1. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
2. Driver Version 7.07.04-b6 Driver is integrated into the kernel.
3. SNIA HBA API Supported.
4. The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
5. Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
6. Red Hat does not currently support reiserfs on RHEL 3.0. As a result, EMC supports only the ext2 and ext3 filesystems on RHEL 3.0 unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
7. Please see the HP website for supported BL c-Class model numbers.
The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
8. EMC supports the following filesystems: ext2, ext3, gfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
9. Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
10. RHEL Xen kernel supported.
11. Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
12. Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
13. Driver Version 8.2.0.33.3p Driver is integrated into the kernel.
14. BIOS 6.00a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
15. Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
16. Driver Version 8.1.10.9 Driver is integrated into the kernel.
17. BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
18. Driver Version 8.1.10.12 This in kernel driver is only available on errata kernels equal to or greater than 2.6.18-53.1.14.el5. Driver is integrated into the kernel.
19. PowerPath is not supported.
20. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
21. Driver Version 8.02.09-d0-rhel4.7-04 Driver is integrated into the kernel.
22. BIOS 1.24 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
23. Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
24. BIOS 1.52 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
25. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
26. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
27. The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
28. EMC provides in-depth documentation for configurations with QLogic adapters that contains helpful information for installing and configuring QLogic adapters with EMC Storage. This documentation is located in the EMC section of the QLogic website (<http://www.qlogic.com>) along with HBA drivers, and BIOS.
29. Single node support only with Emulex 4Gb HBAs
30. Driver Version 8.02.00-k5-rhel5.2-03 Driver is integrated into the kernel.
31. Driver Version 8.02.00-k5-rhel5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
32. Boot from SAN with Linux native multipathing software (DM-MPIO) is not supported.
33. Legacy (x86) boot mode supported only for this server. EFI boot is not supported. EFI boot code should be removed from the HBA if installed.
34. Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
35. Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
36. Driver Version 7.3.3 Driver is integrated into the kernel.
37. Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
38. Driver Version 8.01.04-d7 Driver is integrated into the kernel.
39. Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
40. Driver Version 8.0.16.27 Driver is integrated into the kernel.
41. BIOS 3.03a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
42. BIOS 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
43. Driver Version 8.0.16.40 Driver is integrated into the kernel.
44. Driver Version 8.0.2.22 Driver is integrated into the kernel.
45. Firmware Version 1.10a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
46. Driver Version 8.02.00.06.05.03-k Driver is integrated into the kernel.
47. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
48. BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
49. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
50. NEC SigmaBlade servers are not supported with Windows 2003 SP1 (x86 and x64 versions.)
51. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
52. BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
53. EMC recommends upgrading to the most recent, EMC-Approved, HBA driver.
54. Firmware Version 1.91a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
55. Driver Version 7.3.6 Driver is integrated into the kernel.
56. Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.

57. BIOS 2.01a2 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
58. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
59. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LP1050–E.
60. EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
61. Driver Version 8.01.04–d8 Driver is integrated into the kernel.
62. Supported kernels: 2.6.9–55.EL, 2.6.9–55.0.2.EL, 2.6.9–55.0.6.EL, 2.6.9–55.0.9.EL, 2.6.9–55.0.12.EL, 2.6.9–55.0.14.EL. Confirm kernel support with server vendor.
63. Firmware Version 2.70a5
64. BIOS 1.70a3
65. PowerEdge 2550 and PowerVault 775N support a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
66. Supported kernels: 2.6.18–53.e15, 2.6.18–53.1.4.e15, 2.6.18–53.1.6.e15, 2.6.18–53.1.13.e15, 2.6.18–53.1.14.e15, 2.6.18–53.1.19.e15, 2.6.18–53.1.21.e15. Confirm kernel support with server vendor.
67. Firmware Version 1.91a5
68. This HBA is equivalent to the QLogic QLA2340.
69. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
70. Driver Version 8.01.07–k7 Driver is integrated into the kernel.
71. BIOS 2.02
72. PCI–X slots in this server only support low–profile hbas with low–profile brackets. Please ensure your HBA vendor has included the proper bracket to fit this server.
73. BIOS 1.54
74. BIOS 3.03a7 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
75. Firmware Version 1.00a12 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
76. Driver Version 8.01.07–d4 Driver is integrated into the kernel.
77. Supported kernels: 2.6.9–67.EL, 2.6.9–67.0.1.EL, 2.6.9–67.0.4.EL, 2.6.9–67.0.7.EL, 2.6.9–67.0.15.EL, 2.6.9–67.0.20.EL, 2.6.9–67.0.22.EL. Confirm kernel support with server vendor.
78. **FSC Fibre Channel module. Dual channel 4GBit/s HBA for BX6xx–series blade servers only.**
79. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
80. Driver Version 8.0.16.34 Driver is integrated into the kernel.
81. BIOS 1.43
82. Virtual machines running on VMWare ESX are supported booting from the array.
83. VMWare ESX Server itself is supported booting from external array.
84. **FSC Fibre Channel module. Dual channel 2GBit/s HBA for BX6xx–series blade servers only.**
85. BIOS 1.48 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
86. Dual port PCI–X fibre channel mezzanine card option is embedded. No PCI/PCI–X slots available.
87. Driver Version 7.07.04b6 Driver is integrated into the kernel.
88. BIOS 1.43 Supports BIOS 1.43. Available at <http://www.qlogic.com>
89. Driver Version 8.01.02–d4 Driver is integrated into the kernel.
90. Driver Version 8.01.07–k1 Driver is integrated into the kernel.
91. Supported kernels: 2.6.9–34.EL, 2.6.9–34.0.1.EL, 2.6.9–34.0.2.EL. Confirm kernel support with server vendor.
92. Supported kernels: 2.6.18–8.EL5, 2.6.18–8.1.1.EL5, 2.6.18–8.1.3.EL5, 2.6.18–8.1.4.EL5, 2.6.18–8.1.6.EL5, 2.6.18–8.1.8.EL5, 2.6.18–8.1.10.EL5, 2.6.18–8.1.14.EL5, and 2.6.18–8.1.15.EL5. Confirm kernel support with server vendor.
93. Driver Version 8.1.10.3 Driver is integrated into the kernel.
94. Driver Version 8.01.02–d4 Driver is integrated into the kernel. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
95. Driver Version 8.01.02–d4 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
96. Driver Version 8.0.16.18 Driver is integrated into the kernel.
97. Driver/BIOS are available at <http://www.qlogic.com>
98. Driver Version 7.07.00
99. Driver Version 7.07.05 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
100. BIOS 1.12
101. BIOS 1.24 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com> Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
102. Driver Version 8.01.04–d7 Driver is integrated into the kernel. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
103. Driver Version 8.2.0.22 Driver is integrated into the kernel.
104. This HBA is equivalent to the Qlogic QLE2562
105. This HBA is equivalent to the Qlogic QLE2560
106. BIOS 3.02a6
107. BIOS 1.52
108. Mixing 2Gb and 4Gb fibre channel expansion cards is not supported in this server.
109. Driver Version 7.07.05
110. Requires IBM Multi–Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to be installed in bays 8 & 10.
111. Driver Version 7.07.00 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
112. This HBA is equivalent to the Emulex LPe12002
113. This HBA is equivalent to the Emulex LPe12000
114. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150–E.
115. Driver Version 8.01.05 Driver/BIOS are available at <http://www.qlogic.com>
116. Supported kernels: 2.6.9–11.EL. Confirm kernel support with server vendor.
117. For Emulex attach, a LUN within the range of 000 –007 must exist in order for the FC driver to scan all devices.
For QLogic attach, LUN 000 must exist in order for the FC driver to scan all devices.
118. Booting from the SAN with PowerPath is not supported.
119. VxVM is not supported on servers booting from the array.
120. Driver Version 8.00.03b–1 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
121. Driver Version 8.0.16.6_x2 Driver is integrated into the kernel.
122. BIOS 1.05
123. BIOS 3.02a6 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
124. Internal port(s) on Qlogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
125. BIOS 1.64 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
126. BIOS 1.12 Requires BIOS 1.12 available in the EMC–approved section of the QLogic website at <http://www.qlogic.com>
127. Internal port(s) on QLogic or McData 4Gb FC switch module(s) must be set to 4Gb to SAN boot.
128. Support for 4GB fibre channel HBAs requires an IBM SP0RE to be submitted to IBM with a request of system BIOS 56A.
129. Driver Version 8.0.16.17 Driver is integrated into the kernel.
130. For use with Intel Paxville CPUs, this kernel revision or later is required.
Please refer to the server manufacturer's website for the minimum required BIOS revisions for supporting Paxville.
131. Supported kernels: 2.6.9–22.EL, 2.6.9–22.0.1.EL, 2.6.9–22.0.2.EL. Confirm kernel support with server vendor.
132. Driver Version 8.02.00–k5–rhel5.2–04 This driver is found in kernel errata 2.6.18–92.1.6.e15 and higher. Qualified with: HP–UX 11i Support Plus Sept '02 bundle = GOLDAPPS11i June '02, GOLDBASE11i June '02 & HWENABLE11i Sept '02.
133. BIOS 2.04 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
134. Firmware Version 1.91a2 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
135. FCode Value 1.70a3 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
136. Driver Version 8.0.16.18
137. Firmware Version 1.90a5 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
138. BIOS 1.05 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com> Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
139. Driver Version 8.01.06 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
140. dual core machine not support
141. Driver Version 8.0.16.6_p3 Driver is integrated into the kernel.
142. Driver Version 8.01.00 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
143. This system is supported only when the IBM ServeRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
144. Driver Version 8.0.16.6_x2–2
145. Driver Version 8.0.16.6_x2
146. Driver Version 7.07.05 Driver/BIOS are available at <http://www.qlogic.com>
147. Driver Version 8.01.06 Driver/BIOS are available at <http://www.qlogic.com>
148. Driver Version 8.01.16.17

149. BX6xx-series systems use an embedded fibre channel controller. Contact Fujitsu Siemens to acquire the proper BIOS for the embedded fibre channel controller.
150. Driver Version 8.02.00-k5-rhe5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
151. EMC provides documentation for boot configurations that contains helpful information for systems booting from EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
152. BIOS 1.12 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
153. Firmware Version 2.72a2
154. Driver Version 7.3.2 This driver is included in the VMware ESX kernel.
155. Driver Version elx_7.4.0.13 This driver is included in the VMware ESX kernel.
156. Driver Version 2.01a4
157. Driver Version 2.10a7
158. Driver Version 1.30a6 Refer to EMC knowledgebase article emc156275 for important information about using the HBAnyware statistics tab with this driver version. Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed.
159. Driver Version 1.20a3 Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed.
- To obtain this hotfix, fill out the hotfix request form at <http://support.microsoft.com/hotfix/KBHotfix.aspx?kbnm=943545&kbln=en-us> STORPort Miniport Driver
- To obtain this hotfix, fill out the hotfix request form at <http://support.microsoft.com/hotfix/KBHotfix.aspx?kbnm=943545&kbln=en-us> STORPort Miniport Driver
160. BIOS 2.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
161. BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
162. Driver Version 8.1.10.9 This in kernel driver is only available on errata kernels equal to or greater than 2.6.18-53.1.14.el5. Driver is integrated into the kernel.
163. Driver Version 8.1.10.12
164. Driver Version 8.01.04-k Driver is integrated into the kernel.
165. FCode Value 2.72a2
166. Firmware Version 1.92a1

Red Hat RHEL [AMD-64]

1. Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
2. SNIA HBA API Supported.
3. Driver Version 7.3.3 Driver is integrated into the kernel.
4. Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
5. The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
6. Red Hat does not currently support reiserfs on RHEL 3.0. As a result, EMC supports only the ext2 and ext3 filesystems on RHEL 3.0 unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RFP.
7. BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
8. Firmware Version 1.91a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
9. Driver Version 7.3.6 Driver is integrated into the kernel.
10. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
11. Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.
12. Driver Version 7.07.04-b6 Driver is integrated into the kernel.

13. BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
14. Firmware Version 1.90a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
15. Driver Version 7.07.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
16. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
17. Driver Version 7.07.00 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
18. BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
19. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
20. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
21. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
22. BIOS 3.02a6
23. Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
24. Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
25. PowerPath is not supported.
26. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
27. Please see the HP website for supported BL c-Class model numbers.
The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
28. BIOS 6.00a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
29. Driver/BIOS are available at <http://www.qlogic.com>
30. Driver Version 7.07.05
31. BIOS 1.02
32. BIOS 1.64 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
34. BIOS 2.01a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
35. FCode Value 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
36. Firmware Version 1.91a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
37. BIOS 1.48 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
38. This HBA is equivalent to the QLogic QLA2340.
39. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.

1. Driver Version 7.07.04-b6 Driver is integrated into the kernel.
2. SNIA HBA API Supported.
3. BIOS 1.52 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
4. PowerPath is not supported.
5. The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
6. Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.
7. Red Hat does not currently support reiserfs on RHEL 3.0. As a result, EMC supports only the ext2 and ext3 filesystems on RHEL 3.0 unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
8. BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
9. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
10. Driver Version 7.3.6 Driver is integrated into the kernel.
11. Firmware Version 1.91a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
12. Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
13. Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
14. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LP1050-E.
15. BIOS 1.52
16. BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
17. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
18. BIOS 3.02a6
19. BIOS 3.03a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
20. Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
21. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
22. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.
23. Support for 4GB fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
24. This system is supported only when the IBM ServerRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
25. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
26. Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
27. BIOS 1.02
28. Driver Version 7.07.05
29. Driver/BIOS are available at <http://www.qlogic.com>
30. Driver Version 7.3.3 Driver is integrated into the kernel.
31. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
32. BIOS 1.24 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. Driver Version 7.07.00 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
34. Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
35. BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
36. This HBA is equivalent to the QLogic QLA2340.
37. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
38. BIOS 2.01a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
39. Driver Version 7.07.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
40. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
41. Driver Version 7.07.00
42. Firmware Version 1.90a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
43. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
44. PCI-X slots in this server only support low-profile HBAs with low-profile brackets. Please ensure your HBA vendor has included the proper bracket to fit this server.
45. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
46. BIOS 1.02 Driver/BIOS are available at <http://www.qlogic.com>
47. Driver Version 7.07.05 Driver/BIOS are available at <http://www.qlogic.com>
48. Firmware Version 1.91a5
49. Please see the HP website for supported BL c-Class model numbers. The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
50. BIOS 1.64 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
51. BIOS 6.00a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
52. Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>

53. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.

| 6 | HPQ Integrity BL860C | Red Hat RHEL [IA64] 5.3 ^{2, 6, 7, 8, 12} | PCI Express | HPQ QLogic QMH2462 4Gb FC HBA for HP c-Class Bladesystem (403619-B21) ^{4, 11} | FC-AL, FC-SW | EMC CLARiiON AX150 | Y |

- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Driver Version 8.02.09-d0-rhel4.7-04 Driver is integrated into the kernel.
- BIOS 1.64 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- EMC supports the following filesystems: ext2, ext3, gfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPO.
- RHEL Xen kernel supported.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- Driver Version 8.02.00-k5-rhel5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
- Driver Version 8.02.00-k5-rhel5.2-03 Driver is integrated into the kernel.
- Driver Version 8.02.00.06.05.03-k Driver is integrated into the kernel.
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
- Driver Version 8.01.07-d4 Driver is integrated into the kernel.
- Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.
- Driver Version 8.01.04-d8 Driver is integrated into the kernel.
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Driver Version 8.01.07-k7 Driver is integrated into the kernel.

Red Hat RHEL [IBM Power]

| Red Hat RHEL [IBM Power] | | | | | | | |
|--------------------------|-----------------------------------|---|----------|---|----------|--------------------|---------------|
| No. | Host System | Operating System | Host Bus | Host Bus Adapter | Topology | Storage Array | External Boot |
| 1 | IBM BladeCenter JS22 (Model 7998) | Red Hat RHEL [IBM Power] 4.6 AS/ES ^{2, 12} | PCI-X | IBM: Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{6, 8, 9, 11, 21} , QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{4, 6, 13} , QLogic Ethernet and 4Gb FC Exp Card (CFH, 39Y9306) ^{4, 5, 6, 13} | FC-SW | EMC CLARiiON AX150 | N |
| 2 | IBM BladeCenter JS22 (Model 7998) | Red Hat RHEL [IBM Power] 4.7 AS/ES ^{1, 2} | PCI-X | IBM: Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{6, 8, 9, 11, 19} , QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{3, 4, 6} , QLogic Ethernet and 4Gb FC Exp Card (CFH, 39Y9306) ^{3, 4, 5, 6} | FC-SW | EMC CLARiiON AX150 | N |
| 3 | IBM BladeCenter JS22 (Model 7998) | Red Hat RHEL [IBM Power] 5.1 AS/ES ^{2, 10} | PCI-X | IBM: Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{6, 7, 8, 9, 11} , QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{4, 6, 20} , QLogic Ethernet and 4Gb FC Exp Card (CFH, 39Y9306) ^{4, 5, 6, 20} | FC-SW | EMC CLARiiON AX150 | N |
| 4 | IBM BladeCenter JS22 (Model 7998) | Red Hat RHEL [IBM Power] 5.2 ^{2, 14, 15} | PCI-X | IBM Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{6, 8, 9, 11, 24} , IBM QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{4, 6, 16} , 41Y8527) ^{4, 6, 16, 23} , IBM QLogic Ethernet and 4Gb FC Exp Card (CFH, 39Y9306) ^{4, 5, 6, 16, 23} | FC-SW | EMC CLARiiON AX150 | N |
| 5 | IBM BladeCenter JS22 (Model 7998) | Red Hat RHEL [IBM Power] 5.3 ^{2, 15, 18} | PCI-X | IBM: Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{6, 8, 9, 11, 22} , QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{4, 6, 17} , QLogic Ethernet and 4Gb FC Exp Card (CFH, 39Y9306) ^{4, 5, 6, 17} | FC-SW | EMC CLARiiON AX150 | N |

- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Driver Version 8.02.09-d0-rhel4.7-04 Driver is integrated into the kernel.
- BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
- SNIA HBA API Supported.
- Driver Version 8.1.10.9 Driver is integrated into the kernel.
- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- BIOS 3.02a6 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Internal port(s) on Qlogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
- Driver Version 8.01.07-d4 Driver is integrated into the kernel.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- Native multipathing is not supported on boot-from-SAN configurations.
- Driver Version 8.02.00-k5-rhel5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
- Driver Version 8.02.00.06.05.03-k Driver is integrated into the kernel.
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- Driver Version 8.0.16.40 Driver is integrated into the kernel.
- Driver Version 8.01.07-k7 Driver is integrated into the kernel.

21. Driver Version 8.0.16.34 Driver is integrated into the kernel.
 22. Driver Version 8.2.0.33.3p Driver is integrated into the kernel.
 23. Driver Version 8.02.00-k5-rhel5.2-03 Driver is integrated into the kernel.
 24. Driver Version 8.2.0.22 Driver is integrated into the kernel.

- The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
- BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- SNIA HBA API Supported.
- Driver Version 8.02.00.06.05.03-k Driver is integrated into the kernel.
- EMC supports the following filesystems: ext2, ext3, gfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- RHEL Xen kernel supported.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Boot from SAN with Linux native multipathing software (DM-MPIO) is not supported.
- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Driver Version 8.0.16.40 Driver is integrated into the kernel.
- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- BIOS 2.01a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Legacy (x86) boot mode supported only for this server. EFI boot is not supported. EFI boot code should be removed from the HBA if installed.
- Driver Version 8.02.00-k5-rhel5.2-03 Driver is integrated into the kernel.
- Driver Version 8.02.00-k5-rhel5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
- BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- EMC provides in-depth documentation for configurations with QLogic adapters that contains helpful information for installing and configuring QLogic adapters with EMC Storage. This documentation is located in the EMC section of the QLogic website (<http://www.qlogic.com>) along with HBA drivers, and BIOS.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- Single node support only with Emulex 4Gb HBAs
- BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 8.1.10.9 Driver is integrated into the kernel.
- Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Driver Version 8.1.10.12 This in kernel driver is only available on errata kernels equal to or greater than 2.6.18-53.1.14.el5. Driver is integrated into the kernel.
- Driver Version 8.0.2.22 Driver is integrated into the kernel.
- BIOS 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Driver Version 8.0.16.27 Driver is integrated into the kernel.
- BIOS 1.02 Driver/BIOS are available at <http://www.qlogic.com>
- Driver Version 8.01.06 Driver/BIOS are available at <http://www.qlogic.com>
- Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- NEC SigmaBlade servers are not supported with Windows 2003 SP1 (x86 and x64 versions.)
- Firmware Version 2.70a5
- Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 8.01.04-d7 Driver is integrated into the kernel.
- Driver Version 8.2.0.22 Driver is integrated into the kernel.
- Driver Version 8.2.0.33.3p Driver is integrated into the kernel.

