

3M Health Care
Solutions for Vascular Access Catalogue

Health care professionals around the globe look to 3M for innovative solutions that help to reduce the risk of infection, provide better patient outcomes and reduce health care costs.

Our trusted brands continue to set the industry standard and offer the finest in skin health and infection prevention products, supported by educational services, professional and technical support, and ongoing research and development.

What sets us apart from our competition is our ability to respond to customers' needs in a variety of ways.

- **Experienced sales team**, including specially-trained representatives who provide in-service training, continuing education and conversion programs
- **Clinical specialists** provide support using a variety of methods:
 - **Professional continuing education programs**
 - **Protocol and formulary development** to promote clinical outcomes, standardization and utilization within your departments
 - **Solutions-based website** for 24 hours-per-day, 7 days-per-week access to information on a wide range of skin and wound clinical conditions. Visit www.3M.com/skinhealth
 - **Toll-free helpline** that offers experts to assist customers with technical and product information
- **Customer service representatives** who are available to handle daily calls for order entry, and special shipment requests to ensure customer satisfaction

3M™ Quick Foam Hand Antiseptic

NPN 80008794

4

Non-aerosol foaming hand antiseptic containing 70% v/v ethyl alcohol with moisturizers which contain emollients to moisturize the skin.

- Foam hand antiseptic kills harmful bacteria without soap or water
- Dye and Fragrance free with no sticky residue after use.
- Spreads easily and evenly while drying quickly
- This product is easy to use for facilities as it is drip and splatter resistant and has versatile point-of-care and dispenser options

Suggested applications:

- Apply to clean dry hands. Thoroughly wet hands and fingernails. Rub and let dry.

3M™ Avagard™ D

Instant Hand Antiseptic with Moisturizer

NPN 02242852

Rapid bactericidal activity while helping to maintain the skin's integrity.

- Provides rapid broad spectrum kill while helping to maintain skin integrity and enhance skin hydration
- CHG Compatible
- Compatible with latex and non-latex gloves. Latex glove tested: Safeskin. Non-latex gloves tested: Triflex PVC, Elastylon

Suggested applications:

- Avagard D instant hand antiseptic can be used to disinfect hands when hands are not visibly soiled
- Apply to clean dry hands. Wet hands thoroughly with product and allow to dry

3M™ Avagard™ CHG Surgical Scrub

(Chlorhexidine Gluconate 1% Solution and Ethyl Alcohol 61% w/w)

Surgical and Healthcare Personnel Hand Antiseptic with Moisturizer

DIN 02246888

- Contains two active ingredients; alcohol for fast kill and chlorhexidine gluconate for persistent and cumulative activity
- Provides rapid antimicrobial kill of a broad spectrum of microorganisms, including antibiotic-resistant stains (*in vitro*)
- Provides proven, persistent antimicrobial protection for up to six hours without water or scrubbing (*in vitro*)
- Advanced, emollient-rich lotion base helps prevent dry, cracked hands, and maintains skin barrier integrity
- Compatible with latex and non-latex gloves. Latex gloves tested: Triflex, Encore. Non-latex gloves tested: Tactylon, Duraprene, Biogel

Suggested applications:

- *Surgical hand antiseptic* – significantly reduces the number of microorganisms on the hands and forearms prior to surgery or patient care.
- *Healthcare personnel hand antiseptic* – handwash to help reduce bacteria that potentially can cause disease - recommended for repeated use.

3M™ Surgical Fixed Head Clipper

Compact, lightweight, rechargeable surgical clippers with fixed or pivoting blade assemblies for more efficient and safe hair removal.

8

- SHN 2007 recommends that patients should be advised to stop shaving, in the operative area, and one week before the surgery date.
- April 1999 CDC Guidelines recommend that if hair removal is required, the use of a surgical clipper immediately before an operation is one means to help reduce the risk of surgical site infections.
- Removes all types of head and body hair, wet or dry, to allow for standardization on one product for all hair removal needs.
- Unique design allows flexibility of clipping with either a pushing or a pulling motion.
- The cutting blade is on top of the stationary blade, away from the skin, so there's minimal risk of nicks or cuts.
- Single-use blades help reduce the risk of cross-contamination and are easy to snap on for use and pop off for disposal.
- Rechargeable clippers have a nickel metal hydride battery allowing multiple patients to be clipped from a single 12-14 hour recharge.
- Unique design is easy to clean and disinfect, wipe with a disinfectant or rinse under running water.

