Index

.1 Foreword

Thank you for choosing our SmartPhone Model **M66AYG-P** high definition Phablet with a 6**"** LCD Screen. This manual introduces you to the features and functions of your new Phablet. This manual also includes recommendations which we encourage you to follow such in order to assure proper operation of your Smartphone.

.2 SmartPhone Smart Handling

- Please make sure to keep the Phablet in a dry and proper place. To avoid circuitry and hardware damage do not expose the phone, battery and charger to direct sunlight, wet or moist environments.
- Please avoid sudden shake or shock since it may permanently damage the Smartphone.
- If your phone has been running for long periods of time, especially in hot environments, heat may be pushed to the surface of the phone. If your phone is overheating, cease using it immediately and unplug it from any power source to let it cool down. Do not hold on to the phone for too long to avoid burn injuries.
- Under any circumstance attempt to repair or change parts, otherwise this will render the manufacturer**'**s warranty void.

.3 Safety Instructions

- Never use the PHABLETwhile driving a car, in order to ensure safe driving. The primary responsibility of every driver is the safe operation of his or her vehicle. Responsible drivers understand that no secondary task should be performed while operating a vehicle whether it be eating, drinking, talking to passengers, or **using a mobile device** – unless the driver has measured the driving conditions and is confident that the secondary task will not interfere with their primary responsibility.
- Do not engage in any activity while driving a moving vehicle which may cause you to take your eyes off the road or become so absorbed in the activity that your ability to concentrate on the act of driving becomes compromised. Our commitment is aimed at responsible driving and giving drivers the tools they need to understand the potential hazards of distractions.
- Switch your mobile device off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to cellular signal interference.
- Switch your mobile device off before boarding an aircraft. The use of wireless portable devices in aircraft is prohibited and may be dangerous to the aircraft's operation. Check with appropriate authorities before using any function of a mobile device while on an aircraft.
- Always follow any special regulations applicable, and always switch your mobile device off whenever it is forbidden to use it, or when it may cause interference or hazard. When connecting the mobile device or any accessory to another device, read its user**'**s manual.
- Switch your mobile device off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death. Users are advised to switch the mobile device off while fueling or other area where you would normally be advised to shut down your vehicle engine.
- Your SmartPhone is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the mobile device. Keep the mobile device and all its parts and accessories out of the reach of small children.

our mobile device is a radio transmitter and receiver. It is designed and manufactured not to
xceed the exposure limits for Radio Frequency (RF) energy set by your local authority.

Abbs/ Terminology	Device Name	Description
PHABLET	Mobile Internet Device	Mobile Internet Terminal
WIFI	Wireless Fidelity	Based on standard N° IEEE802.11b wireless Lan
TF	TransFlash	Alternate name for Micro SD, Super Miniature Memory Card
RF	Radio Frequency	A frequency or band of frequencies suitable for telecommunications

.5 SmartPhone Operation and Set Up

The File Manager offers many options to delete applications.

10 Troubleshooting

1. **Slow Startup**
   - Once the Phablet software is upgraded and updated, the applications will be installed and this could take between 3 and 5 minutes. Once the information is uploaded startups will faster.

2. **No Wi-Fi Connection**
   - Check that wireless routers are working properly and your Wi-Fi connection is active (ON).
   - In case of wireless router connections, make sure you have a proper distance between the router and Phablet without obstacles.
   - Check and confirm your access login and password.

3. **The Phablet Feels Hot**
   - When using multiple applications simultaneously and/or a high brightness intensity setting the Phablet will warm up.

4. **Email Problems.**
   - Make sure to have a proper Internet connection.
   - Make sure your email is properly configured.
   - Make sure your time zone is properly set.

5. **The System is not Working Properly.**
When third party applications are installed, it could generate abnormalities and you may press the Reset Key to restart the Phablet.

. Cannot Open Webpages
- Please make sure to have a proper distance between the Phablet and signal source (ex. Router, access point).
- Please reset WIFI and try again.

. The Phablet Performs Slow

This can happen from time to time. If your Phablet is running multiple applications, you may lose those not being used and if necessary, delete third party applications.

FCC RF Exposure Information and Statement

The SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types Tablet (FCC ID: ZL9-SP6020) has also been tested against this SAR limit. *The highest reported SAR values for head, body-worn accessory, product specific (wireless router), and simultaneous transmission conditions are **0.38 W/kg, 0.41 W/kg , 0.36 W/kg, and 0.56 W/kg** respectively.* Compliance with FCC RF exposure requirements, use accessories that maintain a 10mm separation distance between the user's body. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
