Safety precautions

Ultra Silencer should only be used by adults and only for normal vacuuming in a domestic environment. The vacuum cleaner features double insulation and does not need to be earthed.

Never vacuum:

If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified person in order to avoid a hazard. Never use the vacuum cleaner if the cable is damaged. Damage to the machine's cable is not covered by the warranty.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Children should be supervised to ensure that they do not play with the appliance.

Please remove the plug from the socket outlet before cleaning or maintaining the appliance.

Never vacuum:

- In wet areas.
- Close to flammable gases etc.
- When housing shows visible signs of damage.
- On sharp objects.
- On hot or cold cinders, lighted cigarette butts, etc.
- On fine dust, for instance from plaster, concrete, flour, hot or cold ashes.

Electrical cable precautions:

- A damaged cable should only be replaced by an authorised Electrolux service centre.
- Damage to the machine's cable is not covered by the warranty.
- Never pull or lift the vacuum cleaner by the cable.
- Disconnect the plug from the mains before cleaning or maintenance of the vacuum cleaner.
- Regularly check that the cable is not damaged. Never use the vacuum cleaner if the cable is damaged.

All servicing and repairs must be carried out by an authorised Electrolux service centre. Be sure to keep the vacuum cleaner in a dry place.

BEFORE STARTING

- 1 a Ensure that the machine's carrying handle is folded down. Then open the front cover on the machine and check that the dust bag, s-bag®, and the motor filter are in place.
- 1 b Fold up the carrying handle until it clicks into place. Then open the back lid on the machine and check that the exhaust filter is in place.
- 2 Insert the hose until the catches click to engage (press the catches to release the hose).
- 3 Attach the extension tubes or telescopic tube (certain models only) to the hose handle and hard floor nozzle by pushing and twisting together. (Twist and pull apart to dismantle.)
- 4 Insert the hose into the hose handle until the catches click to engage (press the catches to release the hose).
- 5 Extend the electric cable and connect it to the mains. The vacuum cleaner is fitted with a cable winder.
- 6a Press the foot pedal to rewind the cable (take hold of the plug to prevent it striking you).
- 6b Press the small button on the pedal to activate Autoreverse (on certain models only). The length of the cable will now be continually adjusted to requirements. Press the whole pedal to de-activate Autoreverse. The cable is now fixed, as on a normal cable winder.
- 7 Press the On/Off button with the foot to start the vacuum cleaner.
- 8 Adjust suction power using the suction control on the vacuum cleaner or the suction control on the hose handle.
- 9 A practical parking position (and at the same time a backsaving feature) when you pause during cleaning.
- 10 A parking position which makes it easy to carry and store the vacuum cleaner.
- 11 a When you want to carry the vacuum cleaner, lift the carrying handle until it clicks into place.
- 11 b You can also carry the vacuum cleaner using the handle on the lower front edge of the machine.

GETTING THE BEST RESULTS

Use the nozzles as follows:

Carpets: Use the carpet/hard floor nozzle with the lever in position (1). Reduce suction power for small carpets.

Hard floors: Use the carpet/hard floor nozzle with the lever in position (2). If you have a carpet/hard floor nozzle with two pedals – press the pedal on the right (3) to vacuum up animal hair, etc. more effectively.

Wooden floors: Use the parquet nozzle (certain models only, 4).

Upholstered furniture: Use the combination nozzle as shown in (5).

Curtains, lightweight fabrics, etc.: Use the combination nozzle as shown in (5). Reduce suction power if necessary.

Frames, bookshelves, etc.: Use the combination nozzle as shown in (6) or Easy clean (7 – certain models only).

Crevices, corners, etc.: Use the crevice nozzle (8).

Using the power nozzle

(Requires an Ultra Silencer equipped with a power socket. The power nozzle is delivered only with certain models, or could be bought as an accessory.)

- 9 Attach the nozzle to the tube.
- 10 Connect the power nozzle to the socket on the vacuum cleaner.
- 11 Use the clips to secure the cable along the tubes and hose.
- 12 The power nozzle starts operating when the vacuum cleaner is switched on.

Using the turbo nozzle

(certain models only)

- 13 Attach the nozzle to the tube.

Note: Do not use the power or turbo nozzle on skin rugs, rugs with long fringes or a pile depth exceeding 15 mm. To avoid damaging the carpet, do not keep the nozzle stationary whilst the brush is rotating. Do not pass the nozzle across electric cables, and be sure to switch off the vacuum cleaner immediately after use.