42. BIOS 1.24 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
43. BIOS 1.52
44. BIOS 1.70a3
45. Supported kernels: 2.6.18–53.el5, 2.6.18–53.1.4.el5, 2.6.18–53.1.6.el5, 2.6.18–53.1.13.el5, 2.6.18–53.1.14.el5, 2.6.18–53.1.19.el5, 2.6.18–53.1.21.el5. Confirm kernel support with server vendor.
46. BIOS 1.05 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com> Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
47. Driver/BIOS are available at <http://www.qlogic.com>
48. Driver Version 8.01.07–k7 Driver is integrated into the kernel.
49. This HBA is equivalent to the QLogic QLA2340.
50. BIOS 1.24
51. BIOS 1.05
52. BIOS 1.47 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
53. BIOS 2.06 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
54. Firmware Version 1.00a12 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
55. BIOS 3.03a7 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
56. Supported kernels: 2.6.9–55.EL, 2.6.9–55.0.2.EL., 2.6.9–55.0.6.EL, 2.6.9–55.0.9.EL, 2.6.9–55.0.12.EL, 2.6.9–55.0.14.EL. Confirm kernel support with server vendor.
57. Driver Version 8.01.07–d4 Driver is integrated into the kernel.
58. Supported kernels: 2.6.9–67.EL, 2.6.9–67.0.1.EL, 2.6.9–67.0.4.EL, 2.6.9–67.0.7.EL, 2.6.9–67.0.15.EL, 2.6.9–67.0.20.EL, 2.6.9–67.0.22.EL. Confirm kernel support with server vendor.
59. BIOS 3.02a6
60. **FSC Fibre Channel module. Dual channel 4GBit/s HBA for BX6xx–series blade servers only.**
61. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
62. Driver Version 8.0.16.34 Driver is integrated into the kernel.
63. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack–mountable servers and are supported.
64. BIOS 3.03a3 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
65. Supported kernels: 2.6.9–34.EL, 2.6.9–34.0.1.EL, 2.6.9–34.0.2.EL. Confirm kernel support with server vendor.
66. Driver Version 8.01.02–d4 Driver is integrated into the kernel.
67. Driver Version 8.01.04–d8 Driver is integrated into the kernel.
68. Driver Version 8.01.07–k1 Driver is integrated into the kernel.
69. BIOS 2.01 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
70. Driver Version 8.01.02–d4 Driver is integrated into the kernel. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
71. Driver Version 8.01.02–d4 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
72. Driver Version 8.0.16.18 Driver is integrated into the kernel.
73. Supported kernels: 2.6.18–8.EL5, 2.6.18–8.1.1.EL5, 2.6.18–8.1.3.EL5, 2.6.18–8.1.4.EL5, 2.6.18–8.1.6.EL5, 2.6.18–8.1.8.EL5, 2.6.18–8.1.10.EL5, 2.6.18–8.1.14.EL5, and 2.6.18–8.1.15.EL5. Confirm kernel support with server vendor.
74. Driver Version 8.1.10.3 Driver is integrated into the kernel.
75. EMC VolumeLogix Software required for multiple BladeServers when direct–attached to EMC Symmetrix storage.
76. Virtual machines running on VMWare ESX are supported booting from the array.
77. VMWare ESX Server itself is supported booting from external array.
78. PowerPath is not supported.
79. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
80. BIOS 1.52 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
81. **FSC Fibre Channel module. Dual channel 2GBit/s HBA for BX6xx–series blade servers only.**
82. BIOS 1.24 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com> Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
83. Driver Version 8.01.04–d7 Driver is integrated into the kernel. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
84. **Certain HBA models may be too large to fit into this server's PCI or PCI–X slots. A low–profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
85. Firmware Version 1.10a5 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
86. Requires IBM Multi–Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
87. Mixing 2Gb and 4Gb fibre channel expansion cards is not supported in this server.
88. VxVM is not supported on servers booting from the array.
89. Driver Version 8.01.06 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
90. For use with Intel Paxville CPUs, this kernel revision or later is required.
Please refer to the server manufacturer's website for the minimum required BIOS revisions for supporting Paxville.
91. For Emulex attach, a LUN within the range of 000 –007 must exist in order for the FC driver to scan all devices.
For QLogic attach, LUN 000 must exist in order for the FC driver to scan all devices.
92. Supported kernels: 2.6.9–22.EL, 2.6.9–22.0.1.EL, 2.6.9–22.0.2.EL. Confirm kernel support with server vendor.
93. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150–E.
94. Driver Version 8.0.16.17 Driver is integrated into the kernel.
95. Driver Version 8.01.00 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
96. Driver Version 8.0.16.6_x2 Driver is integrated into the kernel.
97. Driver Version 8.0.16.6_x2–2 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
98. Driver Version 8.0.16.6_x2–2 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com> The Emulex 8.0.16.6_x2–2 package supersedes the Emulex 8.0.16.6_x2–1 package.
99. Please see the HP website for supported BL c–Class model numbers.
The supported model numbers are available in the quickspecs documents available for each BL c–Class blade.
100. BIOS 1.64 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
101. Driver Version 8.02.09–d0–rhel4.7–04 Driver is integrated into the kernel.
102. BIOS 6.00a5 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
103. dual core machine not support
104. Driver Version 8.0.16.6_p3 Driver is integrated into the kernel.
105. EMC recommends upgrading to the most recent, EMC–Approved, HBA driver.
106. PCI–X slots in this server only support low–profile hbAs with low–profile brackets. Please ensure your HBA vendor has included the proper bracket to fit this server.
107. Internal port(s) on QLogic or McData 4Gb FC switch module(s) must be set to 4Gb to SAN boot.
108. Internal port(s) on QLogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
109. BIOS 3.02a6 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
110. Support for 4Gb fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
111. Firmware Version 1.91a5 Available in the EMC–approved section of the Emulex website. <http://www.emulex.com>
112. FCode Value 2.72a2
113. BIOS 2.04 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
114. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LP1050–E.
115. EMC provides documentation for boot configurations that contains helpful information for systems booting from EMC storage. Visit EMC Powerlink and download part number 300–000–603 for the Windows Host Connectivity Guide.
116. Driver Version 8.02.00–k5–rhel5.2–04 This driver is found in kernel errata 2.6.18–92.1.6.el5 and higher. Qualified with: HP–UX 11i Support Plus Sept '02 bundle = GOLDAPPS11i June '02, GOLDBASE11i June '02 & HWEnable11i Sept '02.
117. Driver Version 8.01.04–d8
118. This system is supported only when the IBM ServeRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
119. Driver Version 8.0.14.34 Driver is integrated into the kernel.
120. This HBA is equivalent to the QLogic QLE2562
121. This HBA is equivalent to the QLogic QLE2560
122. This HBA is equivalent to the Emulex LPe12002
123. This HBA is equivalent to the Emulex LPe12000
124. Supported kernels: 2.6.9–11.EL. Confirm kernel support with server vendor.
125. Driver Version 8.01.05 Driver/BIOS are available at <http://www.qlogic.com>
126. Driver Version 8.2.0.333.3p Driver is integrated into the kernel.
127. Driver Version 8.2.0.333.3p Driver is integrated into the kernel.
128. BX6xx–series systems use an embedded fibre channel controller. Contact Fujitsu Siemens to acquire the proper BIOS for the embedded fibre channel controller.
129. Driver Version 8.00.03b–1 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
130. Booting from the SAN with PowerPath is not supported.

131. Driver Version 8.02.00-k5-rhe5.2-04 This driver is found in kernel errata 2.6.18-92.1.6.el5 and higher. Driver is integrated into the kernel.
132. Firmware Version 1.91a5
133. BIOS 1.12 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
134. Driver Version 8.0.16.18
135. Firmware Version 2.72a2
136. Driver Version 7.3.2 This driver is included in the VMware ESX kernel.
137. Driver Version elx_7.4.0.13 This driver is included in the VMware ESX kernel.
138. Driver Version 2.10a7
139. Driver Version 2.01a4
140. Driver Version 1.30a6 Refer to EMC knowledgebase article emc156275 for important information about using the HBAnyware statistics tab with this driver version. Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed.
141. Driver Version 1.20a3 Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed.
142. BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
143. Driver Version 8.1.10.12
144. Driver Version 8.1.10.9 This in kernel driver is only available on errata kernels equal to or greater than 2.6.18-53.1.14.el5. Driver is integrated into the kernel.
145. Driver Version 8.01.04-k Driver is integrated into the kernel.
146. Firmware Version 1.92a1

SuSE SLES [32-Bit]

1. Driver Version 8.01.07-k3 Driver is integrated into the kernel.
2. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
3. Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
4. Novell OES is only supported with Fibre channel connectivity.
5. SGI's XFS filesystem is also supported for this configuration. Files that are part of the released distribution of the operating system (e.g. /, /etc, /usr, /opt, etc) must not reside on an XFS filesystem. XFS is supported on non-operating system data only.
6. Novell Open Enterprise Server 2 (OES2) is supported with native DM-MPIO.
7. The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
8. EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
9. SLES Xen kernel supported.
10. Novell OES 2 is supported with Linux native MPIO or via RPQ for EMC PowerPath.
11. BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
12. SNIA HBA API Supported.
13. Firmware Version 1.10a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
14. Supported kernels: 2.6.5-7.308, 2.6.5-7.311, 2.6.5-7.312, 2.6.5-7.314, 2.6.5-7.315.
The 32bit kernel 2.6.5-7.311 is not supported with PowerPath 5.1 SP1.
Confirm kernel support with server vendor.
15. Driver Version 8.0.16.40 Driver is in the kernel 2.6.5-7.311 and available from both Novell and Emulex as a driver update for kernel 2.6.5-7.308. Driver is integrated into the kernel.
16. Driver Version 8.0.16.6_p3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
17. Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
18. Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
19. For use with Intel Paxville CPUs, this kernel revision or later is required.
Please refer to the server manufacturer's website for the minimum required BIOS revisions for supporting Paxville.
20. Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7.
Confirm kernel support with server vendor.
21. **Novell OES is supported with EMC PowerPath only.**
22. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
23. VxVM is not supported on servers booting from the array.
24. Driver Version 8.01.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
25. Driver Version 8.1.10.3 Driver is integrated into the kernel.
26. Driver Version 8.1.10.12-update This in kernel driver is only available on errata kernels equal to or greater than 2.6.16.54-0.2.3. Driver is integrated into the kernel.
27. Driver Version 8.01.06 Driver/BIOS are available at <http://www.qlogic.com>
28. Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.27-0.6, 2.6.16.27-0.9.
Confirm kernel support with server vendor.
PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.
29. Driver Version 8.01.00 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
30. BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
31. PowerPath is not supported.
32. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. Novell OES 2 is supported with this update.
34. Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.

35. Driver Version 8.02.00-k6-SLES10-05 Driver is integrated into the kernel.
36. Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3. Confirm kernel support with server vendor.
37. **Novell OES is supported on kernels 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3, and 2.6.5-7.308 with EMC PowerPath only.**
38. Single node support only with Emulex 4Gb HBAs
39. Driver Version 8.01.02-sles Driver is integrated into the kernel.
40. Driver Version 8.2.0.22 Driver is integrated into the kernel.
41. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
42. The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
43. Driver Version 8.0.16.6_p3
44. Driver Version 8.0.16.6_p3 Driver is integrated into the kernel.
45. BIOS 2.01a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
46. Driver Version 8.01.07.15 Driver is integrated into the kernel.
47. BX6xx-series systems use an embedded fibre channel controller. Contact Fujitsu Siemens to acquire the proper BIOS for the embedded fibre channel controller.
48. Driver Version 8.1.10.9 This in kernel driver is only available on errata kernels equal to or greater than 2.6.16.53-0.8 and less than 2.6.16.54-0.2.3. Driver is integrated into the kernel.
49. EMC recommends upgrading to the most recent, EMC-Approved, HBA driver.
50. Virtual machines running on VMWare ESX are supported booting from the array.
51. VMWare ESX Server itself is supported booting from external array.
52. BIOS 2.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
53. BIOS 3.03a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
54. Driver Version 8.0.16.17 Driver is integrated into the kernel.
55. EMC provides in-depth documentation for configurations with QLogic adapters that contains helpful information for installing and configuring QLogic adapters with EMC Storage. This documentation is located in the EMC section of the QLogic website (<http://www.qlogic.com>) along with HBA drivers, and BIOS.
56. Firmware Version 2.72a2
57. This HBA is equivalent to the Qlogic QLE2562
58. This HBA is equivalent to the Qlogic QLE2560
59. Driver Version 8.01.07-k7
60. Driver Version 8.01.04-k Driver is integrated into the kernel.
61. Driver Version 8.0.16.6-p3 Driver is integrated into the kernel.
62. Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
63. BIOS 1.24 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
64. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
65. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
66. Driver Version 8.1.10.9 Driver is integrated into the kernel.
67. Driver Version 8.01.04-d8
68. Driver Version 8.0.16.34 Driver is integrated into the kernel.
69. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
70. Driver Version 8.01.07-k7 Driver is integrated into the kernel.
71. Driver Version 8.01.04-d8 Driver is integrated into the kernel.
72. Driver Version 8.01.07-k1 Driver is integrated into the kernel.
73. Driver Version 8.01.07-k1
74. Legacy (x86) boot mode supported only for this server. EFI boot is not supported. EFI boot code should be removed from the HBA if installed.
75. Driver Version 8.1.6 Driver is integrated into the kernel.
76. This HBA is equivalent to the QLogic QLA2340.
77. Firmware Version 1.00a9 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
78. Firmware Version 2.70a5
79. BIOS 1.43 Supports BIOS 1.43. Available at <http://www.qlogic.com>
80. BIOS 1.12 Requires BIOS 1.12 available in the EMC-approved section of the QLogic website at <http://www.qlogic.com>
81. Driver Version 8.01.05 Driver/BIOS are available at <http://www.qlogic.com>
82. Please see the HP website for supported BL c-Class model numbers. The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
83. BIOS 1.64 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
84. Driver Version 8.0.16.40 Driver is integrated into the kernel.
85. BIOS 6.00a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
86. Driver Version 8.1.10.3 Driver is integrated into the kernel. DS-M Connect ONLY interoperates with ControlCenter Host Agent, Symmetrix SDM Agent, Storage Agent for Symmetrix.
87. This HBA is equivalent to the Emulex LPe12002
88. This HBA is equivalent to the Emulex LPe12000
89. Driver Version 8.0.2.22 Driver is integrated into the kernel.
90. **FSC Fibre Channel module. Dual channel 4GBit/s HBA for BX6xx-series blade servers only.**
91. BIOS 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
92. **FSC Fibre Channel module. Dual channel 2GBit/s HBA for BX6xx-series blade servers only.**
93. BIOS 1.52 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
94. Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
95. BIOS 2.02a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
96. BIOS 1.05
97. Driver Version 8.0.16.27 Driver is integrated into the kernel.
98. Driver Version 8.01.02-d4 Driver is integrated into the kernel.
99. Driver Version 8.01.04-d7 Driver is integrated into the kernel.
100. BIOS 1.12 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
101. Driver Version 8.01.07-k3
102. BIOS 4.00a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com> EFI Boot code. Boot support for 64-Bit servers can be accomplished in two ways depending on your server. If your server does not have support for Legacy Option ROMs that use INT 13 for external boot, then an EFI boot driver must be used instead. Refer to your server documentation as to whether your server supports Legacy Option ROM loading.
103. Novell OES is supported on this kernel.
104. PowerEdge 2550 and PowerVault 775N support a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
105. Driver Version 8.2.0.22 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
106. Driver Version 8.1.6
107. Driver Version 8.01.04-k
108. BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
109. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
110. BIOS 2.02a1
111. Driver Version 8.01.02-sles Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
112. Driver Version 8.01.00
113. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
114. Support for 4GB fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
115. This system is supported only when the IBM ServeRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
116. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
117. BIOS 3.02a6 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
118. BIOS 1.43
119. Driver Version 8.1.10.3
120. Driver Version 8.1.10.9
121. Driver Version 8.0.16.27
122. PCI-X slots in this server only support low-profile hbas with low-profile brackets. Please ensure your HBA vendor has included the proper bracket to fit this server.

SuSE SLES [IA64]

| SuSE SLES [IA64] | | | | | | | |
|------------------|---|---|--------------------|---|--------------|-------------------|--------------------------|
| No. | Host System | Operating System | Host Bus | Host Bus Adapter | Topology | Storage Array | External Boot |
| 1 | SGI Altix: 450 ¹⁷ , 4700 ^{15, 16} | SuSE SLES [IA64] 10 SP1 ^{11, 12, 13, 14} | PCI Express, PCI-X | Emulex LPe11000-E ^{1, 2, 3, 4, 5, 6} | FC-AL, FC-SW | EMC CLARiON AX150 | Y ^{8, 9, 10} |
| 2 | SGI Altix: 450 ¹⁷ , 4700 ^{15, 16} | SuSE SLES [IA64] 10 SP1 ^{11, 12, 13, 14} | PCI Express, PCI-X | Emulex LPe11002-E ^{1, 2, 3, 4, 5, 6} | FC-AL, FC-SW | EMC CLARiON AX150 | Y ^{7, 8, 9, 10} |
| 3 | SGI Altix: 450 ¹⁷ , 4700 ^{15, 16} | SuSE SLES [IA64] 10 SP2 ^{12, 13, 14, 19} | PCI Express, PCI-X | Emulex LPe11000-E ^{1, 2, 5, 6, 18} | FC-AL, FC-SW | EMC CLARiON AX150 | Y ^{8, 9, 10} |

- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Driver Version 8.1.10.12-update This in kernel driver is only available on errata kernels equal to or greater than 2.6.16.54-0.2.3. Driver is integrated into the kernel.
- Driver Version 8.1.10.3 Driver is integrated into the kernel.
- BIOS 4.00a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com> EFI Boot code. Boot support for 64-Bit servers can be accomplished in two ways depending on your server. If your server does not have support for Legacy Option ROMs that use INT 13 for external boot, then an EFI boot driver must be used instead. Refer to your server documentation as to whether your server supports Legacy Option ROM loading.
- SNIA HBA API Supported.
- Bootting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
- Virtual machines running on VMWare ESX are supported booting from the array.
- VMWare ESX Server itself is supported booting from external array.
- PowerPath is not supported.
- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- SGI's XFS filesystem is also supported for this configuration. Files that are part of the released distribution of the operating system (e.g. /, /etc, /usr, /opt, etc) must not reside on an XFS filesystem. XFS is supported on non-operating system data only.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Limited to 64 sockets maximum. Larger configurations require RPQs and confirmation of support from SGI.
- Compute Blades:
 - Density Configuration –
 - Two processor sockets per blade
 - Up to 78* Intel® Itanium® Processor sockets per rack
 - Dual Core Intel® Itanium® Series 9000 1.67GHz, 8, 18 or 24MB/667MHz FSB
 - 8 DIMM slots per blade: 1GB, 2GB or 4GB DIMMs
 - Bandwidth Configuration –
 - One processor socket per blade
 - Up to 39* Intel® Itanium® Processor sockets per rack
 - Dual-Core Intel® Itanium® Series 9000 1.67GHz, 8, 18 or 24MB/667MHz FSB
 - 8 DIMM slots per blade: 1GB, 2GB or 4GB DIMMs
 - Memory-only Blade:
 - Adds to shared memory without cost of cpu and associated software licenses
 - 12 DIMM slots per blade: 1GB, 2GB or 4GB DIMMs
 - I/O Blades
 - Base I/O Blade:
 - Minimum of One Base I/O blade required for every Linux instance/partition
 - Up to two hard drives – 300GB SAS
 - Two low profile PCI-X slots
 - Supports 2D graphics card (details below)
 - Supports HW RAID 0,1
 - One 4X SAS port, one DVD R/W, two Gigabit Ethernet, and four USB connectors
 - Double blade width – for use in blade slot 1 only
 - PCI-X Expansion Blade – 3 slot
 - Three full 64-bit/133 MHz 3.3V PCI-X slot, hot plug capable
 - Double blade width, for use in blade slots 1 only
 - PCI-X Expansion Blade – 2 slot
 - Two full 64-bit/133 MHz 3.3V PCI-X slot hot-plug capable
 - Single blade width
 - PCI-Express I/O Blade – 2 slot
 - Two full PCI-Express slots
 - Supports 2 standard height PCIe cards at 16X speeds.
 - Supports 3D graphics card options (details below)
 - Single blade width
 - PCI-X + PCI-Express I/O Blade – 4 slot
 - Two 64-bit/133 MHz 3.3V PCI-X slots
 - Two full 16x PCI-Express Slots
 - Double blade width – for use in blade slot 1 only
- Compute Blades:
 - Two processor sockets per blade
 - Dual-Core Intel® Itanium® Series 9000 1.67GHz, 8, 18 or 24MB/667MHz FSB
 - 8 DIMM slots per blade: 1GB, 2GB or 4GB DIMMs (NUMA architecture)
 - Up to 38 sockets per short rack
 - Up to two 38 socket single system image machines per tall rack
 - I/O Blades:
 - Base I/O Blade
 - Minimum of One Base I/O blade required for every SSI/partition
 - Two low profile PCI-X slots
 - PCI-X Expansion Blade – 3 slot
 - Three full 64-bit/133 MHz 3.3V PCI-X slot, hot plug capable
 - Double blade width, for use in blade slots 1 only
 - PCI-X Expansion Blade – 2 slot
 - Two full 64-bit/133 MHz 3.3V PCI-X slot (100MHz if both slots populated), hot plug capable
 - Single blade width
 - PCI-Express I/O Blade – 2 slot
 - Two full PCI-Express slots
 - Supports 2 standard height PCIe cards at 16X speeds.
 - Single blade width
 - PCI-X + PCI-Express I/O Blade – 4 slot
 - Two 64-bit/133 MHz 3.3V PCI-X slots
 - Two full 16x PCI-Express Slots
 - Double blade width – for use in blade slot 1 only
- Driver Version 8.2.0.22 Driver is integrated into the kernel.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.

SuSE SLES [IBM Power]

| SuSE SLES [IBM Power] | | | | | | | |
|-----------------------|-----------------------------------|--|----------|--|----------|-------------------|---------------|
| No. | Host System | Operating System | Host Bus | Host Bus Adapter | Topology | Storage Array | External Boot |
| 1 | IBM BladeCenter JS22 (Model 7998) | SuSE SLES [IBM Power] 10 SP ^{2, 3, 4, 5, 6} | PCI-X | IBM: Emulex 4Gb FC Exp Card (CFFv, 43W6859) ^{1, 7, 8, 9, 10} , QLogic 4Gb FC Exp Card (CFFv, 41Y8527) ^{8, 11, 12} , QLogic Ethernet and 4Gb FC Exp Card (CFFh, 39Y9306) ^{8, 11, 12, 13} | FC-SW | EMC CLARiON AX150 | N |

- Internal port(s) on QLogic or McdData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- SGI's XFS filesystem is also supported for this configuration. Files that are part of the released distribution of the operating system (e.g. /, /etc, /usr, /opt, etc) must not reside on an XFS filesystem. XFS is supported on non-operating system data only.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- SNIA HBA API Supported.
- Driver Version 8.2.0.22 Driver is integrated into the kernel.
- BIOS 3.02a6 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Driver Version 8.02.00-k6-sles10.2-02 Driver is integrated into the kernel.
- BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.

