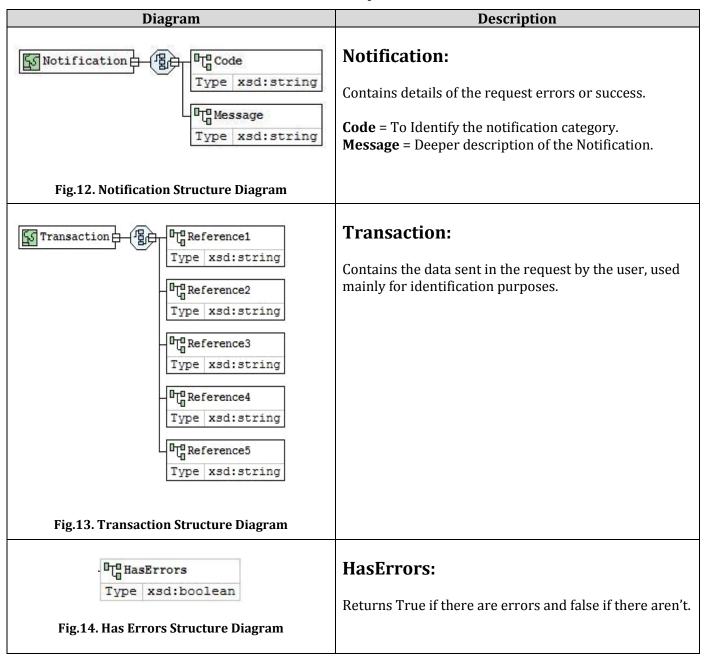

### 2.2 General Response Elements

The Response of any method has three standard elements (notification, transaction, HasErrors)

#### **Table 7: General Response Elements**

### 2.3 Shipment Creation Elements

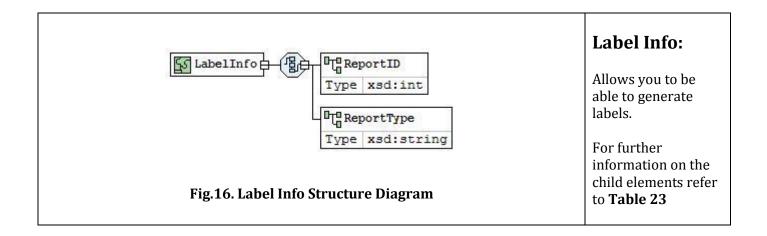

The request and response elements of the Shipment Creation method are described in the tables below:

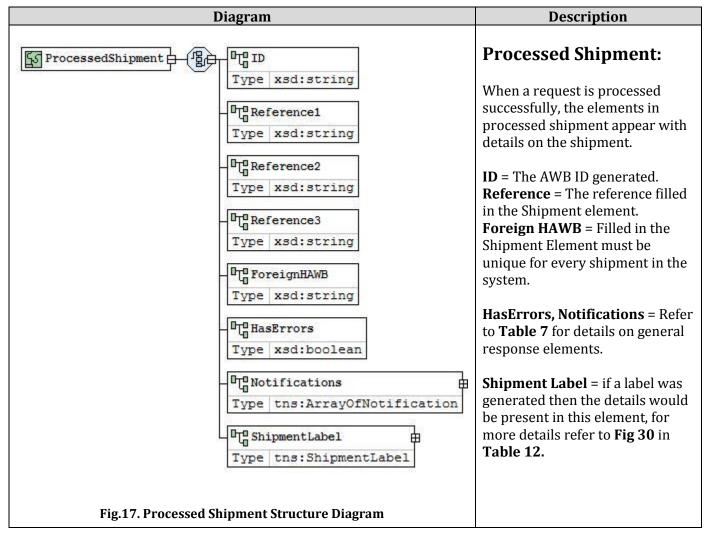

#### **Table 8: Shipment Creation Request Elements**

Aramex International | Shipping Information 19

#### **Table 9: Shipment Creation Response Element**

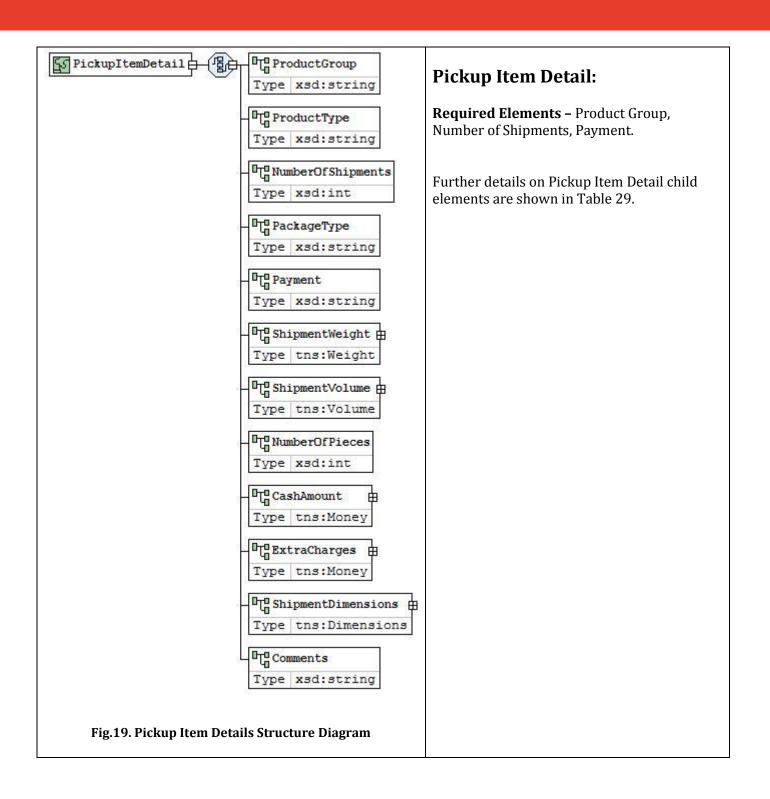

### 2.4 Pickup Creation Elements

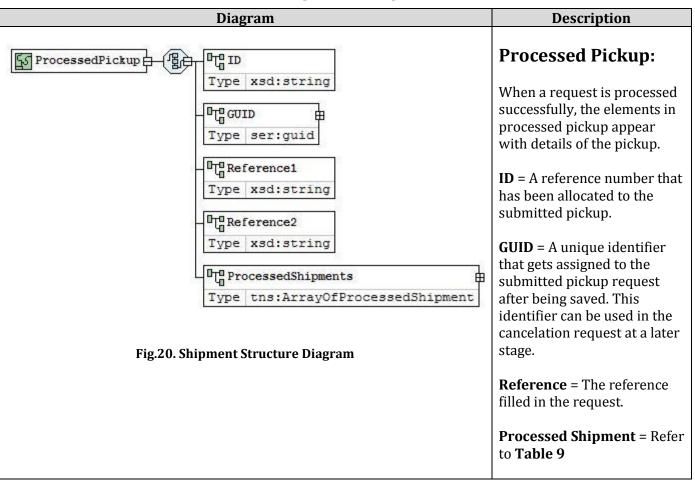

The elements of the request and response Pickup Creation method are described in the tables below:

#### **Table 10: Pickup Creation Request Elements**

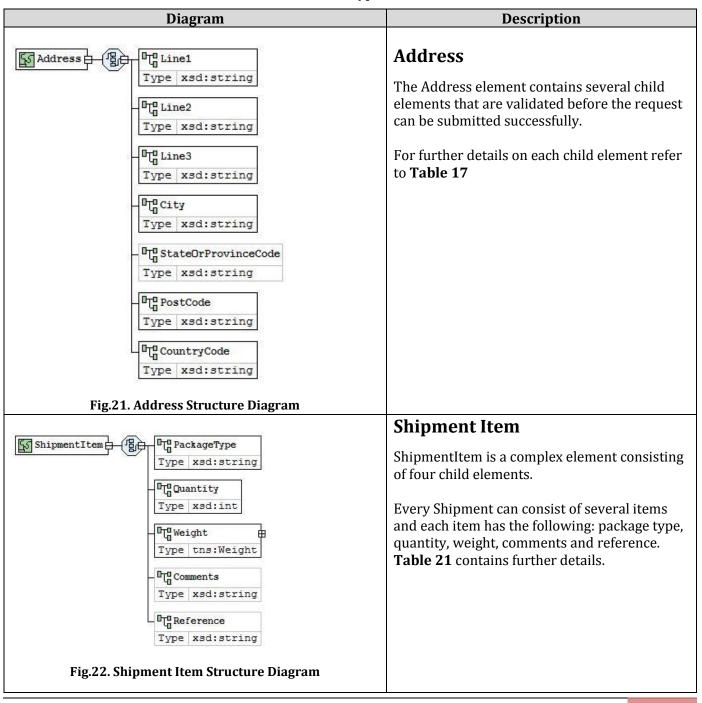

#### **Table 11: Pickup Creation Response Element**

# **3 Complex Data Type Structure**

The Structure and Description of the complex data types present in the elements are shown in the table below:

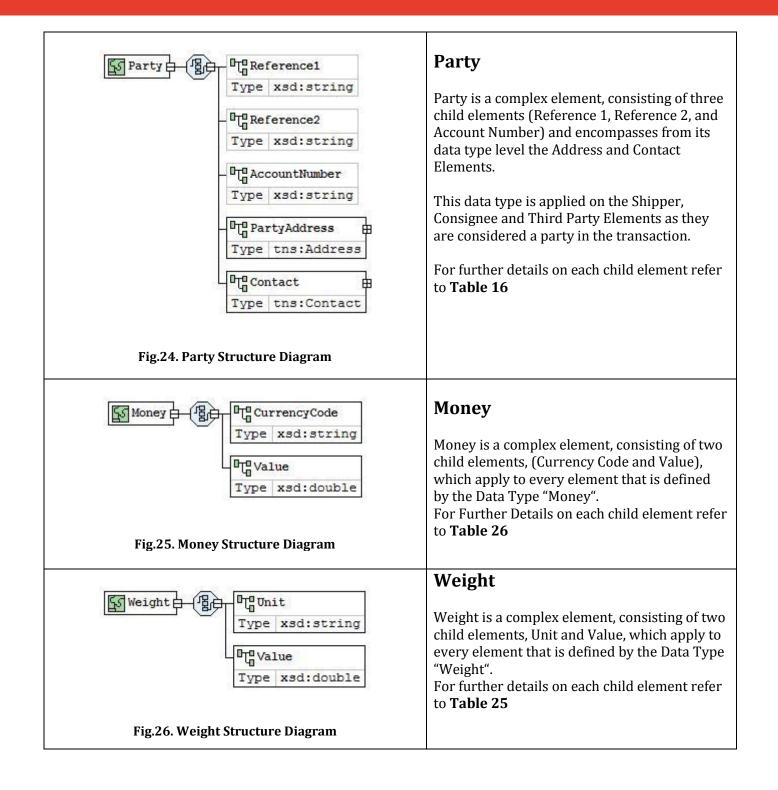

#### Table 12: Data Type Structure

Contact Department Contact Type xsd:string Depending on the method chosen, certain elements are required and others optional. PersonName Type xsd:string **Shipment Creation:** Title Required – Person Name, Company Name, Type xsd:string Phone Number1, and Email Address. CompanyName Type xsd:string **Pickup Creation:** PhoneNumber1 **Required** – Person Name, Company Name, Type xsd:string Phone Number1, and Cell Phone. PhoneNumber1Ext For further details on each child element refer Type xsd:string to Table 18 PhoneNumber2 Type xsd:string PhoneNumber2Ext Type xsd:string FaxNumber Type xsd:string CellPhone Type xsd:string C EmailAddress Type xsd:string Type Type Type xsd:string Fig.23. Contact Structure Diagram

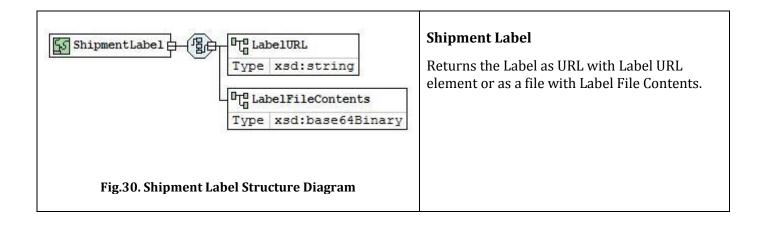

Attachment Type xsd:string Type xsd:string Type xsd:string Type xsd:string Type xsd:string Type xsd:string	Attachment Attachment is a complex element, consisting of three child elements, (File Name, File Extension and File Contents) which apply to every element that is defined by the Data Type "Attachment". File contents has a maximum size of 4 MB For further details on each child element refer to Table 22
Fig.27. Attachment Structure Diagram	<b>Dimensions</b> Dimensions is a complex element, consisting of four child elements, (Unit, Length, Width and Height), which apply to every element that is defined by the Data Type "Dimensions".For further details on each child element refer to <b>Table 24</b>
Fig.29. Volume Structure Diagram	Volume Volume is a complex element, consisting of two child elements, (Unit and Value) which apply to every element that is defined by the Data Type "Volume". For further details on each child element refer to <b>Table 27</b>

