

SERV-U[®] MANAGED FILE TRANSFER SERVER

FTP SERVER SOFTWARE FOR SECURE FILE TRANSFER & FILE SHARING

The screenshot displays the Serv-U Management Console interface. The top navigation bar includes the Serv-U logo, 'Management Console', and user information for 'Popeye the Sailor Man (admin)'. The main content area is titled 'Session Statistics' and provides a comprehensive overview of server activity. It is divided into several sections:

- Statistics Start Time:** Date: May 26, 2014, Time: 14:38:39. A note indicates the server has been active for 8 days, 02:40:35.
- Session Statistics:** Current Sessions: 5, Total Sessions: 88. A summary shows 24 hrs. Sessions: 7, Highest Num. Sessions: 5, Avg. Session Length: 01:16:22, and Longest Session: 72:59:10.
- Login Statistics:** Logins: 31, Average Duration Logged In: 03:36:46. It also lists the Last Login Time (June 3, 2014 14:46:11), Last Logout Time (June 3, 2014 14:27:52), Most Logged In: 5, and Currently Logged In: 5.
- Transfer Statistics:** Download Speed: 0 KB/sec, Upload Speed: 0 KB/sec. It shows 590.87 KB (15 files) downloaded and 1.74 MB (12 files) uploaded, with average download and upload speeds of 1.93 MB/sec and 145 KB/sec respectively.

Below the statistics, there are tabs for 'Server Log' and 'Active Sessions'. The 'Active Sessions' tab is selected, showing a table of currently active sessions with columns for ID, Type, User, IP Address / Hostname, Server Address, Location, Last Command, and Client. The table lists several sessions, with one session (ID 78) highlighted in blue. Below the table, detailed session information is provided, including user details (User: (78) admin, System Administrator), IP address (10.100.1.234), speeds (0 KB/sec, 12 KB/sec, 145 KB/sec), time on (02:58:49), and session duration (since 3/6/2014 14:20:30). It also shows download and upload statistics (117.17 KB (10 files) downloaded, 1.74 MB (12 files) uploaded) and location (C:\Test Folder).

"If you're looking for a highly professional, no-nonsense FTP server, then you can't do much better without Serv-U."

— Nick Mead,
Editor, Softonic

Serv-U[®] Managed File Transfer (MFT) Server from SolarWinds[®] is an easy-to-use FTP server software that delivers security, automation, and centralized control for file transfers in your organization. Deployed within your data center, Serv-U MFT Server allows you to securely exchange files within your organization and with your business partners. Do not risk your file transfer data getting exposed in the Cloud and compromise security! Serv-U MFT software is the best self-hosted solution for your security and compliance needs!

SERV-U MFT SERVER AT A GLANCE

- » Secure transfer of sensitive business files over IPv4 & IPv6 networks
- » Centralize and manage file transfers remotely from the Web
- » Automate file transfer operations, which saves time and resources
- » Simplify file upload and download from Web client and mobile devices
- » Transfer large files (>3GB) easily with drag-and-drop UI
- » Meet compliance requirements and security policies
- » Deploy MFT server software in your own data center
- » Avoid data at rest in your DMZ network

FEATURES

Secure File Transfer

Serv-U MFT Server is a secure FTP server software that supports a range of security protocols for secure file transfer. Serv-U MFT Server supports FTP, FTPS (FTP over SSL/TLS), SFTP (FTP over SSH2), HTTP, HTTPS (HTTP over SSL), IPv4, and IPv6 networks. Serv-U also supports FIPS140-2 validated cryptography.

File Transfers from Web Browsers and Mobile Devices

Serv-U MFT Server's interactive drag-and-drop Web and mobile access lets you upload and download files from anywhere. Serv-U supports large file transfer (>3GB), multiple file transfer, side-by-side file transfer, and folder synchronization.

Ad Hoc File Sharing

Serv-U MFT Server supports ad hoc file sharing and includes secure processes for sending and requesting files. The sender only needs to upload a file to a secure Serv-U Web page and set an expiration date. Serv-U emails the download link to the recipient who can download the file from any Web interface.

Managed File Transfer with Centralized Administration

Perform file transfer administration and management from a single, easy-to-use Web console. As an administrator, you can remotely set up domains, add users and groups, monitor FTP sessions and logs, define access permissions, and more.

