User manual

Installing the battery

Whenever new battery is inserted, make sure that it is fresh 1.5V AA battery.

A) Remove the battery cover (Picture 1).

B) Insert AA battery into the battery compartment, make sure to properly orient the positive (+) and negative (-) ends as specified by the marks in the battery compartment. Replace the battery cover and make sure it is locked.

C) Switch on the mouse, the LED in bottom of mouse will blink.

(Picture 1)

(Picture 2)

(Picture 3)

Installing the receiver (Picture 2)

The codes of receiver and mouse were successfully connected in factory. User can directly use the complete set of products, no worry about the code connecting.

A) Take out the receiver from the packing, insert it into USB port of PC, the computer system will automatically detect it and prepare it for full operation.

B) The mouse may use then.

If the user wrongly operates, please redo the above operating procedures.

"Connect" key and "ON/OFF" switch (Picture 3)

A) Without using the mouse, user may turn off it by "ON/OFF" switch for saving battery power.

B) The "Connect" key is for code connecting and factory using only. It's nose for user. The code connecting had been finished in factory already.

A) Simultaneously press both Left and Right keys for 3 to 5 seconds, the resolution of mouse will be adjusted between 800DPI and 1600DPI in turn. The moving speed of cursor on computer screen indicates different DPI, slow is 800DPI while fast 1600DPI.

B) Backward and Frontward keys for your easily navigating forward and backward on the Internet

Attention

When a battery has been used for months and discover the cursor movement is becoming slow, suggested you replace the battery with a new one.

Windows ME, 2000, XP or Vista

Specifications and functions

1. Super mini receiver
2. 2.4GHz, freely operating within 10 meters
3. Wireless carrier frequency: 2,402MHz-2,480 MHz
4. 16 wireless working channels, automatic frequency jumping
5. Power ON/OFF function
6. Resolution: 800DPI and 1600DPI adjustable

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

15.21: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