# **4** Data Type Element Description

Further details on child elements of the Shipping Services API and their attributes can be shown below.

Element: Element Name

Data Type: The type of data that can be inserted into this field.

Required: Specifies three categories

- **M** = Mandatory, This field must be filled in all cases.
- **O** = Optional, This field may or may not be filled.
- **C** = Conditional, This field may or may not be filled depending on another field being filled.

Length: The maximum number of characters allowed in this field.

Allowed Values: Specifies the accepted data by this field.

### 4.1 Client Info

Element	Data Type	Required	Length	Allowed Values	Description	
User Name	String	М	50		A unique user name sent to the user upon registration with <u>http://www.aramex.com</u>	
Password	String	М	50		A unique password to verify the user name, sent to the user upon registration with <u>http://www.aramex.com</u>	
Version	String	М	4		Based on the WSDL version the user is using to invoke the web service	
Account Entity	String	М	3		Identification Code for Transmitting Party. This code should be provided to you by Aramex.	
Account Number	String	М	50		The Customer's Account number provided by Aramex when the contract is signed.	
Account PIN	String	М	50		A key that is associated with the account number, so as to validate customer identity.	
Account Country Code	String	М	2		Two Letter Code Identifying the Country. Refer to Appendix D	

Table 13: List of Elements present in the Client Structure

### 4.1.1 Testing credentials

To be able to test the Shipping Services API on our testing website, the user credentials below can be used:

AccountCountryCode =J0

AccountEntity = AMM

AccountNumber= 20016

AccountPin = 331421

UserName = testingapi@aramex.com

**Password** = R123456789\$r

Version = v1.0

### 4.2 Transaction

#### Table 14: List of Elements present in the Transaction Structure

Element	Data Type	Required	Length	Allowed Values	Description
Reference 1	String	0	50		Any details the user would like to add that will be sent back in the response.
Reference 2	String	0	50		Any details the user would like to add that will be sent back in the response.
Reference 3	String	0	50		Any details the user would like to add that will be sent back in the response.
Reference 4	String	0	50		Any details the user would like to add that will be sent back in the response.
Reference 5	String	0	50		Any details the user would like to add that will be sent back in the response.

### 4.3 Shipment

Element	Data Type	Required	Length	Allowed Values	Description
Reference1	String	0	50		Any general detail the customer would like to add about the shipment
Reference2	String	0	50		Any general detail the customer would like to add about the shipment
Reference3	String	0	50		Any general detail the customer would like to add about the shipment
Foreign HAWB	String	C	50		User's AWB number if present. If filled this field must be unique for each shipment.
Transport Type	Integer	0	1	0 or 1	0 by Default
Shipper	Party	М			Refer to <b>Table 16</b> for further details.
Consignee	Party	М			Refer to <b>Table 16</b> for further details.
ThirdParty	Party	С			Based on <b>PaymentType</b> = "3"
ShippingDateTime	DateTime	М			The date aramex receives the shipment to be shipped out.
DueDate	DateTime	0			The date specified for shipment to be delivered to the consignee.
Comments	String	0			Any comments on the shipment
PickupLocation	String	0			The location from where the shipment should be picked up, such as the reception desk.
OperationsInstructions	String	0			Instructions on how to handle the shipment

#### Table 15: List of Elements present in the Shipment Structure

AccountsInstructions	String	0		Instructions on how to handle payment specifics.
Details	ShipmentDetails	М		Details on the shipment. Refer to <b>Table 19</b> for further details.
Attachments	List(Of Attachments)	0		No files limit. The total size must not exceed 4 MB
Pickup GUID	String	0	A valid GUI value, provided by the Pickup Creation Response	existing pickups.

