INSTALLATION GUIDE

Scrolling wheel

Right key

DPI adjusting key

Backward key

Forward key

Left key

1) System requirement
- A computer with a Bluetooth receiver installed and working.

2) Installing batteries
Whenever new batteries are installed, make sure that they are fresh 1.5V AAA batteries.
   a) Remove the battery cover.
   b) Insert two AAA batteries into the battery compartment and make sure of the polarity. Replace the battery cover and make sure it is locked.
   c) Switch the mouse on, LED light will blink

3) Description of keys and DPI Adjustment

a) Using "DPI-Adjusting key", the resolution of the mouse can be switched between 800/1000/1200 DPI. The LED lights differently, depending on the resolution:

Resolution	LED behaviour
800 DPI	Slow
1000 DPI	Faster
1200 DPI	Fastest

b) Backward and Forward keys will help you to change pages easily when using a web browser.

3) Low voltage alarming function

When batteries are becoming low, the LED light in the "DPI-Adjusting key" will blink. Then, you should change your batteries.

4) Connecting the Bluetooth mouse

Before you install the Bluetooth mouse, please make sure your computer supports Bluetooth function and Bluetooth software is correctly installed.

For the pairing, simultaneously press both Left and Right keys for 5 seconds, the LED light in "DPI-adjusting key" will shine, it is now searching the Bluetooth device. And please follow the procedure to install the mouse.

INSTALLATION WITH MICROSOFT BUILT-IN SOFTWARE

1. Make sure that the Bluetooth function has been activated on your computer and make sure the mouse is ready for pairing. Double click the Bluetoooth Icon on the Task Bar or in the Control Panel, click « Add a Bluetooth device »

2. Select "My device is set up and ready to be found", click next

3. Select Bluetooth mouse, click "Next"

4. Select "Don't use a passkey", click "Next" and then "Finish"

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of FCC RF Rules. Operation is subject to the following two conditions:

1) This device may not cause interference and

2) This device must accept any interference, including interference that may cause undesired operation of the device.

Caution!

The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user authority to operate the equipment.
