

# A huge choice of innovative ovens.

The oven is no doubt one of the most important appliances in your kitchen. Choosing the right oven to suit the space you have and the way you want to cook is key to the success of your new kitchen.

## Single and double ovens

A single oven has a combined grill and is ideally suited for installation in-column or beneath a hob. A double oven is installed at eye level which is the most convenient working height.

The two cavities mean you can use the oven and the grill at the same time, or you have a second oven, perfect for everyday meals or entertaining friends & family. If you want the convenience of a double oven but do not have the space, then the built-under ovens are the perfect solution. Cleverly designed to replace a single oven and its housing, they offer double cavity cooking in the space of a single oven.

## Insight range

Unique 'light bar' makes this product a focal point in any kitchen - packed with features to offer you many different cooking options.

### Including:

- Multi-Function with up to 15 functions
- Temperature probe
- Menu guided cooking and interactive cooking displays
- Plus at this level you will also discover, pyrolytic, steam and Electrolux's unique heat and hold feature.

## Inspire range

A stunning Global Design featuring glass fascias and a linear look.

### Including:

- Electronic clocks on all models
- Some ovens feature catalytic liners to make cleaning that little bit easier.

## Intuition range

Features the fresh Global Design - complementing today's modern kitchens.

### Including:

- Static or fan oven
- 'A' energy rated.

## You'll love our stunning design of ovens.

The Built-in range of ovens features a stunning design in line with today's and tomorrow's kitchen trends.

The design is distinct, with a host of features including light bars, keep warm function, Multi-Function oven with steam and easy to use interactive displays, all because Electrolux is "Thinking of You".

## Functions

Are you a person who has a passion for cooking and who loves to entertain friends and family with the result? Electrolux offers a wide range of functions that will help you to cook the perfect meal, just the way you like.

### Ultrafan®

An Ultrafan® oven makes use of a fan to gently circulate the heat evenly around the oven. The fan is at the back of the oven surrounded by a heating element. This clever design gives faster heat up times, shorter cooking times at lower temperatures and an even cooking temperature throughout the oven. As well as being ideal for batch baking, or cooking on more than one shelf, it ensures there is no transfer of flavours, so sweet and savoury dishes can be cooked together.

### Multi-Function

Allows you to choose fan cooking, conventional cooking and grilling, as well as combining other oven functions such as the pizza setting. They're all combined in one oven to make your life easier.

### Conventional Cooking

This method of cooking is perfect for your favourite recipes to be cooked in the traditional way, using top and bottom heating elements. This makes it particularly good for cooking pastry, cakes or for one shelf cooking.

### Turbo grilling

This gives an authentic spit roast effect without needing to baste or turn the joint. It combines the grill and the fan to give a crisp but tender result.

### Top heat

Perfect for browning dishes such as shepherd's pie or lasagne.

### Defrost

The fan simply circulates the air around the oven. This allows you to defrost food quickly and hygienically in half the time without having to use a microwave.

### Fast heat up

Quickly heat your oven to the required temperature saving you time.

### Pizza setting

This is the ideal way to ensure a nice crispy base with a succulent, melted topping every time.

### Bottom heat

Ideal for crisp pastry bases, reheating food, and if used at a low temperature, for warming plates.

### Single and dual circuit grill

All ovens offer traditional grilling with variable control. The dual circuit grill may be used on the economy setting when grilling smaller items as it only uses part of the grill.

### Slow cook

Uses a low temperature to gently cook food. Ideal for casseroles and joints.

### Temperature probe

The temperature probe allows you to measure whether the joint is ready without even opening the oven door. It takes the guess work out of meat cooking and is ideal for Beef Wellington. Whilst this is a method of cooking for most people, you'll soon be so used to a perfectly cooked joint, you'll wonder how you ever managed without it.

### Keep Warm

A great, unique feature which is aligned to today's busy lifestyles - this function keeps food warm in the same way a hostess trolley would - maintaining the temperature at 80 degrees to prevent drying or condensation build up.

### Heat + Hold

Heat + Hold is selected before you start cooking and automatically switches to a set 30 minute 'keep warm' function at the end of cooking. This function is used in conjunction with the timer. Ideal for guests who may be running late.

### Energy Efficiency

All single ovens are 'A' rated for the very best efficiency.

## Features

We present appliances with design, features and performance in a class of their own. We have got all the features you could wish for because we were thinking of you when we developed these appliances. We were thinking of making your kitchen life a little bit more relaxed and fun.