### 4.4 Party

Element	Data Type	Required	Length	Allowed Values	Description
Reference 1	String	0	50		Any details the user would like to add that will be sent back in the response.
Reference 2	String	0	50		Any details the user would like to add that will be sent back in the response.
Account Number	String	С	50		The Same Account number entered in the Client Info
PartyAddress	Address	0	50		Refer to <b>Table 17</b> for further details
Contact	Contact	0	50		Refer to <b>Table 18</b> for further details

#### Table 16: List of Elements present in the Party Structure

### 4.5 Address

#### Table 17: List of Elements present in the Address Structure

Element	Data Type	Required	Length	Allowed Values	Description
Line1	String	М	50	More than 3 characters	Additional Address information, such as the building number, block, street name.
Line2	String	0	50		Additional Address information.
Line3	String	0	50		Additional Address information.
City	String	С	50		Address City. <i>Conditional:</i> Required if the post code is not given.
State Or Province Code	String	С	100		Address State or province code. Required if The country code and city require a State or Province Code
Post Code	String	С	30		Postal Code, if there is a postal code in the country code and city then it must be given.
					If there are multiple cities for the same post code, the list of cities will be returned in the SOAP response
Country Code	String	М	2		2-Letter Standard ISO Country Code. Refer to <b>Appendix D</b> for a complete list of Country codes.

### 4.6 Contact

Element	Data	Required	Length	Allowed	Description
	Туре			Values	
Department	String	0	50		User's Work Department
PersonName	String	М	50		User's Name, Sent By or in the case of the consignee, to the Attention of.
Title	String	0	50		User's Title
CompanyName	String	М	50		Company or Person name.
PhoneNumber1	String	М	30		Valid Phone Number
PhoneNumber1Ext	String	0	20		Valid Extension to the phone number.
PhoneNumber2	String	0	30		Phone Number
PhoneNumber2Ext	String	0	20		Extension to the phone number.
FaxNumber	String	0	30		Fax Number
CellPhone	String	М	30		Cell Phone Number
EmailAddress	String	М	50		Email Address
Туре	String	0	50		

#### Table 18: List of Elements present in the Contact Structure

### 4.7 Shipment Details

Element	Data Type	Required	Length	Allowed Values	Description
Dimensions	Dimensions	0			Measurements required in calculating the Chargeable Weight, If any of the dimensional values are filled then the rest must be filled.
NumberOfPieces	Integer	М	3	Pieces > 0 MAX = 100	Number of shipment pieces
ActualWeight	Weight	М	6		Total actual shipment weight. If the Dimensions are filled, charging weight is compared to actual and the highest value is filled here.
Product Group	String	М	3	EXP, DOM	EXP = Express DOM = Domestic
Product Type	String	М	3	Product Type: "OND" <b>For</b> Product Group: "DOM"	Product Type involves the specification of certain features concerning the delivery of the product such as: Priority, Time Sensitivity, and whether it is a Document or Non-Document. Refer to <b>Appendix A</b> for a list of Product Types and their Product Groups
Payment Type	String	М	1	P, C, 3	Method of payment for shipment. Refer to <b>Appendix B</b> for more details.
Payment Options	String	C	4	Payment Type = C ASCC ARCC Payment Type = P CASH ACCT PPST CRDT	<i>Conditional</i> - Based on the Payment Type "C" ASCC = Needs Shipper Account Number to be filled. ARCC = Needs Consignee Account Number to be filled. <i>Optional</i> - Based on the Payment Type "P" then it is optional to fill. CASH = Cash ACCT = Account

#### Table 19: list of Elements present in the Shipment Details Structure

				PPST = Prepaid Stock CRDT = Credit
Services	String	0	25	Additional Services used in shipping the package, Separate by comma when selecting multiple services. Refer to <b>Appendix C</b> (Service Codes) for valid codes.
Description of Goods	String	М	100	The Nature of Shipment Contents. Example: Clothes, Electronic Gadgets
Goods Origin Country	String	М	2	The Origin of which the product in the shipment came from. Refer to <b>Appendix D</b> for a complete list of Country codes.
Customs Value amount	Money	С		Value Charged by Destination Customs. <i>Conditional</i> - Based on the <b>ProductType</b> "Dutible"
Cash on Delivery	Money	С		Amount of Cash that is paid by the receiver of the package. <i>Conditional</i> - Based on the <i>Services</i> "COD" being filled.
Insurance Amount	Money	0		Insurance Amount charged on shipment.
Cash Additional Amount	Money	0		Additional Cash that can be required for miscellaneous purposes.
Cash Additional Description	String	С		<b>Conditional</b> - Based on the <b>PaymentType</b> "3" AND <b>Cash Additional Amount</b> is filled
Collect Amount	Money	С		Transportation Charges to be collected from consignee. <i>Conditional</i> - Based on the <b>PaymentType</b> "C" + <b>PaymentOptions</b> "ARCC"
Items	List(Of ShipmentItem)	0		Details of the Items within a shipment. Several items can be added for a single shipment.

