

## YOUR FREEDOM OF CHOICE

If you are a regular reader of Surround & Hi-Fi magazines, you will most likely have come across Eltax Liberty. This is without comparison our most thoroughly tested and well-respected range to date. The Liberty range has time and again been awarded top ratings in numerous editions of European Surround & Hi-Fi magazines.

We know that the Liberty range has received many positive words and reviews due to the fact that we have added details usually reserved for loudspeakers within a higher price bracket. For instance this can be seen on the bass unit chassis, which is manufactured using newly developed “non-resonant” plastic composite material.

## Specifications