- SNIA HBA API Supported.
- BIOS 1.02 Driver/BIOS are available at <http://www.qlogic.com>
- Driver Version 8.01.05 Driver/BIOS are available at <http://www.qlogic.com>
- Supported kernels: 2.6.5-7.308, 2.6.5-7.311, 2.6.5-7.312, 2.6.5-7.314, 2.6.5-7.315.
The 32bit kernel 2.6.5-7.311 is not supported with PowerPath 5.1 SP1.
Confirm kernel support with server vendor.
- SGI's XFS filesystem is also supported for this configuration. Files that are part of the released distribution of the operating system (e.g. /, /etc, /usr, /opt, etc) must not reside on an XFS filesystem. XFS is supported on non-operating system data only.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPO.
- Driver Version 8.0.16.34 Driver is integrated into the kernel.
- Firmware Version 1.92a1
- BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>

12. Driver Version 8.01.07.15 Driver is integrated into the kernel.
13. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
14. PowerPath is not supported.
15. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
16. BIOS 1.24
17. Driver Version 8.01.04-k Driver is integrated into the kernel.
18. Driver Version 8.01.07-k7
19. Driver Version 8.01.04-d8
20. SLES Xen kernel supported.
21. Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.27-0.6, 2.6.16.27-0.9. Confirm kernel support with server vendor. PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.
22. EMC provides in-depth documentation for configurations with QLogic adapters that contains helpful information for installing and configuring QLogic adapters with EMC Storage. This documentation is located in the EMC section of the QLogic website (<http://www.qlogic.com>) along with HBA drivers, and BIOS.
23. Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
24. Novell OES is only supported with Fibre channel connectivity.
25. Novell Open Enterprise Server 2 (OES2) is supported with native DM-MPIO.
26. Novell OES 2 is supported with Linux native MPIO or via RPK for EMC PowerPath.
27. Driver Version 8.01.07-k3 Driver is integrated into the kernel.
28. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
29. Driver Version 8.02.00-k6-SLES10-05 Driver is integrated into the kernel.
30. Novell OES 2 is supported with this update.
31. Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
32. BIOS 2.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. BIOS 3.03a7 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
34. Driver Version 8.2.0.22 Driver is integrated into the kernel.
35. Firmware Version 1.00a12 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
36. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
37. Driver Version 8.1.10.3 Driver is integrated into the kernel.
38. Driver Version 8.1.10.12-update This in kernel driver is only available on errata kernels equal to or greater than 2.6.16.54-0.2.3. Driver is integrated into the kernel.
39. Driver/BIOS are available at <http://www.qlogic.com>
40. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
41. Firmware Version 1.10a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
42. BIOS 1.52
43. Booting from the SAN with PowerPath is supported. Refer to the Path Management Software section for supported versions of PowerPath.
44. The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
45. This HBA is equivalent to the Qlogic QLE2562
46. This HBA is equivalent to the Qlogic QLE2560
47. Driver Version 8.1.10.9 Driver is integrated into the kernel.
48. Virtual machines running on VMWare ESX are supported booting from the array.
49. VMWare ESX Server itself is supported booting from external array.
50. Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
51. Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
52. Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3. Confirm kernel support with server vendor.
53. Driver Version 8.0.16.17 Driver is integrated into the kernel.
54. BIOS 2.01a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
55. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
56. Driver Version 8.01.02-sles Driver is integrated into the kernel.
57. Driver Version 8.01.02-sles Available in the EMC-approved section of the Emulex website. <http://www.emulex.com> Driver is integrated into the kernel.
58. Legacy (x86) boot mode supported only for this server. EFI boot is not supported. EFI boot code should be removed from the HBA if installed.
59. EMC recommends upgrading to the most recent, EMC-Approved, HBA driver.
60. BIOS 1.05
61. Driver Version 8.1.6 Driver is integrated into the kernel.
62. Driver Version 8.01.07-k1
63. BIOS 3.02a6
64. BIOS 3.03a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
65. BIOS 1.24 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
66. This HBA is equivalent to the QLogic QLA2340.
67. Single node support only with Emulex 4Gb HBAs
68. Driver Version 8.1.10.9 This in kernel driver is only available on errata kernels equal to or greater than 2.6.16.53-0.8 and less than 2.6.16.54-0.2.3. Driver is integrated into the kernel.
69. VxVM is not supported on servers booting from the array.
70. For use with Intel Paxville CPUs, this kernel revision or later is required. Please refer to the server manufacturer's website for the minimum required BIOS revisions for supporting Paxville.
71. Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7. Confirm kernel support with server vendor.
72. Driver Version 8.0.16.6_p3 Driver is integrated into the kernel.
73. Driver Version 8.0.16.6_p3
74. BIOS 1.64 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
75. Please see the HP website for supported BL c-Class model numbers. The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
76. Driver Version 8.0.16.40 Driver is integrated into the kernel.
77. BIOS 6.00a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
78. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
79. This HBA is equivalent to the Emulex LPe12002
80. This HBA is equivalent to the Emulex LPe12000
81. Driver Version 8.0.2.22 Driver is integrated into the kernel.
82. Support for 4GB fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
83. This system is supported only when the IBM ServeRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
84. Driver Version 8.01.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
85. BIOS 1.52 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
86. Driver Version 8.0.16.6_p3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
87. Driver Version 8.0.16.6-p3 Driver is integrated into the kernel.
88. **FSC Fibre Channel module. Dual channel 2Gbit/s HBA for BX6xx-series blade servers only.**
89. Driver Version 8.01.02-d4 Driver is integrated into the kernel.
90. Driver Version 8.01.04-d7 Driver is integrated into the kernel.
91. BIOS 1.12 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
92. Driver Version 8.01.07-k3
93. BIOS 2.02a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
94. Booting from the SAN with PowerPath is not supported.
95. BIOS 1.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
96. Driver Version 8.01.00 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
97. Driver Version 8.01.07-k7 Driver is integrated into the kernel.
98. Driver Version 8.01.04-d8 Driver is integrated into the kernel.
99. Driver Version 8.01.07-k1 Driver is integrated into the kernel.
100. Driver Version 8.0.16.27 Driver is integrated into the kernel.
101. Firmware Version 2.70a5
102. BIOS 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>

103. **FSC Fibre Channel module. Dual channel 4GBit/s HBA for BX6xx-series blade servers only.**
104. BIOS 3.02a6 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
105. Internal port(s) on Qlogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
106. BIOS 2.01 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
107. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
108. BIOS 2.02a1
109. Driver Version 8.01.00
110. Driver Version 8.01.06 Driver/BIOS are available at <http://www.qlogic.com>
111. BIOS 4.00a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com> EFI Boot code. Boot support for 64-Bit servers can be accomplished in two ways depending on your server. If your server does not have support for Legacy Option ROMs that use INT 13 for external boot, then an EFI boot driver must be used instead. Refer to your server documentation as to whether your server supports Legacy Option ROM loading.
112. Driver Version 8.0.16.40 Driver is in the kernel 2.6.5-7.311 and available from both Novell and Emulex as a driver update for kernel 2.6.5-7.308. Driver is integrated into the kernel.
113. Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
114. PCI-X slots in this server only support low-profile hbas with low-profile brackets. Please ensure your HBA vendor has included the proper bracket to fit this server.
115. BX6xx-series systems use an embedded fibre channel controller. Contact Fujitsu Siemens to acquire the proper BIOS for the embedded fibre channel controller.
116. Driver Version 8.1.10.3 Driver is integrated into the kernel. DS-M Connect ONLY interoperates with ControlCenter Host Agent, Symmetrix SDM Agent, Storage Agent for Symmetrix.
117. BIOS 2.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
118. Driver Version 8.2.0.22 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
119. Driver Version 8.01.02-sles Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
120. Driver Version 8.1.10.9
121. Driver Version 8.1.10.3
122. Driver Version 8.0.16.27

1. Must add "set sd:sd_io_time=60", "set sd:sd_max_throttle=20", "set sds:ssd_io_time=60", and "set sds:ssd_max_throttle=20" in the /etc/system file for Symmetrix or CLARiON attach. Do not include quotes on these entries.
2. Driver Version V2.28 (Sun Patch 125166-11)
3. Driver Version 4.17 Must add "set sd:sd_max_throttle=20" in /etc/system for Symmetrix attach.
Must add "forceload: drv/sd" in the /etc/system when these HBA's are installed for Symmetrix attach with PowerPath. (do not include the quotes on either entry)
4. Driver Version 4.22 Must add "set sd:sd_max_throttle=20" in /etc/system for Symmetrix attach.
Must add "forceload: drv/sd" in the /etc/system when these HBA's are installed for Symmetrix attach with PowerPath. (do not include the quotes on either entry)
5. Driver Version SAN in Solaris 10 U1 (01/06)
6. Driver Version V2.26 (Sun Patch 125166-10)
7. Driver Version V2.29 (Sun Patch 125166-12)
8. Supports S10 Update 6 (10/08)
9. EMC supports ZFS in Solaris 10 11/06 (update 3) or later. The Snapshot and Clone features of ZFS are supported only through Sun Microsystems.
10. Supports S10 Update 5 (05/08)
11. Supports S10 Update 4 (08/07).
12. EMC requires Sun patches for Solaris 10:
118833-36 SunOS 5.10: Kernel patch.
120011-14 SunOS 5.10: Kernel patch.
127127-11 SunOS 5.10: Kernel patch.
137137-09 SunOS 5.10: Kernel patch.
138888-03 SunOS 5.10: Kernel patch.
119130-33 SunOS 5.10: Sun Fibre Channel Device Drivers (only necessary for Leadville Stack driver) .
125184-10 SunOS 5.10: Sun Fibre Channel Device Drivers.
120222-30 SunOS 5.10: Emulex-Sun LightPulse fibre channel adapter driver v2.31o (only required for Emulex HBAs running Leadville).
125166-12 SunOS 5.10: Qlogic ISP fibre channel device driver v2.29 (only required for Qlogic HBAs running Leadville).
139579-02 SunOS 5.10: zfs Patch.
13. Supports S10 Update 1 (01/06)
14. For LDOM support, please refer to the 'Virtualization Server Support' table available via EMC PowerLink:
https://elabnavigator.emc.com/emcpubs/elab/esm/pdf/Virtualization_Server_Support.pdf
15. For Sun MPxIO support please review the 'Sun StorEdge Traffic Manager for CLARiON Release Notes (P/N 300-002-978)' available via EMC PowerLink.
16. Supports S10 Update 2 (06/06)
17. If setting the boot disk from SAN with Solaris 10, its Target/LUN must be defined in the /kernel/drv/sd.conf file.
18. STMS (MPxIO) is supported with the following patch installed: 119715-09
19. Supports S10 Update 3 (11/06)
20. SNIA HBA API Supported.
21. FCode Value 1.14.15 Fcode should be loaded on all HBA's at the time of initial installation. This should only be done before configuring devices, and should not be done after devices are configured. If HBA does not contain Fcode and Fcode is loaded after devices are configured, the device paths will change and this could result in loss of data.
22. FCode Value 1.14.13 Fcode should be loaded on all HBA's at the time of initial installation. This should only be done before configuring devices, and should not be done after devices are configured. If HBA does not contain Fcode and Fcode is loaded after devices are configured, the device paths will change and this could result in loss of data.
23. FCode Value 2.00.09 Fcode should be loaded on all HBA's at the time of initial installation. This should only be done before configuring devices, and should not be done after devices are configured. If HBA does not contain Fcode and Fcode is loaded after devices are configured, the device paths will change and this could result in loss of data.
24. FCode Value 2.00.06
25. STMS is Sun's Multipathing Software and not an EMC Software product. Please refer to the required release note "SUN StorEdge Traffic Manager for CLARiON Release Notes", P/N 300-002-978, which can be found on EMC's Powerlink website in Support -> Document Library -> Host Connectivity for the complete installation information.
26. For servers running Solaris 8 or 9 with the Sun SAN driver, the following applies:
Must add "set fc:sscp_enable_auto_configuration=1" (do not include quote marks) in /etc/system to fix the following problems:
1. VxVM - rootdg can not be imported during boot
2. SVM - Volume Manager can not be started after system boot
3. PowerPath 4.x - error message "All paths to (array type) (array name) vol(volume number) are dead"
27. Driver Version SAN 4.4.12 Must add "set sds:ssd_max_throttle=20" in /etc/system for CLARiON or Symmetrix attach.
Must add "forceload: drv/sd" in the /etc/system when these HBA's are installed for Clarion or Symmetrix attach with PowerPath. (do not include the quotes on either entry).
Driver version SAN 4.3 or older is not supported for MPxIO on EMC storage arrays.
28. Driver Version 4.15.03 Must add "set sd:sd_max_throttle=20" in /etc/system for Symmetrix attach.
Must add "forceload: drv/sd" in the /etc/system when these HBA's are installed for Symmetrix attach with PowerPath. (do not include the quotes on either entry)
29. Driver Version SAN 4.4.15
30. Driver Version SAN 4.4.13
31. Driver Version SAN 4.4.14
32. FCode Value 1.14.11
33. FCode Value 1.14.15
34. Driver Version SAN 4.4.12
35. Sun StorEdge Traffic Manager Software (Sun's Native Multipathing Software) is supported on CLARiON with SAN 4.4.7a and above.

36. Driver Version SAN 4.4.10
37. Driver Version SAN 4.4.11
38. Driver Version SAN 4.4.10 Must add "set ssd:ssd_max_throttle=20" in /etc/system for CLARiON or Symmetrix attach. Must add "forceload: drv/ssd" in the /etc/system when these HBA's are installed for Clarion or Symmetrix attach with PowerPath. (do not include the quotes on either entry). Driver version SAN 4.3 or older is not supported for MPxIO on EMC storage arrays.
39. Driver Version SAN 4.4.11 Must add "set ssd:ssd_max_throttle=20" in /etc/system for CLARiON or Symmetrix attach. Must add "forceload: drv/ssd" in the /etc/system when these HBA's are installed for Clarion or Symmetrix attach with PowerPath. (do not include the quotes on either entry). Driver version SAN 4.3 or older is not supported for MPxIO on EMC storage arrays.
40. FCode 1.17 is the minimum necessary for boot from SAN.
41. Veritas DMP coexistence with EMC CLARiON failover packages: VERITAS DMP can be enabled and coexist on the same host with ATF or PowerPath. VERITAS DMP, as part of Volume Manager, can be used to manage CLARiON arrays without ATF or PowerPath by using CLR-ASL.
42. Sun "clone" hosts are not supported
43. FCode Value 2.00 (Flash image 1.69)
44. FCode Value 1.17 FCode 1.17 is the minimum necessary for boot from SAN. Fcode should be loaded on all HBA's at the time of initial installation. This should only be done before configuring devices, and should not be done after devices are configured. If HBA does not contain Fcode and Fcode is loaded after devices are configured, the device paths will change and this could result in loss of data.
45. Must add "set ssd:ssd_max_throttle=20" in /etc/system for CLARiON or Symmetrix attach. Must add "forceload: drv/ssd" in the /etc/system when these HBA's are installed for Clarion or Symmetrix attach with PowerPath. (do not include the quotes on either entry). Driver version SAN 4.3 or older is not supported for MPxIO on EMC storage arrays.
46. FCode Value 1.24 (flash image 1.56) Fcode should be loaded on all HBA's at the time of initial installation. This should only be done before configuring devices, and should not be done after devices are configured. If HBA does not contain Fcode and Fcode is loaded after devices are configured, the device paths will change and this could result in loss of data.
47. SDS support on Solaris 8 requires minimum SDS version 4.2.1 with patch 108693-16 or later version.
48. EMC required Sun patches for Solaris 9:
 112233-12 SunOS 5.9: kernel patch
 117171-17 SunOS 5.9: kernel patch
 118558-39 SunOS 5.9: kernel patch
 122300-36 SunOS 5.9: Kernel patch
 112834-06 SunOS 5.9: patch SCSI
 113277-62 SunOS 5.9: sd and ssd patch
 119914-14 SunOS 5.9: SAN 4.4.x: Emlxs driver and utility patch
49. Minimum Supported revision
50. EMC required Sun patches for Solaris 8:
 108528-29 SunOS 5.8: kernel update patch.
 117000-05 SunOS 5.8: kernel patch
 117350-60 SunOS 5.8: kernel patch
 108974-57 SunOS 5.8: data, uata, dad, sd, and scsi patch.
 109657-11 SunOS 5.8: isp driver patch (for X1062A and X1065A HBAs only).
 109885-20 SunOS 5.8: glm driver patch (for X6541A HBA only).
 119913-14 SunOS 5.8: SAN 4.4.x: Emlxs driver and utility patch
51. For new installations, core software minimum requirement with
 CX700
 Array software 02.06.700.5.001
 CX500
 Array software 02.06.500.5.001
 CX300
 Array software 02.06.300.5.001
 CX600
 Array software - Access Logix 02.02.1.60.5.005
 Array software - Non-Access Logix 02.02.0.60.5.005
 CX400
 Array software - Access Logix 02.02.1.40.5.006
 Array software Non-Access Logix 02.02.0.40.5.006
52. Must add "set ssd:ssd_max_throttle=20" in /etc/system for Symmetrix attach. Must add "forceload: drv/ssd" in the /etc/system when these HBA's are installed for Symmetrix attach with PowerPath. (do not include the quotes on either entry)
53. Requires Sun patch 125184-02 or later for path failover applications.

Sun Solaris x86

| Sun Solaris x86 | | | | | | | |
|-----------------|---|---|--------------------|---|--------------|-------------------|---------------|
| No. | Host System | Operating System | Host Bus | Host Bus Adapter | Topology | Storage Array | External Boot |

| 5 | Sun Sun Fire X4200-M2 ¹ | Sun Solaris x86 10 S10_x86 Update 1 (01/06) ^{3, 4, 5, 6, 7, 8, 16} | PCI Express, PCI-X | QLogic QLA2460-E-SP ^{2, 9, 10, 11, 12, 13, 14} | FC-AL, FC-SW | EMC CLARiON AX150 | Y |
| 6 | Sun Sun Fire X4200 ¹ | Sun Solaris x86 10 S10_x86 Update 1 (01/06) ^{3, 4, 5, 6, 7, 8, 16} | PCI-X | QLogic QLA2460-E-SP ^{2, 9, 10, 11, 12, 13, 14} | FC-AL, FC-SW | EMC CLARiON AX150 | Y |

1. Must add "set sd:sd_io_time=60" and "set sd:sd_max_throttle=20" in the /etc/system file for Symmetrix or CLARiON attach. Do not include quotes on the entries.
2. BIOS 1.24 (flash image 1.56)
3. EMC requires Sun patches for Solaris 10_x86
 118855-36 SunOS 5.10_x86: kernel patch
 120012-14 SunOS 5.10_x86: Kernel patch
 127128-11 SunOS 5.10_x86: Kernel patch
 137138-09 SunOS 5.10_x86: Kernel patch
 138889-03 SunOS 5.10_x86: Kernel patch
 119131-33 SunOS 5.10_x86: Sun fibre channel device drivers
 125185-10 SunOS 5.10_x86: Sun Fibre Channel Device Drivers
 120223-30 SunOS 5.10_x86: Emulex-Sun LightPulse fibre channel adapter driver v2.310 (only required for Emulex HBAs running Leadville)
 125165-12 SunOS 5.10_x86: Qlogic ISP fibre channel device driver v2.29 (only required for Qlogic HBAs running Leadville)
 139580-02 SunOS 5.10_x86: zfs Patch
4. For Sun MPxIO support please review the 'Sun StorEdge Traffic Manager for CLARiON Release Notes (P/N 300-002-978)' available via EMC PowerLink.
5. Supports S10_x86 Update 5 (5/08)
6. Minimum Supported revision
7. EMC supports ZFS in Solaris 10_x86 11/06 (update 3) or later. The Snapshot and Clone features of ZFS are supported only through Sun Microsystems.
8. Supports S10_x86 Update 6 (10/08)
9. SNIA HBA API Supported.
10. Driver Version V2.26 (Sun Patch 125165-10)
11. Driver Version V2.28 (Sun Patch 125165-11)
12. STMS is Sun's Multipathing Software and not an EMC Software product. Please refer to the required release note "SUN StorEdge Traffic Manager for CLARiON Release Notes", P/N 300-002-978, which can be found on EMC's Powerlink website in Support -> Document Library -> Host Connectivity for the complete Installation information.
13. Driver Version V2.29 (Sun Patch 125165-12)
14. BIOS V2.02 (Flash image 1.69)
15. Supports S10_x86 Update 2 (06/06)
16. Supports S10_x86 Update 4 (08/07)
17. Supports S10_x86 Update 3 (11/06)

- Firmware Version 2.80a4 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- BIOS 2.02a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- Windows 2003 x86 and x64 guest VM with Microsoft iSCSI Initiator 2.06 is supported on ESX 3.0.2 and ESX 3.5 Supported arrays: CX3 10c, CX3 20c, CX3-40c and the AX4-5i. EMC PowerPath 5.1 - single initiator only.
- Beginning with ESX Server v2.5.0 Navisphere components are supported as follows:
Navi Agent and Server Utility at the console level; as of Navisphere 6.27, Navisphere Host Agent and Server Utility are also supported on Windows Virtual Machines on ESX 3.5 and ESXi 3.5 systems.
Array Initialization Utility and CLI at both the console and VM levels;
Browser interface to Navisphere Express or Navi Manager at the VM level only.
- Replication of both VMFS and Raw Device Mapping (RDM) volumes is supported using Symmetrix replication software (SRDF and TimeFinder). Please refer to the solution guide, "VMware ESX Server Using EMC Symmetrix Storage Systems" for details.
Replicas of application data volumes of physical (native) servers created using Symmetrix replication software can be presented to a VMware ESX Server. Note:
1) Replication of Operating System volumes and application volumes from a virtual to physical environment using Symmetrix replication software is not supported at this time.
2) Replication of Operating System volumes, application volumes and application data volumes from a virtual to virtual environment using Symmetrix replication software is supported.
- PowerPath is not supported on VMware ESX. The VMware ESX native failover functionality is supported.
- Supported with VirtualCenter VMotion.
- For details on Microsoft Cluster Services (MSCS) support with Windows guest operating systems, refer to the Storage/SAN Compatibility Guide For ESX Server 3.x on www.vmware.com.
- For a list of supported guest operating systems, refer to the "Guest Operating System Installation Guide" at http://www.vmware.com/pdf/GuestOS_guide.pdf
- Supported with VMFS-3.
- Driver Version 7.3.2 This driver is included in the VMware ESX kernel.
- SNIA HBA API Supported.
- Virtual machines running on VMware ESX are supported booting from the array.
- VMware ESX Server itself is supported booting from external array.
- While using an AX100-series storage system managed using Navisphere Express with VMware ESX Server, Snapshots cannot be assigned to the ESX server.
- For details on Microsoft Cluster Services (MSCS) support with Windows guest operating systems, refer to the "SAN Compatibility Guide For ESX Server 2.x" at http://www.vmware.com/pdf/esx_SAN_guide.pdf
- Supported with VMFS and VMFS-2.
- Replication of both VMFS and Raw Device Mapping (RDM) volumes is supported using CLARiON replication software (SnapView, MirrorView and SAN Copy) starting with Release 19. The OS/application as well as application data can be replicated using CLARiON replication software.
Note:
1) The virtual disks in a VMFS volume must be in persistent-mode during the replication process.
2) CLARiON VSS provider is not supported on VMFS volumes.
3) If replicating an entire VMFS volume that contains a number of virtual disks on a single CLARiON LUN, the granularity of replication is the entire LUN with all its virtual disks.
4) Use the consistency technology available on SnapView/MirrorView, when making copies of VMFS volumes that span multiple CLARiON LUNs.
5) The VMFS replica must be assigned to a different ESX server. The target ESX server must not already have access to the original source VMFS volume.
6) For source LUNs configured as RDM volumes, the replica can be presented to the same ESX server but to a different Virtual Machine unless the guest OS is qualified to allow same host access.
7) RDM volumes cannot be created when the ESX server is booting from SAN. VMFS volumes can be created when the ESX server is booting from SAN. If ESX server is not booting from SAN, Virtual Machines can be configured using either VMFS or RDM volumes.
8) Ensure the snapshot is activated or clone fractured before presenting them to an ESX server.
9) When replicating OS images, you will only have a crash consistent copy if the Virtual Machines are not shutdown during the replication process.
10) Please note that replicating a suspended Virtual Machine will result in a crash consistent copy.
11) Admsnap, Admhost utilities must be installed only on Virtual Machines. With admsnap or admhost installed on the Virtual Machine, most of the commands issued on VMFS volumes will fail, since VMFS volumes do not support scsi pass-through commands to talk to the CLARiON. Use Navisphere Manager or Navisphere CLI instead. The only commands that will work with VMFS volumes are admsnap flush and admhost flush. Admsnap is not supported under Network Virtual Machines with either RDM or VMFS volumes.
- Replicas of application data volumes of physical (native) servers created using SnapView, MirrorView and SAN Copy can be presented to a VMware ESX Server. These replicas configured on the VMware ESX server must be Raw Device Mapping only (VMFS is not supported). Replicas of application data volumes configured as Raw Device Mapping volumes on a VMware ESX server can also be presented to a physical (native) server.

