- Please update the map software when you find out map information has not been updated and is different from the current roads.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Product Introduction

一、Product outline(EL-311R)

一、Product Outline(EL-101)

麥克風口:microphone input/多元化顯示螢幕: Multiple Display Layout Screen

Micro SD卡槽: Micro SD input / 行車記錄器影像輸入 : Entering for Digital video recording

倒車鏡頭影像輸入: Entering for Reversing monitor view

二、Product features

- 4" TFT high-resolution image with multiple display layouts, information full, bright screen but does not hurt the eyes.
- Lighting sensor: automatic detection when light reaches the sensor.
- Special and newly innovative GPS built-in/ with speeding reminding.
- Blue tooth message indications.

三、Specification

Voltage	DC 12V
Storage Temperature	-40°C ~ +85°C
Working temperature	-30°C ~ +80°C
Current consume	Single operation 1A/ with event data record 2.5A After turning off car engine, the products current consume $\leq 0.13\text{mA}$
311 overall size (body)	Length 122.2mm*Width111.4mm*height 29.7mm
311R overall size (body with cover)	Length146.3mm*Width116mm*Height17.2mm
101 overall size (body with cover)	Length122mm*Width187mm*Height22mm

四、Instructions for starting the Product

[Preface] Before using the product, please follow the procedures in order to ensure the regular connections.

View for first power on

View of normal power on

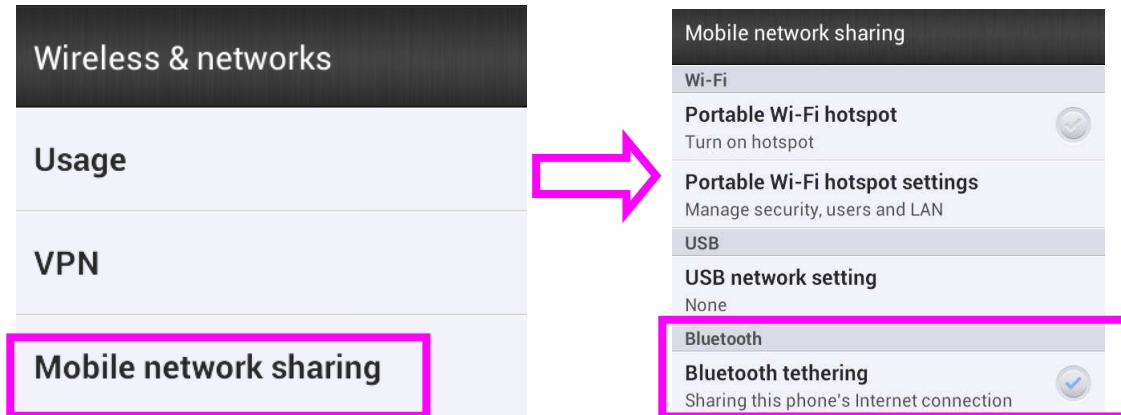

Connect Setting(Android System)