### 4.8 Date Time

#### Table 20: list of Elements present in the Date Time Structure

Element	Data Type	Required	Length	Allowed Values	Description
Shipping Date	Date	М			The date Aramex receives the shipment to be shipped out.
Due Date	Date	М			The date specified for shipment to be delivered to the consignee.

### 4.9 Shipment Items

#### Table 21: list of Elements present in the Shipment Item Structure

Element	Data Type	Required	Length	Allowed Values	Description
Package Type	String	С	50		Type of packaging, for example. Cans, bottles, degradable Plastic. <i>Conditional:</i> If any of the Item element values are filled then the rest must be filled.
Weight	Weight	С			Total Weight of the Items
Quantity	Integer	С	4	MAX = 100	Number of items
Comments	String	С	1000		Additional Comments or Information about the items

### 4.10 Attachment

#### Table 22: list of Elements present in the Attachment Structure

Element	Data Type	Required	Length	Allowed Values	Description
File Name	String	С			The file name without its extension.
File Extension	String	С	6		The extension of the file. Our system accepts any extension
File Contents	Byte()	С	4 MB		Contents of the file.

### 4.11 Label Info

Element	Data Type	Required	Length	Allowed Values	Description
Report ID	Integer	М		9201	The Template of the report to be generated.
Report Type	String	М		"URL" or "RPT"	Either by URL or a streamed file(RPT). URL by Default

#### Table 23: list of Elements present in the Label Info Structure

#### 4.12 Dimensions

Element	Data	Required	Length	Allowed	Description
	Туре			Values	
Length	Double	С	5	Format: 000.000 MAX = 100	Measurements required in calculating the Chargeable Weight, If any of the Dimensional values are filled then the rest must be filled.
Width	Double	С	5	Format: 000.000 MAX = 100	Measurements required in calculating the Chargeable Weight, If any of the Dimensional values are filled then the rest must be filled.
Height	Double	С	5	Format: 000.000 MAX = 100	Measurements required in calculating the Chargeable Weight, If any of the Dimensional values are filled then the rest must be filled.
Unit	String	С	2	СМ, М	Measurement Unit, If any of the Dimensional values are filled then the rest must be filled. CM = Centimeter M = Meter

Table 24: list of Elements present in the Dimensions Structure

### 4.13 Weight

#### Table 25: list of Elements present in the Weight Structure

Element	Data	Required	Length	Allowed	Description
	Туре			Values	
Value	Double	М	6	Format: 000.000 Weight > 0 MAX = 100	Shipment weight. If the Data Entity 'Dimensions' are filled, charging weight is compared to actual and the highest value is filled here.
Unit	String	0	2	KG , LB	Unit of the weight

### 4.14 Money

#### Table 26: list of Elements present in the Money Structure

Element	Data	Required	Length	Allowed	Description
	Туре			Values	
Currency Code	String	С	3		<ul> <li>3-Letter Standard ISO Currency Code</li> <li>Refer to Appendix E for a list of Currency Codes.</li> <li>If Cash on delivery value is filled, then its currency must be in USD.</li> </ul>
Value	Double	С	5	Format: 000.000 MAX = 100	The Monetary value. For <b>Cash on delivery</b> , the currency must be in USD.