Replication of Operating System volumes and application volumes from a physical to virtual or virtual to physical environment using CLARiON replication software is not supported at this time. Replication of Operating System volumes, application volumes and application data volumes from a virtual to virtual environment using CLARiON replication software is supported.

20. Dual port PCI-X fibre channel mezzanine card option is embedded. No PCI/PCI-X slots available.
21. Driver Version 7.04.00 This driver is included in the VMware ESX kernel.
22. BIOS 1.48 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
23. Firmware Version 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
24. Driver Version 2.01g This driver is included in the VMware ESX kernel.
25. Please see the HP website for supported BL c-Class model numbers.
The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
26. Driver Version elx_7.4.0.13 This driver is included in the VMware ESX kernel.
27. BIOS 6.00a1
28. All released updates to ESX Server version are supported unless otherwise specified by a footnote. Please contact server vendor for the update level required for a specific server.
29. Driver Version 7.08-vm32 This driver is included in the VMware ESX kernel.
30. BIOS 1.26
31. Driver for this HBA is included in the VMware ESX kernel.
32. BIOS 2.02 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
34. FCode Value 1.70a3
35. Firmware Version 1.91a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
36. FCode Value 1.92a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
37. Firmware Version 3.92a2
38. BIOS 1.54 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
39. Requires BIOS 1.47 available in the EMC-approved section of the QLogic website at <http://www.qlogic.com>
40. Beginning with ESX Server v2.5.0 Navisphere components are supported as follows:
Navi Agent and Server Utility at the console level only;
Array Initialization Utility and CLI at both the console and VM levels;
Browser interface to Navi Manager at the VM level only.
41. Supports BIOS 1.83. Available at <http://www.qlogic.com>
42. **The LP8000-EMC HBA has a permanent GBIC, and does not have copper cable support.**
43. Driver Version 7.07.00 This driver is included in the VMware ESX kernel.
44. Driver Version 7.1.14 This driver is included in the VMware ESX kernel.
45. Firmware Version 2.70a5
46. The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
47. Boot from SAN with Linux native multipathing software (DM-MPIO) is not supported.
48. PowerPath is not supported.
49. Driver Version 7.07.04 This driver is included in the VMware ESX kernel.
50. Requires BIOS 1.05 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
51. BIOS 1.05 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
52. BIOS 1.52 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
53. Firmware Version 2.72a2 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
54. Driver Version 8.2.0.22 Driver is integrated into the kernel.
55. Driver Version 8.1.10.12 This in kernel driver is only available on errata kernels equal to or greater than 2.6.18-53.1.14.el5. Driver is integrated into the kernel.
56. Driver Version 8.1.10.9 Driver is integrated into the kernel.
57. Driver Version 8.0.16.34 Driver is integrated into the kernel.
58. Driver Version 8.0.16.27 Driver is integrated into the kernel.
59. BIOS 1.24 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
60. BIOS 3.03a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
61. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LP1050-E.
62. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.
63. This HBA is equivalent to the QLogic QLA2340.
64. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
65. Support for 4GB fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
66. BIOS 1.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
67. This dual port HBA is only supported on DELL PE 6850 in the right-most slot (seen from the rear of the server chassis) marked "FC"
68. Firmware Version 3.01.18
69. BIOS 1.47 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
70. This driver is included in the VMware ESX kernel.
71. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
72. **FSC Fibre Channel module. Dual channel 2GBit/s HBA for BX6xx-series blade servers only.**
73. BX6xx-series systems use an embedded fibre channel controller. Contact Fujitsu Siemens to acquire the proper BIOS for the embedded fibre channel controller.
74. **4 Gb/s HBAs are supported only with ESX Server 2.5.4 build 38650 or higher.**
75. BIOS 1.47
76. BIOS 1.12
77. BIOS 2.00a1 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
78. Firmware Version 1.10a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
79. **This HBA is equivalent to the QLogic QLA2310.**
80. Driver Version 7.08-vm32
81. BIOS 1.52
82. EMC provides in-depth documentation for configurations with Emulex adapters that contains helpful information for installing and configuring Emulex adapters with EMC Storage. Visit the EMC driver page on the Emulex website (<http://www.emulex.com/ts/docoem/emc/index.html>) and download part number 300-001-157 for guide "EMC Host Connectivity with Emulex Fibre Channel Host Bus Adapters (HBAs) and Converged Network Adapters (CNAs) in the Windows Environment."
83. EMC does not support booting from external arrays if the boot LUN uses a FAT32 file system and Powerpath is installed. For Powerpath/Boot support, NTFS must be used.
84. Powerpath is supported in boot from SAN configurations for Windows 2003 systems running STORPort drivers (QLogic & Emulex). Windows 2003 servers using STORPort drivers require a Microsoft STORPort hotfix installed to boot with Powerpath. Please see your driver's requirements for the STORPort hotfix (QFE) version.
85. Firmware Version 1.91a5
86. Support for DYNIX/ptx 4.4.9 will be removed from the July ESM, and no longer supported by EMC. IBM dropped support for this OS in 2004.
87. Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
88. **FSC Fibre Channel module. Dual channel 4GBit/s HBA for BX6xx-series blade servers only.**
89. Emulex PCI-X and PCI-Express adapters including QLogic 4Gb PCI-X and PCI-Express adapters are supported in the x346 (8840) only when IBM ServerRAID-7K (71P8642 or 30R8800) is installed with most current firmware and BIOS.
90. Driver Version 7.07.04
91. Firmware Version 2.70a5 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
92. Driver Version 8.02.00-k5-rhel5.2-03 Driver is integrated into the kernel.
93. Driver Version 8.01.07-k7 Driver is integrated into the kernel.
94. Driver Version 8.01.07-d4 Driver is integrated into the kernel.
95. BIOS 1.24 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com> Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
96. Driver Version 8.01.04-d7 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
97. Driver Version 7.08-vm33 This driver is included in the VMware ESX kernel.
98. This HBA is equivalent to the QLogic QLE2562
99. This HBA is equivalent to the QLogic QLE2560
100. This HBA is equivalent to the Emulex LPe12002
101. This HBA is equivalent to the Emulex LPe12000
102. BIOS 2.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
103. Only Model 8028 is supported with VMware ESX Server 3.5.
104. VMware ESXi 3.5 Installable support only.
105. Single node support only with Emulex 4Gb HBAs
106. VMware ESXi 3.5 Embedded supported on model 7141-3HY. VMware ESXi 3.5 Installable supported on all other models.
107. VMware ESXi 3.5 Embedded supported on models 7995-CTO and 7995-HVX. VMware ESXi 3.5 Installable supported on all other models.

- 108. BIOS 2.02
- 109. Only supported in a boot from SAN configuration.
- 110. PowerEdge 2550 and PowerVault 775N support a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- 111. Dell PowerEdge 6450 does not support Emulex LP9802/DC HBAs.
- 112. Driver Version 7.04.00 This driver is included in the VMware ESX kernel. Requires BIOS 1.45 (HP BL30p specific) available from QLogic at <http://www.qlogic.com>
- 113. Firmware Version 1.00a12 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- 114. Driver Version elx_7.4.013 This driver is included in the VMware ESX kernel.
- 115. BIOS 3.03a7 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- 116. BIOS 2.06 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- 117. FCode Value 2.72a2
- 118. BIOS 1.70a3 Available in the EMC-approved section of the Emulex website. <http://www.emulex.com>
- 119. VxVM is not supported on servers booting from the array.
- 120. BIOS 1.70a3
- 121. EMC provides documentation for boot configurations that contains helpful information for systems booting from EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
- 122. EMC provides in-depth documentation for configurations with QLogic adapters that contains helpful information for installing and configuring QLogic adapters with EMC Storage. This documentation is located in the EMC section of the QLogic website (<http://www.qlogic.com>) along with HBA drivers, and BIOS.

Cluster Software

Asianux AX [32-Bit]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Asianux AX [32-Bit] | | | | |
|---------------------|--|----------------------|-----------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Asianux AX [32-Bit] 2.0 SP1 ^{1, 2, 3} | NEC ClusterPro X 1.0 | EMC PowerPath: 4.5.1, 4.5.3 | EMC CLARiON AX150 |
| 2 | Asianux AX [32-Bit] 2.0: SP1 ^{1, 2, 3} , SP2 ^{2, 4, 5} | NEC ClusterPro X 1.0 | EMC PowerPath 5.0.0 | EMC CLARiON AX150 |

- 1. Kernels supported: 2.6.9-34.21AX. Confirm kernel support with server vendor.
- 2. The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- 3. Asianux 2.0 SP1 include Redflag DC Server 5.0 SP1, Miracle Linux v4.0 SP1, Haansoft 2006 Server Asianux Server 2.0 SP1.
- 4. Asianux 2.0 SP2 include Redflag DC Server 5.0 SP2, Miracle Linux v4.0 SP2, Haansoft 2006 Server Asianux Server 2.0 SP2.
- 5. Support kernel: 2.6.9-42.7AX. Contact server vendor for support.

Asianux AX [x86_64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Asianux AX [x86_64] | | | | |
|---------------------|--|----------------------|-----------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Asianux AX [x86_64] 2.0 SP1 ^{1, 2, 3} | NEC ClusterPro X 1.0 | EMC PowerPath: 4.5.1, 4.5.3 | EMC CLARiON AX150 |
| 2 | Asianux AX [x86_64] 2.0: SP1 ^{1, 2, 3} , SP2 ^{2, 4, 5} | NEC ClusterPro X 1.0 | EMC PowerPath 5.0.0 | EMC CLARiON AX150 |

- 1. Kernels supported: 2.6.9-34.21AX. Confirm kernel support with server vendor.
- 2. The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- 3. Asianux 2.0 SP1 include Redflag DC Server 5.0 SP1, Miracle Linux v4.0 SP1, Haansoft 2006 Server Asianux Server 2.0 SP1.
- 4. Asianux 2.0 SP2 include Redflag DC Server 5.0 SP2, Miracle Linux v4.0 SP2, Haansoft 2006 Server Asianux Server 2.0 SP2.
- 5. Supported kernels: 2.6.9-42.7AX. Confirm kernel support with server vendor.

Microsoft Windows 2000

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2000 | | | | | | | |
|------------------------|---|--------------------------------|-------------|--|--|-------------------|------------------|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Server LVM | Storage Array | Comments |
| 1 | Microsoft Windows 2000: Advanced Server SP4, Server SP4 | Microsoft MSCS ^{1, 2} | HA: 2 | EMC PowerPath: 4.5.0, 4.5.1, 5.0.0, 5.0.1, 5.1 | Veritas VxVM: 4.0 ³ , 4.1 ³ , 4.2 (Storage Foundation) ³ , 5.0 ³ , 4.3 (Storage Foundation) ³ | EMC CLARiON AX150 | See ⁴ |

- 1. Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- 2. Cluster software is not supported on Stratus ftServers.
- 3. Logical Volume Manager is an optional component for Windows MSCS Cluster Solutions. Use of Veritas Volume Manager (or Storage Foundation) allows use of Dynamic disks in clusters.
- 4. EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.

Microsoft Windows 2003 Unified Data Storage Server [x64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2003 Unified Data Storage Server [x64] | | | | | | | |
|--|---|-----------------------------|-------------|---|---|-------------------|------------------|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Server LVM | Storage Array | Comments |
| 1 | Microsoft Windows 2003 Unified Data Storage Server [x64] Enterprise Edition SP1 | Microsoft MSCS ³ | HA: 8 | EMC PowerPath: 4.5.0, 4.5.1, 4.6.0, 4.6.1, 5.0.0, 5.0.1, 5.1, 5.2.1 ⁴ , 5.2 ⁴ | Veritas VxVM: 4.0 ² , 4.1 ² , 4.2 (Storage Foundation) ² , 4.3 (Storage Foundation) ² , 5.0 ^{2, 5} | EMC CLARiON AX150 | See ¹ |

- 1. EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- 2. Logical Volume Manager is an optional component for Windows MSCS Cluster Solutions. Use of Veritas Volume Manager (or Storage Foundation) allows use of Dynamic disks in clusters.
- 3. Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- 4. PowerPath with Encryption does not support dynamic disks. PowerPath with Encryption is not supported with Windows 2008. Please refer to the PowerPath Encryption with RSA Release Notes notes for other features and exceptions
- 5. Refer to the Veritas Volume Manager table for restrictions/recommendations for Storage Foundation 5.0 with DMP or PowerPath.

Microsoft Windows 2003 [x64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2003 [x64] | | | | | | | |
|------------------------------|--|--|---------------|---|--|-------------------|------------------|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Server LVM | Storage Array | Comments |
| 1 | Microsoft Windows 2003 [x64] Enterprise: Edition, Edition R2, Edition R2 SP2, Edition SP2; Microsoft Windows 2003 [x64] Standard: Edition, Edition R2, Edition R2 SP2, Edition SP2 | Microsoft Windows Compute Cluster Server 2003 ^{7,8} | HA: Unlimited | EMC PowerPath: 4.5.0, 4.5.1, 4.6.0, 4.6.1 | Veritas VxVM: 4.0, 4.1, 4.2 (Storage Foundation), 4.3 (Storage Foundation) | EMC CLARiON AX150 | |
| 2 | Microsoft Windows 2003 [x64]: DataCenter, DataCenter R2, DataCenter R2 SP2, DataCenter SP2, Enterprise Edition, Enterprise Edition R2, Enterprise Edition R2 SP2, Enterprise Edition SP2, Storage Server Enterprise Edition, Storage Server Enterprise Edition R2, Storage Server Enterprise Edition R2 SP2, Storage Server Enterprise Edition SP2 | Microsoft MSCS ¹ | HA: 8 | EMC PowerPath: 4.5.0, 4.5.1, 4.6.0, 4.6.1, 5.0.0, 5.0.1, 5.1, 5.2.1 ⁵ , 5.2 ⁵ | Veritas VxVM: 4.0 ³ , 4.1 ³ , 4.2 (Storage Foundation) ³ , 4.3 (Storage Foundation) ³ , 5.0 ^{3,4} | EMC CLARiON AX150 | See ² |

- Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- Logical Volume Manager is an optional component for Windows MSCS Cluster Solutions. Use of Veritas Volume Manager (or Storage Foundation) allows use of Dynamic disks in clusters.
- Refer to the Veritas Volume Manager table for restrictions/recommendations for Storage Foundation 5.0 with DMP or PowerPath.
- PowerPath with Encryption does not support dynamic disks. PowerPath with Encryption is not supported with Windows 2008. Please refer to the PowerPath Encryption with RSA Release Notes notes for other features and exceptions
- Refer to <http://www.microsoft.com/windowsserver2003/ccs/faq.aspx> for more information.
- Remote administration of Windows Computer Cluster 2003 can be accomplished via installed remote components. These remote components are supported on Windows 2003 operating systems with Service Pack 1 or higher (R2 also supported), Windows XP Professional x64 version, and Windows XP Professional x86 with service pack 2.
- Individual nodes in a Compute Cluster Server configuration connected to EMC storage must use a valid server/HBA combination from the Base Connectivity tables.

Microsoft Windows 2003 [x86]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2003 [x86] | | | | | | | |
|------------------------------|---|-------------------------------|-------------|---|--|-------------------|------------------|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Server LVM | Storage Array | Comments |
| 1 | Microsoft Windows 2003 [x86] DataCenter: R2, R2 SP2, SP1, SP2; Microsoft Windows 2003 [x86] Enterprise Edition: R2, R2 SP2, SP1, SP2; Microsoft Windows 2003 [x86] Storage: Server, Server Enterprise Edition, Server Enterprise Edition R2, Server Enterprise Edition SP1, Server R2, Server SP1 | Microsoft MSCS ^{3,4} | HA: 8 | EMC PowerPath: 4.5.0, 4.5.1, 4.6.0, 4.6.1, 5.0.0, 5.0.1, 5.1, 5.2.1 ⁶ , 5.2 ⁶ | Veritas VxVM: 4.0 ¹ , 4.1 ¹ , 4.2 (Storage Foundation) ¹ , 4.3 (Storage Foundation) ¹ , 5.0 ^{1,2} | EMC CLARiON AX150 | See ⁵ |

- Logical Volume Manager is an optional component for Windows MSCS Cluster Solutions. Use of Veritas Volume Manager (or Storage Foundation) allows use of Dynamic disks in clusters.
- Refer to the Veritas Volume Manager table for restrictions/recommendations for Storage Foundation 5.0 with DMP or PowerPath.
- Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- Cluster software is not supported on Stratus ftServers.
- EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- PowerPath with Encryption does not support dynamic disks. PowerPath with Encryption is not supported with Windows 2008. Please refer to the PowerPath Encryption with RSA Release Notes notes for other features and exceptions

Microsoft Windows 2008 [x64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2008 [x64] | | | | | | | |
|------------------------------|---|---|-------------|--|-------------------|------------------|--|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Storage Array | Comments | |
| 1 | Microsoft Windows 2008 [x64]: DataCenter ² , Enterprise Edition ² | Microsoft: Failover Clustering ^{3,4} , MSCS ³ | HA: 8 | EMC PowerPath 5.1.2; Microsoft MPIO Framework (default DSM) ^{5,6} | EMC CLARiON AX150 | See ¹ | |

- EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- Windows 2008 Server Core option is supported by EMC. Contact your server vendor to determine their support statement for Server Core.
- Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- Cluster software is not supported on Stratus ftServers.
- Native to Windows 2008 Server installation.
- For Windows 2008 Server Core installations, Native MPIO is failover only. There are no load balancing options available by default.

Microsoft Windows 2008 [x86]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Microsoft Windows 2008 [x86] | | | | | | |
|------------------------------|---|---|-------------|--|-------------------|------------------|
| No. | Operating System | Cluster Software | Max # Nodes | Infrastructure Software | Storage Array | Comments |
| 1 | Microsoft Windows 2008 [x86]: DataCenter ³ , Enterprise Edition ³ | Microsoft: Failover Clustering ^{1,2} , MSCS ^{1,2} | HA: 8 | EMC PowerPath 5.1.2: Microsoft MPIO Framework [default DSM] ^{5,6} | EMC CLARiON AX150 | See ⁴ |

- Valid MSCS quorum resource configurations include both 'shared disk quorum' and 'majority node set' schemes.
- Cluster software is not supported on Stratus ftServers.
- Windows 2008 Server Core option is supported by EMC. Contact your server vendor to determine their support statement for Server Core.
- EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- Native to Windows 2008 Server installation.
- For Windows 2008 Server Core installations, Native MPIO is failover only. There are no load balancing options available by default.

Red Hat RHEL [32-Bit]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Red Hat RHEL [32-Bit] | | | | |
|-----------------------|---|--|------------------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Red Hat RHEL [32-Bit] 3.0 U7 AS/ES ¹ | NEC ClusterPro SE 3, Express Cluster 3 | EMC PowerPath: 4.3.4, 4.3.5, 4.3.6 | EMC CLARiON AX150 |
| 2 | Red Hat RHEL [32-Bit] 4.0 U3 AS/ES ^{2,3} | NEC ClusterPro SE 3, Express Cluster 3 | EMC PowerPath 4.5.1 | EMC CLARiON AX150 |
| 3 | Red Hat RHEL [32-Bit] 4.0: U3 AS/ES ^{2,3} , U4 AS/ES ^{3,4} | NEC ClusterPro X 1.0 | EMC PowerPath: 4.5.1, 4.5.3 | EMC CLARiON AX150 |
| 4 | Red Hat RHEL [32-Bit] 4.0: U3 AS/ES ^{2,3} , U4 AS/ES ^{3,4} ; Red Hat RHEL [32-Bit] 4.5 AS/ES ^{3,5} | NEC ClusterPro X 1.0 | EMC PowerPath 5.0.0 | EMC CLARiON AX150 |

- Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.

Red Hat RHEL [EM64T]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Red Hat RHEL [EM64T] | | | | |
|----------------------|--|--|------------------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Red Hat RHEL [EM64T] 3.0 U7 AS/ES ¹ | NEC ClusterPro SE 3, Express Cluster 3 | EMC PowerPath: 4.3.4, 4.3.5, 4.3.6 | EMC CLARiON AX150 |

- Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.

Red Hat RHEL [IA64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Red Hat RHEL [IA64] | | | | |
|---------------------|---|--|-------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Red Hat RHEL [IA64] 4.0 U3 AS/ES ^{1,2} | NEC ClusterPro SE 3, Express Cluster 3 | EMC PowerPath 4.5.1 | EMC CLARiON AX150 |

- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.

Red Hat RHEL [x86_64]

EMC has qualified the following cluster software. Please refer to the Base Connectivity table(s) for information concerning server models, HBAs, drivers, firmware, operating system requirements and other special notes.

| Red Hat RHEL [x86_64] | | | | |
|-----------------------|---|--|-----------------------------|-------------------|
| No. | Operating System | Cluster Software | Infrastructure Software | Storage Array |
| 1 | Red Hat RHEL [x86_64] 4.0 U3 AS/ES ^{1,3} | NEC ClusterPro SE 3, Express Cluster 3 | EMC PowerPath 4.5.1 | EMC CLARiON AX150 |
| 2 | Red Hat RHEL [x86_64] 4.0: U3 AS/ES ^{1,3} , U4 AS/ES ^{1,2} | NEC ClusterPro X 1.0 | EMC PowerPath: 4.5.1, 4.5.3 | EMC CLARiON AX150 |
| 3 | Red Hat RHEL [x86_64] 4.0: U3 AS/ES ^{1,3} , U4 AS/ES ^{1,2} ; Red Hat RHEL [x86_64] 4.5 AS/ES ^{1,4} | NEC ClusterPro X 1.0 | EMC PowerPath 5.0.0 | EMC CLARiON AX150 |

- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.

- Asianux 2.0 SP2 include Redflag DC Server 5.0 SP2, Miracle Linux v4.0 SP2, Haansoft 2006 Server Asianux Server 2.0 SP2.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Support kernel: 2.6.9-42.7AX. Contact server vendor for support.
- NPIV must be enabled for this switch
- Asianux 2.0 GA include Redflag DC Server 5.0 GA, Miracle Linux v4.0 GA, Haansoft 2006 Server Asianux Server 2.0.
- Supported kernels: 2.6.9-11.19AX.
Confirm kernel support with server vendor.
- Asianux 1.0 SP2 includes Red Flag DC Server 4.1 SP2, Miracle Linux v3.0 SP2, Haansoft Linux 2005 Server Asianux Inside SP2.
- Support kernels: 2.4.21-37.18AX. Confirm kernel version with server vendor.
- EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- This switch is offered by Dell as the Brocade VL2 LC.
- Support kernels: 2.4.21-9.30AX, 2.4.21-9.38AX. Confirm kernel version with server vendor.**
- Asianux 1.0 GA include Red Flag DC Server 4.1 GA, MIRACLE LINUX V3.0 GA.
- Support kernels: 2.4.21-20.19AX, 2.4.21-20.29AX. Confirm kernel version with server vendor.
- Asianux 1.0 GA include Red Flag DC Server 4.1 GA, Miracle Linux MLSE 3.0 GA.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- Kernels supported: 2.6.9-34.21AX.
Confirm kernel support with server vendor.
- Asianux 2.0 SP1 include Redflag DC Server 5.0 SP1, Miracle Linux v4.0 SP1, Haansoft 2006 Server Asianux Server 2.0 SP1.