Suggested applications:

- Removing head and body hair from patients in preparation for procedures where hair removal is desired.

ORDERING INFORMATION:

Catalogue Number	Description	Items/Box	Items/Each
9670	3M™ Single-use Blade Assembly (Black); for 3M™ Surgical Clipper with Fixed Head - 9671	50	1

9669	3M™ Clipper Wall Bracket; for 3M™ Surgical Clipper with Fixed Head - 9671	1	1

3M™ Surgical Pivoting Head Clipper

Now the 3MT™ Surgical Clipper 9661 is available with a blade assembly to clip a full head of hair for neuro procedures. This combination of the Premium 40 assembly and pivoting head clipper allows for maximum blade contact at all times, no matter where you are clipping.

9

- SHN 2007 recommends that patients should be advised to stop shaving, in the operative area, and one week before the surgery date.
- Removes wet or dry hair
- Leaves minimal stubble length (0.5 - 0.7mm)
- Removes all types of body hair
- Individually sealed, single-use blades eliminate the need for cleaning the blade and reduce the risk of cross-contamination
- Blade assembly can be easily attached and removed with one hand for disposal .

Suggested applications:

- Removing head and body hair from patients in preparation for procedures where hair removal is desired.

3M™ Steri-Drape™ Angiography Drapes

Surgical drapes for venous access procedures, made of Absorbent Prevention Fabric*.

- Generous aperture area allows for proper positioning of the drape on the patient.
- Reliable, secure adhesive.
- 1192 drape has a large diamond shape aperture making landmarks easy to identify.

Suggested applications:

- Central and PICC Line Insertions.
- Brachial and Radial Artery Access.

13

ORDERING INFORMATION:

Catalogue Number	Description	Size	Items/Each
1192	3M™ Steri-Drape™ Venous/Arterial Access Drape, absorbent prevention fabric, two adhesive patches with diamond shaped apertures	Overall size: 60 in. x 67 in. (152 cm x 170 cm) Aperture: 3 in x 8 in (7.6 cm x 20 cm)	12

*3M™ Absorbent Fabric meets AAMI Standard PB70:2003 liquid barrier performance and classification of protective apparel and drapes intended for use in health care facilities and AAMI Technical Information Report TIR II:2005. Selection of surgical gowns and drapes in health care facilities.

3M™ Cavilon™ No Sting Barrier Film

A versatile choice in your skin protection strategy.

- Forms a transparent protective film between the skin and potential irritants that cause breakdowns
- Sterile, non-cytotoxic, will not interfere with skin healing
- Alcohol-free, will not sting, even when applied to severely excoriated, reddened or denuded skin
- Compatible with CHG

Suggested applications:

- Prevents skin damage from tape and dressing adhesive
- Protects damaged skin from further breakdown

ORDERING INFORMATION:

Catalogue Number	Description	Size	Items/Each	Boxes/Case
3343E	Cavilon™ No Sting Barrier Film, Wand	1.0 mL wand (0.03 oz)	25	4
3344E	Cavilon™ No Sting Barrier Film, Wipe	1.0 mL wipe (0.03 oz)	30	6
3345E	Cavilon™ No Sting Barrier Film, Wand	3.0 mL wand (1 oz)	25	4

3M™ Tegaderm™ CHG IV Securement Dressing

Combining the powerful antimicrobial activity of chlorhexidine gluconate with the simplicity of a Tegaderm™ Dressing

- Proven to reduce skin flora under the dressing and inhibit re-growth at 7 days*
- Transparent window allows for continuous visualization of the insertion site
- Integrated design of dressing reduces application steps and minimizes potential for application errors

Suggested applications:

- Central Venous Catheters
- Peripherally Inserted Central Catheters
- Tunneled Central Venous Catheters
- Arterial Catheters
- Dialysis Catheters
- Midline Catheters
- Any percutaneous device

ORDERING INFORMATION:
