Examples

simple examples of the most important functions

d *~~ toy ~~*

Description

~~ A concise (1-5 lines) description of the dataset. *~~*

Usage

```
data("d")
```

Format

A data frame with 2 observations on the following 2 variables.

name a factor with levels alice bob

weight a factor with levels 100 120

Details

If necessary, more details than the `__description__` above

Source

reference to a publication or URL from which the data were obtained

References

possibly secondary sources and usages

Examples

```
data(d)
## maybe str(d) ; plot(d) ...
```

f1 *~~function to do ... ~~*

Description

~~ A concise (1-5 lines) description of what the function does. ~~

Usage

f1(x, y)

Arguments

x

y

Examples

```
##---- Should be DIRECTLY executable !! ----
##-- ==> Define data, use random,
##--or do help(data=index) for the standard data sets.

## The function is currently defined as
function (x, y)
x + y
```

f2 *~~function to do ... ~~*

Description

~~ A concise (1-5 lines) description of what the function does. ~~

Usage

f2(x, y)

Arguments

x

y

Examples

```
##---- Should be DIRECTLY executable !! ----
##-- ==> Define data, use random,
##--or do help(data=index) for the standard data sets.

## The function is currently defined as
function (x, y)
x * y
```
