

Wireless FM Transmitter

INSTRUCTION:

1. Insert two pieces of 1.5V AAA size batteries in the battery compartment. The LCD display will show the time.
2. Press ON/OFF button once enter transmit mode, LCD will show the current transmit frequency, press ▲ or ▼ button to increase or decrease adjust frequency. press ON/OFF button once again to stop transmit and the real time will show on LCD display.
3. When you want store current frequency, press M1, M2 or M3 button for about 3 seconds for the store location for you to select frequency easily. When you want to use the store frequency, Press M1, M2 or M3 button once. The memory number will show on display.

4. When the unit show the time, press and hold SET button for about 3 seconds enter setting mode, the last number of minute will flash, press ▲ or ▼ button to set your desired digit, press SET button to confirm and enter to set the first digit of minute, using the same operation to set the digit of minute and hour. The LCD will show the time after not pressing button for about 3 seconds.
5. When in the transmit state, press SET button will show the time for about 3 seconds.
6. Low battery detect function.
7. Temperature display.

Specifications:

- ◆ Frequency response: 20Hz-20kHz
- ◆ Separation: ≥ 50 dB
- ◆ Operating current: 28mA
- ◆ Operating volt: 1.5~3v
- ◆ Transmission range: 88.1-107.9MHz(interval 0.2MHz)
- ◆ Temperature: $1000 \pm 1^\circ\text{C}$
- ◆ Power source: 2AAA batteries or the car's power source
- ◆ Transmit distance > 5 m
- ◆ Distortion $\geq 3\%$ (F=75KHz, f=1KHz)
- ◆ Signal to noise ratio ≥ 45 db
- ◆ DC Power: $5\text{V} \pm 0.5$

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