- Windows 2000 hosts running less than SP4 could be susceptible to data loss during LUN expansion operations. This issue is corrected by Microsoft in SP4, or by applying hotfix 327020. See EMC Solution IS emc73538 and Microsoft Knowledge Base article 327020 for more information.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- This switch is offered by Dell as the Brocade VL2 LC.
- EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.
- NPIV must be enabled for this switch

1. This switch is offered by Dell as the Brocade VL2 LC.

2. The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)

3. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
4. NPIV must be enabled for this switch
5. EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.

- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to be installed in bays 8 & 10.
- This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- NPIV must be enabled for this switch.
- This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenterTM (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- Supported only in bays 3 and 4 of IBM BladeCenter chassis'.
- NPV is not supported with SAN-OS versions less than 3.3.1c
- This switch is offered by Dell as the Brocade VL2 LC.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch module supports ISL connection to Cisco FC switches or direct connection to EMC Storage Arrays only.
- Direct connection to EMC Storage Arrays are not supported
- Internal port(s) on Qlogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
- ISLs are supported to Cisco FC switches
- The following setting should be verified: DefaultZoning = False; DefaultVisibility = None
- One of the core fabric switches must be configured to be a principle switch. the blade switches should not acquire the role of principle switch.
- HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
- NPIV must be enabled for this switch
- Fibre channel arbitrated loop connections (direct attach) are not supported for EMC Storage Arrays.**
- External boot required BIOS v1.26 (in Multiboot 1.63) on Qlogic QMH2462 4Gb FC HBA (403619-B21) when connected to VC-FC module (409513-B21).

- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- EMC supported drivers, firmware, and boot BIOS can be downloaded from <http://www.emulex.com> in the EMC section, by obtaining the supported driver for the Emulex LPe1150-E.
- This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- NPIV must be enabled for this switch.
- This switch module supports ISL connection to Cisco FC switches or direct connection to EMC Storage Arrays only.
- ISLs are supported to Cisco FC switches
- The following setting should be verified: DefaultZoning = False; DefaultVisibility = None
- One of the core fabric switches must be configured to be a principle switch. the blade switches should not acquire the role of principle switch.
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to be installed in bays 8 & 10.
- This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenterTM (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- Supported only in bays 3 and 4 of IBM BladeCenter chassis'.
- NPV is not supported with SAN-OS versions less than 3.3.1c
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch is offered by Dell as the Brocade VL2 LC.
- Direct connection to EMC Storage Arrays are not supported
- Internal port(s) on QLogic or McData 4Gb FC switch module(s) must be set to 4Gb (if 4Gb operation is required or to 2Gb if 2Gb operation is required)
- HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
- NPIV must be enabled for this switch
- Fibre channel arbitrated loop connections (direct attach) are not supported for EMC Storage Arrays.**
- External boot required BIOS v1.26 (in Multiboot 1.63) on QLogic QMH2462 4Gb FC HBA (403619-B21) when connected to VC-FC module (409513-B21).

- FC-SW environments using Brocade 2800 or EMC DS-16B require switch firmware 2.5.0d or greater.
- DOS boot device maximum accessible capacity is 2GB. Netware SYS volume must be in LUN 0.
- NetWare boot support is contingent on migration of the DOS boot partition to an NSS partition. NetWare will warn you of the possibility of data corruption if you convert the DOS boot partition to an NSS partition. The risk of data corruption is during I/O to the C: drive while in the NetWare debugger, or while writing reboot log files during an "Auto Restart After Abend". When you load DOSFAT, please set "Auto Restart After Abend" to 0 to avoid the possibility of data corruption.
- Remote boot not supported with PERC controllers enabled in system BIOS.
- No MirrorView or SnapView used on boot LUNs.
- Requires "SCAN ALL LUNs" in AUTOEXEC.NCF just before the "Mount All" statement.
- For any CLARiON SP port configured to a host for booting, the maximum number of logical volumes allowed on that port is 32.
- Edit config.sys with the following: Files=100, Buffers=99
- Previous versions of the HBA and boot installation guides contained restrictions for boot configurations. All boot configuration information is now listed here and supersedes any found in previous boot documentation.
- To enable failover with fabric boot DOSFAT.NSS must be loaded from the autoexec.ncf. In a failed condition the c:\ partition will not failover correctly but the DOSFAT_C: partition will.
- Access Logic required, direct connect or fabric, (no booting through switch inter-switch links)
- Novell Storage Services supported.
- Supports eight (8) hosts per array.

14. This switch is offered by Dell as the Brocade VL2 LC.
 15. The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)

- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.0.1.el5, 2.6.18-53.1.13.0.1.el5, 2.6.18-53.1.14.0.1.el5, 2.6.18-53.1.19.0.1.el5. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-78.0.0.0.1.EL, 2.6.9-78.0.1.0.1.EL, 2.6.9-78.0.5.0.1.EL, 2.6.9-78.0.8.0.1.EL, 2.6.9-78.0.8.2.1.EL, 2.6.9-78.0.8.2.2.EL, 2.6.9-78.0.13.0.1.EL. Confirm kernel support with server vendor.
- Supported kernel: 2.6.18-128.0.0.2.el5, 2.6.18-128.1.1.0.1.el5. Confirm kernel support with server vendor.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- Supported kernels: 2.6.18-92.0.0.0.1.el5, 2.6.18-92.1.1.0.1.el5, 2.6.18-92.1.6.0.2.el5, 2.6.18-92.1.10.0.1.el5, 2.6.18-92.1.13.0.1.el5, 2.6.18-92.1.17.0.1.el5, 2.6.18-92.1.17.0.2.el5; 2.6.18-92.1.22.0.1.el5. Confirm kernel support with server vendor.
- This switch is offered by Dell as the Brocade VL2 LC.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- Supported kernels: 2.6.9-67.0.0.0.1.EL, 2.6.9-67.0.1.0.1.EL, 2.6.9-67.0.4.0.1.EL, 2.6.9-67.0.7.0.1.EL, 2.6.9-67.0.15.0.1.EL, 2.6.9-67.0.20.0.1.EL, 2.6.9-67.0.20.0.2.EL, 2.6.9-67.0.22.0.1.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-55.0.0.0.2.EL, 2.6.9-55.0.2.0.1.EL, 2.6.9-55.0.6.0.1.EL, 2.6.9-55.0.9.0.1.EL, and 2.6.9-55.0.12.0.1.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-8.EL5, 2.6.18-8.0.0.4.1.EL5, 2.6.18-8.1.4.0.1.EL5, 2.6.18-8.1.6.0.1.EL5, 2.6.18-8.1.8.0.1.EL5, 2.6.18-8.1.10.0.1.EL5, 2.6.18-8.1.14.0.2.EL5, 2.6.18-8.1.15.0.1.EL5, 2.6.18-53.1.21.0.1.el5. Confirm kernel support with server vendor.
- NPIV must be enabled for this switch
- Supported kernels: 2.6.9-42.0.0.0.1.EL, 2.6.9-42.0.10.0.1.EL, 2.6.9-42.0.3.0.2.EL, and 2.6.9-42.0.8.0.1.EL. Confirm kernel support with server vendor.

- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-55.0.0.0.2.EL, 2.6.9-55.0.2.0.1.EL, 2.6.9-55.0.6.0.1.EL, 2.6.9-55.0.9.0.1.EL, and 2.6.9-55.0.12.0.1.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-78.0.0.0.1.EL, 2.6.9-78.0.1.0.1.EL, 2.6.9-78.0.5.0.1.EL, 2.6.9-78.0.8.0.1.EL, 2.6.9-78.0.8.2.1.EL, 2.6.9-78.0.8.2.2.EL, 2.6.9-78.0.13.0.1.EL. Confirm kernel support with server vendor.
- Supported kernel: 2.6.18-128.0.0.0.2.el5, 2.6.18-128.1.1.0.1.el5. Confirm kernel support with server vendor.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- Supported kernels: 2.6.18-92.0.0.0.1.el5, 2.6.18-92.1.1.0.1.el5, 2.6.18-92.1.6.0.2.el5, 2.6.18-92.1.10.0.1.el5, 2.6.18-92.1.13.0.1.el5, 2.6.18-92.1.17.0.1.el5, 2.6.18-92.1.17.0.2.el5; 2.6.18-92.1.22.0.1.el5. Confirm kernel support with server vendor.
- This switch is offered by Dell as the Brocade VL2 LC.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- Supported kernels: 2.6.9-67.0.0.0.1.EL, 2.6.9-67.0.1.0.1.EL, 2.6.9-67.0.4.0.1.EL, 2.6.9-67.0.7.0.1.EL, 2.6.9-67.0.15.0.1.EL, 2.6.9-67.0.20.0.1.EL, 2.6.9-67.0.20.0.2.EL, 2.6.9-67.0.22.0.1.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.0.1.el5, 2.6.18-53.1.13.0.1.el5, 2.6.18-53.1.14.0.1.el5, 2.6.18-53.1.19.0.1.el5. Confirm kernel support with server vendor.
- NPIV must be enabled for this switch
- Supported kernels: 2.6.18-8.EL5, 2.6.18-8.0.0.4.1.EL5, 2.6.18-8.1.4.0.1.EL5, 2.6.18-8.1.6.0.1.EL5, 2.6.18-8.1.8.0.1.EL5, 2.6.18-8.1.10.0.1.EL5, 2.6.18-8.1.14.0.2.EL5, 2.6.18-8.1.15.0.1.EL5, 2.6.18-53.1.21.0.1.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-42.0.0.0.1.EL, 2.6.9-42.0.10.0.1.EL, 2.6.9-42.0.3.0.2.EL, and 2.6.9-42.0.8.0.1.EL. Confirm kernel support with server vendor.

- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emppower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- Supported kernels: 2.6.9-22.EL, 2.6.9-22.0.1.EL, 2.6.9-22.0.2.EL. Confirm kernel support with server vendor.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch is offered by Dell as the Brocade VL2 LC.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenterTM (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- Direct connection to EMC Storage Arrays are not supported
- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.

14. Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
15. Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
16. NPIV must be enabled for this switch
17. Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
18. Supported kernels: 2.6.18-8.EL5, 2.6.18-8.1.1.EL5, 2.6.18-8.1.3.EL5, 2.6.18-8.1.4.EL5, 2.6.18-8.1.6.EL5, 2.6.18-8.1.8.EL5, 2.6.18-8.1.10.EL5, 2.6.18-8.1.14.EL5, and 2.6.18-8.1.15.el5. Confirm kernel support with server vendor.
19. Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.
20. Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
21. This HBA is equivalent to the Emulex LPe12000
22. This HBA is equivalent to the Emulex LPe12002
23. This HBA is equivalent to the QLogic QLE2560
24. This HBA is equivalent to the QLogic QLE2562
25. Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.
26. Supported kernels: 2.6.9-5.EL, 2.6.9-5.0.5.EL. Confirm kernel support with server vendor.
27. Supported kernels: 2.6.9-11.EL. Confirm kernel support with server vendor.

| 15 | Red Hat RHEL [IA64]: 5.2.1.2.3, 5.32.3, 7 | Emulex LP11002-E; QLogic: QLA2460-E-SP, QLA2462-E-SP | Brocade: 200E, 205E, 207E, 4100, 48000, 4900, 5000, 7500; EMC Connectrix: 3250-VL2E ⁵ , DS-220B, DS-220B-FF-D ⁴ , DS-4100B, DS-4400M, DS-4700M, DS-4900B, DS-5000B, DS-8B2-0DL, ED-48000B; McDATA: ES-4300 ⁶ , ES-4400, ES-4700; QLogic SANBox: SB1404-10AJ-E, SB3050-08A-E | 256 | Y | EMC CLARiiON AX150 |

- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch is offered by Dell as the Brocade VL2 LC.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.

9. NPIV must be enabled for this switch

- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- This switch is offered by Dell as the Brocade VL2 LC.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- Native multipathing is not supported on boot-from-SAN configurations.
- This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenterTM (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- This switch module supports ISL connection to Cisco FC switches or direct connection to EMC Storage Arrays only.
- Direct connection to EMC Storage Arrays are not supported
- NPIV must be enabled for this switch.
- This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- Supported only in bays 3 and 4 of IBM BladeCenter chassis'.
- NPV is not supported with SAN-OS versions less than 3.3.1c
- ISLs are supported to Cisco FC switches
- The following setting should be verified: DefaultZoning = False; DefaultVisibility = None
- One of the core fabric switches must be configured to be a principle switch. the blade switches should not acquire the role of principle switch.
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to installed in bays 8 & 10.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- NPIV must be enabled for this switch
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.

- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- Supported kernels: 2.6.18-128.el5, 2.6.18-128.1.1.el5. Confirm kernel support with server vendor.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch is offered by Dell as the Brocade VL2 LC.
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.

11. Supported kernels: 2.6.18-8.EL5, 2.6.18-8.1.1.EL5, 2.6.18-8.1.3.EL5, 2.6.18-8.1.4.EL5, 2.6.18-8.1.6.EL5, 2.6.18-8.1.8.EL5, 2.6.18-8.1.10.EL5, 2.6.18-8.1.14.EL5, and 2.6.18-8.1.15.el5. Confirm kernel support with server vendor.
12. NPIV must be enabled for this switch
13. Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
14. Supported kernels: 2.6.9-11.EL. Confirm kernel support with server vendor.
15. Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.
16. This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter™ (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
17. Direct connection to EMC Storage Arrays are not supported
18. Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
19. Supported kernels: 2.6.9-22.EL, 2.6.9-22.0.1.EL, 2.6.9-22.0.2.EL. Confirm kernel support with server vendor.
20. This HBA is equivalent to the Emulex LPe12000
21. This HBA is equivalent to the Emulex LPe12002
22. Supported kernels: 2.6.9-5.EL, 2.6.9-5.0.5.EL. Confirm kernel support with server vendor.
23. This HBA is equivalent to the QLogic QLE2560
24. This HBA is equivalent to the QLogic QLE2562

- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- Novell OES is only supported with Fibre channel connectivity.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Novell OES 2 is supported with Linux native MPIO or via RPQ for EMC PowerPath.
- Novell OES 2 is supported with this update.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
- NPIV must be enabled for this switch
- Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3. Confirm kernel support with server vendor.
- Novell OES is supported on kernels 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3, and 2.6.5-7.308 with EMC PowerPath only.**
- Supported kernels: 2.6.5-7.308, 2.6.5-7.311, 2.6.5-7.312, 2.6.5-7.314, 2.6.5-7.315. The 32bit kernel 2.6.5-7.311 is not supported with PowerPath 5.1 SP1. Confirm kernel support with server vendor.
- Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.27-0.6, 2.6.16.27-0.9. Confirm kernel support with server vendor. PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.
- This switch is offered by Dell as the Brocade VL2 LC.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7. Confirm kernel support with server vendor.
- Novell OES is supported with EMC PowerPath only.**
- Supported kernels: 2.6.5-7.139, 2.6.5-7.145, 2.6.5-7.147, 2.6.5-7.151. Confirm kernel support with server vendor.

- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
- This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- This switch module supports ISL connection to Cisco FC switches or direct connection to EMC Storage Arrays only.
- ISLs are supported to Cisco FC switches
- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- Supported only in bays 3 and 4 of IBM BladeCenter chassis'.
- NPV is not supported with SAN-OS versions less than 3.3.1c
- Requires IBM Multi-Switch Interconnect Module for IBM BladeCenter (39Y9314) installed in IBM BladeCenter H and with appropriate fibre channel switch modules to be installed in bays 8 & 10.
- This switch module is supported in both legacy switch module positions (bays 3 and 4) of all IBM BladeCenter Chassis and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenterTM (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
- Direct connection to EMC Storage Arrays are not supported
- NPIV must be enabled for this switch.
- The following setting should be verified: DefaultZoning = False; DefaultVisibility = None
- One of the core fabric switches must be configured to be a principle switch. the blade switches should not acquire the role of principle switch.

- Novell OES is only supported with Fibre channel connectivity.
- Novell OES 2 is supported with this update.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
- Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7.
Confirm kernel support with server vendor.
- Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
- This switch is offered by Dell as the Brocade VL2 LC.
- The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
- NPIV must be enabled for this switch
- Supported kernels: 2.6.5-7.308, 2.6.5-7.311, 2.6.5-7.312, 2.6.5-7.314, 2.6.5-7.315.
The 32bit kernel 2.6.5-7.311 is not supported with PowerPath 5.1 SP1.
Confirm kernel support with server vendor.
- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- Novell OES 2 is supported with Linux native MPIO or via RPQ for EMC PowerPath.
- Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3.
Confirm kernel support with server vendor.

14. Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.27-0.6, 2.6.16.27-0.9.
Confirm kernel support with server vendor.
PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.

1. For a list of supported guest operating systems, refer to the "Guest Operating System Installation Guide" at http://www.vmware.com/pdf/GuestOS_guide.pdf
2. For details on Microsoft Cluster Services (MSCS) support with Windows guest operating systems, refer to the Storage/SAN Compatibility Guide For ESX Server 3.x on www.vmware.com.
3. NPIV must be enabled for this switch
4. VMware ESX does not have dependencies on specific FC-switches and has been found to be broadly interoperable with current generation FC-SW2 compliant Fibre Channel switches. The listed FC-switches reflect the configurations qualified for support with EMC storage arrays.
5. For details on Microsoft Cluster Services (MSCS) support with Windows guest operating systems, refer to the "SAN Compatibility Guide For ESX Server 2.x" at http://www.vmware.com/pdf/esx_SAN_guide.pdf
6. This switch is offered by Dell as the Brocade VL2 LC.
7. The minimum firmware revision for the ES-4300 is 5.05.00 (This firmware revision is only to be used on ES-4300)
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. This HBA is equivalent to the QLogic QLE2562
10. This HBA is equivalent to the QLogic QLE2560

1. Supports Stratus OS 2.0.X through 2.1.X.
2. Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.
By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.
3. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
4. Supports Stratus OS 1.3.X through 2.1.X.

- EMC VDS Provider 6.3.2.24
- NaviCLI 6.24.0.6.13
- Navisphere Storage System Initialization Wizard version 6.24.0.6.7.
- PowerPath 4.6.1, 5.0.1, and 5.1 supported.
- NaviAgent 6.24.0.6.13
- Paxville-based PowerEdge models require minimum A04 system BIOS.
- Paxville-based PowerEdge models require minimum A02 system BIOS.
- Not supported with Emulex LP8000-EMC HBA.
- PowerEdge 2550 and PowerVault 775N support a maximum of 2 Emulex HBAs at one time and the total PCI power cannot exceed 20 Watts.
- If using Dell PERC Controller, requires PERC 2 or PERC 3 with OpenManager 3.0 and Array Manager 3.1. The afamgt.sys must be version 2.6.0.3486 (or above).

- HPQ (Compaq) Proliant server models that are not listed in the ESM but are only differentiated from supported models by an "R" designator, are rack-mountable servers and are supported.
- HP-UX rx2660 with the following processors.
AD392A Single-core 1.6GHz processor with 12MB cache
AH240A Dual-core 1.42GHz processor with 12MB cache
AH241A Dual-core 1.67GHz processor with 18MB cache
Require the following firmware recipe 0.94
Minimum required OPERATING SYSTEMS:
HP-UX 11i v2 HWE 0706
HP-UX 11i v3 HWE 0709
- Requires HP-UX 11i v2.0 0609 and 0612 AR and patches PHNE_34671 and PHNE_33732
- Proliant DL360 G4 servers with a BIOS prior to P52 may not be running a fully ACPI-compliant BIOS. Emulex 4gb HBAs require the latest ACPI-compliant BIOS and your server may require Windows 2000 to be reinstalled. You do not need to reinstall Windows 2000 if you had an ACPI-compliant BIOS and then upgraded to a newer ACPI-compliant BIOS. You only need to reinstall Windows 2000 if you did not have an ACPI BIOS or an ACPI-compliant BIOS before you upgraded the BIOS. Refer to Microsoft knowledge base article 256841 for more information. (<http://support.microsoft.com/?kbid=256841&sd=RMVP>)
- HP-UX BL860c with the following processors.
AD394A Dual-core 1.42GHz processor with 12MB cache
AD395A Single-core 1.6GHz processor with 6MB cache
AD396A Dual-core 1.67GHz processor with 18MB cache
Require the following firmware recipe 0.95
Minimum required OPERATING SYSTEMS:
HP-UX 11i v2 HWE 0706
HP-UX 11i v3 HWE 0709

6. Please see the HP website for supported BL c-Class model numbers.
The supported model numbers are available in the quickspecs documents available for each BL c-Class blade.
7. Single core processors only.
8. HP rp3410-2: clusters supported on 2-cpu systems only.
9. HP rp3410-2: To accomodate pvlincs and networking requirements of serviceguard on a 2 io slot system, at least one of the hbas must be an A9782A or an A9784A combo card.
10. HP-UX rx3600 & rx6600 with the follwing processors.
AD390A Dual-core 1.42GHz processor with 12MB cache
AD391A Dual-core 1.67GHz processor with 18MB cache
Require the following firmware recipe 0.94
Minimum required OPERATING SYSTEMS:
HP-UX 11i v2 HWE 0706
HP-UX 11i v3 HWE 0709
11. Includes both Pentium PRO and XEON models
12. HP Netserver LH3000 U3 is supported in the same configurations as the standard LH 3000.
13. HP-UX: The integrity Superdome/Rx8640/Rx7640 are built around sx2000 chip set and supports the Montecito processors
AB451A 1.4GHz 12MB cache dual-core Intel processor
AB584A 1.6GHz 18MB cache dual-core Intel processor
AB452A 1.6GHz 24MB cache dual-core Intel processor
The minimum supported Operating System is HP-UX 11i V2 June 2006 or later. Minimum required firmware recipe 2.0 for Montecito processors.
14. HP-UX: The integrity Superdome/Rx8640/Rx7640 are built around sx2000 chip set and Support Madison9M 1.6 GHz processors, The minimum supported Operating System is HP-UX 11i V2 Sept 2004 release or later with the following components from the March 2006, release.
+The HWEenable 11i Patch Bundle
+ignite-UX
+online Diags
+New and updated I/O driver bundles.
Minimum required firmware recipe 4.3.2 for Madison 9m processors.
15. HP-UX: The integrity Rx8640/Rx7640 are built around sx2000 chip set and supports the Montvale processors,
AD362A 1.4GHz 12MB cache dual-core Intel processor
AD365A 1.6GHz 18MB cache dual-core Intel processor
AD368A 1.6GHz 24MB cache dual-core Intel processor
Miminum supported:
HP-UX 11i v2 Release for June 2007 or later; Support for vPars 4.04
HP-UX 11i v3 Release for Sept 2007 or later; Support for vPars A.05.02
Minimum required firmware version 4.0 for support
16. Must add "set sd:sd_max_throttle=20" and "set sd:sd_io_time=60" in the /etc/system file for CLARiION or Symmetrix attach. Do not include quotes on these entries.
17. This server is equipped with plastic shielding around the PCI slots. Since the PCI slots are 32-bit, this shielding prohibits 64-bit HBAs from properly seating in the PCI slots. To accomodate 64-bit HBAs, this shielding must be removed, or modified to allow the 64-bit HBA to fully seat in the 32-bit slots.
18. Rx8640/Rx7640 are built around sx2000 chip set and requires firmware recipe 4.3.2
19. The integrity Superdome/Rx8640/Rx7640 servers are built around the sx2000 chip set and requires Madison9M 1.7 GHz processors.
20. Integrity superdome/sx2000 requires firmware recipe 4.3e

1. Integrated System Management Processor minimum firmware revision BYBT07A
2. EMC VolumeLogix Software required for multiple BladeServers when direct-attached to EMC Symmetrix storage.
3. Support for 4GB fibre channel HBAs requires an IBM SPORE to be submitted to IBM with a request of system BIOS 56A.
4. This system is supported only when the IBM ServeRAID 8i SAS RAID controller (13N227) is installed or when the server is being booted remotely from external storage.
5. Emulex PCI-X and PCI-Express adapters including QLogic 4Gb PCI-X and PCI-Express adapters are supported in the x346 (8840) only when IBM ServerRAID-7K (71P8642 or 30R8800) is installed with most current firmware and BIOS.
6. This firmware revisions includes support for AIX 5.3 and supports > 12 meg boot images for external boot.
7. For IBM xSeries Servers running Windows 2000 with IBM ServerRaid controller 4M, the ServerRaid Driver must be 6.00 or above for use with EMC PowerPath 3.0 and above. IBM driver can be downloaded at: <http://www-3.ibm.com/pc/support/site.wss/document.do?indocid=MIGR-39723>
8. Single node support only with Emulex 4Gb HBAs
9. **Certain HBA models may be too large to fit into this server's PCI or PCI-X slots. A low-profile HBA may be required. Consult your server owner's guide before purchasing HBAs for this server.**
10. System/Service processor combined microcode Version RH020413 dated 05/22/2002 or later.
11. This server only supports 5 Volt HBAs: QLogic 22XX family (if applicable), QLogic 23XX family, Emulex LP8000, and Emulex LP850 (if applicable).
12. Integrated System Management Processor minimum firmware revision BQ8T21A

1. Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
2. Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.
By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.
3. Supports Stratus OS 1.3.X through 2.1.X.
4. 3.2Ghz and 3.6Ghz versions of this server are supported.
5. Supports Stratus OS 4.1 FTSSS Release
6. HP-UX 11iv2.0 Required O.S Sept 2006, and application Release December 2006 and PHNE_34671, PHNE_33732.
7. HP rp3410-2: clusters supported on 2-cpu systems only.
8. HP rp3410-2: To accommodate pvlincs and networking requirements of serviceguard on a 2 io slot system, at least one of the hbas must be an A9782A or an A9784A combo card.
9. Supports Stratus OS 2.0.X through 2.1.X.

Stratus

| Stratus | | |
|---------|---|--------------------|
| No. | Host System | Minimum Host Bios |
| 1 | Stratus ftServer 2300 ⁶ | 2.0 |
| 2 | Stratus ftServer 2400 ⁷ | 1.0.77 |
| 3 | Stratus ftServer 3210 ^{1, 2, 3, 4, 5} , Stratus ftServer 3220 ^{1, 2, 3, 4, 5} | 6.0.4107, 6.0.5109 |
| 4 | Stratus ftServer 4300 ⁷ , Stratus ftServer 4600 ⁷ | 1.0 |
| 5 | Stratus ftServer 5200 ^{1, 3, 8, 9, 10} | 6.0.0, 7.0.0 |

- Systems running Stratus OS 1.2.2.X or 1.3 require MS hotfix Q327477 and VxVM 2.7 Hotfix 5A. Stratus OS 1.3.1 and above incorporates these hotfixes.
- ftServer OS 1.4.x requires PowerPath 3.0.2.
- Bus Enumeration Issue Causes Problems using SYMCLI SCSI bus enumeration of disks will change depending on cold boot or warm boot. This causes symcli commands to fail because the path is changed and SYMCLI can no longer communicate with the Symmetrix.
By "shutdown" and booting system, internal disks are assigned first, followed by Symmetrix disks.
By "restart" the system, Symmetrix disks are assigned first, followed by internal disks. Drive letter are not changed in both cases.
The workaround is to perform "symcfg discover" after rebooting.
- Requires Stratus ftServer OS 1.4.x or greater.
- Supports Stratus OS 1.2.2.X through 2.1.X.
- Requires Stratus OS 3.1
- Supports Stratus OS 4.1 FTSSS Release
- Supports Stratus OS 1.2.2.X through 1.4.X.
- Requires PowerPath 3.0.2.
- Requires Stratus ftServer OS 1.4.x.

Switched Fabric Topology Parameters

Brocade

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

CNT

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instalable

Cisco

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis* and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

Dell

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

EMC

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis* and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

Fujitsu Siemens

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

Huawei

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis* and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

IBM

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

McDATA

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis' and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

NEC

For SAN Router support with the switches listed on this table, please see the SAN Router tables on E-Lab Interoperability Navigator.

For single fabrics consisting of McData and Brocade directors/switches & for single fabrics consisting of Cisco MDS, and Brocade, and McDATA directors/switches, see the EMC Networked Storage Topology Guide on E-Lab Interoperability Navigator (<http://elabnavigator.emc.com>).

Server / HBA model limitations are subject to switch support as listed in Fibre Connectivity: Switch table. EMC recommends the latest code revisions be used on all fabrics.

Switch Interoperability describes the limitations for a mixed Fibre Channel switched fabric topology. The fabric topology envelope limitations and the switch management applications are defined in the attribute columns.

The following is an example showing how to utilize the table:

1. The objective of this example are to construct a SAN consisting of three switches, A, B, and C, and to verify firmware and management application compatibility. In this case you need to verify that each of these components interoperates with the other two.
2. As the data shows, devices listed in the Switch column can be the same SAN with devices listed in the Interoperable Switch column. For example: switch A running firmware X can interoperate with switch B running firmware Y, and switch A running firmware X can interoperate with switch C running firmware Z.
3. In order to verify that switch B running firmware Y can also interoperate with switch C running firmware Z, find switch B in the Switch column and switch C in the Interoperable Switch column. These two steps verify that all three firmware levels are compatible with each other.

For McData switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

For Brocade switches and directors, Single Mode optics support 10km, 20km, and 35km distance switch to switch.

OEM equivalents of switches listed in this table are supported by EMC as long as the installed firmware and all other configuration parameters are in accordance with switches specified in this table.

Unless otherwise noted, all ESM supported switch ports can accommodate a mix of EMC supplied/supported Long Wave and Short Wave optics, provided that each link segment utilizes the same optical technology.

All currently GA EMC Fibre Channel attached storage array microcode levels that have not gone end-of-service-life are supported with listed switch firmware revisions unless otherwise noted.

1. Max # Hops: The maximum number of ISLs (Inter-Switch Links) a frame needs to traverse between any input port of the fabric to any output port, assuming all ISLs are active (no ISL or switch fault condition is present). This is the maximum number of hops in a fabric. For additional information regarding how to count the number of hops in a fabric, refer to the EMC Networked Storage Topology Guide.
2. Switch Management Application Revision: Switch Management versions are backward compatible. You may manage any lower-level switch with a higher level Management Application Revision.
3. Switch Management Application Revision: The use of mixed code revisions in the same fabric should be limited to code upgrade processes only. You must always use the management code rev. associated with the highest level of switch code.
4. Max # of Domains per Fabric: The maximum number of switches a Fibre Channel fabric may contain under the current topology limitations.
5. This switch module is supported in both legacy switch module position (bay 3 or 4) of all IBM BladeCenter chassis⁹ and when installed in the IBM Multi-switch Interconnect Module for IBM BladeCenter (39Y9314), in bays 8 and 10 in the IBM BladeCenter H chassis.
6. HP Part number AE373A is 12 port upgrade license for Brocade 4/12 SAN Switch.
7. This switch is offered by Dell as the Brocade VL2 LC.
8. Dell offers the following versions of the DS-220B-FF-D switch: DS-210B-DE and DS-210B-DEU. Please reference the Dell website for further information.
9. the configuration is customer instable

AX150i Rules

Configuration Rules: AX150i Storage Systems

Note: In this document, *array* means *storage system*.

Dedicated storage networks are highly recommended, but not required. Hosts can connect to an iSCSI array using a Layer 2 (switched) or Layer 3 (routed) network. Also, the presence of VLANs, VPNs, or NAT devices on the network should be transparent to the array and are supported as long as the network quality is adequate.

Switches, Routers, NICs

- Support is provided for industry-standard switches, routers, and Network Interface Cards (NICs).
- Supports up to four HBAs, or one (if the storage system has one SP) or two (if the storage system has two SPs) NICs per server connecting to one storage system.
- A single server can not use HBAs and NICs to connect to the same storage system.
- Servers can use a combination of HBAs and NICs to connect to different storage systems.
- Separate servers, some with HBAs and some with NICs, can connect to the same storage system.
- A single server cannot use a combination of Fibre Channel HBAs and NICs or iSCSI HBAs to attach to a Fibre Channel storage system and an iSCSI storage system at the same time.
- A single server can attach to CLARiiON AX150 iSCSI storage systems and thru IP/FC Switches to CLARiiON AX150 Fibre Channel storage systems when there is common network configuration, failover software, and driver support for both platforms.
- A server can be connected to a maximum of four CLARiiON storage systems.
- An initiator can be connected to a maximum of eight array ports (four dual-SP arrays) or four array ports (four single-SP arrays), but no more than four storage systems.

Environment and Configurability

- The connection to the array must be 1 Gb copper (RJ45).
Direct 10/100 NIC connections to the array are not supported, except to management ports.
- Direct-attach is via either 10/100/1000 NIC (operating at 1 Gb) or QLA4010C HBA.
- Initiators per SP port or storage system:
 - ◆ A maximum of 10 initiators can be connected to a single SP AX150SCi port.
 - ◆ A maximum of 10 hosts can connect to an AX150SCi.
 - ◆ A maximum of 20 initiators can be connected to a dual SP AX150i.
 - ◆ A maximum of 10 hosts can connect to an AX150i.
- Target array addresses and names must be configured manually in the Initiators.
- Server names and passwords must be configured manually in the iSCSI storage system.
- Authentication mechanism to be used is the Challenge Handshake Authentication Protocol (CHAP).

Considerations

- The AX150i and AX150SCi have two front-end iSCSI ports per storage processor.
- Currently, it is not possible to boot a Windows system using an iSCSI disk volume provided by the Microsoft iSCSI initiator. The only currently supported method for booting a Windows system using an iSCSI disk volume is via a supported HBA.
- When using multiple NICs in the same server, up to two NICs per host are supported to one AX150i array. If multiple NICs are installed, it is recommended that each be on a different subnet. If multiple NICs are on the same subnet, the MS *Advanced* configuration setup must be utilized in order to take advantage of the additional NICs. If the *Advanced* configuration setup in the MS initiator is not used, additional NICs would be used typically only in a failover situation.
- When HBAs and NICs are present in the same host, the Microsoft iSCSI initiator *must not* be used to control the HBAs. The HBA utility is the only supported interface to the adapter.
- When using the Microsoft iSCSI initiator, all NICs in the same host will use the same iSCSI name. The name will identify the host and the NICs will not be identifiable.
- When using QLogic iSCSI adapters, each HBA has a unique iSCSI name that identifies the individual HBA in the host.
- Dynamic disks are not supported on an iSCSI session using the Microsoft iSCSI initiator.
- EMC supports up to two nodes with iSCSI Windows server 2003 Cluster environments with the latest MS Initiator.

CLARiiON AX150i

Native iSCSI

Asianux AX [32-Bit]

1. Driver Version iSCSI Software Initiator 4.0.1.11 Driver is integrated into the kernel.
2. NIC teaming with the Linux software initiator is not supported.
3. Routed networks (layer 3) require iSCSI digest to be enabled.
4. LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
5. Asianux 2.0 GA include Redflag DC Server 5.0 GA, Miracle Linux v4.0 GA, Haansoft 2006 Server Asianux Server 2.0.
6. The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
7. Supported kernels: 2.6.9-11.19AX. Confirm kernel support with server vendor.
8. The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
9. Driver Version iSCSI Initiator 3.6.2-3 Available from the OS distributor by request.
10. Support kernels: 2.4.21-20.19AX, 2.4.21-20.29AX. Confirm kernel version with server vendor.
11. Asianux 1.0 GA include Red Flag DC Server 4.1 GA, Miracle Linux MLSE 3.0 GA.
12. Driver Version 3.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
13. Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
14. Kernels supported: 2.6.9-34.21AX. Confirm kernel support with server vendor.
15. Asianux 2.0 SP1 include Redflag DC Server 5.0 SP1, Miracle Linux v4.0 SP1, Haansoft 2006 Server Asianux Server 2.0 SP1.
16. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
17. Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
18. BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
19. Asianux 2.0 SP2 include Redflag DC Server 5.0 SP2, Miracle Linux v4.0 SP2, Haansoft 2006 Server Asianux Server 2.0 SP2.
20. Support kernel: 2.6.9-42.7AX. Contact server vendor for support.
21. Driver Version 5.00.07 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
22. Support kernels: 2.4.21-47.22AX. Confirm kernel version with server vendor.
23. EMC supports the following filesystems: ext2, ext3, reiserfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
24. Asianux 1.0 SP3 includes Red Flag DC Server 4.1 SP3, Miracle Linux v3.0 SP3, Haansoft Linux 2005 Server Asianux Inside SP3.
25. BIOS 1.08
26. Driver Version 3.27
27. Require BIOS, Driver and Firmware available from EMC-approved section of QLogic website.
28. Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
29. BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
30. Requires QLogic firmware version 2.00.00.07 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
31. Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
32. Driver Version 3.27 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. Driver Version iSCSI Software Initiator 4.0.1.11 Driver is integrated into the kernel.
34. Firmware Version 3.00.00.16
35. BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
36. Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com> Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
37. Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
38. Includes Redflag DC Server, Miracle Linux and Haansoft Asianux Server.
39. Supported kernels: 2.6.18-8.10AX. Confirm kernel support with server vendor.
40. Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
41. Driver Version iSCSI initiator 3.6.3 Driver is integrated into the kernel.
42. Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>

Asianux AX [AMD64]

| Asianux AX [AMD64] | | | | | | |
|--------------------|---|--|----------------------------|---------------------|---------------|-----------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |
| 1 | Asianux AX [AMD64] 1.0 SP3 ^{7, 8, 9} | Generic NIC 10/100 ^{13, 14} , Generic NIC GbE ^{13, 14} , QLogic QLA4010-E-SP ^{1, 2, 3, 4, 5, 6} , QLogic QLA4010C-E-SP ^{1, 2, 3, 4, 5, 6} , QLogic QLA4050-E-SP ^{2, 4, 5, 6, 15, 16} , QLogic QLA4050C-E-SP ^{2, 4, 5, 6, 15, 16} , QLogic QLA4052C-E-SP ^{4, 5, 6, 16, 19, 20} | LAN Only ^{11, 12} | EMC CLARiiON AX150i | N | See ^{10, 11} |
| 2 | Asianux AX [AMD64] 1.0 SP3 ^{7, 8, 9} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{2, 6, 17, 18} | LAN Only ^{11, 12} | EMC CLARiiON AX150i | N | |

- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 3.27 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.00.00.16
- Require BIOS, Driver and Firmware available from EMC-approved section of QLogic website.
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Support kernels: 2.4.21-47.22AX. Confirm kernel version with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Asianux 1.0 SP3 includes Red Flag DC Server 4.1 SP3, Miracle Linux v3.0 SP3, Haansoft Linux 2005 Server Asianux Inside SP3.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Routed networks (layer 3) require iSCSI digest to be enabled.
- NIC teaming with the Linux software initiator is not supported.
- Driver Version iSCSI initiator 3.6.3 Driver is integrated into the kernel.
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.08
- Driver Version 3.27

Asianux AX [EM64T]

| Asianux AX [EM64T] | | | | | | |

| 5 | Asianux AX [x86_64] 3.0 ^{2, 28, 29} | Generic NIC 10/100 ^{22, 30} , Generic NIC GbE ^{22, 30} | LAN Only ^{8, 9} | EMC CLARiiON AX150i | N | See ^{9, 26} |

- Asianux 2.0 SP2 include Redflag DC Server 5.0 SP2, Miracle Linux v4.0 SP2, Haansoft 2006 Server Asianux Server 2.0 SP2.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.9–42.7AX.
Confirm kernel support with server vendor.
- BIOS 1.08 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.01.00.49 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Requires SANsurfer for installation and configuration and is available for download from the EMC–approved section of the QLogic website at <http://www.qlogic.com>
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Driver Version 5.00.07 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.11 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.00.00.16
- Kernels supported: 2.6.9–34.21AX.
Confirm kernel support with server vendor.
- Asianux 2.0 SP1 include Redflag DC Server 5.0 SP1, Miracle Linux v4.0 SP1, Haansoft 2006 Server Asianux Server 2.0 SP1.
- Driver Version 5.00.04 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com> Requires SANsurfer for installation and configuration and is available for download from the EMC–approved section of the QLogic website at <http://www.qlogic.com>
- Requires QLogic firmware version 3.00.00.4 available from the EMC–approved section of the QLogic website at <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Requires QLogic firmware version 2.00.00.07 available from the EMC–approved section of the QLogic website at <http://www.qlogic.com>
- BIOS 1.09a Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version iSCSI Software Initiator 4.0:1.11 Driver is integrated into the kernel.
- NIC teaming with the Linux software initiator is not supported.
- Asianux 2.0 GA include Redflag DC Server 5.0 GA, Miracle Linux v4.0 GA, Haansoft 2006 Server Asianux Server 2.0.
- Supported kernels: 2.6.9–11.19AX.
Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 4.0:1.11 Driver is integrated into the kernel.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300–002–672, that can be found on EMC's Powerlink website in Support → The Document Library → Host Connectivity for the complete installation information.
- Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>
- Includes Redflag DC Server, Miracle Linux and Haansoft Asianux Server.
- Supported kernels: 2.6.18–8.10AX.
Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
- Driver Version 3.23 Available in the EMC–approved section of the QLogic website. <http://www.qlogic.com>

IBM AIX

| IBM AIX | | | | | |
|---------|------------------------------------|--|--------------------------|--|---------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot |
| 1 | IBM AIX 5.2.0.0–08 ^{8, 9} | Generic NIC 10/100 ^{10, 11} , Generic NIC GbE ^{10, 11} | LAN Only ^{1, 2} | EMC CLARiiON AX150i ^{3, 4, 5, 6, 7} | N |

- EMC supports the Cisco Catalyst 4500 Series network switches, running IOS firmware version 12.2(25).
- EMC requires the Nortel Networks Layer2–3 GbE Switch Module for external communication on the IBM JS20/JS21 BladeCenter.
- Navisphere Host Agent Version 6.20.1.5.0 supported only.
- Requires Full Navi only. Navisphere Express is not supported.
- Requires Flare 02.20.150.5.019 or later for support.
- PowerPath SE support requires minimum PowerPath 5.1.1
- No layered apps support.
- Requires AIX 5.2.0.0–08 (TL 8) for support.
- iSCSI support limited only to the IBM BladeCenter, JS20 model 8842, and JS21 model 8844.
- Firmware Version 03210230
- Driver Version Native AIX driver

Microsoft Windows 2000

| Microsoft Windows 2000 | | | | | | |
|------------------------|---|--|--------------------------|-----------------------------------|-----------------|----------------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |
| 1 | Microsoft Windows 2000: Advanced Server SP4, Server SP4 | Generic NIC GbE ^{1, 2, 3, 6, 11} | LAN Only ^{4, 5} | EMC CLARiiON AX150i ¹² | N | See ^{7, 8, 9, 10} |
| 2 | Microsoft Windows 2000: Advanced Server SP4, Server SP4 | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{14, 15, 17, 18, 21, 22, 28, 29, 30, 31} QLogic QLA4010–E–SP ^{13, 14, 15, 16, 17, 18, 19, 21, 22, 23} QLogic QLA4010C–E–SP ^{13, 14, 15, 16, 17, 18, 19, 21, 22, 23} QLogic QLA4050–E–SP ^{13, 14, 15, 16, 17, 18, 22, 24, 25, 26, 27} QLogic QLA4050C–E–SP ^{13, 14, 15, 16, 17, 18, 22, 24, 25, 26, 27} | LAN Only ^{4, 5} | EMC CLARiiON AX150i ¹² | γ ²⁰ | See ^{8, 9, 10} |

- iSCSI offload is currently supported on Dell PowerEdge Servers with the Broadcom NetXtreme II Network adapters (based on the Broadcom 5708 ASIC) with firmware v 4.0.3 (or later) and Driver Family Version 11.0/T4.1, A00 or later. To download the latest firmware/driver, please visit <http://support.dell.com>
- The following NICs are not supported: 3COM–3C996B
- Any Microsoft supported server/NIC for the listed operating system revision is supported.
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Driver Version Microsoft iSCSI Initiator 2.08 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. MS iSCSI Initiator 2.08 only supports PowerPath 5.2 or later. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- EMC provides documentation for iSCSI configurations that contains helpful information for using iSCSI with EMC storage. Visit EMC Powerlink and download part number 300–000–603 for the Windows Host Connectivity Guide.
- Microsoft Dynamic Disks are not supported.
- Powerpath iSCSI 1.1 is not supported with Windows 2000 operating systems.
- Powerpath 4.3.1 or higher is supported. All paths may be on a single subnet, or multiple subnets may be used.
- Driver Version Microsoft iSCSI Initiator 2.07 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8

13. QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
14. Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
15. Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
16. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
17. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
18. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
19. BIOS 1.11
20. Servers booting from external storage with QLA4010 iSCSI boards require Microsoft iSCSI Initiator 2.0 or 2.02 service to be installed. Note that HBA IQN must be altered prior to Windows installation. Refer to EMC Host Connectivity Guide for information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
21. Driver Version 2.1.3.21
22. Driver Version 2.1.3.22
23. Firmware Version 3.0.0.16
24. BIOS 1.14
25. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.
26. Driver Version 2.1.4.12
27. Firmware Version 3.00.01.49
28. This iSCSI Exp Card DOES NOT support on the IBM blade server types HS21(7995,8853)
29. BIOS 1.09a
30. Firmware Version 2.00.00.45
31. Driver Version 2.1.3.28

1. EMC provides documentation for iSCSI configurations that contains helpful information for using iSCSI with EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
2. Powerpath iSCSI 1.1 is supported with Windows 2003 operating systems.
3. Microsoft Dynamic Disks are not supported.
4. Powerpath 4.3.1 or higher is supported. All paths may be on a single subnet, or multiple subnets may be used.
5. Routed networks (layer 3) require iSCSI digest to be enabled.

6. LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
7. iSCSI offload is currently supported on Dell PowerEdge Servers with the Broadcom NetXtreme II Network adapters (based on the Broadcom 5708 ASIC) with firmware v 4.0.3 (or later) and Driver Family Version 11.0/T4.1, A00 or later. To download the latest firmware/driver, please visit <http://support.dell.com>
8. The following NICs are not supported: 3COM-3C996B
9. Any Microsoft supported server/NIC for the listed operating system revision is supported.
10. Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
11. SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
12. Driver Version Microsoft iSCSI Initiator 2.07 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
13. Driver Version Microsoft iSCSI Initiator 2.08 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. MS iSCSI Initiator 2.08 only supports PowerPath 5.2 or later. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
14. Firmware Version 3.00.01.49
15. Driver Version 2.1.4.19
16. BIOS 1.14
17. QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
18. Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
19. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity Guide for additional information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
20. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
21. Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
22. Servers booting from external storage with QLA4010 iSCSI boards require Microsoft iSCSI Initiator 2.0 or 2.02 service to be installed. Note that HBA IQN must be altered prior to Windows installation. Refer to EMC Host Connectivity Guide for information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
23. Driver Version 2.1.4.19 Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed.
To obtain this hotfix, fill out the hotfix request form at <http://support.microsoft.com/hotfix/KBHotfix.aspx?kbnm=943545&kbln=en-us> STORPort Miniport Driver
24. Driver Version Microsoft iSCSI Initiator 2.06 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
25. Intel iSCSI boot is supported with the following adapters: PRO/1000 PF, PRO/1000 PT, PRO/1000 PT dual port, PRO/ 1000 VT quad port. Intel iSCSI boot is supported in the following Dell servers: PowerEdge 2900, 2950, 1950, 1900, 6800, 6850, SC1430, 840, 860, SC440, 6950, SC 1435 and 2970 . Please visit <http://support.dell.com> for the most currently supported firmware/driver revisions.
26. Broadcom iSCSI Boot is supported with the following adapters: Broadcom 5708 based Mezz card (PE1955), 5708 LOM, 5722 LOMs, 5722 NICs. Broadcom iSCSI Boot is supported on the 1950, PE2970, PE2950, PE6850, PE6950, PE1900, PE2900, PE6800, PE1955. Please visit <http://support.dell.com> for the most currently supported firmware/driver revisions.
27. iSCSI Boot from SAN supported on certain IBM BladeCenter models The use of multiple NICs for multi pathing purposes is not supported. Contact IBM support to obtain a list of supported blades and Microsoft Initiator version
28. Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
29. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
30. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
31. Support for Windows 2003 Storage Server is limited to the connection to EMC storage arrays. Currently, Windows 2003 Storage Server is not supported in target mode for iSCSI configurations.
32. Driver Version 2.1.3.26
33. BIOS 1.11
34. Firmware Version 3.0.0.16
35. Driver Version 2.1.3.28

- iSCSI offload is currently supported on Dell PowerEdge Servers with the Broadcom NetXtreme II Network adapters (based on the Broadcom 5708 ASIC) with firmware v 4.0.3 (or later) and Driver Family Version 11.0/T4.1, A00 or later. To download the latest firmware/driver, please visit <http://support.dell.com>
- The following NICs are not supported: 3COM-3C996B
- Any Microsoft supported server/NIC for the listed operating system revision is supported.
- Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
- SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
- Intel iSCSI boot is supported with the following adapters: PRO/1000 PF, PRO/1000 PT, PRO/1000 PT dual port, PRO/1000 VT quad port. Intel iSCSI boot is supported in the following Dell servers: PowerEdge 2900, 2950, 1950, 1900, 6800, 6850, SC1430, 840, 860, SC440, 6950, SC 1435 and 2970. Please visit <http://support.dell.com> for the most currently supported firmware/driver revisions.
- Servers booting from external storage with QLA4010 iSCSI boards require Microsoft iSCSI Initiator 2.0 or 2.02 service to be installed. Note that HBA IQN must be altered prior to Windows installation. Refer to EMC Host Connectivity Guide for information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
- Broadcom iSCSI Boot is supported with the following adapters: Broadcom 5708 based Mezz card (PE1955), 5708 LOM, 5722 LOMs, 5722 NICs.
- Broadcom iSCSI Boot is supported on the 1950, PE2970, PE2950, PE6850, PE6950, PE1900, PE2900, PE6800, PE1955. Please visit <http://support.dell.com> for the most currently supported firmware/driver revisions.
- iSCSI Boot from SAN supported on certain IBM BladeCenter models The use of multiple NICs for multi pathing purposes is not supported. Contact IBM support to obtain a list of supported blades and Microsoft Initiator version
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
- Driver Version Microsoft iSCSI Initiator 2.06 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- EMC provides documentation for iSCSI configurations that contains helpful information for using iSCSI with EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
- Powerpath iSCSI 1.1 is supported with Windows 2003 operating systems.
- Microsoft Dynamic Disks are not supported.
- Powerpath iSCSI 1.1 is not supported with Windows 2000 operating systems.
- Powerpath 4.3.1 or higher is supported. All paths may be on a single subnet, or multiple subnets may be used.
- BIOS 1.14
- Driver Version 2.1.4.19 Requires Microsoft STORPort hotfix Q943545. Please see <http://support.microsoft.com/kb/943545>. NOTE: Hotfix Q943545 requires a minimum of Service Pack 1 (SP1) to be installed before the hotfix can be installed. To obtain this hotfix, fill out the hotfix request form at <http://support.microsoft.com/hotfix/KBHotfix.aspx?kbnm=943545&kbln=en-us> STORPort Miniport Driver
- Firmware Version 3.00.01.49
- Support for Windows 2003 Storage Server is limited to the connection to EMC storage arrays. Currently, Windows 2003 Storage Server is not supported in target mode for iSCSI configurations.
- BIOS 1.11
- Firmware Version 3.0.0.16
- Driver Version 2.1.3.26
- Driver Version 2.1.3.28
- QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
- Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>

29. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
30. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
31. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
32. This iSCSI Exp Card DOES NOT support on the IBM blade server types HS21(7995,8853)
33. BIOS 1.09a
34. Driver Version 2.1.3.22
35. Firmware Version 2.00.00.45
36. Driver Version Microsoft iSCSI Initiator 2.07 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
37. Driver Version Microsoft iSCSI Initiator 2.08 Microsoft iSCSI Initiator software. NIC teaming with Microsoft iSCSI Initiator is not supported. MS iSCSI Initiator 2.08 only supports PowerPath 5.2 or later. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
38. Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
39. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.
40. Driver Version 2.1.4.19

Microsoft Windows 2008 [x64]

1. Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
2. Windows 2008 Server Core option is supported by EMC. Contact your server vendor to determine their support statement for Server Core.
3. Powerpath iSCSI 1.1 is supported with Windows 2003 operating systems.
4. Microsoft Dynamic Disks are not supported.
5. Powerpath 4.3.1 or higher is supported. All paths may be on a single subnet, or multiple subnets may be used.
6. Firmware Version 3.00.01.49
7. Servers booting from external storage with QLA4010 iSCSI boards require Microsoft iSCSI Initiator 2.0 or 2.02 service to be installed. Note that HBA IQN must be altered prior to Windows installation. Refer to EMC Host Connectivity Guide for information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
8. Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
9. QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
10. Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
11. SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
12. Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
13. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.
14. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
15. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
16. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
17. BIOS 1.14
18. Driver Version 2.1.4.19
19. Routed networks (layer 3) require iSCSI digest to be enabled.
20. LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
21. Driver Version Microsoft iSCSI Initiator NIC teaming with Microsoft iSCSI Initiator is not supported. Native to Windows 2008 Server installation.
22. EMC provides documentation for iSCSI configurations that contains helpful information for using iSCSI with EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
23. iSCSI offload is currently supported on Dell PowerEdge Servers with the Broadcom NetXtreme II Network adapters (based on the Broadcom 5708 ASIC) with firmware v 4.0.3 (or later) and Driver Family Version 11.0/T4.1, A00 or later. To download the latest firmware/driver, please visit <http://support.dell.com>
24. The following NICs are not supported: 3COM-3C996B
25. Any Microsoft supported server/NIC for the listed operating system revision is supported.
26. Driver Version 2.1.4.19 STORPort Miniport Driver
27. iSCSI Boot from SAN supported on certain IBM BladeCenter models The use of multiple NICs for multi pathing purposes is not supported. Contact IBM support to obtain a list of supported blades and Microsoft Initiator version

- QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
- Windows 2008 Server Core option is supported by EMC. Contact your server vendor to determine their support statement for Server Core.
- Servers booting from external storage with QLA4010 iSCSI boards require Microsoft iSCSI Initiator 2.0 or 2.02 service to be installed. Note that HBA IQN must be altered prior to Windows installation. Refer to EMC Host Connectivity Guide for information on changing IQN and setting up boot for servers requiring MS iSCSI Initiator service.
- Driver Version 2.1.4.19
- Firmware Version 3.00.01.49
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- BIOS 1.14
- Driver Version Microsoft iSCSI Initiator NIC teaming with Microsoft iSCSI Initiator is not supported. Native to Windows 2008 Server installation.
- EMC provides documentation for iSCSI configurations that contains helpful information for using iSCSI with EMC storage. Visit EMC Powerlink and download part number 300-000-603 for the Windows Host Connectivity Guide.
- iSCSI offload is currently supported on Dell PowerEdge Servers with the Broadcom NetXtreme II Network adapters (based on the Broadcom 5708 ASIC) with firmware v 4.0.3 (or later) and Driver Family Version 11.0/T4.1, A00 or later. To download the latest firmware/driver, please visit <http://support.dell.com>
- The following NICs are not supported: 3COM-3C996B
- Any Microsoft supported server/NIC for the listed operating system revision is supported.
- iSCSI Boot from SAN supported on certain IBM BladeCenter models The use of multiple NICs for multi pathing purposes is not supported. Contact IBM support to obtain a list of supported blades and Microsoft Initiator version
- Driver Version 2.1.4.19 STORPort Miniport Driver

Oracle Enterprise Linux [32-Bit]

| Oracle Enterprise Linux [32-Bit] | | | | | | |
|----------------------------------|---|---|--------------------------|---------------------|---------------|------------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |

| 2 | Oracle Enterprise Linux [32-Bit] 4: U4 ^{6, 18} , U5 ^{6, 13} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{9, 10, 11, 12, 14} , QLogic QLA4010-E-SP ^{9, 11, 15, 20, 21} , QLogic QLA4010C-E-SP ^{11, 15, 20, 21, 22} , QLogic QLA4050-E-SP ^{9, 11, 15, 16, 17} , QLogic QLA4050C-E-SP ^{9, 11, 15, 16, 17} | LAN Only ^{4, 7} | EMC CLARiiON AX150i | N | |
| 3 | Oracle Enterprise Linux [32-Bit]: 5.1 ^{5, 6, 56, 23} | Generic NIC 10/100 ^{1, 8} , Generic NIC GbE ^{1, 8} | LAN Only ^{4, 7} | EMC CLARiiON AX150i | N | See ^{2, 3, 4} |

- NIC teaming with the Linux software initiator is not supported.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.0.1.el5, 2.6.18-53.1.13.0.1.el5, 2.6.18-53.1.14.0.1.el5, 2.6.18-53.1.19.0.1.el5. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath emcpower pseudo device file names as well as native sd device file names.
- Routed networks (layer 3) require iSCSI digest to be enabled.
- Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
- Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Requires QLogic firmware version 2.00.00.07 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Driver Version 5.00.07 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.38
- Supported kernels: 2.6.9-55.0.0.0.2.EL, 2.6.9-55.0.2.0.1.EL, 2.6.9-55.0.6.0.1.EL, 2.6.9-55.0.9.0.1.EL, and 2.6.9-55.0.12.0.1.EL. Confirm kernel support with server vendor.
- BIOS 1.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.9-42.0.0.0.1.EL, 2.6.9-42.0.10.0.1.EL, 2.6.9-42.0.3.0.2.EL, and 2.6.9-42.0.8.0.1.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 4.0.1.11 Driver is integrated into the kernel.
- Firmware Version 3.00.00.16
- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Supported kernels: 2.6.18-8.EL5, 2.6.18-8.0.0.4.1.EL5, 2.6.18-8.1.4.0.1.EL5, 2.6.18-8.1.6.0.1.EL5, 2.6.18-8.1.8.0.1.EL5, 2.6.18-8.1.10.0.1.EL5, 2.6.18-8.1.14.0.2.EL5, 2.6.18-8.1.15.0.1.EL5, 2.6.18-53.1.21.0.1.el5. Confirm kernel support with server vendor.

- EMC supports the following filesystems: ext2, ext3, gfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPO.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.18-8.EL5, 2.6.18-8.1.1.EL5, 2.6.18-8.1.3.EL5, 2.6.18-8.1.4.EL5, 2.6.18-8.1.6.EL5, 2.6.18-8.1.8.EL5, 2.6.18-8.1.10.EL5, 2.6.18-8.1.14.EL5, and 2.6.18-8.1.15.EL5. Confirm kernel support with server vendor.
- Driver Version 5.01.01.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- BIOS 1.13 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Requires QLogic firmware version 2.00.00.07 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.07
- BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 3.27
- Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- Driver Version iSCSI initiator 3.6.3
- NIC teaming with the Linux software initiator is not supported.
- Driver Version iSCSI Software Initiator 4.0.1.11
- Firmware Version 3.00.00.16
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
- Driver Version 3.27 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04-d4 Driver is integrated into the kernel.
- Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL, 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
- The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Driver Version 5.01.00-k8_rhel5 Driver is integrated into the kernel.
- Driver Version iSCSI Software Initiator 4.0.1.11 The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information. Driver is integrated into the kernel.
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- Driver Version 5.01.00-k8_rhel5.2-01 Driver is integrated into the kernel.
- Driver Version 3.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.9-22.EL, 2.6.9-22.0.1.EL, 2.6.9-22.0.2.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com> Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Driver Version iSCSI Software Initiator 4.0.1.11 Driver is integrated into the kernel.
- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- Driver Version 3.22
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI initiator 3.6.3 Driver is integrated into the kernel.

Red Hat RHEL [AMD-64]

| Red Hat RHEL [AMD-64] | | | | | | |
|-----------------------|--|--|--------------------------|---------------------|---------------|---------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |
| 1 | Red Hat RHEL [AMD-64] 3.0 U7 AS/ES ¹² | Generic NIC 10/100 ^{13, 14} , Generic NIC GbE ^{13, 14} , QLogic QLA4010-E-SP ^{4, 6, 8, 20} , QLogic QLA4010C-E-SP ^{4, 6, 20} | LAN Only ^{2, 7} | EMC CLARiiON AX150i | N | See ^{1, 2} |
| 2 | Red Hat RHEL [AMD-64] 3.0 U7 AS/ES ¹² | IBM QLogic iSCSI Exp. Card for BladeCenter (26K6487 ^{8, 9, 10, 11} , QLogic QLA4050-E-SP ^{8, 9, 15, 16, 17} , QLogic QLA4050C-E-SP ^{8, 9, 15, 16, 17} | LAN Only ^{2, 7} | EMC CLARiiON AX150i | N | |
| 3 | Red Hat RHEL [AMD-64]: 3.0 U8 AS/ES ¹⁸ , 3.9 AS/ES ³ | Generic NIC 10/100 ^{14, 19} , Generic NIC GbE ^{14, 19} , QLogic QLA4010-E-SP ^{4, 5, 6, 8} , QLogic QLA4010C-E-SP ^{4, 5, 6} | LAN Only ^{2, 7} | EMC CLARiiON AX150i | N | See ^{1, 2} |
| 4 | Red Hat RHEL [AMD-64]: 3.0 U8 AS/ES ¹⁸ , 3.9 AS/ES ³ | IBM QLogic iSCSI Exp. Card for BladeCenter (26K6487 ^{5, 8, 10, 11} , QLogic QLA4050-E-SP ^{5, 8, 15, 16, 17} , QLogic QLA4050C-E-SP ^{5, 8, 15, 16, 17} | LAN Only ^{2, 7} | EMC CLARiiON AX150i | N | |

- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Supported kernels: 2.4.21-50.EL, 2.4.21-51.EL, 2.4.21-52.EL, 2.4.21-53.EL, 2.4.21-57.EL, 2.4.21-58.EL. Confirm kernel support with server vendor.
- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 3.27
- Firmware Version 3.00.00.16
- Routed networks (layer 3) require iSCSI digest to be enabled.
- Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Driver Version 3.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.4.21-40.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI initiator 3.6.3 Driver is integrated into the kernel.
- NIC teaming with the Linux software initiator is not supported.
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Supported kernels: 2.4.21-47.EL, 2.4.21-47.0.1.EL. Confirm support with server vendor.
- Driver Version iSCSI initiator 3.6.3
- Driver Version 3.22

Red Hat RHEL [EM64T]

| Red Hat RHEL [EM64T] | | | | | | |
|----------------------|--|---|--------------------------|---------------------|---------------|---------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |

| 10 | Red Hat RHEL [x86_64] 5.2 ^{7, 24, 25, 26} | HPQ QLogic QMH4062 1GbE iSCSI HBA for HP c-Class BladeSystem (488074-B21) ^{12, 27, 28} , QLogic QLA4010-E-SP ^{1, 3, 5, 13, 28} , QLogic QLA4010C-E-SP ^{1, 3, 5, 13, 28} , QLogic QLA4050-E-SP ^{5, 12, 13, 14, 28} , QLogic QLA4050C-E-SP ^{5, 12, 13, 14, 28} , QLogic QLE4060C-E-SP ^{12, 27, 28} , QLogic QLE4062C-E-SP ^{12, 27, 28} | LAN Only ^{8, 9} | EMC CLARiiON AX150i | N | |
| 11 | Red Hat RHEL [x86_64] 4.6 AS/ES ^{7, 38, 4, 7} AS/ES ^{7, 32} | Generic NIC 10/100 ^{22, 33} , Generic NIC GbE ^{22, 33} | LAN Only ^{8, 9} | EMC CLARiiON AX150i | N | See ^{9, 21} |
| 12 | Red Hat RHEL [x86_64] 5.0 ^{7, 25, 31, 5, 17, 25, 34, 5, 27, 24, 25, 26} | Generic NIC 10/100 ^{22, 37} , Generic NIC GbE ^{22, 37} | LAN Only ^{8, 9} | EMC CLARiiON AX150i | N | See ^{9, 21, 36} |

- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04-d4 Driver is integrated into the kernel.
- Firmware Version 3.00.00.16
- Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Supported kernels: 2.6.9-55.EL, 2.6.9-55.0.2.EL., 2.6.9-55.0.6.EL, 2.6.9-55.0.9.EL, 2.6.9-55.0.12.EL, 2.6.9-55.0.14.EL. Confirm kernel support with server vendor.
- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Supported kernels: 2.6.9-42.EL, 2.6.9-42.0.2.EL, 2.6.9-42.0.3.EL, 2.6.9-42.0.8.EL, 2.6.9-42.0.10.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.07
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires SANSurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Requires QLogic firmware version 2.00.00.07 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Supported kernels: 2.6.9-34.EL, 2.6.9-34.0.1.EL, 2.6.9-34.0.2.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 4.0.1.11 Driver is integrated into the kernel.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- NIC teaming with the Linux software initiator is not supported.
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com> Requires SANSurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Supported kernels: 2.6.18-92.el5, 2.6.18-92.1.1.el5, 2.6.18-92.1.6.el5, 2.6.18-92.1.10.el5, 2.6.18-92.1.13.el5, 2.6.18-92.1.17.el5, 2.6.18-92.1.22.el5, 2.6.18-92.1.24.el5. Confirm kernel support with server vendor.
- EMC supports the following filesystems: ext2, ext3, gfs unless otherwise noted in the ESM. If there is a customer requirement for a different filesystem, please submit an RPQ.
- Native multipathing is supported on boot-from-SAN configurations. Please refer to the operating system vendor's documentation for installation instructions. Also refer to Native Multipath Failover Based on DM-MPIO for v2.6.x Linux Kernel and EMC Storage Arrays Configuration Guide found on <http://powerlink.emc.com> for any additional guidance.
- BIOS 1.13 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.01.00-k8_rhel5.2-01 Driver is integrated into the kernel.
- Driver Version iSCSI Software Initiator 4.0.1.11
- Driver Version 5.01.01.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.18-8.EL5, 2.6.18-8.1.1.EL5, 2.6.18-8.1.3.EL5, 2.6.18-8.1.4.EL5, 2.6.18-8.1.6.EL5, 2.6.18-8.1.8.EL5, 2.6.18-8.1.10.EL5, 2.6.18-8.1.14.EL5, and 2.6.18-8.1.15.el5. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-78.EL, 2.6.9-78.0.1.EL, 2.6.9-78.0.5.EL, 2.6.9-78.0.8.EL, 2.6.9-78.0.13.EL. Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 4.0.1.11 The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information. Driver is integrated into the kernel.
- Supported kernels: 2.6.18-53.el5, 2.6.18-53.1.4.el5, 2.6.18-53.1.6.el5, 2.6.18-53.1.13.el5, 2.6.18-53.1.14.el5, 2.6.18-53.1.19.el5, 2.6.18-53.1.21.el5. Confirm kernel support with server vendor.
- Driver Version 5.01.00-k8_rhel5 Driver is integrated into the kernel.
- The Linux Host Connectivity Guide, p/n 300-003-865, can be found on EMC Powerlink (<http://powerlink.emc.com>).
- Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
- Supported kernels: 2.6.9-67.EL, 2.6.9-67.0.1.EL, 2.6.9-67.0.4.EL, 2.6.9-67.0.7.EL, 2.6.9-67.0.15.EL, 2.6.9-67.0.20.EL, 2.6.9-67.0.22.EL. Confirm kernel support with server vendor.
- Supported kernels: 2.6.9-22.EL, 2.6.9-22.0.1.EL, 2.6.9-22.0.2.EL. Confirm kernel support with server vendor.
- Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 3.23 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>

