TROUBLESHOOTING

My keyboard or mouse is not working.

- Make sure that your mouse is turned on.
- Move your device closer to your computer.
- Make sure that your computer meets the system requirements.
- Only use your mouse on a clean, flat, non-slippery surface to ensure smooth and accurate cursor action.
- Avoid using your mouse on reflective, transparent, or metallic surfaces.
- Replace the battery in your device. The low battery indicator in your keyboard blinks for 10 seconds when the battery is low.
- Try connecting your USB dongle into a different USB port on your computer.
- Try moving other wireless devices away from the computer to prevent interference.
- Try restarting your computer with the USB dongle plugged in.
- The keyboard and mouse work together with one USB dongle. Using another keyboard or mouse will not work.

My mouse pointer or scroll wheel is too sensitive or not sensitive enough.

- Adjust the cursor or scroll wheel settings on your computer. Refer to the documentation that came with your computer.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Caution

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.
