

## DX-PU98505 USB to Ethernet Adapter

Thank you for purchasing this high quality Dynex USB to Ethernet Adapter. Use this adapter to instantly connect to a 10/100 Mbps network from the USB port on your desktop or laptop computer.

### PACKAGE CONTENTS

- USB to Ethernet Adapter
- Driver CD
- Quick Setup Guide

### SYSTEM REQUIREMENTS

- Windows® 8.1, Windows® 8, Windows® 7, Windows Vista®, Windows® XP, or Mac OS 10.4.x or higher

Before using your new product,  
please read these instructions to prevent any damage.

### QUICK SETUP GUIDE

## SETTING UP THE ADAPTER

### Notes:

- Install the driver software before using the adapter. Use the included driver CD to install the driver before you connect the adapter.
- If you have Windows 8, you do not need to use the driver CD. The driver will be installed automatically when you connect with your adapter. Skip to step 4.
- If your computer does not have a disc drive, you can download the driver from [www.dynexproducts.com](http://www.dynexproducts.com). Search for your model number (DX-PU98505) to find the driver on the product page. Or, attach an external disc drive to your computer.

### To install on a Windows PC:

- 1 Insert the driver CD into the disc drive on your computer. The software should run automatically. The initial installation screen opens.

**Note:** If the software does not run automatically, locate and double-click **Run.exe** on the driver CD.

- 2 Click on your operating system, then follow on-screen instructions.

- 3 When the installation is complete, click **Finish**. You will be prompted to restart your computer to finish the installation.

- 4 Connect the USB connector on the adapter to an open USB port on your computer.
- 5 Connect a network cable to the Ethernet port on the adapter.

### To install on a Mac:

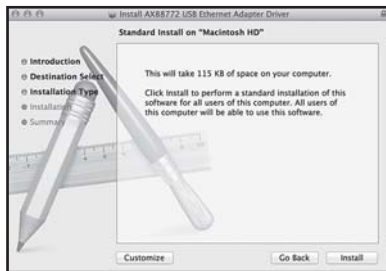

- 1 Insert the driver CD into the disc drive of your computer.
- 2 Locate and click the **AX88772** icon (  ), then click **AX88772.dmg**. The driver setup dialog box opens.

- 3 When the installer screen opens, click **Continue**, then follow the on-screen instructions.

You may be prompted to enter your system username and password during installation.

- 4 Click **Install**, then when the confirmation message appears, click **Continue Installation**.

- 5 When installation is complete, click **Restart** to restart the computer and finish the installation.

- 6 Connect the USB connector on the adapter to an open USB port on your computer.  
7 Connect a network cable to the Ethernet port on the adapter.

## TROUBLESHOOTING

### *My computer does not detect the network*

- Make sure that all of the cables and plugs are securely connected.
- Make sure that the USB connector and network cable are not broken.
- Try using another USB port on the computer.
- Check for motherboard compatibility issues.
- Check for driver compatibility issues.
- Make sure that your network is working correctly.
- Make sure that the driver is installed on your computer.

### *I do not see the additional driver in my system*

- Make sure that the USB connector and network cable are not broken.
- Make sure that the driver is installed correctly by selecting (for Windows) **Start>Control Panel>Device Manager>Network Adapters** or (for Mac) **Hardware>USB>USB Hi-Speed Bus>Hub>AX88772C**. Look for a string such as ASIX AX88772B USB 2.0 to Fast Ethernet Adapter.
- Install the driver again according to the installation steps in the QSG.
- Shut down your firewall in case your anti-virus program is preventing the installation of the driver software.
- Check for motherboard compatibility issues.
- Check for driver compatibility issues.

## LEGAL NOTICES

### FCC Information

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
  - Increase the separation between the equipment and receiver.
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
  - Consult the dealer or an experienced radio/TV technician for help.
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### ICES-003

This Class B digital apparatus complies with Canadian ICES-003; Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