REPLACING THE DUST BAG, S-bag®

- 1 The dust bag, s-bag® must be replaced latest when the indicator window is completely red. Read with the nozzle lifted up.
- 2 Fold down the carrying handle. Press the catches on the hose, remove the hose and open the cover.
- 3 Lift out the insert holding the s-bag®.
- 4 Pull the cardboard to remove the s-bag® from the insert. This automatically seals the s-bag® and prevents dust leaking out.
- 5 a Insert a new s-bag® by pushing the cardboard right into the end of the groove in the insert.
- 5 b Attach the insert by placing it on the back pegs in the bag compartment. Then fold down the insert and close the cover.

Note. Replace the s-bag® even if it is not full (it could be obstructed). Also replace after vacuuming carpet-cleaning powder. Be sure to use only an original Electrolux dust bags, s-bag® Classic or s-bag® Clinic.

Replacement of the motor filter (Ref. No. EF54)

should be done with every 5th replacement of the dust bag, s-bag®

- 6 Fold down the carrying handle. Press the catches, remove the hose and open the front cover.
- 7 Lift out the insert holding the s-bag®.
- 8 Pull the motor filter holder upwards until it comes away from the groove.
- 9 Carefully pull the old, dirty filter out of the filter holder and replace it with a new motor filter.
- 10 Reattach the filter holder containing the new motor filter.
- 11 Replace the insert holding the s-bag® and then close the cover.

Replacement of the exhaust filter

should be done with every 5th replacement of the dust bag, s-bag®

There are three types of exhaust filter:

- Micro filter* (Ref. No. EF 17)
- Hepa H12* non washable (Ref. No. EF H12)
- Hepa H12* washable (Ref. No. EF H12W)

The filters must always be replaced with new ones and cannot be washed (except the Hepa H12* washable)

- 12 Fold up the carrying handle until it clicks into place.
- 13 Place your thumbs on the back edge of the lid and then open the lid by pulling the handle backwards and upwards with your index/middle finger.
- 14 Lift out the filter. Insert a new filter and replace the lid as shown.

CLEANING THE HOSE AND NOZZLE

The vacuum cleaner stops automatically if the nozzle, tube, hose or filters and s-bag® becomes blocked. In such cases, disconnect from mains and allow to cool for 20-30 minutes. Clear blockage and/or replace filters and s-bag® and restart.

Tubes and hoses

1 Use a cleaning strip or similar to clear the tubes and hose.
2 It may also be possible to remove the obstruction in the hose by squeezing it. However, be careful in case the obstruction is caused by glass or needles caught inside the hose.

Note: The warranty does not cover any damage to the hose caused by cleaning it.

Cleaning the floor nozzle

- 3 To avoid deterioration of suction power, frequently clean the carpet/hard floor nozzle. The easiest way to clean it is by using the hose handle.
- 4 Press each wheel-hub and draw away the wheels.
- 5 Remove dust-balls, hair or other objects that may be entangled. Use the crevice nozzle to clean the wheel axles. Replace the wheels by pressing them onto the axles.
- 6 Larger objects can be accessed by removing the connection hose (press the small catches located on each side and simultaneously draw the connection tube outwards in an upright position).
- 7 Remove the object(s) and replace the connection hose.

Cleaning the power nozzle

(certain models only)

- 8 Disconnect from the mains, and remove entangled threads etc. by snipping them away with scissors.
- 9 Use a screwdriver to remove the nozzle cover.
- 10 Remove the brush cylinder and bearings, then clean as necessary.
- 11 To clean the wheels, gently lever them from their mountings and clean as necessary.
- 12 Replace the cover and make sure it is securely fastened.

Cleaning the turbo nozzle

(certain models only)

- 13 Disconnect the nozzle from the vacuum cleaner tube and remove entangled threads, etc. by snipping them away with scissors. Use the hose handle to clean the nozzle.

English

TROUBLESHOOTING AND CONSUMER INFORMATION

Troubleshooting

The vacuum cleaner does not start

- 1 Check that the cable is connected to the mains.
- 2 Check that the plug and cable are not damaged.
- 3 Check for a blown fuse.

The vacuum cleaner stops

- 1 Check whether the dust bag, s-bag® is full. If so, replace it with a new one.
- 2 Is the nozzle, tube or hose blocked?
- 3 Are the filters blocked?

Water has entered the vacuum cleaner

It will be necessary to replace the motor at an authorised Electrolux service centre.

Damage to the motor caused by the penetration of water is not covered by the warranty.

Consumer information

Electrolux decline all responsibility for all damages arising from any improper use of the appliance or in cases of tampering with the appliance.

This product is designed with the environment in mind. All plastic parts are marked for recycling purposes. For details see our web site: www.electrolux.com