### Pyrolytic Cleaning - ovens that clean themselves

 It's the only cleaning function that cleans all of the oven - top, sides, door, light and oven base - plus it's efficient, and extremely safe to use with the oven being designed around the pyrolytic function - rather than the other way round.

- Pyrolytic ovens remove the need for you to spend your time cleaning your oven by hand
- It is more friendly to the environment as you do not need to use cleaning products on your oven.

### Catalytic liners - to help your oven stay clean

A special Catalytic coating is used on many of the ovens which absorbs any splashes during cooking to help keep the oven cleaner. When the oven is set to its highest temperature the special coating then helps clean off the splashes.

### Easy to clean enamel

With a durable high gloss enamel interior making it easier to wipe away grease and spillage immediately after cooking. The construction of the door in single ovens allows you to remove the door and the glass for very easy cleaning.

### Smell filter

The smell control system is ideal for today's modern open plan living. It's selectable, minimizes unpleasant smells and is maintenance free as it cleans itself.

### Light bar

Creates a soft look, and a focal point in the kitchen with this stunning light bar and design, to complement today's modern kitchens.

### Interactive/menu guided display

With interactive control the oven can guide you through your cooking process. It makes programme selection simple. Also it has built-in recipes to make life even easier. If you want to leave the cooking to someone else you can even programme your favourite dish in to the oven and all the timings will be held. This feature also tells you when to clean your oven.

### Safety for you and your family

The inner and outer panes of glass in our oven doors are heat reflective, and depending upon the model chosen, two, three or four panes of glass are used in total to ensure the outer door temperature is cooler. This reduces the risk of injury, giving you peace of mind, as well as making the oven more economical to use. Thoughtful features like auto-stop, anti-tip shelves ensure your oven is safer to use. Many models include a grill guard to prevent you accidentally touching the grill element.

### Baking chart

In some Insight single ovens there is a baking and cooking function guide which helps you to choose the right way to cook your food.

# A multifunction oven with Auto Cooking... be the cook of your dreams.

Do you aspire to the results achieved by TV chefs? Mouth watering foods that look like they've come straight out of the pages of a magazine? It's called Auto Cooking - simply prepare your chosen recipe and let the oven do the rest. Now create food you could only dream about.

## Choose your cooking category

### Baking

Ideal for traditional home baking, be it the Victoria Sandwich or German Strudel to apple pies or home-made bread.

### Roasting

Loin of pork, duck or a well done beef joint or lamb - pink, take the guess work away, just select the required taste.

### Convenience food

From frozen to fresh ready meals, from pasta to pastry to potatoes, cook or reheat to perfection.

### Oven dishes

Great dishes like potato gratin, soufflés, rice or bread and butter pudding - just like grandma made.

### Pizza

Whether your pizza is freshly homemade, pre-prepared, thick, thin, or even calzone - auto cook delivers fantastic results.

## Tasty technology

Electrolux have a solution with Auto Cooking - simply choose the cooking category, select the desired menu option and follow the on-screen instructions.

We were thinking you might want to be in control with the 11 heating functions allowing you to cook manually.

Inspiro not only knows how to cook, but also cleans itself thanks to the Pyrolytic auto cleaning system. Once the Pyrolytic function has been selected, the oven heats up to 500°C and burns off the most stubborn cooking residues, leaving only a light ash, which can be easily wiped away with a damp cloth.

INSPIRO

## EOC69400

Multi-Function oven with Auto Cooking - 5 different cooking categories with a variety of menu options for perfect cooking results

### Oven functions:

- Multi-Function - for complete cooking flexibility

# A Multi-function oven with steam... the healthier way to cook.

The Electrolux Combination Oven. Chefs have a secret that helps them create food that's crisp and golden while at the same time being delicious and succulent. It's called combination cooking.

## Steam Cooking

Hot air and steam combine to deliver extraordinary results – in both taste and presentation. Restaurants have had this advantage for years. Now it's your turn.

Electrolux have a solution with a full size single multi function oven with steam - combining traditional cooking with all the healthier benefits of steam, retaining all the flavours and nutrients in the food (reducing the need for fat and salt) with the ability to give golden crispy results.

- Steam cooking retains the nutrients and vitamins within the food - also the colour and texture.
- Steam and conventional heat gives fantastic cooking results which look good enough to eat.

## Steam levels

### Full steam

Ideal for vegetables, rice or anything you would generally steam.

### Partial steam

Combines steam and heat and is perfect for cooking your roast chicken, bread or anything you want crispy on the outside whilst retaining the moisture.

### Half steam

Perfect for reheating without drying.
