

Ecolab Hand Hygiene Monitoring System User Manual

Data collection station

The data collection stations require connection to AC power via a wall outlet, as well as connection to a LAN cable to enable data transfer to the vendor's remote server.

Once a badge has accumulated a threshold amount of data, or the set time limit has been reached, the badge will begin looking for a Data collection station with which to communicate, as evidenced by the periodic blinking of the green LED. Bring the badge within several feet of a Data collection station to allow it to offload its accumulated data and receive updated configuration (if applicable) from the Data collection station.

FCC Compliance Statements (Data Collection Station)

Compliance Statement (Part 15.19)

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received,
including interference that may cause undesired operation.

Warning (Part 15.21)

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Interference Statement (Part 15.105 (b))

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada Compliance Statement

Section 7.1.5 of RSS-GEN

Operation is subject to the following two conditions:

- 1) this device may not cause interference, and
- 2) this device must accept any interference,
including interference that may cause undesired operation of the device.