SuSE SLES [32-Bit]

| SuSE SLES [32-Bit] | | | | | | |
|--------------------|---|--|--------------------------|---------------------|---------------|----------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |
| 1 | SuSE SLES [32-Bit] 10 SP1, 5, 13, 30 | Generic NIC 10/100 ^{21, 31} , Generic NIC GbE ^{21, 31} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 2 | SuSE SLES [32-Bit] 10 SP2, 5, 13, 34 | Generic NIC 10/100 ^{21, 33} , Generic NIC GbE ^{21, 33} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 3 | SuSE SLES [32-Bit] 10 ^{5, 6} | Generic NIC 10/100 ^{21, 23} , Generic NIC GbE ^{21, 24} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 4 | SuSE SLES [32-Bit] 10 ^{5, 6} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{2, 4, 10, 11} , QLogic QLA4010-E-SP ^{2, 3, 4, 15, 22} , QLogic QLA4010C-E-SP ^{2, 3, 4, 15, 22} , QLogic QLA4050-E-SP ^{1, 2, 3, 4, 9} , QLogic QLA4050C-E-SP ^{1, 2, 3, 4, 9} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | |
| 5 | SuSE SLES [32-Bit] 9 SP2 ^{5, 13, 25} | Generic NIC 10/100 ^{21, 29} , Generic NIC GbE ^{21, 29} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 6 | SuSE SLES [32-Bit] 9 SP2 ^{5, 13, 25} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{4, 10, 11, 26} , QLogic QLA4010-E-SP ^{3, 4, 15, 22, 28} , QLogic QLA4010C-E-SP ^{3, 4, 15, 22, 27, 28} , QLogic QLA4050-E-SP ^{1, 3, 4, 9, 26} , QLogic QLA4050C-E-SP ^{1, 3, 4, 9, 26} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | |
| 7 | SuSE SLES [32-Bit] 9 SP3 ^{5, 13, 14} | Generic NIC 10/100 ^{19, 21} , Generic NIC GbE ^{19, 21} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 8 | SuSE SLES [32-Bit] 9 SP3 ^{5, 13, 14} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{4, 10, 11, 12} , QLogic QLA4010-E-SP ^{3, 4, 12, 15, 22} , QLogic QLA4010C-E-SP ^{3, 4, 12, 15, 22} , QLogic QLA4050-E-SP ^{1, 3, 4, 9, 12} , QLogic QLA4050C-E-SP ^{1, 3, 4, 9, 32} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | |
| 9 | SuSE SLES [32-Bit] 9 SP4 ^{5, 18} | Generic NIC 10/100 ^{21, 35} , Generic NIC GbE ^{21, 35} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | See ^{8, 20} |
| 10 | SuSE SLES [32-Bit] 9 SP4 ^{5, 18} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{4, 10, 11, 16} , QLogic QLA4010-E-SP ^{3, 4, 15, 16, 17} , QLogic QLA4010C-E-SP ^{3, 4, 15, 16, 17} , QLogic QLA4050-E-SP ^{1, 3, 4, 9, 16} , QLogic QLA4050C-E-SP ^{1, 3, 4, 9, 16} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N | |

1. BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
2. Driver Version 5.00.04-d5 Driver is integrated into the kernel.
3. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
4. Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
5. The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
6. Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.27-0.6, 2.6.16.27-0.9. Confirm kernel support with server vendor. PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.
7. Routed networks (layer 3) require iSCSI digest to be enabled.
8. LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
9. Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
10. BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
11. Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
12. Driver Version 5.00.04 Driver is integrated into the kernel.
13. Novell OES is only supported with Fibre channel connectivity.
14. Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3. Confirm kernel support with server vendor.
15. BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
16. Driver Version 5.00.07 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
17. Firmware Version 3.00.00.16 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
18. Supported kernels: 2.6.5-7.308, 2.6.5-7.311, 2.6.5-7.312, 2.6.5-7.314, 2.6.5-7.315. The 32bit kernel 2.6.5-7.311 is not supported with PowerPath 5.1 SP1. Confirm kernel support with server vendor.
19. Driver Version iSCSI Software Initiator 4.0.188.18 The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information. Driver is integrated into the kernel.
20. The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
21. NIC teaming with the Linux software initiator is not supported.
22. Firmware Version 3.00.00.16
23. Driver Version iSCSI Software Initiator 1.0-595 DS-M Connect ONLY interoperates with ControlCenter Host Agent, Symmetrix SDM Agent, Storage Agent for Symmetrix.
24. Driver Version iSCSI Software Initiator 1.0-595 Driver is integrated into the kernel.
25. Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7. Confirm kernel support with server vendor.
26. Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
27. Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com> Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
28. Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
29. Driver Version iSCSI Software Initiator 4.0.188.18 Driver is integrated into the kernel.
30. Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
31. Driver Version iSCSI Software Initiator 1.0-795 Driver is integrated into the kernel.
32. Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
33. Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
34. Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
35. Driver Version iSCSI Software Initiator 4.0.1.11 The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information. Driver is integrated into the kernel.

SuSE SLES [x86_64]

| SuSE SLES [x86_64] | | | | | | |
|--------------------|--|---|--------------------------|---------------------|---------------|---------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot | Comments |
| 1 | SuSE SLES [x86_64] 10 SP1 ^{1, 22, 23, 24} | Generic NIC 10/100 ^{6, 21} , Generic NIC GbE ^{6, 21} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | See ^{4, 5} |
| 2 | SuSE SLES [x86_64] 10 SP2 ^{1, 23, 28, 29} | Generic NIC 10/100 ^{6, 30} , Generic NIC GbE ^{6, 30} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | See ^{4, 5} |
| 3 | SuSE SLES [x86_64] 10 ^{1, 16} | Generic NIC 10/100 ^{6, 17} , Generic NIC GbE ^{6, 17} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | See ^{4, 5} |
| 4 | SuSE SLES [x86_64] 10 ^{1, 16} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{11, 13, 14, 27} QLogic QLA4010-E-SP ^{8, 10, 11, 19, 27} QLogic QLA4010C-E-SP ^{8, 10, 11, 19, 27} QLogic QLA4050-E-SP ^{10, 11, 25, 26, 27} QLogic QLA4050C-E-SP ^{10, 11, 25, 26, 27} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | |
| 5 | SuSE SLES [x86_64] 9 SP2 ^{1, 2} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{11, 13, 14, 15} QLogic QLA4010-E-SP ^{8, 10, 11, 19, 20} QLogic QLA4010C-E-SP ^{8, 10, 11, 19, 20} QLogic QLA4050-E-SP ^{10, 11, 15, 25, 26} QLogic QLA4050C-E-SP ^{10, 11, 15, 25, 26} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | |
| 6 | SuSE SLES [x86_64] 9 SP3 ^{1, 18} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{11, 13, 14, 20} QLogic QLA4010-E-SP ^{8, 10, 11, 19, 20} QLogic QLA4010C-E-SP ^{8, 10, 11, 19, 20} QLogic QLA4050-E-SP ^{10, 11, 20, 25, 26} QLogic QLA4050C-E-SP ^{10, 11, 25, 26, 32} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | |
| 7 | SuSE SLES [x86_64] 9 SP4 ¹ | Generic NIC 10/100 ^{6, 31} , Generic NIC GbE ^{6, 31} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | See ^{4, 5} |
| 8 | SuSE SLES [x86_64] 9 SP4 ¹ | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{11, 12, 13, 14} QLogic QLA4010-E-SP ^{8, 9, 10, 11, 12} QLogic QLA4010C-E-SP ^{8, 9, 10, 11, 12} QLogic QLA4050-E-SP ^{10, 11, 12, 25, 26} QLogic QLA4050C-E-SP ^{10, 11, 12, 25, 26} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | |
| 9 | SuSE SLES [x86_64] 9: SP2 ^{1, 2, SP3^{1, 18}} | Generic NIC 10/100 ^{6, 7} , Generic NIC GbE ^{6, 7} | LAN Only ^{3, 4} | EMC CLARiiON AX150i | N | See ^{4, 5} |

- The LVM included as part of this update is supported and can be used in conjunction with PowerPath empower pseudo device file names as well as native sd device file names.
- Supported kernels: 2.6.5-7.201, 2.6.5-7.202.7.
Confirm kernel support with server vendor.
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information.
- NIC teaming with the Linux software initiator is not supported.
- Driver Version iSCSI Software Initiator 4.0.188.18 Driver is integrated into the kernel.
- BIOS 1.11 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 3.00.00.16 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Driver Version 5.00.07 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.09a Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Supported kernels: 2.6.16.21-0.8, 2.6.16.21-0.15, 2.6.16.21-0.25, 2.6.16.21-0.6, 2.6.16.27-0.9.
Confirm kernel support with server vendor.
PowerPath 5.0 support begins with kernel 2.6.16.27-0.6.
- Driver Version iSCSI Software Initiator 1.0-595 Driver is integrated into the kernel.
- Supported kernels: 2.6.5-7.244, 2.6.5-7.252, 2.6.5-7.257, 2.6.5-7.267, 2.6.5-7.276, 2.6.5-7.282, 2.6.5-7.283, 2.6.5-7.286, 2.6.5-7.287.3.
Confirm kernel support with server vendor.
- Firmware Version 3.00.00.16
- Driver Version 5.00.04 Driver is integrated into the kernel.
- Driver Version iSCSI Software Initiator 1.0-795 Driver is integrated into the kernel.
- Supported kernels: 2.6.16.46-0.12, 2.6.16.46-0.14, 2.6.16.53-0.8, 2.6.16.53-0.16, 2.6.16.54-0.2.3, 2.6.16.54-0.2.5, 2.6.16.54-0.2.8. Confirm kernel support with server vendor.
- Novell OES is only supported with Fibre channel connectivity.
- Novell OES 2 is supported with Linux native MPIO or via RPQ for EMC PowerPath.
- Firmware Version 3.01.00.49 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- BIOS 1.08 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04-d5 Driver is integrated into the kernel.
- Novell OES 2 is supported with this update.
- Supported kernels: 2.6.16.60-0.21, 2.6.16.60-0.23, 2.6.16.60-0.27, 2.6.16.60-0.30, 2.6.16.60-0.31, 2.6.16.60-0.33, 2.6.16.60-0.34, 2.6.16.60-0.35. Confirm kernel support with server vendor.
- Driver Version iSCSI Software Initiator 2.x Only the software initiator driver native to this Linux distributor's release is supported. The iSCSI utilities are needed to configure the software initiator and are a separate package from the driver. Please refer to the Linux distributor for the supported version with their distribution.
- Driver Version iSCSI Software Initiator 4.0.1.11 The software initiator is part of the operating system and not an EMC software product. Please refer to the required release note "EMC Linux iSCSI Attach Release Notes", p/n 300-002-672, that can be found on EMC's Powerlink website in Support -> The Document Library -> Host Connectivity for the complete installation information. Driver is integrated into the kernel.
- Driver Version 5.00.04 Driver is integrated into the kernel. Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Driver Version 5.00.04 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com> Requires SANsurfer for installation and configuration and is available for download from the EMC-approved section of the QLogic website at <http://www.qlogic.com>
- Requires QLogic firmware version 3.00.00.4 available from the EMC-approved section of the QLogic website at <http://www.qlogic.com>

VMware ESX Server

| VMware ESX Server | | | | | |
|-------------------|--|---|--------------------------|---------------------|-------------------|
| No. | Operating System | Host Bus Adapter | Network Configuration | Storage Array | External Boot |
| 1 | VMware ESX Server: 3.0.1 ^{10, 11} , 3.0.2, 3.0.3 | QLogic QLA4050C-E-SP ^{1, 4, 5, 6} , QLogic QLA4052C-E-SP ^{1, 4, 5, 6} | LAN Only ^{7, 8} | EMC CLARiiON AX150i | Y ^{2, 3} |
| 2 | VMware ESX Server: 3.0.1 ^{10, 11} , 3.0.2, 3.0.3, 3.0 ^{10, 11} | Generic NIC GbE ⁹ | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N |
| 3 | VMware ESX Server: 3.5 ¹¹ , 3i ¹¹ | Generic NIC GbE ¹² | LAN Only ^{7, 8} | EMC CLARiiON AX150i | N |

- BIOS 1.09 Available at <http://www.qlogic.com>
- Virtual machines running on VMWare ESX are supported booting from the array.
- VMWare ESX Server itself is supported booting from external array.
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Driver Version 3.24 This driver is included in the VMware ESX kernel.
- Firmware Version 2.00.00.45 Available in the EMC-approved section of the QLogic website. <http://www.qlogic.com>
- Routed networks (layer 3) require iSCSI digest to be enabled.
- LAN support includes direct connect (layer 2), switched (layer 2), or routed (layer 3) networks. Network should be designed to minimize packet loss or any other interruptions.
- Driver Version iSCSI initiator 3.4.2 This driver is included in the VMware ESX kernel.
-

For details on Microsoft Cluster Services (MSCS) support with Windows guest operating systems, refer to the Storage/SAN Compatibility Guide For ESX Server 3.x on www.vmware.com.

11. For a list of supported guest operating systems, refer to the "Guest Operating System Installation Guide" at http://www.vmware.com/pdf/GuestOS_guide.pdf
12. Driver Version iSCSI initiator 3.6.3 This driver is included in the VMware ESX kernel.

iSCSI Clusters

Microsoft Windows 2003 [x64]

This table describes the support statements for iSCSI Clusters.

| Microsoft Windows 2003 [x64] | | | | | | |
|------------------------------|---|---|---|----------------------------------|-----------------------------|---------------------------|
| No. | Operating System | Cluster Software | Host Bus Adapter | Storage Array | Max # Nodes | Comments |

1. Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
2. Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
3. QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
4. Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
5. SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
6. Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
7. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.
8. QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
9. PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
10. Remote administration of Windows Computer Cluster 2003 can be accomplished via installed remote components. These remote components are supported on Windows 2003 operating systems with Service Pack 1 or higher (R2 also supported), Windows XP Professional x64 version, and Windows XP Professional x86 with service pack 2.
11. Individual nodes in a Compute Cluster Server configuration connected to EMC storage must use a valid server/HBA combination from the Base Connectivity tables.
12. Refer to <http://www.microsoft.com/windowsserver2003/ccs/faq.mspx> for more information.
13. Any Microsoft supported server/NIC for the listed operating system revision is supported.
14. MS iSCSI Initiator 2.08 only supports PowerPath 5.2 or later.
15. Microsoft iSCSI Initiator required. Refer to Native iSCSI table for currently supported initiator version.
16. Booting from external storage for iSCSI clusters is not supported.
17. iSCSI based cluster configurations require Microsoft QFE 824354. Please contact Microsoft Product Support Services for this QFE.
18. Booting from external array is supported for iSCSI clusters with QLA4010 iSCSI HBAs. Refer to Native iSCSI table for supported BIOS versions.
19. Microsoft Dynamic Disks are not supported.
20. QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
21. EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.

Microsoft Windows 2003 [x86]

This table describes the support statements for iSCSI Clusters.

| Microsoft Windows 2003 [x86] | | | | | | |
|------------------------------|---|-----------------------------------|---|----------------------------------|-------------|-------------------------|
| No. | Operating System | Cluster Software | Host Bus Adapter | Storage Array | Max # Nodes | Comments |
| 1 | Microsoft Windows 2003 [x86] DataCenter: R2 SP2, SP2; Microsoft Windows 2003 [x86] Enterprise Edition: R2, R2 SP2, SP1, SP2 | Microsoft MSCS ^{1, 2, 9} | Generic NIC GbE ^{9, 17, 18} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{3, 5, 16} |
| 2 | Microsoft Windows 2003 [x86] DataCenter: R2 SP2, SP2; Microsoft Windows 2003 [x86] Enterprise Edition: R2, R2 SP2, SP1, SP2; Microsoft Windows 2003 [x86] Storage: Server, Server SP1 | Microsoft MSCS ^{1, 2} | IBM QLogic iSCSI Exp Card for BladeCenter (26K6487) ^{7, 8} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{3, 4, 5} |
| 3 | Microsoft Windows 2003 [x86] DataCenter: R2 SP2, SP2; Microsoft Windows 2003 [x86] Enterprise Edition: R2, R2 SP2, SP1, SP2; Microsoft Windows 2003 [x86] Storage: Server, Server SP1 | Microsoft MSCS ^{1, 2, 9} | QLogic: QLA4050-E-SP ^{7, 8, 9, 10, 11, 12, 13, 14, 15} , QLA4050C-E-SP ^{7, 8, 9, 10, 11, 12, 13, 14, 15} , QLA4052C-E-SP ^{7, 8, 9, 10, 11, 12, 13, 14, 15} , QLE4060C-E-SP ^{7, 8, 9, 10, 11, 12, 13, 14, 15} , QLE4062C-E-SP ^{7, 8, 9, 10, 11, 12, 13, 14, 15} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{3, 4, 5} |

| Microsoft Windows 2003 [x86] | | | | | | |

| No. | Operating System | Cluster Software | Host Bus Adapter | Storage Array | Max # Nodes | Comments |
| 4 | Microsoft Windows 2003 [x86] Enterprise Edition: R2, SP1; Microsoft Windows 2003 [x86] Storage: Server, Server SP1 | Microsoft MSCS ^{1, 2, 9} | QLogic: QLA4010-E-SP ^{8, 9, 10} , QLA4010C-E-SP ^{8, 9, 10} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{3, 4, 5} |

- Microsoft iSCSI Initiator required. Refer to Native iSCSI table for currently supported initiator version.
- Booting from external storage for iSCSI clusters is not supported.
- iSCSI based cluster configurations require Microsoft QFE 824354. Please contact Microsoft Product Support Services for this QFE.
- Booting from external array is supported for iSCSI clusters with QLA4010 iSCSI HBAs. Refer to Native iSCSI table for supported BIOS versions.
- Microsoft Dynamic Disks are not supported.
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
- Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
- QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
- PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
- QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
- SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
- Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
- QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.
- EMC provides troubleshooting and other technical notes for MSCS cluster solutions. Visit EMC Powerlink and download part number 300-000-603 for the EMC Host Connectivity Guide for Windows.
- Any Microsoft supported server/NIC for the listed operating system revision is supported.
- MS iSCSI Initiator 2.08 only supports PowerPath 5.2 or later.

Microsoft Windows 2008 [IA64]

This table describes the support statements for iSCSI Clusters.

| Microsoft Windows 2008 [IA64] | | | | | | |
|-------------------------------|--|---|---|----------------------------------|-------------|------------------------|
| No. | Operating System | Cluster Software | Host Bus Adapter | Storage Array | Max # Nodes | Comments |
| 1 | Microsoft Windows 2008 [IA64] for Itanium-Based Systems ⁸ | Microsoft: Failover Clustering ^{5, 6, 7, 11, 12} , MSCS ^{5, 6, 7} | QLogic: QLA4010-E-SP ^{7, 9, 10} , QLA4010C-E-SP ^{7, 9, 10} , QLA4050-E-SP ^{7, 9, 10, 13, 14, 15, 16, 17, 18} , QLA4050C-E-SP ^{7, 9, 10, 13, 14, 15, 16, 17, 18} , QLA4052C-E-SP ^{7, 9, 10, 13, 14, 15, 16, 17, 18} , QLE4060C-E-SP ^{7, 9, 13, 14, 15, 16, 17, 18} , QLE4062C-E-SP ^{7, 9, 13, 14, 15, 16, 17, 18} | EMC CLARiiON AX150i ⁴ | HA: 8 | See ^{1, 2, 3} |

- iSCSI based cluster configurations require Microsoft QFE 824354. Please contact Microsoft Product Support Services for this QFE.
- Booting from external array is supported for iSCSI clusters with QLA4010 iSCSI HBAs. Refer to Native iSCSI table for supported BIOS versions.
- Microsoft Dynamic Disks are not supported.
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
- Microsoft iSCSI Initiator required. Refer to Native iSCSI table for currently supported initiator version.
- Booting from external storage for iSCSI clusters is not supported.
- PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- Windows 2008 Server Core option is supported by EMC. Contact your server vendor to determine their support statement for Server Core.
- QLogic iSCSI HBAs are supported in any server listed in the ESM Fibre Channel tables that list support for the QLA2340 HBAs with the same operating system version listed here.
- QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator.
- Support of MSCS only qualified for active-passive configuration
- Microsoft Cluster Server (MSCS) in iSCSI supports minimum R26 Flare release version xx.26.xxx.5.007.
- Clustered hosts may access shared Symmetrix LUNs via iSCSI or Fibre Channel (iSCSI on one node, Fibre Channel on another.)
- QLA4010 iSCSI boards booting from external storage require "Spanning Tree" features to be disabled on network switches used in the boot path.
- Microsoft Initiator software version 2.0 and later automatically forces IQN's to lower-case. This may require array-side host access reconfiguration.
- SPC-2 flag must be enabled for iSCSI Symmetrix configurations.
- Configuration utility for QLogic iSCSI HBAs is QLogic SANsurfer available at <http://www.qlogic.com>
- QLogic iSCSI HBAs require the Microsoft iSCSI Software Initiator Service to be installed. The Service is required by Microsoft and is different from the full Microsoft iSCSI Software Initiator. Refer to the EMC Host Connectivity guide for additional information on Windows iSCSI components and the Microsoft iSCSI Software Initiator usage.

Microsoft Windows 2008 [x64]

This table describes the support statements for iSCSI Clusters.

| Microsoft Windows 2008 [x64] | | | | | | |
|------------------------------|--|---|---|----------------------------------|-------------|---------------------------|
| No. | Operating System | Cluster Software | Host Bus Adapter | Storage Array | Max # Nodes | Comments |
| 1 | Microsoft Windows 2008 [x64]: DataCenter ¹⁷ , Enterprise Edition ¹⁷ | Microsoft: Failover Clustering ^{1, 2, 3, 4, 5} , MSCS ^{3, 4, 5} | Generic NIC GbE ^{20, 21} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{14, 16, 19} |
| 2 | Microsoft Windows 2008 [x64]: DataCenter ¹⁷ , Enterprise Edition ¹⁷ , Standard Edition | Microsoft: Failover Clustering ^{1, 2, 3, 4, 5} , MSCS ^{3, 4, 5} | QLogic: QLA4010-E-SP ^{5, 13, 18} , QLA4010C-E-SP ^{5, 13, 18} , QLA4050-E-SP ^{5, 7, 8, 9, 10, 11, 12, 13, 18} , QLA4050C-E-SP ^{5, 7, 8, 9, 10, 11, 12, 13, 18} , QLA4052C-E-SP ^{5, 7, 8, 9, 10, 11, 12, 13, 18} , QLE4060C-E-SP ^{5, 7, 8, 9, 10, 11, 12, 13} , QLE4062C-E-SP ^{5, 7, 8, 9, 10, 11, 12, 13} | EMC CLARiiON AX150i ⁶ | HA: 8 | See ^{14, 15, 16} |

- Support of MSCS only qualified for active-passive configuration
- Microsoft Cluster Server (MSCS) in iSCSI supports minimum R26 Flare release version xx.26.xxx.5.007.
- Microsoft iSCSI Initiator required. Refer to Native iSCSI table for currently supported initiator version.
- Booting from external storage for iSCSI clusters is not supported.
- PowerPath 5.0.0 is not supported with Microsoft iSCSI Initiator software and Microsoft Cluster Server (MSCS)
- Maximum number of iSCSI initiators that can log into an iSCSI target port is 8