Integration with Your Existing IT Infrastructure

Easily provision access to employees in your organization using your existing Active Directory® and LDAP servers. Serv-U MFT Server also integrates with external databases and file storage, which means you can apply your own security policies and leverage your existing procedures, monitors, and controls.

Monitor FTP Server Logs Online for Troubleshooting and Compliance Reporting

View and monitor FTP server and domain logs online for quick troubleshooting and error handling. These logs can be forwarded to log management and SIEM tools for further analysis and reporting.

Execute Automated Actions Based on Triggered Events

Serv-U MFT Server offers event-driven automation to perform specific tasks based on events generated on the server, domain, user, and group. You can configure Serv-U to send email or run programs when files arrive, delete files as soon as they are downloaded, write to Windows® event log messages, etc.

File Transfer Permissions & User Access

Set up limits and permissions for FTP operations and file sharing processes. There are a variety of customizable options for FTP command processor, SSL/SSH encryption, certificates, and file sharing permissions which can be defined at the user, group, and domain level.

Custom Branding of Web Client

Customize the file access Web interface for your clients. You can add a custom logo, text, and advanced custom CSS and templates to design interfaces of Web clients for your end-users.

FTP Server Scalability & High Availability

You can deploy Serv-U MFT Server as a Web farm of application servers to provide high-availability services through horizontal scaling (a.k.a. N+1 scaling). You can use this configuration for active redundancy needs where there is no single point of failure and load is balanced to meet actual demand.

Quick Deployment & Simple Licensing

Serv-U MFT Server is easy to install and supports deployment on Windows® and Linux® platforms. Self-hosted and deployed within your own data center, you can get full visibility, control, and security of your file transfer data. You can view, upload, and download files from the Web and from mobile interfaces via HTTP/S. Serv-U MFT Server is licensed by the number of licenses of MFT Servers purchased and deployed.

SECURE GATEWAY FOR FILE TRANSFER IN DMZ NETWORKS

Serv-U Gateway is an optional addition to the Serv-U MFT Server that allows you to safely accept incoming file transfer connections in your DMZ.

A two-tier deployment involving Serv-U MFT Server and Serv-U Gateway satisfies most managed file transfer requirements and helps you with meeting PCI DSS and other regulatory compliance requirements. Serv-U Gateway provides defense-in-depth security to Serv-U MFT Server deployment.

INTEGRATION WITH OTHER SOLARWINDS PRODUCTS

Serv-U MFT Server supports sending server logs to [SolarWinds Log & Event Manager](#) (SIEM software) for deeper security analysis and compliance reporting.

Serv-U MFT Server supports file transfer via the FREE desktop-based FTP client from SolarWinds - [FTP Voyager®](#).

HARDWARE	MINIMUM REQUIREMENTS
CPU	1.0 GHz Processor (Dual Core Recommended)
Memory	256 MB (Or Minimum Required by Operating System)
Hard Drive	30 MB Note: This is for the Serv-U application only. Additional local or UNC-accessible storage is usually required for users' home folders, shared folders, file sharing storage, and log files.
SOFTWARE	MINIMUM REQUIREMENTS
Operating System	Licensed version supported on: <ul style="list-style-type: none"> • Windows® Server 2003, 2008, 2008 R2, 2012, 2012 R2, 32-bit or 64-bit • CentOS™ 6.4, 32-bit or 64-bit • Red Hat® Linux® (RHEL) 6.4, 32-bit or 64-bit • Fedora® 19, 32-bit or 64-bit • Ubuntu™ • OpenSUSE™ Free trial/evaluation version also supported on: Windows XP, Windows Vista, Windows 7, 8, and 8.1
Database	ODBC-compliant databases such as SQL Server®, Oracle® and MySQL® are optional

Refer to the [admin guide](#) for system requirements for larger number of configured users and simultaneous transfers.

ABOUT SOLARWINDS

SolarWinds (NYSE: SWI) provides powerful and affordable IT management software to customers worldwide. Focused exclusively on IT Pros, we strive to eliminate the complexity in IT management software that many have been forced to accept from traditional enterprise software vendors. SolarWinds delivers on this commitment with unexpected simplicity through products that are easy to find, buy, use, and maintain, while providing the power to address any IT management problem on any scale. Our solutions are rooted in our deep connection to our user base, which interacts in our online community, [thwack®](#), to solve problems, share technology and best practices, and directly participate in our product development process.