### 4.15 Volume

#### Table 27: list of Elements present in the Volume Structure

Element	Data Type	Required	Length	Allowed Values	Description
Value	Double	М	6	Format: 000.000 Volume > 0 MAX = 100	Shipment Volume.
Unit	String	0	2	Cm3, Inch3	Unit of the volume

## 4.16 Pickup Details

Element	Data Type	Required	Length	Allowed Values	Description
Reference1	String	0	50		Any general detail the customer would like to add about the shipment
Reference2	String	0	50		Any general detail the customer would like to add about the shipment
Vehicle Type	String	0	50		Type of Vehicle requested to transport the shipments.
Address	Address	М			Pickup Address
Status	String	М	10	Ready or Pending	<b>Pending:</b> more information about the pickup needs to be added, <b>Ready:</b> no further information is needed and the pickup request is ready to be assigned
Date Time	DateTime	М			Ready time should always be before latest and closing time. Date should not be before the current day or more than seven days in advance of the current date. Refer to <b>Table 20</b> for further details.
Contact	Contact	М			Refer to <b>Table 18</b> for further details.

#### Table 28: list of Elements present in the Pickup Details Structure

### 4.17 Pickup Item

Element	Data Type	Required	Length	Allowed Values	Description
Product Group	String	М	3	EXP, DOM	EXP = Express DOM = Domestic
Product Type	String	0	3	Product Type: "OND" <b>For</b> Product Group: "DOM"	<b>Product Type</b> involves the specification of certain features concerning the delivery of the product such as: Priority, Time Sensitivity, and whether it is a Document or Non-Document. Refer to <b>Appendix A</b> for a list of Product Types and their Product Groups
Payment Type	String	М	1	Р, С, З	Method of payment for shipment. Refer to <b>Appendix B</b> for more details.
Number Of Pieces	Integer	М	3	Pieces > 0 MAX = 100	Number of shipment pieces
Shipment Weight	Weight	М	6		Total actual shipment weight. If the Dimensions are filled, charging weight is compared to actual and the highest value is filled here.
Number Of Shipments	Integer	М	3	Pieces > 0 MAX = 100	Number of shipment
Package Type	String	0	50		Type of packaging, for example. Cans, bottles, degradable Plastic.
Shipment Volume	Volume	М	6		Volume of the Shipment
Cash Amount	Money	0			
Extra Charges	Money	0			
Shipment Dimensions	Dimensions	0			Measurements required in calculating the Chargeable Weight, If any of the Dimensional values are filled then the rest must be filled.
Comments	String	0	50		Any Comments on the Item being picked up.

#### Table 29: list of Elements present in the Pickup Item Structure

# **APPENDIX: Aramex and General References**

### Appendix A - Product Types

Product Type	Name	Dutiable	Full Description	Product Group
PDX	Priority Document Express	No	Urgent, time sensitive consignments containing printed matter or document material	International Express
PPX	Priority Parcel Express	Yes	Urgent, time sensitive consignments containing non-printed matter or non-document material	International Express
PLX	Priority Letter Express	No	Urgent, time sensitive consignments containing printed matter of weight less than 0.5 kg	International Express
DDX	Deferred Document Express	No	2nd Day Delivery consignments containing printed matter or document material	International Express
DPX	Deferred Parcel Express	Yes	2nd Day Delivery consignments containing non- printed matter or non-document material	International Express
GDX	Ground Document Express	No	Ground delivery consignments containing printed matter or document material	International Express
GPX	Ground Parcel Express	Yes	Ground Delivery consignments containing non- printed matter or non-document material	International Express
EPX	Economy Parcel Express	Yes	Non - Document/Printed Matter (Commercial) shipment irrespective of its weight.	International Express
			The word "Economy" represents the action of selling the products and services online, having Aramex arrange the delivery locally and globally	

## Appendix B - Shipment Payment Methods

Payment Method	Stands for	Description
Р	Prepaid	Transportation Charges payable by shipper
С	Collect	Transportation Charges payable by consignee
3	Third Party	Transportation Charges payable by third party. Note: in case of 3rd Party all third party details must be filled including a valid Aramex Account Number for Billing Party.

## Appendix C - Service Codes

Service Code	Description	Full Description
CODS	Cash on Delivery	Receiver pays the cost of the goods
FIRST	First Delivery	Committed delivery time at destination country.
FRDOM	Free Domicile	Sender pays part/or all of the customs charges and the receiver consignee doesn't pay anything of the shipping or handling charges.
HFPU	Hold for pick up	Receiver picks up the consignment from an Aramex/Partner facility
NOON	Noon Delivery	Committed delivery time BEFORE Noon at destination country.
SIG	Signature Required	Physical receiver signature required upon delivery
