1. Technical Indicators:

1. Power Voltage: 12V(12V23A Battery)
2. Current: $\leq 10\text{mA}$
3. Tact Switchs: Press More 100000 Times.
4. Mode of Oscillation: SAW Resonance
5. Modulation Method: ASK
6. Frequency: 433.92MHz
7. Frequency Bias: $\pm 75\text{KHz}$ (Max)
8. Transmitting Power: $< 1\text{mW}$
9. Coding Formats: HCS301
10. Storage Temperature: $-40^{\circ}\text{C} - +85^{\circ}\text{C}$

2. Performance characteristics:

1. Four keys
2. High stability;
3. Variety of encoding options;

3. Applications

1. Home burglar alarm;
2. Automobile, motorcycle remote key
3. Remote control of electric curtains, roller shutter doors

FCC Certification Requirements

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
